Modifiers (See Appendix A for definitions)

- **22** Increased Procedural Services
- **23** Unusual Anesthesia
- **24** Unrelated Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional During a Postoperative Period
- **25** Significant, Separately Identifiable Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service
- **26** Professional Component
- **32** Mandated Services
- **33** Preventive Services
- **47** Anesthesia by Surgeon
- **50** Bilateral Procedure
- **51** Multiple Procedures
- **52** Reduced Services
- **53** Discontinued Procedure
- **54** Surgical Care Only
- **55** Postoperative Management Only
- **56** Preoperative Management Only
- **57** Decision for Surgery

58 Staged or Related Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period
59 Distinct Procedural Service
62 Two Surgeons
63 Procedure Performed on Infants less than 4 kg
66 Surgical Team
76 Repeat Procedure or Service by Same Physician or Other Qualified Health Care Professional
77 Repeat Procedure by Another Physician or Other Qualified Health Care Professional
78 Unplanned Return to the Operating/Procedure Room by the Same Physician or Other Qualified Health Care Professional Following Initial Procedure for a Related Procedure During the Postoperative Period
79 Unrelated Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period
80 Assistant Surgeon
81 Minimum Assistant Surgeon
82 Assistant Surgeon (when qualified resident surgeon not available)
90 Reference (Outside) Laboratory
91 Repeat Clinical Diagnostic Laboratory Test
92 Alternative Laboratory Platform Testing
93 Synchronous Telemedicine Service Rendered Via Telephone or Other Real-Time Interactive Audio-Only Telecommunications System
95 Synchronous Telemedicine Service Rendered via a Real-Time Interactive Audio and Video Telecommunications System
96 Habilitative Services
97 Rehabilitative Services
99 Multiple Modifiers

Category II Modifiers

1P Performance Measure Exclusion Modifier due to Medical Reasons
2P Performance Measure Exclusion Modifier due to Patient Reasons
3P Performance Measure Exclusion Modifier due to System Reasons
8P Performance measure reporting modifier–action not performed, reason not otherwise specified

Anesthesia Physical Status Modifiers

P1 A normal healthy patient
P2 A patient with mild systemic disease
P3 A patient with severe systemic disease
P4 A patient with severe systemic disease that is a constant threat to life
P5 A moribund patient who is not expected to survive without the operation
P6 A declared brain-dead patient whose organs are being removed for donor purposes

Modifiers Approved for Hospital Outpatient Use

Level I (CPT)

25 Significant, Separately Identifiable Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service
27 Multiple Outpatient Hospital E/M Encounters on the Same Date
33 Preventive Services
50 Bilateral Procedure
52 Reduced Services
58 Staged or Related Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period
59 Distinct Procedural Service
73 Discontinued Outpatient Procedure Prior to Anesthesia Administration
74 Discontinued Outpatient Procedure After Anesthesia Administration
76 Repeat Procedure or Service by Same Physician or Other Qualified Health Care Professional
77 Repeat Procedure by Another Physician or Other Qualified Health Care Professional
78 Unplanned Return to the Operating/Procedure Room by the Same Physician or Other Qualified Health Care Professional Following Initial Procedure for a Related Procedure During the Postoperative Period
79 Unrelated Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period
91 Repeat Clinical Diagnostic Laboratory Test

Level II (HCPCS/National)

E1	Upper left, eyelid
E2	Lower left, eyelid
E3	Upper right, eyelid
E4	Lower right, eyelid
FA	Left hand, thumb
F1	Left hand, second digit
F2	Left hand, third digit
F3	Left hand, fourth digit
F4	Left hand, fifth digit
F5	Right hand, thumb
F6	Right hand, second digit
F7	Right hand, third digit
F8	Right hand, fourth digit
F9	Right hand, fifth digit
GG	Performance and payment of a screening mammogram and diagnostic mammogram on the same patient, same day
GH	Diagnostic mammogram converted from screening mammogram on same day
LC	Left circumflex coronary artery
LD	Left anterior descending coronary artery
LM	Left main coronary artery
LT	Left side (used to identify procedures performed on the left side of the body)
QM	Ambulance service provided under arrangement by a provider of services
QN	Ambulance service furnished directly by a provider of services
RC	Right coronary artery
RI	Ramus intermedius coronary artery
RT	Right side (used to identify procedures performed on the right side of the body)
TA	Left foot, great toe
T1	Left foot, second digit
T2	Left foot, third digit
T3	Left foot, fourth digit
T4	Left foot, fifth digit
T5	Right foot, great toe
T6	Right foot, second digit
T7	Right foot, third digit
T8	Right foot, fourth digit
T9	Right foot, fifth digit

Place-of-Service Codes for Professional Claims

Listed below are place-of-service codes and descriptions. These codes should be used on professional claims to specify the entity where service(s) were rendered. Check with individual payers (eg, Medicare, Medicaid, other private insurance) for reimbursement policies regarding these codes. If you would like to comment on a code(s) or description(s), please send your request to posrequest@cms.hhs.gov.

Place of Service Code(s)	Place of Service Name	Place of Service Description
01	Pharmacy	A facility or location where drugs and other medically related items and services are sold, dispensed, or otherwise provided directly to patients. (Effective 10/1/03)
02	Telehealth Provided Other than in Patient's Home	The location where health services and health related services are provided or received, through telecommunication technology. Patient is not located in their home when receiving health services or health-related services through telecommunication technology. (Effective 1/1/17)
03	School	A facility whose primary purpose is education. (Effective 1/1/03)
04	Homeless Shelter	A facility or location whose primary purpose is to provide temporary housing to homeless individuals (eg, emergency shelters, individual or family shelters). (Effective 1/1/03)
05	Indian Health Service Free-Standing Facility	A facility or location, owned and operated by the Indian Health Service, which provides diagnostic, therapeutic (surgical and non-surgical), and rehabilitation services to American Indians and Alaska Natives who do not require hospitalization. (Effective 1/1/03)
06	Indian Health Service Provider-Based Facility	A facility or location, owned and operated by the Indian Health Service, which provides diagnostic, therapeutic (surgical and non-surgical), and rehabilitation services rendered by, or under the supervision of, physicians to American Indians and Alaska Natives admitted as inpatients or outpatients. (Effective 1/1/03)

07	Tribal 638 Free-Standing Facility	A facility or location owned and operated by a federally recognized American Indian or Alaska Native tribe or tribal organization under a 638 agreement, which provides diagnostic, therapeutic (surgical and non-surgical), and rehabilitation services to tribal members who do not require hospitalization. (Effective 1/1/03)
08	Tribal 638 Provider-Based Facility	A facility or location owned and operated by a federally recognized American Indian or Alaska Native tribe or tribal organization under a 638 agreement, which provides diagnostic, therapeutic (surgical and non-surgical), and rehabilitation services to tribal members admitted as inpatients or outpatients. (Effective 1/1/03)
09	Prison/Correctional Facility	A prison, jail, reformatory, work farm, detention center, or any other similar facility maintained by either Federal, State, or local authorities for the purpose of confinement or rehabilitation of adult or juvenile criminal offenders. (Effective 7/1/06)
10	Telehealth Provided in Patient's Home	The location where health services and health related services are provided or received, through telecommunication technology. Patient is located in their home (which is a location other than a hospital or other facility where the patient receives care in a private residence) when receiving health services or health related services through telecommunication technology. (Effective 1/1/22)
11	Office	Location, other than a hospital, skilled nursing facility (SNF), military treatment facility, community health center, State or local public health clinic, or intermediate care facility (ICF), where the health professional routinely provides health examinations, diagnosis, and treatment of illness or injury on an ambulatory basis.
12	Home	Location, other than a hospital or other facility, where the patient receives care in a private residence.
13	Assisted Living Facility	Congregate residential facility with self-contained living units providing assessment of each resident's needs and on-site support 24 hours a day, 7 days a week, with the capacity to deliver or arrange for services including some health care and other services. (Effective 10/1/03)

14	Group Home	A residence, with shared living areas, where clients receive supervision and other services such as social and/or behavioral services, custodial service, and minimal services (eg, medication administration). (Effective 10/1/03)
15	Mobile Unit	A facility/unit that moves from place-to-place equipped to provide preventive, screening, diagnostic, and/or treatment services. (Effective 1/1/03)
16	Temporary Lodging	A short term accommodation such as a hotel, camp ground, hostel, cruise ship or resort where the patient receives care, and which is not identified by any other POS code. (Effective 1/1/08)
17	Walk-in Retail Health Clinic	A walk-in health clinic, other than an office, urgent care facility, pharmacy, or independent clinic, and not described by any other Place of Service code, that is located within a retail operation and provides, on an ambulatory basis, preventive and primary care services. (Effective 5/1/10)
18	Place of Employment/Worksite	A location, not described by any other POS code, owned or operated by a public or private entity where the patient is employed, and where a health professional provides on-going or episodic occupational medical, therapeutic or rehabilitative services to the individual. (This code is available for use effective January 1, 2013 but no later than May 1, 2013.)
19	Off Campus—Outpatient Hospital	A portion of an off-campus hospital provider based department which provides diagnostic, therapeutic (both surgical and nonsurgical), and rehabilitation services to sick or injured persons who do not require hospitalization or institutionalization. (Effective January 1, 2016)
20	Urgent Care Facility	Location, distinct from a hospital emergency room, an office, or a clinic, whose purpose is to diagnose and treat illness or injury for unscheduled, ambulatory patients seeking immediate medical attention. (Effective 1/1/03)
21	Inpatient Hospital	A facility, other than psychiatric, which primarily provides diagnostic, therapeutic (both surgical and non-surgical), and rehabilitation services by, or under, the supervision of physicians to patients admitted for a variety of medical conditions.

22	On Campus—Outpatient Hospital	A portion of a hospital's main campus which provides diagnostic, therapeutic (both surgical and non-surgical), and rehabilitation services to sick or injured persons who do not require hospitalization or institutionalization. (Description change effective January 1, 2016)
23	Emergency Room—Hospital	A portion of a hospital where emergency diagnosis and treatment of illness or injury is provided.
24	Ambulatory Surgical Center	A free-standing facility, other than a physician's office, where surgical and diagnostic services are provided on an ambulatory basis.
25	Birthing Center	A facility, other than a hospital's maternity facilities or a physician's office, which provides a setting for labor, delivery, and immediate postpartum care as well as immediate care of newborn infants.
26	Military Treatment Facility	A medical facility operated by one or more of the Uniformed Services. Military Treatment Facility (MTF) also refers to certain former U.S. Public Health Service (USPHS) facilities now designated as Uniformed Service Treatment Facilities (USTF).
27	Outreach Site/Street	A non-permanent location on the street or found environment, not described by any other POS code, where health professionals provide preventive, screening, diagnostic, and/or treatment services to unsheltered homeless individuals. (Effective October 1, 2023)
28-30	Unassigned	N/A
31	Skilled Nursing Facility	A facility which primarily provides inpatient skilled nursing care and related services to patients who require medical, nursing, or rehabilitative services but does not provide the level of care or treatment available in a hospital.
32	Nursing Facility	A facility which primarily provides to residents skilled nursing care and related services for the rehabilitation of injured, disabled, or sick persons, or, on a regular basis, health-related care services above the level of custodial care to other than individuals with intellectual disabilities.
33	Custodial Care Facility	A facility that provides room, board, and other personal assistance services, generally on a long-term basis, and which does not include a medical component.

34	Hospice	A facility, other than a patient's home, in which palliative and supportive care for terminally ill patients and their families are provided.
35-40	Unassigned	N/A
41	Ambulance—Land	A land vehicle specifically designed, equipped and staffed for lifesaving and transporting the sick or injured.
42	Ambulance—Air or Water	An air or water vehicle specifically designed, equipped, and staffed for lifesaving and transporting the sick or injured.
43-48	Unassigned	N/A
49	Independent Clinic	A location, not part of a hospital and not described by any other Place of Service code, that is organized and operated to provide preventive, diagnostic, therapeutic, rehabilitative, or palliative services to outpatients only. (Effective 10/1/03)
50	Federally Qualified Health Center	A facility located in a medically underserved area that provides Medicare beneficiaries preventive primary medical care under the general direction of a physician.
51	Inpatient Psychiatric Facility	A facility that provides inpatient psychiatric services for the diagnosis and treatment of mental illness on a 24-hour basis, by or under the supervision of a physician.
52	Psychiatric Facility—Partial Hospitalization	A facility for the diagnosis and treatment of mental illness that provides a planned therapeutic program for patients who do not require full time hospitalization, but who need broader programs than are possible from outpatient visits to a hospital-based or hospital-affiliated facility.
53	Community Mental Health Center	A facility that provides the following services: outpatient services, including specialized outpatient services for children, the elderly, individuals who are chronically ill, and residents of the CMHC's mental health services area who have been discharged from inpatient treatment at a mental health facility; 24 hour a day emergency care services; day treatment, other partial hospitalization services, or psychosocial rehabilitation services; screening for patients being considered for admission to State mental health facilities to determine the appropriateness of such admission; and consultation and education services.

54	Intermediate Care Facility/Individuals with Intellectual Disabilities	A facility which primarily provides health-related care and services above the level of custodial care to individuals with intellectual disabilities but does not provide the level of care or treatment available in a hospital or SNF.
55	Residential Substance Abuse Treatment Facility	A facility which provides treatment for substance (alcohol and drug) abuse to live-in residents who do not require acute medical care. Services include individual and group therapy and counseling, family counseling, laboratory tests, drugs and supplies, psychological testing, and room and board.
56	Psychiatric Residential Treatment Center	A facility or distinct part of a facility for psychiatric care which provides a total 24-hour therapeutically planned and professionally staffed group living and learning environment.
57	Non-residential Substance Abuse Treatment Facility	A location which provides treatment for substance (alcohol and drug) abuse on an ambulatory basis. Services include individual and group therapy and counseling, family counseling, laboratory tests, drugs and supplies, and psychological testing. (Effective 10/1/03)
58	Non-residential Opioid Treatment Facility	A location that provides treatment for opioid use disorder on an ambulatory basis. Services include methadone and other forms of Medication Assisted Treatment (MAT). (Effective January 1, 2020)
59	Unassigned	N/A
60	Mass Immunization Center	A location where providers administer pneumococcal pneumonia and influenza virus vaccinations and submit these services as electronic media claims, paper claims, or using the roster billing method. This generally takes place in a mass immunization setting, such as, a public health center, pharmacy, or mall but may include a physician office setting.
61	Comprehensive Inpatient Rehabilitation Facility	A facility that provides comprehensive rehabilitation services under the supervision of a physician to inpatients with physical disabilities. Services include physical therapy, occupational therapy, speech pathology, social or psychological services, and orthotics and prosthetics services.

62	Comprehensive Outpatient Rehabilitation Facility	A facility that provides comprehensive rehabilitation services under the supervision of a physician to outpatients with physical disabilities. Services include physical therapy, occupational therapy, and speech pathology services.
63-64	Unassigned	N/A
65	End-Stage Renal Disease Treatment Facility	A facility other than a hospital, which provides dialysis treatment, maintenance, and/or training to patients or caregivers on an ambulatory or home-care basis.
66	Programs of All-Inclusive Care for the Elderly (PACE) Center	A facility or location providing comprehensive medical and social services as part of the Programs of All-Inclusive Care for the Elderly (PACE). This includes, but is not limited to, primary care; social work services; restorative therapies, including physical and occupational therapy; personal care and supportive services; nutritional counseling; recreational therapy; and meals when the individual is enrolled in PACE. (Effective August 1, 2024)
67-70	Unassigned	N/A
71	Public Health Clinic	A facility maintained by either State or local health departments that provides ambulatory primary medical care under the general direction of a physician.
72	Rural Health Clinic	A certified facility which is located in a rural medically underserved area that provides ambulatory primary medical care under the general direction of a physician.
73-80	Unassigned	N/A
81	Independent Laboratory	A laboratory certified to perform diagnostic and/or clinical tests independent of an institution or a physician’s office.
82-98	Unassigned	N/A
99	Other Place of Service	Other place of service not identified above.

Neither the AMA nor its staff shall be held liable or responsible for any loss or damage, including but not limited to special, incidental, or consequential damages, allegedly arising from any information or suggestion contained in this publication.

About CPT

Current Procedural Terminology (CPT®), Fourth Edition, is a listing of descriptive terms and identifying codes for reporting medical services and procedures performed by physicians and other qualified health care professionals. The purpose of the terminology is to provide a uniform language that will accurately describe medical, surgical, and diagnostic services, and will thereby provide an effective means for reliable nationwide communication among physicians and other qualified health care professionals, patients, and third parties. CPT 2026 is the most recent revision of a work that first appeared in 1966.

CPT descriptive terms and identifying codes currently serve a wide variety of important functions in the field of medical nomenclature. The CPT code set is useful for administrative management purposes such as claims processing and for the development of guidelines for medical care review. The uniform language is also applicable to medical education and outcomes, health services, and quality research by providing a useful basis for local, regional, and national utilization comparisons. The CPT code set is the most widely accepted nomenclature for the reporting of physician and other qualified health care professional procedures and services under government and private health insurance programs. In 2000, the CPT code set was designated by the Department of Health and Human Services as the national coding standard for physician and other health care professional services and procedures under the Health Insurance Portability and Accountability Act (HIPAA). This means that for all financial and administrative health care transactions sent electronically, the CPT code set will need to be used.

The changes that appear in this revision have been prepared by the CPT Editorial Panel with the assistance of physicians and representatives of other health care professions representing all specialties of medicine, and with important contributions from many third-party payers and governmental agencies.

The American Medical Association trusts that this revision will continue the usefulness of its predecessors in identifying, describing, and coding medical, surgical, and diagnostic services.

Maintenance and Authorship of the CPT Code Set

The CPT Editorial Panel (Panel) is tasked with ensuring that CPT codes remain up to date and reflect the latest medical care provided to patients. In order to do this, the Panel maintains an open process and convenes meetings at a minimum three times per year.

The Panel wishes to sincerely thank the many national medical specialty societies, health insurance organizations and agencies, and individual physicians and other health professionals who have made contributions. In particular, the Panel acknowledges the efforts of the following Panel Organizational and Coding Liaison Participants:

Sue Bowman, RHIA, *American Health Information Management Association*

Edith Hambrick, MD, JD, MPH, *Centers for Medicare & Medicaid Services*

Raemarie Jimenez, CPC, *American Academy of Professional Coders*

Douglas Kelly, MD, *Food and Drug Administration*

Mary E. Little, RN, CPC, *Blue Cross and Blue Shield Association*

Tammy R. Love, RHIA, CCS, CDIP, CMA, *American Hospital Association*

Lori Moore, PharmD, *Centers for Disease Control and Prevention*

The AMA CPT staff is also key to authorship of the code set and resulting CPT Professional Edition codebook. This experienced team prepares agenda materials for each panel meeting, facilitates the application process, compiles, and reviews advisor comments, reconciles differences in opinions, and ultimately compiles all resulting information into a codebook filled with informative guidelines, practical tips, and procedural illustrations.

Index

Introduction

Current Procedural Terminology (CPT®), Fourth Edition, is a set of codes, descriptions, and guidelines intended to describe procedures and services performed by physicians and other qualified health care professionals, or entities. Each procedure or service is identified with a five-digit code. The use of CPT codes simplifies the reporting of procedures and services. In the CPT code set, the term "procedure" is used to describe services, including diagnostic tests.

Inclusion of a descriptor and its associated five-digit code number in the CPT Category I code set is based on whether the procedure or service is consistent with contemporary medical practice and is performed by many practitioners in clinical practice in multiple locations. Inclusion in the CPT code set of a procedure or service, or proprietary name, does not represent endorsement by the American Medical Association (AMA) of any particular diagnostic or therapeutic procedure or service or proprietary test or manufacturer. Inclusion or exclusion of a procedure or service, or proprietary name, does not imply any health insurance coverage or reimbursement policy.

The main body of the Category I section is listed in six sections. Each section is divided into subsections with anatomic, procedural, condition, or descriptor subheadings. The procedures and services with their identifying codes are presented in numeric order with the exception of the resequenced codes and the entire **Evaluation and Management** section (98000-98016, 99202-99499), which appears at the beginning of the listed procedures. The evaluation and management codes are used by most physicians in reporting a significant portion of their services.

Release of CPT Codes

The CPT code set is published annually in late summer or early fall as both electronic data files and books. The release of CPT data files occurs annually between August 31 and early September. The release of the CPT Professional publication comes several weeks later. However, to meet the needs of a rapidly changing health care environment, the CPT code set is periodically updated throughout the year on a set schedule. Each update has both a release date and an effective date. The interval between the release of the update and the effective date is considered an implementation period and is intended to allow physicians and other providers, payers, and vendors to incorporate CPT changes into their systems. Changes to the CPT code set are meant to be applied prospectively from the effective date. The following table outlines the complete CPT code set update calendar.

New CPT codes have been created to streamline services related to the novel coronavirus. It is imperative to check the AMA CPT public website at https://www.ama-assn.org/practice-management/cpt/covid-19-cpt-vaccine-and-immunization-codes throughout the year to obtain the necessary frequent updates to the CPT code set.

CPT Code Set Update Calendar

CPT Category/Section	Release Timeline	Effective Timeline
Category I Category II	August 31	January 1
Category III	January 1	July 1
	July 1	January 1
Immune Globulins, Serum, or Recombinant Products Vaccines, Toxoids	April 1	July 1
	July 1	October 1
	October 1*	January 1
Molecular Pathology Tier 2 Administrative MAAA	April 1	July 1
	July 1	October 1
	October 1*	January 1
PLA	January 1	April 1
	April 1	July 1
	July 1	October 1
	October 1	January 1

* Note that the release date may be delayed by several days due to the timing of the CPT Panel fall meeting.

It is imperative to check the AMA CPT public website throughout the year to obtain the necessary updates to the CPT code set. The following are several links on the AMA CPT website where these updates can be found:

- Category III codes: ama-assn.org/cpt-cat-iii-codes
- Immune globulins, serum, or recombinant products and vaccines, toxoids: ama-assn.org/cpt-cat-i-immunization-codes

- Proprietary Laboratory Analyses (PLA) codes: ama-assn.org/cpt-pla-codes
- Administrative MAAA codes: ama-assn.org/practice-management/cpt/multianalyte-assays-algorithmic-analyses-codes
- Molecular pathology tier 2 codes: ama-assn.org/mo-path-tier-2-codes
- General errata and technical correction updates: ama-assn.org/practice-management/cpt/errata-technical-corrections

Section Numbers and Their Sequences

Evaluation and Management	8000-98016, 99202-99499
Anesthesiology	00100-01999, 99100-99140
Surgery	0004-69990
Radiology (Including Nuclear Medicine and Diagnostic Ultrasound)	0010-79999
Pathology and Laboratory	80047-89398, 0001U-0599U
Medicine (except Anesthesiology)	90281-99199, 99500-99607

The first and last code numbers and the subsection name of the items appear at the top margin of most pages (eg, "10009-10036 Surgery/Integumentary System"). The continuous pagination of the CPT codebook is found on the lower margin of each page along with explanation of any code symbols that are found on that page.

Instructions for Use of the CPT Codebook

Select the CPT code of the procedure or service that accurately identifies the procedure or service performed. Do not select a CPT code that merely approximates the procedure or service provided. If no such specific code exists, then report the procedure or service using the appropriate unlisted procedure or service code. When using an unlisted code, any modifying or extenuating circumstances should be adequately and accurately documented in the medical record. Furthermore, all the language within a code descriptor should be assessed when selecting the appropriate procedure or service. This includes information directly in the descriptor that may be enclosed in parentheses.

It is equally important to recognize that as techniques in medicine and surgery have evolved, new types of services, including minimally invasive surgery, as well as endovascular, percutaneous, and endoscopic interventions have challenged the traditional distinction of Surgery vs Medicine. Thus, the listing of a service or procedure in a specific section of this book should not be interpreted as strictly classifying the service or procedure as "surgery" or "not surgery" for insurance or other purposes. The placement of a given service in a specific section of the book may reflect historical or other considerations (eg, placement of the percutaneous peripheral vascular endovascular interventions in the Surgery/Cardiovascular System section, while the percutaneous coronary interventions appear in the Medicine/Cardiovascular section).

When advanced practice nurses and physician assistants are working with physicians, they are considered as working in the exact same specialty and subspecialty as the physician. A "physician or other qualified health care professional" is an individual who is qualified by education, training, licensure/regulation (when applicable), and facility privileging (when applicable) who performs a professional service within his/her scope of practice and independently reports that professional service. These professionals are distinct from "clinical staff." A clinical staff member is a person who works under the supervision of a physician or other qualified health care professional and who is allowed by law, regulation, and facility policy to perform or assist in the performance of a specified professional service but who does not individually report that professional service. Other policies may also affect who may report specific services.

Throughout the CPT code set the use of terms such as "physician," "qualified health care professional," or "individual" is not intended to indicate that other entities may not report the service. In selected instances, specific instructions may define a service as limited to professionals or limited to other entities (eg, hospital or home health agency).

Instructions, typically included as parenthetical notes with selected codes, indicate that a code should not be reported with another code or codes. These instructions are intended to prevent errors of significant probability and are not all inclusive. For example, the code with such instructions may be a component of another code and therefore it would be incorrect to report both codes even when the component service is performed. These instructions are not intended as a listing of all possible code combinations that should not be reported, nor do they indicate all possible code combinations that are appropriately reported. When reporting codes for services provided, it is important to assure the accuracy and quality of coding through verification of the intent of the code by use of the related guidelines, parenthetical instructions, and coding resources, including *CPT Assistant* and other publications resulting from collaborative efforts of the American Medical Association with the medical specialty societies (ie, *Clinical Examples in Radiology*).

Because Category I or Category III codes may incorporate multiple components (bundled) that could be reported separately with other existing codes, "unbundling" of codes into their component parts for reporting purposes or combining those components with an unlisted code is inappropriate. For example, it would be inappropriate to separately report both codes 42825, *Tonsillectomy, primary or secondary; younger than age 12*, and 42830, *Adenoidectomy, primary; younger than age 12*, for removal of the tonsils and adenoids, because these two procedures are reported together using code 42820, *Tonsillectomy and adenoidectomy; younger than age 12*. Multiple Category I or Category III codes may be reported together to describe the totality of service rendered for a given patient encounter if they represent separately reportable services. Individual components of a procedure or service specified as part of a Category I or Category III code descriptor are reported neither separately with an existing CPT code nor with an unlisted code. Procedural steps necessary to reach the operative site and to close the operative site are also not reported separately, unless otherwise instructed by CPT guidelines or parenthetical notes. For example, a laparoscopic cholecystectomy should not be reported together with a code for the incision or a code for the repair of the surgical wound because these are inherent procedural steps needed to accomplish the cholecystectomy. However, if an excision of a benign lesion requires a complex repair for closure, both the lesion excision and the complex repair code are reported separately because the Repair (Closure) Guidelines indicate that "complex repair does not include excision of benign (11400-11446) or malignant (11600-11646) lesions."

Format of the Terminology

The CPT code set has been developed as stand-alone descriptions of medical procedures. However, some of the procedures in the CPT codebook are not printed in their entirety but refer back to a common portion of the procedure listed in a preceding entry. This is evident when an entry is followed by one or more indentations. This is done in an effort to conserve space.

Example

25100 Arthrotomy, wrist joint; with biopsy

25105 with synovectomy

Note that the common part of code 25100 (the part before the semicolon) should also be considered part of code 25105. Therefore, the full procedure represented by code 25105 should read:

25105 Arthrotomy, wrist joint; with synovectomy

Requests to Update the CPT Nomenclature

The effectiveness of the CPT nomenclature depends on constant updating to reflect changes in medical practice. This can only be accomplished through the interest and timely suggestions of practicing physicians and other qualified health care professionals, specialty/professional societies, state medical associations, organizations, agencies, individual users of the CPT code set, and other stakeholders. Accordingly, the AMA welcomes correspondence, inquiries, and suggestions concerning CPT coding and nomenclature for old and new procedures and services, as well as any matters relating to the CPT code set.

For information on submission of an application to add, delete, or revise codes contained in the CPT code set, please see www.ama-assn.org/go/cpt-processfaq or contact:

CPT Editorial Research & Development
American Medical Association
330 North Wabash Avenue
Suite 39300
Chicago IL 60611-5885

Code change applications are available at the AMA's CPT website at https://www.ama-assn.org/practice-management/cpt/cpt-code-change-applications.

All proposed changes to the CPT code set will be considered by the CPT Editorial Panel in consultation with medical specialty societies as represented by the CPT Advisory Committee, other health care professional societies as represented by the Health Care Professionals Advisory Committee (HCPAC), and other interested parties.

▶General CPT Code Criteria◀

▶All code-change applications must satisfy each of the following criteria:◀

- The proposed descriptor is unique, well-defined, and describes a procedure or service that is clearly identified and distinguished from existing procedures and services already in the CPT code set;
- The descriptor structure, guidelines, and instructions are consistent with the current CPT Editorial Panel standards for maintenance of the code set;
- The proposed descriptor for the procedure or service is neither a fragmentation of an existing procedure or service nor currently reportable as a complete service by one or more existing codes (with the exclusion of unlisted codes). However, procedures and services frequently performed together may require new or revised codes;
- The structure and content of the proposed code descriptor accurately reflects the procedure or service as typically performed. If always or frequently performed with one or more other procedures or services, the descriptor structure and content will reflect the typical combination or complete procedure or service;
- The descriptor for the procedure or service is not proposed as a means to report extraordinary circumstances related to the performance of a procedure or service already described in the CPT code set; ***and***
- The procedure or service satisfies the category-specific criteria set forth below.

Category-Specific Requirements

Category I Criteria

A proposal for a new or revised Category I code must satisfy all of the following criteria:

- All devices and drugs necessary for performance of the procedure or service have received FDA clearance or approval when such is required for performance of the procedure or service;
- The procedure or service is performed by many physicians or other qualified health care professionals across the United States;
- The procedure or service is performed with frequency consistent with the intended clinical use (ie, a service for a common condition should have high volume, whereas a service commonly performed for a rare condition may have low volume);
- The procedure or service is consistent with current medical practice; ***and***
- The clinical efficacy of the procedure or service is documented in literature that meets the requirements set forth in the CPT code change application.

Category II Criteria

The following criteria are used by the CPT/HCPAC and the CPT Editorial Panel for evaluating Category II code applications:

- Measurements that were developed and tested by a national organization;
- Evidence-based measurements with established ties to health outcomes;
- Measurements that address clinical conditions of high prevalence, high risk, or high cost; ***and***
- Well-established measurements that are currently being used by large segments of the health care industry across the country.

In addition, all of the following are required:

- Definition or purpose of the measure is consistent with its intended use (quality improvement and accountability, or solely quality improvement)
- Aspect of care measured is substantially influenced by the physician (or other qualified health care professional or entity for which the code may be relevant)
- Reduces data collection burden on physicians (or other qualified health care professionals or entities)
- Significant
  - Affects a large segment of health care community
  - Tied to health outcomes
  - Addresses clinical conditions of high prevalence, high costs, high risks

- Evidence-based
  - Agreed upon
  - Definable
  - Measurable
- Risk-adjustment specifications and instructions for all outcome measures submitted or compelling evidence as to why risk adjustment is not relevant
- Sufficiently detailed to make it useful for multiple purposes
- Facilitates reporting of performance measure(s)
- Inclusion of select patient history, testing (eg, glycohemoglobin), other process measures, cognitive or procedure services within CPT, or physiologic measures (eg, blood pressure) to support performance measurements
- Performance measure–development process that includes
  - Nationally recognized expert panel
  - Multidisciplinary
  - Vetting process

Category III Criteria

The following **criteria** are used by the CPT/HCPAC Advisory Committee and the CPT Editorial Panel for evaluating Category III code **applications**:

- The procedure or service is currently or recently performed in humans; ***and***

At least one of the following additional criteria has been met:

- The application is supported by at least one CPT or HCPAC advisor representing practitioners who would use this procedure or service; ***or***
- The actual or potential clinical efficacy of the specific procedure or service is supported by peer reviewed literature, which is available in English for examination by the CPT Editorial Panel; ***or***
- There is (a) at least one Institutional Review Board–approved protocol of a study of the procedure or service being performed; (b) a description of a current and ongoing United States trial outlining the efficacy of the procedure or service; or (c) other evidence of evolving clinical utilization.

Audio-Video (Appendix P) and Audio-Only (Appendix T) Telemedicine Services Criteria

The following criteria are used by the Current Procedural Terminology/Health Care Professional Advisory Committee (CPT/HCPAC) and the CPT Editorial Panel for evaluating inclusion of services in Appendix P (synchronous audio-video) and Appendix T (synchronous audio-only) telemedicine services. Any request for inclusion in Appendix P and Appendix T must satisfy the following criteria:

- The totality and quality of the communication of information exchanged between the physician or other qualified health care professional (QHP) and the patient during the synchronous telemedicine service must be of an amount and a nature that would be sufficient to meet the requirements for the same service if services were to be rendered during an in-person face-to-face interaction; ***and***
- The evidence supports the benefits of performing the service through telecommunications technology. These benefits may include, but are not limited to, the following:
  - Facilitate a diagnosis or treatment plan that may reduce complications
  - Decrease diagnostic or therapeutic interventions
  - Decrease hospitalizations
  - Decrease in-person visits to the emergency department
  - Decrease in-person visits to physician or other QHP offices, including urgent care centers
  - Increase rapidity of resolution
  - Decrease quantifiable symptoms

    - Reduce recovery time
    - Enhance access to care, such as for rural and vulnerable patients; ***and***
- A service is ineligible for inclusion in Appendix T without also being requested for inclusion, or has current inclusion, in Appendix P.

(For a listing of CPT codes that may be used for synchronous real-time interactive audio-video telemedicine services when appended with modifier 95, see Appendix P)

(For a listing of CPT codes that may be used for synchronous real-time interactive audio-only telemedicine services when appended with modifier 93, see Appendix T)

Guidelines

Specific guidelines are presented at the beginning of each of the sections. These guidelines define items that are necessary to appropriately interpret and report the procedures and services contained in that section. For example, in the **Medicine** section, specific instructions are provided for handling unlisted services or procedures, special reports, and supplies and materials provided. Guidelines also provide explanations regarding terms that apply only to a particular section. For instance, **Radiology Guidelines** provide a definition of the unique term, "radiological supervision and interpretation." While in **Anesthesia**, a discussion of reporting time is included.

A written report (eg, handwritten or electronic) signed by the interpreting individual should be considered an integral part of a radiologic procedure or interpretation. Please see the guidelines regarding Imaging Guidance in each individual section.

Add-on Codes

Some of the listed procedures are commonly carried out in addition to the primary procedure performed. These additional or supplemental procedures are designated as add-on codes with the **+** symbol and they are listed in **Appendix D** of the CPT codebook. Add-on codes in CPT 2026 can be readily identified by specific descriptor nomenclature that includes phrases such as "each additional" or "(List separately in addition to primary procedure)."

The add-on code concept in CPT 2026 applies only to add-on procedures or services performed by the same physician. Add-on codes describe additional intra-service work associated with the primary procedure, eg, additional digit(s), lesion(s), neurorrhaphy(s), vertebral segment(s), tendon(s), joint(s).

Add-on codes are always performed in addition to the primary service or procedure and must never be reported as a stand-alone code. The inclusionary parenthetical notes following the add-on codes are designed to include the typical base code(s) and not every possible reportable code combination. When the add-on procedure can be reported bilaterally and is performed bilaterally, the appropriate add-on code is reported twice, unless the code descriptor, guidelines, or parenthetical instructions for that particular add-on code instructs otherwise. Do not report modifier 50, *Bilateral Procedures*, in conjunction with add-on codes. All add-on codes in the CPT code set are exempt from the multiple procedure concept. See the definitions of modifier 50 and 51 in **Appendix A**.

Modifiers

A modifier provides the means to report or indicate that a service or procedure that has been performed has been altered by some specific circumstance but not changed in its definition or code. Modifiers also enable health care professionals to effectively respond to payment policy requirements established by other entities. The judicious application of modifiers obviates the necessity for separate procedure listings that may describe the modifying circumstance. Modifiers may be used to indicate to the recipient of a report that:

- A service or procedure had both a professional and technical component.
- A service or procedure was performed by more than one physician or other health care professional and/or in more than one location.
- A service or procedure was increased or reduced.
- Only part of a service was performed.
- An adjunctive service was performed.
- A bilateral procedure was performed.
- A service or procedure was provided more than once.
- Unusual events occurred.

Example

A physician providing diagnostic or therapeutic radiology services, ultrasound, or nuclear medicine services in a hospital would add modifier 26 to report the professional component.

73090 with modifier 26 = Professional component only for an X ray of the forearm

Example

Two surgeons may be required to manage a specific surgical problem. When two surgeons work together as primary surgeons performing distinct part(s) of a procedure, each surgeon should report his/her distinct operative work by adding modifier 62 to the procedure code and any associated code(s) for that procedure as long as both surgeons continue to work together as primary surgeons. Each surgeon should report the co-surgery once using the same procedure code. Modifier 62 would be applicable. For instance, a neurological surgeon and an otolaryngologist are working as co-surgeons in performing transphenoidal excision of a pituitary neoplasm.

The first surgeon would report:

61548 62 = Hypophysectomy or excision of pituitary tumor, transnasal or transseptal approach, nonstereotactic + two surgeons modifier

and the second surgeon would report:

61548 62 = Hypophysectomy or excision of pituitary tumor, transnasal or transseptal approach, nonstereotactic + two surgeons modifier

If additional procedure(s) (including add-on procedure[s]) are performed during the same surgical session, separate code(s) may also be reported with modifier 62 added. It should be noted that if a co-surgeon acts as an assistant in the performance of additional procedure(s) during the same surgical session, those services may be reported using separate procedure code(s) with modifier 80 or modifier 82 added, as appropriate. A complete listing of modifiers is found in **Appendix A**.

Place of Service and Facility Reporting

Some codes have specified places of service (eg, evaluation and management codes are specific to a setting). Other services and procedures may have instructions specific to the place of service (eg, therapeutic, prophylactic, and diagnostic injections and infusions). The CPT code set is designated for reporting physician and other qualified health care professional services. It is also the designated code set for reporting services provided by organizations or facilities (eg, hospitals) in specific circumstances. Throughout the CPT code set, the use of terms such as "physician," "qualified health care professional," or "individual" is not intended to indicate that other entities may not report the service. In selected instances, specific instructions may define a service as limited to professionals or limited to other entities (eg, hospital or home health agency). The CPT code set uses the term "facility" to describe such providers and the term "nonfacility" to describe services settings or circumstances in which no facility reporting may occur. Services provided in the home by an agency are facility services. Services provided in the home by a physician or other qualified health care professional who is not a representative of the agency are nonfacility services.

Unlisted Procedure or Service

Category I and Category III codes describe the vast majority of procedures and services currently performed in the United States and should be used to report these procedures and services that are accurately described in existing CPT codes. It is recognized that there may be services or procedures performed by physicians or other qualified health care professionals (QHPs) that are not found in the CPT code set. Therefore, a number of specific code numbers have been designated for reporting unlisted procedures. When an unlisted procedure code is used, the service or procedure should be described (see specific section guidelines). Each of these unlisted codes (with the appropriate accompanying topical entry) relates to a specific section of the code set and is presented in the guidelines of that section.

The CPT code set's instructions to use an unlisted procedure code do not preclude the reporting of an appropriate code that may be found elsewhere in the CPT code set. It may be appropriate to report multiple Category I or Category III codes together to describe the totality of a service rendered for a given patient encounter, provided each code represents a separately reportable service. Similarly, it is appropriate to report an unlisted code together with a Category I or Category III code(s) for the same patient encounter on the same date of service when a separately reportable portion of a provided procedure or service is not described by an existing CPT code(s).

Example

Reporting unlisted code(s) with Category I code(s): When both radiofrequency ablation of the greater saphenous vein and stab phlebectomy using less than 10 incisions are performed in the same operative session, both codes 36475, *Endovenous ablation therapy of incompetent vein, extremity, inclusive of all imaging guidance and monitoring, percutaneous, radiofrequency; first vein treated*, and 37799, *Unlisted procedure, vascular surgery*, may be reported because there is no code for stab phlebectomy with less than 10 incisions.

While uncommon, if multiple separately reportable unlisted services are performed on the same patient on the same date of service by the same physician or other QHP, then multiple unlisted codes may be reported. If the two procedures are performed in the same anatomic region, then multiple units of the same unlisted code may be reported with modifier 59 appended to the additional unit(s). If two unlisted services are performed in two different anatomic regions, then two different unlisted codes may be reported.

Example

Reporting multiple separately reportable unlisted services: If two unlisted arthroscopic procedures are performed on two separate joints by the same surgeon on the same date of service, then two units of 29999, *Unlisted procedure, arthroscopy*, may be reported with modifier 59 appended to the second unit.

Note that unlisted codes are not used to separately report component(s) of an existing Category I or Category III service.

Example

It would not be appropriate to use 39599, *Unlisted procedure, diaphragm*, to separately report suturing of the diaphragm performed as a component of a paraesophageal hernia repair, which is reported with code 43281, *Laparoscopy, surgical, repair of paraesophageal hernia, includes fundoplasty, when performed; without implantation of mesh*.

Because unlisted codes do not include descriptor language that specifies the components of a particular service, modifiers that describe alteration of a service or procedure may not be used. For example, it would not be appropriate to append modifier 52, *Reduced Services*, to an unlisted code. However, modifiers to indicate laterality (ie, modifier 50, *Bilateral Procedure*); distinction (ie, modifier 59, *Distinct Procedural Service*); assistant-at-surgery (modifier 80, *Assistant Surgeon*); and place of service (eg, modifier 95, *Synchronous Telemedicine Service Rendered Via a Real-Time Interactive Audio and Video Telecommunications System*; modifier 93, *Synchronous Telemedicine Service Rendered Via Telephone or Other Real-Time Interactive Audio-Only Telecommunications System*) may be used, when indicated.

Results, Testing, Interpretation, and Report

Results are the technical component of a service. Testing leads to results; results lead to interpretation. Reports are the work product of the interpretation of test results. Certain procedures or services described in CPT involve a technical component (eg, tests), which produces "results" (eg, data, images, slides). For clinical use, some of these results require interpretation. Some CPT descriptors specifically require interpretation and reporting in order to report that code.

Special Report

A service that is rarely provided, unusual, variable, or new may require a special report. Pertinent information should include an adequate definition or description of the nature, extent, and need for the procedure and the time, effort, and equipment necessary to provide the service.

Time

The CPT code set contains many codes with a time basis for code selection. The following standards shall apply to time measurement, unless there are code or code-range–specific instructions in guidelines, parenthetical instructions, or code descriptors to the contrary. Time is the face-to-face time with the patient. Phrases such as "interpretation and report" in the code descriptor are not intended to indicate in all cases that report writing is part of the reported time. A unit of time is attained when the mid-point is passed. For example, an hour is attained when 31 minutes have elapsed (more than midway between zero and 60 minutes). A second hour is attained when a total of 91 minutes has elapsed. The evaluation and management (E/M) codes that use total time on the date of the encounter have a required time threshold for time-based reporting; therefore, the mid-point concept does not apply. See also the **Evaluation and Management (E/M) Services Guidelines**. When another service is performed concurrently with a time-based service, the time associated with the concurrent service should not be included in the time used for reporting the time-based service. Some services measured in units other than days extend across calendar dates. When this occurs, a continuous service does not reset and create a first hour. However, any disruption in the service does create a new initial service. For example, if intravenous hydration (96360, 96361) is given from 11 PM to 2 AM, 96360 would be reported once and 96361 twice. For facility reporting on a single date of service or for continuous services that last beyond midnight (ie, over a range of dates), report the total units of time provided continuously.

Code Symbols

A summary listing of additions, deletions, and revisions applicable to the CPT codebook is found in **Appendix B**. New procedure numbers added to the CPT codebook are identified throughout the text with the ● symbol placed before the code number. In instances where a code revision has resulted in a substantially altered procedure descriptor, the ▲ symbol is placed before the code number. The ► ◄ symbols are used to indicate new and revised text other than the procedure descriptors. These symbols indicate CPT Editorial Panel actions. The AMA reserves the right to correct typographical errors and make stylistic improvements.

CPT add-on codes are annotated by the ✚ symbol and are listed in **Appendix D**. The ⃠ symbol is used to identify codes that are exempt from the use of modifier 51 but have not been designated as CPT add-on procedures or services. A list of codes exempt from modifier 51 usage is included in **Appendix E**. The ✓ symbol is used to identify codes for vaccines that are pending FDA approval (see **Appendix K**). The # symbol is used to identify codes that are listed out of numerical sequence (see **Appendix N**). The ★ symbol is used to identify codes that may be used to report audio-video telemedicine services when appended by modifier 95 (see **Appendix P**). The ◂ symbol is used to identify codes that may be used to report audio-only telemedicine services when appended by modifier 93 (see **Appendix T**).

Resequenced codes that are not placed numerically are identified with the # symbol, and a reference placed numerically (ie, Code is out of numerical sequence. See…) as a navigational alert to direct the user to the location of the out-of-sequence code (see **Appendix N**). Resequencing is utilized to allow placement of related concepts in appropriate locations within the families of codes regardless of the availability of numbers for sequential numerical placement.

►Duplicate proprietary laboratory analyses (PLA) tests are annotated by the ⌘ symbol. PLA codes describe proprietary clinical laboratory analyses and can be either provided by a single ("sole-source") laboratory or licensed or marketed to multiple providing laboratories (eg, cleared or approved by the Food and Drug Administration [FDA]). All codes that are included in the PLA section are also included in **Appendix O**, with the procedure's proprietary name. In some instances, the descriptor language of PLA codes may be identical, and the code may only be differentiated by the listed proprietary name in Appendix O. When more than one PLA test has an identical descriptor, the codes will be denoted by the ⌘ symbol. Even though the Proprietary Laboratory Analyses section of the code set is located at the end of the Pathology and Laboratory section of the code set, a PLA code does not fulfill Category I code criteria.◄

Alphabetical Reference Index

This codebook features an expanded alphabetical index that includes listings by procedure and anatomic site. Procedures and services commonly known by their eponyms or other designations are also included.

CPT 2026 in Electronic Formats

CPT 2026 procedure codes and descriptions are available as downloadable data files. The CPT data files are available in ASCII and EBCDIC formats and provide a convenient way to import the CPT 2026 codes and descriptions into existing documentation or into any billing and claims reporting software that accepts a text (.TXT) file format. The data files contain the complete official AMA CPT guidelines, descriptor package, and new descriptors for consumers and clinicians.

The *CPT Professional* codebook is also available as an e-book. For more information about CPT electronic formats, call 800 621-8335 or visit **amastore.com**.

References to AMA Resources

The symbols ➔ ➔ and ➔ appear after many codes throughout this codebook, which indicate that the AMA has published reference material regarding that particular code.

The symbol ➔ refers to the *CPT Changes: An Insider's View*, an annual book with all of the coding changes for the current year, the ➔ refers to the *CPT Assistant* monthly newsletter. The symbol ➔ refers to the quarterly newsletter *Clinical Examples in Radiology*.

Example

36598 Contrast injection(s) for radiologic evaluation of existing central venous access device, including fluoroscopy, image documentation and report
➔ *CPT Changes: An Insider's View* 2006
➔ *Clinical Examples in Radiology* Winter 06:15

In this example, the blue reference symbol indicates that in the 2006 edition of *CPT Changes: An Insider's View* information is available that may assist in understanding the application of the code. The red reference symbol indicates that the 2006 Winter issue of Clinical Examples in Radiology page 15 should be consulted.

CPT Assistant and *Clinical Examples in Radiology* are available online. Benefits exclusive to the online versions include:

- Monthly (*CPT Assistant*) and quarterly (*Clinical Examples in Radiology*) updates! The home screen notifies you when a new issue is available, and you can review the latest issue in its entirety.
- Unlimited access to every archived issue and article dating back to when the newsletters first published.
- A historical CPT code list that references when a code was added, deleted, and/or revised since 1990.
- Simple search capabilities, including intuitive menus and a cumulative index of article titles.
- A full archive of *CPT Assistant* articles (1990-2025) is also available in the *CPT Professional* print and digital app bundle (see the following information about the *CPT QuickRef* app).

The *CPT QuickRef* app is available for iOS (Apple) and Android devices (smart phones and tablets). The *QuickRef* app contains important coding and billing tools, including:

- The entire CPT 2026 code set (all codes and their descriptors with almost all illustrations and guidelines), plus the entire 2025 code set to facilitate the year-end code set transition.
- Facility and non-facility RVUs and Global Days.
- Medicare Physician Fee Schedule calculator that can be set to a specific geographic region (GPCI).
- *CPT Assistant* Archive: all content and every issue of *CPT Assistant* from 1990 through 2025, linked to the pertinent CPT codes and available for browsing.
- Official AMA CPT coding guidelines linked to each CPT code.
- More than 200 AMA-created colorized procedural and anatomical illustrations
- Modifiers
- Keyword and code number search
- Favorites capability, to store most-frequently used codes or modifiers for easy access.

For more information, call 800 621-8335.

Illustrated Anatomical and Procedural Review

It is essential that coders have a thorough understanding of medical terminology and anatomy to code accurately. The following section reviewing the basics of vocabulary and anatomy can be used as a quick reference to help you with your coding. It is not intended as a replacement for up-to-date medical dictionaries and anatomy texts, which are essential tools for accurate coding.

Prefixes, Suffixes, and Roots

Although medical terminology may seem complex, many medical terms can be broken into component parts, which makes them easier to understand. Many of these terms are derived from Latin or Greek words, but some include the names of physicians.

Prefixes are word parts that appear at the beginning of a word and modify its meaning; suffixes are found at the end of words. By learning what various prefixes and suffixes mean, it is possible to decipher the meaning of a word quickly. The following lists are a quick reference for some common prefixes and suffixes.

Numbers

Prefix	Meaning	Example
mono-, uni-	one	monocyte, unilateral
bi-	two	bilateral
tri-	three	triad
quadr-	four	quadriplegia
hex-, sex-	six	hexose
diplo-	double	diplopia

Surgical Procedures

Suffix	Meaning	Example
-centesis	puncture a cavity to remove fluid	amniocentesis
-ectomy	surgical removal (excision)	appendectomy
-ostomy	a new permanent opening	colostomy
-otomy	cutting into (incision)	tracheotomy
-orrhaphy	surgical repair/suture	herniorrhaphy
-opexy	surgical fixation	nephropexy
-oplasty	surgical repair	rhinoplasty
-otripsy	crushing, destroying	lithotripsy

Conditions

Prefix	Meaning	Example
ambi-	both	ambidextrous
aniso-	unequal	anisocoria
dys-	bad, painful, difficult	dysphoria
eu-	good, normal	euthanasia
hetero-	different	heterogeneous
homo-	same	homogeneous
hyper-	excessive, above	hypergastric
hypo-	deficient, below	hypogastric
iso-	equal, same	isotonic
mal-	bad, poor	malaise
megalo-	large	megalocardia

Suffix	Meaning	Example
-algia	pain	neuralgia
-asthenia	weakness	myasthenia
-emia	blood	anemia
-iasis	condition of	amebiasis
-itis	inflammation	appendicitis
-lysis	destruction, break down	hemolysis
-lytic	destroy, break down	hemolytic
-oid	like	lipoid
-oma	tumor	carcinoma
-opathy	disease of	arthropathy
-orrhagia	hemorrhage	menorrhagia
-orrhea	flow or discharge	amenorrhea
-osis	abnormal condition of	tuberculosis
-paresis	weakness	hemiparesis
-plasia	growth	hyperplasia
-plegia	paralysis	paraplegia
-pnea	breathing	apnea

Directions and Positions

Prefix	Meaning	Example
ab-	away from	abduction
ad-	toward	adduction
ecto, exo-	outside	ectopic, exocrine
endo-	within	endoscope
epi-	upon	epigastric
infra-	below, under	infrastructure
ipsi-	same	ipsilateral
meso-	middle	mesopexy
meta-	after, beyond, transformation	metastasis
peri-	surrounding	pericardium
retro-	behind, back	retroversion
trans-	across, through	transvaginal

Word	Meaning
anterior or ventral	at or near the front surface of the body
posterior or dorsal	at or near the back surface of the body
superior	above
inferior	below
lateral	side
distal	farthest from center
proximal	nearest to center
medial	middle
supine	face up or palm up
prone	face down or palm down
sagittal	vertical body plane, divides the body into equal right and left sides
transverse	horizontal body plane, divides the body into top and bottom sections
coronal	vertical body plane, divides the body into front and back sections

Additional References

For best coding results, you will need to use other reference materials in addition to your CPT® coding books. These references include medical dictionaries and anatomy books.

Medical Dictionaries

Lists of Illustrations

To further aid coders in properly assigning CPT codes, the codebook contains a number of anatomical and procedural illustrations.

Anatomical Illustrations

Thirty-six anatomical illustrations are located on the following pages:

Page	Illustration Title
xxv	Body Planes—3/4 View
xxv	Body Aspects—Side View
xxv	Body Planes—Front View
79	Structure of Skin
119	Skeletal System
120	Skull—Front and Lateral Views
120	Thoracic Vertebra—Superior View
120	Lumbar Vertebra—Superior View
120	Lumbar Vertebrae—Lateral View

122	Bones, Muscles, and Tendons of Hand
123	Bones and Muscles of Foot
125	Muscular System—Front
126	Muscular System—Back
151	Visual Definitions of Spinal Anatomy and Procedures A. Vertebral interspace (non-bony) and segment (bony) B. Foraminotomy and facetectomy
152	C. Laminotomy, hemilaminectomy, and laminectomy D. Corpectomy
205	Paranasal Sinuses
206	Respiratory System
227	Aortic Anatomy
228	Cardiac Anatomy, Heart Blood Flow
230	Circulatory System, Arteries
231	Circulatory System, Veins
232	Brachial Artery
233	Lymphatic System
336	Digestive System
398	Urinary System
424	Male Genital System
435	Female Genital System
456	Nervous System
457	Brain Anatomy
457	Sagittal Section of Brain and Brain Stem
498	Eye Anatomy
500	Anterior Segment of the Eye
515	Ear Anatomy
523	Endocrine System
773	Coronary Artery Segments
833	Cranial Nerves

Procedural Illustrations

Procedural illustrations are placed throughout the codebook and are associated with the following specific CPT codes.

CPT Code(s)	Illustration Title
11005	Debridement of Abdominal Wall
11102, 11103	Tangential Biopsy of Skin
11104, 11105	Punch Biopsy of Skin
11106, 11107	Incisional Biopsy of Skin
11200, 11201	Removal of Skin Tags
11300-11313	Shaving of Epidermal and Dermal Lesion
11400, 11600	Excision of Lesion
11423, 11600, 11606, 11642	Measuring and Coding the Removal of a Lesion
11719-11765	Lateral Nail View
11719-11765	Dorsal Nail View
—	Extensive Undermining
14000-14061	Adjacent Tissue Repairs
15730	Midface Flap Surgery
15731	Axial Pattern Forehead Flap
16000-16030	Lund-Browder Diagram and Classification Method Table for Burn Estimations
17004	Destruction, Benign or Premalignant Lesions
20552, 20553	Trigger Point Injection
20610	Arthrocentesis, Aspiration, or Injection of Major Joint or Bursa
20664	Halo Application for Thin Skull Osteology
20690	Uniplane External Fixation System
20692	Multiplane External Fixation System
20932	Postoperative Osteoarticular Allograft Left Humerus Fixed with Plates
20933	Parosteal Osteosarcoma Replaced with Hemicortical Intercalary Allograft
20934	Osteosarcoma Femur with Complete Intercalary Allograft with Plate Fixation
21196	Reconstruction of Mandibular Rami
22510	Percutaneous Vertebroplasty
22548	Arthrodesis (Anterior Transoral Technique)
22554	Anterior Approach for Cervical Fusion
22558	Anterior Approach for Lumbar Fusion (Anterior Retroperitoneal Exposure)
—	Visual Definitions of Spinal Anatomy and Procedures A. Vertebral interspace (non-bony) and segment (bony) B. Foraminotomy and facetectomy C. Laminotomy, hemilaminectomy, and laminectomy D. Corpectomy
22630, 63052	Examples of TLIF, PLIF, and Laminectomy Techniques and Procedures
22630, 63052	A. Examples of posterior interbody fusion techniques (22630) B. Examples of posterior interbody fusion techniques and laminectomy at same interspace (22630, 63052)

22840	Non-Segmental Spinal Instrumentation
22842-22844	Segmental Spinal Instrumentation
22853, 22854, 22859	Spinal Prosthetic Devices
27125	Partial Hip Replacement With or Without Bipolar Prosthesis
27130	Total Hip Replacement
27235	Percutaneous Treatment of Femoral Fracture
27236	Open Treatment of Femoral Fracture
27405, 27427	Posterolateral Corner of the Knee
28289	Hallux Rigidus Correction
28291	Hallux Rigidus Correction with Implant
28292	Hallux Valgus Correction
28292	Hallux Valgus Correction with Proximal Phalanx Base Resection
28295	Hallux Valgus Correction with Proximal First Metatarsal Osteotomy
28296	Hallux Valgus Correction with Distal First Metatarsal Osteotomy
28297	Hallux Valgus Correction with Metatarsal-Medial Cuneiform Joint Arthrodesis
28298	Hallux Valgus Correction with Proximal Phalanx Osteotomy
28299	Hallux Valgus Correction with Double Osteotomy
29824	Arthroscopy, Shoulder, Distal Claviculectomy (Mumford Procedure)
29866-29887	Arthroscopy of the Knee
29894-29899	Arthroscopy of the Ankle
30465	Surgical Repair of Vestibular Stenosis
31070	Sinusotomy, Frontal
31231-31294	Sinus Endoscopy
31622-31661	Bronchoscopy
32554, 32555	Thoracentesis
32601-32665	Thoracoscopy
32674	Mediastinal Lymph Nodes: Station Number and Descriptions
32994	Cryoablation Therapy of Pulmonary Tumors
33210	Temporary Pacemaker
33212-33214	A. Implanted Pacemaker—Single Chamber
33213-33214	B. Implanted Pacemaker—Two Chambers
33224-33226	Biventricular Pacing
33510-33516	A. Coronary Artery Bypass—Venous Grafting Only—Single Graft
33510-33516	B. Coronary Artery Bypass—Venous Grafting Only—Three Coronary Grafts
33517-33530	Coronary Artery Bypass—Combined Arterial-Venous Grafting
33517-33530	Coronary Artery Bypass—Sequential Combined Arterial-Venous Grafting
33621	Initial Hybrid Palliation
33622	Hybrid Reconstruction

33820	Patent Ductus Arteriosus
33864	Aortic Root Remodeling: Coronary Arteries Reimplanted
33894, 33895	Coarctation of the Aorta and Its Repair
33927-33929	Total Heart Implantation Device
33979	Insertion of Implantable Single Ventricle Assist Device
34705, 34706, 34709, 34710, 34711	Endovascular Repair
34717, 34718	Endovascular Repair
35371-35372	Thromboendarterectomy
35571	Bypass Graft, Vein
35600	Harvest of Upper Extremity Artery
36002	Injection Procedure (eg, Thrombin) for Percutaneous Treatment of Extremity Pseudoaneurysm
36222-36228	Angiography, Carotid Artery
36555-36556	Insertion of Non-Tunneled Centrally Inserted Central Venous Catheter
36557-36558	Insertion of Tunneled Central Venous Catheter
36570, 36571, 36576, 36578	Implantable Venous Access Port
36572	Peripherally Inserted Central Catheter
36821	Arteriovenous Anastomosis, Direct
36825-36830	Arteriovenous Fistula
37191	Vena Cava Filter
37254-37257	Transluminal Balloon Angioplasty
37246	Transluminal Balloon Angioplasty
37700	Ligation and Division of Long Saphenous Vein
38230	Bone Marrow Harvesting for Transplantation
38746	Mediastinal Lymph Nodes: Station Number and Descriptions
43235	Esophagogastroduodenoscopy
43260	Endoscopic Retrograde Cholangiopancreatography (ERCP)
43280	Laparoscopic Fundoplasty
43284	Laparoscopic Esophageal Sphincter Augmentation
43287	Ivor Lewis Esophagectomy
43327, 43328	Nissen Fundoplasty
43753	Gastric Intubation
43846	Gastric Bypass for Morbid Obesity
44127	Enterectomy, Resection for Congenital Atresia
44140	Colectomy, Partial
44160	Colectomy With Removal of Terminal Ileum and Ileocolostomy
45171-45172	Rectal Tumor Excision
45378	Colonoscopy
45385, 45388	Colonoscopy With Lesion Ablation or Removal

46020	Placement of Seton
46250-46262	Hemorrhoidectomy of Internal Prolapsed Hemorrhoid Columns
47533, 47534, 47538, 47539, 47540	Percutaneous Biliary Stent(s) and Drain Placement
47562	Laparoscopic Cholecystectomy
49320	Laparoscopy
49591-49618	Measuring Total Length of Anterior Abdominal Hernia Defect(s)
50020	Drainage of Renal Abscess
50060-50075	Nephrolithotomy With Calculus Removal
50432	Introduction of Catheter Into Renal Pelvis
50545	Laparoscopic Radical Nephrectomy
50546	Laparoscopic Nephrectomy
50590	Lithotripsy
50605	Indwelling Ureteral Stent
50820	Ureteroileal Conduit
50947	Laparoscopic Ureteroneocystostomy
51798	Measurement of Postvoiding
51990	Laparoscopic Sling Suspension Urinary Incontinence
52005	Cystourethroscopy With Ureteral Catheterization
52601	Transurethral Resection of Prostate, Complete
52648	Contact Laser Vaporization of Prostate
53855	Temporary Prostatic Urethral Stent Insertion
54692	Laparoscopic Orchiopexy
57106	Vaginectomy, Partial Removal of Vaginal Wall
57111	Vaginectomy, Complete Removal of Vaginal Wall (Radical Vaginectomy)
57426	Laparoscopic Revision of Prosthetic Vaginal Graft
58548, 58575	Radical and Total Hysterectomy
58563	Hysteroscopy
59001	Amniocentesis, Therapeutic Amniotic Fluid Reduction
59150	Laparoscopic Treatment of Ectopic Pregnancy
59400-59410	Vaginal Delivery
59510-59515	Cesarean Delivery
60220	Thyroid Lobectomy
60512	Posterior View of the Pharynx
60650	Laparoscopic Adrenalectomy
61700	Intracranial Aneurysm, Intracranial Approach
61867-61868, 61885	Placement of Cranial Neurostimulator
62223	Cerebrospinal Fluid (CSF) Shunt (Ventricular Peritoneal)
62362	Intrathecal or Epidural Drug Infusion Pump Implantation

63005	Lumbar Laminectomy
63047	Example of Laminectomy at Single Interspace
63650	Percutaneous Implantation of Neurostimulator Electrodes
63655	Placement of Neurostimulator Electrodes Through Laminectomy
64568-64570	Open Implantation Neurostimulator Electrodes, Cranial Nerve (Vagus Nerve Stimulation)
64581	Open Implantation of Sacral Nerve Neurostimulator Electrode Array
64642	Chemodenervation of Extremity
65450	Cryotherapy of Lesion on Cornea
65820	Goniotomy
66150-66172, 66183	Minimally Invasive Glaucoma Surgery (External Approach)
67027	Intravitreal Drug Delivery System
67107	Repair of Retinal Detachment
67311-67346	Extraocular Muscles of Right Eye
67311-67312	Strabismus Surgery—Horizontal Muscles
67314-67316	Strabismus Surgery—Vertical Muscles
67320	Transposition Procedure
67335	Strabismus Surgery—Adjustable Sutures
67820-67825	Trichiasis
68761	Closure of Lacrimal Punctum by Plug
68816	Probing of Nasolacrimal Duct
69433-69436	Tympanostomy
69635-69646	Tympanoplasty
69930	Cochlear Device Implantation
69990	Operating Microscope
75600-75630	Aortography
75820-75822	Venography
77067	Screening Mammography
91034	Esophageal Acid Reflux Test
92201, 92202	Extended Ophthalmoscopy
92235	Fluorescein Angiography
92601-92604	A View of the Outer Cochlear Implant
92978	Intravascular Ultrasound (Coronary Vessel or Graft)
93312-93318	Transesophageal Echocardiography (TEE)

93451	Right Heart Catheterization
93452	Left Heart Catheterization
93454	Coronary Angiography Without Concomitant Left Heart Catheterization
93571	Intravascular Distal Blood Flow Velocity
95829	Intraoperative Electrocorticography (ECoG)
95836	Extraoperative ECoG
97810-97811	Acupuncture, Needle
0253T, 0449T, 0450T, 0474T, 0671T	Minimally Invasive Glaucoma Surgery (Internal Approach)

Initial Neonatal Intensive Care	
Code	**99477**
Age	28 days of age or younger
	Requires intensive observation, frequent interventions, and other intensive care services

Continuing Neonatal and Infant Inpatient Low Birth-Weight Intensive Care				
Code	**99478**	**99479**	**99480**	**99231–99233**
Weight	less than 1,500 g	1,500–2,500 g	2,501–5,000 g	+5,000 g

Evaluation and Management (E/M) Services Guidelines

The following is a listing of headings and subheadings that appear within the Evaluation and Management section of the CPT codebook. The subheadings or subsections denoted with asterisks (*) below have special instructions unique to that subsection. Where these are indicated, special notes or guidelines will be presented preceding those procedural terminology listings, referring to that subsection specifically. Note that all code ranges in each subsection are listed as they appear in the subsection, even if the code numbers are out of numerical sequence and/or repeated in the next subsection.

Hospital Inpatient or Observation Care Services (Including Admission and Discharge Services)* (99234-99236)

Hospital Inpatient or Observation Discharge Services* (99238-99239)

Consultations* (99242-99255)

Office or Other Outpatient Consultations (99242-99245)

New or Established Patient* (99242-99245)

Inpatient or Observation Consultations (99252-99255)

New or Established Patient* (99252-99255)

Emergency Department Services (99281-99288)

New or Established Patient* (99281-99285)

Other Emergency Services* (99288)

Critical Care Services* (99291-99292)

Nursing Facility Services* (99304-99316)

Initial Nursing Facility Care (99304-99306)

- New or Established Patient* (99304-99306)

Subsequent Nursing Facility Care (99307-99310)

Nursing Facility Discharge Services* (99315-99316)

Home or Residence Services* (99341-99350)

New Patient (99341-99345)

Established Patient (99347-99350)

Prolonged Services (99358-99360)

Prolonged Service Without Direct Patient Contact on Date Other Than the Face-to-Face Evaluation and Management Service* (99358-99359)

Prolonged Clinical Staff Services With Physician or Other Qualified Health Care Professional Supervision* (99415-99416)

Prolonged Service With or Without Direct Patient Contact on the Date of an Evaluation and Management Service* (99417-99418)

Standby Services* (99360)

Case Management Services* (99366-99368)

Medical Team Conferences* (99366-99368)

- Medical Team Conference, Direct (Face-to-Face) Contact With Patient and/or Family (99366)
- Medical Team Conference, Without Direct (Face-to-Face) Contact With Patient and/or Family (99367-99368)

Care Plan Oversight Services* (99374-99380)

Preventive Medicine Services* (99381-99429)

New Patient (99381-99387)

Established Patient (99391-99397)

Counseling Risk Factor Reduction and Behavior Change Intervention (99401-99429)

- New or Established Patient* (99401-99412)
  - Preventive Medicine, Individual Counseling (99401-99404)
  - Behavior Change Interventions, Individual (99406-99409)
  - Preventive Medicine, Group Counseling (99411-99412)
- Other Preventive Medicine Services (99429)

Non-Face-to-Face Services (99421-99458)

Telephone Services

Online Digital Evaluation and Management Services* (99421-99423)

Interprofessional Telephone/Internet/Electronic Health Record Consultations* (99446-99452)

Digitally Stored Data Services/Remote Physiologic Monitoring* (99453-99474)

Remote Physiologic Monitoring Treatment Management Services* (99470-99458)

Special Evaluation and Management Services* (99450-99456)

Basic Life and/or Disability Evaluation Services (99450)

Work Related or Medical Disability Evaluation Services (99455-99456)

Newborn Care Services* (99460-99463)

Delivery/Birthing Room Attendance and Resuscitation Services (99464-99465)

Inpatient Neonatal Intensive Care Services and Pediatric and Neonatal Critical Care Services (99466-99480)

Pediatric Critical Care Patient Transport* (99466-99486)

Inpatient Neonatal and Pediatric Critical Care* (99468-99476)

Initial and Continuing Intensive Care Services* (99477-99480)

Cognitive Assessment and Care Plan Services* (99483)

Care Management Services* (99490-99427)

Care Planning*

Chronic Care Management Services* (99490-99437)

Complex Chronic Care Management Services* (99487-99489)

Principal Care Management Services* (99424-99427)

Psychiatric Collaborative Care Management Services* (99492-99494)

Transitional Care Management Services* (99495-99496)

Advance Care Planning* (99497-99498)

General Behavioral Health Integration Care Management* (99484)

Other Evaluation and Management Services (99459, 99499)

Evaluation and Management (E/M) Services Guidelines

In addition to the information presented in the Introduction, several other items unique to this section are defined or identified here.

E/M Guidelines Overview

The E/M guidelines have sections that are common to all E/M categories and sections that are category specific. Most of the categories and many of the subcategories of service have special guidelines or instructions unique to that category or subcategory. Where these are indicated, eg, “Hospital Inpatient and Observation Care,” special instructions are presented before the listing of the specific E/M services codes. It is important to review the instructions for each category or subcategory. These guidelines are to be used by the reporting physician or other qualified health care professional to select the appropriate level of service. These guidelines do not establish documentation requirements or standards of care. The main purpose of documentation is to support care of the patient by current and future health care team(s). These guidelines are for services that require a face-to-face encounter with the patient and/or family/caregiver. (For 99211 and 99281, the face-to-face services may be performed by clinical staff.)

In the **Evaluation and Management** section (98000-98016, 99202-99499), there are many code categories. Each category may have specific guidelines, or the codes may include specific details. These E/M guidelines are written for the following categories:

- Office or Other Outpatient Services
- Telemedicine Services
- Hospital Inpatient and Observation Care Services
- Consultations
- Emergency Department Services
- Nursing Facility Services
- Home or Residence Services
- Prolonged Service With or Without Direct Patient Contact on the Date of an Evaluation and Management Service

Classification of Evaluation and Management (E/M) Services

The E/M section is divided into broad categories, such as office visits, hospital inpatient or observation care visits, and consultations. Most of the categories are further divided into two or more subcategories of E/M services. For example, there are two subcategories of office visits (new patient and established patient) and there are two subcategories of hospital inpatient and observation care visits (initial and subsequent). The subcategories of E/M services are further classified into levels of E/M services that are identified by specific codes.

The basic format of codes with levels of E/M services based on medical decision making (MDM) or time is the same. First, a unique code number is listed. Second, the place and/or type of service is specified (eg, office or other outpatient visit). Third, the content of the service is defined. Fourth, time is specified. (A detailed discussion of time is provided in the Guidelines for Selecting Level of Service Based on Time.)

The place of service and service type are defined by the location where the face-to-face encounter with the patient and/or family/caregiver occurs. For example, service provided to a nursing facility resident brought to the office is reported with an office or other outpatient code.

New and Established Patients

Solely for the purposes of distinguishing between new and established patients, **professional services** are those face-to-face services rendered by physicians and other qualified health care professionals who may report evaluation and management services. A new patient is one who has not received any professional services from the physician or other qualified health care professional or another physician or other qualified health care professional of the **exact** same specialty **and subspecialty** who belongs to the same group practice, within the past three years.

An established patient is one who has received professional services from the physician or other qualified health care professional or another physician or other qualified health care professional of the **exact** same specialty **and subspecialty** who belongs to the same group practice, within the past three years. See Decision Tree for New vs Established Patients.

In the instance where a physician or other qualified health care professional is on call for or covering for another physician or other qualified health care professional, the patient's encounter will be classified as it would have been by the physician or other qualified health care professional who is not available. When advanced practice nurses and physician assistants are working with physicians, they are considered as working in the **exact** same specialty **and subspecialty** as the physician.

No distinction is made between new and established patients in the emergency department. E/M services in the emergency department category may be reported for any new or established patient who presents for treatment in the emergency department.

The Decision Tree for New vs Established Patients is provided to aid in determining whether to report the E/M service provided as a new or an established patient encounter.

Coding Tip

Instructions for Use of the CPT Codebook

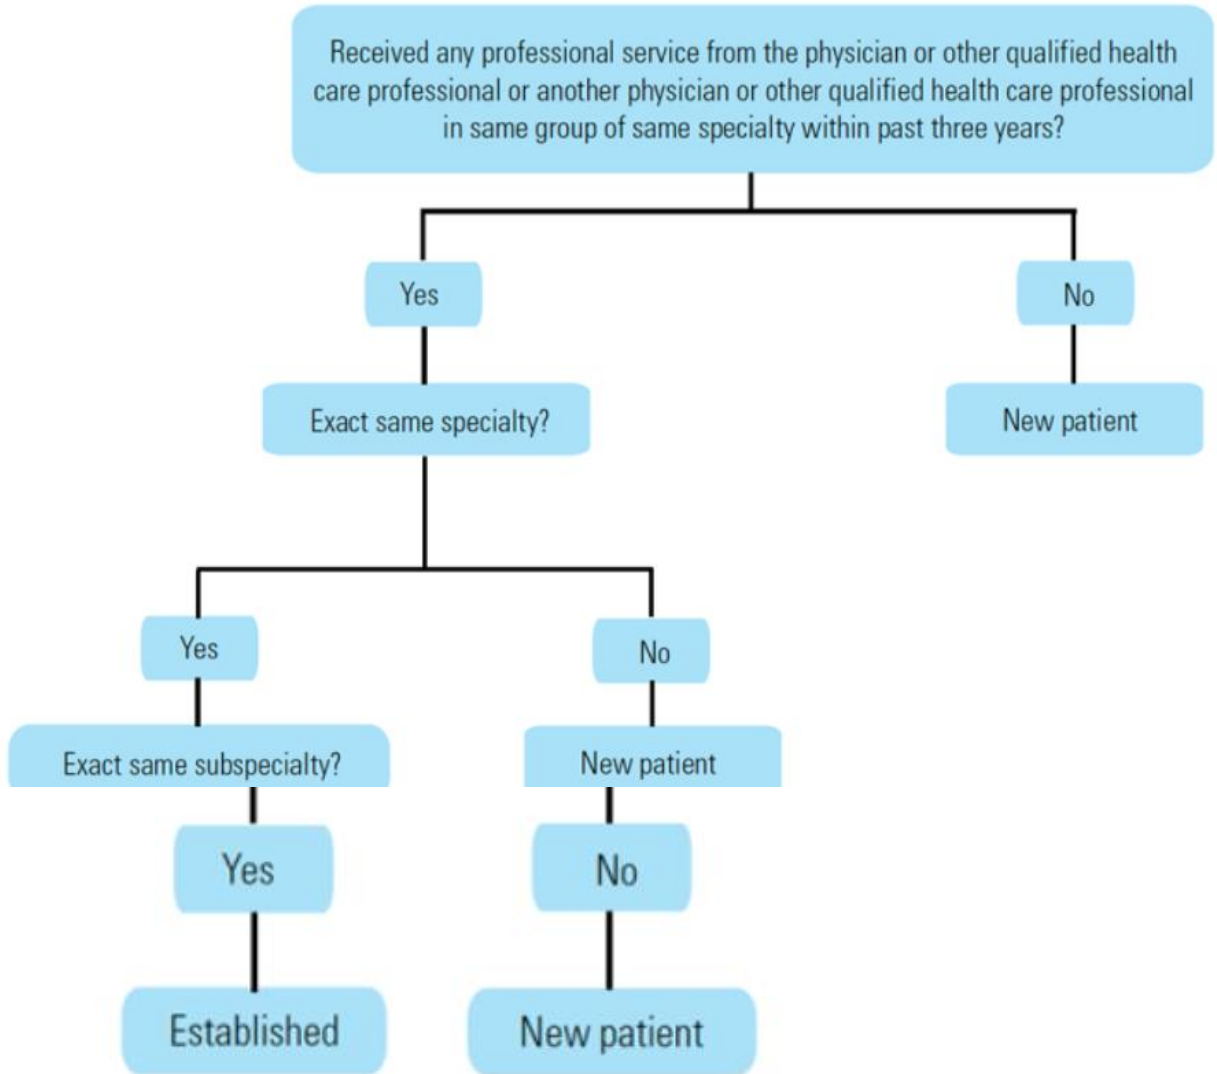
When advanced practice nurses and physician assistants are working with physicians, they are considered as working in the exact same specialty and subspecialty as the physician. A "physician or other qualified health care professional" is an individual who is qualified by education, training, licensure/regulation (when applicable), and facility privileging (when applicable) who performs a professional service within his or her scope of practice and independently reports that professional service. These professionals are distinct from "clinical staff." A clinical staff member is a person who works under the supervision of a physician or other qualified health care professional, and who is allowed by law, regulation and facility policy to perform or assist in the performance of a specific professional service but does not individually report that professional service. Other policies may also affect who may report specific services.

CPT Coding Guidelines, Introduction, Instructions for Use of the CPT Codebook

Initial and Subsequent Services

Some categories apply to both new and established patients (eg, hospital inpatient or observation care). These categories differentiate services by whether the service is the initial service or a subsequent service. For the purpose of distinguishing between initial or subsequent visits, professional services are those face-to-face services rendered by physicians and other qualified health care professionals who may report evaluation and management services. An initial service is when the patient has not received any professional services from the physician or other qualified health care professional or another physician or other qualified health care professional of the exact same specialty and subspecialty who belongs to the same group practice, during the inpatient, observation, or nursing facility admission and stay.

A subsequent service is when the patient has received professional service(s) from the physician or other qualified health care professional or another physician or other qualified health care professional of the exact same specialty and subspecialty who belongs to the same group practice, during the admission and stay.



In the instance when a physician or other qualified health care professional is on call for or covering for another physician or other qualified health care professional, the patient's encounter will be classified as it would have been by the physician or other qualified health care professional who is not available. When advanced practice nurses and physician assistants are working with physicians, they are considered as working in the exact same specialty and subspecialty as the physician.

For reporting hospital inpatient or observation care services, a stay that includes a transition from observation to inpatient is a single stay. For reporting nursing facility services, a stay that includes transition(s) between skilled nursing facility and nursing facility level of care is the same stay.

Split or Shared Visits

Physician(s) and other qualified health care professional(s) (QHP[s]) may act as a team in providing care for the patient, working together during a single E/M service. The split or shared visits guidelines are applied to determine which professional may report the service. If the physician or other QHP performs a substantive portion of the encounter, the physician or other QHP may report the service. If code selection is based on total time on the date of the encounter, the service is reported by the professional who spent the majority of the face-to-face or non-face-to-face time performing the service. For the purpose of reporting E/M services within the context of team-based care, performance of a substantive part of the MDM requires that the physician(s) or other QHP(s) made or approved the management plan for the ***number and complexity of problems addressed at the encounter*** and takes responsibility for that plan with its inherent ***risk of complications and/or morbidity or mortality of patient management***. By doing so, a physician or other QHP has performed two of the three elements used in the selection of the code level based on MDM. If ***the amount and/or complexity of data to be reviewed and analyzed*** is used by the physician or other QHP to determine the reported code level, assessing an independent historian's narrative and the ordering or review of tests or documents do not have to be personally performed by the physician or other QHP, because the relevant items would be considered in formulating the management plan. Independent interpretation of tests and discussion of management plan or test interpretation must be personally performed by the physician or other QHP if these are used to determine the reported code level by the physician or other QHP.

Decision Tree for New vs Established Patients

Multiple Evaluation and Management Services on the Same Date

The following guidelines apply to services that a patient may receive for hospital inpatient care, observation care, or nursing facility care. For instructions regarding transitions to these settings from the office or outpatient, home or residence, or emergency department setting, see guidelines for **Hospital Inpatient and Observation Care Services** or **Nursing Facility Services**.

A patient may receive E/M services in more than one setting on a calendar date. A patient may also have more than one visit in the same setting on a calendar date. The guidelines for multiple E/M services on the same date address circumstances in which the patient has received multiple visits or services from the same physician or other QHP or another physician or other QHP of the exact same specialty and subspecialty who belongs to the same group practice.

Per day: The hospital inpatient and observation care services and the nursing facility services are "per day" services. When multiple visits occur over the course of a single calendar date in the same setting, a single service is reported. When using MDM for code level selection, use the aggregated MDM over the course of the calendar date. When using time for code level selection, sum the time over the course of the day using the guidelines for reporting time.

Multiple encounters in different settings or facilities: A patient may be seen and treated in different facilities (eg, a hospital-to-hospital transfer). When more than one primary E/M service is reported and time is used to select the code level for either service, only the time spent providing that individual service may be allocated to the code level selected for reporting that service. No time may be counted twice when reporting more than one E/M service. Prolonged services are also based on the same allocation and their relationship to the primary service. The designation of the facility may be defined by licensure or regulation. Transfer from a hospital bed to a nursing facility bed in a hospital with nursing facility beds is considered as two services in two facilities because there is a discharge from one type of designation to another. An intra-facility transfer for a different level of care (eg, from a routine unit to a critical care unit) does not constitute a new stay, nor does it constitute a transfer to a different facility.

Emergency department (ED) and services in other settings (same or different facilities): Time spent in an ED by a physician or other QHP who provides subsequent E/M services may be included in calculating total time on the date of the encounter when ED services are not reported and another E/M service is reported (eg, hospital inpatient and observation care services).

Discharge services and services in other facilities: Each service may be reported separately as long as any time spent on the discharge service is not counted towards the total time of a subsequent service in which code level selection for the subsequent service is based on time. This includes any hospital inpatient or observation care services (including admission and discharge services) time (99234, 99235, 99236) because these services may be selected based on MDM or time. When these services are reported with another E/M service on the same calendar date, time related to the hospital inpatient or observation care service (including admission and discharge services) may not be used for code selection of the subsequent service.

Discharge services and services in a different facility: If the patient is admitted to another facility, for the purpose of E/M reporting this is considered a different stay. Discharge and initial services may be reported as long as time spent on the discharge service is not counted towards the total time of the subsequent service reported when code level selection is based on time.

Critical care services (including neonatal intensive care services and pediatric and neonatal critical care): Reporting guidelines for intensive and critical care services that are performed on the same calendar date as another E/M service are described in the service specific section guidelines.

Transitions between office or other outpatient, home or residence, or emergency department and hospital inpatient or observation or nursing facility: See the guidelines for **Hospital Inpatient and Observation Care Services** or **Nursing Facility Services.** If the patient is seen in two settings and only one service is reported, the total time on the date of the encounter or the aggregated MDM is used for determining the level of the single reported service. If prolonged services are reported, use the prolonged services code that is appropriate for the primary service reported, regardless of where the patient was located when the prolonged services time threshold was met. The choice of the primary service is at the discretion of the reporting physician or other QHP.

Services Reported Separately

Any specifically identifiable procedure or service (ie, identified with a specific CPT code) performed on the date of E/M services may be reported separately.

The ordering and actual performance and/or interpretation of diagnostic tests/studies during a patient encounter are not included in determining the levels of E/M services when the professional interpretation of those tests/studies is reported separately by the physician or other qualified health care professional reporting the E/M service. Tests that do not require separate interpretation (eg, tests that are results only) and are analyzed as part of MDM do not count as an independent interpretation, but may be counted as ordered or reviewed for selecting an MDM level. The performance of diagnostic tests/studies for which specific CPT codes are available may be reported separately, in addition to the appropriate E/M code. The interpretation of the results of diagnostic tests/studies (ie, professional component) with preparation of a separate distinctly identifiable signed written report may also be reported separately, using the appropriate CPT code and, if required, with modifier 26 appended.

The physician or other qualified health care professional may need to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant separately identifiable E/M service. The E/M service may be caused or prompted by the symptoms or condition for which the procedure and/or service was provided. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service. As such, different diagnoses are not required for reporting of the procedure and the E/M services on the same date.

History and/or Examination

E/M codes that have levels of services include a medically appropriate history and/or physical examination, when performed. The nature and extent of the history and/or physical examination are determined by the treating physician or other qualified health care professional reporting the service. The care team may collect information, and the patient or caregiver may supply information directly (eg, by electronic health record [EHR] portal or questionnaire) that is reviewed by the reporting physician or other qualified health care professional. The extent of history and physical examination is not an element in selection of the level of these E/M service codes.

Levels of E/M Services

Select the appropriate level of E/M services based on the following:

1. The level of the MDM as defined for each service, **or**
2. The total time for E/M services performed on the date of the encounter.

Within each category or subcategory of E/M service based on MDM or time, there are three to five levels of E/M services available for reporting purposes. Levels of E/M services are **not** interchangeable among the different categories or subcategories of service. For example, the first level of E/M services in the subcategory of office visit, new patient, does not have the same definition as the first level of E/M services in the subcategory of office visit, established patient. Each level of E/M services may be used by all physicians or other qualified health care professionals.

Guidelines for Selecting Level of Service Based on Medical Decision Making

Four types of MDM are recognized: straightforward, low, moderate, and high. The concept of the level of MDM does not apply to 99211, 99281.

MDM includes establishing diagnoses, assessing the status of a condition, and/or selecting a management option. MDM is defined by three elements. The elements are:

- ***The number and complexity of problem(s) that are addressed during the encounter.***

- ***The amount and/or complexity of data to be reviewed and analyzed.*** These data include medical records, tests, and/or other information that must be obtained, ordered, reviewed, and analyzed for the encounter. This includes information obtained from multiple sources or interprofessional communications that are not reported separately and interpretation of tests that are not reported separately. Ordering a test is included in the category of test result(s) and the review of the test result is part of the encounter and not a subsequent encounter. Ordering a test may include those considered but not selected after shared decision making. For example, a patient may request diagnostic imaging that is not necessary for their condition and discussion of the lack of benefit may be required. Alternatively, a test may normally be performed, but due to the risk for a specific patient it is not ordered. These considerations must be documented. Data are divided into three categories:
  - Tests, documents, orders, or independent historian(s). (Each unique test, order, or document is counted to meet a threshold number.)
  - Independent interpretation of tests (not separately reported).
  - Discussion of management or test interpretation with external physician or other qualified health care professional or appropriate source (not separately reported).
- ***The risk of complications and/or morbidity or mortality of patient management***. This includes decisions made at the encounter associated with diagnostic procedure(s) and treatment(s). This includes the possible management options selected and those considered but not selected after shared decision making with the patient and/or family. For example, a decision about hospitalization includes consideration of alternative levels of care. Examples may include a psychiatric patient with a sufficient degree of support in the outpatient setting or the decision to not hospitalize a patient with advanced dementia with an acute condition that would generally warrant inpatient care, but for whom the goal is palliative treatment.

Shared decision making involves eliciting patient and/or family preferences, patient and/or family education, and explaining risks and benefits of management options.

MDM may be impacted by role and management responsibility.

When the physician or other qualified health care professional is reporting a separate CPT code that includes interpretation and/or report, the interpretation and/or report is not counted toward the MDM when selecting a level of E/M services. When the physician or other qualified health care professional is reporting a separate service for discussion of management with a physician or another qualified health care professional, the discussion is not counted toward the MDM when selecting a level of E/M services.

The Levels of Medical Decision Making (MDM) table (Table 1) is a guide to assist in selecting the level of MDM for reporting an E/M services code. The table includes the four levels of MDM (ie, straightforward, low, moderate, high) and the three elements of MDM (ie, number and complexity of problems addressed at the encounter, amount and/or complexity of data reviewed and analyzed, and risk of complications and/or morbidity or mortality of patient management). To qualify for a particular level of MDM, two of the three elements for that level of MDM must be met or exceeded.

Examples in the table may be more or less applicable to specific settings of care. For example, the decision to hospitalize applies to the outpatient or nursing facility encounters, whereas the decision to escalate hospital level of care (eg, transfer to ICU) applies to the hospitalized or observation care patient. See also the introductory guidelines of each code family section.

The elements listed in Table 1, Levels of Medical Decision Making, are defined in the guidelines for number and complexity of problems addressed at the encounter, amount and/or complexity of data to be reviewed and analyzed, and risk of complications and/or morbidity or mortality of patient management.

Number and Complexity of Problems Addressed at the Encounter

One element used in selecting the level of service is the number and complexity of the problems that are addressed at the encounter. Multiple new or established conditions may be addressed at the same time and may affect MDM. Symptoms may cluster around a specific diagnosis and each symptom is not necessarily a unique condition. Comorbidities and underlying diseases, in and of themselves, are not considered in selecting a level of E/M services **unless** they are addressed, and their presence increases the amount and/or complexity of data to be reviewed and analyzed or the risk of complications and/or morbidity or mortality of patient management. The final diagnosis for a condition does not, in and of itself, determine the complexity or risk, as extensive evaluation may be required to reach the conclusion that the signs or symptoms do not represent a highly morbid condition. Therefore, presenting symptoms that are likely to represent a highly morbid condition may "drive" MDM even when the ultimate diagnosis is not highly morbid. The evaluation and/or treatment should be consistent with the likely nature of the condition. Multiple problems of a lower severity may, in the aggregate, create higher risk due to interaction.

The term "risk" as used in the definition of this element relates to risk from the condition. While condition risk and management risk may often correlate, the risk from the condition is distinct from the risk of the management.

Problem: A problem is a disease, condition, illness, injury, symptom, sign, finding, complaint, or other matter addressed at the encounter, with or without a diagnosis being established at the time of the encounter.

Problem addressed: A problem is addressed or managed when it is evaluated or treated at the encounter by the physician or other qualified health care professional reporting the service. This includes consideration of further testing or treatment that may not be elected by virtue of risk/benefit analysis or patient/parent/guardian/surrogate choice. Notation in the patient's medical record that another professional is managing the problem without additional assessment or care coordination documented does not qualify as being addressed or managed by the physician or other qualified health care professional reporting the service. Referral without evaluation (by history, examination, or diagnostic study[ies]) or consideration of treatment does not qualify as being addressed or managed by the physician or other qualified health care professional reporting the service. For hospital inpatient and observation care services, the problem addressed is the problem status on the date of the encounter, which may be significantly different than on admission. It is the problem being managed or co-managed by the reporting physician or other qualified health care professional and may not be the cause of admission or continued stay.

Table 1: Levels of Medical Decision Making (MDM)

Elements of Medical Decision Making			
Level of MDM (Based on 2 out of 3 Elements of MDM)	**Number and Complexity of Problems Addressed at the Encounter**	**Amount and/or Complexity of Data to Be Reviewed and Analyzed** ***Each unique test, order, or document contributes to the combination of 2 or combination of 3 in Category 1 below.***	**Risk of Complications and/or Morbidity or Mortality of Patient Management**
Straightforward	**Minimal** ▪ **1** self-limited or minor problem	**Minimal or none**	**Minimal risk of morbidity from additional diagnostic testing or treatment**
Low	**Low** ▪ **2** or more self-limited or minor problems; **or** ▪ **1** stable, chronic illness; **or** ▪ **1** acute, uncomplicated illness or injury; **or** ▪ **1** stable, acute illness; **or** ▪ **1** acute, uncomplicated illness or injury requiring hospital inpatient or observation level of care	**Limited** *(Must meet the requirements of at least 1 out of 2 categories)* **Category 1: Tests and documents** ▪ **Any combination of 2 from the following:** • Review of prior external note(s) from each unique source*; • Review of the result(s) of each unique test*; • Ordering of each unique test* **or** **Category 2: Assessment requiring an independent historian(s)** *(For the categories of independent interpretation of tests and discussion of management or test interpretation, see moderate or high)*	**Low risk of morbidity from additional diagnostic testing or treatment**

Moderate	**Moderate** ▪ **1** or more chronic illnesses with exacerbation, progression, or side effects of treatment; **or** ▪ **2** or more stable, chronic illnesses; **or** ▪ **1** undiagnosed new problem with uncertain prognosis; **or** ▪ **1** acute illness with systemic symptoms; **or** ▪ **1** acute, complicated injury	**Moderate** *(Must meet the requirements of at least 1 out of 3 categories)* **Category 1: Tests, documents, or independent historian(s)** ▪ **Any combination of 3 from the following:** • Review of prior external note(s) from each unique source*; • Review of the result(s) of each unique test*; • Ordering of each unique test*; • Assessment requiring an independent historian(s) **or** **Category 2: Independent interpretation of tests** ▪ Independent interpretation of a test performed by another physician/other qualified health care professional (not separately reported); **or** **Category 3: Discussion of management or test interpretation** ▪ Discussion of management or test interpretation with external physician/other qualified health care professional/appropriate source (not separately reported)	**Moderate risk of morbidity from additional diagnostic testing or treatment** *Examples only:* ▪ Prescription drug management ▪ Decision regarding minor surgery with identified patient or procedure risk factors ▪ Decision regarding elective major surgery without identified patient or procedure risk factors ▪ Diagnosis or treatment significantly limited by social determinants of health

High	**High** ▪ **1** or more chronic illnesses with severe exacerbation, progression, or side effects of treatment; **or** ▪ **1** acute or chronic illness or injury that poses a threat to life or bodily function	**Extensive** *(Must meet the requirements of at least 2 out of 3 categories)* **Category 1: Tests, documents, or independent historian(s)** ▪ **Any combination of 3 from the following:** • Review of prior external note(s) from each unique source*; • Review of the result(s) of each unique test*; • Ordering of each unique test*; • Assessment requiring an independent historian(s) **or** **Category 2: Independent interpretation of tests** ▪ Independent interpretation of a test performed by another physician/other qualified health care professional (not separately reported); **or** **Category 3: Discussion of management or test interpretation** ▪ Discussion of management or test interpretation with external physician/other qualified health care professional/appropriate source (not separately reported)	**High risk of morbidity from additional diagnostic testing or treatment** *Examples only:* ▪ Drug therapy requiring intensive monitoring for toxicity ▪ Decision regarding elective major surgery with identified patient or procedure risk factors ▪ Decision regarding emergency major surgery ▪ Decision regarding hospitalization or escalation of hospital-level care ▪ Decision not to resuscitate or to de-escalate care because of poor prognosis ▪ Decision regarding parenteral controlled substances

Minimal problem: A problem that may not require the presence of the physician or other qualified health care professional, but the service is provided under the physician's or other qualified health care professional's supervision (see 99211, 99281).

Self-limited or minor problem: A problem that runs a definite and prescribed course, is transient in nature, and is not likely to permanently alter health status.

Stable, chronic illness: A problem with an expected duration of at least one year or until the death of the patient. For the purpose of defining chronicity, conditions are treated as chronic whether or not stage or severity changes (eg, uncontrolled diabetes and controlled diabetes are a single chronic condition). "Stable" for the purposes of categorizing MDM is defined by the specific treatment goals for an individual patient. A patient who is not at his or her treatment goal is not stable, even if the condition has not changed and there is no short-term threat to life or function. For example, a patient with persistently poorly controlled blood pressure for whom better control is a goal is not stable, even if the pressures are not changing and the patient is asymptomatic. The risk of morbidity **without** treatment is significant.

Acute, uncomplicated illness or injury: A recent or new short-term problem with low risk of morbidity for which treatment is considered. There is little to no risk of mortality with treatment, and full recovery without functional impairment is expected. A problem that is normally self-limited or minor but is not resolving consistent with a definite and prescribed course is an acute, uncomplicated illness.

Acute, uncomplicated illness or injury requiring hospital inpatient or observation level care: A recent or new short-term problem with low risk of morbidity for which treatment is required. There is little to no risk of mortality with treatment, and full recovery without functional impairment is expected. The treatment required is delivered in a hospital inpatient or observation level setting.

Stable, acute illness: A problem that is new or recent for which treatment has been initiated. The patient is improved and, while resolution may not be complete, is stable with respect to this condition.

Chronic illness with exacerbation, progression, or side effects of treatment: A chronic illness that is acutely worsening, poorly controlled, or progressing with an intent to control progression and requiring additional supportive care or requiring attention to treatment for side effects.

Undiagnosed new problem with uncertain prognosis: A problem in the differential diagnosis that represents a condition likely to result in a high risk of morbidity without treatment.

Acute illness with systemic symptoms: An illness that causes systemic symptoms and has a high risk of morbidity without treatment. For systemic general symptoms, such as fever, body aches, or fatigue in a minor illness that may be treated to alleviate symptoms, see the definitions for ***self-limited or minor problem*** or ***acute, uncomplicated illness or injury.*** Systemic symptoms may not be general but may be single system.

Acute, complicated injury: An injury which requires treatment that includes evaluation of body systems that are not directly part of the injured organ, the injury is extensive, or the treatment options are multiple and/or associated with risk of morbidity.

Chronic illness with severe exacerbation, progression, or side effects of treatment: The severe exacerbation or progression of a chronic illness or severe side effects of treatment that have significant risk of morbidity and may require escalation in level of care.

Acute or chronic illness or injury that poses a threat to life or bodily function: An acute illness with systemic symptoms, an acute complicated injury, or a chronic illness or injury with exacerbation and/or progression or side effects of treatment, that poses a threat to life or bodily function in the near term without treatment. Some symptoms may represent a condition that is significantly probable and poses a potential threat to life or bodily function. These may be included in this category when the evaluation and treatment are consistent with this degree of potential severity.

Amount and/or Complexity of Data to Be Reviewed and Analyzed

One element used in selecting the level of services is the amount and/or complexity of data to be reviewed or analyzed at an encounter.

Analyzed: The process of using the data as part of the MDM. The data element itself may not be subject to analysis (eg, glucose), but it is instead included in the thought processes for diagnosis, evaluation, or treatment. Tests ordered are presumed to be analyzed when the results are reported. Therefore, when they are ordered during an encounter, they are counted in that encounter. Tests that are ordered outside of an encounter may be counted in the encounter in which they are analyzed. In the case of a recurring order, each new result may be counted in the encounter in which it is analyzed. For example, an encounter that includes an order for monthly prothrombin times would count for one prothrombin time ordered and reviewed. Additional future results, if analyzed in a subsequent encounter, may be counted as a single test in that subsequent encounter. Any service for which the professional component is separately reported by the physician or other qualified health care professional reporting the E/M services is not counted as a data element ordered, reviewed, analyzed, or independently interpreted for the purposes of determining the level of MDM.

Test: Tests are imaging, laboratory, psychometric, or physiologic data. A clinical laboratory panel (eg, basic metabolic panel [80047]) is a single test. The differentiation between single or multiple tests is defined in accordance with the CPT code set. For the purpose of data reviewed and analyzed, pulse oximetry is not a test.

Unique: A unique test is defined by the CPT code set. When multiple results of the same unique test (eg, serial blood glucose values) are compared during an E/M service, count it as one unique test. Tests that have overlapping elements are not unique, even if they are identified with distinct CPT codes. For example, a CBC with differential would incorporate the set of hemoglobin, CBC without differential, and platelet count. A unique source is defined as a physician or other qualified health care professional in a distinct group or different specialty or subspecialty, or a unique entity. Review of all materials from any unique source counts as one element toward MDM.

Combination of data elements: A combination of different data elements, for example, a combination of notes reviewed, tests ordered, tests reviewed, or independent historian, allows these elements to be summed. It does not require each item type or category to be represented. A unique test ordered, plus a note reviewed and an independent historian would be a combination of three elements.

External: External records, communications and/or test results are from an external physician, other qualified health care professional, facility, or health care organization.

External physician or other qualified health care professional: An external physician or other qualified health care professional who is not in the same group practice or is of a different specialty or subspecialty. This includes licensed professionals who are practicing independently. The individual may also be a facility or organizational provider such as from a hospital, nursing facility, or home health care agency.

Discussion: Discussion requires an interactive exchange. The exchange must be direct and not through intermediaries (eg, clinical staff or trainees). Sending chart notes or written exchanges that are within progress notes does not qualify as an interactive exchange. The discussion does not need to be on the date of the encounter, but it is counted only once and only when it is used in the decision making of the encounter. It may be asynchronous (ie, does not need to be in person), but it must be initiated and completed within a short time period (eg, within a day or two).

Independent historian(s): An individual (eg, parent, guardian, surrogate, spouse, witness) who provides a history in addition to a history provided by the patient who is unable to provide a complete or reliable history (eg, due to developmental stage, dementia, or psychosis) or because a confirmatory history is judged to be necessary. In the case where there may be conflict or poor communication between multiple historians and more than one historian is needed, the independent historian requirement is met. It does not include translation services. The independent history does not need to be obtained in person but does need to be obtained directly from the historian providing the independent information.

Independent interpretation: The interpretation of a test for which there is a CPT code, and an interpretation or report is customary. This does not apply when the physician or other qualified health care professional who reports the E/M service is reporting or has previously reported the test. A form of interpretation should be documented but need not conform to the usual standards of a complete report for the test. A test that is ordered and independently interpreted may count both as a test ordered and interpreted.

Appropriate source: For the purpose of the **discussion of management** data element (see Table 1, Levels of Medical Decision Making), an appropriate source includes professionals who are not health care professionals but may be involved in the management of the patient (eg, lawyer, parole officer, case manager, teacher). It does not include discussion with family or informal caregivers. For the purpose of ***documents reviewed*****,** documents from an appropriate source may be counted.

Risk of Complications and/or Morbidity or Mortality of Patient Management

One element used in selecting the level of service is the risk of complications and/or morbidity or mortality of patient management at an encounter. This is distinct from the risk of the condition itself.

Risk: The probability and/or consequences of an event. The assessment of the level of risk is affected by the nature of the event under consideration. For example, a low probability of death may be high risk, whereas a high chance of a minor, self-limited adverse effect of treatment may be low risk. Definitions of risk are based upon the usual behavior and thought processes of a physician or other qualified health care professional in the same specialty. Trained clinicians apply common language usage meanings to terms such as *high, medium, low*, or *minimal* risk and do not require quantification for these definitions (though quantification may be provided when evidence-based medicine has established probabilities). For the purpose of MDM, level of risk is based upon consequences of the problem(s) addressed at the encounter when appropriately treated. Risk also includes MDM related to the need to initiate or forego further testing, treatment, and/or hospitalization. The risk of patient management criteria applies to the patient management decisions made by the reporting physician or other qualified health care professional as part of the reported encounter.

Morbidity: A state of illness or functional impairment that is expected to be of substantial duration during which function is limited, quality of life is impaired, or there is organ damage that may not be transient despite treatment.

Social determinants of health: Economic and social conditions that influence the health of people and communities. Examples may include food or housing insecurity.

Surgery (minor or major, elective, emergency, procedure or patient risk):

> ***Surgery—Minor or Major:*** The classification of surgery into minor or major is based on the common meaning of such terms when used by trained clinicians, similar to the use of the term "risk." These terms are not defined by a surgical package classification.
>
> ***Surgery—Elective or Emergency:*** Elective procedures and emergent or urgent procedures describe the timing of a procedure when the timing is related to the patient's condition. An elective procedure is typically planned in advance (eg, scheduled for weeks later), while an emergent procedure is typically performed immediately or with minimal delay to allow for patient stabilization. Both elective and emergent procedures may be minor or major procedures.
>
> ***Surgery—Risk Factors, Patient or Procedure:*** Risk factors are those that are relevant to the patient and procedure. Evidence-based risk calculators may be used, but are not required, in assessing patient and procedure risk.

Drug therapy requiring intensive monitoring for toxicity: A drug that requires intensive monitoring is a therapeutic agent that has the potential to cause serious morbidity or death. The monitoring is performed for assessment of these adverse effects and not primarily for assessment of therapeutic efficacy. The monitoring should be that which is generally accepted practice for the agent but may be patient-specific in some cases. Intensive monitoring may be long-term or short-term. Long-term intensive monitoring is not performed less than quarterly. The monitoring may be performed with a laboratory test, a physiologic test, or imaging. Monitoring by history or examination does not qualify. The monitoring affects the level of MDM in an encounter in which it is considered in the management of the patient. An example may be monitoring for cytopenia in the use of an antineoplastic agent between dose cycles. Examples of monitoring that do not qualify include monitoring glucose levels during insulin therapy, as the primary reason is the therapeutic effect (unless severe hypoglycemia is a current, significant concern); or annual electrolytes and renal function for a patient on a diuretic, as the frequency does not meet the threshold.

Parenteral controlled substances: The level of risk is based on the usual behavior and thought processes of a physician or other qualified health care professional in the same specialty and subspecialty and not simply based on the presence of an order for parenteral controlled substances.

Guidelines for Selecting Level of Service Based on Time

Certain categories of time-based E/M codes that do not have levels of services based on MDM (eg, Critical Care Services) in the E/M section use time differently. It is important to review the instructions for each category.

Time is **not** a descriptive component for the emergency department levels of E/M services because emergency department services are typically provided on a variable intensity basis, often involving multiple encounters with several patients over an extended period of time.

When time is used for reporting E/M services codes, the time defined in the service descriptors is used for selecting the appropriate level of services. The E/M services for which these guidelines apply require a face-to-face encounter with the physician or other qualified health care professional and the patient and/or family/caregiver. For office or other outpatient services, if the physician's or other qualified health care professional's time is spent in the supervision of clinical staff who perform the face-to-face services of the encounter, use 99211.

For coding purposes, time for these services is the total time on the date of the encounter. It includes both the face-to-face time with the patient and/or family/caregiver and non-face-to-face time personally spent by the physician and/or other qualified health care professional(s) on the day of the encounter (includes time in activities that require the physician or other qualified health care professional and does not include time in activities normally performed by clinical staff). It includes time regardless of the location of the physician or other qualified health care professional (eg, whether on or off the inpatient unit or in or out of the outpatient office). It does not include any time spent in the performance of other separately reported service(s).

Each service that may be reported using time for code level selection has a required time threshold. The concept of attaining a mid-point between levels does not apply. A full 15 minutes is required to report any unit of prolonged services codes 99417, 99418.

Physician(s) and other qualified health care professional(s) may each provide a portion of the face-to-face and non-face-to-face work related to the service. When time is being used to select the appropriate level of services for which time-based reporting is allowed, the time personally spent by the physician(s) and other qualified health care professional(s) assessing and managing the patient and/or counseling, educating, communicating results to the patient/family/caregiver on the date of the encounter is summed to define total time. Only distinct time should be summed (ie, when two or more individuals jointly meet with or discuss the patient, only the time of one individual should be counted).

When prolonged time occurs, the appropriate prolonged services code may be reported. The total time on the date of the encounter spent caring for the patient should be documented in the medical record when it is used as the basis for code selection.

Physician or other qualified health care professional time includes the following activities, when performed:

- preparing to see the patient (eg, review of tests)
- obtaining and/or reviewing separately obtained history
- performing a medically appropriate examination and/or evaluation
- counseling and educating the patient/family/caregiver
- ordering medications, tests, or procedures
- referring and communicating with other health care professionals (when not separately reported)
- documenting clinical information in the electronic or other health record
- independently interpreting results (not separately reported) and communicating results to the patient/family/caregiver
- care coordination (not separately reported)

Do not count time spent on the following:

- the performance of other services that are reported separately
- travel
- teaching that is general and not limited to discussion that is required for the management of a specific patient

For split or shared visits, see the split or shared visits guidelines.

Unlisted Service

An E/M service may be provided that is not listed in this section of the CPT codebook. When reporting such a service, the appropriate unlisted code may be used to indicate the service, identifying it by "Special Report," as discussed in the following paragraph. The "Unlisted Services" and accompanying codes for the E/M section are as follows:

99429 **Unlisted preventive** medicine service
99499 **Unlisted evaluation and management** service

Special Report

An unlisted service or one that is unusual, variable, or new may require a special report demonstrating the medical appropriateness of the service. Pertinent information should include an adequate definition or description of the nature, extent, and need for the procedure and the time, effort, and equipment necessary to provide the service. Additional items that may be included are complexity of symptoms, final diagnosis, pertinent physical findings, diagnostic and therapeutic procedures, concurrent problems, and follow-up care.

Evaluation and Management

Office or Other Outpatient Services

The following codes are used to report evaluation and management services provided in the office or in an outpatient or other ambulatory facility.

To report services provided to a patient who is admitted to a hospital or nursing facility in the course of an encounter in the office or other ambulatory facility, see the notes for initial hospital inpatient or observation care or initial nursing facility care.

For services provided in the emergency department, see 99281-99285.

For observation care, see 99221-99239.

For hospital inpatient or observation care services (including admission and discharge services), see 99234-99236.

Coding Tip

Determination of Patient Status as New or Established Patient

Solely for the purposes of distinguishing between new and established patients, **professional services** are those face-to-face services rendered by physicians and other qualified health care professionals who may report evaluation and management services. A new patient is one who has not received any professional services from the physician or other qualified health care professional or another physician or other qualified health care professional of the **exact** same specialty and subspecialty who belongs to the same group practice, within the past three years.

An established patient is one who has received professional services from the physician or other qualified health care professional or another physician or other qualified health care professional of the **exact** same specialty **and subspecialty** who belongs to the same group practice, within the past three years.

In the instance where a physician or other qualified health care professional is on call for or covering for another physician or other qualified health care professional, the patient's encounter will be classified as it would have been by the physician or other qualified health care professional who is not available. When advanced practice nurses and physician assistants are working with physicians they are considered as working in the **exact** same specialty and **subspecialty** as the physician.

CPT Coding Guidelines, Evaluation and Management, Classification of Evaluation and Management (E/M) Services, New and Established Patients

New Patient

99202 **Office or other outpatient visit** for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and straightforward medical decision making.

When using total time on the date of the encounter for code selection, 15 minutes must be met or exceeded.

(For services 55 minutes or longer, use prolonged services code 99417)

Telemedicine Services

Telemedicine services are synchronous, real-time, interactive encounters between a physician or other qualified health care professional (QHP) and a patient utilizing either combined audio-video or audio-only telecommunication. Unless specifically stated in the code descriptor, level selection for telemedicine services is based on either the level of medical decision making (MDM) or the total time for E/M services performed on the date of the encounter, as defined for each service. Telemedicine services are used in lieu of an in-person service when medically appropriate to address the care of the patient and when the patient and/or family/caregiver agree to this format of care. Telemedicine services are not used to report routine telecommunications related to a previous encounter (eg, to communicate laboratory results). They may be used for follow-up of a previous encounter, when a follow-up E/M service is required, in the same manner as in-person E/M services are used. For example, telemedicine services may be used for a patient requiring re-assessment for response or complications related to the treatment plan of a previous visit. Except for 98016, these services do not require a specific time interval from the last in-person or telemedicine visit and may be initiated by a physician or other QHP as well as by a patient and/or family/caregiver. However, the telemedicine services must be performed on a separate calendar date from another E/M service. When performed on the same date as another E/M service, the elements and time of these services are summed and reported in aggregate, ensuring that any overlapping time is only counted once. If the minimum time for reporting a telemedicine service has not been achieved, time spent with the patient may still count

For audio-only telemedicine services for established patients with 5 to 10 minutes of medical discussion, report brief communication technology service (eg, virtual check-in) code 98016. Code 98016 is reported for established patients only. The service is patient-initiated and intended to evaluate whether a more extensive visit type is required (eg, an office or other outpatient E/M service [99212, 99213, 99214, 99215]). Video technology is not required for audio-only visits. When the patient-initiated check-in leads to an E/M service on the same calendar date, and when time is used to select the level of that E/M service, the time from 98016 may be added to the time of the E/M service for the total time on the date of the encounter.

For services that are asynchronous (ie, not live in real-time), see **Online Digital Evaluation and Management Services** (99421, 99422, 99423). Do not report telemedicine services for oversight of clinical staff (eg, chronic care management [CCM]). Do not count the time performing telemedicine services toward time performing CCM (99437, 99491) or principal care management services (99424, 99425). See Table 2, Telemedicine and Non-Face-to-Face Services.

For 98000-98015, the level of service is selected based on MDM or total time on the date of the encounter. For audio-only codes 98008, 98009, 98010, 98011, 98012, 98013, 98014, 98015, the service must exceed 10 minutes of medical discussion. Code 98016 describes services for established patients with 5 to 10 minutes of medical discussion and is based only on the time of medical discussion and not MDM. Do not count time for establishing the connection or arranging the appointment, even when performed by the physician or other QHP. Services of less than five minutes are not reported.

For audio-only codes 98008, 98009, 98010, 98011, 98012, 98013, 98014, 98015, medical discussion is synchronous (real-time) interactive verbal communication and does not include online digital communication (except when via a telecommunication technology device for the deaf). The meaning of MDM has the meaning used in the E/M Guidelines and is a cognitive process by the physician or other QHP.

If during the encounter, audio-video connections are lost and only audio is restored, report the service that accounted for the majority of the time of the interactive portion of the service. Ten minutes of medical discussion or patient observation must be exceeded in order to report the audio-only service.

Table 2: Telemedicine and Non-Face-to-Face Services

Service	New/Established	Synchronous	Level/Unit Reported	Service Reported	Other E/M Notations
Synchronous audio-video (98000-98007)	Both	Yes	MDM or total time on the date of the service. No minimum required time, unless level selected by time.	Per single calendar date	Do not report with same-day in-person E/M
Synchronous audio-only (98008-98015)	Both	Yes	MDM or total time on the date of the service. Must be more than 10 minutes of medical discussion.	Per single calendar date	Do not report with same-day in-person E/M
Brief synchronous communication technology service (98016)	Established	Yes	A single 5- to 10-minute medical discussion	Per single calendar date	Not related to E/M in prior 7 days or leading to E/M in next 24 hours
Online digital E/M (99421-99423)	Established	No	Minutes during 7-day period	Per 7 days	Not related to E/M in prior 7 days or leading to E/M in next 24 hours
Interprofessional telephone/Internet/EHR consultations (99446-99451)	Both	Not required	Minutes during 7-day period	Per 7 days	No in-person encounter within 14 days
Interprofessional telephone/Internet/EHR consultations (99452)	Both	Not required	Minutes during a single day	Per 14 days	Do not report with same-day E/M
Care management and remote treatment management (99424, 99425, 99437, 99484, 99491)	Established	Not required	Minutes	Per calendar month	Physician or other QHP time excluded on date of other E/M
All services (98000-98016, 99421-99425, 99437, 99446-99452, 99484, 99491)	Same time is not counted twice				

Synchronous Audio-Video Evaluation and Management Services

Codes 98000, 98001, 98002, 98003, 98004, 98005, 98006, 98007 may be reported for new or established patients. Synchronous audio and video telecommunication is required. These services may be reported based on total time on the date of the encounter or MDM.

New Patient

 # 98000 **Synchronous audio-video visit** for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and straightforward medical decision making.

When using total time on the date of the encounter for code selection, 15 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Jan 25:1, Mar 25:9

 # 98001 **Synchronous audio-video visit** for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and low medical decision making.

When using total time on the date of the encounter for code selection, 30 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Mar 25:9

 # 98002 **Synchronous audio-video visit** for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and moderate medical decision making.

When using total time on the date of the encounter for code selection, 45 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Mar 25:9

 # 98003 **Synchronous audio-video visit** for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and high medical decision making.

When using total time on the date of the encounter for code selection, 60 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Mar 25:9

(For services 75 minutes or longer, use prolonged services code 99417)

Synchronous Audio-Only Evaluation and Management Services

Codes 98008, 98009, 98010, 98011, 98012, 98013, 98014, 98015 may be reported for new or established patients. They require more than 10 minutes of medical discussion. For services of 5 to 10 minutes of medical discussion, report 98016, if appropriate. If 10 minutes of medical discussion is exceeded, total time on the date of the encounter or MDM may be used for code level selection.

New Patient

 # 98008 **Synchronous audio-only visit** for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination, straightforward medical decision making, and more than 10 minutes of medical discussion.

When using total time on the date of the encounter for code selection, 15 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:1, Mar 25:9

 # 98009 **Synchronous audio-only visit** for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination, low medical decision making, and more than 10 minutes of medical discussion.

When using total time on the date of the encounter for code selection, 30 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:1, Mar 25:9

 # 98010 **Synchronous audio-only visit** for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination, moderate medical decision making, and more than 10 minutes of medical discussion.

When using total time on the date of the encounter for code selection, 45 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:1, Mar 25:9

 # 98011 **Synchronous audio-only visit** for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination, high medical decision making, and more than 10 minutes of medical discussion.

When using total time on the date of the encounter for code selection, 60 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:1, Mar 25:9

(For services 75 minutes or longer, use prolonged services code 99417)

Established Patient

 # 98012 **Synchronous audio-only visit** for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination, straightforward medical decision making, and more than 10 minutes of medical discussion.

When using total time on the date of the encounter for code selection, 10 minutes must be exceeded.

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:1, Feb 25:12, Mar 25:9

 # 98013 **Synchronous audio-only visit** for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination, low medical decision making, and more than 10 minutes of medical discussion.

When using total time on the date of the encounter for code selection, 20 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:1, Feb 25:12, Mar 25:9

 # 98014 **Synchronous audio-only visit** for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination, moderate medical decision making, and more than 10 minutes of medical discussion.

When using total time on the date of the encounter for code selection, 30 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:1, Feb 25:12, Mar 25:9

 # 98015 **Synchronous audio-only visit** for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination, high medical decision making, and more than 10 minutes of medical discussion.

When using total time on the date of the encounter for code selection, 40 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:1, Jan 25:1, Feb 25:12, Mar 25:9

(For services 55 minutes or longer, use prolonged services code 99417)

Brief Synchronous Communication Technology Service (eg, Virtual Check-In)

Code 98016 is reported for established patients only. The service is patient-initiated and intended to evaluate whether a more extensive visit type is required (eg, an office or other outpatient E/M service [99212, 99213, 99214, 99215]). Video technology is not required. Code 98016 describes a service of shorter duration than the audio-only services and has other restrictions that are related to the intended use as a "virtual check-in" or triage to determine if another E/M service is necessary. When the patient-initiated check-in leads to an E/M service on the same calendar date, and when time is used to select the level of that E/M service, the time from 98016 may be added to the time of the E/M service for total time on the date of the encounter.

 # 98016 **Brief communication technology-based service** (eg, virtual check-in) by a physician or other qualified health care professional who can report evaluation and management services, provided to an established patient, not originating from a related evaluation and management service provided within the previous 7 days nor leading to an evaluation and management service or procedure within the next 24 hours or soonest available appointment, 5-10 minutes of medical discussion

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:1, Jan 25:1, Feb 25:12, Mar 25:9

(Do not report 98016 in conjunction with 98000-98015)

(Do not report services of less than 5 minutes of medical discussion)

Hospital Inpatient and Observation Care Services

The following codes are used to report initial and subsequent evaluation and management services provided to hospital inpatients and to patients designated as hospital outpatient "observation status." Hospital inpatient or observation care codes are also used to report partial hospitalization services.

For patients designated/admitted as "observation status" in a hospital, it is not necessary that the patient be located in an observation area designated by the hospital. If such an area does exist in a hospital (as a separate unit in the hospital, in the emergency department, etc), these codes may be utilized if the patient is placed in such an area.

For a patient admitted and discharged from hospital inpatient or observation status on the same date, report 99234, 99235, 99236, as appropriate.

Total time on the date of the encounter is by calendar date. When using MDM or total time for code selection, a continuous visit that spans the transition of two calendar dates is a single service and is reported on one calendar date. If the service is continuous before and through midnight, all the time may be applied to the reported date of the service.

Initial Hospital Inpatient or Observation Care

New or Established Patient

The following codes are used to report the first hospital inpatient or observation status encounter with the patient.

An initial service may be reported when the patient has not received any professional services from the physician or other qualified health care professional or another physician or other qualified health care professional of the exact same specialty and subspecialty who belongs to the same group practice during the stay. When advanced practice nurses and physician assistants are working with physicians, they are considered as working in the exact same specialty and subspecialty as the physician.

For admission services for the neonate (28 days of age or younger) requiring intensive observation, frequent interventions, and other intensive care services, see 99477.

When the patient is admitted to the hospital as an inpatient or to observation status in the course of an encounter in another site of service (eg, hospital emergency department, office, nursing facility), the services in the initial site may be separately reported. Modifier 25 may be added to the other evaluation and management service to indicate a significant, separately identifiable service by the same physician or other qualified health care professional was performed on the same date.

In the case when the services in a separate site are reported and the initial inpatient or observation care service is a consultation service, do not report 99221, 99222, 99223, 99252, 99253, 99254, 99255. The consultant reports the subsequent hospital inpatient or observation care codes 99231, 99232, 99233 for the second service on the same date.

If a consultation is performed in anticipation of, or related to, an admission by another physician or other qualified health care professional, and then the same consultant performs an encounter once the patient is admitted by the other physician or other qualified health care professional, report the consultant's inpatient encounter with the appropriate subsequent care code (99231, 99232, 99233). It applies for consultations reported with any appropriate code (eg, office or other outpatient visit or office or other outpatient consultation).

For a patient admitted and discharged from hospital inpatient or observation status on the same date, report 99234, 99235, 99236, as appropriate.

For the purpose of reporting an initial hospital inpatient or observation care service, a transition from observation level to inpatient does not constitute a new stay.

99221 **Initial hospital inpatient or observation care,** per day, for the evaluation and management of a patient, which requires a medically appropriate history and/or examination and straightforward or low level medical decision making.

When using total time on the date of the encounter for code selection, 40 minutes must be met or exceeded.

(For services of 65 minutes or longer, use prolonged services code 99418)

Hospital Inpatient or Observation Care Services (Including Admission and Discharge Services)

The following codes are used to report hospital inpatient or observation care services provided to patients admitted and discharged on the same date of service when the stay is more than eight hours. These services are only used by the physician or other qualified health care professional team who performs both the initial and discharge services. Other physicians and other qualified health care professionals may report 99221, 99222, 99223, as appropriate.

When a patient receives hospital inpatient or observation care for fewer than eight hours, only the initial hospital inpatient or observation care codes (99221, 99222, 99223) may be reported for the date of admission. Hospital or observation discharge day management codes (99238, 99239) may not be reported. When a patient receives hospital inpatient or observation care for a minimum of eight hours and is discharged on the same calendar date, observation or inpatient care services (including admission and discharge services) codes (99234, 99235, 99236) may be reported. Codes 99238, 99239 are not reported.

For patients admitted to hospital inpatient or observation care and discharged on a different date, see 99221, 99222, 99223, 99231, 99232, 99233, 99238, 99239.

Codes 99234, 99235, 99236 require two or more visits on the same date of which one of these visits is an initial admission and another being a discharge. For a patient admitted and discharged at the same visit (ie, one visit), see 99221, 99222, 99223. Do not report 99238, 99239 in conjunction with 99221, 99222, 99223 for admission and discharge services performed on the same date.

Length of Stay	Discharged On	Report Codes
<8 hours	Same calendar date as initial hospital inpatient or observation care service	99221, 99222, 99223
8 or more hours	Same calendar date as initial hospital inpatient or observation care service	99234, 99235, 99236
<8 hours	Different calendar date as initial hospital inpatient or observation care service	99221, 99222, 99223
8 or more hours	Different calendar date as initial hospital inpatient or observation care service	99221, 99222, 99223 and 99238, 99239

(For discharge services provided to newborns admitted and discharged on the same date, use 99463)

99234 **Hospital inpatient or observation care,** for the evaluation and management of a patient including admission and discharge on the same date, which requires a medically appropriate history and/or examination and straightforward or low level of medical decision making.

When using total time on the date of the encounter for code selection, 45 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2013, 2023
- *CPT Assistant* Nov 97:2, Mar 98:2, May 98:1, Sep 98:5, Jan 00:11, Sep 00:3, Jan 02:2, Jun 02:10, Jan 03:10, May 05:1, Nov 05:10, Sep 06:8, Dec 06:14, Sep 10:4, Jun 11:3, Jul 12:14, Jun 13:3, Apr 18:10, Dec 18:8, Aug 22:3-7, Jan 23:20

99235 **Hospital inpatient or observation care,** for the evaluation and management of a patient including admission and discharge on the same date, which requires a medically appropriate history and/or examination and moderate level of medical decision making.

When using total time on the date of the encounter for code selection, 70 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2013, 2023
- *CPT Assistant* Nov 97:2, Mar 98:2, May 98:1, Sep 98:5, Jan 00:11, Sep 00:3, Jan 02:2, Jun 02:10, Jan 03:10, Nov 05:10, Sep 06:8, Dec 06:14, Sep 10:4, Jun 11:3, Jul 12:14, Jun 13:3, Apr 18:10, Dec 18:8, Aug 22:3-7, Jan 23:20

99236 **Hospital inpatient or observation care,** for the evaluation and management of a patient including admission and discharge on the same date, which requires a medically appropriate history and/or examination and high level of medical decision making.

When using total time on the date of the encounter for code selection, 85 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2013, 2023
- *CPT Assistant* Nov 97:2, Mar 98:2, May 98:1, Sep 98:5, Jan 00:11, Sep 00:3, Jan 02:2, Jun 02:10, Jan 03:10, Nov 05:10, Sep 06:8, Dec 06:14, Sep 10:4, Jun 11:3, Jul 12:14, Jun 13:3, Apr 18:10, Dec 18:8, Aug 22:3-7, Nov 22:1, Dec 22:15, Jan 23:20

(For services of 100 minutes or longer, use prolonged services code 99418)

Hospital Inpatient or Observation Discharge Services

The hospital inpatient or observation discharge day management codes are to be used to report the total duration of time on the date of the encounter spent by a physician or other qualified health care professional for final hospital or observation discharge of a patient, even if the time spent by the physician or other qualified health care professional on that date is not continuous. The codes include, as appropriate, final examination of the patient, discussion of the hospital stay, instructions for continuing care to all relevant caregivers, and preparation of discharge records, prescriptions, and referral forms. These codes are to be utilized to report all services provided to a patient on the date of discharge, if other than the initial date of inpatient or observation status. For a patient admitted and discharged from hospital inpatient or observation status on the same date, report 99234, 99235, 99236, as appropriate.

Codes 99238, 99239 are to be used by the physician or other qualified health care professional who is responsible for discharge services. Services by other physicians or other qualified health care professionals that may include instructions to the patient and/or family/caregiver and coordination of post-discharge services may be reported with 99231, 99232, 99233.

99238 **Hospital inpatient or observation discharge day management;** 30 minutes or less on the date of the encounter

- *CPT Changes: An Insider's View* 2023
- *CPT Assistant* Fall 92:1, Spring 93:4, Nov 97:4, Mar 98:3, 11, May 98:2, Jan 99:10, Jan 02:2, Aug 04:11, May 05:1, Sep 06:8, Nov 09:10, Dec 09:9, Jul 11:16, Jul 12:10, 12, Jun 13:3, Aug 13:13, Dec 18:8, Aug 22:3-7, Dec 22:15, Jan 23:20

99239 more than 30 minutes on the date of the encounter

- *CPT Changes: An Insider's View* 2023
- *CPT Assistant* Nov 97:4, Mar 98:3, 11, May 98:2, Jan 99:10, Jan 02:2, Aug 04:11, Sep 06:8, Nov 09:10, Dec 09:9, Jul 11:16, Jul 12:12, Jun 13:3, Aug 13:13, Dec 18:8, Aug 22:3-7, Dec 22:15, Jan 23:20

(For hospital inpatient or observation care including the admission and discharge of the patient on the same date, see 99234, 99235, 99236)

(For discharge services provided to newborns admitted and discharged on the same date, use 99463)

(Do not report 99238, 99239 in conjunction with 99221, 99222, 99223 for admission and discharge services performed on the same date)

Hospital Inpatient or Observation Discharge Services

The hospital inpatient or observation discharge day management codes are to be used to report the total duration of time on the date of the encounter spent by a physician or other qualified health care professional for final hospital or observation discharge of a patient, even if the time spent by the physician or other qualified health care professional on that date is not continuous. The codes include, as appropriate, final examination of the patient, discussion of the hospital stay, instructions for continuing care to all relevant caregivers, and preparation of discharge records, prescriptions, and referral forms. These codes are to be utilized to report all services provided to a patient on the date of discharge, if other than the initial date of inpatient or observation status. For a patient admitted and discharged from hospital inpatient or observation status on the same date, report 99234, 99235, 99236, as appropriate.

Codes 99238, 99239 are to be used by the physician or other qualified health care professional who is responsible for discharge services. Services by other physicians or other qualified health care professionals that may include instructions to the patient and/or family/caregiver and coordination of post-discharge services may be reported with 99231, 99232, 99233.

(For hospital inpatient or observation care including the admission and discharge of the patient on the same date, see 99234, 99235, 99236)

(For discharge services provided to newborns admitted and discharged on the same date, use 99463)

(Do not report 99238, 99239 in conjunction with 99221, 99222, 99223 for admission and discharge services performed on the same date)

Consultations

A consultation is a type of evaluation and management service provided at the request of another physician, other qualified health care professional, or appropriate source to recommend care for a specific condition or problem.

A physician or other qualified health care professional consultant may initiate diagnostic and/or therapeutic services at the same or subsequent visit.

A "consultation" initiated by a patient and/or family, and not requested by a physician, other qualified health care professional, or other appropriate source (eg, non-clinical social worker, educator, lawyer, or insurance company), is not reported using the consultation codes.

The consultant's opinion and any services that were ordered or performed must also be communicated by written report to the requesting physician, other qualified health care professional, or other appropriate source.

If a consultation is mandated (eg, by a third-party payer) modifier 32 should also be reported.

To report services when a patient is admitted to hospital inpatient, or observation status, or to a nursing facility in the course of an encounter in another setting, see **Initial Hospital Inpatient or Observation Care** or **Initial Nursing Facility Care**.

Office or Other Outpatient Consultations

New or Established Patient

The following codes may be used to report consultations that are provided in the office or other outpatient site, including the home or residence, or emergency department. Follow-up visits in the consultant's office or other outpatient facility that are initiated by the consultant or patient are reported using the appropriate codes for established patients in the office (99212, 99213, 99214, 99215) or home or residence (99347, 99348, 99349, 99350). Services that constitute transfer of care (ie, are provided for the management of the patient's entire care or for the care of a specific condition or problem) are reported with the appropriate new or established patient codes for office or other outpatient visits or home or residence services.

(For an outpatient consultation requiring prolonged services, use 99417)

★ **99242** **Office or other outpatient consultation** for a new or established patient, which requires a medically appropriate history and/or examination and straightforward medical decision making.

When using total time on the date of the encounter for code selection, 20 minutes must be met or exceeded.

- *Clinical Examples in Radiology* Summer 09:3

(For services 70 minutes or longer, use prolonged services code 99417)

Inpatient or Observation Consultations

New or Established Patient

Codes 99252, 99253, 99254, 99255 are used to report physician or other qualified health care professional consultations provided to hospital inpatients, observation-level patients, residents of nursing facilities, or patients in a partial hospital setting, and when the patient has not received any face-to-face professional services from the physician or other qualified health care professional or another physician or other qualified health care professional of the exact same specialty and subspecialty who belongs to the same group practice during the stay. When advanced practice nurses and physician assistants are working with physicians, they are considered as working in the exact same specialty and subspecialty as the physician. Only one consultation may be reported by a consultant per admission. Subsequent consultation services during the same admission are reported using subsequent inpatient or observation hospital care codes (99231-99233) or subsequent nursing facility care codes (99307-99310).

(For an inpatient or observation consultation requiring prolonged services, use 99418)

★ **99252** **Inpatient or observation consultation** for a new or established patient, which requires a medically appropriate history and/or examination and straightforward medical decision making.

When using total time on the date of the encounter for code selection, 35 minutes must be met or exceeded.

- *Clinical Examples in Radiology* Summer 09:3

(For services 95 minutes or longer, use prolonged services code 99418)

Emergency Department Services

New or Established Patient

The following codes are used to report evaluation and management services provided in the emergency department. No distinction is made between new and established patients in the emergency department.

An emergency department is defined as an organized hospital-based facility for the provision of unscheduled episodic services to patients who present for immediate medical attention. The facility must be available 24 hours a day.

For critical care services provided in the emergency department, see Critical Care guidelines and 99291, 99292. Critical care and emergency department services may both be reported on the same day when after completion of the emergency department service, the condition of the patient changes and critical care services are provided.

For evaluation and management services provided to a patient in observation status, see 99221, 99222, 99223 for the initial observation encounter and 99231, 99232, 99233, 99238, 99239 for subsequent or discharge hospital inpatient or observation encounters.

For hospital inpatient or observation care services (including admission and discharge services), see 99234, 99235, 99236.

To report services when a patient is admitted to hospital inpatient or observation status, or to a nursing facility in the course of an encounter in another setting, see **Initial Hospital Inpatient or Observation Care** or **Initial Nursing Facility Care**.

For procedures or services identified by a CPT code that may be separately reported on the same date, use the appropriate CPT code. Use the appropriate modifier(s) to report separately identifiable evaluation and management services and the extent of services provided in a surgical package.

If a patient is seen in the emergency department for the convenience of a physician or other qualified health care professional, use office or other outpatient services codes (99202-99215).

Coding Tip

Time as a Factor in the Emergency Department Setting

Time is **not** a descriptive component for the emergency department levels of E/M services because emergency department services are typically provided on a variable intensity basis, often involving multiple encounters with several patients over an extended period of time.

CPT Coding Guidelines, Evaluation and Management, Guidelines for Selecting Level of Service Based on Time

Coding Tip

Emergency Department Classification of New vs Established Patient

No distinction is made between new and established patients in the emergency department. E/M services in the emergency department category may be reported for any new or established patient who presents for treatment in the emergency department.

CPT Coding Guidelines, Evaluation and Management, Classification of E/M Services, New and Established Patients

Other Emergency Services

In directed emergency care, advanced life support, the physician or other qualified health care professional is located in a hospital emergency or critical care department, and is in two-way voice communication with ambulance or rescue personnel outside the hospital. Direction of the performance of necessary medical procedures includes but is not limited to: telemetry of cardiac rhythm; cardiac and/or pulmonary resuscitation; endotracheal or esophageal obturator airway intubation; administration of intravenous fluids and/or administration of intramuscular, intratracheal or subcutaneous drugs; and/or electrical conversion of arrhythmia.

99288 **Physician or other qualified health care professional direction of** emergency medical systems (EMS) emergency care, advanced life support

Critical Care Services

Critical care is the direct delivery by a physician(s) or other qualified health care professional of medical care for a critically ill or critically injured patient. A critical illness or injury acutely impairs one or more vital organ systems such that there is a high probability of imminent or life threatening deterioration in the patient's condition. Critical care involves high complexity decision making to assess, manipulate, and support vital system function(s) to treat single or multiple vital organ system failure and/or to prevent further life threatening deterioration of the patient's condition. Examples of vital organ system failure include, but are not limited to: central nervous system failure, circulatory failure, shock, renal, hepatic, metabolic, and/or respiratory failure. Although critical care typically requires interpretation of multiple physiologic parameters and/or application of advanced technology(s), critical care may be provided in life threatening situations when these elements are not present. Critical care may be provided on multiple days, even if no changes are made in the treatment rendered to the patient, provided that the patient's condition continues to require the level of attention described above.

Providing medical care to a critically ill, injured, or post-operative patient qualifies as a critical care service only if both the illness or injury and the treatment being provided meet the above requirements. Critical care is usually, but not always, given in a critical care area, such as the coronary care unit, intensive care unit, pediatric intensive care unit, respiratory care unit, or the emergency care facility.

Inpatient critical care services provided to infants 29 days through 71 months of age are reported with pediatric critical care codes 99471-99476. The pediatric critical care codes are reported as long as the infant/young child qualifies for critical care services during the hospital stay through 71 months of age. Inpatient critical care services provided to neonates (28 days of age or younger) are reported with the neonatal critical care codes 99468 and 99469. The neonatal critical care codes are reported as long as the neonate qualifies for critical care services during the hospital stay through the 28th postnatal day. The reporting of the pediatric and neonatal critical care services is not based on time or the type of unit (eg, pediatric or neonatal critical care unit) and it is not dependent upon the type of physician or other qualified health care professional delivering the care. To report critical care services provided in the outpatient setting (eg, emergency department or office), for neonates and pediatric patients up through 71 months of age, see the critical care codes 99291, 99292. If the same individual provides critical care services for a neonatal or pediatric patient in both the outpatient and inpatient settings on the same day, report only the appropriate neonatal or pediatric critical care code 99468-99472 for all critical care services provided on that day. Also report 99291-99292 for neonatal or pediatric critical care services provided by the individual providing critical care at one facility but transferring the patient to another facility. Critical care services provided by a second individual of a different specialty not reporting a per day neonatal or pediatric critical care code can be reported with codes 99291, 99292. For additional instructions on reporting these services, see the Neonatal and Pediatric Critical Care section and codes 99468-99476.

Services for a patient who is not critically ill but happens to be in a critical care unit are reported using other appropriate E/M codes.

Critical care and other E/M services may be provided to the same patient on the same date by the same individual.

►For reporting by professionals, the following services are included in critical care when performed during the critical period by the physician(s) providing critical care: the interpretation of cardiac output measurements (93598), chest X rays (71045, 71046), pulse oximetry (94760, 94761, 94762), blood gases, and collection and interpretation of physiologic data (eg, ECGs, blood pressures, hematologic data); gastric intubation (43752, 43753); temporary transcutaneous pacing (92953); ventilatory management (94002-94004, 94660); and vascular access procedures (36000, 36410, 36415, 36591, 36600). Any services performed that are not included in this listing should be reported separately. Facilities may report the above services separately.◄

Codes 99291, 99292 should be reported for the attendance during the transport of critically ill or critically injured patients older than 24 months of age to or from a facility or hospital. For transport services of critically ill or critically injured pediatric patients 24 months of age or younger, see 99466, 99467.

Codes 99291, 99292 are used to report the total duration of time spent in provision of critical care services to a critically ill or critically injured patient, even if the time spent providing care on that date is not continuous. For any given period of time spent providing critical care services, the individual must devote his or her full attention to the patient and, therefore, cannot provide services to any other patient during the same period of time.

Time spent with the individual patient should be recorded in the patient's record. The time that can be reported as critical care is the time spent engaged in work directly related to the individual patient's care whether that time was spent at the immediate bedside or elsewhere on the floor or unit. For example, time spent on the unit or at the nursing station on the floor reviewing test results or imaging studies, discussing the critically ill patient's care with other medical staff or documenting critical care services in the medical record would be reported as critical care, even though it does not occur at the bedside. Also, when the patient is unable or lacks capacity to participate in discussions, time spent on the floor or unit with family members or surrogate decision makers obtaining a medical history, reviewing the patient's condition or prognosis, or discussing treatment or limitation(s) of treatment may be reported as critical care, provided that the conversation bears directly on the management of the patient.

Time spent in activities that occur outside of the unit or off the floor (eg, telephone calls whether taken at home, in the office, or elsewhere in the hospital) may not be reported as critical care since the individual is not immediately available to the patient. Time spent in activities that do not directly contribute to the treatment of the patient may not be reported as critical care, even if they are performed in the critical care unit (eg, participation in administrative meetings or telephone calls to discuss other patients). Time spent performing separately reportable procedures or services should not be included in the time reported as critical care time.

Code 99291 is used to report the first 30-74 minutes of critical care on a given date. It should be used only once per date even if the time spent by the individual is not continuous on that date. Critical care of less than 30 minutes total duration on a given date should be reported with the appropriate E/M code.

Code 99292 is used to report additional block(s) of time, of up to 30 minutes each beyond the first 74 minutes. (See the following table.)

The following examples illustrate the correct reporting of critical care services:

Total Duration of Critical Care	Codes
less than 30 minutes	appropriate E/M codes
30-74 minutes (30 minutes - 1 hr. 14 min.)	99291 X 1
75-104 minutes (1 hr. 15 min. - 1 hr. 44 min.)	99291 X 1 AND 99292 X 1
105-134 minutes (1 hr. 45 min. - 2 hr. 14 min.)	99291 X 1 AND 99292 X 2
135-164 minutes (2 hr. 15 min. - 2 hr. 44 min.)	99291 X 1 AND 99292 X 3
165-194 minutes (2 hr. 45 min. - 3 hr. 14 min.)	99291 X 1 AND 99292 X 4
195 minutes or longer (3 hr. 15 min. - etc.)	99291 and 99292 as appropriate (see illustrated reporting examples above)

99291 **Critical care, evaluation and management** of the critically ill or critically injured patient; first 30-74 minutes

Coding Tip

Services Included in Critical Care Services

For reporting by professionals, the following services are included in critical care when performed during the critical period by the physician(s) providing critical care: the interpretation of cardiac output measurements (93598), chest X rays (71045, 71046), pulse oximetry (94760, 94761, 94762), blood gases, and collection and interpretation of physiologic data (eg, ECGs, blood pressures, hematologic data); gastric intubation (43752, 43753); temporary transcutaneous pacing (92953); ventilatory management (94002-94004, 94660); and vascular access procedures (36000, 36410, 36415, 36591, 36600). Any services performed that are not listed above should be reported separately. Facilities may report the above services separately.

CPT Coding Guidelines, Critical Care Services

Nursing Facility Services

The following codes are used to report evaluation and management services to patients in nursing facilities and skilled nursing facilities. These codes should also be used to report evaluation and management services provided to a patient in a psychiatric residential treatment center and intermediate care facility for individuals with intellectual disabilities.

Regulations pertaining to the care of nursing facility residents govern the nature and minimum frequency of assessments and visits. These regulations also govern who may perform the initial comprehensive visit.

These services are performed by the principal physician(s) and other qualified health care professional(s) overseeing the care of the patient in the facility. The principal physician is sometimes referred to as the admitting physician and is the physician who oversees the patient's care as opposed to other physicians or other qualified health care professionals who may be furnishing specialty care. These services are also performed by physicians or other qualified health care professionals in the role of a specialist performing a consultation or concurrent care. Modifiers may be required to identify the role of the individual performing the service.

Two major subcategories of nursing facility services are recognized: Initial Nursing Facility Care and Subsequent Nursing Facility Care. Both subcategories apply to new or established patients.

The types of care (eg, skilled nursing facility and nursing facility care) are reported with the same codes. Place of service codes should be reported to specify the type of facility (and care) where the service(s) is performed.

When selecting a level of medical decision making (MDM) for nursing facility services, the number and complexity of problems addressed at the encounter is considered. For this determination, a high-level MDM-type specific to initial nursing facility care by the principal physician or other qualified health care professional is recognized. This type is:

Multiple morbidities requiring intensive management: A set of conditions, syndromes, or functional impairments that are likely to require frequent medication changes or other treatment changes and/or re-evaluations. The patient is at significant risk of worsening medical (including behavioral) status and risk for (re)admission to a hospital.

The definitions and requirements related to the amount and/or complexity of data to be reviewed and analyzed and the risk of complications and/or morbidity or mortality of patient management are unchanged.

Initial Nursing Facility Care

New or Established Patient

When the patient is admitted to the nursing facility in the course of an encounter in another site of service (eg, hospital emergency department, office), the services in the initial site may be separately reported. Modifier 25 may be added to the other evaluation and management service to indicate a significant, separately identifiable service by the same physician or other qualified health care professional was performed on the same date.

In the case when services in a separate site are reported and the initial nursing facility care service is a consultation service performed by the same physician or other qualified health care professional and reported on the same date, do not report 99252, 99253, 99254, 99255, 99304, 99305, 99306. The consultant reports the subsequent nursing facility care codes 99307, 99308, 99309, 99310 for the second service on the same date.

Hospital inpatient or observation discharge services performed on the same date of nursing facility admission or readmission may be reported separately. For a patient discharged from inpatient or observation status on the same date of nursing facility admission or readmission, the hospital or observation discharge services may be reported with codes 99238, 99239, as appropriate. For a patient admitted and discharged from hospital inpatient or observation status on the same date, see 99234, 99235, 99236. Time related to hospital inpatient or observation care services may not be used for code selection of any nursing facility service.

Initial nursing facility care codes 99304, 99305, 99306 may be used once per admission, per physician or other qualified health care professional, regardless of length of stay. They may be used for the initial comprehensive visit performed by the principal physician or other qualified health care professional. Skilled nursing facility initial comprehensive visits must be performed by a physician. Qualified health care professionals may report initial comprehensive nursing facility visits for nursing facility level of care patients, if allowed by state law or regulation. The principal physician or other qualified health care professional may work with others (who may not always be in the same group) but are overseeing the overall medical care of the patient, in order to provide timely care to the patient. Medically necessary assessments conducted by these professionals prior to the initial comprehensive visit are reported using subsequent care codes (99307, 99308, 99309, 99310).

Initial services by other physicians and other qualified health care professionals who are performing consultations may be reported using initial nursing facility care codes (99304, 99305, 99306) or inpatient or observation consultation codes (99252, 99253, 99254, 99255). This is not dependent upon the principal care professional's completion of the initial comprehensive services first.

An initial service may be reported when the patient has not received any face-to-face professional services from the physician or other qualified health care professional or another physician or other qualified health care professional of the exact same specialty and subspecialty who belongs to the same group practice during the stay. When advanced practice nurses or physician assistants are working with physicians, they are considered as working in the exact same specialty and subspecialty as the physician. An initial service may also be reported if the patient is a new patient as defined in the Evaluation and Management Guidelines.

For reporting initial nursing facility care, transitions between skilled nursing facility level of care and nursing facility level of care do not constitute a new stay.

99304 **Initial nursing facility care,** per day, for the evaluation and management of a patient, which requires a medically appropriate history and/or examination and straightforward or low level of medical decision making.

When using total time on the date of the encounter for code selection, 25 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2006, 2008, 2010, 2013, 2023

(For services 60 minutes or longer, use prolonged services code 99418)

Nursing Facility Discharge Services

The nursing facility discharge management codes are to be used to report the total duration of time spent by a physician or other qualified health care professional for the final nursing facility discharge of a patient. The codes include, as appropriate, final examination of the patient, discussion of the nursing facility stay, even if the time spent on that date is not continuous. Instructions are given for continuing care to all relevant caregivers, and preparation of discharge records, prescriptions, and referral forms. These services require a face-to-face encounter with the patient and/or family/caregiver that may be performed on a date prior to the date the patient leaves the facility. Code selection is based on the total time on the date of the discharge management face-to-face encounter.

99315 **Nursing facility discharge management;** 30 minutes or less total time on the date of the encounter

- *CPT Changes: An Insider's View* 2023
- *CPT Assistant* Nov 97:5-6, Sep 98:5, May 02:19, Nov 02:11, May 05:1, Jul 09:3, Jan 11:3, Jan 12:3, Jul 12:12, Jan 13:9, Jun 13:3, Nov 20:3, Aug 22:3-7, Oct 22:1, Dec 22:15

99316 more than 30 minutes total time on the date of the encounter

Home or Residence Services

The following codes are used to report evaluation and management services provided in a home or residence. Home may be defined as a private residence, temporary lodging, or short-term accommodation (eg, hotel, campground, hostel, or cruise ship).

These codes are also used when the residence is an assisted living facility, group home (that is not licensed as an intermediate care facility for individuals with intellectual disabilities), custodial care facility, or residential substance abuse treatment facility.

For services in an intermediate care facility for individuals with intellectual disabilities and services provided in a psychiatric residential treatment center, see **Nursing Facility Services**.

When selecting code level using time, do not count any travel time.

To report services when a patient is admitted to hospital inpatient, observation status, or to a nursing facility in the course of an encounter in another setting, see **Initial Hospital Inpatient and Observation Care** or **Initial Nursing Facility Care**.

New Patient

99341 **Home or residence visit** for the evaluation and management of a new patient, which requires a medically appropriate history and/or examination and straightforward medical decision making.

When using total time on the date of the encounter for code selection, 15 minutes must be met or exceeded.

- *CPT Changes: An Insider's View* 2013, 2023

(For services 75 minutes or longer, see prolonged services code 99417)

Prolonged Services

Prolonged Service Without Direct Patient Contact on Date Other Than the Face-to-Face Evaluation and Management Service

Codes 99358 and 99359 are used when a prolonged service is provided on a date other than the date of a face-to-face evaluation and management encounter with the patient and/or family/caregiver. Codes 99358, 99359 may be reported for prolonged services in relation to any evaluation and management service on a date other than the face-to-face service, whether or not time was used to select the level of the face-to-face service.

This service is to be reported in relation to other physician or other qualified health care professional services, including evaluation and management services at any level, on a date other than the face-to-face service to which it is related. Prolonged service without direct patient contact may only be reported when it occurs on a **date other than** the date of the evaluation and management service. For example, extensive record review may relate to a previous evaluation and management service performed at an earlier date. However, it must relate to a service or patient in which (face-to-face) patient care has occurred or will occur and relate to ongoing patient management.

Codes 99358 and 99359 are used to report the total duration of non-face-to-face time spent by a physician or other qualified health care professional on a given date providing prolonged service, even if the time spent by the physician or other qualified health care professional on that date is not continuous. Code 99358 is used to report the first hour of prolonged service on a given date regardless of the place of service. It should be used only once per date.

Prolonged service of less than 30 minutes total duration on a given date is not separately reported.

Code 99359 is used to report each additional 30 minutes beyond the first hour. It may also be used to report the final 15 to 30 minutes of prolonged service on a given date.

Prolonged service of less than 15 minutes beyond the first hour or less than 15 minutes beyond the final 30 minutes is not reported separately.

Do not report 99358, 99359 for time without direct patient contact reported in other services, such as care plan oversight services (99374-99380), chronic care management by a physician or other qualified health care professional (99437, 99491), principal care management by a physician or other qualified health care professional (99424, 99425, 99426, 99427), home and outpatient INR monitoring (93792, 93793), medical team conferences (99366-99368), interprofessional telephone/Internet/electronic health record consultations (99446, 99447, 99448, 99449, 99451, 99452), or online digital evaluation and management services (99421, 99422, 99423).

99358 **Prolonged evaluation and management service** before and/or after direct patient care; first hour

- *CPT Assistant* Spring 94:34, Sep 00:3, Nov 05:10, Jun 08:12, Sep 08:3, Aug 12:3-5, Apr 13:3, Oct 13:11, Nov 13:3, Oct 14:3, Oct 18:9, Jan 19:13, Jun 19:7, Sep 21:13, Nov 22:1, Dec 22:19, Mar 23:20

(Use 99359 in conjunction with 99358)

(Do not report 99358, 99359 on the same date of service as 98000-98016, 99202, 99203, 99204, 99205, 99212, 99213, 99214, 99215, 99221, 99222, 99223, 99231, 99232, 99233, 99234, 99235, 99236, 99242, 99243, 99244, 99245, 99252, 99253, 99254, 99255, 99281, 99282, 99283, 99284, 99285, 99304, 99305, 99306, 99307, 99308, 99309, 99310, 99341, 99342, 99344, 99345, 99347, 99348, 99349, 99350, 99417, 99418, 99483)

Total Duration of Prolonged Services Without Direct Face-to-Face Contact	Code(s)
less than 30 minutes	Not reported separately
30-74 minutes (30 minutes - 1 hr. 14 min.)	99358 X 1
75-104 minutes (1 hr. 15 min. - 1 hr. 44 min.)	99358 X 1 AND 99359 X 1
105 minutes or more (1 hr. 45 min. or more)	99358 X 1 AND 99359 X 2 or more for each additional 30 minutes

Prolonged Clinical Staff Services With Physician or Other Qualified Health Care Professional Supervision

Codes 99415, 99416 are used when an evaluation and management (E/M) service is provided in the office or outpatient setting that involves prolonged clinical staff face-to-face time with the patient and/or family/caregiver. The physician or other qualified health care professional is present to provide direct supervision of the clinical staff. This service is reported in addition to the designated E/M services and any other services provided at the same session as E/M services.

Codes 99415, 99416 are used to report the total duration of face-to-face time with the patient and/or family/caregiver spent by clinical staff on a given date providing prolonged service in the office or other outpatient setting, even if the time spent by the clinical staff on that date is not continuous. Time spent performing separately reported services other than the E/M service is not counted toward the prolonged services time.

Code 99415 is used to report the first hour of prolonged clinical staff service on a given date. Code 99415 should be used only once per date, even if the time spent by the clinical staff is not continuous on that date. Prolonged service of less than 30 minutes total duration on a given date is not separately reported. When face-to-face time is noncontinuous, use only the face-to-face time provided to the patient and/or family/caregiver by the clinical staff.

Code 99416 is used to report each additional 30 minutes of prolonged clinical staff service beyond the first hour. Code 99416 may also be used to report the final 15-30 minutes of prolonged service on a given date. Prolonged service of less than 15 minutes beyond the first hour or less than 15 minutes beyond the final 30 minutes is not reported separately.

Codes 99415, 99416 may be reported for no more than two simultaneous patients and the time reported is the time devoted only to a single patient.

For prolonged services by the physician or other qualified health care professional on the date of an office or other outpatient evaluation and management service (with or without direct patient contact), use 99417. Do not report 99415, 99416 in conjunction with 99417.

Facilities may not report 99415, 99416.

#+ 99415 **Prolonged clinical staff service** (the service beyond the highest time in the range of total time of the service) during an evaluation and management service in the office or outpatient setting, direct patient contact with physician supervision; first hour (List separately in addition to code for outpatient **Evaluation and Management** service)

- *CPT Changes: An Insider's View* 2016, 2021
- *CPT Assistant* Oct 15:3, Feb 16:13, Oct 19:10, Nov 20:12, Nov 22:1, Dec 24:22

(Use 99415 in conjunction with 99202, 99203, 99204, 99205, 99212, 99213, 99214, 99215)

(Do not report 99415 in conjunction with 99417)

#+ 99416 each additional 30 minutes (List separately in addition to code for prolonged service)

- *CPT Changes: An Insider's View* 2016, 2021
- *CPT Assistant* Oct 15:3, Feb 16:13, Oct 19:10, Nov 20:12, Nov 22:1, Dec 24:22

(Use 99416 in conjunction with 99415)

(Do not report 99416 in conjunction with 99417)

The starting point for 99415 is 30 minutes beyond the typical clinical staff time for ongoing assessment of the patient during the office visit. The Reporting Prolonged Clinical Staff Time table provides the typical clinical staff times for the office or other outpatient primary codes, the range of time beyond the clinical staff time for which 99415 may be reported, and the starting point at which 99416 may be reported.

Code	Typical Clinical Staff Time	99415 Time Range (Minutes)	99416 Start Point (Minutes)
99202	29	59-103	104
99203	34	64-108	109
99204	41	71-115	116
99205	46	76-120	121
99211	16	46-90	91
99212	24	54-98	99
99213	27	57-101	102
99214	40	70-114	115
99215	45	75-119	120

Prolonged Service With or Without Direct Patient Contact on the Date of an Evaluation and Management Service

Code 99417 is used to report prolonged total time (ie, combined time with and without direct patient contact) provided by the physician or other qualified health care professional on the date of office or other outpatient services, office consultation, synchronous audio-video visit, synchronous audio-only visit or other outpatient evaluation and management services (ie, 98003, 98007, 98011, 98015, 99205, 99215, 99245, 99345, 99350, 99483). Code 99418 is used to report prolonged total time (ie, combined time with and without direct patient contact) provided by the physician or other qualified health care professional on the date of an inpatient evaluation and management service (ie, 99223, 99233, 99236, 99255, 99306, 99310). Prolonged total time is time that is 15 minutes beyond the time threshold required to report the highest-level primary service. Codes 99417, 99418 are only used when the primary service has been selected using time alone as the basis and only after the time required to report the

highest-level service has been exceeded by 15 minutes. Cognitive assessment and care plan services code 99483 does not have a required time threshold, and 99417 may be reported when the typical time has been exceeded by 15 minutes. To report a unit of 99417, 99418, 15 minutes of prolonged services time must have been attained. Do not report 99417, 99418 for any time increment of less than 15 minutes.

When reporting 99417, 99418, the initial time unit of 15 minutes may be added once the time threshold required for the primary E/M code has been surpassed by 15 minutes. For example, to report the initial unit of 99417 for an office or other outpatient encounter for a new patient (99205), do not report 99417 until at least 15 minutes of time have been accumulated beyond 60 minutes (ie, 75 minutes) on the date of the encounter. For an office or other outpatient encounter for an established patient (99215), do not report 99417 until at least 15 minutes of time have been accumulated beyond 40 minutes (ie, 55 minutes) on the date of the encounter.

Time spent performing separately reported services other than the primary E/M service and prolonged E/M service is not counted toward the primary E/M and prolonged services time.

For prolonged services on a date other than the date of a face-to-face evaluation and management encounter with the patient and/or family/caregiver, see 99358, 99359. For E/M services that require prolonged clinical staff time and may include face-to-face services by the physician or other qualified health care professional, see 99415, 99416. Do not report 99417, 99418 in conjunction with 99358, 99359, 99415, 99416.

#★✚ 99417 **Prolonged outpatient evaluation and management service(s)** time with or without direct patient contact beyond the required time of the primary service when the primary service level has been selected using total time, each 15 minutes of total time (List separately in addition to the code of the outpatient **Evaluation and Management** service)

99310	99418	60	75
99345	99417	90	105
99350	99417	75	90
99483	99417	75	90

Standby Services

Code 99360 is used to report physician or other qualified health care professional standby services that are requested by another individual and that involve prolonged attendance without direct (face-to-face) patient contact. Care or services may not be provided to other patients during this period. This code is not used to report time spent proctoring another individual. It is also not used if the period of standby ends with the performance of a procedure, subject to a surgical package by the individual who was on standby.

Code 99360 is used to report the total duration of time spent on a given date on standby. Standby service of less than 30 minutes total duration on a given date is not reported separately.

Second and subsequent periods of standby beyond the first 30 minutes may be reported only if a full 30 minutes of standby was provided for each unit of service reported.

99360 **Standby service,** requiring prolonged attendance, each 30 minutes (eg, operative standby, standby for frozen section, for cesarean/high risk delivery, for monitoring EEG)

- *CPT Changes: An Insider's View* 2013
- *CPT Assistant* Spring 94:32, Apr 97:10, Aug 97:18, Nov 97:8, Nov 99:5-6, Aug 00:3, Sep 00:3, May 05:1, Nov 05:10, Nov 06:23, Mar 08:14, Feb 11:3, May 13:8, Apr 14:5, 11

(For hospital mandated on call services, see 99026, 99027)

(99360 may be reported in addition to 99460, 99465 as appropriate)

(Do not report 99360 in conjunction with 99464)

Case Management Services

Case management is a process in which a physician or another qualified health care professional is responsible for direct care of a patient and, additionally, for coordinating, managing access to, initiating, and/or supervising other health care services needed by the patient.

Medical Team Conferences

Medical team conferences include face-to-face participation by a minimum of three qualified health care professionals from different specialties or disciplines (each of whom provide direct care to the patient), with or without the presence of the patient, family member(s), community agencies, surrogate decision maker(s) (eg, legal guardian), and/or caregiver(s). The participants are actively involved in the development, revision, coordination, and implementation of health care services needed by the patient. Reporting participants shall have performed face-to-face evaluations or treatments of the patient, independent of any team conference, within the previous 60 days.

Physicians or other qualified health care professionals who may report evaluation and management services should report their time spent in a team conference with the patient and/or family/caregiver present using evaluation and management (E/M) codes. These introductory guidelines do not apply to services reported using E/M codes (see E/M Services Guidelines). However, the individual must be directly involved with the patient, providing face-to-face services outside of the conference visit with other physicians, and qualified health care professionals, or agencies.

Reporting participants shall document their participation in the team conference as well as their contributed information and subsequent treatment recommendations.

No more than one individual from the same specialty may report 99366-99368 at the same encounter.

Individuals should not report 99366-99368 when their participation in the medical team conference is part of a facility or organizational service contractually provided by the organization or facility.

The team conference starts at the beginning of the review of an individual patient and ends at the conclusion of the review. Time related to record keeping and report generation is not reported. The reporting participant shall be present for all time reported. The time reported is not limited to the time that the participant is communicating to the other team members or patient and/or family/caregiver. Time reported for medical team conferences may not be used in the determination of time for other services such as care plan oversight (99374-99380), prolonged services (99358, 99359), psychotherapy, or any E/M service. For team conferences where the patient is present for any part of the duration of the conference, nonphysician qualified health care professionals report the team conference face-to-face code 99366.

Medical Team Conference, Direct (Face-to-Face) Contact With Patient and/or Family

99366 **Medical team conference** with interdisciplinary team of health care professionals, face-to-face with patient and/or family, 30 minutes or more, participation by nonphysician qualified health care professional

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Apr 13:3, Jun 14:3, Oct 14:3

(Team conference services of less than 30 minutes duration are not reported separately)

(For team conference services by a physician with patient and/or family present, see Evaluation and Management services)

(Do not report 99366 for the same time reported for 99424, 99425, 99426, 99427, 99437, 99439, 99487, 99489, 99490, 99491)

Medical Team Conference, Without Direct (Face-to-Face) Contact With Patient and/or Family

99367 **Medical team conference** with interdisciplinary team of health care professionals, patient and/or family not present, 30 minutes or more; participation by physician

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Apr 13:3, Jun 14:3, Dec 19:14

99368 participation by nonphysician qualified health care professional

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Apr 13:3, Jun 14:3, Oct 14:3

(Team conference services of less than 30 minutes duration are not reported separately)

(Do not report 99367, 99368 during the same month with 99437, 99439, 99487, 99489, 99490, 99491)

Care Plan Oversight Services

Care plan oversight services are reported separately from codes for office/outpatient, hospital, home or residence (including assisted living facility, group home, custodial care facility, residential substance abuse treatment facility, rest home), nursing facility, or non-face-to-face services. The complexity and approximate time of the care plan oversight services provided within a 30-day period determine code selection. Only one individual may report services for a given period of time to reflect the sole or predominant supervisory role with a particular patient. These codes should not be reported for supervision of patients in nursing facilities or under the care of home health agencies, unless they require recurrent supervision of therapy.

The work involved in providing very low intensity or infrequent supervision services is included in the pre- and post-encounter work for home, office/outpatient and nursing facility or domiciliary visit codes.

(For care plan oversight services provided in rest home [eg, assisted living facility] or home, see care management services codes 99437, 99491, or principal care management codes 99424, 99425, and for hospice agency, see 99377, 99378)

(Do not report 99374-99380 for time reported with 98012, 98013, 98014, 98015, 98016, 98966, 98967, 98968, 99421, 99422, 99423)

(Do not report 99374-99378 during the same month with 99487, 99489)

99374 **Supervision** of a patient under care of home health agency (patient not present) in home, domiciliary or equivalent environment (eg, Alzheimer's facility) requiring complex and multidisciplinary care modalities involving regular development and/or revision of care plans by that individual, review of subsequent reports of patient status, review of related laboratory and other studies, communication (including telephone calls) for purposes of assessment or care decisions with health care professional(s), family member(s), surrogate decision maker(s) (eg, legal guardian) and/or key caregiver(s) involved in patient's care, integration of new information into the medical treatment plan and/or adjustment of medical therapy, within a calendar month; 15-29 minutes

Preventive Medicine Services

The following codes are used to report the preventive medicine evaluation and management of infants, children, adolescents, and adults.

The extent and focus of the services will largely depend on the age of the patient.

If an abnormality is encountered or a preexisting problem is addressed in the process of performing this preventive medicine evaluation and management service, and if the problem or abnormality is significant enough to require additional work to perform the key components of a problem-oriented evaluation and management service, then the appropriate synchronous audio-video visit, synchronous audio-only visit, brief communication technology-based service, or office/outpatient code (ie, 98000-98016, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215) should also be reported. Modifier 25 should be added to the synchronous audio-video visit, synchronous audio-only visit, brief communication technology-based service, or office/outpatient code to indicate that a significant, separately identifiable evaluation and management service was provided on the same day as the preventive medicine service. The appropriate preventive medicine service is additionally reported.

An insignificant or trivial problem/abnormality that is encountered in the process of performing the preventive medicine evaluation and management service and which does not require additional work and the performance of the key components of a problem-oriented E/M service should not be reported.

The "comprehensive" nature of the preventive medicine services codes 99381-99397 reflects an age- and gender-appropriate history/exam and is **not** synonymous with the "comprehensive" examination required in evaluation and management codes 99202-99350.

Codes 99381-99397 include counseling/anticipatory guidance/risk factor reduction interventions which are provided at the time of the initial or periodic comprehensive preventive medicine examination. (Refer to 99401, 99402, 99403, 99404, 99411, and 99412 for reporting those counseling/anticipatory guidance/risk factor reduction interventions that are provided at an encounter separate from the preventive medicine examination.)

(For behavior change intervention, see 99406, 99407, 99408, 99409)

►Immunization/vaccine/toxoid products, immunization administrations, ancillary studies involving laboratory, radiology, other procedures, or screening tests (eg, vision, hearing, developmental) identified with a specific CPT code are reported separately. For immunization administration and immunization risk/benefit counseling, see 90460, 90461, 90471-90474, 90480, 90481, 96380, 96381. For immunization risk/benefit counseling without administration, see 90482, 90483, 90484. For immunization/vaccine/toxoid products, see 90380, 90381, 90382, 90476-90759, 91304, 91318, 91319, 91320, 91321, 91322, 91323.◄

New Patient

99381 **Initial comprehensive preventive medicine** evaluation and management of an individual including an age and gender appropriate history, examination, counseling/anticipatory guidance/risk factor reduction interventions, and the ordering of laboratory/diagnostic procedures, new patient; infant (age younger than 1 year)

Counseling Risk Factor Reduction and Behavior Change Intervention

New or Established Patient

These codes are used to report services provided face-to-face by a physician or other qualified health care professional for the purpose of promoting health and preventing illness or injury. They are distinct from evaluation and management (E/M) services that may be reported separately with modifier 25 when performed. Risk factor reduction services are used for persons without a specific illness for which the counseling might otherwise be used as part of treatment.

Preventive medicine counseling and risk factor reduction interventions will vary with age and should address such issues as family problems, diet and exercise, substance use, sexual practices, injury prevention, dental health, and diagnostic and laboratory test results available at the time of the encounter.

Behavior change interventions are for persons who have a behavior that is often considered an illness itself, such as tobacco use and addiction, substance abuse/misuse, or obesity. Behavior change services may be reported when performed as part of the treatment of condition(s) related to or potentially exacerbated by the behavior or when performed to change the harmful behavior that has not yet resulted in illness. Any E/M services reported on the same day must be distinct and reported with modifier 25, and time spent providing these services may not be used as a basis for the E/M code selection. Behavior change services involve specific validated interventions of assessing readiness for change and barriers to change, advising a change in behavior, assisting by providing specific suggested actions and motivational counseling, and arranging for services and follow-up.

For counseling groups of patients with symptoms or established illness, use 99078.

Health behavior assessment and intervention services (96156, 96158, 96159, 96164, 96165, 96167, 96168, 96170, 96171) should not be reported on the same day as codes 99401-99412.

Preventive Medicine, Individual Counseling

	99401	**Preventive medicine counseling** and/or risk factor reduction intervention(s) provided to an individual (separate procedure); approximately 15 minutes *CPT Assistant* Aug 97:1, Jan 98:12, May 05:1, Aug 07:9, Oct 10:3, Dec 10:3, Jan 13:9, Aug 14:5, Mar 16:7, Aug 20:3, Jan 22:17, Apr 22:13, Oct 22:7

- *CPT Assistant* Sep 98:5, May 05:1, Oct 10:3, Dec 10:3, Jan 13:9, Mar 16:7, Oct 22:7

Non-Face-to-Face Services

Telephone Services

99437 Code is out of numerical sequence. See 99480-99489

99439 Code is out of numerical sequence. See 99480-99489

(99441 has been deleted. For brief communication technology-based service [eg, virtual check-in] by a physician or other QHP for an established patient, 5-10 minutes of medical discussion, use 98016)

(99442, 99443 have been deleted. For synchronous audio-only visit for evaluation and management of a new patient, see 98008, 98009, 98010, 98011. For synchronous audio-only visit for evaluation and management of an established patient, see 98012, 98013, 98014, 98015)

Online Digital Evaluation and Management Services

Online digital evaluation and management (E/M) services (99421, 99422, 99423) are patient-initiated services with physicians or other qualified health care professionals (QHPs). Online digital E/M services require physician or other QHP's evaluation, assessment, and management of the patient. These services are not for the nonevaluative electronic communication of test results, scheduling of appointments, or other communication that does not include E/M. While the patient's problem may be new to the physician or other QHP, the patient is an established patient. Patients initiate these services through Health Insurance Portability and Accountability Act (HIPAA)-compliant secure platforms, such as electronic health record (EHR) portals, secure email, or other digital applications, which allow digital communication with the physician or other QHP.

Online digital E/M services are reported once for the physician's or other QHP's cumulative time devoted to the service during a seven-day period. The seven-day period begins with the physician's or other QHP's initial, personal review of the patient-generated inquiry.

Physician's or other QHP's cumulative service time includes review of the initial inquiry, review of patient records or data pertinent to assessment of the patient's problem, personal physician or other QHP interaction with clinical staff focused on the patient's problem, development of management plans, including physician- or other QHP generation of prescriptions or ordering of tests, and subsequent communication with the patient through online, telephone, email, or other digitally supported communication, which does not otherwise represent a separately reported E/M service. All professional decision making, assessment, and subsequent management by physicians or other QHPs in the same group practice contribute to the cumulative service time of the patient's online digital E/M service. Online digital E/M services require permanent documentation storage (electronic or hard copy) of the encounter.

If within seven days of the initiation of an online digital E/M service, a separately reported E/M visit occurs, then the physician or other QHP work devoted to the online digital E/M service is incorporated into the separately reported E/M visit. This includes E/M services that are provided through synchronous telemedicine visits using interactive audio and video telecommunication equipment. To report synchronous audio-video E/M services, see 98000, 98001, 98002, 98003, 98004, 98005, 98006, 98007. To report synchronous audio-only E/M services, see 98008, 98009, 98010, 98011, 98012, 98013, 98014, 98015, 98016.

If the patient initiates an online digital inquiry for the same or a related problem within seven days of a previous E/M service, then the online digital visit is not reported. If the online digital inquiry is related to a surgical procedure and occurs during the postoperative period of a previously completed procedure, then the online digital E/M service is not reported separately.

If the patient generates the initial online digital inquiry for a new problem within seven days of a previous E/M visit that addressed a different problem, then the online digital E/M service may be reported separately.

If the patient presents a new, unrelated problem during the seven-day period of an online digital E/M service, then the physician's or other QHP's time spent on evaluation, assessment, and management of the additional problem is added to the cumulative service time of the online digital E/M service for that seven-day period.

(For online digital assessment and management services provided by a nonphysician qualified health care professional who may not report E/M services, see 98970, 98971, 98972)

 # 99421 **Online digital evaluation and management service,** for an established patient, for up to 7 days, cumulative time during the 7 days; 5-10 minutes

- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Jan 20:3, Mar 20:6, Sep 21:3, Nov 23:22

 # 99422 11-20 minutes

- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Jan 20:3, Mar 20:6, Sep 21:3, Nov 23:22

 # 99423 21 or more minutes

- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Jan 20:3, Mar 20:6, Sep 21:3, Nov 23:22

(Report 99421, 99422, 99423 once per 7-day period)

(Clinical staff time is not calculated as part of cumulative time for 99421, 99422, 99423)

(Do not report online digital E/M services for cumulative service time less than 5 minutes)

(Do not count 99421, 99422, 99423 time otherwise reported with other services)

(Do not report 99421, 99422, 99423 on a day when the physician or other qualified health care professional reports E/M services [98000-98016, 99202, 99203, 99204, 99205, 99212, 99213, 99214, 99215, 99242, 99243, 99244, 99245])

(Do not report 99421, 99422, 99423 when using 99091, 99374, 99375, 99377, 99378, 99379, 99380, 99424, 99425, 99426, 99427, 99437, 99487, 99489, 99491, 99495, 99496, for the same communication[s])

(Do not report 99421, 99422, 99423 for home and outpatient INR monitoring when reporting 93792, 93793)

Interprofessional Telephone/Internet/Electronic Health Record Consultations

The consultant should use codes 99446, 99447, 99448, 99449, 99451 to report interprofessional telephone/Internet/electronic health record consultations. An interprofessional telephone/Internet/electronic health record consultation is an assessment and management service in which a patient's treating (eg, attending or primary) physician or other qualified health care professional requests the opinion and/or treatment advice of a physician or other qualified health care professional with specific specialty expertise (the consultant) to assist the treating physician or other qualified health care professional in the diagnosis and/or management of the patient's problem without patient face-to-face contact with the consultant.

The patient for whom the interprofessional telephone/Internet/electronic health record consultation is requested may be either a new patient to the consultant or an established patient with a new problem or an exacerbation of an existing problem. However, the consultant should not have seen the patient in a face-to-face encounter within the last 14 days. When the telephone/Internet/electronic health record consultation leads to a transfer of care or other face-to-face service (eg, a surgery, a hospital visit, or a scheduled office evaluation of the patient) within the next 14 days or next available appointment date of the consultant, these codes are not reported.

Review of pertinent medical records, laboratory studies, imaging studies, medication profile, pathology specimens, etc is included in the telephone/Internet/electronic health record consultation service and should not be reported separately when reporting 99446, 99447, 99448, 99449, 99451. The majority of the service time reported (greater than 50%) must be devoted to the medical consultative verbal or Internet discussion. If greater than 50% of the time for the service is devoted to data review and/or analysis, 99446, 99447, 99448, 99449 should not be reported. However, the service time for 99451 is based on total review and interprofessional-communication time.

If more than one telephone/Internet/electronic health record contact(s) is required to complete the consultation request (eg, discussion of test results), the entirety of the service and the cumulative discussion and information review time should be reported with a single code. Codes 99446, 99447, 99448, 99449, 99451 should not be reported more than once within a seven-day interval.

The written or verbal request for telephone/Internet/electronic health record advice by the treating/requesting physician or other qualified health care professional should be documented in the patient's medical record, including the reason for the request. Codes 99446, 99447, 99448, 99449 conclude with a verbal opinion report and written report from the consultant to the treating/requesting physician or other qualified health care professional. Code 99451 concludes with only a written report.

Telephone/Internet/electronic health record consultations of less than five minutes should not be reported. Consultant communications with the patient and/or family may be reported using 98000-98016, 98966, 98967, 98968, 99421, 99422, 99423, and the time related to these services is not used in reporting 99446, 99447, 99448, 99449. Do not report 99358, 99359 for any time within the service period, if reporting 99446, 99447, 99448, 99449, 99451.

When the sole purpose of the telephone/Internet/electronic health record communication is to arrange a transfer of care or other face-to-face service, these codes are not reported.

The treating/requesting physician or other qualified health care professional may report 99452, if spending 16-30 minutes in a service day preparing for the referral and/or communicating with the consultant. Do not report 99452 more than once in a 14-day period. If the telephone/Internet/electronic health record referral service(s) and an E/M service are performed on the same day by the treating/requesting physician or other qualified health care professional and total time is used to select the level of E/M service, the time spent providing the referral service is added to the time spent on the day of the encounter performing the E/M service. If MDM is used to select the level of E/M service, the work of performing the referral service is considered part of the MDM. Do not report 99452 separately on the same date an E/M service is reported.

(For brief communication technology-based service [eg, virtual check-in] by a physician or other QHP for an established patient, 5-10 minutes of medical discussion, use 98016)

(For synchronous audio-only visit for evaluation and management of a new patient, see 98008, 98009, 98010, 98011. For synchronous audio-only visit for evaluation and management of an established patient, see 98012, 98013, 98014, 98015)

(For telephone services provided by a nonphysician qualified health care professional who may not report evaluation and management services, see 98966, 98967, 98968)

(For online digital E/M services provided by a physician or other qualified health care professional to a patient, see 99421, 99422, 99423)

99445 Code is out of numerical sequence. See 99448-99455

99446 **Interprofessional telephone/Internet/electronic health record assessment and management service** provided by a consultative physician or other qualified health care professional, including a verbal and written report to the patient's treating/requesting physician or other qualified health care professional; 5-10 minutes of medical consultative discussion and review

- *CPT Assistant* Jan 19:3, Jun 19:7, Jun 20:3, Sep 21:4, Mar 23:20

Digitally Stored Data Services/Remote Physiologic Monitoring

►Codes 99445, 99453, 99454 are used to report remote physiologic monitoring services (eg, weight, blood pressure, pulse oximetry) during a 30-day period. To report 99445, 99453, 99454, the device used must be a medical device as defined by the FDA, and the service must be ordered by a physician or other qualified health care professional. Code 99453 may be used to report the set-up and patient education on use of the device(s). Codes 99445, 99454 may be used to report supply of the device for daily recording or programmed alert transmissions. Codes 99445, 99453 are not reported if monitoring is less than 2 days in a 30-day period. Code 99445 may be used to report supply of the device for daily recording or programmed alert transmissions from 2 days up to 15 days in a 30-day period. Code 99454 may be reported for device supply when monitoring services are provided for at least 16 days up to 30 days in a 30-day period. Code 99454 is not reported if monitoring is less than 16 days in a 30-day period. Do not report 99445, 99453, 99454 when these services are included in other codes for the duration of time of the physiologic monitoring service (eg, 95250 for continuous glucose monitoring requires a minimum of 72 hours of monitoring).◄

Code 99091 should be reported no more than once in a 30-day period to include the physician or other qualified health care professional time involved with data accession, review and interpretation, modification of care plan as necessary (including communication to patient and/or caregiver), and associated documentation.

If the services described by 99091 or 99474 are provided on the same day the patient presents for an evaluation and management (E/M) service to the same provider, these services should be considered part of the E/M service and not reported separately.

►Do not report 99091 for time in the same calendar month when used to meet the criteria for care plan oversight services (99374, 99375, 99377, 99378, 99379, 99380), remote physiologic monitoring services (99457, 99458, 99470), or personally performed chronic or principal care management (99424, 99425, 99426, 99427, 99437, 99491). Do not report 99091 if other more specific codes exist (eg, 93227, 93272 for cardiographic services; 95250 for continuous glucose monitoring). Do not report 99091 for transfer and interpretation of data from hospital or clinical laboratory computers.◄

Code 99453 is reported for each episode of care. For coding remote monitoring of physiologic parameters, an episode of care is defined as beginning when the remote monitoring physiologic service is initiated, and ends with attainment of targeted treatment goals.

#▲ **99453** **Remote monitoring of physiologic parameter(s)** (eg, weight, blood pressure, pulse oximetry, respiratory flow rate); initial set-up and patient education on use of equipment

CPT Changes: An Insider's View 2019, 2026

CPT Assistant Jan 19:3, Mar 19:10, Feb 21:13, Feb 22:7-8, Oct 22:14, Feb 24:28

(Do not report 99453 more than once per episode of care)

►(Do not report 99453 for cumulative monitoring of less than 2 days in a 30-day period)◄

(Do not report 99453 in conjunction with 0811T)

#● **99445** device(s) supply with daily recording(s) or programmed alert(s) transmission, 2-15 days in a 30-day period

CPT Changes: An Insider's View 2026

►(Do not report 99445 more than once in a 30-day period)◄

►(Do not report 99445 for cumulative monitoring of less than 2 days in a 30-day period)◄

#▲ **99454** device(s) supply with daily recording(s) or programmed alert(s) transmission, 16-30 days in a 30-day period

CPT Assistant Jan 20:3, Feb 20:7, Apr 20:5

(Do not report 99473 more than once per device)

(For ambulatory blood pressure monitoring, see 93784, 93786, 93788, 93790)

 # 99474 separate self-measurements of two readings one minute apart, twice daily over a 30-day period (minimum of 12 readings), collection of data reported by the patient and/or caregiver to the physician or other qualified health care professional, with report of average systolic and diastolic pressures and subsequent communication of a treatment plan to the patient

CPT Changes: An Insider's View 2020

CPT Assistant Jan 20:3, Feb 20:7, Apr 20:5

►(Do not report 99473, 99474 in the same calendar month as 93784, 93786, 93788, 93790, 99091, 99424, 99425, 99426, 99427, 99437, 99439, 99445, 99453, 99454, 99457, 99470, 99487, 99489, 99490, 99491)◄

(Do not report 99474 more than once per calendar month)

Remote Physiologic Monitoring Treatment Management Services

►Remote physiologic monitoring treatment management services are provided when clinical staff/physician/other qualified health care professional uses the results of remote physiological monitoring to manage a patient under a specific treatment plan. To report remote physiological monitoring, the device used must be a medical device as defined by the FDA, and the service must be ordered by a physician or other qualified health care professional. Do not use 99457, 99458, 99470 for time that can be reported using codes for more specific monitoring services. Codes 99457, 99458, 99470 may be reported during the same service period as chronic care management services (99437, 99439, 99487, 99489, 99490, 99491), principal care management services (99424, 99425, 99426, 99427), transitional care management services (99495, 99496), and behavioral health integration services (99484, 99492, 99493, 99494). However, time spent performing these services should remain separate and no time should be counted twice toward the required time for any services in a single month. Codes 99457, 99458, 99470 require one real-time, interactive communication with the patient/caregiver. The interactive communication contributes to the total time, but it does not need to represent the entire cumulative reported time of the treatment management service. For the first completed 10 minutes of clinical staff/physician/other qualified health care professional time in a calendar month, report 99470. For the first completed 20 minutes of clinical staff/physician/other qualified health care professional time in a calendar month, report 99457, and report 99458 for each additional completed 20 minutes. Do not report 99470 for services of less than 10 minutes, 99457 for services less than 20 minutes, or 99458 for additional services of less than 20 minutes. Report 99457 or 99470 one time regardless of the number of physiologic monitoring modalities performed in a given calendar month.

To report remote therapeutic monitoring treatment management services provided by physician or other qualified health care professional, see 98979, 98980, 98981.◄

Do not count any time on a day when the physician or other qualified health care professional reports an E/M service (synchronous audio-video visits 98000, 98001, 98002, 98003, 98004, 98005, 98006, 98007, synchronous audio-only visits 98008, 98009, 98010, 98011, 98012, 98013, 98014, 98015, brief communication technology-based services 98016, office or other outpatient services 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, home or residence services 99341, 99342, 99344, 99345, 99347, 99348, 99349, 99350, initial or subsequent hospital inpatient or observation services 99221, 99222, 99223, 99231, 99232, 99233, inpatient or observation consultations 99252, 99253, 99254, 99255). Do not count any time related to other reported services (eg, 93290, 93793, 99291, 99292).

►Time Spent in a Calendar Month for Remote Physiologic Monitoring Treatment Management Services	Code(s) Reported
0-9 minutes	Not reported separately
10-19 minutes	99470 X 1
20-39 minutes	99457 X 1
40-59 minutes	99457 X 1 and 99458 X 1
60 minutes or more	99457 X 1 and 99458 X 2 or more for each additional 20 minutes◄

#● **99470** **Remote physiologic monitoring treatment management services,** clinical staff/physician/other qualified health care professional time in a calendar month requiring 1 real-time interactive communication with the patient/caregiver during the calendar month; first 10 minutes

➔ *CPT Changes: An Insider's View* 2026

►(Do not report 99470 for services of less than 10 minutes or more than 19 minutes)◄

►(Do not report 99470 in conjunction with 99457, 99458)◄

#▲ **99457** first 20 minutes

➔ *CPT Changes: An Insider's View* 2019, 2020, 2026

►(Report 99457, 99470 once per calendar month, regardless of the number of parameters monitored)◄

(Do not report 99457 for services of less than 20 minutes)

►(Do not report 99457, 99470 in conjunction with 93264, 99091)◄

►(Do not report 99457, 99470 in the same calendar month as 99473, 99474)◄

#✚▲ **99458** each additional 20 minutes (List separately in addition to code for primary procedure)

➔ *CPT Changes: An Insider's View* 2020, 2026

➔ *CPT Assistant* Feb 20:7, Jan 22:3, Feb 22:7-8, Oct 22:14

(Use 99458 in conjunction with 99457)

(Do not report 99458 for services of less than an additional increment of 20 minutes)

►(Do not report 99457, 99458 in conjunction with 99470)◄

►(For remote therapeutic monitoring treatment management services, see 98979, 98980, 98981)◄

Special Evaluation and Management Services

The following codes are used to report evaluations performed to establish baseline information prior to life or disability insurance certificates being issued. This service is performed in the office or other setting, and applies to both new and established patients. When using these codes, no active management of the problem(s) is undertaken during the encounter.

If other evaluation and management services and/or procedures are performed on the same date, the appropriate E/M or procedure code(s) should be reported in addition to these codes.

Basic Life and/or Disability Evaluation Services

99450 **Basic life** and/or disability examination that includes:

- **Measurement of height, weight, and blood pressure;**
- **Completion of a medical history following a life insurance pro forma;**
- **Collection of blood sample and/or urinalysis complying with "chain of custody" protocols; and**
- **Completion of necessary documentation/certificates.**

CPT Assistant Summer 95:14, Sep 98:5, May 05:1, Jun 19:7

99451 Code is out of numerical sequence. See 99448-99455

99452 Code is out of numerical sequence. See 99448-99455

99453 Code is out of numerical sequence. See 99448-99455

99454 Code is out of numerical sequence. See 99448-99455

Work Related or Medical Disability Evaluation Services

99455 **Work related** or medical disability examination by the treating physician that includes:

- **Completion of a medical history commensurate with the patient's condition;**
- **Performance of an examination commensurate with the patient's condition;**
- **Formulation of a diagnosis, assessment of capabilities and stability, and calculation of impairment;**
- **Development of future medical treatment plan; and**
- **Completion of necessary documentation/certificates and report.**

CPT Assistant Summer 95:14, Sep 98:5, May 05:1, Aug 13:13

99456 **Work related** or medical disability examination by other than the treating physician that includes:

- **Completion of a medical history commensurate with the patient's condition;**
- **Performance of an examination commensurate with the patient's condition;**
- **Formulation of a diagnosis, assessment of capabilities and stability, and calculation of impairment;**
- **Development of future medical treatment plan; and**
- **Completion of necessary documentation/certificates and report.**

➔ *CPT Assistant* Summer 95:14, Sep 98:5, Aug 13:13

(Do not report 99455, 99456 in conjunction with 99080 for the completion of Workman's Compensation forms)

99457 Code is out of numerical sequence. See 99448-99455

99458 Code is out of numerical sequence. See 99448-99455

99459 Code is out of numerical sequence. See 99497-99499

Newborn Care Services

The following codes are used to report the services provided to newborns (birth through the first 28 days) in several different settings. Use of the normal newborn codes is limited to the initial care of the newborn in the first days after birth prior to home discharge.

Evaluation and Management (E/M) services for the newborn include maternal and/or fetal and newborn history, newborn physical examination(s), ordering of diagnostic tests and treatments, meetings with the family, and documentation in the medical record.

When delivery room attendance services (99464) or delivery room resuscitation services (99465) are required, report these in addition to normal newborn services Evaluation and Management codes.

For E/M services provided to newborns who are other than normal, see codes for hospital inpatient or observation services (99221-99233) and neonatal intensive and critical care services (99466-99469, 99477-99480). When normal newborn services are provided by the same individual on the same date that the newborn later becomes ill and receives additional intensive or critical care services, report the appropriate E/M code with modifier 25 for these services in addition to the normal newborn code.

Procedures (eg, 54150, newborn circumcision) are not included with the normal newborn codes, and when performed, should be reported in addition to the newborn services.

When newborns are seen in follow-up after the date of discharge in the office or other outpatient setting, see 98000-98016, 99202-99215, 99381, 99391, as appropriate.

99460 **Initial hospital or birthing center care,** per day, for evaluation and management of normal newborn infant

- *CPT Changes: An Insider's View* 2009

99461 **Initial care,** per day, for evaluation and management of normal newborn infant seen in other than hospital or birthing center

- *CPT Changes: An Insider's View* 2009

99462 **Subsequent hospital care,** per day, for evaluation and management of normal newborn

- *CPT Changes: An Insider's View* 2009

99463 **Initial hospital or birthing center care,** per day, for evaluation and management of normal newborn infant admitted and discharged on the same date

- *CPT Changes: An Insider's View* 2009
- *CPT Assistant* Jan 23:20

(For newborn hospital discharge services provided on a date subsequent to the admission date, see 99238, 99239)

Delivery/Birthing Room Attendance and Resuscitation Services

99464 **Attendance at delivery** (when requested by the delivering physician or other qualified health care professional) and initial stabilization of newborn

- *CPT Changes: An Insider's View* 2009, 2013

(99464 may be reported in conjunction with 99221, 99222, 99223, 99291, 99460, 99468, 99477)

(Do not report 99464 in conjunction with 99465)

99465 **Delivery/birthing room resuscitation,** provision of positive pressure ventilation and/or chest compressions in the presence of acute inadequate ventilation and/or cardiac output

- *CPT Changes: An Insider's View* 2009
- *CPT Assistant* Nov 23:23

(99465 may be reported in conjunction with 99221, 99222, 99223, 99291, 99460, 99468, 99477)

(Do not report 99465 in conjunction with 99464)

(Procedures that are performed as a necessary part of the resuscitation [eg, intubation, vascular lines] are reported separately in addition to 99465. In order to report these procedures, they must be performed as a necessary component of the resuscitation and not as a convenience before admission to the neonatal intensive care unit)

Inpatient Neonatal Intensive Care Services and Pediatric and Neonatal Critical Care Services

Pediatric Critical Care Patient Transport

Codes 99466, 99467 are used to report the physical attendance and direct face-to-face care by a physician during the interfacility transport of a critically ill or critically injured pediatric patient 24 months of age or younger. Codes 99485, 99486 are used to report the control physician's non-face-to-face supervision of interfacility transport of a critically ill or critically injured pediatric patient 24 months of age or younger. These codes are not reported together for the same patient by the same physician. For the purpose of reporting 99466 and 99467, face-to-face care begins when the physician assumes primary responsibility of the pediatric patient at the referring facility, and ends when the receiving facility accepts responsibility for the pediatric patient's care. Only the time the physician spends in direct face-to-face contact with the patient during the transport should be reported. Pediatric patient transport services involving less than 30 minutes of face-to-face physician care should not be reported using 99466, 99467. Procedure(s) or service(s) performed by other members of the transporting team may not be reported by the supervising physician.

Codes 99485, 99486 may be used to report control physician's non-face-to-face supervision of interfacility pediatric critical care transport, which includes all two-way communication between the control physician and the specialized transport team prior to transport, at the referring facility and during transport of the patient back to the receiving facility. The "control" physician is the physician directing transport services. These codes do not include pretransport communication between the control physician and the referring facility before or following patient transport. These codes may only be reported for patients 24 months of age or younger who are critically ill or critically injured. The control physician provides treatment advice to a specialized transport team who are present and delivering the hands-on patient care. The control physician does not report any services provided by the specialized transport team. The control physician's non-face-to-face time begins with the first contact by the control physician with the specialized transport team and ends when the patient's care is handed over to the receiving facility team. Refer to 99466 and 99467 for face-to-face transport care of the critically ill/injured patient. Time spent with the individual patient's transport team and reviewing data submissions should be recorded. Code 99485 is used to report the first 16-45 minutes of direction on a given date and should only be used once even if time spent by the physician is discontinuous. Do not report services of 15 minutes or less or any time when another physician is reporting 99466, 99467. Do not report 99485 or 99486 in conjunction with 99466, 99467 when performed by the same physician.

For the definition of the critically injured pediatric patient, see the **Neonatal and Pediatric Critical Care Services** section.

The non-face-to-face direction of emergency care to a patient's transporting staff by a physician located in a hospital or other facility by two-way communication is not considered direct face-to-face care and should not be reported with 99466, 99467. Physician-directed non-face-to-face emergency care through outside voice communication to transporting staff personnel is reported with 99288 or 99485, 99486 based upon the age and clinical condition of the patient.

Emergency department services (99281-99285), initial hospital inpatient or observation care (99221-99223), critical care (99291, 99292), initial date neonatal intensive (99477), or critical care (99468) may only be reported after the patient has been admitted to the emergency department, the hospital inpatient or observation floor, or the critical care unit of the receiving facility. If inpatient critical care services are reported in the referring facility prior to transfer to the receiving hospital, use the critical care codes (99291, 99292).

►The following services are included when performed during the pediatric patient transport by the physician providing critical care and may not be reported separately: routine monitoring evaluations (eg, heart rate, respiratory rate, blood pressure, and pulse oximetry), the interpretation of cardiac output measurements (93598), chest X rays (71045, 71046), pulse oximetry (94760, 94761, 94762), blood gases and information data stored in computers (eg, ECGs, blood pressures, hematologic data), gastric intubation (43752, 43753), temporary transcutaneous pacing (92953), ventilatory management (94002, 94003, 94660), and vascular access procedures (36000, 36400, 36405, 36406, 36415, 36591, 36600). Any services performed which are not listed above should be reported separately.◄

Services provided by the specialized transport team during non-face-to-face transport supervision are not reported by the control physician.

Code 99466 is used to report the first 30 to 74 minutes of direct face-to-face time with the transport pediatric patient and should be reported only once on a given date. Code 99467 is used to report each additional 30 minutes provided on a given date. Face-to-face services of less than 30 minutes should not be reported with these codes.

Code 99485 is used to report the first 30 minutes of non-face-to-face supervision of an interfacility transport of a critically ill or critically injured pediatric patient and should be reported only once per date of service. Only the communication time spent by the supervising physician with the specialty transport team members during an interfacility transport should be reported. Code 99486 is used to report each additional 30 minutes beyond the initial 30 minutes. Non-face-to-face interfacility transport of 15 minutes or less is not reported.

(For total body and selective head cooling of neonates, use 99184)

99466 **Critical care** face-to-face services, during an interfacility transport of critically ill or critically injured pediatric patient, 24 months of age or younger; first 30-74 minutes of hands-on care during transport

- *CPT Changes: An Insider's View* 2009, 2013
- *CPT Assistant* Sep 11:3, May 13:6, May 14:4, Jun 18:9, Sep 22:6

+ 99467 each additional 30 minutes (List separately in addition to code for primary service)

- *CPT Changes: An Insider's View* 2009, 2013
- *CPT Assistant* Sep 11:3, May 13:6, May 14:4, Jun 18:9, Sep 22:6

(Use 99467 in conjunction with 99466)

(Critical care of less than 30 minutes total duration should be reported with the appropriate E/M code)

 # 99485 **Supervision** by a control physician of interfacility transport care of the critically ill or critically injured pediatric patient, 24 months of age or younger, includes two-way communication with transport team before transport, at the referring facility and during the transport, including data interpretation and report; first 30 minutes

- *CPT Changes: An Insider's View* 2013
- *CPT Assistant* May 13:6, May 14:4, Jun 18:9, Sep 22:6

#+ 99486 each additional 30 minutes (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2013
- *CPT Assistant* May 13:6, May 14:4, Jun 18:9, Sep 22:6

(Use 99486 in conjunction with 99485)

(For physician direction of emergency medical systems supervision for a pediatric patient older than 24 months of age, or at any age if not critically ill or injured, use 99288)

(Do not report 99485, 99486 with any other services reported by the control physician for the same period)

(Do not report 99485, 99486 in conjunction with 99466, 99467 when performed by the same physician)

Inpatient Neonatal and Pediatric Critical Care

The same definitions for critical care services apply for the adult, child, and neonate.

Codes 99468, 99469 may be used to report the services of directing the inpatient care of a critically ill neonate or infant 28 days of age or younger. They represent care starting with the date of admission (99468) for critical care services and all subsequent day(s) (99469) that the neonate remains in critical care. These codes may be reported only by a single individual and only once per calendar day, per patient. Initial inpatient neonatal critical care (99468) may only be reported once per hospital admission. If readmitted for neonatal critical care services during the same hospital stay, then report the subsequent inpatient neonatal critical care code (99469) for the first day of readmission to critical care, and 99469 for each day of critical care following readmission.

The initial inpatient neonatal critical care code (99468) can be used in addition to 99464 or 99465 as appropriate, when the physician or other qualified health care professional is present for the delivery (99464) or resuscitation (99465) is required. Other procedures performed as a necessary part of the resuscitation (eg, endotracheal intubation [31500]) may also be reported separately, when performed as part of the pre-admission delivery room care. In order to report these procedures separately, they must be performed as a necessary component of the resuscitation and not simply as a convenience before admission to the neonatal intensive care unit.

Codes 99471-99476 may be used to report the services of directing the inpatient care of a critically ill infant or young child from 29 days of postnatal age through 5 years of age. They represent care starting with the date of admission (99471, 99475) for pediatric critical care services and all subsequent day(s) (99472, 99476) that the infant or child remains in critical condition. These codes may only be reported by a single individual and only once per calendar day, per patient. Services for the critically ill or critically injured child 6 years of age or older would be reported with the time-based critical care codes (99291, 99292). Initial inpatient critical care (99471, 99475) may only be reported once per hospital admission. If readmitted to the pediatric critical care unit during the same hospital stay, then report the subsequent inpatient pediatric critical care code 99472 or 99476 for the first day of readmission to critical care and 99472 or 99476 for each day of critical care following readmission.

The pediatric and neonatal critical care codes include those procedures listed for the critical care codes (99291, 99292). In addition, the following procedures are also included (and are not separately reported by professionals, but may be reported by facilities) in the pediatric and neonatal critical care service codes (99468-99472, 99475, 99476) and the intensive care services codes (99477-99480).

Any services performed that are not included in these listings may be reported separately. For initiation of selective head or total body hypothermia in the critically ill neonate, report 99184. Facilities may report the included services separately.

Invasive or non-invasive electronic monitoring of vital signs

Vascular access procedures

- Peripheral vessel catheterization (36000)
- Other arterial catheters (36140, 36620)
- Umbilical venous catheters (36510)
- Central vessel catheterization (36555)
- Vascular access procedures (36400, 36405, 36406)
- Vascular punctures (36420, 36600)
- Umbilical arterial catheters (36660)

Airway and ventilation management

- Endotracheal intubation (31500)
- Ventilatory management (94002-94004)
- Bedside pulmonary function testing (94375)
- Surfactant administration (94610)
- Continuous positive airway pressure (CPAP) (94660)

Monitoring or interpretation of blood gases or oxygen saturation (94760-94762)

Car Seat Evaluation (94780-94781)

Transfusion of blood components (36430, 36440)

Oral or nasogastric tube placement (43752)

Suprapubic bladder aspiration (51100)

Bladder catheterization (51701, 51702)

Lumbar puncture (62270)

Any services performed which are not listed above may be reported separately.

When a neonate or infant is not critically ill but requires intensive observation, frequent interventions, and other intensive care services, the Continuing Intensive Care Services codes (99477-99480) should be used to report these services.

To report critical care services provided in the outpatient setting (eg, emergency department or office) for neonates and pediatric patients of any age, see the Critical Care codes 99291, 99292. If the same individual provides critical care services for a neonatal or pediatric patient less than 6 years of age in both the outpatient and inpatient settings on the same day, report only the appropriate Neonatal or Pediatric Critical Care codes 99468-99476 for all critical care services provided on that day. Critical care services provided by a second individual of a different specialty not reporting a per-day neonatal or pediatric critical care code can be reported with 99291, 99292.

When critical care services are provided to neonates or pediatric patients less than 6 years of age at two separate institutions by an individual from a different group on the same date of service, the individual from the referring institution should report their critical care services with the time-based critical care codes (99291, 99292) and the receiving institution should report the appropriate initial day of care code 99468, 99471, 99475 for the same date of service.

Critical care services to a pediatric patient 6 years of age or older are reported with the time based critical care codes 99291, 99292.

When the critically ill neonate or pediatric patient improves and is transferred to a lower level of care to another individual in another group within the same facility, the transferring individual does not report a per day critical care service. Subsequent hospital inpatient or observation care (99231-99233) or time-based critical care services (99291-99292) is reported, as appropriate, based upon the condition of the neonate or child. The receiving individual reports subsequent intensive care (99478-99480) or subsequent hospital inpatient or observation care (99231-99233) services, as appropriate, based upon the condition of the neonate or child.

When the neonate or infant becomes critically ill on a day when initial or subsequent intensive care services (99477-99480), hospital inpatient or observation services (99221-99233), or normal newborn services (99460, 99461, 99462) have been performed by one individual and is transferred to a critical care level of care provided by a different individual in a different group, the transferring individual reports either the time-based critical care services (99291, 99292) performed for the time spent providing critical care to the patient, the intensive care service (99477-99480), hospital inpatient or observation care services (99221-99233), or normal newborn service (99460, 99461, 99462) performed, but only one service. The receiving individual reports initial or subsequent inpatient neonatal or pediatric critical care (99468-99476), as appropriate, based upon the patient's age and whether this is the first or subsequent admission to the critical care unit for the hospital stay.

When a newborn becomes critically ill on the same day they have already received normal newborn care (99460, 99461, 99462), and the same individual or group assumes critical care, report initial critical care service (99468) with modifier 25 in addition to the normal newborn code.

When a neonate, infant, or child requires initial critical care services on the same day the patient already has received hospital care or intensive care services by the same individual or group, only the initial critical care service code (99468, 99471, 99475) is reported.

Time-based critical care services (99291, 99292) are not reportable by the same individual or different individual of the same specialty and same group, when neonatal or pediatric critical care services (99468-99476) may be reported for the same patient on the same day. Time-based critical care services (99291, 99292) may be reported by an individual of a different specialty from either the same or different group on the same day that neonatal or pediatric critical care services are reported. Critical care interfacility transport face-to-face (99466, 99467) or supervisory (99485, 99486) services may be reported by the same or different individual of the same specialty and same group, when neonatal or pediatric critical care services (99468-99476) are reported for the same patient on the same day.

99468 **Initial inpatient neonatal critical care,** per day, for the evaluation and management of a critically ill neonate, 28 days of age or younger

Initial and Continuing Intensive Care Services

Code 99477 represents the initial day of inpatient care for the child who is not critically ill but requires intensive observation, frequent interventions, and other intensive care services. Codes 99478-99480 are used to report the subsequent day services of directing the continuing intensive care of the low birth weight (LBW 1,500-2,500 grams) present body weight infant, very low birth weight (VLBW less than 1,500 grams) present body weight infant, or normal (2,501-5,000 grams) present body weight newborn who does not meet the definition of critically ill but continues to require intensive observation, frequent interventions, and other intensive care services. These services are for infants and neonates who are not critically ill but continue to require intensive cardiac and respiratory monitoring, continuous and/or frequent vital sign monitoring, heat maintenance, enteral and/or parenteral nutritional adjustments, laboratory and oxygen monitoring, and constant observation by the health care team under direct supervision of the physician or other qualified health care professional. Codes 99477-99480 may be reported by a single individual and only once per day, per patient in a given facility. If readmitted to the intensive care unit during the same hospital stay, report 99478-99480 for the first day of intensive care and for each successive day that the child requires intensive care services.

These codes include the same procedures that are outlined in the **Neonatal and Pediatric Critical Care Services** section and these services should not be separately reported.

The initial day neonatal intensive care code (99477) can be used in addition to 99464 or 99465 as appropriate, when the physician or other qualified health care professional is present for the delivery (99464) or resuscitation (99465) is required. In this situation, report 99477 with modifier 25. Other procedures performed as a necessary part of the resuscitation (eg, endotracheal intubation [31500]) are also reported separately when performed as part of the pre-admission delivery room care. In order to report these procedures separately, they must be performed as a necessary component of the resuscitation and not simply as a convenience before admission to the neonatal intensive care unit.

The same procedures are included as bundled services with the neonatal intensive care codes as those listed for the neonatal (99468, 99469) and pediatric (99471-99476) critical care codes.

When the neonate or infant improves after the initial day and no longer requires intensive care services and is transferred to a lower level of care, the transferring individual does not report a per day intensive care service. Subsequent hospital inpatient or observation care (99231-99233) or subsequent normal newborn care (99460, 99462) is reported, as appropriate, based upon the condition of the neonate or infant. If the transfer to a lower level of care occurs on the same day as initial intensive care services were provided by the transferring individual, 99477 may be reported.

When the neonate or infant is transferred after the initial day within the same facility to the care of another individual in a different group, both individuals report subsequent hospital inpatient or observation care (99231-99233) services. The receiving individual reports subsequent hospital inpatient or observation care (99231-99233) or subsequent normal newborn care (99462).

When the neonate or infant becomes critically ill on a day when initial or subsequent intensive care services (99477-99480) have been reported by one individual and is transferred to a critical care level of care provided by a different individual from a different group, the transferring individual reports either the time-based critical care services performed (99291, 99292) for the time spent providing critical care to the patient or the initial or subsequent intensive care (99477-99480) service, but not both. The receiving individual reports initial or subsequent inpatient neonatal or pediatric critical care (99468-99476) based upon the patient's age and whether this is the first or subsequent admission to critical care for the same hospital stay.

For the subsequent care of the sick neonate younger than 28 days of age but more than 5,000 grams who does not require intensive or critical care services, use codes 99231-99233.

99477 **Initial hospital care,** per day, for the evaluation and management of the neonate, 28 days of age or younger, who requires intensive observation, frequent interventions, and other intensive care services

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Jan 08:8, Jul 08:10, Mar 09:3, Nov 11:5, May 14:4, Dec 18:8, Sep 22:6

(For the initiation of inpatient care of the normal newborn, use 99460)

(For the initiation of care of the critically ill neonate, use 99468)

(For initiation of hospital inpatient or observation care of the ill neonate not requiring intensive observation, frequent interventions, and other intensive care services, see 99221-99223)

99478 **Subsequent intensive care,** per day, for the evaluation and management of the recovering very low birth weight infant (present body weight less than 1,500 grams)

- *CPT Changes: An Insider's View* 2009
- *CPT Assistant* Jun 18:11, Dec 18:8

99479 **Subsequent intensive care,** per day, for the evaluation and management of the recovering low birth weight infant (present body weight of 1,500-2,500 grams)

- *CPT Changes: An Insider's View* 2009
- *CPT Assistant* Jun 18:11, Dec 18:8

99480 **Subsequent intensive care,** per day, for the evaluation and management of the recovering infant (present body weight of 2,501-5,000 grams)

- *CPT Changes: An Insider's View* 2009

Cognitive Assessment and Care Plan Services

Cognitive assessment and care plan services are provided when a comprehensive evaluation of a new or existing patient, who exhibits signs and/or symptoms of cognitive impairment, is required to establish or confirm a diagnosis, etiology and severity for the condition. This service includes a thorough evaluation of medical and psychosocial factors, potentially contributing to increased morbidity. Do not report cognitive assessment and care plan services if any of the required elements are not performed or are deemed unnecessary for the patient's condition. For these services, see the appropriate evaluation and management code. A single physician or other qualified health care professional should not report 99483 more than once every 180 days.

Services for cognitive assessment and care plan include a cognition-relevant history, as well as an assessment of factors that could be contributing to cognitive impairment, including, but not limited to, psychoactive medication, chronic pain syndromes, infection, depression and other brain disease (eg, tumor, stroke, normal pressure hydrocephalus). Medical decision making includes current and likely progression of the disease, assessing the need for referral for rehabilitative, social, legal, financial, or community-based services, meal, transportation, and other personal assistance services.

99483 **Assessment of and care planning** for a patient with cognitive impairment, requiring an independent historian, in the office or other outpatient, home or domiciliary or rest home, with all of the following required elements:

- Cognition-focused evaluation including a pertinent history and examination,
- Medical decision making of moderate or high complexity,
- Functional assessment (eg, basic and instrumental activities of daily living), including decision-making capacity,
- Use of standardized instruments for staging of dementia (eg, functional assessment staging test [FAST], clinical dementia rating [CDR]),
- Medication reconciliation and review for high-risk medications,
- Evaluation for neuropsychiatric and behavioral symptoms, including depression, including use of standardized screening instrument(s),
- Evaluation of safety (eg, home), including motor vehicle operation,
- Identification of caregiver(s), caregiver knowledge, caregiver needs, social supports, and the willingness of caregiver to take on caregiving tasks,
- Development, updating or revision, or review of an Advance Care Plan,
- Creation of a written care plan, including initial plans to address any neuropsychiatric symptoms, neuro-cognitive symptoms, functional limitations, and referral to community resources as needed (eg, rehabilitation services, adult day programs, support groups) shared with the patient and/or caregiver with initial education and support.

Typically, 60 minutes of total time is spent on the date of the encounter.

CPT Changes: An Insider's View 2018, 2022, 2023

CPT Assistant Apr 18:9, Jul 18:12, Nov 22:1, Dec 22:15, Dec 24:22

(For services of 75 minutes or longer, use 99417)

(Do not report 99483 in conjunction with E/M services [98000-98016, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99242, 99243, 99244, 99245, 99341, 99342, 99344, 99345, 99347, 99348, 99349, 99350, 99366, 99367, 99368, 99497, 99498]; psychiatric diagnostic procedures [90785, 90791, 90792]; brief emotional/behavioral assessment [96127]; psychological or neuropsychological test administration [96146]; health risk assessment administration [96160, 96161]; medication therapy management services [99605, 99606, 99607])

99484 Code is out of numerical sequence. See 99497-99499

99485 Code is out of numerical sequence. See 99466-99469

99486 Code is out of numerical sequence. See 99466-99469

Care Management Services

Care management services are management and support services provided by clinical staff, under the direction of a physician or other qualified health care professional, or may be provided personally by a physician or other qualified health care professional to a patient residing at home or in a domiciliary, rest home, or assisted living facility. Care management services improve care coordination, reduce avoidable hospital services, improve patient engagement, and decrease care fragmentation. The physician or other qualified health care professional provides or oversees the management and/or coordination of care management services, which include establishing, implementing, revising, or monitoring the care plan, coordinating the care of other professionals and agencies, and educating the patient or caregiver about the patient's condition, care plan, and prognosis.

There are three general categories of care management services: chronic care management (99437, 99439, 99490, 99491), complex chronic care management (99487, 99489), and principal care management (99424, 99425, 99426, 99427). Complex chronic care management addresses all of the patient's medical conditions, and principal care management services address a single condition. Each of the three categories is further subdivided into those services that are personally performed by the physician or other qualified health care professional and those services that are performed by the clinical staff and overseen by the physician or other qualified health care professional. Code selection for these services is based on time in a calendar month, and time used in reporting these services may not represent time spent in another reported service. Chronic care management services do not require moderate or high-level medical decision making and may be reported for a shorter time threshold than complex chronic care

management services. Both chronic care and complex chronic care management address, as needed, all medical conditions, psychosocial needs, and activities of daily living. Principal care management services are disease-specific management services. A patient may have multiple chronic conditions of sufficient severity to warrant complex chronic care management but may receive principal care management if the reporting physician or other qualified health care professional is providing single disease rather than comprehensive care management.

Coding Tip

If the treating physician or other qualified health care professional personally performs any of the care management services and those activities are not used to meet the criteria for a separately reported code (99424, 99491), then his or her time may be counted toward the required clinical staff time to meet the elements of 99426, 99487, 99490, as applicable.

Care Planning

A plan of care for health problems is based on a physical, mental, cognitive, social, functional, and environmental evaluation. It is intended to provide a simple and concise overview of the patient, and his or her medical condition(s) and be a useful resource for patients, caregivers, health care professionals, and others, as necessary.

A typical plan of care is not limited to, but may include:

- Problem list
- Expected outcome and prognosis
- Measurable treatment goals
- Cognitive assessment
- Functional assessment
- Symptom management
- Planned interventions
- Medical management

- Environmental evaluation
- Caregiver assessment
- Interaction and coordination with outside resources and health care professionals and others, as necessary
- Summary of advance directives

The above elements are intended to be a guide for creating a meaningful plan of care rather than a strict set of requirements, so each should be addressed only as appropriate for the individual.

The plan of care should include specific and achievable goals for each condition and be relevant to the patient's well-being and lifestyle. When possible, the treatment goals should also be measurable and time bound. The plan should be updated periodically based on status or goal changes. The entire care plan should be reviewed, or revised as needed, but at least annually.

An electronic and/or printed plan of care must be documented and shared with the patient and/or caregiver.

Codes 99424, 99426, 99487, 99490, 99491 are reported only once per calendar month. Codes 99427, 99439 are reported no more than twice per calendar month. Codes 99437, 99439, 99487, 99489, 99490, 99491 may only be reported by the single physician or other qualified health care professional who assumes the care management role with a particular patient for the calendar month. Codes 99424, 99425, 99426, 99427 may be reported by different physicians or qualified health care professionals in the same calendar month for the same patient, and documentation in the patient's medical record should reflect coordination among relevant managing clinicians.

For 99426, 99427, 99439, 99487, 99489, 99490, the face-to-face and non-face-to-face time spent by the clinical staff in communicating with the patient and/or family, caregivers, other professionals, and agencies; creating, revising, documenting, and implementing the care plan; or teaching self-management is used in determining the care management clinical staff time for the month. Only the time of the clinical staff of the reporting professional is counted, and the reporting professional's time is additionally included only if he or she is not otherwise reporting his or her care management time with another service (see Coding Tip on previous page). Only count the time of one clinical staff member or physician or other qualified health care professional when two or more are meeting about the patient at the same time. For 99424, 99425, 99437, 99491, only count the time personally spent by the physician or other qualified health care professional. Time spent by the physician or other qualified health care professional that does not meet the threshold to report 99424, 99425, 99437, 99491 may be used toward the time necessary to report 99426, 99427, 99439, 99487, 99489, 99490. Do not count clinical staff time spent as part of a separately reported service.

Care management activities performed by clinical staff, or personally by the physician or other qualified health care professional, typically include:

- communication and engagement with patient, family members, guardian or caretaker, surrogate decision makers, and/or other professionals regarding aspects of care;
- communication with home health agencies and other community services utilized by the patient;
- collection of health outcomes data and registry documentation;
- patient and/or family/caregiver education to support self-management, independent living, and activities of daily living;
- assessment and support for treatment regimen adherence and medication management;
- identification of available community and health resources;
- facilitating access to care and services needed by the patient and/or family;
- management of care transitions not reported as part of transitional care management (99495, 99496);
- ongoing review of patient status, including review of laboratory and other studies not reported as part of an E/M service, noted above;
- development, communication, and maintenance of a comprehensive or disease-specific (as applicable) care plan.

The care management office/practice must have the following capabilities:

- provide 24/7 access to physicians or other qualified health care professionals or clinical staff including providing patients/caregivers with a means to make contact with health care professionals in the practice to address urgent needs regardless of the time of day or day of week;
- provide continuity of care with a designated member of the care team with whom the patient is able to schedule successive routine appointments;
- provide timely access and management for follow-up after an emergency department visit or facility discharge;
- utilize an electronic health record system for timely access to clinical information;
- be able to engage and educate patients and caregivers as well as coordinate and integrate care among all service professionals, as appropriate for each patient;
- reporting physician or other qualified health care professional oversees activities of the care team;
- all care team members providing services are clinically integrated.

Each minute of service time is counted toward only one service. Do not count any time and activities used to meet criteria for another reported service. However, time of clinical staff and time of a physician or other qualified health care professional are reported separately when each provides distinct services to the same patient at different times during the same calendar month. A list of services not reported in the same calendar month as 99439, 99487, 99489, 99490 is provided in the parenthetical instructions following the care management codes. If the care management services are performed within the postoperative period of a reported surgery, the same individual may not report 99439, 99487, 99489, 99490, 99491.

When behavioral or psychiatric collaborative care management services are also provided, 99484, 99492, 99493, 99494 may be reported in addition.

Chronic Care Management Services

Chronic care management services are provided when medical and/or psychosocial needs of the patient require establishing, implementing, revising, or monitoring the care plan. Patients who receive chronic care management services have two or more chronic continuous or episodic health conditions that are expected to last at least 12 months, or until the death of the patient, and that place the patient at significant risk of death, acute exacerbation/decompensation, or functional decline. Code 99490 is reported when, during the calendar month, at least 20 minutes of clinical staff time is spent in care management activities. Code 99439 is reported in conjunction with 99490 for each additional 20 minutes of clinical staff time spent in care management activities during the calendar month up to a maximum of 60 minutes total time (ie, 99439 may only be reported twice per calendar month). Code 99491 is reported for at least 30 minutes of physician or other qualified health care professional time personally spent in care management during the calendar month. Code 99437 is reported in conjunction with 99491 for each additional minimum 30 minutes of physician or other qualified health care professional time. If reporting 99437, 99491 do not include any time devoted to the patient and/or family on the date that the reporting physician or other qualified health care professional also performed a face-to-face E/M encounter.

 # 99490 **Chronic care management services** with the following required elements:

- multiple (two or more) chronic conditions expected to last at least 12 months, or until the death of the patient,
- chronic conditions that place the patient at significant risk of death, acute exacerbation/decompensation, or functional decline,
- comprehensive care plan established, implemented, revised, or monitored;

first 20 minutes of clinical staff time directed by a physician or other qualified health care professional, per calendar month.

Complex Chronic Care Management Services

Complex chronic care management services are services that require at least 60 minutes of clinical staff time, under the direction of a physician or other qualified health care professional. Complex chronic care management services require moderate or high medical decision making as defined in the Evaluation and Management (E/M) guidelines.

Patients who require complex chronic care management services may be identified by practice-specific or other published algorithms that recognize multiple illnesses, multiple medication use, inability to perform activities of daily living, requirement for a caregiver, and/or repeat admissions or emergency department visits. Typical adult patients who receive complex chronic care management services are treated with three or more prescription medications and may be receiving other types of therapeutic interventions (eg, physical therapy, occupational therapy). Typical pediatric patients receive three or more therapeutic interventions (eg, medications, nutritional support, respiratory therapy). All patients have two or more chronic continuous or episodic health conditions that are expected to last at least 12 months, or until the death of the patient, and that place the patient at significant risk of death, acute exacerbation/decompensation, or functional decline. Typical patients have complex diseases and morbidities and, as a result, demonstrate one or more of the following:

- need for the coordination of a number of specialties and services;
- inability to perform activities of daily living and/or cognitive impairment resulting in poor adherence to the treatment plan without substantial assistance from a caregiver;

Table for Reporting Chronic Care Management Services

Total Duration Care Management Services	Staff Type	Chronic Care Management
Less than 20 minutes	Not reported separately	Not reported separately
Less than 30 minutes	Physician or other qualified health care professional	Not reported separately or see 99490
20-39 minutes	Clinical staff	99490 X 1
30-59 minutes	Physician or other qualified health care professional	99491 X 1
40-59 minutes	Clinical staff	99490 X 1 and 99439 X 1
60-89 minutes	Physician or other qualified health care professional	99491 X 1 and 99437 X 1
60 minutes or more	Clinical staff	99490 X 1 and 99439 X 2
90 minutes or more	Physician or other qualified health care professional	99491 X 1 and 99437 X 2 as appropriate (see illustrated reporting examples above)

- psychiatric and other medical comorbidities (eg, dementia and chronic obstructive pulmonary disease or substance abuse and diabetes) that complicate their care; and/or
- social support requirements or difficulty with access to care.

99487 **Complex chronic care management services** with the following required elements:

- multiple (two or more) chronic conditions expected to last at least 12 months, or until the death of the patient,
- chronic conditions that place the patient at significant risk of death, acute exacerbation/decompensation, or functional decline,
- comprehensive care plan established, implemented, revised, or monitored,
- moderate or high complexity medical decision making;

first 60 minutes of clinical staff time directed by a physician or other qualified health care professional, per calendar month.

(Report 99489 in conjunction with 99487)

(Do not report 99489 for care management service of less than 30 minutes)

(Do not report 99487, 99489 during the same calendar month with 90951-90970, 99374, 99375, 99377, 99378, 99379, 99380, 99424, 99425, 99426, 99427, 99437, 99439, 99490, 99491)

(Do not report 99487, 99489 for service time reported with 93792, 93793, 98016, 98960, 98961, 98962, 98966, 98967, 98968, 98970, 98971, 98972, 99071, 99078, 99080, 99091, 99358, 99359, 99366, 99367, 99368, 99421, 99422, 99423, 99605, 99606, 99607)

Coding Tip

If the physician personally performs the clinical staff activities, his or her time may be counted toward the required clinical staff time to meet the elements of the code.

99490 Code is out of numerical sequence. See 99480-99489
99491 Code is out of numerical sequence. See 99480-99489

Total Duration of Staff Care Management Services	Complex Chronic Care Management
less than 60 minutes	Not reported separately
60 to 89 minutes (1 hour - 1 hr. 29 min.)	99487 X 1
90 - 119 minutes (1 hr. 30 min. - 1 hr. 59 min.)	99487 X 1 and 99489 X 1
120 minutes or more (2 hours or more)	99487 X 1 and 99489 X 2 and 99489 for each additional 30 minutes

Principal Care Management Services

Principal care management represents services that focus on the medical and/or psychological needs manifested by a single, complex chronic condition expected to last at least 3 months and includes establishing, implementing, revising, or monitoring a care plan specific to that single disease. Code 99424 is reported for at least 30 minutes of physician or other qualified health care professional personal time in care management activities during a calendar month. Code 99425 is reported in conjunction with 99424, when at least an additional 30 minutes of physician or other qualified health care professional personal time is spent in care management activities during the calendar month. Code 99426 is reported for the first 30 minutes of clinical staff time spent in care management activities during the calendar month. Code 99427 is reported in conjunction with 99426, when at least an additional 30 minutes of clinical staff time is spent in care management activities during the calendar month.

 # 99424 Principal care management services, for a single high-risk disease, with the following required elements:

- one complex chronic condition expected to last at least 3 months, and that places the patient at significant risk of hospitalization, acute exacerbation/decompensation, functional decline, or death,
- the condition requires development, monitoring, or revision of disease-specific care plan,
- the condition requires frequent adjustments in the medication regimen and/or the management of the condition is unusually complex due to comorbidities,
- ongoing communication and care coordination between relevant practitioners furnishing care;

first 30 minutes provided personally by a physician or other qualified health care professional, per calendar month.

Psychiatric Collaborative Care Management Services

Psychiatric collaborative care services are provided under the direction of a treating physician or other qualified health care professional (see definitions below) during a calendar month. These services are reported by the treating physician or other qualified health care professional and include the services of the treating physician or other qualified health care professional, the behavioral health care manager (see definition below), and the psychiatric consultant (see definition below), who has contracted directly with the treating physician or other qualified health care professional, to provide consultation. Patients directed to the behavioral health care manager typically have behavioral health signs and/or symptoms or a newly diagnosed behavioral health condition, may need help in engaging in treatment, have not responded to standard care delivered in a nonpsychiatric setting, or require further assessment and engagement, prior to consideration of referral to a psychiatric care setting.

These services are provided when a patient requires a behavioral health care assessment; establishing, implementing, revising, or monitoring a care plan; and provision of brief interventions.

The following definitions apply to this section:

Definitions

Episode of care patients are treated for an episode of care, which is defined as beginning when the patient is directed by the treating physician or other qualified health care professional to the behavioral health care manager and ending with:

- the attainment of targeted treatment goals, which typically results in the discontinuation of care management services and continuation of usual follow-up with the treating physician or other qualified health care professional; or
- failure to attain targeted treatment goals culminating in referral to a psychiatric care provider for ongoing treatment of the behavioral health condition; or

- lack of continued engagement with no psychiatric collaborative care management services provided over a consecutive six month calendar period (break in episode).

A new episode of care starts after a break in episode of six calendar months or more.

Health care professionals refers to the treating physician or other qualified health care professional who directs the behavioral health care manager and continues to oversee the patient's care, including prescribing medications, providing treatments for medical conditions, and making referrals to specialty care when needed. Evaluation and management (E/M) and other services may be reported separately by the same physician or other qualified health care professional during the same calendar month.

Behavioral health care manager refers to clinical staff with a masters-/doctoral-level education or specialized training in behavioral health who provides care management services as well as an assessment of needs, including the administration of validated rating scales, the development of a care plan, provision of brief interventions, ongoing collaboration with the treating physician or other qualified health care professional, maintenance of a registry, all in consultation with a psychiatric consultant. Services are provided both face-to-face and non-face-to-face and psychiatric consultation is provided minimally on a weekly basis, typically non-face-to-face.

The behavioral health care manager providing other services in the same calendar month, such as psychiatric evaluation (90791, 90792), psychotherapy (90832, 90833, 90834, 90836, 90837, 90838), psychotherapy for crisis (90839, 90840), family psychotherapy (90846, 90847), multiple family group psychotherapy (90849), group psychotherapy (90853), smoking and tobacco use cessation counseling (99406, 99407), and alcohol and/or substance abuse structured screening and brief intervention services (99408, 99409), may report these services separately. Activities for services reported separately are not included in the time applied to 99492, 99493, 99494.

Psychiatric consultant refers to a medical professional, who is trained in psychiatry or behavioral health, and qualified to prescribe the full range of medications. The psychiatric consultant advises and makes recommendations, as needed, for psychiatric and other medical care, including psychiatric and other medical differential diagnosis, treatment strategies regarding appropriate therapies, medication management, medical management of complications associated with treatment of psychiatric disorders, and referral for specialty services, which are typically communicated to the treating physician or other qualified health care professional through the behavioral health care manager. The psychiatric consultant typically does not see the patient or prescribe medications, except in rare circumstances.

The psychiatric consultant may provide services in the calendar month described by other codes, such as evaluation and management (E/M) services and psychiatric evaluation (90791, 90792). These services may be reported separately by the psychiatric consultant. Activities for services reported separately are not included in the services reported using 99492, 99493, 99494.

Do not report 99492 and 99493 in the same calendar month.

99492 **Initial psychiatric collaborative care management,** first 70 minutes in the first calendar month of behavioral health care manager activities, in consultation with a psychiatric consultant, and directed by the treating physician or other qualified health care professional, with the following required elements:

- outreach to and engagement in treatment of a patient directed by the treating physician or other qualified health care professional,
- initial assessment of the patient, including administration of validated rating scales, with the development of an individualized treatment plan,
- review by the psychiatric consultant with modifications of the plan if recommended,
- entering patient in a registry and tracking patient follow-up and progress using the registry, with appropriate documentation, and participation in weekly caseload consultation with the psychiatric consultant, and
- provision of brief interventions using evidence-based techniques such as behavioral activation, motivational interviewing, and other focused treatment strategies.

CPT Assistant Nov 17:3, Feb 18:7, Mar 18:5, Jul 18:12, Feb 20:7, Jan 22:3

Type of Service	Total Duration of Collaborative Care Management Over Calendar Month	Code(s)
Initial - 70 minutes	Less than 36 minutes	Not reported separately
	36-85 minutes (36 minutes - 1 hr. 25 minutes)	99492 X 1
Initial plus each additional increment up to 30 minutes	86-115 minutes (1 hr. 26 minutes - 1 hr. 55 minutes)	99492 X 1 AND 99494 X 1
Subsequent - 60 minutes	Less than 31 minutes	Not reported separately
	31-75 minutes (31 minutes - 1 hr. 15 minutes)	99493 X 1
Subsequent plus each additional increment up to 30 minutes	76-105 minutes (1 hr. 16 minutes - 1 hr. 45 minutes)	99493 X 1 AND 99494 X 1

99493 **Subsequent psychiatric collaborative care management,** first 60 minutes in a subsequent month of behavioral health care manager activities, in consultation with a psychiatric consultant, and directed by the treating physician or other qualified health care professional, with the following required elements:

- tracking patient follow-up and progress using the registry, with appropriate documentation,
- participation in weekly caseload consultation with the psychiatric consultant,
- ongoing collaboration with and coordination of the patient's mental health care with the treating physician or other qualified health care professional and any other treating mental health providers,
- additional review of progress and recommendations for changes in treatment, as indicated, including medications, based on recommendations provided by the psychiatric consultant,
- provision of brief interventions using evidence-based techniques such as behavioral activation, motivational interviewing, and other focused treatment strategies,
- monitoring of patient outcomes using validated rating scales, and
- relapse prevention planning with patients as they achieve remission of symptoms and/or other treatment goals and are prepared for discharge from active treatment.

CPT Changes: An Insider's View 2018, 2022
CPT Assistant Nov 17:3, Feb 18:7, Mar 18:5, Jul 18:12, Feb 20:7, Jan 22:3

+ 99494 **Initial or subsequent psychiatric collaborative care management,** each additional 30 minutes in a calendar month of behavioral health care manager activities, in consultation with a psychiatric consultant, and directed by the treating physician or other qualified health care professional (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2018

CPT Assistant Nov 17:3, Feb 18:7, Mar 18:5, Jul 18:12, Feb 20:7, Jan 22:3

(Use 99494 in conjunction with 99492, 99493)

Coding Tip

If the treating physician or other qualified health care professional personally performs behavioral health care manager activities and those activities are not used to meet criteria for a separately reported code, his or her time may be counted toward the required behavioral health care manager time to meet the elements of 99492, 99493, 99494.

Transitional Care Management Services

Codes 99495 and 99496 are used to report transitional care management (TCM) services. These services are for a new or established patient whose medical and/or psychosocial problems require a moderate or high level of medical decision making during transitions in care from an inpatient hospital setting (including acute hospital, rehabilitation hospital, long-term acute care hospital), partial hospital, observation status in a hospital, or skilled nursing facility/nursing facility to the patient's community setting (eg, home, rest home, or assisted living). Home may be defined as a private residence, temporary lodging, or short-term accommodation (eg, hotel, campground, hostel, or cruise ship).

These codes are also used when the residence is an assisted living facility, group home (that is not licensed as an intermediate care facility for individuals with intellectual disabilities), custodial care facility, or residential substance abuse treatment facility.

TCM commences upon the date of discharge and continues for the next 29 days.

TCM is comprised of one face-to-face visit within the specified timeframes, in combination with non-face-to-face services that may be performed by the physician or other qualified health care professional and/or licensed clinical staff under his/her direction.

Non-face-to-face services provided by clinical staff, under the direction of the physician or other qualified health care professional, may include:

- communication (with patient, family members, guardian or caretaker, surrogate decision makers, and/or other professionals) regarding aspects of care,
- communication with home health agencies and other community services utilized by the patient,
- patient and/or family/caretaker education to support self-management, independent living, and activities of daily living,
- assessment and support for treatment regimen adherence and medication management,
- identification of available community and health resources,
- facilitating access to care and services needed by the patient and/or family

Non-face-to-face services provided by the physician or other qualified health care provider may include:

- obtaining and reviewing the discharge information (eg, discharge summary, as available, or continuity of care documents);
- reviewing need for or follow-up on pending diagnostic tests and treatments;
- interaction with other qualified health care professionals who will assume or reassume care of the patient's system-specific problems;
- education of patient, family, guardian, and/or caregiver;
- establishment or reestablishment of referrals and arranging for needed community resources;
- assistance in scheduling any required follow-up with community providers and services.

TCM requires a face-to-face visit, initial patient contact, and medication reconciliation within specified time frames. The first face-to-face visit is part of the TCM service and not reported separately. Additional E/M services provided on subsequent dates after the first face-to-face visit may be reported separately. TCM requires an interactive contact with the patient or caregiver, as appropriate, within two business days of discharge. The contact may be direct (face-to-face), telephonic, or by electronic means. Medication reconciliation and management must occur no later than the date of the face-to-face visit.

These services address any needed coordination of care performed by multiple disciplines and community service agencies. The reporting individual provides or oversees the management and/or coordination of services, as needed, for all medical conditions, psychosocial needs and activity of daily living support by providing first contact and continuous access.

Medical decision making and the date of the first face-to-face visit are used to select and report the appropriate TCM code. For 99496, the face-to-face visit must occur within 7 calendar days of the date of discharge and there must be a high level of medical decision making. For 99495, the face-to-face visit must occur within 14 calendar days of the date of discharge and there must be at least a moderate level of medical decision making.

Level of Medical Decision Making	Face-to-Face Visit Within 7 Days	Face-to-Face Visit Within 8 to 14 Days
Moderate	99495	99495
High	99496	99495

Medical decision making is defined by the E/M Services Guidelines. The medical decision making over the service period reported is used to define the medical decision making of TCM. Documentation includes the timing of the initial post-discharge communication with the patient or caregivers, date of the face-to-face visit, and the level of medical decision making.

Only one individual may report these services and only once per patient within 30 days of discharge. Another TCM may not be reported by the same individual or group for any subsequent discharge(s) within the 30 days. The same individual may report hospital or observation discharge services and TCM. However, the discharge service may not constitute the required face-to-face visit. The same individual should not report TCM services provided in the postoperative period of a service that the individual reported.

★ **99495** **Transitional care management services** with the following required elements:

- Communication (direct contact, telephone, electronic) with the patient and/or caregiver within 2 business days of discharge
- At least moderate level of medical decision making during the service period
- Face-to-face visit, within 14 calendar days of discharge

CPT Changes: An Insider's View 2013, 2017, 2023

CPT Assistant Apr 13:3, Jul 13:11, Aug 13:13, Sep 13:15, Nov 13:3, Dec 13:11, Mar 14:13, Oct 14:3, Feb 18:7, Mar 18:5, Jan 20:3, Feb 20:7, Jan 22:3, 8, Dec 22:15

★ **99496** **Transitional care management services** with the following required elements:

- Communication (direct contact, telephone, electronic) with the patient and/or caregiver within 2 business days of discharge
- High level of medical decision making during the service period
- Face-to-face visit, within 7 calendar days of discharge

- *CPT Changes: An Insider's View* 2013, 2017, 2023
- *CPT Assistant* Apr 13:3, Jul 13:11, Aug 13:13, Sep 13:15, Nov 13:3, Mar 14:13, Oct 14:3, Feb 18:7, Mar 18:5, Jan 20:3, Feb 20:7, Jan 22:3, 8, Dec 22:15

Coding Tip

If another individual provides TCM services within the postoperative period of a surgical package, modifier 54 is not required.

The required contact with the patient or caregiver, as appropriate, may be by the physician or qualified health care professional or clinical staff and must occur before the end of the second business day after discharge. A business day is Monday through Friday except holidays without respect to normal practice hours or date of notification of discharge. However, the contact may occur on weekends and holidays. The contact must include capacity for prompt interactive communication addressing patient status and needs beyond scheduling follow-up care. If two or more separate attempts are made in a timely manner, but are unsuccessful and other transitional care management criteria are met, the service may be reported.

Advance Care Planning

Codes 99497, 99498 are used to report the face-to-face service between a physician or other qualified health care professional and a patient, family member, or surrogate in counseling and discussing advance directives, with or without completing relevant legal forms. An advance directive is a document appointing an agent and/or recording the wishes of a patient pertaining to his/her medical treatment at a future time should he/she lack decisional capacity at that time. Examples of written advance directives include, but are not limited to, Health Care Proxy, Durable Power of Attorney for Health Care, Living Will, and Medical Orders for Life-Sustaining Treatment (MOLST).

When using codes 99497, 99498, no active management of the problem(s) is undertaken during the time period reported.

Codes 99497, 99498 may be reported separately if these services are performed on the same day as another evaluation and management service (98000-98016, 99202-99215, 99221, 99222, 99223, 99231, 99232, 99233, 99234, 99235, 99236, 99238, 99239, 99242, 99243, 99244, 99245, 99252, 99253, 99254, 99255, 99281, 99282, 99283, 99284, 99285, 99304, 99305, 99306, 99307, 99308, 99309, 99310, 99315, 99316, 99341, 99342, 99344, 99345, 99347, 99348, 99349, 99350, 99381-99397, 99495, 99496).

★ 99497 **Advance care planning** including the explanation and discussion of advance directives such as standard forms (with completion of such forms, when performed), by the physician or other qualified health care professional; first 30 minutes, face-to-face with the patient, family member(s), and/or surrogate

- *CPT Changes: An Insider's View* 2015
- *CPT Assistant* Dec 14:11, Feb 16:7, Dec 22:15

★ + 99498 each additional 30 minutes (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2015
- *CPT Assistant* Dec 14:11, Feb 16:7, Dec 22:15

(Use 99498 in conjunction with 99497)

(Do not report 99497 and 99498 on the same date of service as 99291, 99292, 99468, 99469, 99471, 99472, 99475, 99476, 99477, 99478, 99479, 99480, 99483)

General Behavioral Health Integration Care Management

General behavioral health integration care management services (99484) are reported by the supervising physician or other qualified health care professional. The services are performed by clinical staff for a patient with a behavioral health (including substance use) condition that requires care management services (face-to-face or non-face-to-face) of 20 or more minutes in a calendar month. A treatment plan as well as the specified elements of the service description is required. The assessment and treatment plan is not required to be comprehensive and the office/practice is not required to have all the functions of chronic care management (99439, 99487, 99489, 99490). Code 99484 may be used in any outpatient setting, as long as the reporting professional has an ongoing relationship with the patient and clinical staff and as long as the clinical staff is available for face-to-face services with the patient.

The reporting professional must be able to perform the evaluation and management (E/M) services of an initiating visit. General behavioral integration care management (99484) and chronic care management services may be reported by the same professional in the same month, as long as distinct care management services are performed. Behavioral health integration care management (99484) and psychiatric collaborative care management (99492, 99493, 99494) may not be reported by the same professional in the same month. Behavioral health care integration clinical staff are not required to have qualifications that would permit them to separately report services (eg, psychotherapy), but, if qualified and they perform such services, they may report such services separately, as long as the time of the service is not used in reporting 99484.

99484 **Care management services for behavioral health conditions,** at least 20 minutes of clinical staff time, directed by a physician or other qualified health care professional, per calendar month, with the following required elements:

- initial assessment or follow-up monitoring, including the use of applicable validated rating scales,
- behavioral health care planning in relation to behavioral/psychiatric health problems, including revision for patients who are not progressing or whose status changes,
- facilitating and coordinating treatment such as psychotherapy, pharmacotherapy, counseling and/or psychiatric consultation, and
- continuity of care with a designated member of the care team.

CPT Changes: An Insider's View 2018, 2022

CPT Assistant Feb 18:7, Mar 18:5, Jul 18:12, Feb 20:7, Jan 22:3, 8, Dec 24:55

(Do not report 99484 in conjunction with 99492, 99493, 99494 in the same calendar month)

(E/M services, including care management services [99424, 99425, 99426, 99427, 99437, 99439, 99487, 99489, 99490, 99491, 99495, 99496], and psychiatric services [90785-90899] may be reported separately by the same physician or other qualified health care professional on the same day or during the same calendar month, but time and activities used to meet criteria for another reported service do not count toward meeting criteria for 99484.)

Coding Tip

If the treating physician or other qualified health care professional personally performs behavioral health care manager activities and those activities are not used to meet the criteria for a separately reported code, his or her time may be counted toward the required behavioral health care manager time to meet the elements of 99484, 99492, 99493, 99494.

Clinical staff time spent coordinating care with the emergency department may be reported using 99484, but time spent while the patient is inpatient or admitted to observation status may not be reported using 99484.

Other Evaluation and Management Services

#+ 99459 **Pelvic examination** (List separately in addition to code for primary procedure)

Anesthesia Guidelines

The following is a listing of headings and subheadings that appear within the Anesthesia section of the CPT codebook. The subheadings or subsections denoted with asterisks (*) below have special instructions unique to that subsection. Where these are indicated, special notes or guidelines will be presented preceding those procedural terminology listings, referring to that subsection specifically. Note that all code ranges in each subsection are listed as they appear in the subsection, even if the code numbers are out of numerical sequence and/or repeated in the next subsection.

Obstetric (01958-01969)

Other Procedures (01990-01999)

Anesthesia Guidelines

Services involving administration of anesthesia are reported by the use of the anesthesia five-digit procedure code (00100-01999) plus modifier codes (defined under “Anesthesia Modifiers” later in these Guidelines).

The reporting of anesthesia services is appropriate by or under the responsible supervision of a physician. These services may include but are not limited to general, regional, supplementation of local anesthesia, or other supportive services in order to afford the patient the anesthesia care deemed optimal by the anesthesiologist during any procedure. These services include the usual preoperative and postoperative visits, the anesthesia care during the procedure, the administration of fluids and/or blood and the usual monitoring services (eg, ECG, temperature, blood pressure, oximetry, capnography, and mass spectrometry). Unusual forms of monitoring (eg, intra-arterial, central venous, and Swan-Ganz) are not included.

Items used by all physicians in reporting their services are presented in the **Introduction.** Some of the commonalities are repeated in this section for the convenience of those physicians referring to this section on **Anesthesia.** Other definitions and items unique to anesthesia are also listed.

To report moderate (conscious) sedation provided by a physician also performing the service for which conscious sedation is being provided, see codes 99151, 99152, 99153.

When a second physician other than the health care professional performing the diagnostic or therapeutic services provides moderate (conscious) sedation in the facility setting (eg, hospital, outpatient hospital/ambulatory surgery center, skilled nursing facility), the second physician reports the associated moderate sedation procedure/service 99155, 99156, 99157; when these services are performed by the second physician in the nonfacility setting (eg, physician office, freestanding imaging center), codes 99155, 99156, 99157 would not be reported. Moderate sedation does not include minimal sedation (anxiolysis), deep sedation, or monitored anesthesia care (00100-01999).

To report regional or general anesthesia provided by a physician also performing the services for which the anesthesia is being provided, see modifier 47 in Appendix A.

Time Reporting

Time for anesthesia procedures may be reported as is customary in the local area. Anesthesia time begins when the anesthesiologist begins to prepare the patient for the induction of anesthesia in the operating room (or in an equivalent area) and ends when the anesthesiologist is no longer in personal attendance, that is, when the patient may be safely placed under postoperative supervision.

Anesthesia Services

Services rendered in the office, home, or hospital; consultation; and other medical services are listed in the **Evaluation and Management Services** section (98000-98016, 99202-99499 series) on page 15. "Special Services, Procedures and Reports" (99000-99082 series) are listed in the **Medicine** section.

Supplied Materials

Supplies and materials provided (eg, sterile trays, drugs) over and above those usually included with the office visit or other services rendered may be listed separately. Drugs, tray supplies, and materials provided should be listed and identified with 99070 or the appropriate supply code.

Separate or Multiple Procedures

When multiple surgical procedures are performed during a single anesthetic administration, the anesthesia code representing the most complex procedure is reported. The time reported is the combined total for all procedures.

Unlisted Service or Procedure

A service or procedure may be provided that is not listed in this edition of the CPT codebook. When reporting such a service, the appropriate "Unlisted Procedure" code may be used to indicate the service, identifying it by "Special Report" as discussed in the section below. The "Unlisted Procedures" and accompanying code for **Anesthesia** is as follows:

01999 Unlisted anesthesia procedure(s)

Special Report

A service that is rarely provided, unusual, variable, or new may require a special report. Pertinent information should include an adequate definition or description of the nature, extent, and need for the procedure and the time, effort, and equipment necessary to provide the service.

Anesthesia Modifiers

All anesthesia services are reported by use of the anesthesia five-digit procedure code (00100-01999) plus the addition of a physical status modifier. The use of other optional modifiers may be appropriate.

Physical Status Modifiers

Physical Status modifiers are represented by the initial letter 'P' followed by a single digit from 1 to 6 as defined in the following list:

P1: A normal healthy patient

P2: A patient with mild systemic disease

P3: A patient with severe systemic disease

P4: A patient with severe systemic disease that is a constant threat to life

P5: A moribund patient who is not expected to survive without the operation

P6: A declared brain-dead patient whose organs are being removed for donor purposes

These six levels are consistent with the American Society of Anesthesiologists (ASA) ranking of patient physical status. Physical status is included in the CPT codebook to distinguish among various levels of complexity of the anesthesia service provided.

Example: 00100-P1

Qualifying Circumstances

More than one qualifying circumstance may be selected.

Many anesthesia services are provided under particularly difficult circumstances, depending on factors such as extraordinary condition of patient, notable operative conditions, and/or unusual risk factors. This section includes a list of important qualifying circumstances that significantly affect the character of the anesthesia service provided. These procedures would not be reported alone but would be reported as additional procedure numbers qualifying an anesthesia procedure or service.

+ 99100 Anesthesia for patient of extreme age, younger than 1 year and older than 70 (List separately in addition to code for primary anesthesia procedure)

(For procedure performed on infants younger than 1 year of age at time of surgery, see 00326, 00561, 00834, 00836)

+ 99116 Anesthesia complicated by utilization of total body hypothermia (List separately in addition to code for primary anesthesia procedure)

+ 99135 Anesthesia complicated by utilization of controlled hypotension (List separately in addition to code for primary anesthesia procedure)

+ 99140 Anesthesia complicated by emergency conditions (specify) (List separately in addition to code for primary anesthesia procedure)

(An emergency is defined as existing when delay in treatment of the patient would lead to a significant increase in the threat to life or body part)

CPT Assistant Mar 06:15, Nov 07:8, Oct 11:3, Jul 12:13

00520 Anesthesia for closed chest procedures; (including bronchoscopy) not otherwise specified

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:7

00522 needle biopsy of pleura

00524 pneumocentesis

00528 mediastinoscopy and diagnostic thoracoscopy not utilizing 1 lung ventilation

- *CPT Changes: An Insider's View* 2000, 2003, 2004
- *CPT Assistant* Nov 99:7

(For tracheobronchial reconstruction, use 00539)

00529 mediastinoscopy and diagnostic thoracoscopy utilizing 1 lung ventilation

- *CPT Changes: An Insider's View* 2004
- *CPT Assistant* Jun 04:3

00530 Anesthesia for permanent transvenous pacemaker insertion

- *CPT Changes: An Insider's View* 2001

00532 Anesthesia for access to central venous circulation

00534 Anesthesia for transvenous insertion or replacement of pacing cardioverter-defibrillator

- *CPT Changes: An Insider's View* 2001

(For transthoracic approach, use 00560)

00537 Anesthesia for cardiac electrophysiologic procedures including radiofrequency ablation

- *CPT Changes: An Insider's View* 2001

00539 Anesthesia for tracheobronchial reconstruction

- *CPT Changes: An Insider's View* 2003

00540 Anesthesia for thoracotomy procedures involving lungs, pleura, diaphragm, and mediastinum (including surgical thoracoscopy); not otherwise specified

00541 utilizing 1 lung ventilation

- *CPT Changes: An Insider's View* 2003

(For thoracic spine and cord anesthesia procedures via an anterior transthoracic approach, see 00625-00626)

00542 decortication

00546 pulmonary resection with thoracoplasty

00548 intrathoracic procedures on the trachea and bronchi

- *CPT Assistant* Nov 97:10

00550 Anesthesia for sternal debridement

- *CPT Changes: An Insider's View* 2001

00560 Anesthesia for procedures on heart, pericardial sac, and great vessels of chest; without pump oxygenator

- *CPT Changes: An Insider's View* 2002

00561 with pump oxygenator, younger than 1 year of age

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* Dec 17:8

(Do not report 00561 in conjunction with 99100, 99116, and 99135)

00562 with pump oxygenator, age 1 year or older, for all noncoronary bypass procedures (eg, valve procedures) or for re-operation for coronary bypass more than 1 month after original operation

- *CPT Changes: An Insider's View* 2009

00563 with pump oxygenator with hypothermic circulatory arrest

- *CPT Changes: An Insider's View* 2001

00566 Anesthesia for direct coronary artery bypass grafting; without pump oxygenator

- *CPT Changes: An Insider's View* 2001, 2009

00567 with pump oxygenator

- *CPT Changes: An Insider's View* 2009

00580 Anesthesia for heart transplant or heart/lung transplant

- *CPT Assistant* Nov 07:8, Jul 12:13

Spine and Spinal Cord

00600 Anesthesia for procedures on cervical spine and cord; not otherwise specified

- *CPT Assistant* Mar 06:15, May 07:9, Nov 07:8, Oct 11:3, Jul 12:13

(For percutaneous image-guided spine and spinal cord anesthesia procedures, see 01937, 01938, 01939, 01940, 01941, 01942)

00604 procedures with patient in the sitting position

- *CPT Changes: An Insider's View* 2001

00620 Anesthesia for procedures on thoracic spine and cord, not otherwise specified

- *CPT Assistant* Mar 07:9

00625 Anesthesia for procedures on the thoracic spine and cord, via an anterior transthoracic approach; not utilizing 1 lung ventilation

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Mar 07:9

00626 utilizing 1 lung ventilation

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Mar 07:9

(For anesthesia for thoracotomy procedures other than spinal, see 00540-00541)

00630 Anesthesia for procedures in lumbar region; not otherwise specified
00632 lumbar sympathectomy
00635 diagnostic or therapeutic lumbar puncture
- *CPT Changes: An Insider's View* 2001

00640 Anesthesia for manipulation of the spine or for closed procedures on the cervical, thoracic or lumbar spine
- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Jul 21:8

00670 Anesthesia for extensive spine and spinal cord procedures (eg, spinal instrumentation or vascular procedures)
- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Nov 07:8, Jul 12:13

Upper Abdomen

00700 Anesthesia for procedures on upper anterior abdominal wall; not otherwise specified
- *CPT Assistant* Mar 06:15, Nov 07:8, Oct 11:3, Jul 12:13, Jan 24:36

00702 percutaneous liver biopsy
00730 Anesthesia for procedures on upper posterior abdominal wall
- *CPT Assistant* Jan 24:36

00731 Anesthesia for upper gastrointestinal endoscopic procedures, endoscope introduced proximal to duodenum; not otherwise specified
- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Dec 17:8

00732 endoscopic retrograde cholangiopancreatography (ERCP)
- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Dec 17:8

(For combined upper and lower gastrointestinal endoscopic procedures, use 00813)
00750 Anesthesia for hernia repairs in upper abdomen; not otherwise specified
00752 lumbar and ventral (incisional) hernias and/or wound dehiscence
00754 omphalocele
00756 transabdominal repair of diaphragmatic hernia
00770 Anesthesia for all procedures on major abdominal blood vessels
00790 Anesthesia for intraperitoneal procedures in upper abdomen including laparoscopy; not otherwise specified
00792 partial hepatectomy or management of liver hemorrhage (excluding liver biopsy)
- *CPT Changes: An Insider's View* 2001

00630 Anesthesia for procedures in lumbar region; not otherwise specified
00632 lumbar sympathectomy
00635 diagnostic or therapeutic lumbar puncture
- *CPT Changes: An Insider's View* 2001

00640 Anesthesia for manipulation of the spine or for closed procedures on the cervical, thoracic or lumbar spine
- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Jul 21:8

00670 Anesthesia for extensive spine and spinal cord procedures (eg, spinal instrumentation or vascular procedures)
- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Nov 07:8, Jul 12:13

Upper Abdomen

00700 Anesthesia for procedures on upper anterior abdominal wall; not otherwise specified
- *CPT Assistant* Mar 06:15, Nov 07:8, Oct 11:3, Jul 12:13, Jan 24:36

00702 percutaneous liver biopsy
00730 Anesthesia for procedures on upper posterior abdominal wall
- *CPT Assistant* Jan 24:36

00731 Anesthesia for upper gastrointestinal endoscopic procedures, endoscope introduced proximal to duodenum; not otherwise specified
- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Dec 17:8

00732 endoscopic retrograde cholangiopancreatography (ERCP)
- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Dec 17:8

(For combined upper and lower gastrointestinal endoscopic procedures, use 00813)
00750 Anesthesia for hernia repairs in upper abdomen; not otherwise specified
00752 lumbar and ventral (incisional) hernias and/or wound dehiscence
00754 omphalocele
00756 transabdominal repair of diaphragmatic hernia
00770 Anesthesia for all procedures on major abdominal blood vessels

00790 Anesthesia for intraperitoneal procedures in upper abdomen including laparoscopy; not otherwise specified

00792 partial hepatectomy or management of liver hemorrhage (excluding liver biopsy)

- *CPT Changes: An Insider's View* 2001

00794 pancreatectomy, partial or total (eg, Whipple procedure)

00796 liver transplant (recipient)

(For harvesting of liver, use 01990)

00797 gastric restrictive procedure for morbid obesity

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Nov 07:8, Jul 12:13

Lower Abdomen

00800 Anesthesia for procedures on lower anterior abdominal wall; not otherwise specified

- *CPT Assistant* Mar 06:15, Nov 07:8, Oct 11:3, Jul 12:13

00802 panniculectomy

00811 Anesthesia for lower intestinal endoscopic procedures, endoscope introduced distal to duodenum; not otherwise specified

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Dec 17:8, Nov 24:18

00812 screening colonoscopy

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Dec 17:8, Nov 24:18

(Report 00812 to describe anesthesia for any screening colonoscopy regardless of ultimate findings)

00813 Anesthesia for combined upper and lower gastrointestinal endoscopic procedures, endoscope introduced both proximal to and distal to the duodenum

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Dec 17:8

00820 Anesthesia for procedures on lower posterior abdominal wall

00830 Anesthesia for hernia repairs in lower abdomen; not otherwise specified

00832 ventral and incisional hernias

(For hernia repairs in the infant 1 year of age or younger, see 00834, 00836)

00834 Anesthesia for hernia repairs in the lower abdomen not otherwise specified, younger than 1 year of age

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Dec 17:8

(Do not report 00834 in conjunction with 99100)

00836 Anesthesia for hernia repairs in the lower abdomen not otherwise specified, infants younger than 37 weeks gestational age at birth and younger than 50 weeks gestational age at time of surgery

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Dec 17:8

(Do not report 00836 in conjunction with 99100)

00840 Anesthesia for intraperitoneal procedures in lower abdomen including laparoscopy; not otherwise specified
00842 amniocentesis
00844 abdominoperineal resection
00846 radical hysterectomy
00848 pelvic exenteration
00851 tubal ligation/transection

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Oct 14:14

00860 Anesthesia for extraperitoneal procedures in lower abdomen, including urinary tract; not otherwise specified
00862 renal procedures, including upper one-third of ureter, or donor nephrectomy
00864 total cystectomy
00865 radical prostatectomy (suprapubic, retropubic)
00866 adrenalectomy
00868 renal transplant (recipient)

(For donor nephrectomy, use 00862)

(For harvesting kidney from brain-dead patient, use 01990)

00870 cystolithotomy
00872 Anesthesia for lithotripsy, extracorporeal shock wave; with water bath
00873 without water bath
00880 Anesthesia for procedures on major lower abdominal vessels; not otherwise specified
00882 inferior vena cava ligation

Perineum

(For perineal procedures on integumentary system, muscles and nerves, see 00300, 00400)

00902 Anesthesia for; anorectal procedure

- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Mar 06:15, Oct 11:3, Jul 12:13

00904 radical perineal procedure

00906 vulvectomy

00908 perineal prostatectomy

00910 Anesthesia for transurethral procedures (including urethrocystoscopy); not otherwise specified

00912 transurethral resection of bladder tumor(s)

00914 transurethral resection of prostate

00916 post-transurethral resection bleeding

00918 with fragmentation, manipulation and/or removal of ureteral calculus

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:8, Apr 09:8

00920 Anesthesia for procedures on male genitalia (including open urethral procedures); not otherwise specified

- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Sep 12:16

00921 vasectomy, unilateral or bilateral

- *CPT Changes: An Insider's View* 2003

00922 seminal vesicles

00924 undescended testis, unilateral or bilateral

00926 radical orchiectomy, inguinal

00928 radical orchiectomy, abdominal

00930 orchiopexy, unilateral or bilateral

00932 complete amputation of penis

00934 radical amputation of penis with bilateral inguinal lymphadenectomy

00936 radical amputation of penis with bilateral inguinal and iliac lymphadenectomy

00938 insertion of penile prosthesis (perineal approach)

00940 Anesthesia for vaginal procedures (including biopsy of labia, vagina, cervix or endometrium); not otherwise specified

00942 colpotomy, vaginectomy, colporrhaphy, and open urethral procedures

- *CPT Changes: An Insider's View* 2001, 2002

00944 vaginal hysterectomy

00948 cervical cerclage

00950 culdoscopy

00952 hysteroscopy and/or hysterosalpingography

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:8, Jul 12:13

Pelvis (Except Hip)

01112 Anesthesia for bone marrow aspiration and/or biopsy, anterior or posterior iliac crest

- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Mar 06:15, Oct 11:3, Jul 12:13

01120 Anesthesia for procedures on bony pelvis

01130 Anesthesia for body cast application or revision

01140 Anesthesia for interpelviabdominal (hindquarter) amputation

01150 Anesthesia for radical procedures for tumor of pelvis, except hindquarter amputation

01160 Anesthesia for closed procedures involving symphysis pubis or sacroiliac joint

01170 Anesthesia for open procedures involving symphysis pubis or sacroiliac joint

01173 Anesthesia for open repair of fracture disruption of pelvis or column fracture involving acetabulum

- *CPT Changes: An Insider's View* 2004
- *CPT Assistant* Jun 04:3-4

Upper Leg (Except Knee)

01200 Anesthesia for all closed procedures involving hip joint

- *CPT Assistant* Mar 06:15, Nov 07:8, Jul 12:13

01202 Anesthesia for arthroscopic procedures of hip joint

01210 Anesthesia for open procedures involving hip joint; not otherwise specified

01212 hip disarticulation

01214 total hip arthroplasty

- *CPT Changes: An Insider's View* 2001, 2002

01215 revision of total hip arthroplasty

- *CPT Changes: An Insider's View* 2001, 2002

01220 Anesthesia for all closed procedures involving upper two-thirds of femur
01230 Anesthesia for open procedures involving upper two-thirds of femur; not otherwise specified
01232 amputation
01234 radical resection
01250 Anesthesia for all procedures on nerves, muscles, tendons, fascia, and bursae of upper leg
01260 Anesthesia for all procedures involving veins of upper leg, including exploration
01270 Anesthesia for procedures involving arteries of upper leg, including bypass graft; not otherwise specified
01272 femoral artery ligation
01274 femoral artery embolectomy
CPT Assistant Nov 07:8, Jul 12:13

Knee and Popliteal Area

01320 Anesthesia for all procedures on nerves, muscles, tendons, fascia, and bursae of knee and/or popliteal area
CPT Assistant Mar 06:15, Nov 07:8, Oct 11:3, Jul 12:13
01340 Anesthesia for all closed procedures on lower one-third of femur
01360 Anesthesia for all open procedures on lower one-third of femur
01380 Anesthesia for all closed procedures on knee joint
01382 Anesthesia for diagnostic arthroscopic procedures of knee joint
CPT Changes: An Insider's View 2003
01390 Anesthesia for all closed procedures on upper ends of tibia, fibula, and/or patella
01392 Anesthesia for all open procedures on upper ends of tibia, fibula, and/or patella
01400 Anesthesia for open or surgical arthroscopic procedures on knee joint; not otherwise specified
CPT Changes: An Insider's View 2003
01402 total knee arthroplasty
CPT Changes: An Insider's View 2002
01404 disarticulation at knee
01420 Anesthesia for all cast applications, removal, or repair involving knee joint
01430 Anesthesia for procedures on veins of knee and popliteal area; not otherwise specified
01432 arteriovenous fistula
01440 Anesthesia for procedures on arteries of knee and popliteal area; not otherwise specified
01442 popliteal thromboendarterectomy, with or without patch graft

01444 popliteal excision and graft or repair for occlusion or aneurysm

CPT Assistant Nov 07:8, Jul 12:13

Lower Leg (Below Knee, Includes Ankle and Foot)

01462 Anesthesia for all closed procedures on lower leg, ankle, and foot

CPT Assistant Mar 06:15, Nov 07:8, Oct 11:3, Jul 12:13

01464 Anesthesia for arthroscopic procedures of ankle and/or foot

CPT Changes: An Insider's View 2003

01470 Anesthesia for procedures on nerves, muscles, tendons, and fascia of lower leg, ankle, and foot; not otherwise specified

01472 repair of ruptured Achilles tendon, with or without graft

01474 gastrocnemius recession (eg, Strayer procedure)

01480 Anesthesia for open procedures on bones of lower leg, ankle, and foot; not otherwise specified

01482 radical resection (including below knee amputation)

CPT Changes: An Insider's View 2001

01484 osteotomy or osteoplasty of tibia and/or fibula

01486 total ankle replacement

01490 Anesthesia for lower leg cast application, removal, or repair

01500 Anesthesia for procedures on arteries of lower leg, including bypass graft; not otherwise specified

01502 embolectomy, direct or with catheter

01520 Anesthesia for procedures on veins of lower leg; not otherwise specified

01522 venous thrombectomy, direct or with catheter

CPT Assistant Nov 07:8, Jul 12:13

Shoulder and Axilla

Includes humeral head and neck, sternoclavicular joint, acromioclavicular joint, and shoulder joint.

01610 Anesthesia for all procedures on nerves, muscles, tendons, fascia, and bursae of shoulder and axilla

CPT Assistant Mar 06:15, Nov 07:8, Oct 11:3, Jul 12:13

01620 Anesthesia for all closed procedures on humeral head and neck, sternoclavicular joint, acromioclavicular joint, and shoulder joint

01622 Anesthesia for diagnostic arthroscopic procedures of shoulder joint

CPT Changes: An Insider's View 2003

01630 Anesthesia for open or surgical arthroscopic procedures on humeral head and neck, sternoclavicular joint, acromioclavicular joint, and shoulder joint; not otherwise specified

➔ *CPT Changes: An Insider's View* 2003

01634 shoulder disarticulation

01636 interthoracoscapular (forequarter) amputation

01638 total shoulder replacement

01650 Anesthesia for procedures on arteries of shoulder and axilla; not otherwise specified

01652 axillary-brachial aneurysm

01654 bypass graft

01656 axillary-femoral bypass graft

01670 Anesthesia for all procedures on veins of shoulder and axilla

01680 Anesthesia for shoulder cast application, removal or repair, not otherwise specified

Upper Arm and Elbow

01710 Anesthesia for procedures on nerves, muscles, tendons, fascia, and bursae of upper arm and elbow; not otherwise specified

➔ *CPT Assistant* Mar 06:15, Nov 07:8, Oct 11:3, Jul 12:13

01712 tenotomy, elbow to shoulder, open

01714 tenoplasty, elbow to shoulder

01716 tenodesis, rupture of long tendon of biceps

01730 Anesthesia for all closed procedures on humerus and elbow

01732 Anesthesia for diagnostic arthroscopic procedures of elbow joint

➔ *CPT Changes: An Insider's View* 2003

01740 Anesthesia for open or surgical arthroscopic procedures of the elbow; not otherwise specified

➔ *CPT Changes: An Insider's View* 2003

01742 osteotomy of humerus

01744 repair of nonunion or malunion of humerus

01756 radical procedures

01758 excision of cyst or tumor of humerus

01760 total elbow replacement

01770 Anesthesia for procedures on arteries of upper arm and elbow; not otherwise specified

01772 embolectomy

01780 Anesthesia for procedures on veins of upper arm and elbow; not otherwise specified

01782 phleborrhaphy

➔ *CPT Assistant* Nov 07:8, Jul 12:13

Forearm, Wrist, and Hand

01810 Anesthesia for all procedures on nerves, muscles, tendons, fascia, and bursae of forearm, wrist, and hand

➔ *CPT Assistant* Mar 06:15, Nov 07:8, Oct 11:3, Jul 12:13

01820 Anesthesia for all closed procedures on radius, ulna, wrist, or hand bones

01829 Anesthesia for diagnostic arthroscopic procedures on the wrist

➔ *CPT Changes: An Insider's View* 2003

01830 Anesthesia for open or surgical arthroscopic/endoscopic procedures on distal radius, distal ulna, wrist, or hand joints; not otherwise specified

➔ *CPT Changes: An Insider's View* 2003

01832 total wrist replacement

01840 Anesthesia for procedures on arteries of forearm, wrist, and hand; not otherwise specified

01842 embolectomy

01844 Anesthesia for vascular shunt, or shunt revision, any type (eg, dialysis)

01850 Anesthesia for procedures on veins of forearm, wrist, and hand; not otherwise specified

01852 phleborrhaphy

01860 Anesthesia for forearm, wrist, or hand cast application, removal, or repair

➔ *CPT Assistant* Nov 07:8, Jul 12:13

Radiological Procedures

01916 Anesthesia for diagnostic arteriography/venography

➔ *CPT Changes: An Insider's View* 2002

➔ *CPT Assistant* Nov 07:8, Oct 11:3, Jul 12:13

(Do not report 01916 in conjunction with therapeutic codes 01924-01926, 01930-01933)

01920 Anesthesia for cardiac catheterization including coronary angiography and ventriculography (not to include Swan-Ganz catheter)

01922 Anesthesia for non-invasive imaging or radiation therapy

01924 Anesthesia for therapeutic interventional radiological procedures involving the arterial system; not otherwise specified

- *CPT Changes: An Insider's View* 2002

01925 carotid or coronary

- *CPT Changes: An Insider's View* 2002

01926 intracranial, intracardiac, or aortic

- *CPT Changes: An Insider's View* 2002

01930 Anesthesia for therapeutic interventional radiological procedures involving the venous/lymphatic system (not to include access to the central circulation); not otherwise specified

- *CPT Changes: An Insider's View* 2002

01931 intrahepatic or portal circulation (eg, transvenous intrahepatic portosystemic shunt[s] [TIPS])

- *CPT Changes: An Insider's View* 2002, 2008
- *CPT Assistant* Apr 08:3

01932 intrathoracic or jugular

- *CPT Changes: An Insider's View* 2002

01933 intracranial

- *CPT Changes: An Insider's View* 2002

01937 Anesthesia for percutaneous image-guided injection, drainage or aspiration procedures on the spine or spinal cord; cervical or thoracic

- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Nov 21:10, Jun 22:11-12

01938 lumbar or sacral

- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Nov 21:10, Jun 22:11-12

(For anesthesia for percutaneous image-guided destruction procedures on the spine or spinal cord, see 01939, 01940)

01939 Anesthesia for percutaneous image-guided destruction procedures by neurolytic agent on the spine or spinal cord; cervical or thoracic

- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Nov 21:10, Jun 22:11-12

01940 lumbar or sacral

- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Nov 21:10, Jun 22:11-12

(For anesthesia for percutaneous image-guided injection, drainage or aspiration procedures on the spine or spinal cord, see 01937, 01938)

01941 Anesthesia for percutaneous image-guided neuromodulation or intravertebral procedures (eg, kyphoplasty, vertebroplasty) on the spine or spinal cord; cervical or thoracic

- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Nov 21:10, Jun 22:11-12

01942 lumbar or sacral

- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Nov 21:10, Jun 22:11-12

Burn Excisions or Debridement

01951 Anesthesia for second- and third-degree burn excision or debridement with or without skin grafting, any site, for total body surface area (TBSA) treated during anesthesia and surgery; less than 4% total body surface area

- *CPT Changes: An Insider's View* 2001, 2002
- *CPT Assistant* Mar 06:15, Oct 11:3, Jul 12:13

01952 between 4% and 9% of total body surface area

- *CPT Changes: An Insider's View* 2001, 2002

+ 01953 each additional 9% total body surface area or part thereof (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Jun 11:13, Jul 12:13

(Use 01953 in conjunction with 01952)

Obstetric

01958 Anesthesia for external cephalic version procedure

- *CPT Changes: An Insider's View* 2004
- *CPT Assistant* Jun 04:5-6, Oct 11:3, Jul 12:13

01960 Anesthesia for vaginal delivery only

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Dec 01:3

01961 Anesthesia for cesarean delivery only

- *CPT Changes: An Insider's View* 2002, 2003

01962 Anesthesia for urgent hysterectomy following delivery

- *CPT Changes: An Insider's View* 2002, 2003

01963 Anesthesia for cesarean hysterectomy without any labor analgesia/anesthesia care

- *CPT Changes: An Insider's View* 2002, 2003

01965 Anesthesia for incomplete or missed abortion procedures

- *CPT Changes: An Insider's View* 2006

01966 Anesthesia for induced abortion procedures

- *CPT Changes: An Insider's View* 2006

01967 Neuraxial labor analgesia/anesthesia for planned vaginal delivery (this includes any repeat subarachnoid needle placement and drug injection and/or any necessary replacement of an epidural catheter during labor)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Dec 01:3, Oct 14:14

+ 01968 Anesthesia for cesarean delivery following neuraxial labor analgesia/anesthesia (List separately in addition to code for primary procedure performed)

- *CPT Changes: An Insider's View* 2002, 2003
- *CPT Assistant* Dec 01:3, Jun 11:13, Oct 14:14

(Use 01968 in conjunction with 01967)

+ 01969 Anesthesia for cesarean hysterectomy following neuraxial labor analgesia/anesthesia (List separately in addition to code for primary procedure performed)

- *CPT Changes: An Insider's View* 2002, 2003
- *CPT Assistant* Dec 01:3, Jun 11:13, Jul 12:13

(Use 01969 in conjunction with 01967)

Other Procedures

01990 Physiological support for harvesting of organ(s) from brain-dead patient

- *CPT Assistant* Mar 06:15, Nov 07:8, Oct 11:3, Jul 12:13

01991 Anesthesia for diagnostic or therapeutic nerve blocks and injections (when block or injection is performed by a different physician or other qualified health care professional); other than the prone position

- *CPT Changes: An Insider's View* 2003, 2013

01992 prone position

- *CPT Changes: An Insider's View* 2003, 2013

(Do not report 01991 or 01992 in conjunction with 99151, 99152, 99153, 99155, 99156, 99157)

(When regional intravenous administration of local anesthetic agent or other medication in the upper or lower extremity is used as the anesthetic for a surgical procedure, report the appropriate anesthesia code. To report a Bier block for pain management, use 64999)

(For intra-arterial or intravenous therapy for pain management, see 96373, 96374)

01996 Daily hospital management of epidural or subarachnoid continuous drug administration

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Feb 97:5, Nov 97:10, May 99:6, Jul 12:5, Oct 12:14, May 15:10

(Report code 01996 for daily hospital management of continuous epidural or subarachnoid drug administration performed after insertion of an epidural or subarachnoid catheter)

01999 Unlisted anesthesia procedure(s)

- *CPT Assistant* Feb 97:4, Feb 06:9, Mar 06:15, Jan 07:30, Nov 07:8, Oct 11:3, Jul 12:13, Aug 14:6, 14, May 15:10, Dec 17:8, Oct 19:10, Jul 21:9
- *Clinical Examples in Radiology* Summer 11:2, Winter 13:5, Spring 13:5, Summer 13:5, Spring 14:7, Winter 16:4

Surgery Guidelines

Guidelines to direct general reporting of services are presented in the **Introduction.** Some of the commonalities are repeated here for the convenience of those referring to this section on **Surgery.** Other definitions and items unique to Surgery are also listed.

Services

Services rendered in the office, home, or hospital, consultations, and other medical services are listed in the **Evaluation and Management Services** section (98000-98016, 99202-99499) beginning on page 15. “Special Services, Procedures and Reports” (99000-99082) are listed in the **Medicine** section.

CPT Surgical Package Definition

By their very nature, the services to any patient are variable. The CPT codes that represent a readily identifiable surgical procedure thereby include, on a procedure-by-procedure basis, a variety of services. In defining the specific services “included” in a given CPT surgical code, the following services related to the surgery when furnished by the physician or other qualified health care professional who performs the surgery are included in addition to the operation per se:

- Evaluation and Management (E/M) service(s) subsequent to the decision for surgery on the day before and/or day of surgery (including history and physical)
- Local infiltration, metacarpal/metatarsal/digital block or topical anesthesia
- Immediate postoperative care, including dictating operative notes, talking with the family and other physicians or other qualified health care professionals
- Writing orders
- Evaluating the patient in the postanesthesia recovery area
- Typical postoperative follow-up care

Follow-Up Care for Diagnostic Procedures

Follow-up care for diagnostic procedures (eg, endoscopy, arthroscopy, injection procedures for radiography) includes only that care related to recovery from the diagnostic procedure itself. Care of the condition for which the diagnostic procedure was performed or of other concomitant conditions is not included and may be listed separately.

Follow-Up Care for Therapeutic Surgical Procedures

Follow-up care for therapeutic surgical procedures includes only that care which is usually a part of the surgical service. Complications, exacerbations, recurrence, or the presence of other diseases or injuries requiring additional services should be separately reported.

Supplied Materials

Supplies and materials (eg, sterile trays/drugs), over and above those usually included with the procedure(s) rendered are reported separately. List drugs, trays, supplies, and materials provided. Identify as 99070 or specific supply code.

Reporting More Than One Procedure/Service

When more than one procedure/service is performed on the same date, same session or during a post-operative period (subject to the “surgical package” concept), several CPT modifiers may apply (see Appendix A for definition).

Separate Procedure

Some of the procedures or services listed in the CPT codebook that are commonly carried out as an integral component of a total service or procedure have been identified by the inclusion of the term “separate procedure.” The codes designated as “separate procedure” should not be reported in addition to the code for the total procedure or service of which it is considered an integral component.

However, when a procedure or service that is designated as a "separate procedure" is carried out independently or considered to be unrelated or distinct from other procedures/services provided at that time, it may be reported by itself, or in addition to other procedures/services by appending modifier 59 to the specific "separate procedure" code to indicate that the procedure is not considered to be a component of another procedure, but is a distinct, independent procedure. This may represent a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries).

Unlisted Service or Procedure

A service or procedure may be provided that is not listed in this edition of the CPT codebook. When reporting such a service, the appropriate "Unlisted Procedure" code may be used to indicate the service, identifying it by "Special Report" as discussed in the section below. The "Unlisted Procedures" and accompanying codes for **Surgery** are as follows:

15999 Unlisted procedure, excision pressure ulcer
17999 Unlisted procedure, skin, mucous membrane and subcutaneous tissue
19499 Unlisted procedure, breast
20999 Unlisted procedure, musculoskeletal system, general
21089 Unlisted maxillofacial prosthetic procedure
21299 Unlisted craniofacial and maxillofacial procedure
21499 Unlisted musculoskeletal procedure, head
21899 Unlisted procedure, neck or thorax
22899 Unlisted procedure, spine
22999 Unlisted procedure, abdomen, musculoskeletal system
23929 Unlisted procedure, shoulder
24999 Unlisted procedure, humerus or elbow
25999 Unlisted procedure, forearm or wrist
26989 Unlisted procedure, hands or fingers
27299 Unlisted procedure, pelvis or hip joint
27599 Unlisted procedure, femur or knee
27899 Unlisted procedure, leg or ankle
28899 Unlisted procedure, foot or toes
29799 Unlisted procedure, casting or strapping
29999 Unlisted procedure, arthroscopy

30999 Unlisted procedure, nose
31299 Unlisted procedure, accessory sinuses
31599 Unlisted procedure, larynx
31899 Unlisted procedure, trachea, bronchi
32999 Unlisted procedure, lungs and pleura
33999 Unlisted procedure, cardiac surgery
36299 Unlisted procedure, vascular injection
37501 Unlisted vascular endoscopy procedure
37799 Unlisted procedure, vascular surgery
38129 Unlisted laparoscopy procedure, spleen
38589 Unlisted laparoscopy procedure, lymphatic system
38999 Unlisted procedure, hemic or lymphatic system
39499 Unlisted procedure, mediastinum
39599 Unlisted procedure, diaphragm
40799 Unlisted procedure, lips
40899 Unlisted procedure, vestibule of mouth
41599 Unlisted procedure, tongue, floor of mouth
41899 Unlisted procedure, dentoalveolar structures
42299 Unlisted procedure, palate, uvula
42699 Unlisted procedure, salivary glands or ducts
42999 Unlisted procedure, pharynx, adenoids, or tonsils
43289 Unlisted laparoscopy procedure, esophagus
43499 Unlisted procedure, esophagus
43659 Unlisted laparoscopy procedure, stomach
43999 Unlisted procedure, stomach
44238 Unlisted laparoscopy procedure, intestine (except rectum)
44799 Unlisted procedure, small intestine
44899 Unlisted procedure, Meckel's diverticulum and the mesentery
44979 Unlisted laparoscopy procedure, appendix
45399 Unlisted procedure, colon
45499 Unlisted laparoscopy procedure, rectum
45999 Unlisted procedure, rectum
46999 Unlisted procedure, anus
47379 Unlisted laparoscopic procedure, liver

47399 Unlisted procedure, liver
47579 Unlisted laparoscopy procedure, biliary tract
47999 Unlisted procedure, biliary tract
48999 Unlisted procedure, pancreas
49329 Unlisted laparoscopy procedure, abdomen, peritoneum and omentum
49659 Unlisted laparoscopy procedure, hernioplasty, herniorrhaphy, herniotomy
49999 Unlisted procedure, abdomen, peritoneum and omentum
50549 Unlisted laparoscopy procedure, renal
50949 Unlisted laparoscopy procedure, ureter
51999 Unlisted laparoscopy procedure, bladder
53899 Unlisted procedure, urinary system
54699 Unlisted laparoscopy procedure, testis
55559 Unlisted laparoscopy procedure, spermatic cord
55899 Unlisted procedure, male genital system
58578 Unlisted laparoscopy procedure, uterus
58579 Unlisted hysteroscopy procedure, uterus
58679 Unlisted laparoscopy procedure, oviduct, ovary
58999 Unlisted procedure, female genital system (nonobstetrical)
59897 Unlisted fetal invasive procedure, including ultrasound guidance, when performed
59898 Unlisted laparoscopy procedure, maternity care and delivery
59899 Unlisted procedure, maternity care and delivery
60659 Unlisted laparoscopy procedure, endocrine system
60699 Unlisted procedure, endocrine system
64999 Unlisted procedure, nervous system
66999 Unlisted procedure, anterior segment of eye
67299 Unlisted procedure, posterior segment
67399 Unlisted procedure, extraocular muscle
67599 Unlisted procedure, orbit
67999 Unlisted procedure, eyelids
68399 Unlisted procedure, conjunctiva
68899 Unlisted procedure, lacrimal system
69399 Unlisted procedure, external ear
69799 Unlisted procedure, middle ear
69949 Unlisted procedure, inner ear

69979 Unlisted procedure, temporal bone, middle fossa approach

Special Report

A service that is rarely provided, unusual, variable, or new may require a special report. Pertinent information should include an adequate definition or description of the nature, extent, and need for the procedure, and the time, effort, and equipment necessary to provide the service.

Imaging Guidance

When imaging guidance or imaging supervision and interpretation is included in a surgical procedure, guidelines for image documentation and report, included in the guidelines for Radiology (Including Nuclear Medicine and Diagnostic Ultrasound), will apply. Imaging guidance should not be reported for use of a nonimaging-guided tracking or localizing system (eg, radar signals, electromagnetic signals). Imaging guidance should only be reported when an imaging modality (eg, radiography, fluoroscopy, ultrasonography, magnetic resonance imaging, computed tomography, or nuclear medicine) is used and is appropriately documented.

Surgical Destruction

Surgical destruction is a part of a surgical procedure and different methods of destruction are not ordinarily listed separately unless the technique substantially alters the standard management of a problem or condition. Exceptions under special circumstances are provided for by separate code numbers.

Foreign Body/Implant Definition

An object intentionally placed by a physician or other qualified health care professional for any purpose (eg, diagnostic or therapeutic) is considered an implant. An object that is unintentionally placed (eg, trauma or ingestion) is considered a foreign body. If an implant (or part thereof) has moved from its original position or is structurally broken and no longer serves its intended purpose or presents a hazard to the patient, it qualifies as a foreign body for coding purposes, unless CPT coding instructions direct otherwise or a specific CPT code exists to describe the removal of that broken/moved implant.

►Graft Procurement◄

►Codes that include obtaining or harvesting a graft include the work of procuring the graft from the patient during the same operative session.◄

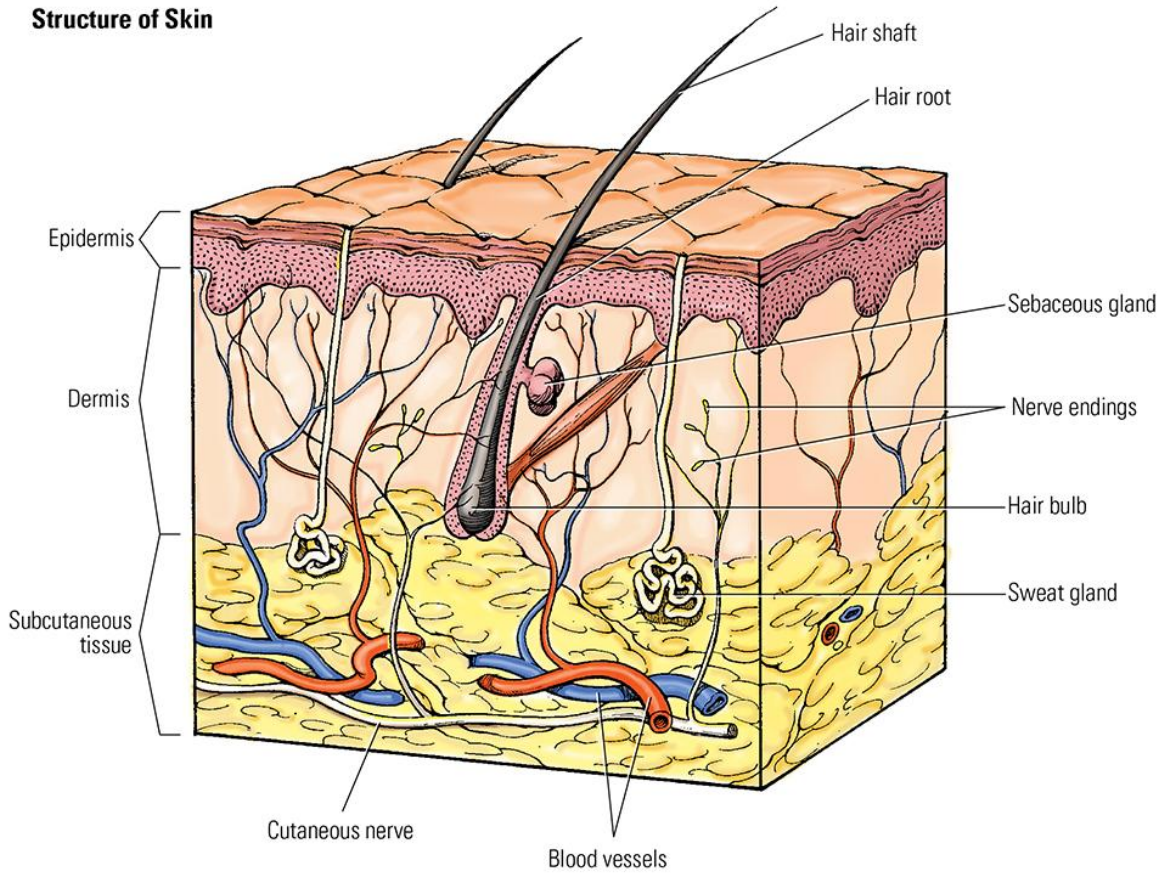
Surgery

The following is a listing of headings and subheadings that appear within the Integumentary System section of the CPT codebook. The subheadings or subsections denoted with asterisks (*) below have special instructions unique to that subsection. Where these are indicated, special notes or guidelines will be presented preceding those procedural terminology listings, referring to that subsection specifically. Note that all code ranges in each subsection are listed as they appear in the subsection, even if the code numbers are out of numerical sequence and/or repeated in the next subsection.

General (10021-10012)

Fine Needle Aspiration (FNA) Biopsy* (10021-10012)

Integumentary System (10030-19499)



Skin, Subcutaneous, and Accessory Structures (10030-11646)

- Introduction and Removal (10030-10036)

- Mastectomy Procedures* (19300-19307)
- Repair and/or Reconstruction* (19316-19396)
- Other Procedures (19499)

Surgery

General

Fine Needle Aspiration (FNA) Biopsy

A **fine needle aspiration** (FNA) biopsy is performed when material is aspirated with a fine needle and the cells are examined cytologically. A **core needle biopsy** is typically performed with a larger bore needle to obtain a core sample of tissue for histopathologic evaluation. FNA biopsy procedures are performed with or without imaging guidance. Imaging guidance codes (eg, 76942, 77002, 77012, 77021) may not be reported separately with 10004, 10005, 10006, 10007, 10008, 10009, 10010, 10011, 10012, 10021. Codes 10004, 10005, 10006, 10007, 10008, 10009, 10010, 10011, 10012, 10021 are reported once per lesion sampled in a single session. When more than one FNA biopsy is performed on separate lesions at the same session, same day, same imaging modality, use the appropriate imaging modality add-on code for the second and subsequent lesion(s). When more than one FNA biopsy is performed on separate lesions, same session, same day, using different imaging modalities, report the corresponding primary code with modifier 59 for each additional imaging modality and corresponding add-on codes for subsequent lesions sampled. This instruction applies regardless of whether the lesions are ipsilateral or contralateral to each other, and/or whether they are in the same or different organs/structures. When FNA biopsy and core needle biopsy both are performed on the same lesion, same session, same day using the same type of imaging guidance, do not separately report the imaging guidance for the core needle biopsy. When FNA biopsy is performed on one lesion and core needle biopsy is performed on a separate lesion, same session, same day using the same type of imaging guidance, both the core needle biopsy and the imaging guidance for the core needle biopsy may be reported separately with modifier 59. When FNA biopsy is performed on one lesion and core needle biopsy is performed on a separate lesion, same session, same day using different types of imaging guidance, both the core needle biopsy and the imaging guidance for the core needle biopsy may be reported with modifier 59.

10004 Code is out of numerical sequence. See 10021-10035
10005 Code is out of numerical sequence. See 10021-10035
10006 Code is out of numerical sequence. See 10021-10035
10007 Code is out of numerical sequence. See 10021-10035
10008 Code is out of numerical sequence. See 10021-10035
10009 Code is out of numerical sequence. See 10021-10035
10010 Code is out of numerical sequence. See 10021-10035
10011 Code is out of numerical sequence. See 10021-10035

10012 Code is out of numerical sequence. See 10021-10035

10021 Fine needle aspiration biopsy, without imaging guidance; first lesion

- *CPT Changes: An Insider's View* 2002, 2019
- *CPT Assistant* Aug 02:10, Mar 05:11, Apr 19:4, May 19:10
- *Clinical Examples in Radiology* Fall 08:4, Fall 10:3, 8, Spring 14:3, Winter 17:4

#+ 10004 each additional lesion (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Feb 19:8, Apr 19:4, Feb 22:13
- *Clinical Examples in Radiology* Winter 19:2

(Use 10004 in conjunction with 10021)

(Do not report 10004, 10021 in conjunction with 10005, 10006, 10007, 10008, 10009, 10010, 10011, 10012 for the same lesion)

(For evaluation of fine needle aspirate, see 88172, 88173, 88177)

 # 10005 Fine needle aspiration biopsy, including ultrasound guidance; first lesion

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Feb 19:8, Apr 19:4, May 19:10, Mar 23:1
- *Clinical Examples in Radiology* Winter 19:2, Summer 19:10

#+ 10006 each additional lesion (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Feb 19:8, Apr 19:4
- *Clinical Examples in Radiology* Winter 19:2

(Use 10006 in conjunction with 10005)

(Do not report 10005, 10006 in conjunction with 76942)

(For evaluation of fine needle aspirate, see 88172, 88173, 88177)

 # 10007 Fine needle aspiration biopsy, including fluoroscopic guidance; first lesion

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Feb 19:8, Apr 19:4
- *Clinical Examples in Radiology* Spring 22:10

#+ 10008 each additional lesion (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Feb 19:8, Apr 19:4
- *Clinical Examples in Radiology* Winter 19:2

(Use 10008 in conjunction with 10007)

(Do not report 10007, 10008 in conjunction with 77002)

(For evaluation of fine needle aspirate, see 88172, 88173, 88177)

 # 10009 Fine needle aspiration biopsy, including CT guidance; first lesion

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Feb 19:8, Apr 19:4
- *Clinical Examples in Radiology* Spring 22:10

#+ 10010 each additional lesion (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Feb 19:8, Apr 19:4
- *Clinical Examples in Radiology* Winter 19:2

(Use 10010 in conjunction with 10009)

(Do not report 10009, 10010 in conjunction with 77012)

(For evaluation of fine needle aspirate, see 88172, 88173, 88177)

 # 10011 Fine needle aspiration biopsy, including MR guidance; first lesion

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Feb 19:8, Apr 19:4
- *Clinical Examples in Radiology* Winter 19:2

#+ 10012 each additional lesion (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Feb 19:8, Apr 19:4
- *Clinical Examples in Radiology* Winter 19:2

(Use 10012 in conjunction with 10011)

(Do not report 10011, 10012 in conjunction with 77021)

(For evaluation of fine needle aspirate, see 88172, 88173, 88177)

(For percutaneous needle biopsy other than fine needle aspiration, see 19081-19086 for breast, 20206 for muscle, 32400 for pleura, 32408 for lung or mediastinum, 42400 for salivary gland, 47000 for liver, 48102 for pancreas, 49180 for abdominal or retroperitoneal mass, 50200 for kidney, 54500 for testis, 54800 for epididymis, 60100 for thyroid, 62267 for nucleus pulposus, intervertebral disc, or paravertebral tissue, 62269 for spinal cord)

(For percutaneous image-guided fluid collection drainage by catheter of soft tissue [eg, extremity, abdominal wall, neck], use 10030)

Integumentary System

Skin, Subcutaneous, and Accessory Structures

Introduction and Removal

10030 Image-guided fluid collection drainage by catheter (eg, abscess, hematoma, seroma, lymphocele, cyst), soft tissue (eg, extremity, abdominal wall, neck), percutaneous

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* May 14:3, 9, Aug 17:9, Mar 24:26
- *Clinical Examples in Radiology* Fall 13:6, Summer 14:9, Spring 15:8, Winter 16:10, Fall 18:15

(Report 10030 for each individual collection drained with a separate catheter)

(Do not report 10030 in conjunction with 75989, 76942, 77002, 77003, 77012, 77021)

(For image-guided fluid collection drainage, percutaneous or transvaginal/transrectal of visceral, peritoneal, or retroperitoneal collections, see 49405-49407)

Soft tissue-marker placement with imaging guidance is reported with 10035 and 10036. If a more specific site descriptor than soft tissue is applicable (eg, breast), use the site-specific codes for marker placement at that site. Report 10035 and 10036 only once per target, regardless of how many markers (eg, clips, wires, pellets, radioactive seeds) are used to mark that target.

10035 Placement of soft tissue localization device(s) (eg, clip, metallic pellet, wire/needle, radioactive seeds), percutaneous, including imaging guidance; first lesion

- *CPT Changes: An Insider's View* 2016
- *CPT Assistant* Jun 16:3
- *Clinical Examples in Radiology* Winter 16:4, Summer 19:10, Winter 23:16

+ 10036 each additional lesion (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2016
- *CPT Assistant* Jun 16:3
- *Clinical Examples in Radiology* Winter 16:5, Summer 19:10, Winter 23:16

(Use 10036 in conjunction with 10035)

(Do not report 10035, 10036 in conjunction with 76942, 77002, 77012, 77021)

(To report a second procedure on the same side or contralateral side, use 10036)

Incision and Drainage

(For excision, see 11400, et seq)

▲ **10040** Extraction (eg, marsupialization, opening or removal of multiple milia, comedones, cysts, pustules)

- *CPT Changes: An Insider's View* 2026
- *CPT Assistant* Fall 92:10, Feb 08:8

10060 Incision and drainage of abscess (eg, carbuncle, suppurative hidradenitis, cutaneous or subcutaneous abscess, cyst, furuncle, or paronychia); simple or single

- *CPT Assistant* Sep 12:10, Oct 21:13, Apr 23:25, Jan 24:37

10061 complicated or multiple

- *CPT Assistant* Sep 12:10, Oct 21:13, Apr 23:25

10080 Incision and drainage of pilonidal cyst; simple

- *CPT Assistant* Fall 92:13, Dec 06:15, May 07:5

10081 complicated

- *CPT Assistant* Fall 92:13, Dec 06:15, May 07:5

(For excision of pilonidal cyst, see 11770-11772)

10120 Incision and removal of foreign body, subcutaneous tissues; simple

- *CPT Assistant* Sep 12:10, Apr 13:10, Dec 13:16

10121 complicated

- *CPT Assistant* Spring 91:7, Dec 06:15, Sep 12:10, Dec 13:16, Apr 21:6

(To report wound exploration due to penetrating trauma without laparotomy or thoracotomy, see 20100-20103, as appropriate)

(To report debridement associated with open fracture(s) and/or dislocation(s), use 11010-11012, as appropriate)

10140 Incision and drainage of hematoma, seroma or fluid collection

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Nov 14:5

10160 Puncture aspiration of abscess, hematoma, bulla, or cyst

10180 Incision and drainage, complex, postoperative wound infection

- *CPT Assistant* Nov 14:5

(For secondary closure of surgical wound, see 12020, 12021, 13160)

Debridement

Wound debridements (11042-11047) are reported by depth of tissue that is removed and by surface area of the wound. These services may be reported for injuries, infections, wounds and chronic ulcers. When performing debridement of a single wound, report depth using the deepest level of tissue removed. In multiple wounds, sum the surface area of those wounds that are at the same depth, but do not combine sums from different depths. For example: When bone is debrided from a 4 sq cm heel ulcer and from a 10 sq cm ischial ulcer, report the work with a single code, 11044. When subcutaneous tissue is debrided from a 16 sq cm dehisced abdominal wound and a 10 sq cm thigh wound, report the work with 11042 for the first 20 sq cm and 11045 for the second 6 sq cm. If all four wounds were debrided on the same day, use modifier 59 with either 11042, or 11044 as appropriate.

(For dermabrasions, see 15780-15783)

(For nail debridement, see 11720-11721)

(For burn(s), see 16000-16035)

(For pressure ulcers, see 15920-15999)

Coding Tip

Use of Depth and Surface Area For Reporting Debridement of Wounds

When performing debridement of a single wound, report depth using the deepest level of tissue removed. In multiple wounds, sum the surface area of those wounds that are at the same depth, but do not combine sums from different depths.

CPT Coding Guidelines, Debridement

11000 Debridement of extensive eczematous or infected skin; up to 10% of body surface

CPT Assistant May 99:10, Oct 12:3, Feb 18:10

(For abdominal wall or genitalia debridement for necrotizing soft tissue infection, see 11004-11006)

+ 11001 each additional 10% of the body surface, or part thereof (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2009

CPT Assistant May 99:10, Oct 12:3, Feb 18:10

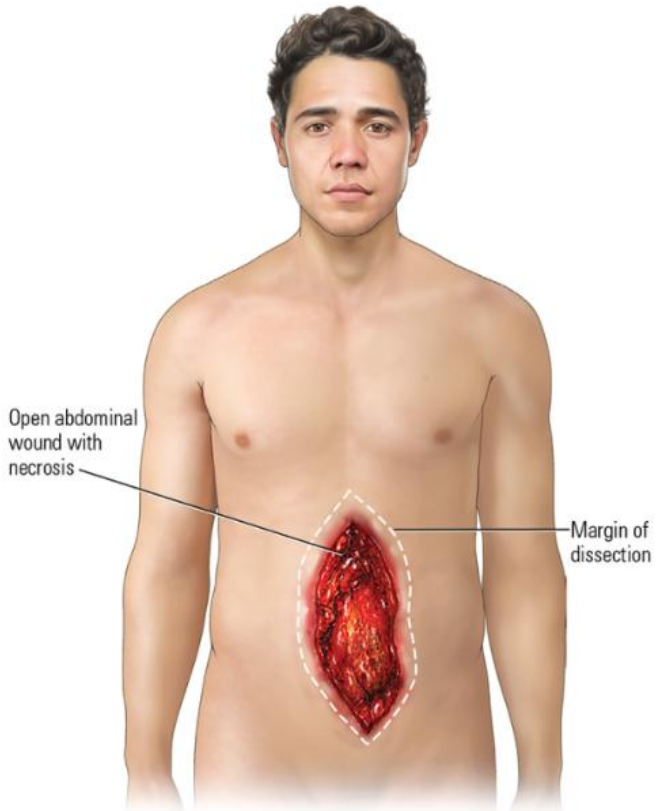
(Use 11001 in conjunction with 11000)

11004 Debridement of skin, subcutaneous tissue, muscle and fascia for necrotizing soft tissue infection; external genitalia and perineum

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* Jan 12:6, Oct 12:3, Oct 13:15, Feb 18:10, Nov 19:14, Jun 23:25

11005 abdominal wall, with or without fascial closure

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* Jan 12:6, Oct 12:3, Oct 13:15, Feb 18:10, Nov 19:14



11006 external genitalia, perineum and abdominal wall, with or without fascial closure

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* Jan 12:6, Oct 12:3, Oct 13:15, Nov 19:14

(If orchiectomy is performed, use 54520)

(If testicular transplantation is performed, use 54680)

Debridement of Abdominal Wall
11005

+ 11008 Removal of prosthetic material or mesh, abdominal wall for infection (eg, for chronic or recurrent mesh infection or necrotizing soft tissue infection) (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2005, 2008
- *CPT Assistant* Jan 12:6, Oct 12:3

(Use 11008 in conjunction with 10180, 11004-11006)

(Report skin grafts or flaps separately when performed for closure at the same session as 11004-11008)

(For implantation of absorbable mesh or other prosthesis for delayed closure of external genitalia, perineum, and/or abdominal wall defect[s] due to soft tissue infection or trauma, use 15778)

11010 Debridement including removal of foreign material at the site of an open fracture and/or an open dislocation (eg, excisional debridement); skin and subcutaneous tissues

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Mar 97:2, Apr 97:10, Aug 97:6, Oct 03:10, May 11:3, Oct 12:13

11011 skin, subcutaneous tissue, muscle fascia, and muscle

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Mar 97:2, Apr 97:10, Aug 97:6, May 11:3, Oct 12:13

11012 skin, subcutaneous tissue, muscle fascia, muscle, and bone

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Mar 97:2, Apr 97:10, Aug 97:6, Oct 03:10, May 11:3, Oct 12:13

(For debridement of skin [ie, epidermis and/or dermis only], see 97597, 97598)

(For active wound care management, see 97597, 97598)

(For debridement of burn wounds, see 16020-16030)

11042 Debridement, subcutaneous tissue (includes epidermis and dermis, if performed); first 20 sq cm or less

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Winter 92:10, May 96:6, Feb 97:7, Aug 97:6, Jun 05:1, 10, Oct 07:15, Nov 10:9, May 11:3, Sep 11:11, Jan 12:6, Mar 12:3, Oct 12:13, Feb 13:16, Sep 13:17, Oct 13:15, Nov 14:5, Feb 16:14, Aug 16:9, Oct 16:3, Aug 22:16, Nov 24:18

(For debridement of skin [ie, epidermis and/or dermis only], see 97597, 97598)

#+ 11045 each additional 20 sq cm, or part thereof (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* May 11:3, Sep 11:11, Jan 12:6, Mar 12:3, Oct 12:13, Nov 14:5, Aug 16:9, Oct 16:3, Nov 24:18

(Use 11045 in conjunction with 11042)

11043 Debridement, muscle and/or fascia (includes epidermis, dermis, and subcutaneous tissue, if performed); first 20 sq cm or less

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* May 96:6, Feb 97:7, Apr 97:11, Aug 97:6, Dec 99:10, Jun 05:1, 10, Oct 07:15, Nov 10:9, May 11:3, Sep 11:11, Jan 12:6, Mar 12:3, Oct 12:13, Feb 13:16, Nov 14:5, Aug 16:9, Oct 16:3, Mar 20:14, Nov 24:18

#+ 11046 each additional 20 sq cm, or part thereof (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* May 11:3, Sep 11:11, Jan 12:6, Mar 12:3, Oct 12:13, Feb 13:16, Nov 14:5, Aug 16:9, Oct 16:3, Nov 24:18

(Use 11046 in conjunction with 11043)

11044 Debridement, bone (includes epidermis, dermis, subcutaneous tissue, muscle and/or fascia, if performed); first 20 sq cm or less

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Fall 93:21, Mar 96:10, May 96:6, Feb 97:7, Apr 97:11, Aug 97:6, Jun 05:1, 10, Oct 07:15, Nov 10:9, May 11:3, Sep 11:11, Jan 12:6, Mar 12:3, Oct 12:13, Feb 13:16, Nov 14:5, Aug 16:9, Oct 16:3, Nov 24:18

11045 Code is out of numerical sequence. See 11012-11047

11046 Code is out of numerical sequence. See 11012-11047

+ 11047 each additional 20 sq cm, or part thereof (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* May 11:3, Sep 11:11, Jan 12:6, Mar 12:3, Oct 12:13, Nov 14:5, Aug 16:9, Oct 16:3, Aug 22:16, Nov 24:18

(Do not report 11042-11047 in conjunction with 97597-97602 for the same wound)

(Use 11047 in conjunction with 11044)

Paring or Cutting

(To report destruction of benign lesions other than skin tags or cutaneous vascular proliferative lesions, see 17110, 17111)

11055 Paring or cutting of benign hyperkeratotic lesion (eg, corn or callus); single lesion

- *CPT Assistant* Nov 97:11, Jan 99:11, Sep 24:24, Mar 25:1

11056 2 to 4 lesions

- *CPT Assistant* Nov 97:11, Jan 99:11, Sep 10:9, Mar 25:1

11057 more than 4 lesions

- *CPT Assistant* Nov 97:11, Jan 99:11, May 99:10, Mar 25:1

Biopsy

The use of a biopsy procedure code (eg, 11102, 11103, 11104, 11105, 11106, 11107) indicates that the procedure to obtain tissue solely for diagnostic histopathologic examination was performed independently, or was unrelated or distinct from other procedures/services provided at that time. Biopsies performed on different lesions or different sites on the same date of service may be reported separately, as they are not considered components of other procedures.

During certain surgical procedures in the integumentary system, such as excision, destruction, or shave removals, the removed tissue is often submitted for pathologic examination. The obtaining of tissue for pathology during the course of these procedures is a routine component of such procedures. This obtaining of tissue is not considered a separate biopsy procedure and is not separately reported.

Partial-thickness biopsies are those that sample a portion of the thickness of skin or mucous membrane and do not penetrate below the dermis or lamina propria. Full-thickness biopsies penetrate into tissue deep to the dermis or lamina propria, into the subcutaneous or submucosal space.

Sampling of stratum corneum only, by any modality (eg, skin scraping, tape stripping) does not constitute a skin biopsy procedure and is not separately reportable.

An appropriate biopsy technique is selected based on optimal tissue-sampling considerations for the type of neoplastic, inflammatory, or other lesion requiring a tissue diagnosis. Biopsy of the skin is reported under three distinct techniques:

Tangential biopsy **(eg, shave, scoop, saucerize, curette)** is performed with a sharp blade, such as a flexible biopsy blade, obliquely oriented scalpel or curette to remove a sample of epidermal tissue with or without portions of underlying dermis. The intent of a tangential biopsy (11102, 11103) is to obtain a tissue sample from a lesion for the purpose of diagnostic pathologic examination. Biopsy of lesions by tangential technique (11102, 11103) is not considered an excision. Tangential biopsy technique may be represented by a superficial sample and does not involve the full thickness of the dermis, which could result in portions of the lesion remaining in the deeper layers of the dermis.

For therapeutic removal of epidermal or dermal lesion(s) using shave technique, see 11300-11313.

An indication for a shave removal (11300-11313) procedure may include a symptomatic lesion that rubs on waistband or bra, or any other reason why an elevated lesion is being completely removed with the shave technique, suggesting a therapeutic intent. It is the responsibility of the physician or qualified health care professional performing the procedure to clearly indicate the purpose of the procedure.

Punch biopsy requires a punch tool to remove a full-thickness cylindrical sample of skin. The intent of a punch biopsy (11104, 11105) is to obtain a cylindrical tissue sample of a cutaneous lesion for the purpose of diagnostic pathologic examination. Simple closure of the defect is included in the service. Manipulation of the biopsy defect to improve wound approximation is included in simple closure.

Incisional biopsy requires the use of a sharp blade (not a punch tool) to remove a full-thickness sample of tissue via a vertical incision or wedge, penetrating deep to the dermis, into the subcutaneous space. The intent of an incisional biopsy (11106, 11107) is to obtain a full-thickness tissue sample of a skin lesion for the purpose of diagnostic pathologic examination. This type of biopsy may sample subcutaneous fat, such as those performed for the evaluation of panniculitis. Although closure is usually performed on incisional biopsies, simple closure is not separately reported.

(For complete lesion excision with margins, see 11400-11646)

When multiple biopsy techniques are performed during the same encounter, only one primary lesion biopsy code (11102, 11104, 11106) is reported. Additional biopsy codes should be selected based on the following convention:

If multiple biopsies of the same type are performed, the primary code for that biopsy should be used along with the corresponding add-on code(s).

If an incisional biopsy is performed, report 11106 in combination with a tangential (11103), punch (11105), or incisional biopsy (11107) for the additional biopsy procedures.

If a punch biopsy is performed, report 11104 in combination with a tangential (11103), or punch (11105), for the additional biopsy procedures.

If multiple tangential biopsies are performed, report tangential biopsy (11102) in combination with 11103 for the additional tangential biopsy procedures.

When two or more biopsies of the same technique (ie, tangential, punch, or incisional) are performed on separate/additional lesions, use the appropriate add-on code (11103, 11105, 11107) to specify each additional biopsy. When two or three different biopsy techniques (ie, tangential, punch, or incisional) are performed to sample separate/additional lesions, select the appropriate biopsy code (11102, 11104, 11106) plus an additional add-on code (11103, 11105, 11107) for each additional biopsy performed.

The following table provides an illustration of the appropriate use of these codes for multiple biopsies:

Procedures Performed	CPT Code(s) Reported
2 tangential biopsies	11102 X 1, 11103 X 1
3 punch biopsies	11104 X 1, 11105 X 2
2 incisional biopsies	11106 X 1, 11107 X 1
1 incisional biopsy, 1 tangential biopsy and 1 punch biopsy	11106 X 1, 11103 X 1, 11105 X 1
1 punch biopsy and 2 tangential biopsies	11104 X 1, 11103 X 2

(For biopsy of nail unit, use 11755)

(For biopsy, intranasal, use 30100)

(For biopsy of lip, use 40490)

(For biopsy of vestibule of mouth, use 40808)

(For biopsy of tongue, anterior two-thirds, use 41100)

(For biopsy of floor of mouth, use 41108)

(For biopsy of penis, use 54100)

(For biopsy of vulva or perineum, see 56605, 56606)

(For biopsy of eyelid skin including lid margin, use 67810)

(For biopsy of conjunctiva, use 68100)

(For biopsy of ear, use 69100)

11102 Tangential biopsy of skin (eg, shave, scoop, saucerize, curette); single lesion

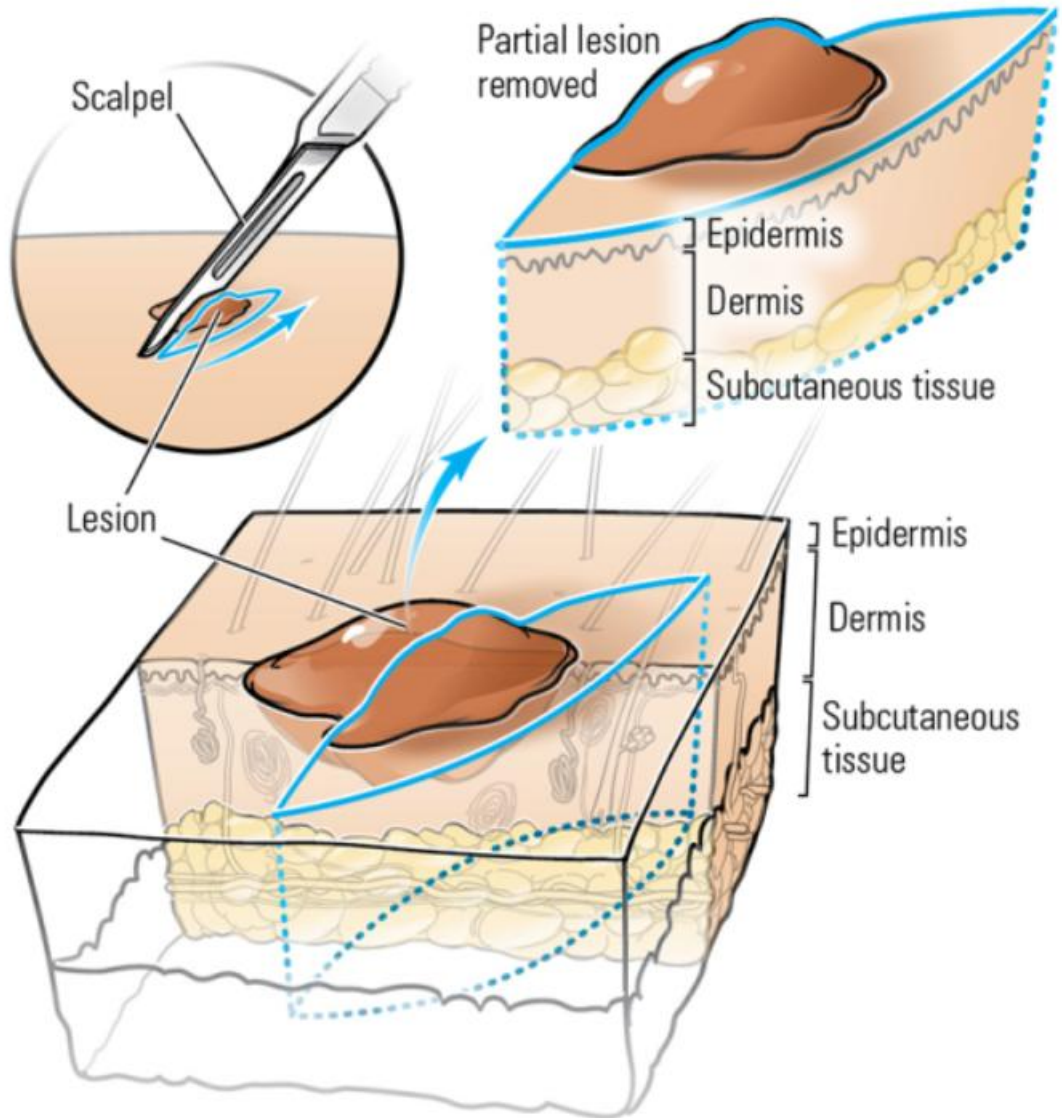
(Report 11107 in conjunction with 11106)

Punch Biopsy of Skin

11104, 11105



Punch biopsy of skin shown with punch device.

Incisional Biopsy of Skin

11106, 11107

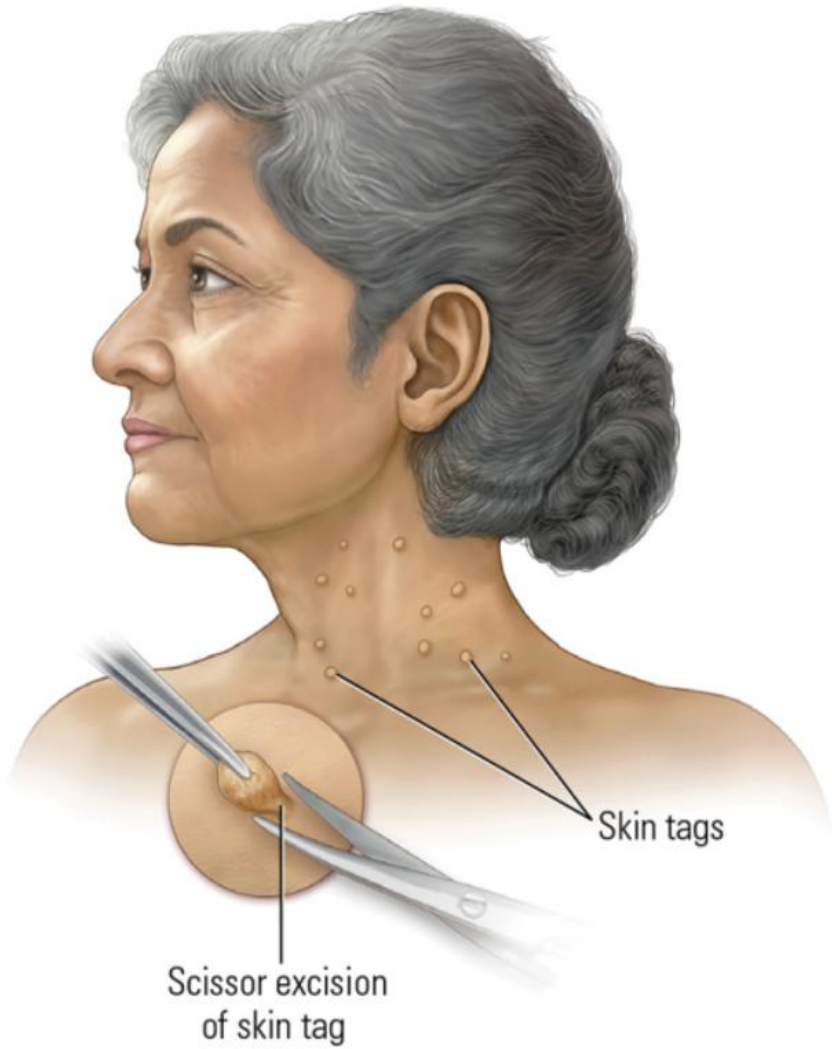
Incisional biopsy of skin shown with scalpel.

Removal of Skin Tags

Removal by scissoring or any sharp method, ligature strangulation, electrosurgical destruction or combination of treatment modalities, including chemical destruction or electrocauterization of wound, with or without local anesthesia.

11200 Removal of skin tags, multiple fibrocutaneous tags, any area; up to and including 15 lesions

- *CPT Assistant* Winter 90:3, Nov 97:11-12, Nov 02:11, Aug 09:7, Jun 11:13



+ 11201 each additional 10 lesions, or part thereof (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2009
- *CPT Assistant* Winter 90:3, Nov 97:11-12, Nov 02:11, Jun 11:13

(Use 11201 in conjunction with 11200)

Removal of Skin Tags

11200, 11201

Shaving of Epidermal or Dermal Lesions

Shaving is the sharp removal by transverse incision or horizontal slicing to remove epidermal and dermal lesions without a full-thickness dermal excision. This includes local anesthesia, chemical or electrocauterization of the wound. The wound does not require suture closure.

11300 Shaving of epidermal or dermal lesion, single lesion, trunk, arms or legs; lesion diameter 0.5 cm or less

➔ *CPT Assistant* Feb 00:11, Nov 02:11, Feb 08:1, Dec 17:14, Feb 18:10, Jan 19:9, Jun 21:6, Mar 25:1

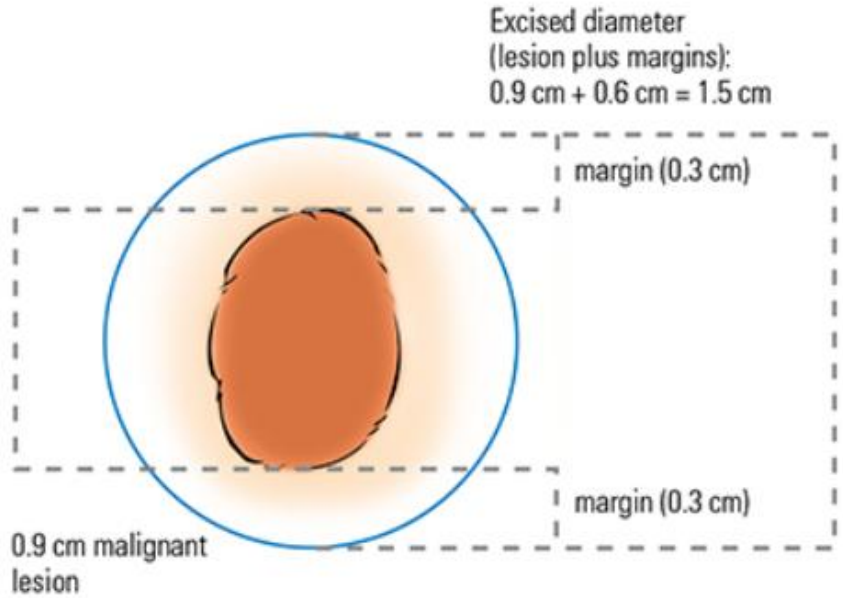
Measuring and Coding the Removal of a Lesion

Measuring lesion removal.



A. Example: Excision, malignant lesion of the back, 1.0 cm. Code 11606.

B. Example: Excision of benign lesion of the neck, 1.0 cm by 2.0 cm. Code 11423.

C. Example: Excision, malignant lesion of the nose, 0.9 cm. Code 11642.

Excision—Benign Lesions

Excision (including simple closure) of benign lesions of skin (eg, neoplasm, cicatricial, fibrous, inflammatory, congenital, cystic lesions), includes local anesthesia. See appropriate size and area below. For shave removal, see 11300 et seq, and for electrosurgical and other methods see 17000 et seq.

Excision is defined as full-thickness (through the dermis) removal of a lesion, including margins, and includes simple (non-layered) closure when performed. Report separately each benign lesion excised. Code selection is determined by measuring the greatest clinical diameter of the apparent lesion plus that margin required for complete excision (lesion diameter plus the most narrow margins required equals the excised diameter). The margins refer to the most narrow margin required to adequately excise the lesion, based on individual judgment. The measurement of lesion plus margin is made prior to excision. The excised diameter is the same whether the surgical defect is repaired in a linear fashion, or reconstructed (eg, with a skin graft).

The closure of defects created by incision, excision, or trauma may require intermediate or complex closure. Repair by intermediate or complex closure should be reported separately. For excision of benign lesions requiring more than simple closure, ie, requiring intermediate or complex closure, report 11400-11446 in addition to appropriate intermediate (12031-12057) or complex closure (13100-13153) codes. For reconstructive closure, see 15002-15261, 15570-15770. For excision performed in conjunction with adjacent tissue transfer, report only the adjacent tissue transfer code (14000-14302). Excision of lesion (11400-11446) is not separately reportable with adjacent tissue transfer. See page 94 for the definition of *intermediate* or *complex* closure.

(For destruction [eg, laser surgery, electrosurgery, cryosurgery, chemosurgery, surgical curette] of benign lesions other than skin tags or cutaneous vascular proliferative lesions, see 17110, 17111; premalignant lesions, see 17000, 17003, 17004; cutaneous vascular proliferative lesions, see 17106, 17107, 17108; malignant lesions, see 17260-17286)

(For excision of cicatricial lesion[s] [eg, full thickness excision, through the dermis], see 11400-11446)

(For incisional removal of burn scar, see 16035, 16036)

(For fractional ablative laser fenestration for functional improvement of traumatic or burn scars, see 0479T, 0480T)

11400 Excision, benign lesion including margins, except skin tag (unless listed elsewhere), trunk, arms or legs; excised diameter 0.5 cm or less

(For unusual or complicated excision, add modifier 22)

(For eyelids involving more than skin, see also 67800 et seq)

11450 Excision of skin and subcutaneous tissue for hidradenitis, axillary; with simple or intermediate repair

- *CPT Assistant* May 12:13, Aug 16:9, Feb 18:10, Sep 18:7

11451 with complex repair

- *CPT Assistant* May 12:13, Aug 16:9, Feb 18:10, Sep 18:7

11462 Excision of skin and subcutaneous tissue for hidradenitis, inguinal; with simple or intermediate repair

- *CPT Assistant* May 12:13, Aug 16:9, Feb 18:10, Sep 18:7

11463 with complex repair

- *CPT Assistant* May 12:13, Aug 16:9, Feb 18:10, Sep 18:7

11470 Excision of skin and subcutaneous tissue for hidradenitis, perianal, perineal, or umbilical; with simple or intermediate repair

- *CPT Assistant* May 12:13, Aug 16:9, Feb 18:10

11471 with complex repair

- *CPT Assistant* May 12:13, Aug 16:9, Feb 18:10, Sep 18:7, Aug 21:3, Sep 24:24

(When skin graft or flap is used for closure, use appropriate procedure code in addition)

(For bilateral procedure, add modifier 50)

Excision—Malignant Lesions

Excision (including simple closure) of malignant lesions of skin (eg, basal cell carcinoma, squamous cell carcinoma, melanoma) includes local anesthesia. (See appropriate size and body area below.) For destruction of malignant lesions of skin, see destruction codes 17260-17286.

Excision is defined as full-thickness (through the dermis) removal of a lesion including margins, and includes simple (non-layered) closure when performed. Report separately each malignant lesion excised. Code selection is determined by measuring the greatest clinical diameter of the apparent lesion plus that margin required for complete excision (lesion diameter plus the most narrow margins required equals the excised diameter). The margins refer to the most narrow margin required to adequately excise the lesion, based on the physician's judgment. The measurement of lesion plus margin is made prior to excision. The excised diameter is the same whether the surgical defect is repaired in a linear fashion, or reconstructed (eg, with a skin graft).

The closure of defects created by incision, excision, or trauma may require intermediate or complex closure. Repair by intermediate or complex closure should be reported separately. For excision of malignant lesions requiring more than simple closure, ie, requiring intermediate or complex closure, report 11600-11646 in addition to appropriate intermediate (12031-12057) or complex closure (13100-13153) codes. For reconstructive closure, see 15002-15261, 15570-15770. For excision performed in conjunction with adjacent tissue transfer, report only the adjacent tissue transfer code (14000-14302). Excision of lesion (11600-11646) is not separately reportable with adjacent tissue transfer. See page 94 for the definition of *intermediate* or *complex* closure.

When frozen section pathology shows the margins of excision were not adequate, an additional excision may be necessary for complete tumor removal. Use only one code to report the additional excision and re-excision(s) based on the final widest excised diameter required for complete tumor removal at the same operative session. To report a re-excision procedure performed to widen margins at a subsequent operative session, see codes 11600-11646, as appropriate. Append modifier 58 if the re-excision procedure is performed during the postoperative period of the primary excision procedure.

11600 Excision, malignant lesion including margins, trunk, arms, or legs; excised diameter 0.5 cm or less

(Do not report 11982 in conjunction with 20701, 20703, 20705)

11983 Removal with reinsertion, non-biodegradable drug delivery implant

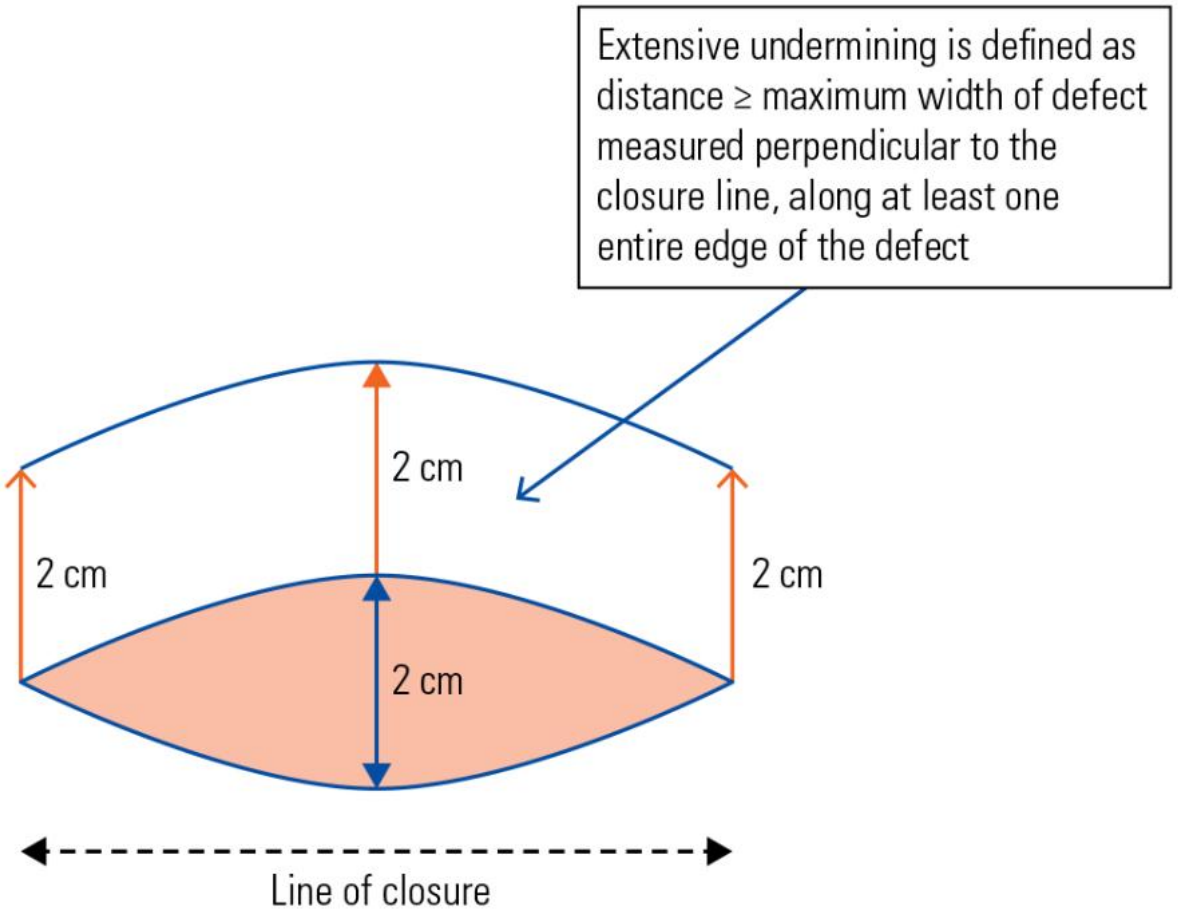
CPT Changes: An Insider's View 2002

CPT Assistant Sep 21:6, Mar 22:12

Repair (Closure)

Use the codes in this section to designate wound closure utilizing sutures, staples, or tissue adhesives (eg, 2-cyanoacrylate), either singly or in combination with each other, or in combination with adhesive strips. Chemical cauterization, electrocauterization, or wound closure utilizing adhesive strips as the sole repair material are included in the appropriate E/M code.

Definitions



The repair of wounds may be classified as Simple, Intermediate, or Complex.

Simple repair is used when the wound is superficial (eg, involving primarily epidermis or dermis, or subcutaneous tissues without significant involvement of deeper structures) and requires simple one-layer closure. Hemostasis and local or topical anesthesia, when performed, are not reported separately.

Intermediate repair includes the repair of wounds that, in addition to the above, require layered closure of one or more of the deeper layers of subcutaneous tissue and superficial (non-muscle) fascia, in addition to the skin (epidermal and dermal) closure. It includes limited undermining (defined as a distance less than the maximum width of the defect, measured perpendicular to the closure line, along at least one entire edge of the defect). Single-layer closure of heavily contaminated wounds that have required extensive cleaning or removal of particulate matter also constitutes intermediate repair.

Complex repair includes the repair of wounds that, in addition to the requirements for intermediate repair, require at least one of the following: exposure of bone, cartilage, tendon, or named neurovascular structure; debridement of wound edges (eg, traumatic lacerations or avulsions); extensive undermining (defined as a distance greater than or equal to the maximum width of the defect, measured perpendicular to the closure line along at least one entire edge of the defect); involvement of free margins of helical rim, vermilion border, or nostril rim; placement of retention sutures. Necessary preparation includes creation of a limited defect for repairs or the debridement of complicated lacerations or avulsions. Complex repair does not include excision of benign (11400-11446) or malignant (11600-11646) lesions, excisional preparation of a wound bed (15002-15005) or debridement of an open fracture or open dislocation.

Extensive Undermining

Instructions for listing services at time of wound repair:

1. The repaired wound(s) should be measured and recorded in centimeters, whether curved, angular, or stellate.
2. When multiple wounds are repaired, add together the lengths of those in the same classification (see above) and from all anatomic sites that are grouped together into the same code descriptor. For example, add together the lengths of intermediate repairs to the trunk and extremities. Do not add lengths of repairs from different groupings of anatomic sites (eg, face and extremities). Also, do not add together lengths of different classifications (eg, intermediate and complex repairs).

   When more than one classification of wounds is repaired, list the more complicated as the primary procedure and the less complicated as the secondary procedure, using modifier 59.
3. Decontamination and/or debridement: Debridement is considered a separate procedure only when gross contamination requires prolonged cleansing, when appreciable amounts of devitalized or contaminated tissue are removed, or when debridement is carried out separately without immediate primary closure.

   (For extensive debridement of soft tissue and/or bone, not associated with open fracture(s) and/or dislocation(s) resulting from penetrating and/or blunt trauma, see 11042-11047.)

   (For extensive debridement of subcutaneous tissue, muscle fascia, muscle, and/or bone associated with open fracture(s) and/or dislocation(s), see 11010-11012.)
4. Involvement of nerves, blood vessels and tendons: Report under appropriate system (Nervous, Cardiovascular, Musculoskeletal) for repair of these structures. The repair of these associated wounds is included in the primary procedure unless it qualifies as a complex repair, in which case modifier 59 applies.

Simple ligation of vessels in an open wound is considered as part of any wound closure.

Simple “exploration” of nerves, blood vessels or tendons exposed in an open wound is also considered part of the essential treatment of the wound and is not a separate procedure unless appreciable dissection is required. If the wound requires enlargement, extension of dissection (to determine penetration), debridement, removal of foreign body(s), ligation or coagulation of minor subcutaneous and/or muscular blood vessel(s) of the subcutaneous tissue, muscle fascia, and/or muscle, not requiring thoracotomy or laparotomy, use codes 20100-20103, as appropriate.

Repair—Simple

Sum of lengths of repairs for each group of anatomic sites.

12001 Simple repair of superficial wounds of scalp, neck, axillae, external genitalia, trunk and/or extremities (including hands and feet); 2.5 cm or less

CPT Assistant Jun 96:7, Feb 98:11, Jan 00:11, Feb 00:10, Apr 00:8, Jul 00:10, Jan 02:10, Feb 07:10, Feb 08:8, Mar 12:5, Dec 17:15, Sep 18:7, Aug 22:16, Mar 23:1

12002 2.6 cm to 7.5 cm

CPT Assistant Feb 00:10, Jan 02:10, Feb 08:8, Oct 14:14, Sep 18:7, Jul 23:1

12004 7.6 cm to 12.5 cm

CPT Assistant Feb 00:10, Jan 02:10, Feb 08:8, Sep 18:7

12005 12.6 cm to 20.0 cm

CPT Assistant Feb 00:10, Jan 02:10, Feb 08:8, Sep 18:7

12006 20.1 cm to 30.0 cm

CPT Assistant Feb 98:11, Feb 00:10, Jan 02:10, Feb 08:8, Sep 18:7

12007 over 30.0 cm

CPT Assistant Feb 00:10, Jan 02:10, Feb 08:8, Sep 18:7

12011 Simple repair of superficial wounds of face, ears, eyelids, nose, lips and/or mucous membranes; 2.5 cm or less

CPT Assistant Feb 00:10, May 00:8, Jan 02:10, Feb 08:8, May 14:5, Sep 18:7

12013 2.6 cm to 5.0 cm

CPT Assistant Feb 00:10, Jan 02:10, Feb 08:8, Sep 18:7

12014 5.1 cm to 7.5 cm

CPT Assistant Feb 00:10, Jan 02:10, Feb 08:8, Sep 18:7, Nov 24:18

12015 7.6 cm to 12.5 cm

CPT Assistant Feb 00:10, Jan 02:10, Feb 08:8, Sep 18:7, Aug 23:16-19

12016 12.6 cm to 20.0 cm

CPT Assistant Feb 00:10, Jan 02:10, Feb 08:8, Sep 18:7

12017 20.1 cm to 30.0 cm

CPT Assistant Feb 00:10, Jan 02:10, Feb 08:8, Sep 18:7

12018 over 30.0 cm

CPT Assistant Feb 00:10, Jan 02:10, Feb 07:10, Feb 08:8, May 14:5, Sep 18:7

12020 Treatment of superficial wound dehiscence; simple closure

CPT Assistant Feb 00:10, Jan 02:10, Feb 08:8

12021 with packing

CPT Assistant Feb 00:10, Jan 02:10, Feb 08:8, Aug 22:16

(For extensive or complicated secondary wound closure, use 13160)

Repair—Intermediate

Sum of lengths of repairs for each group of anatomic sites.

12031 Repair, intermediate, wounds of scalp, axillae, trunk and/or extremities (excluding hands and feet); 2.5 cm or less

13160 Secondary closure of surgical wound or dehiscence, extensive or complicated

CPT Assistant Sep 97:11, Dec 98:5, Apr 00:8, May 11:4, Dec 12:6, Nov 22:21

(Do not report 13160 in conjunction with 11960)

(For packing or simple secondary wound closure, see 12020, 12021)

Adjacent Tissue Transfer or Rearrangement

For full thickness repair of lip or eyelid, see respective anatomical subsections.

Codes 14000-14302 are used for excision (including lesion) and/or repair by adjacent tissue transfer or rearrangement (eg, Z-plasty, W-plasty, V-Y plasty, rotation flap, random island flap, advancement flap). When applied in repairing lacerations, the procedures listed must be performed by the surgeon to accomplish the repair. They do not apply to direct closure or rearrangement of traumatic wounds incidentally resulting in these configurations. Undermining alone of adjacent tissues to achieve closure, without additional incisions, does not constitute adjacent tissue transfer, see complex repair codes 13100-13160. The excision of a benign lesion (11400-11446) or a malignant lesion (11600-11646) is not separately reportable with codes 14000-14302.

Skin graft necessary to close secondary defect is considered an additional procedure. For purposes of code selection, the term "defect" includes the primary and secondary defects. The primary defect resulting from the excision and the secondary defect resulting from flap design to perform the reconstruction are measured together to determine the code.

14000 Adjacent tissue transfer or rearrangement, trunk; defect 10 sq cm or less

- *CPT Assistant* Sep 96:11, Jul 99:3, Jul 00:10, Jan 06:47, Dec 06:15, Jul 08:5, Mar 10:4, Apr 10:3, Jan 12:8, May 12:13, Nov 12:13, Dec 12:6, Apr 14:10, Feb 15:10, Sep 15:12, Oct 17:9, Apr 21:5, Mar 23:34, Jan 24:37, Oct 24:11

CPT Assistant May 12:13, Nov 12:13, Dec 12:6, Mar 23:34, Jan 24:37, Jul 24:11, Oct 24:11

(Use 14302 in conjunction with 14301)

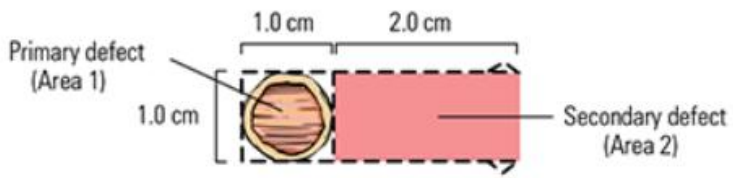
14350 Filleted finger or toe flap, including preparation of recipient site

CPT Assistant Jan 06:47, Jul 08:5, Mar 10:4, May 12:13, Dec 12:6, Apr 21:5

Skin Replacement Surgery

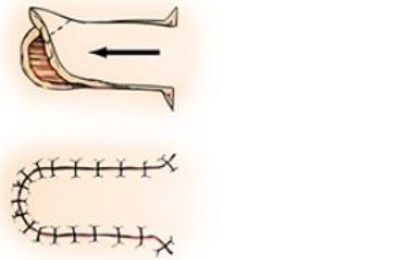
Skin replacement surgery consists of ***surgical preparation*** and topical placement of an ***autograft*** (including tissue cultured autograft and skin cell suspension autograft [SCSA]) or ***skin substitute graft*** (ie, homograft, allograft, xenograft). The graft is anchored using the individual's choice of fixation. When services are performed in the office, routine dressing supplies are not reported separately.

The following definition should be applied to those codes that reference "100 sq cm or 1% of body area of infants and children" when determining the involvement of body size: The measurement of 100 sq cm is applicable to adults and children 10 years of age and older; and percentages of body surface area apply to infants and children younger than 10 years of age. The measurements apply to the size of the recipient area.



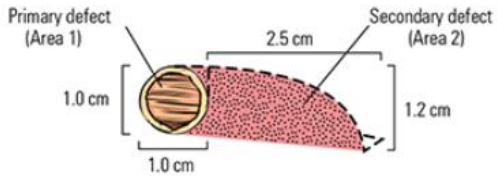
Procedures involving wrist and/or ankle are reported with codes that include arm or leg in the descriptor.

Adjacent Tissue Repairs

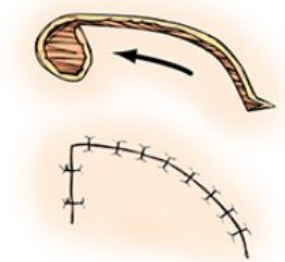


14000-14061

Repair of primary and secondary defects requires assignment of a code based upon the location and the approximate description (as demonstrated below) of the area required.



A. Advancement Flap



Area 1: 1.0 cm x 1.0 cm = 1.0 sq cm
Area 2: 1.0 cm x 2.0 cm = 2.0 sq cm
(Area 1) + (Area 2) = 1.0 sq cm + 2.0 sq cm = 3.0 sq cm

B. Rotation Flap

Area 1: 1.0 cm x 1.0 cm = 1.0 sq cm
Area 2: 2.5 cm x 1.2 cm = 3.0 sq cm
(Area 1) + (Area 2) = 1.0 sq cm + 3.0 sq cm = 4.0 sq cm

When a primary procedure requires a skin substitute or skin autograft for definitive skin closure (eg, orbitectomy, radical mastectomy, deep tumor removal), use 15100-15278 in conjunction with primary procedure.

For biological implant for soft tissue reinforcement, use 15777 in conjunction with primary procedure.

The supply of skin substitute graft(s) should be reported separately in conjunction with 15271-15278.

Definitions

Surgical preparation codes 15002-15005 for skin replacement surgery describe the initial services related to preparing a clean and viable wound surface for placement of an autograft, flap, skin substitute graft or for negative pressure wound therapy. In some cases, closure may be possible using adjacent tissue transfer (14000-14061) or complex repair (13100-13153). In all cases, appreciable nonviable tissue is removed to treat a burn, traumatic wound or a necrotizing infection. The clean wound bed may also be created by incisional release of a scar contracture resulting in a surface defect from separation of tissues. The intent is to heal the wound by primary intention, or by the use of negative pressure wound therapy. Patient conditions may require the closure or application of graft, flap, or skin substitute to be delayed, but in all cases the intent is to include these treatments or negative pressure wound therapy to heal the wound. Do not report 15002-15005 for removal of nonviable tissue/debris in a chronic wound (eg, venous or diabetic) when the wound is left to heal by secondary intention. See active wound management codes (97597, 97598) and debridement codes (11042-11047) for this service. For necrotizing soft tissue infections in specific anatomic locations, see 11004-11008.

Select the appropriate code from 15002-15005 based upon location and size of the resultant defect. For multiple wounds, sum the surface area of all wounds from all anatomic sites that are grouped together into the same code descriptor. For example, sum the surface area of all wounds on the trunk and arms. Do not sum wounds from different groupings of anatomic sites (eg, face and arms). Use 15002 or 15004, as appropriate, for excisions and incisional releases resulting in wounds up to and including 100 sq cm of surface area. Use 15003 or 15005 for each additional 100 sq cm or part thereof. For example: Surgical preparation of a 20 sq cm wound on the right hand and a 15 sq cm wound on the left hand would be reported with a single code, 15004. Surgical preparation of a 75 sq cm wound on the right thigh and a 75 sq cm wound on the left thigh would be reported with 15002 for the first 100 sq cm and 15003 for the second 50 sq cm. If all four wounds required surgical preparation on the same day, use modifier 59 with 15002, and 15004.

Skin Cell Suspension Autograft (SCSA) involves harvesting of skin and preparing a suspension of autologous skin cells for direct spray-on application for treatment of conditions such as thermal burn wounds, traumatic avulsion (eg, degloving), surgical excision (eg, necrotizing tissue infection), or resection (eg, skin cancer).

Codes 15011, 15012 are used to report the harvest of epidermal and dermal skin (eg, 0.006-0.008 inch depth). The harvested skin may be divided into smaller portions for processing. The expansion ratio of harvested skin to prepare a SCSA is typically 1:80. For example, 25 sq cm of harvested skin will produce a quantity of skin cells sufficient to cover a defect measuring up to 2,000 sq cm.

Codes 15013, 15014 are used to report the preparation of the SCSA, which requires enzymatic processing, manual mechanical disaggregation of skin cells, and filtration of the final suspension.

Codes 15013, 15014 are not reported if the harvested skin is nonmanually processed (ie, using automation).

Codes 15015, 15016, 15017, 15018 are used to report the spray-on application of the SCSA to the wound and the donor site when performed. Application of a primary dressing with choice of fixation (eg, surgical glue, sutures, staples) is included in 15015, 15016, 15017, 15018.

For surgical preparation of the recipient site prior to application of the SCSA, see 15002, 15003, 15004, 15005.

Placement of a separate additional autograft (eg, split-thickness, full-thickness autograft) prior to application of SCSA is separately reportable with 15040-15261, as appropriate.

Repair of donor site requiring skin graft or local flaps is considered a separate procedure.

Autografts/tissue cultured autografts (other than SCSA) include the harvest and/or application of an autologous skin graft. Repair of donor sites requiring skin graft or local flaps is reported separately. Removal of current graft and/or simple cleansing of the wound is included, when performed. Do not report 97602. Debridement is considered a separate procedure only when gross contamination requires prolonged cleansing, when appreciable amounts of devitalized or contaminated tissue are removed, or when debridement is carried out separately without immediate primary closure.

Select the appropriate code from 15040-15261 based upon type of autograft and location and size of the defect. The measurements apply to the size of the recipient area. For multiple wounds, sum the surface area of all wounds from all anatomic sites that are grouped together into the same code descriptor. For example, sum the surface area of all wounds on the trunk and arms. Do not sum wounds from different groupings of anatomic sites (eg, face and arms).

Skin substitute grafts include non-autologous human skin (dermal or epidermal, cellular and acellular) grafts (eg, homograft, allograft), non-human skin substitute grafts (ie, xenograft), and biological products that form a sheet scaffolding for skin growth. These codes are not to be reported for application of non-graft wound dressings (eg, gel, powder, ointment, foam, liquid) or injected skin substitutes. Application of non-graft wound dressings is not separately reportable. Removal of current graft and/or simple cleansing of the wound is included, when performed. Do not report 97602. Debridement is considered a separate procedure only when gross contamination requires prolonged cleansing, when appreciable amounts of devitalized or contaminated tissue are removed, or when debridement is carried out separately without immediate primary closure.

Select the appropriate code from 15271-15278 based upon location and size of the defect. For multiple wounds, sum the surface area of all wounds from all anatomic sites that are grouped together into the same code descriptor. For example, sum the surface area of all wounds on the trunk and arms. Do not sum wounds from different groupings of anatomic sites (eg, face and arms). The supply of skin substitute graft(s) should be reported separately in conjunction with 15271, 15272, 15273, 15274, 15275, 15276, 15277, 15278. For biologic implant for soft tissue reinforcement, use 15777 in conjunction with code for primary procedure.

Surgical Preparation

15002 Surgical preparation or creation of recipient site by excision of open wounds, burn eschar, or scar (including subcutaneous tissues), or incisional release of scar contracture, trunk, arms, legs; first 100 sq cm or 1% of body area of infants and children

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Jan 12:6, Oct 12:13, Dec 12:6, Feb 13:16, Mar 14:12, Oct 16:3, Nov 19:3, Aug 22:16

(For linear scar revision, see 13100-13153)

+ 15003 each additional 100 sq cm, or part thereof, or each additional 1% of body area of infants and children (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2007, 2009
- *CPT Assistant* Jan 12:6, Oct 12:13, Feb 13:16, Mar 14:12, Oct 16:3, Nov 19:3, Aug 22:16

(Use 15003 in conjunction with 15002)

15004 Surgical preparation or creation of recipient site by excision of open wounds, burn eschar, or scar (including subcutaneous tissues), or incisional release of scar contracture, face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet and/or multiple digits; first 100 sq cm or 1% of body area of infants and children

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Jan 12:6, Oct 12:13, Feb 13:16, Mar 14:12, Oct 16:3, Nov 19:3, Aug 22:16

+ 15005 each additional 100 sq cm, or part thereof, or each additional 1% of body area of infants and children (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2007, 2009
- *CPT Assistant* Jan 12:6, Oct 12:13, Feb 13:16, Mar 14:12, Oct 16:3, Nov 19:3, Aug 22:16

(Use 15005 in conjunction with 15004)

Skin Cell Suspension Autograft

15011 Harvest of skin for skin cell suspension autograft; first 25 sq cm or less

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:12

+ 15012 each additional 25 sq cm or part thereof (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:12

(Use 15012 in conjunction with 15011)

15013 Preparation of skin cell suspension autograft, requiring enzymatic processing, manual mechanical disaggregation of skin cells, and filtration; first 25 sq cm or less of harvested skin

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:12

+ 15014 each additional 25 sq cm of harvested skin or part thereof (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:12

(Use 15014 in conjunction with 15013)

15015 Application of skin cell suspension autograft to wound and donor sites, including application of primary dressing, trunk, arms, legs; first 480 sq cm or less

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:12

+ 15016 each additional 480 sq cm or part thereof (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:12

(Use 15016 in conjunction with 15015)

15017 Application of skin cell suspension autograft to wound and donor sites, including application of primary dressing, face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet, and/or multiple digits; first 480 sq cm or less

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:12

+ 15018 each additional 480 sq cm or part thereof (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Dec 24:12

(Use 15018 in conjunction with 15017)

Autografts/Tissue Cultured Autograft

15040 Harvest of skin for tissue cultured skin autograft, 100 sq cm or less

- *CPT Changes: An Insider's View* 2006
- *CPT Assistant* Aug 06:10, Oct 06:1, Feb 08:3, Apr 10:3, Jan 12:6

15050 Pinch graft, single or multiple, to cover small ulcer, tip of digit, or other minimal open area (except on face), up to defect size 2 cm diameter

- *CPT Assistant* Apr 97:4, Sep 97:2, Nov 98:6, Jan 12:6, Jun 16:8

15100 Split-thickness autograft, trunk, arms, legs; first 100 sq cm or less, or 1% of body area of infants and children (except 15050)

- *CPT Changes: An Insider's View* 2002, 2006
- *CPT Assistant* Fall 93:7, Apr 97:4, Aug 97:6, Sep 97:3, Nov 98:6, Sep 02:3, Oct 06:1, Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3, Jun 16:8

+ 15101 each additional 100 sq cm, or each additional 1% of body area of infants and children, or part thereof (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2002

CPT Assistant Apr 97:4, Nov 98:6, Sep 02:3, Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3, Jun 16:8

(Use 15101 in conjunction with 15100)

15110 Epidermal autograft, trunk, arms, legs; first 100 sq cm or less, or 1% of body area of infants and children

CPT Changes: An Insider's View 2006

CPT Assistant Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3

+ 15111 each additional 100 sq cm, or each additional 1% of body area of infants and children, or part thereof (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2006

CPT Assistant Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3

(Use 15111 in conjunction with 15110)

15115 Epidermal autograft, face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet, and/or multiple digits; first 100 sq cm or less, or 1% of body area of infants and children

CPT Changes: An Insider's View 2006

CPT Assistant Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3

+ 15116 each additional 100 sq cm, or each additional 1% of body area of infants and children, or part thereof (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2006

CPT Assistant Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3

(Use 15116 in conjunction with 15115)

15120 Split-thickness autograft, face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet, and/or multiple digits; first 100 sq cm or less, or 1% of body area of infants and children (except 15050)

CPT Changes: An Insider's View 2002, 2006

CPT Assistant Apr 97:4, Aug 97:6, Sep 97:3, Nov 98:6, Jan 99:4, Sep 02:3, Feb 08:3, Jul 08:5, Mar 11:9, Jan 12:6, Oct 12:3, Jun 16:8

+ 15121 each additional 100 sq cm, or each additional 1% of body area of infants and children, or part thereof (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2002

CPT Assistant Apr 97:4, Aug 97:6, Sep 97:3, Nov 98:6, Jan 99:4, Sep 02:3, Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3, Jun 16:8

(Use 15121 in conjunction with 15120)

(For eyelids, see also 67961-67975)

15130 Dermal autograft, trunk, arms, legs; first 100 sq cm or less, or 1% of body area of infants and children

CPT Changes: An Insider's View 2006

CPT Assistant Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3

+ 15131 each additional 100 sq cm, or each additional 1% of body area of infants and children, or part thereof (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2006

CPT Assistant Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3

(Use 15131 in conjunction with 15130)

15135 Dermal autograft, face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet, and/or multiple digits; first 100 sq cm or less, or 1% of body area of infants and children

CPT Changes: An Insider's View 2006

CPT Assistant Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3

+ 15136 each additional 100 sq cm, or each additional 1% of body area of infants and children, or part thereof (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2006

CPT Assistant Mar 11:9, Jan 12:6, Oct 12:3

(Use 15136 in conjunction with 15135)

15150 Tissue cultured skin autograft, trunk, arms, legs; first 25 sq cm or less

CPT Changes: An Insider's View 2006, 2012

CPT Assistant Oct 06:1, Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3

+ 15151 additional 1 sq cm to 75 sq cm (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2006, 2012

CPT Assistant Oct 06:1, Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3

(Do not report 15151 more than once per session)

(Use 15151 in conjunction with 15150)

+ 15152 each additional 100 sq cm, or each additional 1% of body area of infants and children, or part thereof (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2006, 2012

CPT Assistant Oct 06:1, Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3

(Use 15152 in conjunction with 15151)

15155 Tissue cultured skin autograft, face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet, and/or multiple digits; first 25 sq cm or less

CPT Changes: An Insider's View 2006, 2012

CPT Assistant Oct 06:1, Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3

+ **15156** additional 1 sq cm to 75 sq cm (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2006, 2012

CPT Assistant Oct 06:1, Feb 08:3, Mar 11:9, Jan 12:6, Oct 12:3

(Do not report 15156 more than once per session)

(Use 15156 in conjunction with 15155)

+ **15157** each additional 100 sq cm, or each additional 1% of body area of infants and children, or part thereof (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2006, 2012

CPT Assistant Oct 06:1, Feb 08:3, Apr 10:3, Mar 11:9, Jan 12:6, Oct 12:3

(Use 15157 in conjunction with 15156)

15200 Full thickness graft, free, including direct closure of donor site, trunk; 20 sq cm or less

CPT Changes: An Insider's View 2002

CPT Assistant Aug 96:11, Aug 97:6, Sep 97:3, Feb 08:3, Mar 08:14, Jan 12:6, Oct 12:3, Jun 16:8

+ **15201** each additional 20 sq cm, or part thereof (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2002, 2009

CPT Assistant Apr 97:4, Aug 97:6, Sep 97:3, Feb 08:3, Mar 08:14, Jan 12:6, Oct 12:3, Jun 16:8

(Use 15201 in conjunction with 15200)

15220 Full thickness graft, free, including direct closure of donor site, scalp, arms, and/or legs; 20 sq cm or less

CPT Changes: An Insider's View 2002

CPT Assistant Apr 97:4, Aug 97:6, Sep 97:3, Aug 98:9, Feb 08:3, Mar 08:14, Jan 12:6, Oct 12:3, Jun 16:8

+ **15221** each additional 20 sq cm, or part thereof (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2002, 2009

CPT Assistant Apr 97:4, Aug 97:6, Sep 97:3, Aug 98:9, Feb 08:3, Mar 08:14, Jan 12:6, Oct 12:3, Jun 16:8

(Use 15221 in conjunction with 15220)

15240 Full thickness graft, free, including direct closure of donor site, forehead, cheeks, chin, mouth, neck, axillae, genitalia, hands, and/or feet; 20 sq cm or less

CPT Changes: An Insider's View 2002

CPT Assistant Apr 97:4, Aug 97:6, Sep 97:3, Nov 00:10, Feb 08:3, Mar 08:14, Jan 12:6, Oct 12:3, Jun 16:8

(For fingertip graft, use 15050)

(For repair of syndactyly, fingers, see 26560-26562)

+ **15241** each additional 20 sq cm, or part thereof (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2002, 2009

CPT Assistant Apr 97:4, Aug 97:6, Sep 97:3, Feb 08:3, Mar 08:14, Jan 12:6, Oct 12:3, Jun 16:8

(Use 15241 in conjunction with 15240)

15260 Full thickness graft, free, including direct closure of donor site, nose, ears, eyelids, and/or lips; 20 sq cm or less

CPT Changes: An Insider's View 2002

CPT Assistant Fall 91:7, Fall 93:7, Apr 97:4, Aug 97:6, Sep 97:3, Jul 99:3, Feb 08:3, Mar 08:14, Jan 12:6, Oct 12:3, Jun 16:8

+ 15261 each additional 20 sq cm, or part thereof (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2002, 2009

CPT Assistant Fall 91:7, Apr 97:4, Aug 97:6, Sep 97:3, Feb 08:3, Mar 08:14, Apr 10:3, Jan 12:6, Oct 12:3, Jun 16:8

(Use 15261 in conjunction with 15260)

(For eyelids, see also 67961-67975)

(Repair of donor site requiring skin graft or local flaps is considered a separate procedure)

Skin Substitute Grafts

he supply of skin substitute graft(s) should be reported separately in conjunction with 15271-15278. For biologic implant for soft tissue reinforcemen se 15777 in conjunction with code for primary procedure.

15271 Application of skin substitute graft to trunk, arms, legs, total wound surface area up to 100 sq cm; first 25 sq cm or less wound surface area

CPT Changes: An Insider's View 2012

CPT Assistant Jan 12:6, Oct 12:3, Jun 14:14, Oct 17:9, Aug 22:16, Feb 24:32

+ 15272 each additional 25 sq cm wound surface area, or part thereof (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2012

CPT Assistant Jan 12:6, Oct 12:3, Oct 13:15, Jun 14:14

(Use 15272 in conjunction with 15271)

(For total wound surface area greater than or equal to 100 sq cm, see 15273, 15274)

(Do not report 15271, 15272 in conjunction with 15273, 15274)

15273 Application of skin substitute graft to trunk, arms, legs, total wound surface area greater than or equal to 100 sq cm; first 100 sq cm wound surface area, 1% of body area of infants and children

CPT Changes: An Insider's View 2012

CPT Assistant Jan 12:6, Oct 12:3, Oct 13:15, Nov 13:14, Jun 14:14

+ 15274 each additional 100 sq cm wound surface area, or part thereof, or each additional 1% of body area of infants and children, or part thereof (List separat in addition to code for primary procedure)

CPT Changes: An Insider's View 2012

CPT Assistant Jan 12:6, Oct 12:3, Oct 13:15, Nov 13:14, Jun 14:14

(Use 15274 in conjunction with 15273)

(For total wound surface area up to 100 sq cm, see 15271, 15272)

15275 Application of skin substitute graft to face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet, and/or multiple digits, total wound surface area up to 100 sq cm; first 25 sq cm or less wound surface area

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Jan 12:6, Oct 12:3, Oct 13:15, Jun 14:14

+ 15276 each additional 25 sq cm wound surface area, or part thereof (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Jan 12:6, Oct 12:3, Oct 13:15, Jun 14:14

(Use 15276 in conjunction with 15275)

(For total wound surface area greater than or equal to 100 sq cm, see 15277, 15278)

(Do not report 15275, 15276 in conjunction with 15277, 15278)

15277 Application of skin substitute graft to face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet, and/or multiple digits, total wound surface area greater than or equal to 100 sq cm; first 100 sq cm wound surface area, or 1% of body area of infants and children

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Jan 12:6, Oct 12:3, Oct 13:15, Nov 13:14, Jun 14:14

+ 15278 each additional 100 sq cm wound surface area, or part thereof, or each additional 1% of body area of infants and children, or part thereof (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Jan 12:6, Oct 12:3, Oct 13:15, Nov 13:14, Jun 14:14, Aug 22:16

(Use 15278 in conjunction with 15277)

(For total wound surface area up to 100 sq cm, see 15275, 15276)

(Do not report 15271-15278 in conjunction with 97602)

Flaps (Skin and/or Deep Tissues)

The regions listed refer to the recipient area (not the donor site) when a flap is being attached in a transfer or to a final site.

The regions listed refer to a donor site when a tube is formed for later transfer or when a "delay" of flap occurs prior to the transfer. Codes 15733-15738 are described by donor site of the muscle, myocutaneous, or fasciocutaneous flap.

Codes 15570-15738 do not include extensive immobilization (eg, large plaster casts and other immobilizing devices are considered additional separate procedures).

A repair of a donor site requiring a skin graft or local flaps is considered an additional separate procedure.

(For microvascular flaps, see 15756-15758)

(For flaps without inclusion of a vascular pedicle, see 15570-15576)

(For adjacent tissue transfer flaps, see 14000-14302)

15570 Formation of direct or tubed pedicle, with or without transfer; trunk

CPT Assistant Nov 02:7, Mar 10:4, Apr 10:3, Dec 12:6

15572 scalp, arms, or legs

CPT Assistant Mar 10:4, Dec 12:6

15574 forehead, cheeks, chin, mouth, neck, axillae, genitalia, hands or feet

CPT Assistant Mar 10:4, Dec 12:6

15576 eyelids, nose, ears, lips, or intraoral

CPT Assistant Mar 10:4, Dec 12:6

15600 Delay of flap or sectioning of flap (division and inset); at trunk

CPT Assistant Nov 99:10, Mar 10:4, Dec 12:6, Jun 19:14

15610 at scalp, arms, or legs

CPT Assistant Mar 10:4, Dec 12:6

15620 at forehead, cheeks, chin, neck, axillae, genitalia, hands, or feet

CPT Assistant Mar 10:4, Dec 12:6

15630 at eyelids, nose, ears, or lips

CPT Assistant Mar 10:4, Dec 12:6

15650 Transfer, intermediate, of any pedicle flap (eg, abdomen to wrist, Walking tube), any location

CPT Assistant Mar 10:4, Dec 12:6, Oct 24:11

(For eyelids, nose, ears, or lips, see also anatomical area)

(For revision, defatting or rearranging of transferred pedicle flap or skin graft, see 13100-14302)

15730 Midface flap (ie, zygomaticofacial flap) with preservation of vascular pedicle(s)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Nov 17:6, Apr 18:10, Oct 24:11

15731 Forehead flap with preservation of vascular pedicle (eg, axial pattern flap, paramedian forehead flap)

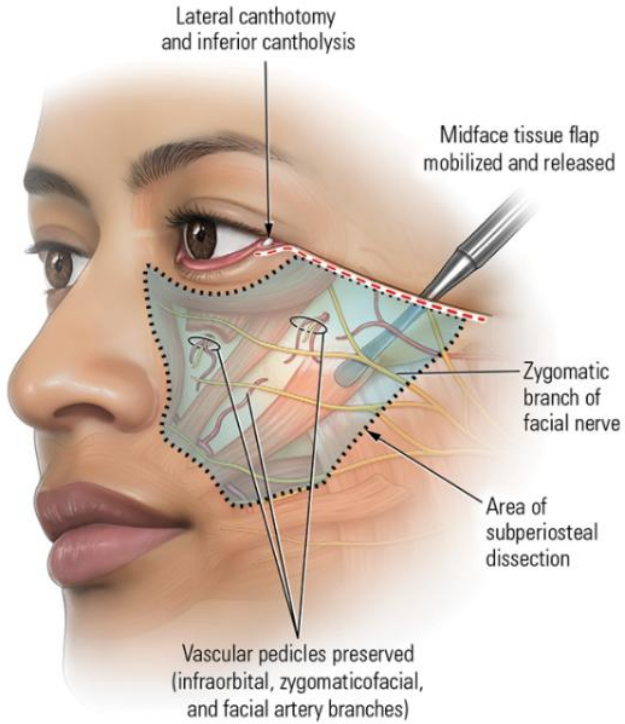
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Dec 12:6, Nov 17:6

(For muscle, myocutaneous, or fasciocutaneous flap of the head or neck, use 15733)

15733 Muscle, myocutaneous, or fasciocutaneous flap; head and neck with named vascular pedicle (ie, buccinators, genioglossus, temporalis, masseter, sternocleidomastoid, levator scapulae)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Nov 17:6, Apr 18:10, Oct 24:11

(For forehead flap with preservation of vascular pedicle, use 15731)



(For anterior pericranial flap on named vascular pedicle, for repair of extracranial defect, use 15731)

(For repair of head and neck defects using non-axial pattern advancement flaps [including lesion] and/or repair by adjacent tissue transfer or rearrangement [eg, Z-plasty, W-plasty, V-Y plasty, rotation flap, random island flap, advancement flap], see 14040, 14041, 14060, 14061, 14301, 14302)

Midface Flap Surgery

15730

Midface muscles surrounding eye (skin and muscle flap procedures)

15734 trunk

- *CPT Changes: An Insider's View* 2018

15738 lower extremity

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Sep 03:15, Apr 10:3, Dec 12:6, Nov 17:6

Axial Pattern Forehead Flap

15731

Reconstruction of a nasal defect with a forehead flap based on the left supratrochlear vessels

Other Flaps and Grafts

Code 15740 describes a cutaneous flap, transposed into a nearby but not immediately adjacent defect, with a pedicle that incorporates an anatomically named axial vessel into its design. The flap is typically transferred through a tunnel underneath the skin and sutured into its new position. The donor site is closed directly.

Neurovascular pedicle procedures are reported with 15750. This code includes not only skin but also a functional motor or sensory nerve(s). The flap serves to reinnervate a damaged portion of the body dependent on touch or movement (eg, thumb).

Repair of donor site requiring skin graft or local flaps should be reported as an additional procedure.

For random island flaps, V-Y subcutaneous flaps, advancement flaps, and other flaps from adjacent areas without clearly defined anatomically named axial vessels, see 14000-14302.

Code 15769 may be used to report autologous soft tissue grafts, such as fat, dermis, fascia, or other soft tissues, which are harvested from the patient using an excisional technique. The autologous soft tissue grafts are then placed into a defect during the same operation. Autologous grafts that are already defined in the CPT code set, including skin, bone, nerve, tendon, fascia lata or vessels, should be reported with the specific codes for each tissue type. For harvesting, preparation or injection(s) of platelet-rich plasma, use 0232T.

Codes 15771, 15772, 15773, 15774 may be used to report autologous fat grafting when the adipose cells are harvested via a liposuction technique, prepared with minimal manipulation, and then injected via cannula in multiple small aliquots to the defect. The regions listed refer to the recipient area (not the donor site). Volumes are based on total injectate. For multiple sites of injection, sum the total volume of injectate to anatomic sites that are grouped together into the same code descriptor. Do not report 11950, 11951, 11952, 11954 in conjunction with 15771, 15772, 15773, 15774, for the same anatomic site.

15740 Flap; island pedicle requiring identification and dissection of an anatomically named axial vessel
- *CPT Changes: An Insider's View* 2013
- *CPT Assistant* Mar 04:11, Sep 04:12, Oct 04:15, Apr 10:3, Dec 12:6, Dec 17:14, Mar 21:9

15750 neurovascular pedicle
- *CPT Assistant* Dec 17:14

15756 Free muscle or myocutaneous flap with microvascular anastomosis
- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Apr 97:5, Nov 97:12, Nov 98:6

(Do not report code 69990 in addition to code 15756)

15757 Free skin flap with microvascular anastomosis
- *CPT Assistant* Apr 97:5, Nov 98:6, Apr 16:8

(Do not report code 69990 in addition to code 15757)

15758 Free fascial flap with microvascular anastomosis
- *CPT Assistant* Apr 97:5, Nov 98:6

(Do not report code 69990 in addition to code 15758)

15760 Graft; composite (eg, full thickness of external ear or nasal ala), including primary closure, donor area
- *CPT Assistant* Sep 97:3

15769 Code is out of numerical sequence. See 15760-15772

15770 derma-fat-fascia
- *CPT Assistant* Sep 97:3, Apr 10:3, Oct 19:5, Jul 23:11

 # 15769 Grafting of autologous soft tissue, other, harvested by direct excision (eg, fat, dermis, fascia)
- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Oct 19:5, Dec 22:1, Jul 23:11, Dec 24:50

(For injection[s] of platelet-rich plasma, use 0232T)

15771 Grafting of autologous fat harvested by liposuction technique to trunk, breasts, scalp, arms, and/or legs; 50 cc or less injectate
- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Oct 19:5, Apr 20:10, Apr 21:5, Dec 22:1, Jul 23:11, Dec 23:37

(Report 15771 only once per session)

+ 15772 each additional 50 cc injectate, or part thereof (List separately in addition to code for primary procedure)
- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Oct 19:5, Apr 20:10, Apr 21:5, Dec 22:1, Jul 23:11, Dec 23:37

(Use 15772 in conjunction with 15771)

15773 Grafting of autologous fat harvested by liposuction technique to face, eyelids, mouth, neck, ears, orbits, genitalia, hands, and/or feet; 25 cc or less injectate
- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Oct 19:5, Dec 22:1, Jul 23:11, Dec 23:37, Apr 25:27

(Report 15773 only once per session)

+ 15774 each additional 25 cc injectate, or part thereof (List separately in addition to code for primary procedure)
- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Oct 19:5, Dec 22:1, Jul 23:11, Dec 23:37

(Use 15774 in conjunction with 15773)

(Do not report 15769, 15771, 15772, 15773, 15774 in conjunction with 15876, 15877, 15878, 15879, 0232T, 0481T, 0489T, 0490T)

(For injection[s], autologous white blood cell concentrate [autologous protein solution], any site, including image guidance, harvesting and preparation, when performed, use 0481T)

15775 Punch graft for hair transplant; 1 to 15 punch grafts
- *CPT Assistant* Sep 97:3

15776 more than 15 punch grafts
- *CPT Assistant* Sep 97:3

(For strip transplant, use 15220)

+ 15777 Implantation of biologic implant (eg, acellular dermal matrix) for soft tissue reinforcement (ie, breast, trunk) (List separately in addition to code for primary procedure)
- *CPT Changes: An Insider's View* 2012, 2014
- *CPT Assistant* Jan 12:10, Oct 13:15, Nov 19:14, Apr 21:5, Jan 22:17, Feb 22:13, Feb 23:13, Dec 23:37

(For implantation of biologic implants for soft tissue reinforcement in tissues other than breast and trunk, use 17999)

(For bilateral breast procedure, report 15777 twice. Do not report modifier 50 in conjunction with 15777)

(For topical application of skin substitute graft to a wound surface, see 15271-15278)

(The supply of biologic implant should be reported separately in conjunction with 15777)

15778 Implantation of absorbable mesh or other prosthesis for delayed closure of defect(s) (ie, external genitalia, perineum, abdominal wall) due to soft tissue infection or trauma
- *CPT Changes: An Insider's View* 2023
- *CPT Assistant* Sep 23:1

(For repair of anorectal fistula with plug [eg, porcine small intestine submucosa {SIS}], use 46707)

(For implantation of mesh or other prosthesis for anterior abdominal hernia repair or parastomal hernia repair, see 49591-49622)

(For insertion of mesh or other prosthesis for repair of pelvic floor defect, use 57267)

(For implantation of non-biologic or synthetic implant for fascial reinforcement of the abdominal wall, use 0437T)

Other Procedures

15780 Dermabrasion; total face (eg, for acne scarring, fine wrinkling, rhytids, general keratosis)
- *CPT Assistant* Apr 03:27

15781 segmental, face
15782 regional, other than face
15783 superficial, any site (eg, tattoo removal)
- *CPT Assistant* Apr 03:27

15786 Abrasion; single lesion (eg, keratosis, scar)
+15787 each additional 4 lesions or less (List separately in addition to code for primary procedure)

(Use 15787 in conjunction with 15786)
15788 Chemical peel, facial; epidermal
15789 dermal
15792 Chemical peel, nonfacial; epidermal
15793 dermal

(15819 has been deleted)
15820 Blepharoplasty, lower eyelid;
- *CPT Assistant* Feb 04:11, May 04:12, Feb 05:16

15821 with extensive herniated fat pad
- *CPT Assistant* Feb 04:11, May 04:12, Feb 05:16

15822 Blepharoplasty, upper eyelid;
- *CPT Assistant* Feb 04:11, May 04:12, Feb 05:16

15823 with excessive skin weighting down lid
- *CPT Assistant* Sep 00:7, Feb 04:11, May 04:12, Feb 05:16, Aug 11:8, Mar 21:11, Feb 25:21

(For bilateral blepharoplasty, add modifier 50)
15824 Rhytidectomy; forehead
- *CPT Assistant* Apr 17:9

(For repair of brow ptosis, use 67900)
15825 neck with platysmal tightening (platysmal flap, P-flap)
- *CPT Assistant* Apr 17:9

15826 glabellar frown lines
15828 cheek, chin, and neck
15829 superficial musculoaponeurotic system (SMAS) flap

(For bilateral rhytidectomy, add modifier 50)
15830 Excision, excessive skin and subcutaneous tissue (includes lipectomy); abdomen, infraumbilical panniculectomy
- *CPT Changes: An Insider's View* 2007

(Do not report 15830 in conjunction with 12031-12037, 13100-13102, 14000, 14001, 14302 for the same wound)
15832 thigh
- *CPT Assistant* May 22:15

15833 leg
15834 hip
15835 buttock
15836 arm
15837 forearm or hand

15838 submental fat pad
15839 other area

(For bilateral procedure, add modifier 50)

15840 Graft for facial nerve paralysis; free fascia graft (including obtaining fascia)

CPT Assistant May 21:13

(For bilateral procedure, add modifier 50)

15841 free muscle graft (including obtaining graft)

15842 free muscle flap by microsurgical technique

CPT Changes: An Insider's View 2001

(Do not report code 69990 in addition to code 15842)

15845 regional muscle transfer

(For intravenous fluorescein examination of blood flow in graft or flap, use 15860)

(For nerve transfers, decompression, or repair, see 64831-64876, 64905, 64907, 69720, 69725, 69740, 69745, 69955)

+ 15847 Excision, excessive skin and subcutaneous tissue (includes lipectomy), abdomen (eg, abdominoplasty) (includes umbilical transposition and fascial plication) (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2007

(Use 15847 in conjunction with 15830)

(For other abdominoplasty, use 17999)

(For inguinal hernia repair, see 49491-49525)

(For anterior abdominal hernia[s] repair, see 49591-49618)

15851 Removal of sutures **or** staples requiring anesthesia (ie, general anesthesia, moderate sedation)

CPT Changes: An Insider's View 2023

CPT Assistant Spring 93:34, Nov 97:22, Mar 23:28

(Do not report 15851 for suture and/or staple removal to re-open a wound prior to performing another procedure through the same incision)

#+ 15853 Removal of sutures **or** staples not requiring anesthesia (List separately in addition to E/M code)

CPT Changes: An Insider's View 2023

CPT Assistant Mar 23:28, May 23:24, Jul 23:14

(Use 15853 in conjunction with 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99281, 99282, 99283, 99284, 99285, 99341, 99342, 99344, 99345, 99347, 99348, 99349, 99350)

(Do not report 15853 in conjunction with 15854)

#+ 15854 Removal of sutures **and** staples not requiring anesthesia (List separately in addition to E/M code)

CPT Changes: An Insider's View 2023

CPT Assistant Mar 23:28, Jul 23:14

(Use 15854 in conjunction with 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99281, 99282, 99283, 99284, 99285, 99341, 99342, 99344, 99345, 99347, 99348, 99349, 99350)

(Do not report 15854 in conjunction with 15853)

15852 Dressing change (for other than burns) under anesthesia (other than local)

15853 Code is out of numerical sequence. See 15851-15860

15854 Code is out of numerical sequence. See 15851-15860

15860 Intravenous injection of agent (eg, fluorescein) to test vascular flow in flap or graft

CPT Changes: An Insider's View 2002

CPT Assistant Oct 23:18, Dec 23:44

15876 Suction assisted lipectomy; head and neck

CPT Assistant Aug 19:10, May 22:15, Dec 22:1

15877 trunk

CPT Assistant Oct 99:10, Feb 05:14, Aug 19:10, May 22:15, Dec 22:1

15878 upper extremity

CPT Assistant Aug 19:10, May 22:15, Dec 22:1

15879 lower extremity

CPT Assistant Aug 19:10, May 22:15, Dec 22:1

(Do not report 15876, 15877, 15878, 15879 in conjunction with 15771, 15772, 15773, 15774, 0489T, 0490T)

(For harvesting of adipose tissue for autologous adipose-derived regenerative cell therapy, use 0489T)

(For autologous fat grafting harvested by liposuction technique, see 15771, 15772, 15773, 15774)

Pressure Ulcers (Decubitus Ulcers)

15920 Excision, coccygeal pressure ulcer, with coccygectomy; with primary suture

15922 with flap closure

15931 Excision, sacral pressure ulcer, with primary suture;

CPT Assistant Nov 24:18

15933 with ostectomy

CPT Assistant Nov 24:18

15934 Excision, sacral pressure ulcer, with skin flap closure;

CPT Assistant Nov 24:18

15935 with ostectomy

CPT Assistant Nov 24:18

15936 Excision, sacral pressure ulcer, in preparation for muscle or myocutaneous flap or skin graft closure;

CPT Assistant Nov 98:6-7, Nov 24:18

15937 with ostectomy

(For repair of defect using muscle or myocutaneous flap, use code(s) 15734 and/or 15738 in addition to 15936, 15937. For repair of defect using split skin graft, use codes 15100 and/or 15101 in addition to 15936, 15937)

15940 Excision, ischial pressure ulcer, with primary suture;

15941 with ostectomy (ischiectomy)

15944 Excision, ischial pressure ulcer, with skin flap closure;

15945 with ostectomy

15946 Excision, ischial pressure ulcer, with ostectomy, in preparation for muscle or myocutaneous flap or skin graft closure

CPT Assistant Nov 98:6-7, Jun 02:10, Jan 03:23

(For repair of defect using muscle or myocutaneous flap, use code(s) 15734 and/or 15738 in addition to 15946. For repair of defect using split skin graft, use codes 15100 and/or 15101 in addition to 15946)

15950 Excision, trochanteric pressure ulcer, with primary suture;

15951 with ostectomy

15952 Excision, trochanteric pressure ulcer, with skin flap closure;

15953 with ostectomy

15956 Excision, trochanteric pressure ulcer, in preparation for muscle or myocutaneous flap or skin graft closure;

CPT Assistant Nov 98:6-7

15958 with ostectomy

CPT Assistant Nov 98:6-7

(For repair of defect using muscle or myocutaneous flap, use code(s) 15734 and/or 15738 in addition to 15956, 15958. For repair of defect using split skin graft, use codes 15100 and/or 15101 in addition to 15956, 15958)

15999 Unlisted procedure, excision pressure ulcer

(For free skin graft to close ulcer or donor site, see 15002 et seq)

Burns, Local Treatment

Procedures 16000-16036 refer to local treatment of burned surface only. Codes 16020-16030 include the application of materials (eg, dressings) not described in codes 15100-15278.

List percentage of body surface involved and depth of burn.

For necessary related medical services (eg, hospital visits, detention) in management of burned patients, see appropriate services in **Evaluation and Management** and **Medicine** sections.

For the application of skin grafts or skin substitutes, see codes 15100-15777.

(For fractional ablative laser fenestration for functional improvement of traumatic or burn scars, see 0479T, 0480T)

16000 Initial treatment, first degree burn, when no more than local treatment is required

- *CPT Assistant* Aug 97:6, Oct 12:3

16020 Dressings and/or debridement of partial-thickness burns, initial or subsequent; small (less than 5% total body surface area)

- *CPT Changes: An Insider's View* 2006
- *CPT Assistant* Aug 97:6, Oct 12:3, Jan 24:37

16025 medium (eg, whole face or whole extremity, or 5% to 10% total body surface area)

- *CPT Changes: An Insider's View* 2006
- *CPT Assistant* Aug 97:6, Jun 08:14, Oct 12:3

16030 large (eg, more than 1 extremity, or greater than 10% total body surface area)

- *CPT Changes: An Insider's View* 2006
- *CPT Assistant* Aug 97:6, Jun 08:14, Oct 12:3

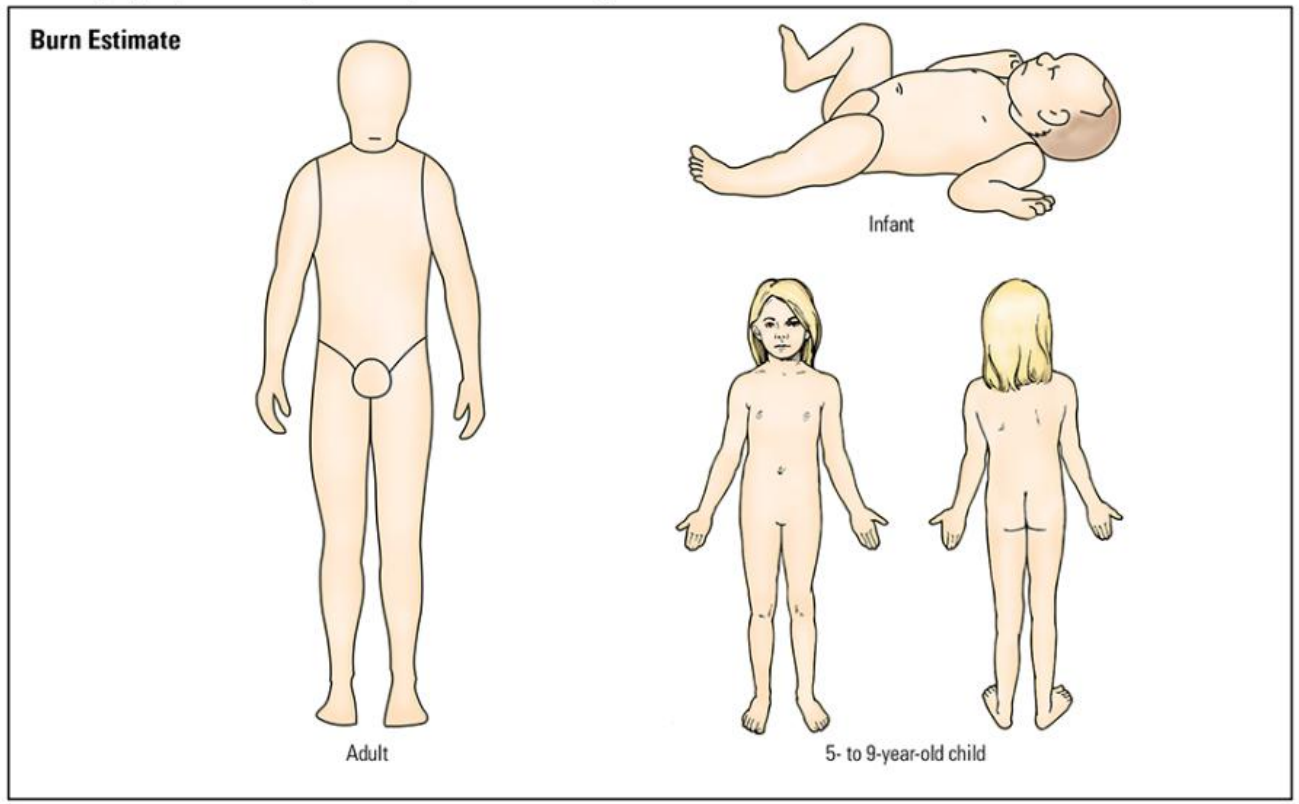
16035 Escharotomy; initial incision

- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Aug 97:6, Oct 12:3

+ 16036 each additional incision (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Oct 12:3

(Use 16036 in conjunction with 16035)



(For debridement, curettement of burn wound, see 16020-16030)

Destruction

Destruction means the ablation of benign, premalignant or malignant tissues by any method, with or without curettement, including local anesthesia, and not usually requiring closure.

Lund-Browder Diagram and Classification Method Table for Burn Estimations

The Lund-Browder Classification Method is used for estimating the extent, depth, and percentage of burns, allowing for the varying proportion of body surface in persons of different ages.

Area	Birth 1 year	1-4 years	5-9 years	10-14 years	15 years	Adult	2 degrees	3 degrees	Total	Donor areas

Total										

Any method includes electrosurgery, cryosurgery, laser and chemical treatment. Lesions include condylomata, papillomata, molluscum contagiosum, herpetic lesions, warts (ie, common, plantar, flat), milia, or other benign, premalignant (eg, actinic keratoses), or malignant lesions.

(For destruction of lesion(s) in specific anatomic sites, see 40820, 46900-46917, 46924, 54050-54057, 54065, 56501, 56515, 57061, 57065, 67850, 68135)

(For laser treatment for inflammatory skin disease, see 96920-96922)

(For paring or cutting of benign hyperkeratotic lesions (eg, corns or calluses), see 11055-11057)

(For sharp removal or electrosurgical destruction of skin tags and fibrocutaneous tags, see 11200, 11201)

(For cryotherapy of acne, use 17340)

(For initiation or follow-up care of topical chemotherapy (eg, 5-FU or similar agents), see appropriate office visits)

(For shaving of epidermal or dermal lesions, see 11300-11313)

(For excision of cicatricial lesion[s] [eg, full thickness excision, through the dermis], see 11400-11446)

(For incisional removal of burn scar, see 16035, 16036)

(For fractional ablative laser fenestration for functional improvement of traumatic or burn scars, see 0479T, 0480T)

Destruction, Benign or Premalignant Lesions

17000 Destruction (eg, laser surgery, electrosurgery, cryosurgery, chemosurgery, surgical curettement), premalignant lesions (eg, actinic keratoses); first lesion

- *CPT Changes: An Insider's View* 2002, 2007
- *CPT Assistant* Winter 90:3, Nov 97:12, Jun 99:10, May 06:19, Feb 07:10, Aug 09:7, Mar 10:10, Mar 12:7, May 12:13, Dec 17:14, Aug 21:3, Mar 22:14, Jan 24:37

+ 17003 second through 14 lesions, each (List separately in addition to code for first lesion)

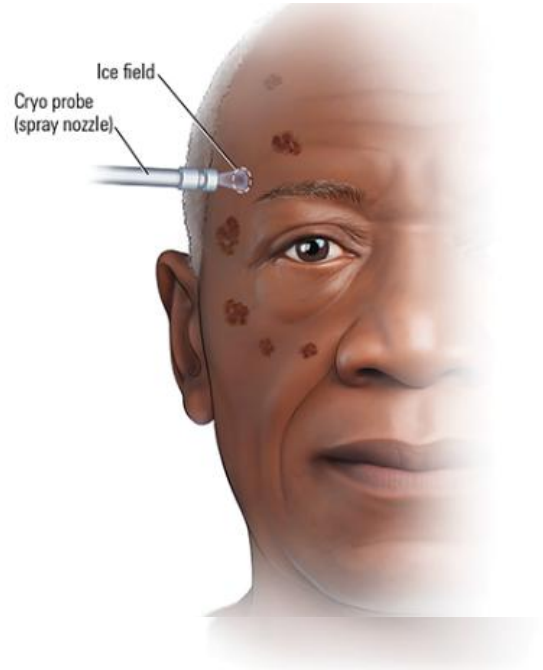
- *CPT Assistant* Nov 97:12, Jun 99:10, May 06:19, Feb 07:10, Aug 09:7, Mar 10:10, Dec 17:14, Jan 24:37

(Use 17003 in conjunction with 17000)

(For destruction of common or plantar warts, see 17110, 17111)

17004 Destruction (eg, laser surgery, electrosurgery, cryosurgery, chemosurgery, surgical curettement), premalignant lesions (eg, actinic keratoses), 15 or more lesions

- *CPT Changes: An Insider's View* 2002, 2007, 2020
- *CPT Assistant* Nov 97:12, Nov 98:7, Jun 99:10, Mar 03:21, Feb 07:10, Aug 09:7, Mar 10:10, Dec 17:14



(Do not report 17004 in conjunction with 17000-17003)

Destruction, Benign or Premalignant Lesions

17004

The lesions, seen as rough scaling patches scattered over the face, scalp, and ears, are destroyed by cryosurgery or other surgical means.

17106 Destruction of cutaneous vascular proliferative lesions (eg, laser technique); less than 10 sq cm

- *CPT Assistant* Winter 90:3, Apr 07:11, Jun 08:14, Aug 09:7, Dec 17:14, Sep 19:10

17107 10.0 to 50.0 sq cm

- *CPT Assistant* Winter 90:3, Apr 07:11, Jun 08:14, Aug 09:7, Dec 17:14, Jan 23:29

17108 over 50.0 sq cm

- *CPT Assistant* Winter 90:3, Apr 07:11, Jun 08:14, Aug 09:7, Dec 17:14

17110 Destruction (eg, laser surgery, electrosurgery, cryosurgery, chemosurgery, surgical curettement), of benign lesions other than skin tags or cutaneous vascular proliferative lesions; up to 14 lesions

- *CPT Changes: An Insider's View* 2002, 2007, 2008
- *CPT Assistant* Nov 97:13, Feb 07:10, Apr 07:11, Nov 08:10, Aug 09:7, Apr 16:3, Dec 17:14, Apr 20:10, Aug 22:16, Jan 23:29

17111 15 or more lesions

- *CPT Assistant* Nov 97:13, Feb 07:10, Apr 07:11, Nov 08:10, Aug 09:7, Apr 16:3, Dec 17:14, Aug 22:16

(For destruction of extensive cutaneous neurofibroma over 50-100 lesions, see 0419T, 0420T)

17250 Chemical cauterization of granulation tissue (ie, proud flesh)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* May 12:13, Dec 12:15, Dec 17:14

(Do not report 17250 with removal or excision codes for the same lesion)

(Do not report 17250 when chemical cauterization is used to achieve wound hemostasis)

(Do not report 17250 in conjunction with 97597, 97598, 97602 for the same lesion)

Destruction, Malignant Lesions, Any Method

17260 Destruction, malignant lesion (eg, laser surgery, electrosurgery, cryosurgery, chemosurgery, surgical curettement), trunk, arms or legs; lesion diameter 0.5 cm or less
- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* May 12:13, Dec 17:14

17261 lesion diameter 0.6 to 1.0 cm
- *CPT Assistant* Dec 17:14, Aug 21:3

17262 lesion diameter 1.1 to 2.0 cm
- *CPT Assistant* Dec 17:14

17263 lesion diameter 2.1 to 3.0 cm
- *CPT Assistant* Dec 17:14, Aug 23:16-19

17264 lesion diameter 3.1 to 4.0 cm
- *CPT Assistant* Dec 17:14

17266 lesion diameter over 4.0 cm
- *CPT Assistant* Dec 17:14

17270 Destruction, malignant lesion (eg, laser surgery, electrosurgery, cryosurgery, chemosurgery, surgical curettement), scalp, neck, hands, feet, genitalia; lesion diameter 0.5 cm or less
- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Dec 17:14

17271 lesion diameter 0.6 to 1.0 cm
- *CPT Assistant* Dec 17:14

17272 lesion diameter 1.1 to 2.0 cm
- *CPT Assistant* Dec 17:14

17273 lesion diameter 2.1 to 3.0 cm
- *CPT Assistant* Dec 17:14

17274 lesion diameter 3.1 to 4.0 cm
- *CPT Assistant* Dec 17:14

17276 lesion diameter over 4.0 cm
- *CPT Assistant* Dec 17:14

17280 Destruction, malignant lesion (eg, laser surgery, electrosurgery, cryosurgery, chemosurgery, surgical curettement), face, ears, eyelids, nose, lips, mucous membrane; lesion diameter 0.5 cm or less
- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Dec 17:14

17281 lesion diameter 0.6 to 1.0 cm
- *CPT Assistant* Dec 17:14, Aug 23:16-19

17282 lesion diameter 1.1 to 2.0 cm
- *CPT Assistant* Dec 17:14, Aug 23:16-19

17283 lesion diameter 2.1 to 3.0 cm
- *CPT Assistant* Dec 17:14

17284 lesion diameter 3.1 to 4.0 cm
- *CPT Assistant* Dec 17:14

17286 lesion diameter over 4.0 cm
- *CPT Assistant* Dec 17:14, Aug 21:3

Mohs Micrographic Surgery

Mohs micrographic surgery is a technique for the removal of complex or ill-defined skin cancer with histologic examination of 100% of the surgical margins. It requires the integration of an individual functioning in two separate and distinct capacities: surgeon and pathologist. If either of these responsibilities is delegated to another physician or other qualified health care professional who reports the services separately, these codes should not be reported. The Mohs surgeon removes the tumor tissue and maps and divides the tumor specimen into pieces, and each piece is embedded into an individual tissue block for histopathologic examination. Thus a tissue block in Mohs surgery is defined as an individual tissue piece embedded in a mounting medium for sectioning.

If repair is performed, use separate repair, flap, or graft codes. If a biopsy of a suspected skin cancer is performed on the same day as Mohs surgery because there was no prior pathology confirmation of a diagnosis, then report a diagnostic skin biopsy (11102, 11104, 11106) and frozen section pathology (88331) with modifier 59 to distinguish from the subsequent definitive surgical procedure of Mohs surgery.

(If additional special pathology procedures, stains or immunostains are required, see 88311-88314, 88342)

(Do not report 88314 in conjunction with 17311-17315 for routine frozen section stain (eg, hematoxylin and eosin, toluidine blue) performed during Mohs surgery. When a nonroutine histochemical stain on frozen tissue is utilized, report 88314 with modifier 59)

(Do not report 88302-88309 on the same specimen as part of the Mohs surgery)

17311 Mohs micrographic technique, including removal of all gross tumor, surgical excision of tissue specimens, mapping, color coding of specimens, microscopic examination of specimens by the surgeon, and histopathologic preparation including routine stain(s) (eg, hematoxylin and eosin, toluidine blue), head, neck, hands, feet, genitalia, or any location with surgery directly involving muscle, cartilage, bone, tendon, major nerves, or vessels; first stage, up to 5 tissue blocks

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Feb 14:10, Oct 14:14, Apr 23:24

+ 17312 each additional stage after the first stage, up to 5 tissue blocks (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Apr 23:24

(Use 17312 in conjunction with 17311)

17313 Mohs micrographic technique, including removal of all gross tumor, surgical excision of tissue specimens, mapping, color coding of specimens, microscopic examination of specimens by the surgeon, and histopathologic preparation including routine stain(s) (eg, hematoxylin and eosin, toluidine blue), of the trunk, arms, or legs; first stage, up to 5 tissue blocks

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Apr 23:24

+ 17314 each additional stage after the first stage, up to 5 tissue blocks (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Apr 23:24

(Use 17314 in conjunction with 17313)

+ 17315 Mohs micrographic technique, including removal of all gross tumor, surgical excision of tissue specimens, mapping, color coding of specimens, microscopic examination of specimens by the surgeon, and histopathologic preparation including routine stain(s) (eg, hematoxylin and eosin, toluidine blue), each additional block after the first 5 tissue blocks, any stage (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* May 12:13, Feb 14:10, Oct 14:14, Apr 23:24

(Use 17315 in conjunction with 17311-17314)

Other Procedures

17340 Cryotherapy (CO_2 slush, liquid N_2) for acne

CPT Assistant Jul 04:8, Apr 05:6

Clinical Examples in Radiology Fall 22:6

(For radiological supervision and interpretation, see 77053, 77054)

Breast biopsy procedures may be performed via a percutaneous or open approach and with or without imaging guidance.

Percutaneous image-guided breast biopsies, including the placement of breast localization device(s), when performed, are reported with 19081, 19082, 19083, 19084, 19085, 19086. Imaging codes 76098, 76942, 77002, 77021 may not be separately reported for the same lesion. When more than one percutaneous breast biopsy with or without localization device placement is performed using the same imaging modality, use an add-on code whether the additional service(s) is on the same or contralateral breast. If additional percutaneous biopsies with or without localization device placements are performed using different imaging modalities, report another primary code for each additional biopsy with or without localization device placement performed using a different image guidance modality.

To report bilateral image-guided breast biopsies, report 19081, 19083, 19085 for the initial biopsy. The contralateral and each additional breast image-guided biopsy are then reported with 19082, 19084, 19086.

Percutaneous breast biopsies without imaging guidance are reported with 19100.

Open incisional breast biopsy (19101) does not include imaging guidance. However, if an open incisional biopsy is performed after image-guided placement of a localization device, the appropriate image-guided localization device placement code (19281, 19282, 19283, 19284, 19285, 19286, 19287, 19288) may also be reported.

Percutaneous cryosurgical ablation of a fibroadenoma (19105) includes ultrasound guidance and, therefore, 76940, 76942 may not be separately reported. Code 19105 may only be reported once per cryoprobe insertion site, even if several adjacent lesions are ablated.

Open excision of a breast lesion (eg, lesions of breast duct[s], cyst[s], benign or malignant tumor[s]), without specific attention to adequate surgical margins, with or without the preoperative placement of radiological markers are reported with 19110, 19112, 19120, 19125, 19126. If an open excision of a breast lesion is performed after image-guided placement of a localization device, the appropriate image-guided localization device placement code (19281, 19282, 19283, 19284, 19285, 19286, 19287, 19288) may also be reported.

To report bilateral procedures for 19100, 19101, 19105, 19110, 19112, 19120, report modifier 50 with the procedure code.

19081 Biopsy, breast, with placement of breast localization device(s) (eg, clip, metallic pellet), when performed, and imaging of the biopsy specimen, when performed, percutaneous; first lesion, including stereotactic guidance

(Intraoperative placement of clip[s] is not separately reported)

Introduction

Percutaneous image-guided placement of breast localization device(s) without image-guided breast biopsy(ies) is reported with 19281, 19282, 19283, 19284, 19285, 19286, 19287, 19288. When more than one localization device placement without image-guided biopsy is performed using the same imaging modality, report an add-on code whether the additional service(s) is on the same or contralateral breast. If additional localization device placements without image-guided biopsy(ies) are performed using different imaging modalities, report another primary code for each additional localization device placement without image-guided biopsy performed using a different image guidance modality.

To report bilateral image-guided placement of localization devices report 19281, 19283, 19285, or 19287 for the initial lesion localized. The contra-lateral and each additional breast image-guided localization device placement is reported with code 19282, 19284, 19286 or 19288.

When an open breast biopsy or open excision of a breast lesion is performed after image-guided percutaneous placement of a localization device, the appropriate image-guided localization device placement code (19281, 19282, 19283, 19284, 19285, 19286, 19287, 19288) may also be reported.

Code 19294 is used to report the preparation of the tumor cavity with placement of an intraoperative radiation therapy applicator concurrent with partial mastectomy (19301, 19302).

Codes 19296, 19297, 19298 describe placement of radiotherapy catheters (afterloading expandable or afterloading brachytherapy) into the breast for interstitial radioelement application either concurrent or on a separate date from a partial mastectomy procedure. Imaging guidance is included and may not be separately reported.

19281 Placement of breast localization device(s) (eg, clip, metallic pellet, wire/needle, radioactive seeds), percutaneous; first lesion, including mammographic guidance
- *CPT Changes: An Insider's View* 2014

CPT Assistant Apr 05:6-7, 9, 16, Nov 05:15, Apr 09:3, Mar 10:10

Mastectomy Procedures

Mastectomy procedures (with the exception of gynecomastia [19300]) are performed either for treatment or prevention of breast cancer.

Code 19301 describes a partial mastectomy where only a portion of the ipsilateral breast tissue is removed (eg, lumpectomy, tylectomy, quadrantectomy, segmentectomy). When a complete axillary lymphadenectomy is performed in addition to a partial mastectomy, report 19302. When breast tissue is removed for breast-size reduction and not for treatment or prevention of breast cancer, report 19318 (reduction mammaplasty).

Code 19303 describes total removal of ipsilateral breast tissue with or without removal of skin and/or nipples (eg, nipple-sparing), for treatment or prevention of breast cancer. Code 19303 does not include excision of pectoral muscle(s) and/or axillary and internal mammary lymph nodes. When a total mastectomy is performed for gynecomastia, report 19300.

Codes 19305, 19306, 19307 describe radical procedures that include total removal of the ipsilateral breast tissue, including the nipple for treatment of breast cancer and excision of pectoral muscle(s) and/or axillary lymph nodes and/or internal mammary lymph nodes.

To report bilateral procedures for 19300, 19301, 19302, 19303, 19305, 19306, 19307, report modifier 50 with the procedure code.

19300 Mastectomy for gynecomastia
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Feb 07:4, Mar 14:13, May 20:9

(For breast tissue removed for breast-size reduction for other than gynecomastia, use 19318)

19301 Mastectomy, partial (eg, lumpectomy, tylectomy, quadrantectomy, segmentectomy);
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Feb 07:4, Dec 07:8, Sep 08:5, Mar 10:10, Nov 13:14, Mar 15:5, Oct 17:9, May 20:9, May 21:11

(For intraoperative assessment for abnormal [tumor] tissue, in-vivo, following partial mastectomy using computer-aided fluorescence imaging, use 19301 in conjunction with 0945T)

19302 with axillary lymphadenectomy
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Feb 07:4, Dec 07:8, Sep 08:5, Mar 10:10, Mar 15:5, May 20:9, Nov 20:12, May 21:11

(For placement of radiotherapy afterloading balloon/brachytherapy catheters, see 19296-19298)

(Intraoperative placement of clip[s] is not separately reported)

(For the preparation of tumor cavity with placement of an intraoperative radiation therapy applicator concurrent with partial mastectomy, use 19294)

(For radiofrequency spectroscopy, real time, intraoperative margin assessment, at the time of partial mastectomy, with report, use 0546T)

(For 3-dimensional volumetric specimen imaging, use 0694T)

19303 Mastectomy, simple, complete
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Feb 07:4, Mar 15:5, Dec 19:4, May 20:9, May 21:11

(Intraoperative placement of clip[s] is not separately reported)

(For immediate or delayed insertion of implant, see 19340, 19342)

(For gynecomastia, use 19300)

(For breast tissue removed for breast-size reduction for gynecomastia, use 19300)

(For breast tissue removed for breast-size reduction for other than gynecomastia, use 19318)

19305 Mastectomy, radical, including pectoral muscles, axillary lymph nodes
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Feb 07:4, Sep 08:5, May 20:9, May 21:11

(Intraoperative placement of clip[s] is not separately reported)

(For immediate or delayed insertion of implant, see 19340, 19342)

19306 Mastectomy, radical, including pectoral muscles, axillary and internal mammary lymph nodes (Urban type operation)
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Feb 07:4, Sep 08:5, May 20:9, May 21:11

(Intraoperative placement of clip[s] is not separately reported)

(For immediate or delayed insertion of implant, see 19340, 19342)

19307 Mastectomy, modified radical, including axillary lymph nodes, with or without pectoralis minor muscle, but excluding pectoralis major muscle
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Feb 07:4, Sep 08:5, Mar 15:5, May 20:9, May 21:11

(Intraoperative placement of clip[s] is not separately reported)

(For immediate or delayed insertion of implant, see 19340, 19342)

Repair and/or Reconstruction

Breast reconstruction is performed to repair defects due to congenital anomaly or loss of breast tissue after a surgical excision. The goal of breast reconstruction is to correct the anatomic defect and to restore form and breast symmetry. A breast can be reconstructed using a single technique or a combination of techniques, and each technique can stand alone. In addition, both breasts may be reconstructed at the same time, but may use different techniques or a combination of techniques. In many instances breast reconstruction requires more than one planned procedure or may require revisions.

The native breast may be altered using different techniques. The breast and breast mound can be lifted with a mastopexy (19316), reduced in volume with a breast reduction (19318), or augmented with a breast implant (19325).

Post-mastectomy breast reconstruction may be performed using a variety of techniques. An implant-based reconstruction involves placement of a device filled with fluid (eg, saline, silicone gel) to provide volume to the breast. In immediate reconstruction, an implant is primarily placed at the time of a mastectomy (19340). In delayed reconstruction, an implant is placed at any date separate from the mastectomy (19342). This includes placement of any new implant or replacement of an existing implant within the mastectomy defect or reconstructed breast. The removal of an intact breast implant for replacement is included in 19342.

A breast implant cannot always be placed due to the lack of an adequate skin envelope. Code 19357 describes insertion of a tissue expander, which is a device that is surgically implanted to create an adequately sized pocket for subsequent insertion of a permanent implant. A tissue expander is an inflatable device placed beneath the skin and chest muscle, into which saline is injected over a period of weeks in the office to create the implant pocket. The tissue expander is eventually removed and may be replaced with a permanent breast implant (11970). Placement of either a breast implant (19340, 19342) or tissue expander (19357) may be reported separately when performed with flap reconstruction (19361, 19364, 19367, 19368, 19369).

Code 11970 describes the removal of a tissue expander with concurrent insertion of a permanent breast implant. Code 11970 includes removal of the expander, minor revisions to the breast capsule and placement of the new breast implant. Code 19370 may be reported in addition to 11970 if more extensive capsular revision is performed. Code 11971 describes the removal of a tissue expander without the replacement of an expander or implant.

Autologous breast reconstruction involves harvesting a flap of skin, subcutaneous fat and/or muscle from one area of the body and relocating the tissue to the anterior chest to create a new breast mound. Flap reconstruction may be performed at the time of mastectomy or in a delayed fashion depending on patient preference and other oncologic treatments.

Code 19361 describes breast reconstruction with a flap composed of the latissimus dorsi muscle including some of the overlying skin and subcutaneous fat to reconstruct the breast mound. This flap is left on its vascular pedicle and tunneled beneath the armpit skin to the anterior chest to rebuild the breast. The blood supply to the flap is left attached to its origin in the axilla. To give the breast mound additional volume, a tissue expander or permanent breast implant may be placed beneath the latissimus flap. Placement of either a breast implant (19340, 19342) or tissue expander (19357) may be reported separately.

Code 19364 describes a microsurgical free tissue transfer of skin and subcutaneous fat and/or muscle for breast reconstruction. This code includes the flap harvest, microsurgical anastomosis of one artery and two veins with use of an operating microscope, flap inset as a breast mound, and donor-site closure. Typical free flaps include free transverse rectus abdominis myocutaneous (fTRAM), deep inferior epigastric perforator (DIEP), superficial inferior epigastric artery (SIEA), or gluteal artery perforator (GAP) flaps.

Code 19367 describes a single-pedicled transverse rectus abdominis myocutaneous (TRAM) flap, in which skin, subcutaneous fat, and a large portion of the rectus abdominis muscle from the lower abdomen is moved beneath the upper abdominal wall skin up to the chest to rebuild the breast. The blood supply to the flap is left attached to its origin in the abdomen.

Code 19368 describes “supercharging” of a single-pedicled TRAM flap. This is typically performed to increase blood flow in TRAM flaps with marginal circulation to ensure flap survival. In addition to the standard unipedicle TRAM procedure, the inferior epigastric artery and/or veins are also anastomosed to recipient vessels in the chest using microsurgical techniques.

Code 19369 describes a bipedicled TRAM flap in which skin, subcutaneous fat, and both rectus muscles are harvested for the reconstruction of a single breast. The dual-blood supply to the flap is left attached to its origins in the abdomen.

Secondary and ancillary breast-reconstruction procedures include nipple reconstruction (19350), implant adjustments through revisions to the breast capsule (19370), or removal of the entire breast capsule via a complete capsulectomy (19371) to achieve correct breast tissue positioning. In addition, procedures may be performed on the contralateral breast to create symmetry (19316, 19318, 19325). Removal of an intact breast implant without replacement is reported with 19328. Removal of a ruptured breast implant, including the implant contents, is reported with 19330. A complete capsulectomy (19371) includes removal of the breast implant and all intracapsular contents.

Code 19380 describes a revision of a reconstructed breast, including significant excision of tissue re-advancement or re-inset of flaps. For autologous reconstruction, 19380 includes revisions of the flap position on the chest wall, removal of portions of the flap (via direct excision or liposuction), re-shaping of the flap, or scar revisions. However, if a limited procedure is performed with a defined code (eg, scar revision) then the more specific code should be used. The placement of a new implant (19342) or autologous fat grafting for increased volume (15771, 15772) may be separately reportable. For implant-based reconstruction, 19380 includes revisions to the skin and capsule when performed together. The exchange for a new or different size/shape/type of implant (19342) or autologous fat grafting for increased volume/contour irregularities (15771, 15772) may be reported separately. Nipple reconstruction is reported with 19350 and includes local flaps (14000, 14001), areolar skin grafting (15100, 15200, 15201), and subsequent tattooing (11920, 11921, 11922).

Code 19396 describes the formation of a moulage cast of a patient's chest defect. The mold is used to fabricate a specific, custom-made implant that fits the patient's defect.

(To report bilateral procedure, report modifier 50 with the procedure code)

(For biologic implant for soft tissue reinforcement, use 15777 in conjunction with primary procedure)

19316 Mastopexy

- *CPT Assistant* Jan 03:7, Apr 05:6, Feb 12:11

19318 Breast reduction

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Jan 03:7, Apr 05:6, Apr 14:10, Apr 21:3

19325 Breast augmentation with implant

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Apr 05:6, Apr 21:3, Sep 22:18

(For fat grafting performed in conjunction with 19325, see 15771, 15772)

19328 Removal of intact breast implant

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Apr 05:6, Apr 21:3

(Do not report 19328 for removal of tissue expander)

(Do not report 19328 in conjunction with 19370)

(For removal of tissue expander with placement of breast implant, use 11970)

(For removal of tissue expander without replacement, use 11971)

19330 Removal of ruptured breast implant, including implant contents (eg, saline, silicone gel)

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Nov 01:11, Apr 05:6, Apr 21:3

(Do not report 19330 for removal of ruptured tissue expander)

(For removal of ruptured tissue expander with placement of breast implant, use 11970)

(For removal of ruptured tissue expander without replacement, use 11971)

(For placement of new breast implant during same operative session, use 19342)

19340 Insertion of breast implant on same day of mastectomy (ie, immediate)

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Aug 96:8, Apr 05:6, Aug 05:1, Mar 10:9, Dec 15:18, Apr 21:3

19342 Insertion or replacement of breast implant on separate day from mastectomy

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Aug 96:8, Apr 05:6, Aug 05:1, Jan 13:15, Nov 15:10, Apr 21:3, Sep 21:13-14, Sep 22:18, May 23:24

(Do not report 19342 in conjunction with 19328 for removal of implant in same breast)

(For removal of tissue expander and replacement with breast implant, use 11970)

(For supply of implant, use 99070)

19350 Nipple/areola reconstruction

- *CPT Assistant* Aug 96:11, Apr 05:6, Jan 13:15, Aug 16:9

(Do not report 19350 in conjunction with 11920, 11921, 11922, 14000, 14001, 15100, 15200, 15201)

19355 Correction of inverted nipples

- *CPT Assistant* Apr 05:6

19357 Tissue expander placement in breast reconstruction, including subsequent expansion(s)

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Winter 91:2, Apr 05:6, Aug 05:1, Mar 10:9, Oct 13:15, Feb 15:10, Apr 21:3, Sep 22:18, Aug 24:17

19361 Breast reconstruction; with latissimus dorsi flap

- *CPT Changes: An Insider's View* 2007, 2021
- *CPT Assistant* Apr 05:6, Aug 05:1, Mar 10:9, Feb 15:10, Nov 19:14, Apr 21:3

(For insertion of breast implant with latissimus dorsi flap on same day of mastectomy, use 19340)

(For insertion of breast implant with latissimus dorsi flap on day separate from mastectomy, use 19342)

(For insertion of tissue expander with latissimus dorsi flap, use 19357)

19364 with free flap (eg, fTRAM, DIEP, SIEA, GAP flap)

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Aug 96:8, Nov 98:7, Apr 05:6, Aug 05:1, Jun 10:8, Dec 11:14, Jul 12:12, Mar 13:13, Apr 14:10, Feb 15:10, Nov 19:14, Dec 20:11, Jun 21:13, Feb 25:25

(Do not report code 69990 in addition to code 19364)

19367 with single-pedicled transverse rectus abdominis myocutaneous (TRAM) flap

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Nov 98:7, Apr 05:6, Aug 05:1, Feb 15:10, Nov 19:14, Apr 21:4

19368 with single-pedicled transverse rectus abdominis myocutaneous (TRAM) flap, requiring separate microvascular anastomosis (supercharging)

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Nov 98:7, Apr 05:6, Aug 05:1, Feb 15:10, Nov 19:14, Apr 21:4

(Do not report code 69990 in addition to code 19368)

19369 with bipedicled transverse rectus abdominis myocutaneous (TRAM) flap

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Oct 00:3, Apr 05:6, Aug 05:1, Feb 15:10, Nov 19:14, Apr 21:4

(19361, 19364, 19367, 19368, 19369 include harvesting of the flap, closure of the donor site, insetting and shaping the flap)

19370 Revision of peri-implant capsule, breast, including capsulotomy, capsulorrhaphy, and/or partial capsulectomy

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Aug 96:8, Apr 05:6, Dec 15:18, Apr 21:4, Sep 21:13, Sep 22:18

(Do not report 19370 in conjunction with 19328 for removal and replacement of same implant to access capsule)

(For removal and replacement with new implant, use 19342)

19371 Peri-implant capsulectomy, breast, complete, including removal of all intracapsular contents

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Aug 96:8, Nov 01:11, Apr 05:6, Jan 13:15, Apr 21:5

(Do not report 19371 in conjunction with 19328, 19330)

(Do not report 19371 in conjunction with 19370 in same breast)

(For removal and replacement with new implant, use 19342)

19380 Revision of reconstructed breast (eg, significant removal of tissue, re-advancement and/or re-inset of flaps in autologous reconstruction or significant capsular revision combined with soft tissue excision in implant-based reconstruction)

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Apr 05:6, Dec 15:18, Dec 17:13, Nov 19:14, Apr 21:4, Sep 21:13-14, Sep 22:18, May 23:24

(Do not report 19380 in conjunction with 12031, 12032, 12034, 12035, 12036, 12037, 13100, 13101, 13102, 15877, 19316, 19318, 19370, for the same breast)

19396 Preparation of moulage for custom breast implant

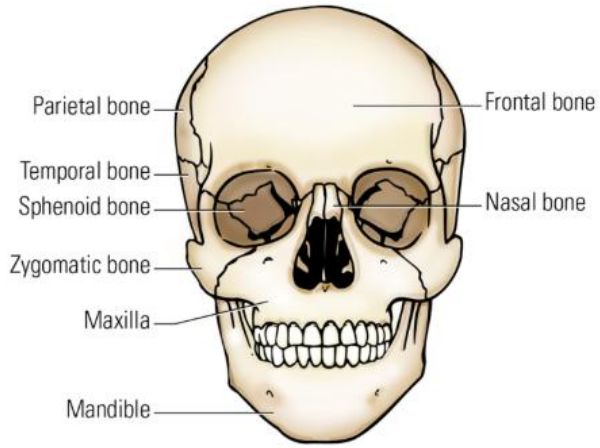
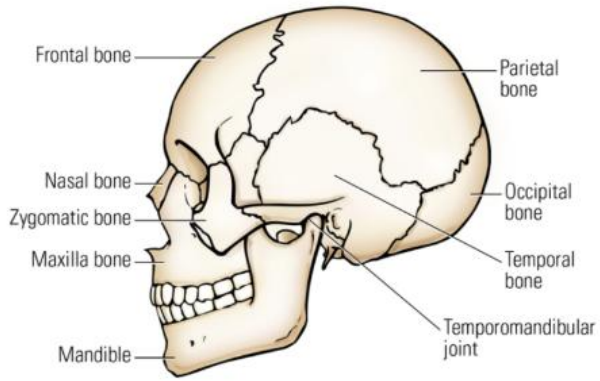
Surgery

Musculoskeletal System* (20100-29999)

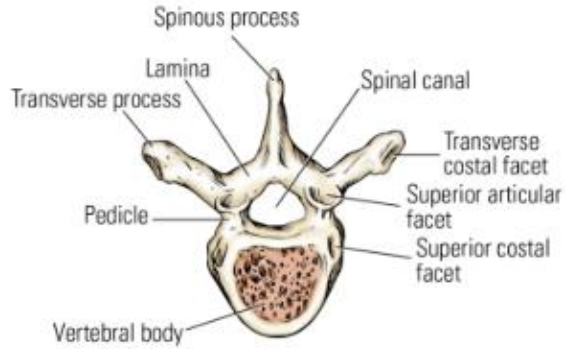


The following is a listing of headings and subheadings that appear within the Musculoskeletal System section of the CPT codebook. The subheadings or subsections denoted with asterisks (*) below have special instructions unique to that subsection. Where these are indicated, special notes or guidelines will be presented preceding those procedural terminology listings, referring to that subsection specifically. Note that all code ranges in each subsection are listed as they appear in the subsection, even if the code numbers are out of numerical sequence and/or repeated in the next subsection.

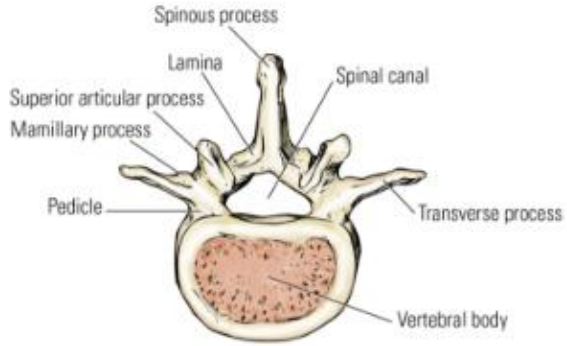
General (20100-20999)
- **Incision (20100-20103)**
- **Wound Exploration—Trauma (eg, Penetrating Gunshot, Stab Wound)* (20100-20103)**
- **Excision (20150-20251)**
- **Introduction or Removal (20500-20705)**



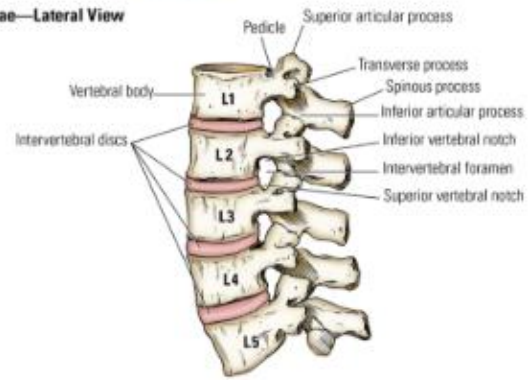
Skeletal System



Skull, Frontal View



Skull, Lateral View



Thoracic Vertebra—Superior View

Lumbar Vertebra—Superior View

Lumbar Vertebrae—Lateral View

- Replantation (20802-20838)
- Grafts (or Implants)* (20900-20939)

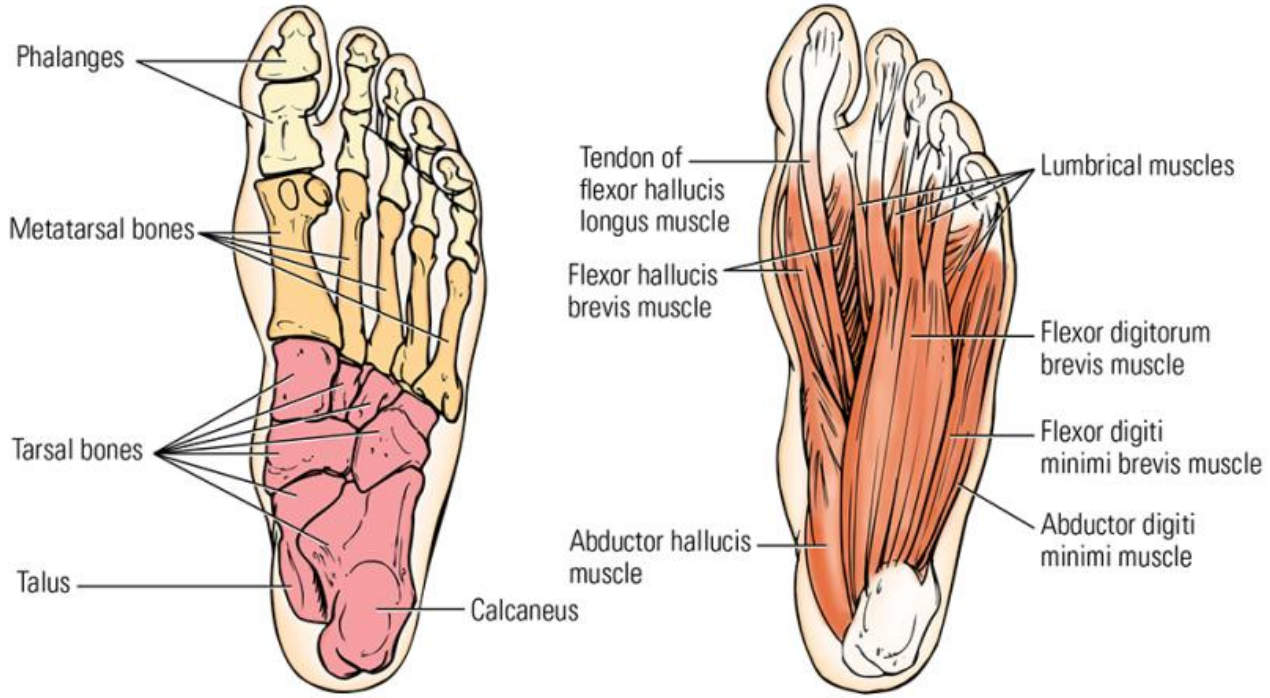
Shoulder* (23000-23929)
- Incision (23000-23044)
- Excision (23065-23220)
- Introduction or Removal (23330-23350)
- Repair, Revision, and/or Reconstruction (23395-23491)
- Fracture and/or Dislocation (23500-23680)
- Manipulation (23700)
- Arthrodesis (23800-23802)
- Amputation (23900-23921)
- Other Procedures (23929)

Humerus (Upper Arm) and Elbow* (23930-24999)
- Incision (23930-24006)
- Excision (24065-24155)
- Introduction or Removal (24160-24220)
- Repair, Revision, and/or Reconstruction (24300-24498)
- Fracture and/or Dislocation (24500-24685)
- Arthrodesis (24800-24802)
- Amputation (24900-24940)
- Other Procedures (24999)

Forearm and Wrist* (25000-25999)
- Incision (25000-25040)
- Excision (25065-25240)
- Introduction or Removal (25246-25259)
- Repair, Revision, and/or Reconstruction (25260-25492)

Bones, Muscles, and Tendons of Hand



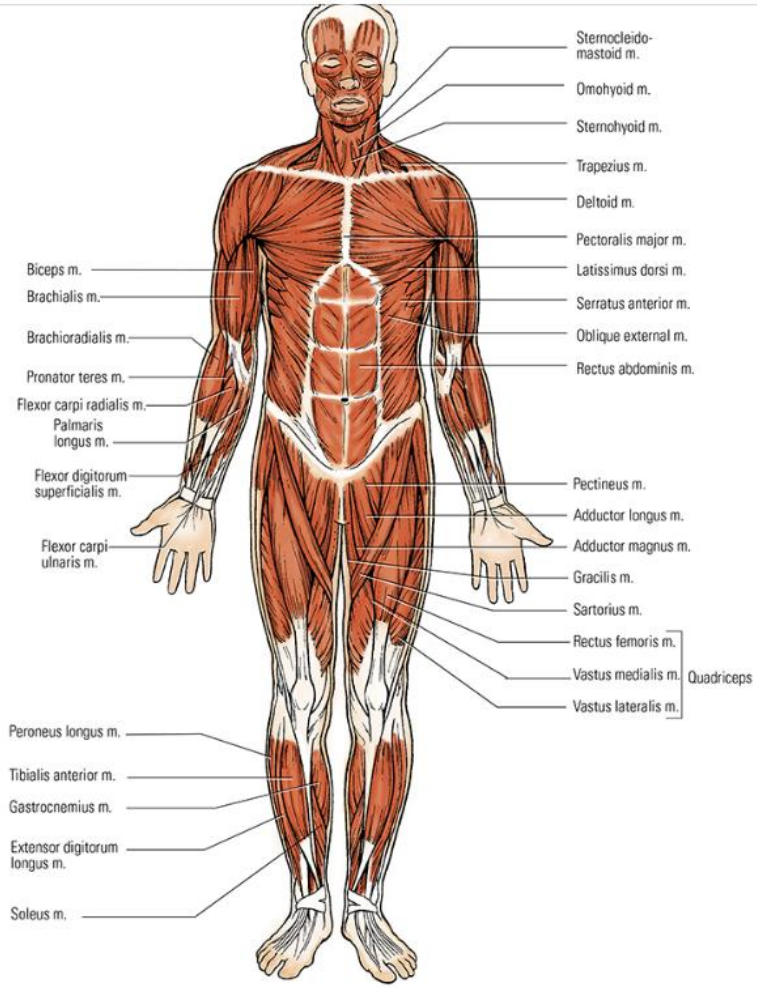
- Fracture and/or Dislocation (25500-25695)
- Arthrodesis (25800-25830)
- Amputation (25900-25931)
- Other Procedures (25999)

Hand and Fingers (26010-26989)
- Incision (26010-26080)
- Excision (26100-26262)
- Introduction or Removal (26320)
- Repair, Revision, and/or Reconstruction (26340-26596)
- Fracture and/or Dislocation (26600-26785)
- Arthrodesis (26820-26863)
- Amputation (26910-26952)
- Other Procedures (26989)

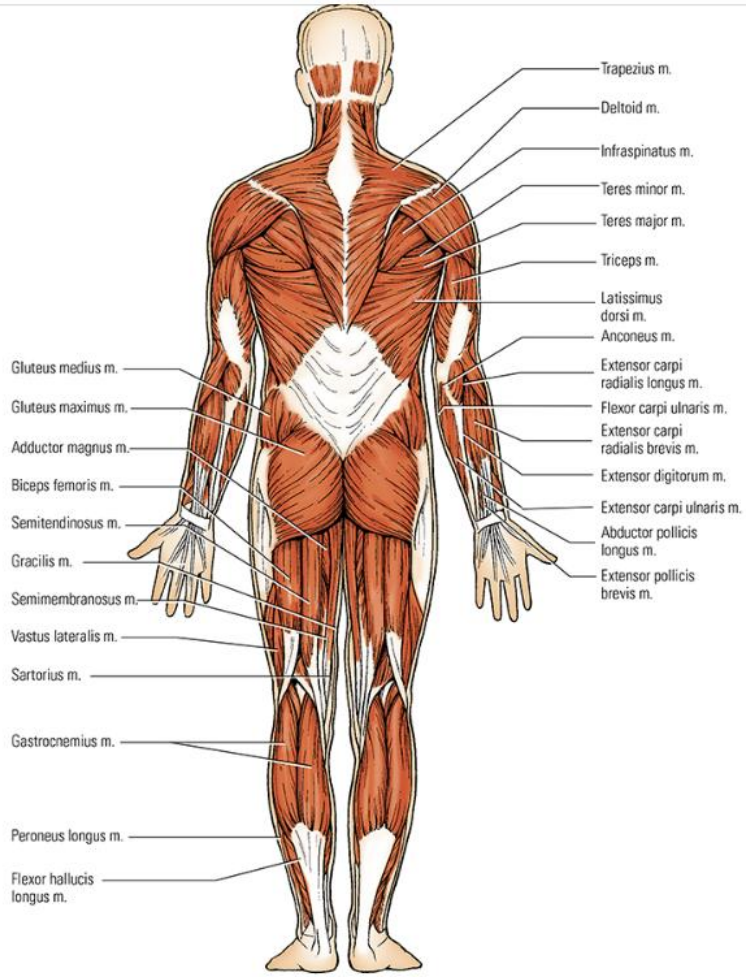
Pelvis and Hip Joint* (26990-27299)
- Incision (26990-27036)
- Excision (27040-27080)
- Introduction or Removal (27086-27096)
- Repair, Revision, and/or Reconstruction (27097-27187)
- Fracture and/or Dislocation (27197-27269)
- Manipulation (27275)
- Arthrodesis* (27278-27286)
- Amputation (27290-27295)
- Other Procedures (27299)

Femur (Thigh Region) and Knee Joint* (27301-27599)
- Incision (27301-27310)
- Excision (27323-27365)
- Introduction or Removal (27369-27372)
- Repair, Revision, and/or Reconstruction (27380-27499)
- Fracture and/or Dislocation (27500-27566)
- Manipulation (27570)
- Arthrodesis (27580)
- Amputation (27590-27598)
- Other Procedures (27599)

Leg (Tibia and Fibula) and Ankle Joint (27600-27899)
- Incision (27600-27612)
- Excision (27613-27647)
- Introduction or Removal (27648)
- Repair, Revision, and/or Reconstruction (27650-27745)
- Fracture and/or Dislocation (27750-27848)
- Manipulation (27860)
- Arthrodesis (27870-27871)
- Amputation (27880-27889)
- Other Procedures (27892-27899)



Bones and Muscles of Foot



Foot and Toes (28001-28899)
- Incision (28001-28035)
- Excision (28043-28175)
- Introduction or Removal (28190-28193)
- Repair, Revision, and/or Reconstruction (28200-28360)
- Fracture and/or Dislocation (28400-28675)
- Arthrodesis (28705-28760)
- Amputation (28800-28825)
- Other Procedures (28890-28899)

Application of Casts and Strapping* (29000-29799)
- Body and Upper Extremity (29000-29280)
  - Casts (29000-29086)
  - Splints (29105-29131)
  - Strapping—Any Age (29200-29280)
- Lower Extremity (29305-29584)
  - Casts (29305-29450)
  - Splints (29505-29515)
  - Strapping—Any Age (29520-29584)
- Removal or Repair* (29700-29750)
- Other Procedures (29799)

Endoscopy/Arthroscopy* (29800-29999)

Muscular System, Front

Muscular System, Back

Musculoskeletal System

All services that appear in the Musculoskeletal System section include the application and removal of the first cast, splint, or traction device, when performed. Supplies may be reported separately. If a cast is removed by someone other than the physician or other qualified health care professional who applied the cast, report a cast removal code (29700, 29705, 29710).

Subsequent replacement of cast, splint, or strapping (29000-29750) and/or traction device (eg, 20690, 20692) during or after the global period may be reported separately.

A cast, splint, or strapping is not considered part of the preoperative care; therefore, the use of modifier 56 for preoperative management only is not applicable.

Codes for obtaining autogenous bone grafts, cartilage, tendon, fascia lata grafts or other tissues through separate incisions are to be used only when the graft is not already listed as part of the basic procedure.

Fracture and/or Dislocation Treatment

Fracture and dislocation treatment codes appear throughout the Musculoskeletal System section. These codes are categorized by the type of treatment (closed, percutaneous, open) and type of stabilization (fixation, immobilization). There is no coding correlation between the type of fracture/dislocation (eg, open [compound], closed) and the type of treatment (eg, closed, percutaneous, open) provided. For example, a closed fracture may require open treatment.

Fracture/Dislocation Treatment Definitions

Manipulation: Reduction by the application of manually applied forces or traction to achieve satisfactory alignment of the fracture or dislocation. If satisfactory alignment (reduction) is not maintained and requires subsequent re-reduction of a fracture or dislocation by the same physician or same qualified health care professional, append modifier 76 to the fracture/dislocation treatment code.

Traction: The application of a distracting or traction force to the spine or a limb. ***Skeletal traction*** includes a wire, pin, screw, or clamp that is attached to (penetrates) bone. ***Skin traction*** is the application of force to a limb using strapping or a device that is applied directly to the skin only.

Closed treatment: The treatment site is not surgically opened (ie, not exposed to the external environment nor directly visualized). Closed treatment of a fracture/dislocation may be performed without manipulation (eg, application of cast, splint, or strapping), with manipulation, with skeletal traction, and/or with skin traction.

Casting, splinting, or strapping used solely to temporarily stabilize the fracture for patient comfort is not considered closed treatment.

Percutaneous skeletal fixation: Treatment that is neither open nor closed. In this procedure, the fracture fragments are not visualized, but fixation (eg, pins, screws) is placed across the fracture site, typically with imaging guidance.

Open treatment: The site is opened surgically to expose the fracture/dislocation to the external environment for treatment, or the fracture/dislocation is treated through the traumatic wound or an extension thereof or is treated with an intramedullary nail or other internal fixation device placed through a surgical exposure that is remote from the fracture site with or without direct visualization of the fracture site.

External fixation: The use of pins and/or wires that penetrate the bone(s) and interconnection devices (eg, clamps, bars, rings) for fracture/dislocation treatment. External fixation may be used for temporary or long-term fracture/dislocation treatment. ***Uniplanar external fixation*** places all the pins in approximately the same plane but may also include triangular fixation across a joint. ***Multiplanar external fixation*** uses transosseous wires and threaded pins placed in several planes that are held with interconnected stabilizing and/or tensioning rings and/or half rings. External fixation may be used for all types of fracture/dislocation treatment (ie, closed, percutaneous, open). Codes for external fixation are reported separately only when external fixation is not listed in the code descriptor as inherent to the procedure.

Reporting Fracture and/or Dislocation Treatment Codes

The physician or other qualified health care professional providing fracture/dislocation treatment should report the appropriate fracture/dislocation treatment codes for the service he or she provided. If the person providing the initial treatment will **not** be providing subsequent treatment, modifier 54 should be appended to the fracture/dislocation treatment codes. If treatment of a fracture as defined above is not performed, report an evaluation and management code.

Excision/Resection Soft Tissue Tumors Definitions

Excision of subcutaneous soft connective tissue tumors (including simple or intermediate repair) involves the simple or marginal resection of tumors confined to subcutaneous tissue below the skin but above the deep fascia. These tumors are usually benign and are resected without removing a significant amount of surrounding normal tissue. Code selection is based on the location and size of the tumor. Code selection is determined by measuring the greatest diameter of the tumor plus that margin required for complete excision of the tumor. The margins refer to the most narrow margin required to adequately excise the tumor, based on the physician's judgment. The measurement of the tumor plus margin is made at the time of the excision. Appreciable vessel exploration and/or neuroplasty should be reported separately. Extensive undermining or other techniques to close a defect created by skin excision may require a complex repair which should be reported separately. Dissection or elevation of tissue planes to permit resection of the tumor is included in the excision. For excision of benign lesions of cutaneous origin (eg, sebaceous cyst), see 11400-11446.

Excision of fascial or subfascial soft tissue tumors (including simple or intermediate repair) involves the resection of tumors confined to the tissue within or below the deep fascia, but not involving the bone. These tumors are usually benign, are often intramuscular, and are resected without removing a significant amount of surrounding normal tissue. Code selection is based on size and location of the tumor. Code selection is determined by measuring the greatest diameter of the tumor plus that margin required for complete excision of the tumor. The margins refer to the most narrow margin required to adequately excise the tumor, based on individual judgment. The measurement of the tumor plus margin is made at the time of the excision. Appreciable vessel exploration and/or neuroplasty should be reported separately. Extensive undermining or other techniques to close a defect created by skin excision may require a complex repair which should be reported separately. Dissection or elevation of tissue planes to permit resection of the tumor is included in the excision.

Digital (ie, fingers and toes) subfascial tumors are defined as those tumors involving the tendons, tendon sheaths, or joints of the digit. Tumors which simply abut but do not breach the tendon, tendon sheath, or joint capsule are considered subcutaneous soft tissue tumors.

Radical resection of soft connective tissue tumors (including simple or intermediate repair) involves the resection of the tumor with wide margins of normal tissue. Appreciable vessel exploration and/or neuroplasty repair or reconstruction (eg, adjacent tissue transfer[s], flap[s]) should be reported separately. Extensive undermining or other techniques to close a defect created by skin excision may require a complex repair which should be reported separately. Dissection or elevation of tissue planes to permit resection of the tumor is included in the excision. Although these tumors may be confined to a specific layer (eg, subcutaneous, subfascial), radical resection may involve removal of tissue from one or more layers. Radical resection of soft tissue tumors is most commonly used for malignant connective tissue tumors or very aggressive benign connective tissue tumors. Code selection is based on size and location of the tumor. Code selection is determined by measuring the greatest diameter of the tumor plus that margin required for complete excision of the tumor. The margins refer to the most narrow margin required to adequately excise the tumor, based on individual judgment. The measurement of the tumor plus margin is made at the time of the excision. For radical resection of tumor(s) of cutaneous origin (eg, melanoma), see 11600-11646.

Radical resection of bone tumors (including simple or intermediate repair) involves the resection of the tumor with wide margins of normal tissue. Appreciable vessel exploration and/or neuroplasty and complex bone repair or reconstruction (eg, adjacent tissue transfer[s], flap[s]) should be reported separately. Extensive undermining or other techniques to close a defect created by skin excision may require a complex repair which should be reported separately. Dissection or elevation of tissue planes to permit resection of the tumor is included in the excision. It may require removal of the entire bone if tumor growth is extensive (eg, clavicle). Radical resection of bone tumors is usually performed for malignant tumors or very aggressive benign tumors. If surrounding soft tissue is removed during these procedures, the radical resection of soft tissue tumor codes should not be reported separately. Code selection is based solely on the location of the tumor, **not** on the size of the tumor or whether the tumor is benign or malignant, primary or metastatic.

General

Incision

(For incision and drainage of subfascial soft tissue abscess, see appropriate incision and drainage for specific anatomic sites)

Wound Exploration—Trauma (eg, Penetrating Gunshot, Stab Wound)

20100-20103 relate to wound(s) resulting from penetrating trauma. These codes describe surgical exploration and enlargement of the wound, extension of dissection (to determine penetration), debridement, removal of foreign body(s), ligation or coagulation of minor subcutaneous and/or muscular blood vessel(s), of the subcutaneous tissue, muscle fascia, and/or muscle, not requiring thoracotomy or laparotomy. If a repair is done to major structure(s) or major blood vessel(s) requiring thoracotomy or laparotomy, then those specific code(s) would supersede the use of codes 20100-20103. To report simple, intermediate, or complex repair of wound(s) that do not require enlargement of the wound, extension of dissection, etc, as stated above, use specific Repair code(s) in the **Integumentary System** section.

20100 Exploration of penetrating wound (separate procedure); neck

CPT Assistant Jun 96:7, Aug 96:10, Sep 06:13

20101 chest

CPT Assistant Jun 96:7, Sep 06:13

20102 abdomen/flank/back

- *CPT Assistant* Feb 15:6, Jul 15:10
- *Clinical Examples in Radiology* Spring 15:6, Winter 23:12

(Do not report 20605, 20606 in conjunction with 76942)

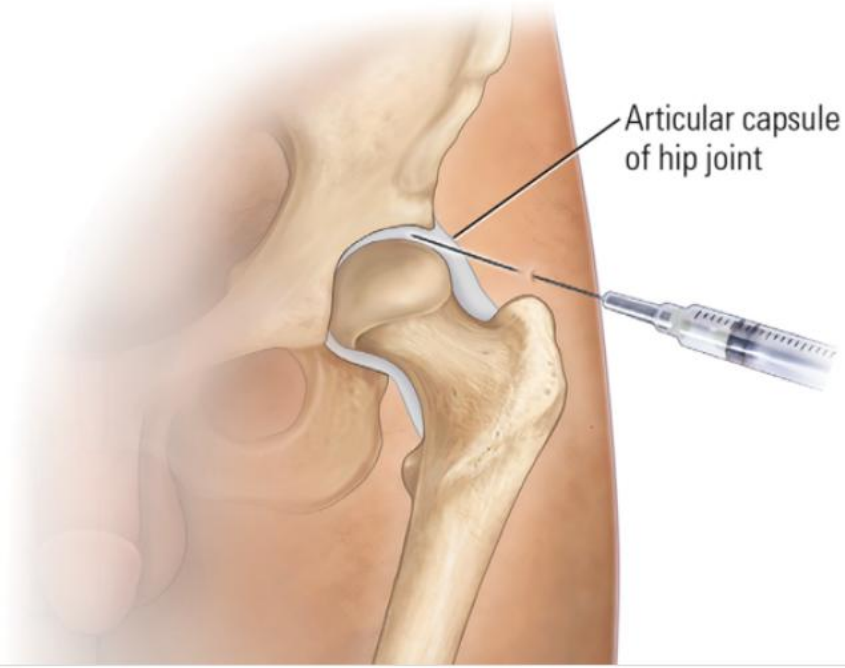
(If fluoroscopic, CT, or MRI guidance is performed, see 77002, 77012, 77021)

20610 Arthrocentesis, aspiration and/or injection, major joint or bursa (eg, shoulder, hip, knee, subacromial bursa); without ultrasound guidance

- *CPT Changes: An Insider's View* 2015
- *CPT Assistant* Spring 92:8, Mar 01:10, Apr 04:15, Jul 06:1, Dec 07:10, Jul 08:9, Mar 12:6, Jun 12:14, Dec 14:18, Feb 15:6, Aug 15:6, Nov 15:10, Apr 17:10, Aug 19:7, Dec 22:1, Oct 24:9
- *Clinical Examples in Radiology* Spring 13:11, Spring 15:7, Summer 18:15, Winter 19:14, Spring 21:7

20611 with ultrasound guidance, with permanent recording and reporting

- *CPT Changes: An Insider's View* 2015
- *CPT Assistant* Feb 15:6, Jul 15:10, Aug 15:6, Nov 15:10, Aug 19:7, Dec 22:1, Oct 24:9
- *Clinical Examples in Radiology* Spring 15:7, Winter 19:14, Spring 21:12,13



(Do not report 20610, 20611 in conjunction with 27369, 76942)

(If fluoroscopic, CT, or MRI guidance is performed, see 77002, 77012, 77021)

Arthrocentesis, Aspiration, or Injection of Major Joint or Bursa

20610

Insertion of needle into major joint or bursa for injection of therapeutic or diagnostic agent, aspiration, or arthrocentesis

20612 Aspiration and/or injection of ganglion cyst(s) any location

CPT Changes: An Insider's View 2003

(To report multiple ganglion cyst aspirations/injections, use 20612 and append modifier 59)

20615 Aspiration and injection for treatment of bone cyst

(For injection of bone-substitute material for bone marrow lesions, use 0707T)

20650 Insertion of wire or pin with application of skeletal traction, including removal (separate procedure)

20660 Application of cranial tongs, caliper, or stereotactic frame, including removal (separate procedure)

CPT Changes: An Insider's View 2008

CPT Assistant Jun 96:10, Nov 97:14, Jan 06:46, Dec 06:10, Feb 08:8, Jul 08:10, Nov 09:6, Apr 12:11, Aug 12:14

20661 Application of halo, including removal; cranial

CPT Assistant Nov 97:14, Aug 12:14

20662 pelvic

20663 femoral

20664 Application of halo, including removal, cranial, 6 or more pins placed, for thin skull osteology (eg, pediatric patients, hydrocephalus, osteogenesis imperfecta)

CPT Changes: An Insider's View 2011

CPT Assistant Nov 97:14, Aug 12:5, Aug 13:12

20665 Removal of tongs or halo applied by another individual

CPT Changes: An Insider's View 2013

CPT Assistant Apr 12:12

20670 Removal of implant; superficial (eg, buried wire, pin or rod) (separate procedure)

CPT Assistant Dec 07:7-8, Jun 09:7, Apr 12:17

20680 deep (eg, buried wire, pin, screw, metal band, nail, rod or plate)

CPT Assistant Spring 92:11, Jun 09:7, Sep 12:16, Mar 14:4, Nov 15:10, Nov 16:9, Jan 18:3, Sep 21:7, Apr 23:1

(For removal of sinus tarsi implant, use 0510T)

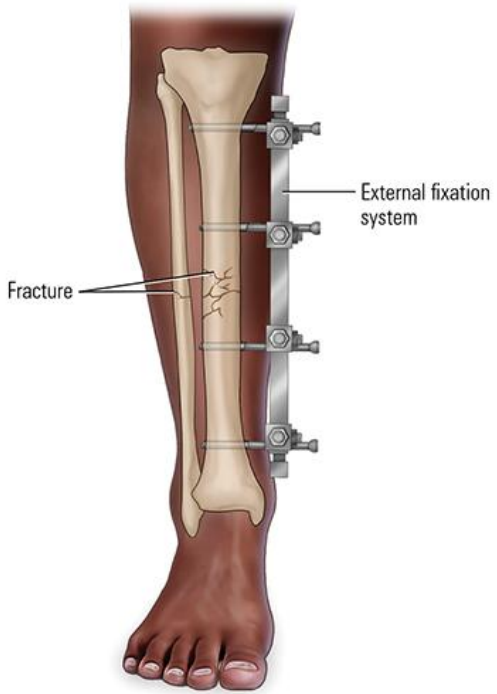
(For removal and reinsertion of sinus tarsi implant, use 0511T)

Halo Application for Thin Skull Osteology

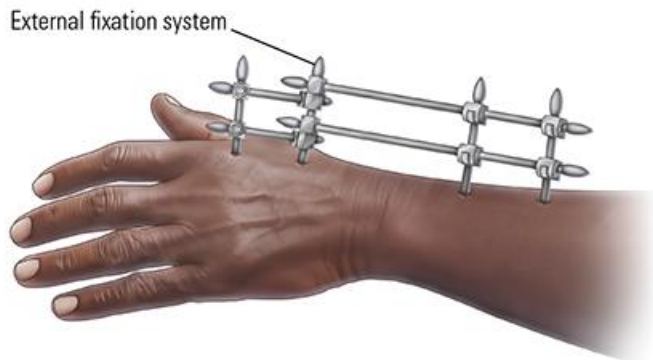
20664

A cranial halo is placed on the head of a child whose skull is unusually thin due to congenital or developmental problems.

20690 Application of a uniplane (pins or wires in 1 plane), unilateral, external fixation system



- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Winter 90:4, Winter 92:11, Fall 93:21, Oct 99:5, Jan 04:27, Jun 05:12, Oct 07:7, Jan 08:4, Feb 08:9, Jun 09:7, Jan 18:3

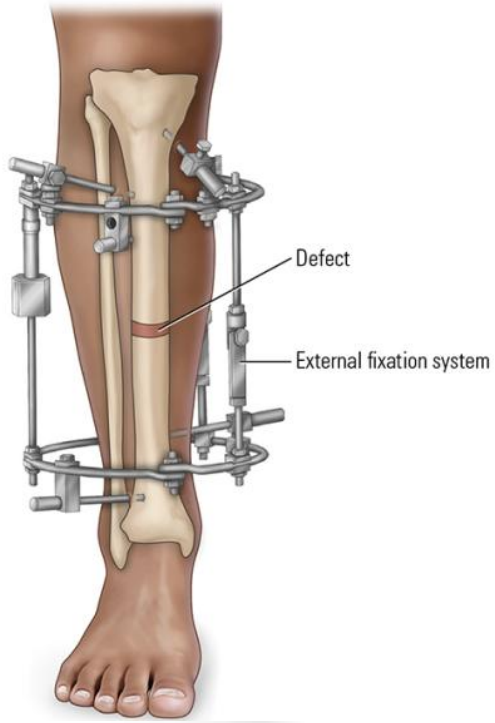


20692 Application of a multiplane (pins or wires in more than 1 plane), unilateral, external fixation system (eg, Ilizarov, Monticelli type)

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Winter 90:4, Fall 93:21, Oct 99:5, Jul 00:11, Feb 08:9, Jun 09:7, Jan 18:3, May 19:10

Uniplane External Fixation System
20690

The following figures are examples of types of stabilization devices. Codes 20690 and 20692 describe the placement of types of external fixation devices. The method of stabilization depends upon fracture grade (degree of soft tissue injury/skin integrity disruption), type (eg, comminuted, spiral, impacted), and location (eg, extremity, pelvis).



20693 Adjustment or revision of external fixation system requiring anesthesia (eg, new pin[s] or wire[s] and/or new ring[s] or bar[s])
CPT Assistant Fall 93:21, Oct 99:5, Jul 00:11, Jun 09:7, Jan 18:3

20694 Removal, under anesthesia, of external fixation system
CPT Assistant Winter 92:10, Fall 93:21, Oct 99:5, Jul 00:11, Jan 18:3

Multiplane External Fixation System
20692

The following figure is an example of a type of multiplane stabilization device. Codes 20690 and 20692 describe the placement of types of external fixation devices. The method of stabilization depends upon fracture grade (degree of soft tissue injury/skin integrity disruption), type (eg, comminuted, spiral, impacted), and location (eg, extremity, pelvis).

20696 Application of multiplane (pins or wires in more than 1 plane), unilateral, external fixation with stereotactic computer-assisted adjustment (eg, spatial frame), including imaging; initial and subsequent alignment(s), assessment(s), and computation(s) of adjustment schedule(s)

- *CPT Changes: An Insider's View* 2009
- *CPT Assistant* Jan 18:3

(Do not report 20696 in conjunction with 20692, 20697)

⊘ **20697** exchange (ie, removal and replacement) of strut, each

- *CPT Changes: An Insider's View* 2009
- *CPT Assistant* Jan 18:3

(Do not report 20697 in conjunction with 20692, 20696)

Manual preparation involves the mixing and preparation of antibiotics or other therapeutic agent(s) with a carrier substance by the physician or other qualified health care professional during the surgical procedure and then shaping the mixture into a drug-delivery device(s) (eg, beads, nails, spacers) for placement in the deep (eg, subfascial), intramedullary, or intra-articular space(s). Codes 20700, 20702, 20704 are add-on codes for the manual preparation and insertion of the drug-delivery device(s). They may be used with any open procedure code except those that include the placement of a "spacer" (eg, 27091, 27488). The add-on codes may be used when infection is present, suspected, or anticipated during the surgery. The location of the primary service determines which of the insertion codes may be selected. If the primary surgery is in the deep (subfascial) region, add-on code 20700 may be reported. If the primary surgery is within the bone or "intramedullary," add-on code 20702 may be reported. If the primary surgery is within the joint, add-on code 20704 may be reported.

Codes 20701, 20703, 20705 are add-on codes used to report removal of drug-delivery device(s). These codes may be typically associated with specific surgeries if the infection has been eradicated. For removal of a drug-delivery device from a deep (subfascial) space performed in conjunction with a primary procedure (ie, complex wound closure [13100-13160], adjacent tissue transfer [14000-14350], or a flap closure [15570-15758]), add-on code 20701 may be reported. For infection that has not been eradicated, see the tissue debridement codes (eg, 11011, 11012, 11042, 11043, 11044, 11045, 11046, 11047) for the primary procedure. If a subsequent new drug-delivery device is placed, 20700 may be additionally reported.

Similarly, for add-on code 20703, removal of drug delivery device from the bone may be associated with different procedures. If the infection has been eradicated and the drug delivery device removal is the only procedure being performed, report 20680 (removal of deep hardware). Bony reconstruction performed in conjunction with eradication of infection may be reported using the reconstruction as the primary procedure. Persistent infection that is treated using an additional bony debridement procedure (eg, 11012, 23180, 23182, 23184, 24140, 24145, 25150, 25151, 26230, 26235, 26236, 27070, 27071, 27360, 27640, 27641, 28122, 28124) may be reported using the debridement as the primary procedure. Amputation (eg, 27290, 27590, 27598) performed in conjunction with delivery of a new, manually prepared drug delivery device may be reported with add-on code 20702.

When joint infection is present, suspected, or anticipated, add-on code 20704 (for manual preparation of an intra-articular drug delivery device) may be reported. Code 20704 may not be reported when the placement of a spacer is included in the code (eg, 27091, 27488) or when antibiotic cement is used for implant fixation.

Add-on code 20705 (for removal of a manually prepared intra-articular drug delivery device) may be typically used in conjunction with a joint stabilization procedure such as arthrodesis (eg, 22532, 22533, 22534, 22548, 22551, 22552, 22554, 22556, 22558, 22585, 22586, 22590, 22595, 22600, 22610, 22614, 22634, 22800, 22802, 22804, 22808, 22810, 22812, 22830, 22853, 22854, 22899, 24800, 24802, 25800, 25805, 25810, 25825, 25830, 26841, 26842, 26843, 26844, 26850, 26852, 26860, 26861, 26862, 26863, 27279, 27280, 27282, 27284, 27286, 27580, 27870, 27871, 28295, 28296, 28298, 28299, 28705, 28715, 28725, 28730, 28735, 28737, 28740, 28750, 28755, 28760, 29907) and revision joint arthroplasties (eg, 23473, 23474 [shoulder], 24370, 24371 [elbow], 25449 [wrist], 27134 [hip], 27487 [knee], and 27703 [ankle]). In the rare circumstance in which only part of the joint is destroyed by infection, a partial arthroplasty may be reported (eg, 23470, 24360, 24361, 24362, 24365, 24366, 25441, 25442, 25443, 25444, 25445, 27125, 27236, 27438, 27440, 27441, 27442, 27443, and 27446).

If no primary service is associated with add-on code 20705 and the joint is left without remaining cartilage or stabilization (ie, flail joint), only 20680 may be reported.

Insertion of a prefabricated drug device(s) may not be reported with 20700, 20702, 20704. Report 20680, if removal of drug-delivery device(s) is performed alone. Report 20700, 20701, 20702, 20703, 20704, 20705 once per anatomic location.

+ 20700 Manual preparation and insertion of drug-delivery device(s), deep (eg, subfascial) (List separately in addition to code for primary procedure)

(Do not report 20705 in conjunction with 11982, 27130, 27447, 27486)

(For arthrodesis after eradicated infection, see 22532, 22533, 22534, 22548, 22551, 22552, 22554, 22556, 22558, 22585, 22586, 22590, 22595, 22600, 22610, 22614, 22634, 22800, 22802, 22804, 22808, 22810, 22812, 22830, 22853, 22854, 22899, 24800, 24802, 25800, 25805, 25810, 25825, 25830, 26841, 26842, 26843, 26844, 26850, 26852, 26860, 26861, 26862, 26863, 27279, 27280, 27282, 27284, 27286, 27580, 27870, 27871, 28295, 28296, 28298, 28299, 28705, 28715, 28725, 28730, 28735, 28737, 28740, 28750, 28755, 28760, 29907)

(For implant removal after failed drug delivery device placement, see 22862, 22864, 23334, 23335, 24160, 25250, 25251, 27090, 27091, 27488, 27704)

(For partial replacement after successful eradication of infection with removal of drug delivery implant, see 23470, 24360, 24361, 24362, 24365, 24366, 25441, 25442, 25443, 25444, 25445, 27125, 27236, 27438, 27440, 27441, 27442, 27443, 27446)

Replantation

(For repair of incomplete amputation of the arm, forearm, hand, digit, thumb, thigh, leg, foot, or toe, report the specific code[s] for repair of bone[s], ligament[s], tendon[s], nerve[s], and/or blood vessel[s] and append modifier 51 or 59 as appropriate)

(For replantation of complete amputation of the lower extremity, except foot, report the specific code[s] for repair of bone[s], ligament[s], tendon[s], nerve[s], and/or blood vessel[s] and append modifier 51 or 59 as appropriate)

20802 Replantation, arm (includes surgical neck of humerus through elbow joint), complete amputation

20805 Replantation, forearm (includes radius and ulna to radial carpal joint), complete amputation

20808 Replantation, hand (includes hand through metacarpophalangeal joints), complete amputation

20816 Replantation, digit, excluding thumb (includes metacarpophalangeal joint to insertion of flexor sublimis tendon), complete amputation

➔ *CPT Assistant* Oct 96:11

20822 Replantation, digit, excluding thumb (includes distal tip to sublimis tendon insertion), complete amputation

20824 Replantation, thumb (includes carpometacarpal joint to MP joint), complete amputation

20827 Replantation, thumb (includes distal tip to MP joint), complete amputation

➔ *CPT Assistant* Aug 23:19-20

20838 Replantation, foot, complete amputation

Grafts (or Implants)

Codes for obtaining autogenous bone, cartilage, tendon, fascia lata grafts, bone marrow, or other tissues through separate skin/fascial incisions should be reported separately, unless the code descriptor references the harvesting of the graft or implant (eg, includes obtaining graft). Autologous grafts that are already defined in the CPT code set, including skin, bone, nerve, tendon, fascia lata, or vessels, should be reported with the more specific codes for each tissue type. Code 15769 may be used for other autologous soft tissue grafts harvested by direct excision. See 15771, 15772, 15773, 15774 for autologous fat grafting harvested by liposuction technique.

Do not append modifier 62 to bone graft codes 20900-20938.

(For spinal surgery bone graft[s] see codes 20930-20938)

20900 Bone graft, any donor area; minor or small (eg, dowel or button)

20956 iliac crest

- *CPT Assistant* Apr 97:4

20957 metatarsal

- *CPT Assistant* Apr 97:4

20962 other than fibula, iliac crest, or metatarsal

- *CPT Assistant* Apr 97:4

(Do not report code 69990 in addition to codes 20955-20962)

20969 Free osteocutaneous flap with microvascular anastomosis; other than iliac crest, metatarsal, or great toe

- *CPT Assistant* Apr 97:4, Oct 19:10, Feb 25:25

20970 iliac crest

- *CPT Assistant* Apr 97:4

20972 metatarsal

- *CPT Assistant* Apr 97:4

20973 great toe with web space

- *CPT Assistant* Apr 97:4

(Do not report code 69990 in addition to codes 20969-20973)

(For great toe, wrap-around procedure, use 26551)

⦸ **20974** Electrical stimulation to aid bone healing; noninvasive (nonoperative)

- *CPT Assistant* Sep 96:11, Nov 00:8

⦸ **20975** invasive (operative)

- *CPT Assistant* Nov 00:8

20979 Low intensity ultrasound stimulation to aid bone healing, noninvasive (nonoperative)

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:10, Nov 00:8

20982 Ablation therapy for reduction or eradication of 1 or more bone tumors (eg, metastasis) including adjacent soft tissue when involved by tumor extension, percutaneous, including imaging guidance when performed; radiofrequency

- *CPT Changes: An Insider's View* 2004, 2015, 2017
- *CPT Assistant* Jul 15:8, Sep 15:12
- *Clinical Examples in Radiology* Spring 15:3

20983 cryoablation

- *CPT Changes: An Insider's View* 2015, 2017
- *CPT Assistant* Jul 15:8
- *Clinical Examples in Radiology* Spring 15:2

(Do not report 20982, 20983 in conjunction with 76940, 77002, 77013, 77022)

+ 20985 Computer-assisted surgical navigational procedure for musculoskeletal procedures, image-less (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2008, 2009
- *CPT Assistant* Jul 11:12

(Do not report 20985 in conjunction with 61781-61783)

(20986, 20987 have been deleted)

(For computer-assisted navigational procedures with image guidance based on pre-operative and intraoperatively obtained images, see 0054T, 0055T)

20999 Unlisted procedure, musculoskeletal system, general

- *CPT Assistant* Sep 03:13, Jul 15:8, May 18:3, Feb 23:13
- *Clinical Examples in Radiology* Spring 15:3

Head

Skull, facial bones, and temporomandibular joint.

Incision

(For incision and drainage procedures, cutaneous/subcutaneous, see 10060, 10061)

(For removal of embedded foreign body from dentoalveolar structure, see 41805, 41806)

21010 Arthrotomy, temporomandibular joint

(To report bilateral procedure, report 21010 with modifier 50)

Excision

21011 Excision, tumor, soft tissue of face or scalp, subcutaneous; less than 2 cm

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Feb 10:3, Apr 10:3, Sep 18:7

21012 2 cm or greater

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Feb 10:3, Apr 10:3, Apr 25:27

(For excision of benign lesions of cutaneous origin [eg, sebaceous cyst], see 11420-11426)

21013 Excision, tumor, soft tissue of face and scalp, subfascial (eg, subgaleal, intramuscular); less than 2 cm

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Feb 10:3, Apr 10:3

21014 2 cm or greater

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Feb 10:3, Apr 10:3

21015 Radical resection of tumor (eg, sarcoma), soft tissue of face or scalp; less than 2 cm

- *CPT Changes: An Insider's View* 2010, 2014
- *CPT Assistant* Feb 10:3, Apr 10:3

(To report excision of skull tumor for osteomyelitis, use 61501)

21016 2 cm or greater

- *CPT Changes: An Insider's View* 2010, 2014
- *CPT Assistant* Feb 10:3, Apr 10:3

(For radical resection of tumor[s] of cutaneous origin [eg, melanoma], see 11620-11646)

21025 Excision of bone (eg, for osteomyelitis or bone abscess); mandible

- *CPT Assistant* Oct 11:10

21026 facial bone(s)

21029 Removal by contouring of benign tumor of facial bone (eg, fibrous dysplasia)

21030 Excision of benign tumor or cyst of maxilla or zygoma by enucleation and curettage

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Nov 03:9

21031 Excision of torus mandibularis

21032 Excision of maxillary torus palatinus

21034 Excision of malignant tumor of maxilla or zygoma

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Nov 03:9

21040 Excision of benign tumor or cyst of mandible, by enucleation and/or curettage

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Nov 03:9

(For enucleation and/or curettage of benign cysts or tumors of mandible not requiring osteotomy, use 21040)

(For excision of benign tumor or cyst of mandible requiring osteotomy, see 21046-21047)

21044 Excision of malignant tumor of mandible;
21045 radical resection

(For bone graft, use 21215)

21046 Excision of benign tumor or cyst of mandible; requiring intra-oral osteotomy (eg, locally aggressive or destructive lesion[s])

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Nov 03:9

21047 requiring extra-oral osteotomy and partial mandibulectomy (eg, locally aggressive or destructive lesion[s])

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Nov 03:9

21048 Excision of benign tumor or cyst of maxilla; requiring intra-oral osteotomy (eg, locally aggressive or destructive lesion[s])

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Nov 03:9

21049 requiring extra-oral osteotomy and partial maxillectomy (eg, locally aggressive or destructive lesion[s])

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Nov 03:9

21050 Condylectomy, temporomandibular joint (separate procedure)

(For bilateral procedures, report 21050 with modifier 50)

21060 Meniscectomy, partial or complete, temporomandibular joint (separate procedure)

(For bilateral procedures, report 21060 with modifier 50)

21070 Coronoidectomy (separate procedure)

(For bilateral procedures, report 21070 with modifier 50)

Manipulation

21073 Manipulation of temporomandibular joint(s) (TMJ), therapeutic, requiring an anesthesia service (ie, general or monitored anesthesia care)

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Feb 08:9, Jan 18:3

(For TMJ manipulation without an anesthesia service [ie, general or monitored anesthesia care], see 97140, 98925-98929, 98943)

(For closed treatment of temporomandibular dislocation, see 21480, 21485)

Head Prosthesis

Codes 21076-21089 describe professional services for the rehabilitation of patients with oral, facial, or other anatomical deficiencies by means of prostheses such as an artificial eye, ear, or nose or intraoral obturator to close a cleft. Codes 21076-21089 should only be used when the physician or other qualified health care professional actually designs and prepares the prosthesis (ie, not prepared by an outside laboratory).

(For application or removal of caliper or tongs, see 20660, 20665)

21076 Impression and custom preparation; surgical obturator prosthesis

21077 orbital prosthesis

- *CPT Assistant* Apr 23:25

21079 interim obturator prosthesis

- *CPT Assistant* Winter 90:5, Sep 06:13, Dec 06:10

21080 definitive obturator prosthesis

- *CPT Assistant* Winter 90:5, Sep 06:13, Dec 06:10

21081 mandibular resection prosthesis

- *CPT Assistant* Winter 90:5, Sep 06:13, Dec 06:10

21082 palatal augmentation prosthesis

- *CPT Assistant* Winter 90:5, Sep 06:13, Dec 06:10

21083 palatal lift prosthesis

- *CPT Assistant* Winter 90:5, Sep 06:13, Dec 06:10

21084 speech aid prosthesis

- *CPT Assistant* Winter 90:5, Sep 06:13, Dec 06:10

21085 oral surgical splint

- *CPT Assistant* Winter 90:5, Sep 06:13, Dec 06:10, Sep 17:14

21086 auricular prosthesis

- *CPT Assistant* Winter 90:5, Sep 06:13, Dec 06:10

21087 nasal prosthesis

- *CPT Assistant* Winter 90:5, Sep 06:13, Dec 06:10

21088 facial prosthesis

- *CPT Assistant* Winter 90:5, Sep 06:13, Dec 06:10, Apr 23:25

Other Procedures

21089 Unlisted maxillofacial prosthetic procedure

- *CPT Assistant* Winter 90:5, Sep 06:13, Dec 06:10

Introduction or Removal

21100 Application of halo type appliance for maxillofacial fixation, includes removal (separate procedure)

21110 Application of interdental fixation device for conditions other than fracture or dislocation, includes removal

CPT Assistant Mar 97:10, Dec 13:16

(For removal of interdental fixation by another individual, see 20670-20680)

21116 Injection procedure for temporomandibular joint arthrography

CPT Assistant Aug 15:6, May 16:13

Clinical Examples in Radiology Summer 18:15

(For radiological supervision and interpretation, use 70332. Do not report 77002 in conjunction with 70332)

Repair, Revision, and/or Reconstruction

(For cranioplasty, see 21179, 21180 and 62120, 62140-62147)

21120 Genioplasty; augmentation (autograft, allograft, prosthetic material)

21121 sliding osteotomy, single piece

21122 sliding osteotomies, 2 or more osteotomies (eg, wedge excision or bone wedge reversal for asymmetrical chin)

21123 sliding, augmentation with interpositional bone grafts (includes obtaining autografts)

21125 Augmentation, mandibular body or angle; prosthetic material

21127 with bone graft, onlay or interpositional (includes obtaining autograft)

21137 Reduction forehead; contouring only

21138 contouring and application of prosthetic material or bone graft (includes obtaining autograft)

21139 contouring and setback of anterior frontal sinus wall

21141 Reconstruction midface, LeFort I; single piece, segment movement in any direction (eg, for Long Face Syndrome), without bone graft

21142 2 pieces, segment movement in any direction, without bone graft

21143 3 or more pieces, segment movement in any direction, without bone graft

21145 single piece, segment movement in any direction, requiring bone grafts (includes obtaining autografts)

21146 2 pieces, segment movement in any direction, requiring bone grafts (includes obtaining autografts) (eg, ungrafted unilateral alveolar cleft)

21147 3 or more pieces, segment movement in any direction, requiring bone grafts (includes obtaining autografts) (eg, ungrafted bilateral alveolar cleft or multiple osteotomies)

21150 Reconstruction midface, LeFort II; anterior intrusion (eg, Treacher-Collins Syndrome)

21151 any direction, requiring bone grafts (includes obtaining autografts)

21154 Reconstruction midface, LeFort III (extracranial), any type, requiring bone grafts (includes obtaining autografts); without LeFort I

21155 with LeFort I

21159 Reconstruction midface, LeFort III (extra and intracranial) with forehead advancement (eg, mono bloc), requiring bone grafts (includes obtaining autografts); without LeFort I

21160 with LeFort I

21172 Reconstruction superior-lateral orbital rim and lower forehead, advancement or alteration, with or without grafts (includes obtaining autografts)

(For frontal or parietal craniotomy performed for craniosynostosis, use 61556)

21175 Reconstruction, bifrontal, superior-lateral orbital rims and lower forehead, advancement or alteration (eg, plagiocephaly, trigonocephaly, brachycephaly), with or without grafts (includes obtaining autografts)

(For bifrontal craniotomy performed for craniosynostosis, use 61557)

21179 Reconstruction, entire or majority of forehead and/or supraorbital rims; with grafts (allograft or prosthetic material)

21180 with autograft (includes obtaining grafts)

(For extensive craniectomy for multiple suture craniosynostosis, use only 61558 or 61559)

21181 Reconstruction by contouring of benign tumor of cranial bones (eg, fibrous dysplasia), extracranial

21182 Reconstruction of orbital walls, rims, forehead, nasoethmoid complex following intra- and extracranial excision of benign tur of cranial bone (eg, fibrous dysplasia), with multiple autografts (includes obtaining grafts); total area of bone grafting less tha sq cm

21183 total area of bone grafting greater than 40 sq cm but less than 80 sq cm

CPT Changes: An Insider's View 2002

21184 total area of bone grafting greater than 80 sq cm

CPT Changes: An Insider's View 2002

(For excision of benign tumor of cranial bones, see 61563, 61564)

21188 Reconstruction midface, osteotomies (other than LeFort type) and bone grafts (includes obtaining autografts)

21193 Reconstruction of mandibular rami, horizontal, vertical, C, or L osteotomy; without bone graft

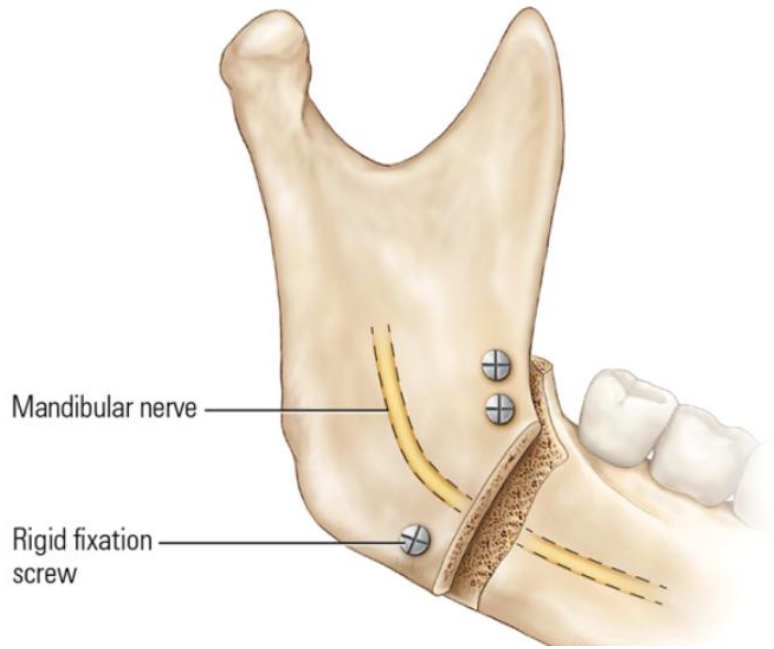
CPT Assistant Apr 96:11

21194 with bone graft (includes obtaining graft)

CPT Assistant Apr 96:11

21195 Reconstruction of mandibular rami and/or body, sagittal split; without internal rigid fixation

CPT Assistant Apr 96:11



21196 with internal rigid fixation

CPT Assistant Apr 96:11, Mar 97:11

Reconstruction of Mandibular Rami

21196

The mandibular ramus is reconstructed to lengthen, set back, or rotate the mandible.

21198 Osteotomy, mandible, segmental;

CPT Changes: An Insider's View 2001

CPT Assistant Dec 13:16

21199 with genioglossus advancement

CPT Changes: An Insider's View 2001

(To report total osteotomy of the maxilla, see 21141-21160)

21206 Osteotomy, maxilla, segmental (eg, Wassmund or Schuchard)

21208 Osteoplasty, facial bones; augmentation (autograft, allograft, or prosthetic implant)

21209 reduction

CPT Assistant Feb 25:25

21210 Graft, bone; nasal, maxillary or malar areas (includes obtaining graft)

(For cleft palate repair, see 42200-42225)

21215 mandible (includes obtaining graft)

CPT Assistant Feb 25:25

21230 Graft; rib cartilage, autogenous, to face, chin, nose or ear (includes obtaining graft)

21235 ear cartilage, autogenous, to nose or ear (includes obtaining graft)

(To report graft augmentation of facial bones, use 21208)

21240 Arthroplasty, temporomandibular joint, with or without autograft (includes obtaining graft)

21242 Arthroplasty, temporomandibular joint, with allograft

21243 Arthroplasty, temporomandibular joint, with prosthetic joint replacement

21244 Reconstruction of mandible, extraoral, with transosteal bone plate (eg, mandibular staple bone plate)

21245 Reconstruction of mandible or maxilla, subperiosteal implant; partial

CPT Assistant Feb 25:25

21246 complete

21247 Reconstruction of mandibular condyle with bone and cartilage autografts (includes obtaining grafts) (eg, for hemifacial microsomia)

21248 Reconstruction of mandible or maxilla, endosteal implant (eg, blade, cylinder); partial

21249 complete

(To report midface reconstruction, see 21141-21160)

21255 Reconstruction of zygomatic arch and glenoid fossa with bone and cartilage (includes obtaining autografts)

21256 Reconstruction of orbit with osteotomies (extracranial) and with bone grafts (includes obtaining autografts) (eg, micro-ophthalmia)

21260 Periorbital osteotomies for orbital hypertelorism, with bone grafts; extracranial approach

21261 combined intra- and extracranial approach

21263 with forehead advancement

21267 Orbital repositioning, periorbital osteotomies, unilateral, with bone grafts; extracranial approach

21268 combined intra- and extracranial approach

21270 Malar augmentation, prosthetic material

(For malar augmentation with bone graft, use 21210)

21275 Secondary revision of orbitocraniofacial reconstruction

21280 Medial canthopexy (separate procedure)

(For medial canthoplasty, use 67950)

21282 Lateral canthopexy

21295 Reduction of masseter muscle and bone (eg, for treatment of benign masseteric hypertrophy); extraoral approach

21296 intraoral approach

Other Procedures

21299 Unlisted craniofacial and maxillofacial procedure

Fracture and/or Dislocation

(For operative repair of skull fracture, see 62000-62010)

(To report closed treatment of skull fracture, use the appropriate Evaluation and Management code)

21315 Closed treatment of nasal bone fracture with manipulation; without stabilization

CPT Changes: An Insider's View 2022

CPT Assistant Jan 18:3, Sep 19:3, May 22:5,6

(For closed treatment of nasal bone fracture without manipulation or stabilization, use appropriate E/M code)

21320 with stabilization

CPT Changes: An Insider's View 2022

CPT Assistant Sep 19:3, May 22:5,6

21325 Open treatment of nasal fracture; uncomplicated

CPT Assistant Jan 21:13

21330 complicated, with internal and/or external skeletal fixation

CPT Assistant Jan 21:13

21335 with concomitant open treatment of fractured septum

21336 Open treatment of nasal septal fracture, with or without stabilization

21337 Closed treatment of nasal septal fracture, with or without stabilization

CPT Assistant Sep 19:3

21338 Open treatment of nasoethmoid fracture; without external fixation

21339 with external fixation

21340 Percutaneous treatment of nasoethmoid complex fracture, with splint, wire or headcap fixation, including repair of canthal ligaments and/or the nasolacrimal apparatus

21343 Open treatment of depressed frontal sinus fracture

21344 Open treatment of complicated (eg, comminuted or involving posterior wall) frontal sinus fracture, via coronal or multiple approaches

21345 Closed treatment of nasomaxillary complex fracture (LeFort II type), with interdental wire fixation or fixation of denture or splint

21346 Open treatment of nasomaxillary complex fracture (LeFort II type); with wiring and/or local fixation

21347 requiring multiple open approaches

21348 with bone grafting (includes obtaining graft)

21355 Percutaneous treatment of fracture of malar area, including zygomatic arch and malar tripod, with manipulation

21356 Open treatment of depressed zygomatic arch fracture (eg, Gillies approach)

21360 Open treatment of depressed malar fracture, including zygomatic arch and malar tripod

21365 Open treatment of complicated (eg, comminuted or involving cranial nerve foramina) fracture(s) of malar area, including zygomatic arch and malar tripod; with internal fixation and multiple surgical approaches

21366 with bone grafting (includes obtaining graft)

21385 Open treatment of orbital floor blowout fracture; transantral approach (Caldwell-Luc type operation)

21386 periorbital approach

21387 combined approach

21390 periorbital approach, with alloplastic or other implant

CPT Assistant Dec 20:11

21395 periorbital approach with bone graft (includes obtaining graft)

21400 Closed treatment of fracture of orbit, except blowout; without manipulation
21401 with manipulation
21406 Open treatment of fracture of orbit, except blowout; without implant
CPT Assistant Dec 20:11
21407 with implant
CPT Assistant Dec 20:11
21408 with bone grafting (includes obtaining graft)
21421 Closed treatment of palatal or maxillary fracture (LeFort I type), with interdental wire fixation or fixation of denture or splint
21422 Open treatment of palatal or maxillary fracture (LeFort I type);
21423 complicated (comminuted or involving cranial nerve foramina), multiple approaches
21431 Closed treatment of craniofacial separation (LeFort III type) using interdental wire fixation of denture or splint
21432 Open treatment of craniofacial separation (LeFort III type); with wiring and/or internal fixation
21433 complicated (eg, comminuted or involving cranial nerve foramina), multiple surgical approaches
21435 complicated, utilizing internal and/or external fixation techniques (eg, head cap, halo device, and/or intermaxillary fixation)

(For removal of internal or external fixation device, use 20670)
21436 complicated, multiple surgical approaches, internal fixation, with bone grafting (includes obtaining graft)
21440 Closed treatment of mandibular or maxillary alveolar ridge fracture (separate procedure)
21445 Open treatment of mandibular or maxillary alveolar ridge fracture (separate procedure)
21450 Closed treatment of mandibular fracture; without manipulation
21451 with manipulation
21452 Percutaneous treatment of mandibular fracture, with external fixation
21453 Closed treatment of mandibular fracture with interdental fixation
CPT Assistant Dec 07:7-8
21454 Open treatment of mandibular fracture with external fixation
21461 Open treatment of mandibular fracture; without interdental fixation
21462 with interdental fixation
21465 Open treatment of mandibular condylar fracture
21470 Open treatment of complicated mandibular fracture by multiple surgical approaches including internal fixation, interdental fixation, and/or wiring of dentures or splints
CPT Assistant Nov 02:10
21480 Closed treatment of temporomandibular dislocation; initial or subsequent
21485 complicated (eg, recurrent requiring intermaxillary fixation or splinting), initial or subsequent
21490 Open treatment of temporomandibular dislocation

(For interdental wire fixation, use 21497)

(To report treatment of closed fracture of larynx, use the applicable Evaluation and Management codes)
21497 Interdental wiring, for condition other than fracture
CPT Assistant Mar 97:10

Other Procedures

21499 Unlisted musculoskeletal procedure, head

(For unlisted craniofacial or maxillofacial procedure, use 21299)

Neck (Soft Tissues) and Thorax

(For cervical spine and back, see 21920 et seq)

(For injection of fracture site or trigger point, use 20550)

Incision

(For incision and drainage of abscess or hematoma, superficial, see 10060, 10140)

21501 Incision and drainage, deep abscess or hematoma, soft tissues of neck or thorax;

CPT Assistant Dec 14:16

(For posterior spine subfascial incision and drainage, see 22010-22015)

21502 with partial rib ostectomy

21510 Incision, deep, with opening of bone cortex (eg, for osteomyelitis or bone abscess), thorax

Excision

(For bone biopsy, see 20220-20251)

21550 Biopsy, soft tissue of neck or thorax

(For needle biopsy of soft tissue, use 20206)

21552 Code is out of numerical sequence. See 21550-21558

21554 Code is out of numerical sequence. See 21550-21558

21555 Excision, tumor, soft tissue of neck or anterior thorax, subcutaneous; less than 3 cm

CPT Changes: An Insider's View 2010

CPT Assistant Oct 02:11

 # 21552 3 cm or greater

CPT Changes: An Insider's View 2010

(For excision of benign lesions of cutaneous origin [eg, sebaceous cyst], see 11420-11426)

21556 Excision, tumor, soft tissue of neck or anterior thorax, subfascial (eg, intramuscular); less than 5 cm

CPT Changes: An Insider's View 2010

 # 21554 5 cm or greater

CPT Changes: An Insider's View 2010

21557 Radical resection of tumor (eg, sarcoma), soft tissue of neck or anterior thorax; less than 5 cm

CPT Changes: An Insider's View 2010, 2014

CPT Assistant Apr 10:11, Apr 20:10

21558 5 cm or greater

CPT Changes: An Insider's View 2010, 2014

CPT Assistant Apr 20:10

21558 5 cm or greater

CPT Changes: An Insider's View 2010, 2014

CPT Assistant Apr 20:10

(For radical resection of tumor[s] of cutaneous origin [eg, melanoma], see 11600-11620)

21600 Excision of rib, partial

CPT Assistant Jul 12:12, Mar 13:13

(For radical resection of chest wall and rib cage for tumor, use 21601)

(For radical debridement of chest wall and rib cage for injury, see 11044, 11047)

21601 Excision of chest wall tumor including rib(s)

CPT Changes: An Insider's View 2020

CPT Assistant Dec 19:4

21602 Excision of chest wall tumor involving rib(s), with plastic reconstruction; without mediastinal lymphadenectomy

CPT Changes: An Insider's View 2020

CPT Assistant Dec 19:4

21603 with mediastinal lymphadenectomy

CPT Changes: An Insider's View 2020

CPT Assistant Dec 19:4

(Do not report 21601, 21602, 21603 in conjunction with 32100, 32503, 32504, 32551, 32554, 32555)

21610 Costotransversectomy (separate procedure)

21615 Excision first and/or cervical rib;

CPT Assistant Mar 14:13

21616 with sympathectomy

21620 Ostectomy of sternum, partial

21627 Sternal debridement

CPT Assistant May 11:3

(For debridement and closure, use 21750)

21630 Radical resection of sternum

CPT Changes: An Insider's View 2025

(21632 has been deleted)

Repair, Revision, and/or Reconstruction

(For superficial wound, see **Integumentary System** section under Repair—Simple)

21685 Hyoid myotomy and suspension

- *CPT Changes: An Insider's View* 2004
- *CPT Assistant* Aug 04:11

21700 Division of scalenus anticus; without resection of cervical rib

21705 with resection of cervical rib

- *CPT Assistant* Mar 14:13

21720 Division of sternocleidomastoid for torticollis, open operation; without cast application

(For transection of spinal accessory and cervical nerves, see 63191, 64722)

21725 with cast application

21740 Reconstructive repair of pectus excavatum or carinatum; open

- *CPT Changes: An Insider's View* 2003

21742 minimally invasive approach (Nuss procedure), without thoracoscopy

- *CPT Changes: An Insider's View* 2003

21743 minimally invasive approach (Nuss procedure), with thoracoscopy

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Nov 19:15

21750 Closure of median sternotomy separation with or without debridement (separate procedure)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* May 11:3

Fracture and/or Dislocation

(To report closed treatment of an uncomplicated rib fracture, use the Evaluation and Management codes)

21811 Open treatment of rib fracture(s) with internal fixation, includes thoracoscopic visualization when performed, unilateral; 1-3 ribs

- *CPT Changes: An Insider's View* 2015
- *CPT Assistant* Aug 15:3

(For bilateral procedure, report 21811 with modifier 50)

21812 4-6 ribs

Other Procedures

21899 Unlisted procedure, neck or thorax

CPT Assistant Aug 15:3

Back and Flank

Excision

21920 Biopsy, soft tissue of back or flank; superficial

21925 deep

(For needle biopsy of soft tissue, use 20206)

21930 Excision, tumor, soft tissue of back or flank, subcutaneous; less than 3 cm

CPT Changes: An Insider's View 2010

CPT Assistant Jun 24:16

21931 3 cm or greater

CPT Changes: An Insider's View 2010

(For excision of benign lesions of cutaneous origin [eg, sebaceous cyst], see 11400-11406)

21932 Excision, tumor, soft tissue of back or flank, subfascial (eg, intramuscular); less than 5 cm

CPT Changes: An Insider's View 2010

21933 5 cm or greater

CPT Changes: An Insider's View 2010

21935 Radical resection of tumor (eg, sarcoma), soft tissue of back or flank; less than 5 cm

CPT Changes: An Insider's View 2010, 2014

21936 5 cm or greater

CPT Changes: An Insider's View 2010, 2014

(For radical resection of tumor[s] of cutaneous origin [eg, melanoma], see 11600-11606)

Spine (Vertebral Column)

Cervical, thoracic, and lumbar spine.

Within the spine section, bone grafting procedures are reported separately and in addition to arthrodesis. For bone grafts in other Musculoskeletal sections, see specific code(s) descriptor(s) and/or accompanying guidelines.

To report bone grafts performed after arthrodesis, see 20930-20938. Do not append modifier 62 to bone graft codes 20900-20938.

Example:

Posterior arthrodesis of L5-S1 for degenerative disc disease utilizing morselized autogenous iliac bone graft harvested through a separate fascial incision.

Report as 22612 and 20937.

Within the spine section, instrumentation is reported separately and in addition to arthrodesis. To report instrumentation procedures performed with definitive vertebral procedure(s), see 22840-22855, 22859. Instrumentation procedure codes 22840-22848, 22853, 22854, 22859 are reported in addition to the definitive procedure(s). Modifier 62 may not be appended to the definitive or add-on spinal instrumentation procedure code(s) 22840-22848, 22850, 22852, 22853, 22854, 22859.

Example:

Treatment of a burst fracture of L2 by corpectomy followed by arthrodesis of L1-L3, utilizing anterior instrumentation L1-L3 and structural allograft.

Report as 63090, 22558-51, 22585, 22845, and 20931.

When two surgeons work together as primary surgeons performing distinct part(s) of a single reportable procedure, each surgeon should report his/her distinct operative work by appending modifier 62 to the single definitive procedure code. If additional procedure(s) (including add-on procedure[s]) are performed during the same surgical session, separate code(s) may be reported by each co-surgeon, with modifier 62 appended (see Appendix A).

Example:

A 42-year-old male with a history of posttraumatic degenerative disc disease at L3-4 and L4-5 (internal disc disruption) underwent surgical repair. Surgeon A performed an anterior exposure of the spine with mobilization of the great vessels. Surgeon B performed anterior (minimal) discectomy and fusion at L3-4 and L4-5 using anterior interbody technique.

Report surgeon A: 22558 append modifier 62, 22585 append modifier 62

Report surgeon B: 22558 append modifier 62, 22585 append modifier 62, 20931

(Do not append modifier 62 to bone graft code 20931)

(For injection procedure for myelography, use 62284)

(For injection procedure for discography, see 62290, 62291)

(For injection procedure, chemonucleolysis, single or multiple levels, use 62292)

(For injection procedure for facet joints, see 64490-64495, 64633-64636)

(For needle or trocar biopsy, see 20220-20225)

Incision

22010 Incision and drainage, open, of deep abscess (subfascial), posterior spine; cervical, thoracic, or cervicothoracic

CPT Changes: An Insider's View 2006

22015 lumbar, sacral, or lumbosacral

CPT Changes: An Insider's View 2006

(Do not report 22015 in conjunction with 22010)

(Do not report 22015 in conjunction with instrumentation removal, 10180, 22850, 22852)

(For incision and drainage of abscess or hematoma, superficial, see 10060, 10140)

Excision

For the following codes, when two surgeons work together as primary surgeons performing distinct part(s) of partial vertebral body excision, each surgeon should report his/her distinct operative work by appending modifier 62 to the procedure code. In this situation, modifier 62 may be appended to the procedure code(s) 22100-22102, 22110-22114 and, as appropriate, to the associated additional vertebral segment add-on code(s) 22103, 22116 as long as both surgeons continue to work together as primary surgeons.

(For bone biopsy, see 20220-20251)

(To report soft tissue biopsy of back or flank, see 21920-21925)

(For needle biopsy of soft tissue, use 20206)

(To report excision of soft tissue tumor of back or flank, use 21930)

22100 Partial excision of posterior vertebral component (eg, spinous process, lamina or facet) for intrinsic bony lesion, single vertebral segment; cervical

CPT Assistant Jul 13:3, Dec 21:3

22101 thoracic

CPT Assistant Jul 13:3, Dec 21:3

22102 lumbar

CPT Assistant Jul 13:3, Dec 21:3

(For insertion of posterior spinous process distraction devices, see 22867, 22868, 22869, 22870)

+ 22103 each additional segment (List separately in addition to code for primary procedure)

CPT Assistant Feb 96:6, Dec 21:3

(Use 22103 in conjunction with 22100, 22101, 22102)

22110 Partial excision of vertebral body, for intrinsic bony lesion, without decompression of spinal cord or nerve root(s), single vertebral segment; cervical

CPT Assistant Jul 13:3

22112 thoracic

CPT Assistant Jul 13:3

22114 lumbar

CPT Assistant Jul 13:3

+ 22116 each additional vertebral segment (List separately in addition to code for primary procedure)

CPT Assistant Feb 96:6

(Use 22116 in conjunction with 22110, 22112, 22114)

(For complete or near complete resection of vertebral body, see vertebral corpectomy, 63081-63091)

(For spinal reconstruction with bone graft [autograft, allograft] and/or methylmethacrylate of cervical vertebral body, use 63081 and 22554 and 20931 or 20938)

(For spinal reconstruction with bone graft [autograft, allograft] and/or methylmethacrylate of thoracic vertebral body, use 63085 or 63087 and 22556 and 20931 or 20938)

(For spinal reconstruction with bone graft [autograft, allograft] and/or methylmethacrylate of lumbar vertebral body, use 63087 or 63090 and 22558 and 20931 or 20938)

(For spinal reconstruction following vertebral body resection, use 63082 or 63086 or 63088 or 63091, and 22585)

(For harvest of bone autograft for vertebral reconstruction, see 20931 or 20938)

(For cervical spinal reconstruction with prosthetic replacement of resected vertebral bodies, see codes 63081 and 22554 and 20931 or 20938 and 22853, 22854, 22859)

(For thoracic spinal reconstruction with prosthetic replacement of resected vertebral bodies, see codes 63085 or 63087 and 22556 and 20931 or 20938 and 22853, 22854, 22859)

(For lumbar spinal reconstruction with prosthetic replacement of resected vertebral bodies, see codes 63087 or 63090 and 22558 and 20931 or 20938 and 22853, 22854, 22859)

(For osteotomy of spine, see 22210-22226)

Osteotomy

To report arthrodesis, see codes 22590-22632. (Report in addition to code[s] for the definitive procedure with modifier 51.)

To report instrumentation procedures, see 22840-22855, 22859. (Report in addition to code[s] for the definitive procedure[s].) Do not append modifier 62 to spinal instrumentation codes 22840-22848, 22850, 22852, 22853, 22854, 22859.

To report bone graft procedures, see 20930-20938. (Report in addition to code[s] for the definitive procedure[s].) Do not append modifier 62 to bone graft codes 20900-20938.

For the following codes, when two surgeons work together as primary surgeons performing distinct part(s) of an anterior spine osteotomy, each surgeon should report his/her distinct operative work by appending modifier 62 to the procedure code. In this situation, modifier 62 may be appended to the procedure code(s) 22210-22214, 22220-22224 and, as appropriate, to associated additional segment add-on code(s) 22216, 22226 as long as both surgeons continue to work together as primary surgeons.

Spinal osteotomy procedures are reported when a portion(s) of the vertebral segment(s) is cut and removed in preparation for re-aligning the spine as part of a spinal deformity correction. For excision of an intrinsic lesion of the vertebra without deformity correction, see 22100-22116. For decompression of the spinal cord and/or nerve roots, see 63001-63308.

The three columns are defined as anterior (anterior two-thirds of the vertebral body), middle (posterior third of the vertebral body and the pedicle), and posterior (articular facets, lamina, and spinous process).

22206 Osteotomy of spine, posterior or posterolateral approach, 3 columns, 1 vertebral segment (eg, pedicle/vertebral body subtraction); thoracic
- *CPT Changes: An Insider's View* 2008

(Use 22208 in conjunction with 22206, 22207)

(Do not report 22206, 22207, 22208 in conjunction with 22210-22226, 22830, 63001-63048, 63055-63066, 63075-63091, 63101-63103, when performed at the same level)

22210 Osteotomy of spine, posterior or posterolateral approach, 1 vertebral segment; cervical
- *CPT Assistant* Jul 13:3, Dec 21:4-5

22212 thoracic
- *CPT Assistant* Dec 07:1, Jul 13:3, Dec 21:4-5

22214 lumbar
- *CPT Assistant* Dec 07:1, Jul 13:3, Dec 14:16, Dec 21:4-5

+ 22216 each additional vertebral segment (List separately in addition to primary procedure)
- *CPT Assistant* Dec 07:1, Dec 21:4-5

(Use 22216 in conjunction with 22210, 22212, 22214)

22220 Osteotomy of spine, including discectomy, anterior approach, single vertebral segment; cervical
- *CPT Assistant* Feb 02:4, Jul 13:3, Dec 21:5-6

22222 thoracic

CPT Assistant Feb 02:4, Dec 21:5-6

22224 lumbar

CPT Assistant Feb 02:4, Jul 13:3, Dec 21:5-6

+ 22226 each additional vertebral segment (List separately in addition to code for primary procedure)

CPT Assistant Feb 96:6, Feb 02:4, Dec 21:5-6

(Use 22226 in conjunction with 22220, 22222, 22224)

(For vertebral corpectomy, see 63081-63091)

Fracture and/or Dislocation

To report arthrodesis, see codes 22590-22632. (Report in addition to code[s] for the definitive procedure with modifier 51.)

To report instrumentation procedures, see 22840-22855, 22859. (Report in addition to code[s] for the definitive procedure[s].) Do not append modifier 62 to spinal instrumentation codes 22840-22848, 22850, 22852, 22853, 22854, 22859.

To report bone graft procedures, see 20930-20938. (Report in addition to code[s] for the definitive procedure[s].) Do not append modifier 62 to bone graft codes 20900-20938.

For the following codes, when two surgeons work together as primary surgeons performing distinct part(s) of open fracture and/or dislocation procedure(s), each surgeon should report his/her distinct operative work by appending modifier 62 to the procedure code. In this situation, modifier 62 may be appended to the procedure code(s) 22318-22327 and, as appropriate, the associated additional fracture vertebrae or dislocated segment add-on code 22328 as long as both surgeons continue to work together as primary surgeons.

22310 Closed treatment of vertebral body fracture(s), without manipulation, requiring and including casting or bracing

CPT Assistant Jun 12:10, Jul 13:3, Jul 14:8, May 24:1

(Do not report 22310 in conjunction with 22510, 22511, 22512, 22513, 22514, 22515, when performed at the same level)

22315 Closed treatment of vertebral fracture(s) and/or dislocation(s) requiring casting or bracing, with and including casting and/or bracing by manipulation or traction

CPT Changes: An Insider's View 2011

CPT Assistant Apr 12:11, Jun 12:10, Jul 13:3

(Do not report 22315 in conjunction with 22510, 22511, 22512, 22513, 22514, 22515, when performed at the same level)

(For spinal subluxation, use 97140)

22318 Open treatment and/or reduction of odontoid fracture(s) and or dislocation(s) (including os odontoideum), anterior approach, including placement of internal fixation; without grafting

CPT Assistant Feb 96:6

(Use 22328 in conjunction with 22325-22327)

(For treatment of vertebral fracture by the anterior approach, see corpectomy 63081-63091, and appropriate arthrodesis, bone graft and instrument co

(For decompression of spine following fracture, see 63001-63091; for arthrodesis of spine following fracture, see 22548-22632)

Manipulation

(For spinal manipulation without anesthesia, use 97140)

22505 Manipulation of spine requiring anesthesia, any region

CPT Assistant Mar 97:11, Jan 99:11

Percutaneous Vertebroplasty and Vertebral Augmentation

Codes 22510, 22511, 22512, 22513, 22514, 22515 describe procedures for percutaneous vertebral augmentation that include vertebroplasty of the cervical, thoracic, lumbar, and sacral spine and vertebral augmentation of the thoracic and lumbar spine.

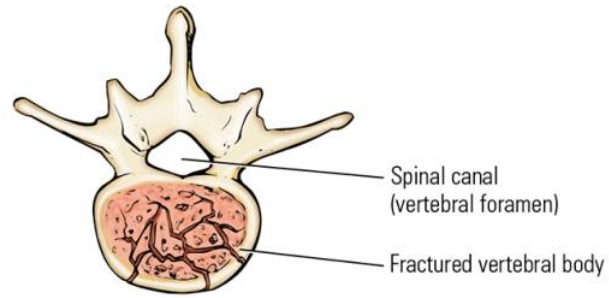
For the purposes of reporting 22510, 22511, 22512, 22513, 22514, 22515, "vertebroplasty" is the process of injecting a material (cement) into the vertebral body to reinforce the structure of the body using image guidance. "Vertebral augmentation" is the process of cavity creation followed by the injection of the material (cement) under image guidance. For 0200T and 0201T, "sacral augmentation (sacroplasty)" refers to the creation of a cavity within a sacral vertebral body followed by injection of a material to fill that cavity.

The procedure codes are inclusive of bone biopsy, when performed, and imaging guidance necessary to perform the procedure. Use one primary procedure code and an add-on code for additional levels. When treating the sacrum, sacral procedures are reported only once per encounter.

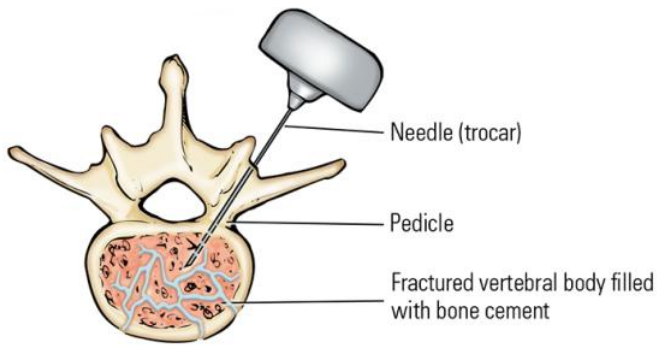
(For thermal destruction of intraosseous basivertebral nerve, see 64628, 64629)

22510 Percutaneous vertebroplasty (bone biopsy included when performed), 1 vertebral body, unilateral or bilateral injection, inclusive of all imaging guidance; cervicothoracic

CPT Changes: An Insider's View 2015, 2017



CPT Assistant Jan 15:8



Clinical Examples in Radiology Fall 14:3, Summer 15:14, Summer 20:10

Percutaneous Vertebroplasty

22510

Augmentation of a vertebral fracture is achieved by percutaneous injections of polymethylmethacrylate under fluoroscopic guidance.

+ 22527 1 or more additional levels (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2007, 2017
- *CPT Assistant* Sep 07:10, Nov 10:3, Jan 11:8, Jan 15:8, Mar 25:19

(Use 22527 in conjunction with 22526)

(Do not report codes 22526, 22527 in conjunction with 77002, 77003)

(For percutaneous intradiscal annuloplasty using method other than electrothermal, use 22899)

Arthrodesis

Arthrodesis may be performed in the absence of other procedures and therefore when it is combined with another definitive procedure (eg, osteotomy, fracture care, vertebral corpectomy or laminectomy), modifier 51 is appropriate. However, arthrodesis codes 22585, 22614, and 22632 are considered add-on procedure codes and should not be used with modifier 51.

To report instrumentation procedures, see 22840-22855, 22859. (Codes 22840-22848, 22853, 22854, 22859 are reported in conjunction with code[s] for the definitive procedure[s]. When instrumentation reinsertion or removal is reported in conjunction with other definitive procedures, including arthrodesis, decompression, and exploration of fusion, append modifier 51 to 22849, 22850, 22852, and 22855.) To report exploration of fusion, use 22830. (When exploration is reported in conjunction with other definitive procedures, including arthrodesis and decompression, append modifier 51 to 22830.) Do not append modifier 62 to spinal instrumentation codes 22840-22848, 22850, 22852, 22853, 22854, 22859.

To report bone graft procedures, see 20930-20938. (Report in addition to code[s] for the definitive procedure[s].) Do not append modifier 62 to bone graft codes 20900-20938.

Lateral Extracavitary Approach Technique

22532 Arthrodesis, lateral extracavitary technique, including minimal discectomy to prepare interspace (other than for decompression); thoracic

CPT Changes: An Insider's View 2004

CPT Assistant Apr 12:16, Jul 13:3, May 20:14, Jul 21:7

22533 lumbar

CPT Changes: An Insider's View 2004

CPT Assistant Apr 12:16, Jul 13:3

+ 22534 thoracic or lumbar, each additional vertebral segment (List separately in addition to code for primary procedure)

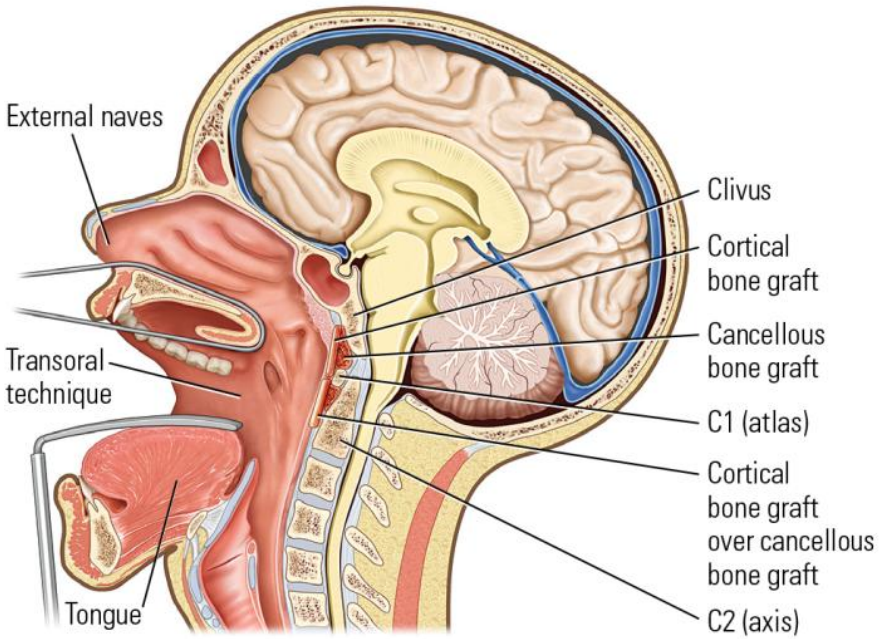
CPT Changes: An Insider's View 2004

(Use 22534 in conjunction with 22532 and 22533)

Anterior or Anterolateral Approach Technique

Procedure codes 22554-22558 are for SINGLE interspace; for additional interspaces, use 22585. A vertebral interspace is the non-bony compartment between two adjacent vertebral bodies, which contains the intervertebral disc, and includes the nucleus pulposus, annulus fibrosus, and two cartilaginous endplates.

For the following codes, when two surgeons work together as primary surgeons performing distinct part(s) of an anterior interbody arthrodesis, each surgeon should report his/her distinct operative work by appending modifier 62 to the procedure code. In this situation, modifier 62 may be appended to the procedure code(s) 22548-22558 and, as appropriate, to the associated additional interspace add-on code 22585 as long as both surgeons continue to work together as primary surgeons.



22548 Arthrodesis, anterior transoral or extraoral technique, clivus-C1-C2 (atlas-axis), with or without excision of odontoid process

CPT Assistant Spring 93:36, Feb 96:7, Sep 97:8, Sep 00:10, Feb 02:4, Apr 12:16, Jul 13:3

(For intervertebral disc excision by laminotomy or laminectomy, see 63020-63042)

Arthrodesis (Anterior Transoral Technique)

22548

22551 Arthrodesis, anterior interbody, including disc space preparation, discectomy, osteophytectomy and decompression of spinal cord and/or nerve roots; cervical below C2

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Apr 12:16, Jul 13:3, Jan 15:13, May 16:13, Aug 18:10, Aug 23:11

+ 22552 cervical below C2, each additional interspace (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Apr 12:16, Jul 13:3, Aug 18:10, Aug 23:11

(Use 22552 in conjunction with 22551)

22554 Arthrodesis, anterior interbody technique, including minimal discectomy to prepare interspace (other than for decompression); cervical below C2

- *CPT Assistant* Spring 93:36, Sep 97:8, Sep 00:10, Jan 01:12, Feb 02:4, Apr 12:16, Jul 13:3, Apr 15:7, Aug 23:11

(Do not report 22554 in conjunction with 63075, even if performed by a separate individual. To report anterior cervical discectomy and interbody fusion at the same level during the same session, use 22551)

22556 thoracic

CPT Assistant Spring 93:36, Feb 96:6, Mar 96:6, Sep 97:8, Sep 00:10, Feb 02:4, Apr 08:11

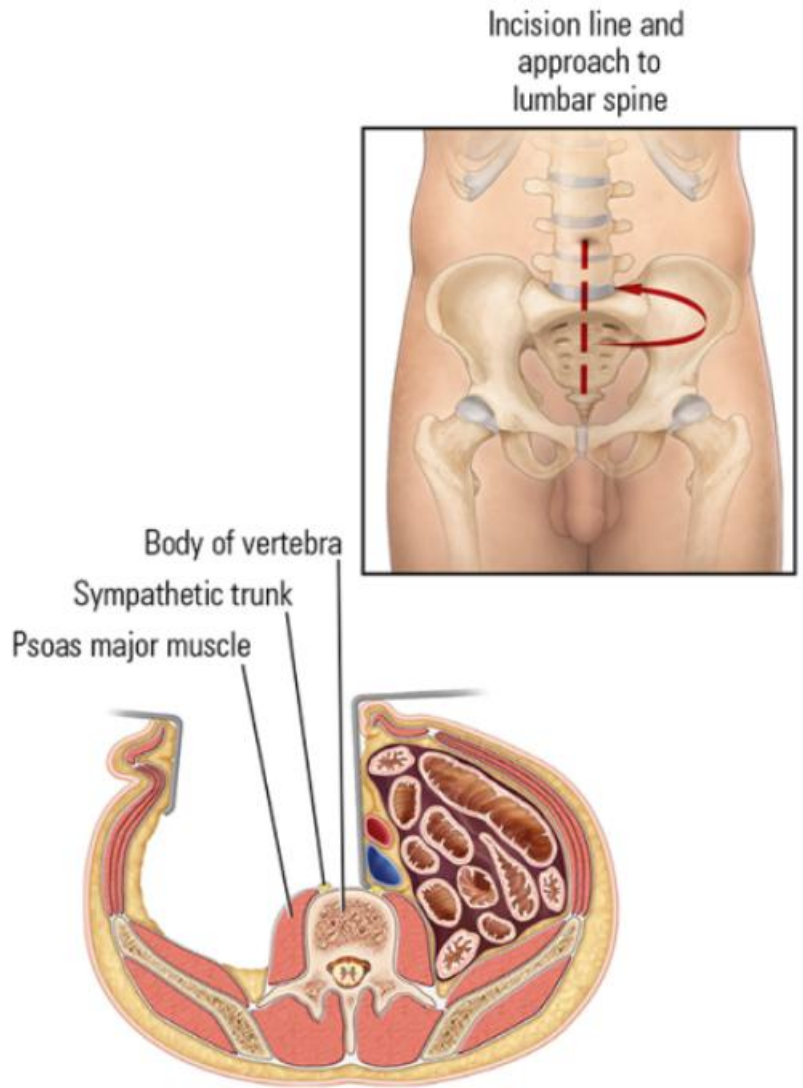
(Use 22585 in conjunction with 22554, 22556, 22558)

(Do not report 22585 in conjunction with 63075, even if performed by a separate individual. To report anterior cervical discectomy and interbody fusion at the same level during the same session, use 22552)

22586 Arthrodesis, pre-sacral interbody technique, including disc space preparation, discectomy, with posterior instrumentation, with image guidance, includes bone graft when performed, L5-S1 interspace

CPT Changes: An Insider's View 2013

(Do not report 22586 in conjunction with 20930-20938, 22840, 22848, 77002, 77003, 77011, 77012)



Posterior, Posterolateral or Lateral Transverse Process Technique

To report instrumentation procedures, see 22840-22855, 22859. (Report in addition to code[s] for the definitive procedure[s].) Do not append modifier 62 to spinal instrumentation codes 22840-22848, 22850, 22852, 22853, 22854, 22859.

Anterior Approach for Lumbar Fusion (Anterior Retroperitoneal Exposure)

22558

An example of an exposure technique used to reach anterior lumbar vertebrae for spinal procedures (eg, discectomy, arthrodesis, spinal instrumentation)

To report bone graft procedures, see 20930-20938. (Report in addition to code[s] for the definitive procedure[s].) Do not append modifier 62 to bone graft codes 20900-20938.

Definitions

Corpectomy: Identifies removal of a vertebral body during spinal surgery.

Facetectomy: The excision of the facet joint between two vertebral bodies. There are two facet joints at each vertebral segment (see below).

Foraminotomy: The excision of bone to widen the intervertebral foramen. The intervertebral foramen is bordered by the superior notch of the adjacent vertebra, the inferior notch of the vertebra, the facet joint, and the intervertebral disc.

Hemilaminectomy: Removal of a portion of a vertebral lamina, usually performed for exploration of, access to, or decompression of the intraspinal contents.

Lamina: Pertains to the vertebral arch, the flattened posterior portion of the vertebral arch extending between the pedicles and the midline, forming the dorsal wall of the vertebral forameny, and from the midline junction of which the spinous process extends.

Laminectomy: Excision of a vertebral lamina, commonly used to denote removal of the posterior arch.

Laminotomy: Excision of a portion of the vertebral lamina, resulting in enlargement of the intervertebral foramen for the purpose of relieving pressure on a spinal nerve root.

A vertebral segment describes the basic constituent part into which the spine may be divided. It represents a single complete vertebral bone with its associated articular processes and laminae. A vertebral interspace is the non-bony compartment between two adjacent vertebral bodies which contains the intervertebral disc, and includes the nucleus pulposus, annulus fibrosus, and two cartilaginous endplates.

Decompression performed on the same vertebral segment(s) and/or interspace(s) as posterior lumbar interbody fusion that includes laminectomy, facetectomy, and/or foraminotomy may be separately reported using 63052, 63053.

Decompression solely to prepare the interspace for fusion is not separately reported.

CPT Changes: An Insider's View 2012, 2022

CPT Assistant Dec 11:14, Jan 12:3, Jun 12:10, Jul 13:3, Jul 18:14, Dec 21:6, 22, Feb 22:14, Mar 22:3

(Use 22634 in conjunction with 22633)

(Do not report 22633, 22634 in conjunction with 63030, 63040, 63042, 63047, 63052, 63053, 63056, for laminectomy performed to prepare the interspace on the same spinal interspace[s] and vertebral segment[s])

(For decompression performed on the same interspace[s] and vertebral segment[s] as posterior interbody fusion that includes laminectomy, removal of facets, and/or opening/widening of the foramen for decompression of nerves or spinal components, such as spinal cord, cauda equina, or nerve roots, see 63052, 63053)

Spine Deformity (eg, Scoliosis, Kyphosis)

To report instrumentation procedures, see 22840-22855, 22859. (Report in addition to code[s] for the definitive procedure[s].) Do not append modifier 62 to spinal instrumentation codes 22840-22848, 22850, 22852, 22853, 22854, 22859.

To report bone graft procedures, see 20930-20938. (Report in addition to code[s] for the definitive procedure[s].) Do not append modifier 62 to bone graft codes 20900-20938.

A vertebral segment describes the basic constituent part into which the spine may be divided. It represents a single complete vertebral bone with its associated articular processes and laminae.

For the following codes, when two surgeons work together as primary surgeons performing distinct part(s) of an arthrodesis for spinal deformity, each surgeon should report his or her distinct operative work by appending modifier 62 to the procedure code. In this situation, modifier 62 may be appended to procedure code(s) 22800-22819 as long as both surgeons continue to work together as primary surgeons. The spinal deformity arthrodesis codes (22800, 22802, 22804, 22808, 22810, 22812) and kyphectomy codes (22818, 22819) should not be reported in conjunction with thoracic vertebral body tethering codes (22836, 22837, 22838) or lumbar or thoracolumbar vertebral body tethering codes (0656T, 0657T, 0790T).

When two surgeons work together as primary surgeons performing distinct part(s) of the thoracic vertebral body tethering, each surgeon should report his or her distinct operative work by appending modifier 62 to the procedure code. Modifier 62 may be appended to procedure code(s) 22836, 22837, 22838, as long as both surgeons continue to work together as primary surgeons.

22800 Arthrodesis, posterior, for spinal deformity, with or without cast; up to 6 vertebral segments

CPT Assistant Apr 12:16, Jul 13:3, Sep 17:14, Dec 21:22, Jan 24:26

22802 7 to 12 vertebral segments

CPT Assistant Mar 96:10, Apr 12:16, Jul 13:3, Sep 17:14, Jul 18:14, Dec 21:22, Dec 21:6, Jan 24:26

22804 13 or more vertebral segments

CPT Assistant Apr 12:16, Jul 13:3, Sep 17:14, Dec 21:22, Jan 24:26

(Do not report 22800, 22802, 22804 in conjunction with 0656T, 0657T)

22808 Arthrodesis, anterior, for spinal deformity, with or without cast; 2 to 3 vertebral segments

CPT Assistant Feb 02:4, Apr 12:16, Jul 13:3, Sep 17:14, Jan 24:26

22810 4 to 7 vertebral segments

22812 8 or more vertebral segments

CPT Assistant Feb 02:4, Apr 12:16, Jul 13:3, Sep 17:14, Jan 24:26

(Do not report 22808, 22810, 22812 in conjunction with 0656T, 0657T)

22818 Kyphectomy, circumferential exposure of spine and resection of vertebral segment(s) (including body and posterior elements); single or 2 segments

CPT Assistant Nov 97:14, Sep 17:14, Jan 24:26

22819 3 or more segments

CPT Assistant Nov 97:14, Sep 17:14, May 20:14, Jul 21:7, Jan 24:26

(Do not report 22818, 22819 in conjunction with 0656T, 0657T)

(To report arthrodesis, see 22800-22804 and add modifier 51)

Exploration

To report instrumentation procedures, see 22840-22855, 22859. (Codes 22840-22848, 22853, 22854, 22859 are reported in conjunction with code[s] for the definitive procedure[s]. When instrumentation reinsertion or removal is reported in conjunction with other definitive procedures, including arthrodesis, decompression, and exploration of fusion, append modifier 51 to 22849, 22850, 22852, and 22855.) Code 22849 should not be reported with 22850, 22852, and 22855 at the same spinal levels. To report exploration of fusion, see 22830. (When exploration is reported in conjunction with other definitive procedures, including arthrodesis and decompression, append modifier 51 to 22830.)

(To report bone graft procedures, see 20930-20938)

22830 Exploration of spinal fusion

➔ *CPT Assistant* Sep 97:11, Mar 10:9, Mar 20:14, Dec 24:56

22836 Code is out of numerical sequence. See 22846-22849

22837 Code is out of numerical sequence. See 22846-22849

22838 Code is out of numerical sequence. See 22846-22849

Spinal Instrumentation

Segmental instrumentation is defined as fixation at each end of the construct and at least one additional interposed bony attachment.

Non-segmental instrumentation is defined as fixation at each end of the construct and may span several vertebral segments without attachment to the intervening segments.

Insertion of spinal instrumentation is reported separately and in addition to arthrodesis. Instrumentation procedure codes 22840-22848, 22853, 22854, 22859 are reported in addition to the definitive procedure(s). Do not append modifier 62 to spinal instrumentation codes 22840-22848, 22850, 22852, 22853, 22854, 22859.

To report bone graft procedures, see 20930-20938. (Report in addition to code[s] for definitive procedure[s].) Do not append modifier 62 to bone graft codes 20900-20938.

A vertebral segment describes the basic constituent part into which the spine may be divided. It represents a single complete vertebral bone with its associated articular processes and laminae. A vertebral interspace is the non-bony compartment between two adjacent vertebral bodies, which contains the intervertebral disc, and includes the nucleus pulposus, annulus fibrosus, and two cartilaginous endplates.

Codes 22849, 22850, 22852, and 22855 are subject to modifier 51 if reported with other definitive procedure(s), including arthrodesis, decompression, and exploration of fusion. Code 22849 should not be reported in conjunction with 22850, 22852, and 22855 at the same spinal levels. Only the appropriate insertion code (22840-22848) should be reported when previously placed spinal instrumentation is being removed or revised during the same session where new instrumentation is inserted at levels including all or part of the previously instrumented segments. Do not report the reinsertion (22849) or removal (22850, 22852, 22855) procedures in addition to the insertion of the new instrumentation (22840-22848).

Codes 22836, 22837, 22838 describe anterior thoracic vertebral body tethering, which corrects scoliosis without fusion using a tether (cord) to compress the vertebral growth plates on the convex side of the curve to inhibit their growth, while allowing the growth plates on the concave side of the curve to continue to grow. Codes 22836, 22837 may not be reported with anterior instrumentation codes 22845, 22846, 22847.

For the following codes, when two surgeons work together as primary surgeons performing distinct part(s) of the thoracic vertebral body tethering, each surgeon should report his or her distinct operative work by appending modifier 62 to the procedure code. Modifier 62 may be appended to procedure code(s) 22836, 22837, 22838, as long as both surgeons continue to work together as primary surgeons.

Regions of the spine include cervical, cervicothoracic, thoracic, thoracolumbar, lumbar, lumbosacral, sacral, and coccygeal.

+ 22840 Posterior non-segmental instrumentation (eg, Harrington rod technique, pedicle fixation across 1 interspace, atlantoaxial transarticular screw fixation, sublaminar wiring at C1, facet screw fixation) (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2008

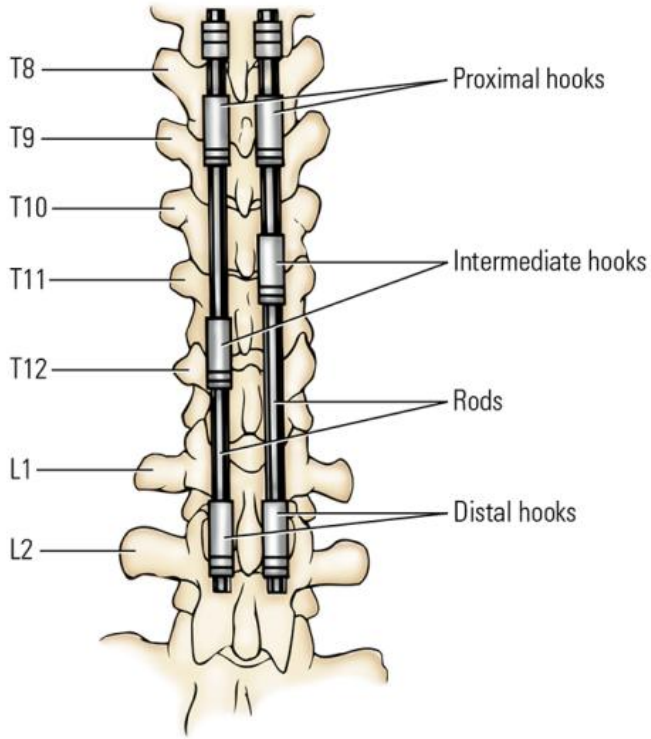
CPT Assistant Feb 96:6, Mar 96:10, Jul 96:7, 10, Sep 97:8, Feb 02:6, Jun 12:11, Jul 13:3, Nov 14:14, Jan 15:13, Mar 15:9, Apr 15:7, May 16:13, Mar 17:7, Dec 21:5-6, 22



(Use 22845 in conjunction with 22100-22102, 22110-22114, 22206, 22207, 22210-22214, 22220-22224, 22310-22327, 22532, 22533, 22548-22558, 22590-22612, 22630, 22633, 22634, 22800-22812, 63001-63030, 63040-63042, 63045-63047, 63050-63056, 63064, 63075, 63077, 63081, 63085, 63087, 63090, 63101, 63102, 63170-63290, 63300-63307)

(For vertebral body tethering of the thoracic spine, see 22836, 22837, 22838)

(For vertebral body tethering of the lumbar or thoracolumbar spine, see 0656T, 0657T, 0790T)

Segmental Spinal Instrumentation
22842-22844

Fixation at each end of the construct and at least one additional interposed bony attachment

+ 22846 4 to 7 vertebral segments (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2008

CPT Assistant Feb 96:6, Sep 97:8, Feb 02:6, Jun 12:11, Jul 13:3, May 16:13, Dec 21:5-6, 22

(Use 22846 in conjunction with 22100-22102, 22110-22114, 22206, 22207, 22210-22214, 22220-22224, 22310-22327, 22532, 22533, 22548-22558, 22590-22612, 22630, 22633, 22634, 22800-22812, 63001-63030, 63040-63042, 63045-63047, 63050-63056, 63064, 63075, 63077, 63081, 63085, 63087, 63090, 63101, 63102, 63170-63290, 63300-63307)

(For vertebral body tethering of the thoracic spine, see 22836, 22837, 22838)

(For vertebral body tethering of the lumbar or thoracolumbar spine, see 0656T, 0657T, 0790T)

+ 22847 8 or more vertebral segments (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Feb 96:6, Sep 97:8, Feb 02:6, Jun 12:11, Jul 13:3, May 16:13, Dec 21:5-6, 22

(Use 22847 in conjunction with 22100-22102, 22110-22114, 22206, 22207, 22210-22214, 22220-22224, 22310-22327, 22532, 22533, 22548-22558, 22590-22612, 22630, 22633, 22634, 22800-22812, 63001-63030, 63040-63042, 63045-63047, 63050-63056, 63064, 63075, 63077, 63081, 63085, 63087, 63090, 63101, 63102, 63170-63290, 63300-63307)

(Do not report 22845, 22846, 22847 in conjunction with 22836, 22837, 22838)

(For vertebral body tethering of the thoracic spine, see 22836, 22837, 22838)

(For vertebral body tethering of the lumbar or thoracolumbar spine, see 0656T, 0657T, 0790T)

 # 22836 Anterior thoracic vertebral body tethering, including thoracoscopy, when performed; up to 7 vertebral segments

- *CPT Changes: An Insider's View* 2024
- *CPT Assistant* Jan 24:26

(For anterior lumbar or thoracolumbar vertebral body tethering, up to 7 vertebral segments, use 0656T)

 # 22837 8 or more vertebral segments

- *CPT Changes: An Insider's View* 2024
- *CPT Assistant* Jan 24:26

(Do not report 22836, 22837 in conjunction with 22845, 22846, 22847, 32601)

(For anterior lumbar or thoracolumbar vertebral body tethering, 8 or more vertebral segments, use 0657T)

 # 22838 Revision (eg, augmentation, division of tether), replacement, or removal of thoracic vertebral body tethering, including thoracoscopy, when performed

- *CPT Changes: An Insider's View* 2024
- *CPT Assistant* Jan 24:26

(Do not report 22838 in conjunction with 22849, 22855, 32601)

+ 22848 Pelvic fixation (attachment of caudal end of instrumentation to pelvic bony structures) other than sacrum (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Feb 96:6, Sep 97:8, Feb 02:6, Jun 12:11, Jul 13:3, Dec 21:5-6

(Use 22848 in conjunction with 22100-22102, 22110-22114, 22206, 22207, 22210-22214, 22220-22224, 22310-22327, 22532, 22533, 22548-22558, 22590-22612, 22630, 22633, 22634, 22800-22812, 63001-63030, 63040-63042, 63045-63047, 63050-63056, 63064, 63075, 63077, 63081, 63085, 63087, 63090, 63101, 63102, 63170-63290, 63300-63307)

22849 Reinsertion of spinal fixation device

CPT Assistant Feb 96:6, Sep 97:8, Feb 02:6, Nov 02:3, Oct 11:10, Jun 12:11, Jul 13:3, May 16:13, Jun 17:10

22850 Removal of posterior nonsegmental instrumentation (eg, Harrington rod)

CPT Assistant Feb 96:6, Sep 97:8, Feb 02:6, Jun 12:11, Jul 13:3, May 16:13, Jun 17:10

22852 Removal of posterior segmental instrumentation

CPT Assistant Feb 96:6, Sep 97:8, Feb 02:6, May 06:16, Jun 12:11, Jun 17:10

+ 22853 Insertion of interbody biomechanical device(s) (eg, synthetic cage, mesh) with integral anterior instrumentation for device anchoring (eg, screws, flanges), when performed, to intervertebral disc space in conjunction with interbody arthrodesis, each interspace (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2017

CPT Assistant Mar 17:7, Aug 17:9, Jul 18:14, Dec 21:5-6, 22

(Use 22853 in conjunction with 22100-22102, 22110-22114, 22206, 22207, 22210-22214, 22220-22224, 22310-22327, 22532, 22533, 22548-22558, 22590-22612, 22630, 22633, 22634, 22800-22812, 63001-63030, 63040-63042, 63045-63047, 63050-63056, 63064, 63075, 63077, 63081, 63085, 63087, 63090, 63101, 63102, 63170-63290, 63300-63307)

(Report 22853 for each treated intervertebral disc space)

+ 22854 Insertion of intervertebral biomechanical device(s) (eg, synthetic cage, mesh) with integral anterior instrumentation for device anchoring (eg, screws, flanges), when performed, to vertebral corpectomy(ies) (vertebral body resection, partial or complete) defect, in conjunction with interbody arthrodesis, each contiguous defect (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2017

CPT Assistant Mar 17:7, Dec 21:5-6

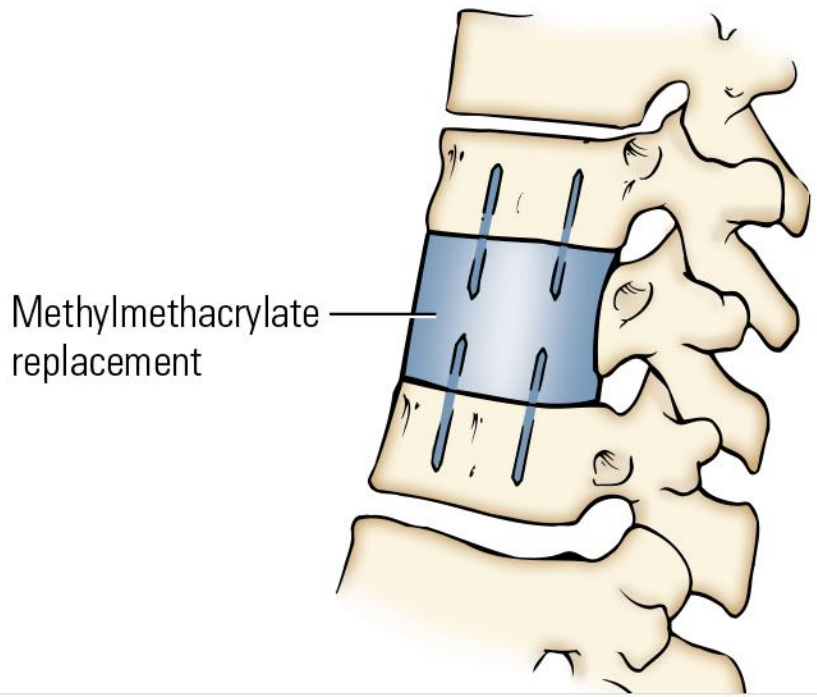
(Use 22854 in conjunction with 22100-22102, 22110-22114, 22206, 22207, 22210-22214, 22220-22224, 22310-22327, 22532, 22533, 22548-22558, 22590-22612, 22630, 22633, 22634, 22800-22812, 63001-63030, 63040-63042, 63045-63047, 63050-63056, 63064, 63075, 63077, 63081, 63085, 63087, 63090, 63101, 63102, 63170-63290, 63300-63307)

#+ 22859 Insertion of intervertebral biomechanical device(s) (eg, synthetic cage, mesh, methylmethacrylate) to intervertebral disc space or vertebral body defect without interbody arthrodesis, each contiguous defect (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2017

CPT Assistant Mar 17:7, Dec 21:5-6

(Use 22859 in conjunction with 22100-22102, 22110-22114, 22206, 22207, 22210-22214, 22220-22224, 22310-22327, 22532, 22533, 22548-22558, 22590-22612, 22630, 22633, 22634, 22800-22812, 63001-63030, 63040-63042, 63045-63047, 63050-63056, 63064, 63075, 63077, 63081, 63085, 63087, 63090, 63101, 63102, 63170-63290, 63300-63307)



(22853, 22854, 22859 may be reported more than once for noncontiguous defects)

(For application of an intervertebral bone device/graft, see 20930, 20931, 20936, 20937, 20938)

Spinal Prosthetic Devices

22853, 22854, 22859

Application of prosthetic device

22855 Removal of anterior instrumentation

CPT Assistant Feb 96:6, Sep 97:8, Feb 02:6, Nov 02:2, Jun 12:11, Jun 17:10

22856 Total disc arthroplasty (artificial disc), anterior approach, including discectomy with end plate preparation (includes osteophytectomy for nerve root or spinal cord decompression and microdissection); single interspace, cervical

CPT Changes: An Insider's View 2009, 2015

CPT Assistant Apr 15:7

(Do not report 22856 in conjunction with 22554, 22845, 22853, 22854, 22859, 63075, when performed at the same level)

(Do not report 22856 in conjunction with 69990)

(For additional interspace cervical total disc arthroplasty, use 22858)

#+ 22858 second level, cervical (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2015

CPT Assistant Apr 15:7

(Use 22858 in conjunction with 22856)

22857 Total disc arthroplasty (artificial disc), anterior approach, including discectomy to prepare interspace (other than for decompression); single interspace, lumbar

CPT Changes: An Insider's View 2007, 2009, 2023

CPT Assistant Jun 23:16

(Do not report 22857 in conjunction with 22558, 22845, 22853, 22854, 22859, 49010 when performed at the same level)

22858 Code is out of numerical sequence. See 22853-22861

22859 Code is out of numerical sequence. See 22853-22861

+ 22860 second interspace, lumbar (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2023

CPT Assistant Jun 23:16

(Use 22860 in conjunction with 22857)

(For total disc arthroplasty, anterior approach, lumbar, more than two interspaces, use 22899)

22861 Revision including replacement of total disc arthroplasty (artificial disc), anterior approach, single interspace; cervical

CPT Changes: An Insider's View 2009

(Do not report 22861 in conjunction with 22845, 22853, 22854, 22859, 22864, 63075 when performed at the same level)

(Do not report 22861 in conjunction with 69990)

(For additional interspace revision of cervical total disc arthroplasty, use 0098T)

22862 lumbar

CPT Changes: An Insider's View 2007, 2009

CPT Assistant Jun 07:1

(Do not report 22862 in conjunction with 22558, 22845, 22853, 22854, 22859, 22865, 49010 when performed at the same level

(For additional interspace, use Category III code 0165T)

22864 Removal of total disc arthroplasty (artificial disc), anterior approach, single interspace; cervical

CPT Changes: An Insider's View 2009

CPT Assistant Mar 20:14

(Do not report 22864 in conjunction with 22861, 69990)

(For additional interspace removal of cervical total disc arthroplasty, use 0095T)

22865 lumbar

CPT Changes: An Insider's View 2007, 2009

CPT Assistant Jun 07:1, Mar 20:14

(Do not report 22865 in conjunction with 49010)

(For additional interspace, see Category III code 0164T)

(22856-22865 include fluoroscopy when performed)

(For decompression, see 63001-63048)

22867 Insertion of interlaminar/interspinous process stabilization/distraction device, without fusion, including image guidance when performed, with open decompression, lumbar; single level

CPT Changes: An Insider's View 2017

CPT Assistant Feb 17:9

+ 22868 second level (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Feb 17:9

(Use 22868 in conjunction with 22867)

(Do not report 22867, 22868 in conjunction with 22532, 22533, 22534, 22558, 22612, 22614, 22630, 22632, 22633, 22634, 22800, 22802, 22804, 22840, 22841, 22842, 22869, 22870, 63005, 63012, 63017, 63030, 63035, 63042, 63044, 63047, 63048, 77003 for the same level)

(For insertion of interlaminar/interspinous process stabilization/distraction device, without open decompression or fusion, see 22869, 22870)

22869 Insertion of interlaminar/interspinous process stabilization/distraction device, without open decompression or fusion, including image guidance when performed, lumbar; single level

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Feb 17:9

+ 22870 second level (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Feb 17:9, May 20:14, Jul 21:7

(Use 22870 in conjunction with 22869)

(Do not report 22869, 22870 in conjunction with 22532, 22533, 22534, 22558, 22612, 22614, 22630, 22632, 22633, 22634, 22800, 22802, 22804, 22840, 22841, 22842, 63005, 63012, 63017, 63030, 63035, 63042, 63044, 63047, 63048, 77003)

Other Procedures

22899 Unlisted procedure, spine

- *CPT Assistant* May 00:11, Sep 00:10, Jul 06:19, Feb 10:13, Nov 10:4, Jan 12:14, Sep 12:16, Dec 12:13, Dec 13:14, 17, Oct 14:15, Jan 15:8, Feb 17:9, May 18:10, Oct 21:10, Feb 22:14, Apr 22:13, Dec 22:16, Apr 23:16, Jun 23:16, 26
- *Clinical Examples in Radiology* Fall 14:3, Fall 24:3

Abdomen

Excision

22900 Excision, tumor, soft tissue of abdominal wall, subfascial (eg, intramuscular); less than 5 cm

CPT Changes: An Insider's View 2010

22901 5 cm or greater

CPT Changes: An Insider's View 2010

22902 Excision, tumor, soft tissue of abdominal wall, subcutaneous; less than 3 cm

CPT Changes: An Insider's View 2010

22903 3 cm or greater

CPT Changes: An Insider's View 2010

(For excision of benign lesions of cutaneous origin [eg, sebaceous cyst], see 11400-11406)

22904 Radical resection of tumor (eg, sarcoma), soft tissue of abdominal wall; less than 5 cm

CPT Changes: An Insider's View 2010, 2014

22905 5 cm or greater

CPT Changes: An Insider's View 2010, 2014

(For radical resection of tumor[s] of cutaneous origin [eg, melanoma], see 11600-11606)

Other Procedures

22999 Unlisted procedure, abdomen, musculoskeletal system

CPT Assistant Apr 23:25

Shoulder

The area known as the shoulder is made up of the clavicle, scapula, humerus head and neck, sternoclavicular joint, acromioclavicular joint, and shoulder joint.

Incision

23000 Removal of subdeltoid calcareous deposits, open

CPT Changes: An Insider's View 2002, 2003

(For arthroscopic removal of bursal deposits, use 29999)

23020 Capsular contracture release (eg, Sever type procedure)

(For incision and drainage procedures, superficial, see 10040-10160)

23030 Incision and drainage, shoulder area; deep abscess or hematoma

23031 infected bursa

23035 Incision, bone cortex (eg, osteomyelitis or bone abscess), shoulder area

23040 Arthrotomy, glenohumeral joint, including exploration, drainage, or removal of foreign body

CPT Assistant Nov 98:8, Mar 20:14

23044 Arthrotomy, acromioclavicular, sternoclavicular joint, including exploration, drainage, or removal of foreign body

CPT Assistant Nov 98:8, Mar 20:14

Excision

23065 Biopsy, soft tissue of shoulder area; superficial

23066 deep

(For needle biopsy of soft tissue, use 20206)

23071 Code is out of numerical sequence. See 23066-23078

23073 Code is out of numerical sequence. See 23066-23078

23075 Excision, tumor, soft tissue of shoulder area, subcutaneous; less than 3 cm

CPT Changes: An Insider's View 2010

CPT Assistant Summer 92:22, Nov 98:8, Sep 18:7

 # 23071 3 cm or greater

CPT Changes: An Insider's View 2010

CPT Assistant Sep 18:7

(For excision of benign lesions of cutaneous origin [eg, sebaceous cyst], see 11400-11406)

23076 Excision, tumor, soft tissue of shoulder area, subfascial (eg, intramuscular); less than 5 cm

CPT Changes: An Insider's View 2010

CPT Assistant Summer 92:22, Oct 09:7, Sep 18:7

 # 23073 5 cm or greater

CPT Changes: An Insider's View 2010

CPT Assistant Sep 18:7

23077 Radical resection of tumor (eg, sarcoma), soft tissue of shoulder area; less than 5 cm

CPT Changes: An Insider's View 2010, 2014

23078 5 cm or greater

CPT Changes: An Insider's View 2010, 2014

CPT Assistant Sep 18:7

(For radical resection of tumor[s] of cutaneous origin [eg, melanoma], see 11600-11606)

23100 Arthrotomy, glenohumeral joint, including biopsy

CPT Assistant Nov 98:8

23101 Arthrotomy, acromioclavicular joint or sternoclavicular joint, including biopsy and/or excision of torn cartilage

CPT Assistant Nov 98:8

23105 Arthrotomy; glenohumeral joint, with synovectomy, with or without biopsy

CPT Assistant Nov 98:8

23106 sternoclavicular joint, with synovectomy, with or without biopsy

23107 Arthrotomy, glenohumeral joint, with joint exploration, with or without removal of loose or foreign body

23120 Claviculectomy; partial

CPT Assistant Sep 12:16

(For arthroscopic procedure, use 29824)

23125 total

23130 Acromioplasty or acromionectomy, partial, with or without coracoacromial ligament release

CPT Assistant Aug 01:11, Feb 15:10, Mar 15:7

23140 Excision or curettage of bone cyst or benign tumor of clavicle or scapula;

23145 with autograft (includes obtaining graft)

23146 with allograft

23150 Excision or curettage of bone cyst or benign tumor of proximal humerus;

23155 with autograft (includes obtaining graft)

23156 with allograft

23170 Sequestrectomy (eg, for osteomyelitis or bone abscess), clavicle

23172 Sequestrectomy (eg, for osteomyelitis or bone abscess), scapula

23174 Sequestrectomy (eg, for osteomyelitis or bone abscess), humeral head to surgical neck

23180 Partial excision (craterization, saucerization, or diaphysectomy) bone (eg, osteomyelitis), clavicle

CPT Assistant Nov 98:9

23182 Partial excision (craterization, saucerization, or diaphysectomy) bone (eg, osteomyelitis), scapula

CPT Assistant Nov 98:9

23184 Partial excision (craterization, saucerization, or diaphysectomy) bone (eg, osteomyelitis), proximal humerus

CPT Assistant Nov 98:9

23190 Ostectomy of scapula, partial (eg, superior medial angle)

23195 Resection, humeral head

(For replacement with implant, use 23470)

23200 Radical resection of tumor; clavicle

CPT Changes: An Insider's View 2010

23210 scapula

CPT Changes: An Insider's View 2010

23220 Radical resection of tumor, proximal humerus

CPT Changes: An Insider's View 2010

CPT Assistant Nov 98:8

Introduction or Removal

(For arthrocentesis or needling of bursa, use 20610)

(For K-wire or pin insertion or removal, see 20650, 20670, 20680)

23330 Removal of foreign body, shoulder; subcutaneous

CPT Assistant Aug 99:3, Mar 14:4

(To report removal of foreign body, see 23330, 23333)

23333 deep (subfascial or intramuscular)

CPT Changes: An Insider's View 2014

CPT Assistant Mar 14:4

23334 Removal of prosthesis, includes debridement and synovectomy when performed; humeral **or** glenoid component

CPT Changes: An Insider's View 2014

CPT Assistant Mar 14:4, Mar 20:14

23335 humeral **and** glenoid components (eg, total shoulder)

CPT Changes: An Insider's View 2014

CPT Assistant Mar 14:4

(Do not report 23334, 23335 in conjunction with 23473, 23474 if a prosthesis [ie, humeral and/or glenoid component(s)] is being removed and replaced in the same shoulder during the same surgical session)

(To report removal of hardware, other than humeral and/or glenoid prosthesis, use 20680)

23350 Injection procedure for shoulder arthrography or enhanced CT/MRI shoulder arthrography

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Jul 01:3, Aug 15:6, May 16:13
- *Clinical Examples in Radiology* Spring 05:5, Spring 09:6-7, Summer 18:14

(For radiographic arthrography, radiological supervision and interpretation, use 73040. Fluoroscopy [77002] is inclusive of radiographic arthrography)

(When fluoroscopic guided injection is performed for enhanced CT arthrography, use 23350, 77002, and 73201 or 73202)

(When fluoroscopic guided injection is performed for enhanced MR arthrography, use 23350, 77002, and 73222 or 73223)

(For enhanced CT or enhanced MRI arthrography, use 77002 and either 73201, 73202, 73222, or 73223)

(To report biopsy of the shoulder and joint, see 29805-29826)

Repair, Revision, and/or Reconstruction

23395 Muscle transfer, any type, shoulder or upper arm; single

- *CPT Assistant* Aug 24:17

23397 multiple

23400 Scapulopexy (eg, Sprengels deformity or for paralysis)

23405 Tenotomy, shoulder area; single tendon

- *CPT Assistant* Nov 98:8

23406 multiple tendons through same incision

- *CPT Assistant* Nov 98:8

23410 Repair of ruptured musculotendinous cuff (eg, rotator cuff) open; acute

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Aug 01:11, Feb 02:11

23412 chronic

- *CPT Assistant* Feb 02:11, Sep 12:16, Feb 15:10, Jun 15:10, May 22:15

(For arthroscopic procedure, use 29827)

23415 Coracoacromial ligament release, with or without acromioplasty

- *CPT Assistant* Mar 15:7

(For arthroscopic procedure, use 29826)

23440 Resection or transplantation of long tendon of biceps

23450 Capsulorrhaphy, anterior; Putti-Platt procedure or Magnuson type operation

(To report arthroscopic thermal capsulorrhaphy, use 29999)

23455 with labral repair (eg, Bankart procedure)

CPT Assistant Nov 98:8

(For arthroscopic procedure, use 29806)

23460 Capsulorrhaphy, anterior, any type; with bone block

23462 with coracoid process transfer

(To report open thermal capsulorrhaphy, use 23929)

23465 Capsulorrhaphy, glenohumeral joint, posterior, with or without bone block

CPT Assistant Nov 98:8

(For sternoclavicular and acromioclavicular reconstruction, see 23530, 23550)

23466 Capsulorrhaphy, glenohumeral joint, any type multidirectional instability

CPT Assistant Nov 98:8

23470 Arthroplasty, glenohumeral joint; hemiarthroplasty

CPT Assistant Nov 98:8, Mar 14:4

23472 total shoulder (glenoid and proximal humeral replacement (eg, total shoulder))

CPT Assistant Jun 96:10, Nov 98:8, Mar 13:12, Mar 14:4, Jul 24:12

(For removal of total shoulder implants, see 23334, 23335)

(For osteotomy, proximal humerus, use 24400)

23473 Revision of total shoulder arthroplasty, including allograft when performed; humeral **or** glenoid component

CPT Changes: An Insider's View 2013

CPT Assistant Feb 13:11, Mar 13:12, Mar 14:4

23474 humeral **and** glenoid component

CPT Changes: An Insider's View 2013

CPT Assistant Feb 13:11, Mar 13:12, Mar 14:4

(Do not report 23473, 23474 in conjunction with 23334, 23335 if a prosthesis [ie, humeral and/or glenoid component(s)] is being removed and replaced in the same shoulder during the same surgical session)

23480 Osteotomy, clavicle, with or without internal fixation;

23485 with bone graft for nonunion or malunion (includes obtaining graft and/or necessary fixation)

23490 Prophylactic treatment (nailing, pinning, plating or wiring) with or without methylmethacrylate; clavicle

23491 proximal humerus

CPT Assistant Nov 98:8

Fracture and/or Dislocation

Coding Tip

Reporting for Categories of Manipulation and/or Fracture

The codes for treatment of fractures and joint injuries (dislocations) are categorized by the type of manipulation (reduction) and stabilization (fixation or immobilization). These codes can apply to either open (compound) or closed fractures or joint injuries.

CPT Coding Guidelines, Musculoskeletal System

23500 Closed treatment of clavicular fracture; without manipulation
23505 with manipulation
23515 Open treatment of clavicular fracture, includes internal fixation, when performed
- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Jan 08:4

23520 Closed treatment of sternoclavicular dislocation; without manipulation
23525 with manipulation
23530 Open treatment of sternoclavicular dislocation, acute or chronic;
23532 with fascial graft (includes obtaining graft)
23540 Closed treatment of acromioclavicular dislocation; without manipulation
23545 with manipulation
23550 Open treatment of acromioclavicular dislocation, acute or chronic;
23552 with fascial graft (includes obtaining graft)
- *CPT Assistant* Nov 19:14

23570 Closed treatment of scapular fracture; without manipulation
23575 with manipulation, with or without skeletal traction (with or without shoulder joint involvement)
23585 Open treatment of scapular fracture (body, glenoid or acromion) includes internal fixation, when performed
- *CPT Changes: An Insider's View* 2009
- *CPT Assistant* Oct 04:10

23600 Closed treatment of proximal humeral (surgical or anatomical neck) fracture; without manipulation
23605 with manipulation, with or without skeletal traction
23615 Open treatment of proximal humeral (surgical or anatomical neck) fracture, includes internal fixation, when performed, includes repair of tuberosity(s), when performed;
- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Jan 08:4

23616 with proximal humeral prosthetic replacement
- *CPT Changes: An Insider's View* 2008

23620 Closed treatment of greater humeral tuberosity fracture; without manipulation
- *CPT Assistant* Nov 98:8

23625 with manipulation

23630 Open treatment of greater humeral tuberosity fracture, includes internal fixation, when performed

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Nov 98:8

23650 Closed treatment of shoulder dislocation, with manipulation; without anesthesia

23655 requiring anesthesia

23660 Open treatment of acute shoulder dislocation

- *CPT Assistant* Feb 96:5

(Repairs for recurrent dislocations, see 23450-23466)

23665 Closed treatment of shoulder dislocation, with fracture of greater humeral tuberosity, with manipulation

- *CPT Assistant* Nov 98:8

23670 Open treatment of shoulder dislocation, with fracture of greater humeral tuberosity, includes internal fixation, when performed

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Nov 98:8

23675 Closed treatment of shoulder dislocation, with surgical or anatomical neck fracture, with manipulation

23680 Open treatment of shoulder dislocation, with surgical or anatomical neck fracture, includes internal fixation, when performed

- *CPT Changes: An Insider's View* 2008

Manipulation

23700 Manipulation under anesthesia, shoulder joint, including application of fixation apparatus (dislocation excluded)

- *CPT Assistant* Jan 99:10, Apr 05:14, May 09:8, Jun 15:10

Arthrodesis

23800 Arthrodesis, glenohumeral joint;

- *CPT Assistant* Nov 98:8, May 20:14, Jul 21:7

23802 with autogenous graft (includes obtaining graft)

- *CPT Assistant* May 20:14, Jul 21:7

Amputation

23900 Interthoracoscapular amputation (forequarter)
23920 Disarticulation of shoulder;
23921 secondary closure or scar revision

Other Procedures

23929 Unlisted procedure, shoulder

Humerus (Upper Arm) and Elbow

The elbow area includes the head and neck of the radius and olecranon process.

Incision

(For incision and drainage procedures, superficial, see 10040-10160)
23930 Incision and drainage, upper arm or elbow area; deep abscess or hematoma
23931 bursa
CPT Assistant Nov 98:8
23935 Incision, deep, with opening of bone cortex (eg, for osteomyelitis or bone abscess), humerus or elbow
24000 Arthrotomy, elbow, including exploration, drainage, or removal of foreign body
CPT Assistant Nov 98:8-9, Mar 20:14
24006 Arthrotomy of the elbow, with capsular excision for capsular release (separate procedure)
CPT Assistant May 22:15

Excision

24065 Biopsy, soft tissue of upper arm or elbow area; superficial
24066 deep (subfascial or intramuscular)

(For needle biopsy of soft tissue, use 20206)
24071 Code is out of numerical sequence. See 24066-24079
24073 Code is out of numerical sequence. See 24066-24079

24075 Excision, tumor, soft tissue of upper arm or elbow area, subcutaneous; less than 3 cm
CPT Changes: An Insider's View 2002, 2010
 # 24071 3 cm or greater
CPT Changes: An Insider's View 2010

(For excision of benign lesions of cutaneous origin [eg, sebaceous cyst], see 11400-11406)
24076 Excision, tumor, soft tissue of upper arm or elbow area, subfascial (eg, intramuscular); less than 5 cm
CPT Changes: An Insider's View 2010
 # 24073 5 cm or greater
CPT Changes: An Insider's View 2010

24077 Radical resection of tumor (eg, sarcoma), soft tissue of upper arm or elbow area; less than 5 cm

CPT Changes: An Insider's View 2010, 2014

24079 5 cm or greater

CPT Changes: An Insider's View 2010, 2014

CPT Assistant Mar 25:16

(For radical resection of tumor[s] of cutaneous origin [eg, melanoma], see 11600-11606)

24100 Arthrotomy, elbow; with synovial biopsy only

24101 with joint exploration, with or without biopsy, with or without removal of loose or foreign body

24102 with synovectomy

24105 Excision, olecranon bursa

24110 Excision or curettage of bone cyst or benign tumor, humerus;

24115 with autograft (includes obtaining graft)

24116 with allograft

24120 Excision or curettage of bone cyst or benign tumor of head or neck of radius or olecranon process;

24125 with autograft (includes obtaining graft)

24126 with allograft

24130 Excision, radial head

(For replacement with implant, use 24366)

24134 Sequestrectomy (eg, for osteomyelitis or bone abscess), shaft or distal humerus

24136 Sequestrectomy (eg, for osteomyelitis or bone abscess), radial head or neck

24138 Sequestrectomy (eg, for osteomyelitis or bone abscess), olecranon process

24140 Partial excision (craterization, saucerization, or diaphysectomy) bone (eg, osteomyelitis), humerus

CPT Assistant Nov 98:9

24145 Partial excision (craterization, saucerization, or diaphysectomy) bone (eg, osteomyelitis), radial head or neck

CPT Assistant Nov 98:9

24147 Partial excision (craterization, saucerization, or diaphysectomy) bone (eg, osteomyelitis), olecranon process

CPT Assistant Nov 98:9

24149 Radical resection of capsule, soft tissue, and heterotopic bone, elbow, with contracture release (separate procedure)

CPT Assistant Nov 96:4

(For capsular and soft tissue release only, use 24006)

24150 Radical resection of tumor, shaft or distal humerus

CPT Changes: An Insider's View 2010

24152 Radical resection of tumor, radial head or neck

CPT Changes: An Insider's View 2010

24155 Resection of elbow joint (arthrectomy)

Introduction or Removal

(For K-wire or pin insertion or removal, see 20650, 20670, 20680)

(For arthrocentesis or needling of bursa or joint, use 20605)

24160 Removal of prosthesis, includes debridement and synovectomy when performed; humeral **and** ulnar components

- *CPT Changes: An Insider's View* 2014
- *CPT Assistant* Feb 13:11, Mar 14:4, Mar 20:14

(To report removal of foreign body, elbow, see 24200, 24201)

(To report removal of hardware from the distal humerus or proximal ulna, other than humeral and ulnar prosthesis, use 20680)

(Do not report 24160 in conjunction with 24370 or 24371 if a prosthesis [ie, humeral and/or ulnar component(s)] is being removed and replaced in the same elbow during the same surgical session)

24164 radial head

- *CPT Changes: An Insider's View* 2014
- *CPT Assistant* Mar 14:4

(To report removal of foreign body, elbow, see 24200, 24201)

(To report removal of hardware from proximal radius, other than radial head prosthesis, use 20680)

24200 Removal of foreign body, upper arm or elbow area; subcutaneous

- *CPT Assistant* Mar 14:4

24201 deep (subfascial or intramuscular)

- *CPT Assistant* Nov 98:8, Mar 14:4

24220 Injection procedure for elbow arthrography

- *CPT Assistant* Aug 15:6, May 16:13
- *Clinical Examples in Radiology* Summer 18:15

(For radiological supervision and interpretation, use 73085. Do not report 77002 in conjunction with 73085)

(For injection for tennis elbow, use 20550)

Repair, Revision, and/or Reconstruction

24300 Manipulation, elbow, under anesthesia

CPT Changes: An Insider's View 2002

(For application of external fixation, see 20690 or 20692)

24301 Muscle or tendon transfer, any type, upper arm or elbow, single (excluding 24320-24331)

24305 Tendon lengthening, upper arm or elbow, each tendon

CPT Assistant Nov 98:8

24310 Tenotomy, open, elbow to shoulder, each tendon

CPT Assistant Nov 98:8

24320 Tenoplasty, with muscle transfer, with or without free graft, elbow to shoulder, single (Seddon-Brookes type procedure)

24330 Flexor-plasty, elbow (eg, Steindler type advancement);

24331 with extensor advancement

24332 Tenolysis, triceps

CPT Changes: An Insider's View 2002

24340 Tenodesis of biceps tendon at elbow (separate procedure)

24341 Repair, tendon or muscle, upper arm or elbow, each tendon or muscle, primary or secondary (excludes rotator cuff)

CPT Assistant Nov 96:4, May 23:24

24342 Reinsertion of ruptured biceps or triceps tendon, distal, with or without tendon graft

CPT Assistant Nov 96:4, Apr 17:9

24343 Repair lateral collateral ligament, elbow, with local tissue

CPT Changes: An Insider's View 2002

24344 Reconstruction lateral collateral ligament, elbow, with tendon graft (includes harvesting of graft)

CPT Changes: An Insider's View 2002

24345 Repair medial collateral ligament, elbow, with local tissue

CPT Changes: An Insider's View 2002

24346 Reconstruction medial collateral ligament, elbow, with tendon graft (includes harvesting of graft)

CPT Changes: An Insider's View 2002

24357 Tenotomy, elbow, lateral or medial (eg, epicondylitis, tennis elbow, golfer's elbow); percutaneous

CPT Changes: An Insider's View 2008

CPT Assistant Jan 08:4

24358 debridement, soft tissue and/or bone, open

CPT Changes: An Insider's View 2008

CPT Assistant Jan 08:4

24359 debridement, soft tissue and/or bone, open with tendon repair or reattachment

CPT Changes: An Insider's View 2008

CPT Assistant Jan 08:4

(Do not report 24357-24359 in conjunction with 29837, 29838)

24360 Arthroplasty, elbow; with membrane (eg, fascial)

CPT Assistant Nov 98:8

24361 with distal humeral prosthetic replacement
24362 with implant and fascia lata ligament reconstruction
24363 with distal humerus and proximal ulnar prosthetic replacement (eg, total elbow)

CPT Assistant Feb 13:11

(For revision of total elbow implant, see 24370, 24371)

24365 Arthroplasty, radial head;
24366 with implant
24370 Revision of total elbow arthroplasty, including allograft when performed; humeral **or** ulnar component

CPT Changes: An Insider's View 2013
CPT Assistant Feb 13:11, Mar 14:4

24371 humeral **and** ulnar component

CPT Changes: An Insider's View 2013
CPT Assistant Feb 13:11, Mar 14:4

(Do not report 24370, 24371 in conjunction with 24160 if a prosthesis [ie, humeral and/or ulnar component(s)] is being removed and replaced in the same elbow)

24400 Osteotomy, humerus, with or without internal fixation

CPT Assistant Mar 14:4

24410 Multiple osteotomies with realignment on intramedullary rod, humeral shaft (Sofield type procedure)
24420 Osteoplasty, humerus (eg, shortening or lengthening) (excluding 64876)
24430 Repair of nonunion or malunion, humerus; without graft (eg, compression technique)
24435 with iliac or other autograft (includes obtaining graft)

(For proximal radius and/or ulna, see 25400-25420)

24470 Hemiepiphyseal arrest (eg, cubitus varus or valgus, distal humerus)
24495 Decompression fasciotomy, forearm, with brachial artery exploration
24498 Prophylactic treatment (nailing, pinning, plating or wiring), with or without methylmethacrylate, humeral shaft

CPT Assistant Nov 98:8

Fracture and/or Dislocation

Coding Tip

Reporting for Categories of Manipulation and/or Fracture

The codes for treatment of fractures and joint injuries (dislocations) are categorized by the type of manipulation (reduction) and stabilization (fixation or immobilization). These codes can apply to either open (compound) or closed fractures or joint injuries.

CPT Coding Guidelines, Musculoskeletal System

24500 Closed treatment of humeral shaft fracture; without manipulation
24505 with manipulation, with or without skeletal traction
24515 Open treatment of humeral shaft fracture with plate/screws, with or without cerclage
24516 Treatment of humeral shaft fracture, with insertion of intramedullary implant, with or without cerclage and/or locking screws
- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Feb 96:4, Jun 09:7, Jan 18:3

24530 Closed treatment of supracondylar or transcondylar humeral fracture, with or without intercondylar extension; without manipulation
24535 with manipulation, with or without skin or skeletal traction
24538 Percutaneous skeletal fixation of supracondylar or transcondylar humeral fracture, with or without intercondylar extension
- *CPT Assistant* Winter 92:10

24545 Open treatment of humeral supracondylar or transcondylar fracture, includes internal fixation, when performed; without intercondylar extension
- *CPT Changes: An Insider's View* 2008

24546 with intercondylar extension
- *CPT Changes: An Insider's View* 2008

24560 Closed treatment of humeral epicondylar fracture, medial or lateral; without manipulation
24565 with manipulation
24566 Percutaneous skeletal fixation of humeral epicondylar fracture, medial or lateral, with manipulation

24575 Open treatment of humeral epicondylar fracture, medial or lateral, includes internal fixation, when performed

CPT Changes: An Insider's View 2008

24576 Closed treatment of humeral condylar fracture, medial or lateral; without manipulation

24577 with manipulation

24579 Open treatment of humeral condylar fracture, medial or lateral, includes internal fixation, when performed

CPT Changes: An Insider's View 2008

(To report closed treatment of fractures without manipulation, see 24530, 24560, 24576, 24650, 24670)

(To report closed treatment of fractures with manipulation, see 24535, 24565, 24577, 24675)

24582 Percutaneous skeletal fixation of humeral condylar fracture, medial or lateral, with manipulation

24586 Open treatment of periarticular fracture and/or dislocation of the elbow (fracture distal humerus and proximal ulna and/or proximal radius);

24587 with implant arthroplasty

(See also 24361)

24600 Treatment of closed elbow dislocation; without anesthesia

24605 requiring anesthesia

24615 Open treatment of acute or chronic elbow dislocation

24620 Closed treatment of Monteggia type of fracture dislocation at elbow (fracture proximal end of ulna with dislocation of radial head), with manipulation

24635 Open treatment of Monteggia type of fracture dislocation at elbow (fracture proximal end of ulna with dislocation of radial head includes internal fixation, when performed

CPT Changes: An Insider's View 2008

24640 Closed treatment of radial head subluxation in child, nursemaid elbow, with manipulation

24650 Closed treatment of radial head or neck fracture; without manipulation

24655 with manipulation

24665 Open treatment of radial head or neck fracture, includes internal fixation or radial head excision, when performed;

CPT Changes: An Insider's View 2008

24666 with radial head prosthetic replacement

CPT Changes: An Insider's View 2008

24670 Closed treatment of ulnar fracture, proximal end (eg, olecranon or coronoid process[es]); without manipulation

CPT Changes: An Insider's View 2008

24675 with manipulation

CPT Changes: An Insider's View 2008

24685 Open treatment of ulnar fracture, proximal end (eg, olecranon or coronoid process[es]), includes internal fixation, when performed

CPT Changes: An Insider's View 2008

CPT Assistant Jan 18:3

(Do not report 24685 in conjunction with 24100-24102)

Arthrodesis

24800 Arthrodesis, elbow joint; local

CPT Assistant May 20:14, Jul 21:7

24802 with autogenous graft (includes obtaining graft)

CPT Assistant May 20:14, Jul 21:7

Amputation

24900 Amputation, arm through humerus; with primary closure

24920 open, circular (guillotine)

24925 secondary closure or scar revision

24930 re-amputation

24931 with implant

24935 Stump elongation, upper extremity

24940 Cineplasty, upper extremity, complete procedure

Other Procedures

24999 Unlisted procedure, humerus or elbow

CPT Assistant May 22:15

Forearm and Wrist

Radius, ulna, carpal bones, and joints.

Incision

25000 Incision, extensor tendon sheath, wrist (eg, de Quervains disease)

CPT Assistant Nov 98:8

(For decompression median nerve or for carpal tunnel syndrome, use 64721)

25001 Incision, flexor tendon sheath, wrist (eg, flexor carpi radialis)

CPT Changes: An Insider's View 2002

25020 Decompression fasciotomy, forearm and/or wrist, flexor OR extensor compartment; without debridement of nonviable muscle and/or nerve

CPT Changes: An Insider's View 2002

25023 with debridement of nonviable muscle and/or nerve

(For decompression fasciotomy with brachial artery exploration, use 24495)

(For incision and drainage procedures, superficial, see 10060-10160)

(For debridement, see also 11000-11044)

25024 Decompression fasciotomy, forearm and/or wrist, flexor AND extensor compartment; without debridement of nonviable muscle and/or nerve

CPT Changes: An Insider's View 2002

25025 with debridement of nonviable muscle and/or nerve

CPT Changes: An Insider's View 2002

25028 Incision and drainage, forearm and/or wrist; deep abscess or hematoma

25031 bursa

CPT Assistant Nov 98:9

25035 Incision, deep, bone cortex, forearm and/or wrist (eg, osteomyelitis or bone abscess)

25040 Arthrotomy, radiocarpal or midcarpal joint, with exploration, drainage, or removal of foreign body

CPT Assistant Mar 20:14

Excision

25065 Biopsy, soft tissue of forearm and/or wrist; superficial
25066 deep (subfascial or intramuscular)
CPT Assistant Nov 98:8, Apr 10:3

(For needle biopsy of soft tissue, use 20206)
25071 Code is out of numerical sequence. See 25066-25078
25073 Code is out of numerical sequence. See 25066-25078
25075 Excision, tumor, soft tissue of forearm and/or wrist area, subcutaneous; less than 3 cm
CPT Changes: An Insider's View 2002, 2010
 # 25071 3 cm or greater
CPT Changes: An Insider's View 2010

(For excision of benign lesions of cutaneous origin [eg, sebaceous cyst], see 11400-11406)
25076 Excision, tumor, soft tissue of forearm and/or wrist area, subfascial (eg, intramuscular); less than 3 cm
CPT Changes: An Insider's View 2010
 # 25073 3 cm or greater
CPT Changes: An Insider's View 2010
25077 Radical resection of tumor (eg, sarcoma), soft tissue of forearm and/or wrist area; less than 3 cm
CPT Changes: An Insider's View 2010, 2014
25078 3 cm or greater
CPT Changes: An Insider's View 2010, 2014

(For radical resection of tumor[s] of cutaneous origin [eg, melanoma], see 11600-11606)
25085 Capsulotomy, wrist (eg, contracture)
25100 Arthrotomy, wrist joint; with biopsy
25101 with joint exploration, with or without biopsy, with or without removal of loose or foreign body
25105 with synovectomy
25107 Arthrotomy, distal radioulnar joint including repair of triangular cartilage, complex
25109 Excision of tendon, forearm and/or wrist, flexor or extensor, each
CPT Changes: An Insider's View 2007
25110 Excision, lesion of tendon sheath, forearm and/or wrist
25111 Excision of ganglion, wrist (dorsal or volar); primary
25112 recurrent

(For hand or finger, use 26160)
25115 Radical excision of bursa, synovia of wrist, or forearm tendon sheaths (eg, tenosynovitis, fungus, Tbc, or other granulomas, rheumatoid arthritis); flexors
CPT Assistant Jun 12:15
25116 extensors, with or without transposition of dorsal retinaculum

(For finger synovectomies, use 26145)
25118 Synovectomy, extensor tendon sheath, wrist, single compartment;
CPT Assistant Apr 12:17, Jun 15:10
25119 with resection of distal ulna

25120 Excision or curettage of bone cyst or benign tumor of radius or ulna (excluding head or neck of radius and olecranon process);

(For head or neck of radius or olecranon process, see 24120-24126)

25125 with autograft (includes obtaining graft)

25126 with allograft

25130 Excision or curettage of bone cyst or benign tumor of carpal bones;

25135 with autograft (includes obtaining graft)

25136 with allograft

25145 Sequestrectomy (eg, for osteomyelitis or bone abscess), forearm and/or wrist

25150 Partial excision (craterization, saucerization, or diaphysectomy) of bone (eg, for osteomyelitis); ulna

25151 radius

(For head or neck of radius or olecranon process, see 24145, 24147)

25170 Radical resection of tumor, radius or ulna

CPT Changes: An Insider's View 2010

25210 Carpectomy; 1 bone

CPT Assistant Oct 22:16

(For carpectomy with implant, see 25441-25445)

25215 all bones of proximal row

CPT Assistant Dec 19:14

25230 Radial styloidectomy (separate procedure)

25240 Excision distal ulna partial or complete (eg, Darrach type or matched resection)

(For implant replacement, distal ulna, use 25442)

(For obtaining fascia for interposition, see 20920, 20922)

Introduction or Removal

(For K-wire, pin or rod insertion or removal, see 20650, 20670, 20680)

25246 Injection procedure for wrist arthrography

CPT Assistant Aug 15:6

Clinical Examples in Radiology Summer 18:15

(For radiological supervision and interpretation, use 73115. Do not report 77002 in conjunction with 73115)

(For foreign body removal, superficial use 20520)

25248 Exploration with removal of deep foreign body, forearm or wrist

25250 Removal of wrist prosthesis; (separate procedure)

CPT Assistant Mar 20:14

25251 complicated, including total wrist

CPT Assistant Mar 20:14

25259 Manipulation, wrist, under anesthesia

CPT Changes: An Insider's View 2002

CPT Assistant Jan 04:27, Jun 05:12

(For application of external fixation, see 20690 or 20692)

Repair, Revision, and/or Reconstruction

25260 Repair, tendon or muscle, flexor, forearm and/or wrist; primary, single, each tendon or muscle

25263 secondary, single, each tendon or muscle

25265 secondary, with free graft (includes obtaining graft), each tendon or muscle

25270 Repair, tendon or muscle, extensor, forearm and/or wrist; primary, single, each tendon or muscle

25272 secondary, single, each tendon or muscle

25274 secondary, with free graft (includes obtaining graft), each tendon or muscle

CPT Changes: An Insider's View 2002

25275 Repair, tendon sheath, extensor, forearm and/or wrist, with free graft (includes obtaining graft) (eg, for extensor carpi ulnaris subluxation)

CPT Changes: An Insider's View 2002

25280 Lengthening or shortening of flexor or extensor tendon, forearm and/or wrist, single, each tendon

25290 Tenotomy, open, flexor or extensor tendon, forearm and/or wrist, single, each tendon

25295 Tenolysis, flexor or extensor tendon, forearm and/or wrist, single, each tendon

CPT Assistant Apr 97:11, Aug 98:10

25300 Tenodesis at wrist; flexors of fingers

25301 extensors of fingers

25310 Tendon transplantation or transfer, flexor or extensor, forearm and/or wrist, single; each tendon

CPT Assistant Jun 02:11

(Do not report 25310 in conjunction with 25447, 25448, when performed for intercarpal or carpometacarpal joint arthroplasty)

25312 with tendon graft(s) (includes obtaining graft), each tendon

25315 Flexor origin slide (eg, for cerebral palsy, Volkmann contracture), forearm and/or wrist;

25316 with tendon(s) transfer

25320 Capsulorrhaphy or reconstruction, wrist, open (eg, capsulodesis, ligament repair, tendon transfer or graft) (includes synovectomy, capsulotomy and open reduction) for carpal instability

CPT Changes: An Insider's View 2003

25332 Arthroplasty, wrist, with or without interposition, with or without external or internal fixation

CPT Assistant Nov 96:5, Jan 05:8

(For obtaining fascia for interposition, see 20920, 20922)

(For prosthetic replacement arthroplasty, see 25441-25446)

25335 Centralization of wrist on ulna (eg, radial club hand)

CPT Assistant May 18:10

25337 Reconstruction for stabilization of unstable distal ulna or distal radioulnar joint, secondary by soft tissue stabilization (eg, tendon transfer, tendon graft or weave, or tenodesis) with or without open reduction of distal radioulnar joint

(For harvesting of fascia lata graft, see 20920, 20922)

25350 Osteotomy, radius; distal third

25355 middle or proximal third

25360 Osteotomy; ulna

25365 radius AND ulna

25370 Multiple osteotomies, with realignment on intramedullary rod (Sofield type procedure); radius OR ulna

25375 radius AND ulna

25390 Osteoplasty, radius OR ulna; shortening

25391 lengthening with autograft

25392 Osteoplasty, radius AND ulna; shortening (excluding 64876)

25393 lengthening with autograft

25394 Osteoplasty, carpal bone, shortening

CPT Changes: An Insider's View 2002

25400 Repair of nonunion or malunion, radius OR ulna; without graft (eg, compression technique)

25405 with autograft (includes obtaining graft)

CPT Changes: An Insider's View 2002

25415 Repair of nonunion or malunion, radius AND ulna; without graft (eg, compression technique)

25420 with autograft (includes obtaining graft)

CPT Changes: An Insider's View 2002

25425 Repair of defect with autograft; radius OR ulna

25426 radius AND ulna

25430 Insertion of vascular pedicle into carpal bone (eg, Hori procedure)

CPT Changes: An Insider's View 2002

25431 Repair of nonunion of carpal bone (excluding carpal scaphoid (navicular)) (includes obtaining graft and necessary fixation), each bone

CPT Changes: An Insider's View 2002

25440 Repair of nonunion, scaphoid carpal (navicular) bone, with or without radial styloidectomy (includes obtaining graft and necessary fixation)

CPT Changes: An Insider's View 2002

25441 Arthroplasty with prosthetic replacement; distal radius

CPT Assistant Jan 05:8-9, Aug 17:9

25442 distal ulna

CPT Assistant Jan 05:8-9, Aug 17:9

25443 scaphoid carpal (navicular)

CPT Changes: An Insider's View 2002

CPT Assistant Jan 05:8-9

25444 lunate

CPT Assistant Jan 05:8, 10

25445 trapezium

CPT Assistant Jan 05:8, 10, Aug 21:14

25446 distal radius and partial or entire carpus (total wrist)

CPT Assistant Jan 05:8, 11

25447 Arthroplasty, intercarpal or carpometacarpal joints; interposition (eg, tendon)

CPT Changes: An Insider's View 2025

CPT Assistant Nov 98:8, Jan 05:8, 11-12, Aug 21:14

(Do not report 25447 in conjunction with 25448)

(Do not report 25447 in conjunction with 25310, 26480, when performed for intercarpal or carpometacarpal joint arthroplasty)

(For wrist arthroplasty, use 25332)

25448 suspension, including transfer or transplant of tendon, with interposition, when performed

CPT Changes: An Insider's View 2025

(Do not report 25448 in conjunction with 25447)

(Do not report 25448 in conjunction with 25310, 26480, when performed for intercarpal or carpometacarpal joint arthroplasty)

25449 Revision of arthroplasty, including removal of implant, wrist joint

25450 Epiphyseal arrest by epiphysiodesis or stapling; distal radius OR ulna

25455 distal radius AND ulna

25490 Prophylactic treatment (nailing, pinning, plating or wiring) with or without methylmethacrylate; radius

25491 ulna

25492 radius AND ulna

Fracture and/or Dislocation

(For application of external fixation in addition to internal fixation, use 20690 and the appropriate internal fixation code)

25500 Closed treatment of radial shaft fracture; without manipulation

25505 with manipulation

25515 Open treatment of radial shaft fracture, includes internal fixation, when performed

- *CPT Changes: An Insider's View* 2008

25520 Closed treatment of radial shaft fracture and closed treatment of dislocation of distal radioulnar joint (Galeazzi fracture/dislocation)

- *CPT Changes: An Insider's View* 2002

25525 Open treatment of radial shaft fracture, includes internal fixation, when performed, and closed treatment of distal radioulnar joint dislocation (Galeazzi fracture/dislocation), includes percutaneous skeletal fixation, when performed

- *CPT Changes: An Insider's View* 2008

25526 Open treatment of radial shaft fracture, includes internal fixation, when performed, and open treatment of distal radioulnar joint dislocation (Galeazzi fracture/dislocation), includes internal fixation, when performed, includes repair of triangular fibrocartilage complex

- *CPT Changes: An Insider's View* 2002, 2008

25530 Closed treatment of ulnar shaft fracture; without manipulation

- *CPT Assistant* Apr 02:14

25535 with manipulation

- *CPT Assistant* Sep 10:7

25545 Open treatment of ulnar shaft fracture, includes internal fixation, when performed

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Fall 93:23, Oct 99:5

25560 Closed treatment of radial and ulnar shaft fractures; without manipulation

25565 with manipulation

25574 Open treatment of radial AND ulnar shaft fractures, with internal fixation, when performed; of radius OR ulna

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Fall 93:23, Oct 99:5

25575 of radius AND ulna

- *CPT Changes: An Insider's View* 2008

25600 Closed treatment of distal radial fracture (eg, Colles or Smith type) or epiphyseal separation, includes closed treatment of fracture of ulnar styloid, when performed; without manipulation

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Oct 07:7, Apr 13:10

25605 with manipulation

- *CPT Assistant* Oct 07:7, Apr 13:10

(Do not report 25600, 25605 in conjunction with 25650)

25606 Percutaneous skeletal fixation of distal radial fracture or epiphyseal separation

- *CPT Changes: An Insider's View* 2007

(Do not report 25606 in conjunction with 25650)

(For percutaneous treatment of ulnar styloid fracture, use 25651)

(For open treatment of ulnar styloid fracture, use 25652)

25607 Open treatment of distal radial extra-articular fracture or epiphyseal separation, with internal fixation

CPT Changes: An Insider's View 2007

CPT Assistant Oct 07:7, Nov 12:13

(Do not report 25607 in conjunction with 25650)

(For percutaneous treatment of ulnar styloid fracture, use 25651)

(For open treatment of ulnar styloid fracture, use 25652)

25608 Open treatment of distal radial intra-articular fracture or epiphyseal separation; with internal fixation of 2 fragments

CPT Changes: An Insider's View 2007

CPT Assistant Oct 07:7

(Do not report 25608 in conjunction with 25609)

25609 with internal fixation of 3 or more fragments

CPT Changes: An Insider's View 2007

CPT Assistant Oct 07:7, Mar 13:13, Dec 13:14, Oct 22:16

(Do not report 25608, 25609 in conjunction with 25650)

(For percutaneous treatment of ulnar styloid fracture, use 25651)

(For open treatment of ulnar styloid fracture, use 25652)

25622 Closed treatment of carpal scaphoid (navicular) fracture; without manipulation

25624 with manipulation

25628 Open treatment of carpal scaphoid (navicular) fracture, includes internal fixation, when performed

CPT Changes: An Insider's View 2008

25630 Closed treatment of carpal bone fracture (excluding carpal scaphoid [navicular]); without manipulation, each bone

25635 with manipulation, each bone

25645 Open treatment of carpal bone fracture (other than carpal scaphoid [navicular]), each bone

CPT Changes: An Insider's View 2002

25650 Closed treatment of ulnar styloid fracture

CPT Assistant Oct 07:7, Apr 13:10

(Do not report 25650 in conjunction with 25600, 25605, 25607-25609)

25651 Percutaneous skeletal fixation of ulnar styloid fracture

CPT Changes: An Insider's View 2002

25652 Open treatment of ulnar styloid fracture

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Oct 07:7

25660 Closed treatment of radiocarpal or intercarpal dislocation, 1 or more bones, with manipulation

25670 Open treatment of radiocarpal or intercarpal dislocation, 1 or more bones

25671 Percutaneous skeletal fixation of distal radioulnar dislocation

- *CPT Changes: An Insider's View* 2002

25675 Closed treatment of distal radioulnar dislocation with manipulation

25676 Open treatment of distal radioulnar dislocation, acute or chronic

25680 Closed treatment of trans-scaphoperilunar type of fracture dislocation, with manipulation

25685 Open treatment of trans-scaphoperilunar type of fracture dislocation

25690 Closed treatment of lunate dislocation, with manipulation

25695 Open treatment of lunate dislocation

Arthrodesis

25800 Arthrodesis, wrist; complete, without bone graft (includes radiocarpal and/or intercarpal and/or carpometacarpal joints)

- *CPT Assistant* Nov 98:8, May 20:14, Jul 21:7

25805 with sliding graft

25810 with iliac or other autograft (includes obtaining graft)

25820 Arthrodesis, wrist; limited, without bone graft (eg, intercarpal or radiocarpal)

- *CPT Assistant* Nov 98:8

25825 with autograft (includes obtaining graft)

- *CPT Assistant* Jul 12:12

25830 Arthrodesis, distal radioulnar joint with segmental resection of ulna, with or without bone graft (eg, Sauve-Kapandji procedure)

- *CPT Assistant* Nov 98:8, May 20:14, Jul 21:7

Arthrodesis

25800 Arthrodesis, wrist; complete, without bone graft (includes radiocarpal and/or intercarpal and/or carpometacarpal joints)

CPT Assistant Nov 98:8, May 20:14, Jul 21:7

25805 with sliding graft

25810 with iliac or other autograft (includes obtaining graft)

25820 Arthrodesis, wrist; limited, without bone graft (eg, intercarpal or radiocarpal)

CPT Assistant Nov 98:8

25825 with autograft (includes obtaining graft)

CPT Assistant Jul 12:12

25830 Arthrodesis, distal radioulnar joint with segmental resection of ulna, with or without bone graft (eg, Sauve-Kapandji procedure)

CPT Assistant Nov 98:8, May 20:14, Jul 21:7

Amputation

25900 Amputation, forearm, through radius and ulna;

25905 open, circular (guillotine)

25907 secondary closure or scar revision

25909 re-amputation

25915 Krukenberg procedure

25920 Disarticulation through wrist;

25922 secondary closure or scar revision

25924 re-amputation

25927 Transmetacarpal amputation;

25929 secondary closure or scar revision

25931 re-amputation

Other Procedures

25999 Unlisted procedure, forearm or wrist

CPT Assistant Sep 19:10, Oct 22:16

Hand and Fingers

Hand and Fingers

Incision

26010 Drainage of finger abscess; simple

CPT Assistant Oct 21:13

26011 complicated (eg, felon)

26020 Drainage of tendon sheath, digit and/or palm, each

26025 Drainage of palmar bursa; single, bursa

CPT Assistant Nov 98:8

26030 multiple bursa

CPT Assistant Nov 98:8

26034 Incision, bone cortex, hand or finger (eg, osteomyelitis or bone abscess)

CPT Assistant Nov 98:8

26035 Decompression fingers and/or hand, injection injury (eg, grease gun)

26037 Decompressive fasciotomy, hand (excludes 26035)

(For injection injury, use 26035)

26040 Fasciotomy, palmar (eg, Dupuytren's contracture); percutaneous

CPT Assistant Nov 98:8, Apr 10:10, Oct 10:10

26045 open, partial

(For palmar fasciotomy by enzyme injection (eg, collagenase), see 20527, 26341)

(For fasciectomy, see 26121-26125)

26055 Tendon sheath incision (eg, for trigger finger)

CPT Assistant Jan 22:17, Apr 22:11

26060 Tenotomy, percutaneous, single, each digit

26070 Arthrotomy, with exploration, drainage, or removal of loose or foreign body; carpometacarpal joint

CPT Assistant Nov 98:10, Mar 20:14

26075 metacarpophalangeal joint, each

CPT Assistant Sep 12:10, Mar 20:14

26080 interphalangeal joint, each

CPT Assistant Sep 12:10, Mar 20:14

Excision

26100 Arthrotomy with biopsy; carpometacarpal joint, each

26105 metacarpophalangeal joint, each

26110 interphalangeal joint, each

26111 Code is out of numerical sequence. See 26110-26118

26113 Code is out of numerical sequence. See 26110-26118

26115 Excision, tumor or vascular malformation, soft tissue of hand or finger, subcutaneous; less than 1.5 cm

- *CPT Changes: An Insider's View* 2002, 2010
- *CPT Assistant* Apr 21:13, Aug 23:19-20

 # 26111 1.5 cm or greater

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Aug 23:19-20

(For excision of benign lesions of cutaneous origin [eg, sebaceous cyst], see 11420-11426)

26116 Excision, tumor, soft tissue, or vascular malformation, of hand or finger, subfascial (eg, intramuscular); less than 1.5 cm

- *CPT Changes: An Insider's View* 2002, 2010
- *CPT Assistant* Apr 10:3, Apr 21:13, Aug 23:19-20

 # 26113 1.5 cm or greater

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Apr 10:3, Aug 23:19-20

26117 Radical resection of tumor (eg, sarcoma), soft tissue of hand or finger; less than 3 cm

- *CPT Changes: An Insider's View* 2010, 2014

26118 3 cm or greater

- *CPT Changes: An Insider's View* 2010, 2014

(For radical resection of tumor[s] of cutaneous origin [eg, melanoma], see 11620-11626)

26121 Fasciectomy, palm only, with or without Z-plasty, other local tissue rearrangement, or skin grafting (includes obtaining graft)

- *CPT Assistant* Oct 10:10, Jun 11:13

26123 Fasciectomy, partial palmar with release of single digit including proximal interphalangeal joint, with or without Z-plasty, other local tissue rearrangement, or skin grafting (includes obtaining graft);

- *CPT Assistant* Jan 05:8, Oct 10:10, Jun 11:13, May 21:13

+ 26125 each additional digit (List separately in addition to code for primary procedure)

- *CPT Assistant* Jan 05:8, Oct 10:10, Jun 11:13

(Use 26125 in conjunction with 26123)

(For palmar fasciotomy by enzyme injection (eg, collagenase), see 20527, 26341)

(For fasciotomy, see 26040, 26045)

26130 Synovectomy, carpometacarpal joint
26135 Synovectomy, metacarpophalangeal joint including intrinsic release and extensor hood reconstruction, each digit
26140 Synovectomy, proximal interphalangeal joint, including extensor reconstruction, each interphalangeal joint
26145 Synovectomy, tendon sheath, radical (tenosynovectomy), flexor tendon, palm and/or finger, each tendon

CPT Assistant Nov 98:8

(For tendon sheath synovectomies at wrist, see 25115, 25116)

26160 Excision of lesion of tendon sheath or joint capsule (eg, cyst, mucous cyst, or ganglion), hand or finger

CPT Changes: An Insider's View 2002
CPT Assistant Jul 19:10, Aug 21:14

(For wrist ganglion, see 25111, 25112)

(For trigger digit, use 26055)

26170 Excision of tendon, palm, flexor or extensor, single, each tendon

CPT Changes: An Insider's View 2007
CPT Assistant Jun 13:13

(Do not report 26170 in conjunction with 26390, 26415)

26180 Excision of tendon, finger, flexor or extensor, each tendon

CPT Changes: An Insider's View 2007
CPT Assistant Nov 98:8

(Do not report 26180 in conjunction with 26390, 26415)

26185 Sesamoidectomy, thumb or finger (separate procedure)
26200 Excision or curettage of bone cyst or benign tumor of metacarpal;
26205 with autograft (includes obtaining graft)
26210 Excision or curettage of bone cyst or benign tumor of proximal, middle, or distal phalanx of finger;

CPT Assistant Aug 21:14

26215 with autograft (includes obtaining graft)
26230 Partial excision (craterization, saucerization, or diaphysectomy) bone (eg, osteomyelitis); metacarpal
26235 proximal or middle phalanx of finger

CPT Assistant Jul 19:10, Aug 21:14

26236 distal phalanx of finger

CPT Assistant Jul 19:10, Aug 21:14

26250 Radical resection of tumor, metacarpal

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Nov 98:8

26260 Radical resection of tumor, proximal or middle phalanx of finger

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Nov 98:8

26262 Radical resection of tumor, distal phalanx of finger

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Nov 98:8

Introduction or Removal

26320 Removal of implant from finger or hand

(For removal of foreign body in hand or finger, see 20520, 20525)

Repair, Revision, and/or Reconstruction

26340 Manipulation, finger joint, under anesthesia, each joint

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Nov 02:10

(For application of external fixation, see 20690 or 20692)

26341 Manipulation, palmar fascial cord (ie, Dupuytren's cord), post enzyme injection (eg, collagenase), single cord

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Jul 12:8, 14

(For enzyme injection (eg, collagenase), palmar fascial cord (eg, Dupuytren's contracture), use 20527)

(Report custom orthotic fabrication/application separately)

26350 Repair or advancement, flexor tendon, not in zone 2 digital flexor tendon sheath (eg, no man's land); primary or secondary without free graft, each tendon

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Nov 98:8

26352 secondary with free graft (includes obtaining graft), each tendon

26356 Repair or advancement, flexor tendon, in zone 2 digital flexor tendon sheath (eg, no man's land); primary, without free graft, each tendon

- *CPT Changes: An Insider's View* 2002, 2004
- *CPT Assistant* Nov 98:8, Dec 98:9, Dec 08:6, Sep 14:13, Dec 17:15

26357 secondary, without free graft, each tendon

- *CPT Changes: An Insider's View* 2004

26358 secondary, with free graft (includes obtaining graft), each tendon

26370 Repair or advancement of profundus tendon, with intact superficialis tendon; primary, each tendon

CPT Assistant Nov 98:8, Dec 08:6

26372 secondary with free graft (includes obtaining graft), each tendon

CPT Assistant Nov 98:8

26373 secondary without free graft, each tendon

CPT Assistant Nov 98:8

26390 Excision flexor tendon, with implantation of synthetic rod for delayed tendon graft, hand or finger, each rod

CPT Changes: An Insider's View 2002

CPT Assistant Nov 98:8

26392 Removal of synthetic rod and insertion of flexor tendon graft, hand or finger (includes obtaining graft), each rod

CPT Changes: An Insider's View 2002

CPT Assistant Nov 98:8

26410 Repair, extensor tendon, hand, primary or secondary; without free graft, each tendon

CPT Assistant Nov 98:8

26412 with free graft (includes obtaining graft), each tendon

CPT Assistant Nov 98:8

26415 Excision of extensor tendon, with implantation of synthetic rod for delayed tendon graft, hand or finger, each rod

CPT Changes: An Insider's View 2002

CPT Assistant Nov 98:8

26416 Removal of synthetic rod and insertion of extensor tendon graft (includes obtaining graft), hand or finger, each rod

CPT Changes: An Insider's View 2000, 2002

CPT Assistant Nov 99:12

26418 Repair, extensor tendon, finger, primary or secondary; without free graft, each tendon

CPT Assistant Nov 98:8, Dec 99:10, Dec 00:14

26420 with free graft (includes obtaining graft) each tendon

26426 Repair of extensor tendon, central slip, secondary (eg, boutonniere deformity); using local tissue(s), including lateral band(s), each finger

CPT Changes: An Insider's View 2002

CPT Assistant Nov 98:8

26428 with free graft (includes obtaining graft), each finger

CPT Changes: An Insider's View 2002

26432 Closed treatment of distal extensor tendon insertion, with or without percutaneous pinning (eg, mallet finger)

CPT Assistant Nov 98:8

26433 Repair of extensor tendon, distal insertion, primary or secondary; without graft (eg, mallet finger)

CPT Assistant Nov 98:8

26434 with free graft (includes obtaining graft)

(For tenovaginotomy for trigger finger, use 26055)

26437 Realignment of extensor tendon, hand, each tendon

CPT Assistant Nov 98:8

26440 Tenolysis, flexor tendon; palm OR finger, each tendon

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Apr 02:18, Jun 15:10

26442 palm AND finger, each tendon

- *CPT Assistant* Feb 22:14, Jul 22:17

26445 Tenolysis, extensor tendon, hand OR finger, each tendon

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Nov 98:8, Dec 02:11, Mar 03:20

26449 Tenolysis, complex, extensor tendon, finger, including forearm, each tendon

- *CPT Assistant* Nov 98:8

26450 Tenotomy, flexor, palm, open, each tendon

- *CPT Assistant* Nov 98:8, Jul 23:15

26455 Tenotomy, flexor, finger, open, each tendon

- *CPT Assistant* Nov 98:8

26460 Tenotomy, extensor, hand or finger, open, each tendon

- *CPT Assistant* Nov 98:8

26471 Tenodesis; of proximal interphalangeal joint, each joint

- *CPT Assistant* Nov 98:8

26474 of distal joint, each joint

- *CPT Assistant* Nov 98:8

26476 Lengthening of tendon, extensor, hand or finger, each tendon

- *CPT Assistant* Nov 98:8

26477 Shortening of tendon, extensor, hand or finger, each tendon

- *CPT Assistant* Nov 98:8

26478 Lengthening of tendon, flexor, hand or finger, each tendon

- *CPT Assistant* Nov 98:8, Dec 13:16

26479 Shortening of tendon, flexor, hand or finger, each tendon

- *CPT Assistant* Nov 98:8

26480 Transfer or transplant of tendon, carpometacarpal area or dorsum of hand; without free graft, each tendon

CPT Assistant Nov 98:8, Dec 13:16

(Do not report 26480 in conjunction with 25447, 25448, when performed for intercarpal or carpometacarpal joint arthroplasty)

26483 with free tendon graft (includes obtaining graft), each tendon

26485 Transfer or transplant of tendon, palmar; without free tendon graft, each tendon

CPT Assistant Nov 98:8

26489 with free tendon graft (includes obtaining graft), each tendon

26490 Opponensplasty; superficialis tendon transfer type, each tendon

26492 tendon transfer with graft (includes obtaining graft), each tendon

26494 hypothenar muscle transfer

26496 other methods

(For thumb fusion in opposition, use 26820)

26497 Transfer of tendon to restore intrinsic function; ring and small finger

CPT Assistant Nov 98:8

26498 all 4 fingers

26499 Correction claw finger, other methods

26500 Reconstruction of tendon pulley, each tendon; with local tissues (separate procedure)

CPT Assistant Nov 98:8

26502 with tendon or fascial graft (includes obtaining graft) (separate procedure)

26508 Release of thenar muscle(s) (eg, thumb contracture)

CPT Assistant Nov 98:8

26510 Cross intrinsic transfer, each tendon

CPT Changes: An Insider's View 2002

26516 Capsulodesis, metacarpophalangeal joint; single digit

CPT Assistant Nov 98:8

26517 2 digits

26518 3 or 4 digits

26520 Capsulectomy or capsulotomy; metacarpophalangeal joint, each joint

CPT Assistant Nov 98:8

26525 interphalangeal joint, each joint

CPT Assistant Nov 98:8, Apr 02:18, Mar 03:20, Jun 15:10

26530 Arthroplasty, metacarpophalangeal joint; each joint

CPT Assistant Nov 98:8

(To report carpometacarpal joint arthroplasty, use 25447)

26531 with prosthetic implant, each joint

CPT Assistant Nov 98:8, Sep 11:12

26535 Arthroplasty, interphalangeal joint; each joint

CPT Assistant Nov 98:8

26536 with prosthetic implant, each joint

CPT Assistant Nov 98:8, Jul 23:15

26540 Repair of collateral ligament, metacarpophalangeal or interphalangeal joint

CPT Assistant Nov 96:6

26541 Reconstruction, collateral ligament, metacarpophalangeal joint, single; with tendon or fascial graft (includes obtaining graft)

CPT Assistant Jan 97:3

26542 with local tissue (eg, adductor advancement)

CPT Assistant Jan 97:3

26545 Reconstruction, collateral ligament, interphalangeal joint, single, including graft, each joint

26546 Repair non-union, metacarpal or phalanx (includes obtaining bone graft with or without external or internal fixation)

CPT Assistant Nov 96:6

26548 Repair and reconstruction, finger, volar plate, interphalangeal joint

26550 Pollicization of a digit

26551 Transfer, toe-to-hand with microvascular anastomosis; great toe wrap-around with bone graft

CPT Assistant Nov 96:6, Apr 97:7, Jun 97:9, Nov 98:8, 10-11

(For great toe with web space, use 20973)

26553 other than great toe, single

CPT Assistant Nov 96:6, Apr 97:7, Jun 97:9, Nov 98:8, 10-11

26554 other than great toe, double

CPT Assistant Nov 96:6, Apr 97:7, Jun 97:9, Nov 98:8, 10-11

(Do not report code 69990 in addition to codes 26551-26554)

26555 Transfer, finger to another position without microvascular anastomosis

CPT Assistant Nov 98:8, 10-11

26556 Transfer, free toe joint, with microvascular anastomosis

CPT Assistant Nov 96:6, Apr 97:7, Jun 97:9, Nov 98:8

(Do not report code 69990 in addition to code 26556)

(To report great toe-to-hand transfer, use 20973)

26560 Repair of syndactyly (web finger) each web space; with skin flaps

26561 with skin flaps and grafts

26562 complex (eg, involving bone, nails)

26565 Osteotomy; metacarpal, each

CPT Assistant Nov 98:9

26567 phalanx of finger, each

CPT Assistant Apr 12:17

26568 Osteoplasty, lengthening, metacarpal or phalanx

26580 Repair cleft hand

26587 Reconstruction of polydactylous digit, soft tissue and bone

CPT Changes: An Insider's View 2002

CPT Assistant Oct 01:10, Aug 03:14, May 04:16

(For excision of polydactylous digit, soft tissue only, use 11200)

26590 Repair macrodactylia, each digit

CPT Changes: An Insider's View 2002

CPT Assistant Oct 01:10, Aug 03:14, May 04:16

26591 Repair, intrinsic muscles of hand, each muscle

CPT Assistant May 98:11, Jul 98:11, Nov 98:8, 11

26593 Release, intrinsic muscles of hand, each muscle

CPT Assistant Nov 98:8, 11

26596 Excision of constricting ring of finger, with multiple Z-plasties

(To report release of scar contracture or graft repairs see 11042, 14040-14041, or 15120, 15240)

Fracture and/or Dislocation

Coding Tip

Reporting for Categories of Manipulation and/or Fracture

The codes for treatment of fractures and joint injuries (dislocations) are categorized by the type of manipulation (reduction) and stabilization (fixation or immobilization). These codes can apply to either open (compound) or closed fractures or joint injuries.

CPT Coding Guidelines, Musculoskeletal System

26600 Closed treatment of metacarpal fracture, single; without manipulation, each bone
26605 with manipulation, each bone
26607 Closed treatment of metacarpal fracture, with manipulation, with external fixation, each bone
CPT Changes: An Insider's View 2002
26608 Percutaneous skeletal fixation of metacarpal fracture, each bone
26615 Open treatment of metacarpal fracture, single, includes internal fixation, when performed, each bone
CPT Changes: An Insider's View 2008
26641 Closed treatment of carpometacarpal dislocation, thumb, with manipulation
26645 Closed treatment of carpometacarpal fracture dislocation, thumb (Bennett fracture), with manipulation
26650 Percutaneous skeletal fixation of carpometacarpal fracture dislocation, thumb (Bennett fracture), with manipulation
CPT Changes: An Insider's View 2008
26665 Open treatment of carpometacarpal fracture dislocation, thumb (Bennett fracture), includes internal fixation, when performed
CPT Changes: An Insider's View 2008
26670 Closed treatment of carpometacarpal dislocation, other than thumb, with manipulation, each joint; without anesthesia
CPT Changes: An Insider's View 2002
26675 requiring anesthesia
26676 Percutaneous skeletal fixation of carpometacarpal dislocation, other than thumb, with manipulation, each joint
CPT Changes: An Insider's View 2002
26685 Open treatment of carpometacarpal dislocation, other than thumb; includes internal fixation, when performed, each joint
CPT Changes: An Insider's View 2002, 2008
26686 complex, multiple, or delayed reduction

26700 Closed treatment of metacarpophalangeal dislocation, single, with manipulation; without anesthesia

CPT Assistant May 14:10

26705 requiring anesthesia

26706 Percutaneous skeletal fixation of metacarpophalangeal dislocation, single, with manipulation

26715 Open treatment of metacarpophalangeal dislocation, single, includes internal fixation, when performed

CPT Changes: An Insider's View 2008

26720 Closed treatment of phalangeal shaft fracture, proximal or middle phalanx, finger or thumb; without manipulation, each

26725 with manipulation, with or without skin or skeletal traction, each

26727 Percutaneous skeletal fixation of unstable phalangeal shaft fracture, proximal or middle phalanx, finger or thumb, with manipulation, each

26735 Open treatment of phalangeal shaft fracture, proximal or middle phalanx, finger or thumb, includes internal fixation, when performed, each

CPT Changes: An Insider's View 2008

26740 Closed treatment of articular fracture, involving metacarpophalangeal or interphalangeal joint; without manipulation, each

26742 with manipulation, each

26746 Open treatment of articular fracture, involving metacarpophalangeal or interphalangeal joint, includes internal fixation, when performed, each

CPT Changes: An Insider's View 2008

26750 Closed treatment of distal phalangeal fracture, finger or thumb; without manipulation, each

26755 with manipulation, each

26756 Percutaneous skeletal fixation of distal phalangeal fracture, finger or thumb, each

26765 Open treatment of distal phalangeal fracture, finger or thumb, includes internal fixation, when performed, each

CPT Changes: An Insider's View 2008

26770 Closed treatment of interphalangeal joint dislocation, single, with manipulation; without anesthesia

CPT Assistant Mar 23:1

26775 requiring anesthesia

26776 Percutaneous skeletal fixation of interphalangeal joint dislocation, single, with manipulation

26785 Open treatment of interphalangeal joint dislocation, includes internal fixation, when performed, single

CPT Changes: An Insider's View 2008

Arthrodesis

26820 Fusion in opposition, thumb, with autogenous graft (includes obtaining graft)

CPT Assistant May 20:14, Jul 21:7

26841 Arthrodesis, carpometacarpal joint, thumb, with or without internal fixation;

26842 with autograft (includes obtaining graft)

26843 Arthrodesis, carpometacarpal joint, digit, other than thumb, each;

CPT Changes: An Insider's View 2002

26844 with autograft (includes obtaining graft)

26850 Arthrodesis, metacarpophalangeal joint, with or without internal fixation;

26852 with autograft (includes obtaining graft)

26860 Arthrodesis, interphalangeal joint, with or without internal fixation;

+ 26861 each additional interphalangeal joint (List separately in addition to code for primary procedure)

(Use 26861 in conjunction with 26860)

26862 with autograft (includes obtaining graft)

+ 26863 with autograft (includes obtaining graft), each additional joint (List separately in addition to code for primary procedure)

CPT Assistant May 20:14, Jul 21:7

(Use 26863 in conjunction with 26862)

Amputation

(For hand through metacarpal bones, use 25927)

26910 Amputation, metacarpal, with finger or thumb (ray amputation), single, with or without interosseous transfer

(For repositioning, see 26550, 26555)

26951 Amputation, finger or thumb, primary or secondary, any joint or phalanx, single, including neurectomies; with direct closure

26952 with local advancement flaps (V-Y, hood)

(For repair of soft tissue defect requiring split or full thickness graft or other pedicle flaps, see 15050-15758)

Other Procedures

26989 Unlisted procedure, hands or fingers

CPT Assistant Jan 22:17, Apr 22:11, Feb 23:13

Pelvis and Hip Joint

Including head and neck of femur.

Incision

(For incision and drainage procedures, superficial, see 10040-10160)

26990 Incision and drainage, pelvis or hip joint area; deep abscess or hematoma

CPT Assistant Mar 20:14

26991 infected bursa

26992 Incision, bone cortex, pelvis and/or hip joint (eg, osteomyelitis or bone abscess)

CPT Assistant Jan 02:10, Oct 12:14

27000 Tenotomy, adductor of hip, percutaneous (separate procedure)

27001 Tenotomy, adductor of hip, open

(To report bilateral procedure, report 27001 with modifier 50)

27003 Tenotomy, adductor, subcutaneous, open, with obturator neurectomy

(To report bilateral procedure, report 27003 with modifier 50)

27005 Tenotomy, hip flexor(s), open (separate procedure)

27006 Tenotomy, abductors and/or extensor(s) of hip, open (separate procedure)

CPT Assistant Feb 25:25

27025 Fasciotomy, hip or thigh, any type

(To report bilateral procedure, report 27025 with modifier 50)

27027 Decompression fasciotomy(ies), pelvic (buttock) compartment(s) (eg, gluteus medius-minimus, gluteus maximus, iliopsoas, and/or tensor fascia lata muscle), unilateral

CPT Changes: An Insider's View 2009

(To report bilateral procedure, report 27027 with modifier 50)

27030 Arthrotomy, hip, with drainage (eg, infection)

CPT Assistant Nov 98:8, Mar 20:14, Sep 21:8

27033 Arthrotomy, hip, including exploration or removal of loose or foreign body

CPT Assistant Spring 92:11

27035 Denervation, hip joint, intrapelvic or extrapelvic intra-articular branches of sciatic, femoral, or obturator nerves

CPT Assistant Nov 98:8, Mar 14:13

(For obturator neurectomy, see 64763, 64766)

27036 Capsulectomy or capsulotomy, hip, with or without excision of heterotopic bone, with release of hip flexor muscles (ie, gluteus medius, gluteus minimus, tensor fascia latae, rectus femoris, sartorius, iliopsoas)

CPT Assistant Jan 05:8

Excision

27040 Biopsy, soft tissue of pelvis and hip area; superficial

CPT Assistant May 23:26

27041 deep, subfascial or intramuscular

CPT Assistant Nov 98:8, May 23:26

(For needle biopsy of soft tissue, use 20206)

27043 Code is out of numerical sequence. See 27041-27052

27045 Code is out of numerical sequence. See 27041-27052

27047 Excision, tumor, soft tissue of pelvis and hip area, subcutaneous; less than 3 cm

CPT Changes: An Insider's View 2010

CPT Assistant Nov 98:8

 # 27043 3 cm or greater

CPT Changes: An Insider's View 2010

(For excision of benign lesions of cutaneous origin [eg, sebaceous cyst], see 11400-11406)

27048 Excision, tumor, soft tissue of pelvis and hip area, subfascial (eg, intramuscular); less than 5 cm

CPT Changes: An Insider's View 2010

 # 27045 5 cm or greater

CPT Changes: An Insider's View 2010

27049 Radical resection of tumor (eg, sarcoma), soft tissue of pelvis and hip area; less than 5 cm

CPT Changes: An Insider's View 2010, 2014

CPT Assistant Nov 98:8

 # 27059 5 cm or greater

CPT Changes: An Insider's View 2010, 2014

(For radical resection of tumor[s] of cutaneous origin [eg, melanoma], see 11600-11606)

27050 Arthrotomy, with biopsy; sacroiliac joint

27052 hip joint

27054 Arthrotomy with synovectomy, hip joint

27057 Decompression fasciotomy(ies), pelvic (buttock) compartment(s) (eg, gluteus medius-minimus, gluteus maximus, iliopsoas, and/or tensor fascia lata muscle) with debridement of nonviable muscle, unilateral

CPT Changes: An Insider's View 2009

(To report bilateral procedure, report 27057 with modifier 50)

27059 Code is out of numerical sequence. See 27041-27052

27060 Excision; ischial bursa

27062 trochanteric bursa or calcification

(For arthrocentesis or needling of bursa, use 20610)

27065 Excision of bone cyst or benign tumor, wing of ilium, symphysis pubis, or greater trochanter of femur; superficial, includes autograft, when performed

CPT Changes: An Insider's View 2011

27066 deep (subfascial), includes autograft, when performed

CPT Changes: An Insider's View 2011

CPT Assistant Dec 21:19

27067 with autograft requiring separate incision

CPT Changes: An Insider's View 2011

27070 Partial excision, wing of ilium, symphysis pubis, or greater trochanter of femur, (craterization, saucerization) (eg, osteomyelitis or bone abscess); superficial

CPT Changes: An Insider's View 2011

27071 deep (subfascial or intramuscular)

CPT Changes: An Insider's View 2011

CPT Assistant Sep 21:7

27075 Radical resection of tumor; wing of ilium, 1 pubic or ischial ramus or symphysis pubis

CPT Changes: An Insider's View 2010

27076 ilium, including acetabulum, both pubic rami, or ischium and acetabulum

CPT Changes: An Insider's View 2010

27077 innominate bone, total

CPT Changes: An Insider's View 2010

27078 ischial tuberosity and greater trochanter of femur

CPT Changes: An Insider's View 2010

27080 Coccygectomy, primary

(For pressure (decubitus) ulcer, see 15920, 15922 and 15931-15958)

Introduction or Removal

27086 Removal of foreign body, pelvis or hip; subcutaneous tissue

- *CPT Assistant* Jul 98:8

27087 deep (subfascial or intramuscular)

- *CPT Assistant* Nov 98:8

27090 Removal of hip prosthesis; (separate procedure)

- *CPT Assistant* Mar 20:14

27091 complicated, including total hip prosthesis, methylmethacrylate with or without insertion of spacer

- *CPT Assistant* Mar 20:14, Sep 21:7-8

27093 Injection procedure for hip arthrography; without anesthesia

- *CPT Assistant* Jun 12:14, Aug 15:6
- *Clinical Examples in Radiology* Fall 07:7, Spring 13:11, Summer 18:15, Spring 21:7

(For radiological supervision and interpretation, use 73525. Do not report 77002 in conjunction with 73525)

27095 with anesthesia

- *CPT Assistant* Jun 12:14, Aug 15:6, Jan 16:11
- *Clinical Examples in Radiology* Fall 07:7, Summer 18:15, Spring 21:7

(For radiological supervision and interpretation, use 73525. Do not report 77002 in conjunction with 73525)

27096 Injection procedure for sacroiliac joint, anesthetic/steroid, with image guidance (fluoroscopy or CT) including arthrography when performed

- *CPT Changes: An Insider's View* 2000, 2012
- *CPT Assistant* Nov 99:12, Apr 03:8, Apr 04:15, Jul 08:9, Jan 12:3, Aug 15:6
- *Clinical Examples in Radiology* Fall 11:10, Summer 18:15

(27096 is to be used only with CT or fluoroscopic imaging confirmation of intra-articular needle positioning)

(If CT or fluoroscopy imaging is not performed, use 20552)

(Code 27096 is a unilateral procedure. For bilateral procedure, use modifier 50)

Repair, Revision, and/or Reconstruction

27097 Release or recession, hamstring, proximal

CPT Assistant Nov 98:8

27098 Transfer, adductor to ischium

CPT Assistant Nov 98:8

27100 Transfer external oblique muscle to greater trochanter including fascial or tendon extension (graft)

27105 Transfer paraspinal muscle to hip (includes fascial or tendon extension graft)

27110 Transfer iliopsoas; to greater trochanter of femur

CPT Changes: An Insider's View 2002

27111 to femoral neck

27120 Acetabuloplasty; (eg, Whitman, Colonna, Haygroves, or cup type)

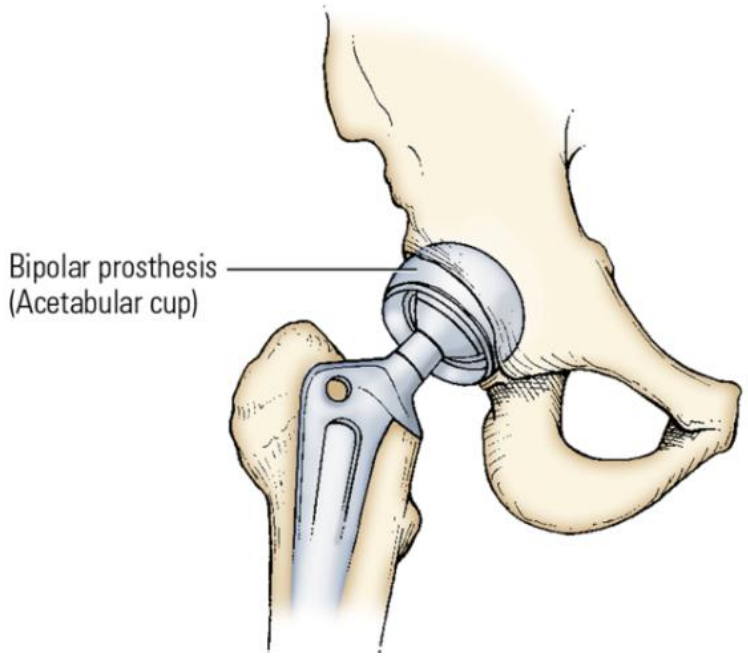
27122 resection, femoral head (eg, Girdlestone procedure)

27125 Hemiarthroplasty, hip, partial (eg, femoral stem prosthesis, bipolar arthroplasty)

CPT Assistant Spring 92:8, Feb 98:11, Nov 98:8

(For prosthetic replacement following fracture of the hip, use 27236)

27130 Arthroplasty, acetabular and proximal femoral prosthetic replacement (total hip arthroplasty), with or without autograft or allograft

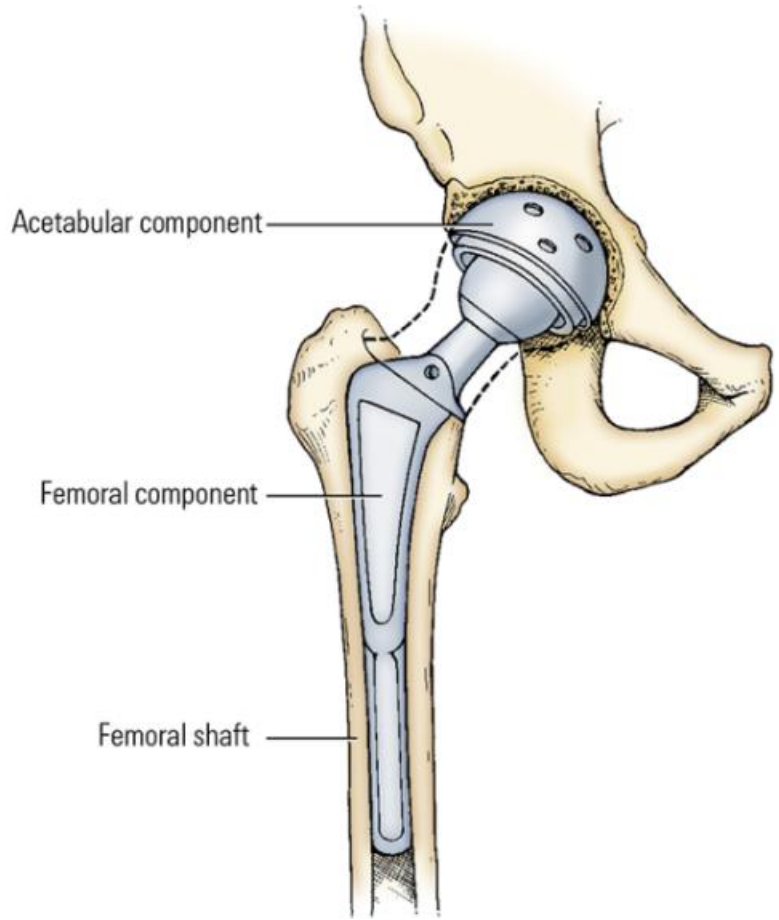


CPT Changes: An Insider's View 2002

CPT Assistant Spring 92:8, Jan 07:1, Dec 11:14

Partial Hip Replacement With or Without Bipolar Prosthesis

27125



The femoral neck is excised so the physician can measure and then replace the femoral stem.

Total Hip Replacement

27130

The femoral head is excised, osteophytes are removed, and acetabulum is reamed out before replacement is inserted in the femoral shaft.

27132 Conversion of previous hip surgery to total hip arthroplasty, with or without autograft or allograft

CPT Changes: An Insider's View 2002

CPT Assistant Spring 92:11, Dec 08:3, May 17:10, Sep 17:14

27134 Revision of total hip arthroplasty; both components, with or without autograft or allograft

CPT Assistant Spring 92:7, Dec 08:3, Sep 21:8-9

27137 acetabular component only, with or without autograft or allograft

CPT Assistant Spring 92:7, Sep 21:8

27138 femoral component only, with or without allograft

CPT Assistant Spring 92:7, Sep 21:8

27140 Osteotomy and transfer of greater trochanter of femur (separate procedure)

CPT Changes: An Insider's View 2002

27146 Osteotomy, iliac, acetabular or innominate bone;

CPT Assistant Feb 99:10

27147 with open reduction of hip

27151 with femoral osteotomy

27156 with femoral osteotomy and with open reduction of hip

27158 Osteotomy, pelvis, bilateral (eg, congenital malformation)

27161 Osteotomy, femoral neck (separate procedure)

27165 Osteotomy, intertrochanteric or subtrochanteric including internal or external fixation and/or cast

CPT Assistant Spring 92:11

27170 Bone graft, femoral head, neck, intertrochanteric or subtrochanteric area (includes obtaining bone graft)

CPT Assistant Spring 92:11

27175 Treatment of slipped femoral epiphysis; by traction, without reduction

27176 by single or multiple pinning, in situ

27177 Open treatment of slipped femoral epiphysis; single or multiple pinning or bone graft (includes obtaining graft)

27178 closed manipulation with single or multiple pinning

27179 osteoplasty of femoral neck (Heyman type procedure)

27181 osteotomy and internal fixation

27185 Epiphyseal arrest by epiphysiodesis or stapling, greater trochanter of femur

CPT Changes: An Insider's View 2002

27187 Prophylactic treatment (nailing, pinning, plating or wiring) with or without methylmethacrylate, femoral neck and proximal femur

Fracture and/or Dislocation

Coding Tip

Reporting for Categories of Manipulation and/or Fracture

The codes for treatment of fractures and joint injuries (dislocations) are categorized by the type of manipulation (reduction) and stabilization (fixation or immobilization). These codes can apply to either open (compound) or closed fractures or joint injuries.

CPT Coding Guidelines, Musculoskeletal System

27197 Closed treatment of posterior pelvic ring fracture(s), dislocation(s), diastasis or subluxation of the ilium, sacroiliac joint, and/or sacrum, with or without anterior pelvic ring fracture(s) and/or dislocation(s) of the pubic symphysis and/or superior/inferior rami, unilateral or bilateral; without manipulation

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Jun 17:9

27198 with manipulation, requiring more than local anesthesia (ie, general anesthesia, moderate sedation, spinal/epidural)

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Jun 17:9, Jan 18:3

(To report closed treatment of **only** anterior pelvic ring fracture(s) and/or dislocation(s) of the pubic symphysis and/or superior/inferior rami, unilateral or bilateral, use the appropriate evaluation and management services codes)

27200 Closed treatment of coccygeal fracture

27202 Open treatment of coccygeal fracture

27215 Open treatment of iliac spine(s), tuberosity avulsion, or iliac wing fracture(s), unilateral, for pelvic bone fracture patterns that do not disrupt the pelvic ring, includes internal fixation, when performed

- *CPT Changes: An Insider's View* 2009

(To report bilateral procedure, report 27215 with modifier 50)

27216 Percutaneous skeletal fixation of posterior pelvic bone fracture and/or dislocation, for fracture patterns that disrupt the pelvic ring, unilateral (includes ipsilateral ilium, sacroiliac joint and/or sacrum)

- *CPT Changes: An Insider's View* 2009
- *CPT Assistant* Sep 13:19, Mar 14:4, Oct 24:12

(To report bilateral procedure, report 27216 with modifier 50)

►(For percutaneous/minimally invasive arthrodesis of the sacroiliac joint without fracture and/or dislocation, see 27278, 27279)◄

27217 Open treatment of anterior pelvic bone fracture and/or dislocation for fracture patterns that disrupt the pelvic ring, unilateral, includes internal fixation, when performed (includes pubic symphysis and/or ipsilateral superior/inferior rami)

➔ *CPT Changes: An Insider's View* 2009

(To report bilateral procedure, report 27217 with modifier 50)

27218 Open treatment of posterior pelvic bone fracture and/or dislocation, for fracture patterns that disrupt the pelvic ring, unilateral, includes internal fixation, when performed (includes ipsilateral ilium, sacroiliac joint and/or sacrum)

➔ *CPT Changes: An Insider's View* 2009

➔ *CPT Assistant* Mar 14:4

(To report bilateral procedure, report 27218 with modifier 50)

►(For percutaneous/minimally invasive arthrodesis of the sacroiliac joint without fracture and/or dislocation, see 27278, 27279)◄

27220 Closed treatment of acetabulum (hip socket) fracture(s); without manipulation

27222 with manipulation, with or without skeletal traction

27226 Open treatment of posterior or anterior acetabular wall fracture, with internal fixation

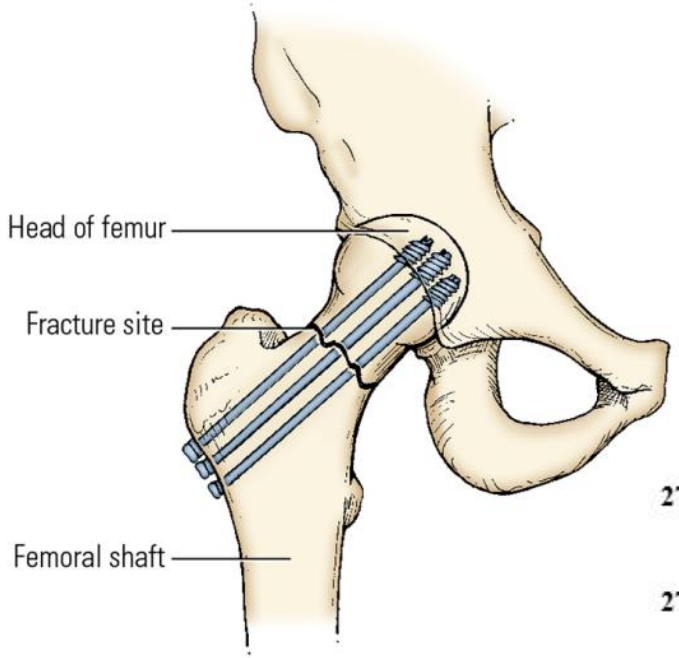
27227 Open treatment of acetabular fracture(s) involving anterior or posterior (one) column, or a fracture running transversely across the acetabulum, with internal fixation

27228 Open treatment of acetabular fracture(s) involving anterior and posterior (two) columns, includes T-fracture and both column fracture with complete articular detachment, or single column or transverse fracture with associated acetabular wall fracture, with internal fixation

27230 Closed treatment of femoral fracture, proximal end, neck; without manipulation

27232 with manipulation, with or without skeletal traction

27235 Percutaneous skeletal fixation of femoral fracture, proximal end, neck



➔ *CPT Changes: An Insider's View* 2003

(For percutaneous injection of calcium-based biodegradable osteoconductive material, use 0814T)

Percutaneous Treatment of Femoral Fracture

27235

Femoral fracture treatment without fracture exposure

27236 Open treatment of femoral fracture, proximal end, neck, internal fixation or prosthetic replacement

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Spring 92:10, Feb 98:11, Jan 07:1, Nov 16:9

27238 Closed treatment of intertrochanteric, peritrochanteric, or subtrochanteric femoral fracture; without manipulation

- *CPT Assistant* Summer 93:12

27240 with manipulation, with or without skin or skeletal traction

- *CPT Assistant* Summer 93:12

27244 Treatment of intertrochanteric, peritrochanteric, or subtrochanteric femoral fracture; with plate/screw type implant, with or without cerclage

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Summer 93:12

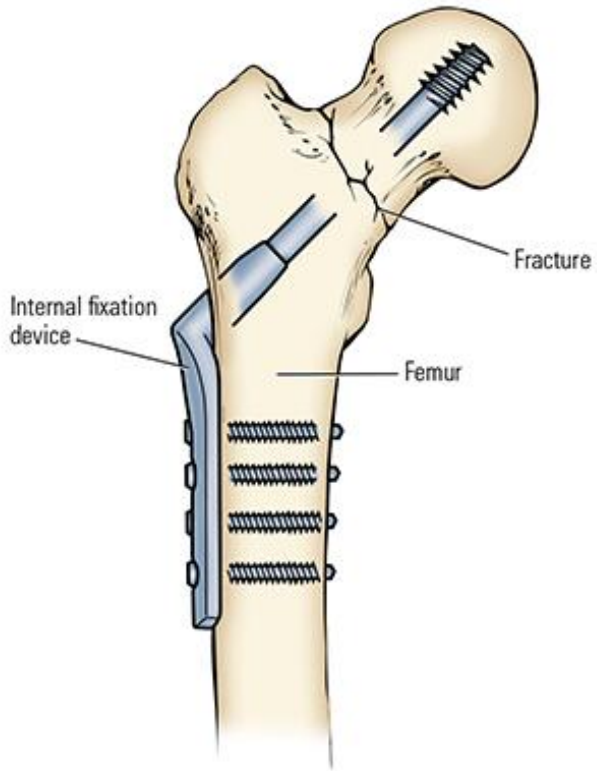
27245 with intramedullary implant, with or without interlocking screws and/or cerclage

- *CPT Assistant* Summer 93:12, Sep 13:17

27246 Closed treatment of greater trochanteric fracture, without manipulation

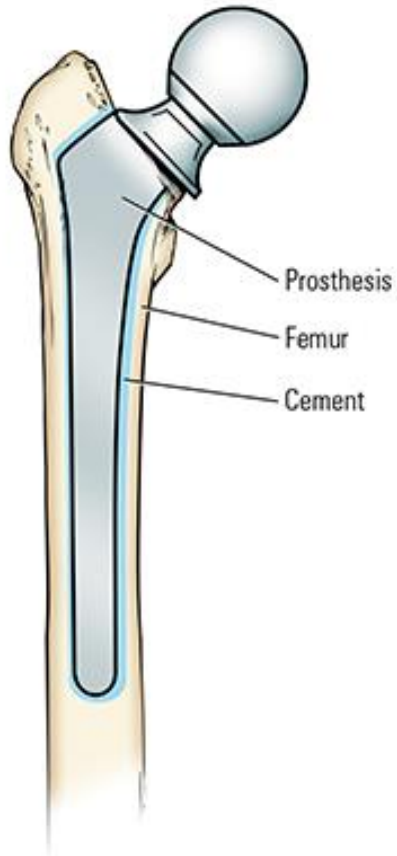
27248 Open treatment of greater trochanteric fracture, includes internal fixation, when performed

- *CPT Changes: An Insider's View* 2008



27250 Closed treatment of hip dislocation, traumatic; without anesthesia

27252 requiring anesthesia



27253 Open treatment of hip dislocation, traumatic, without internal fixation

Open Treatment of Femoral Fracture
27236

A. Femoral fracture treatment by internal fixation device (with fracture exposure)

B. Femoral fracture treatment by prosthetic replacement

27254 Open treatment of hip dislocation, traumatic, with acetabular wall and femoral head fracture, with or without internal or external fixation

(For treatment of acetabular fracture with fixation, see 27226, 27227)

27256 Treatment of spontaneous hip dislocation (developmental, including congenital or pathological), by abduction, splint or traction; without anesthesia, without manipulation

27257 with manipulation, requiring anesthesia

27258 Open treatment of spontaneous hip dislocation (developmental, including congenital or pathological), replacement of femoral head in acetabulum (including tenotomy, etc);

27259 with femoral shaft shortening

27265 Closed treatment of post hip arthroplasty dislocation; without anesthesia

27266 requiring regional or general anesthesia

27267 Closed treatment of femoral fracture, proximal end, head; without manipulation

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Jan 08:4

27268 with manipulation

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Jan 08:4

27269 Open treatment of femoral fracture, proximal end, head, includes internal fixation, when performed

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Jan 08:4, Dec 08:3

(Do not report 27269 in conjunction with 27033, 27253)

Manipulation

27275 Manipulation, hip joint, requiring general anesthesia

- *CPT Assistant* Jan 16:11, May 16:13

Arthrodesis

►Percutaneous sacroiliac (SI) joint fusion can be achieved utilizing intra-articular or transarticular device(s). Code 27278 describes the placement of intra-articular devices that do not pierce the cortices of the ilium or sacrum. Code 27279 describes the placement of intra-articular and/or transarticular device(s) that pierce the lateral or medial cortices of the ilium and the lateral cortex of the sacrum. Use 27279 to report hybrid SI joint fusion that consists of placement of both intra-articular and transarticular devices, at least one of which pierces the cortices.◄

▲ **27278** Arthrodesis, sacroiliac joint, percutaneous or minimally invasive, with image guidance, includes obtaining bone graft when performed, unilateral; placement of intra-articular device(s), without cortical piercing

- *CPT Changes: An Insider's View* 2024, 2026
- *Clinical Examples in Radiology* Spring 24:3

►(Do not report 27278 in conjunction with 27279 for the same joint)◄

(For bilateral procedure, report 27278 with modifier 50)

▲ **27279** placement of transarticular device(s) and/or intra-articular device(s) piercing the lateral or medial cortices of the ilium and the lateral cortex of the sacrum

- *CPT Changes: An Insider's View* 2015, 2026
- *CPT Assistant* May 20:14, Jul 21:7, Feb 22:14, Apr 23:16
- *Clinical Examples in Radiology* Spring 24:4

►(Do not report 27279 in conjunction with 27278 for the same joint)◄

(For bilateral procedure, report 27279 with modifier 50)

►(For hybrid sacroiliac joint fusion procedures, use 27279)◄

27280 Arthrodesis, sacroiliac joint, open, includes obtaining bone graft, including instrumentation, when performed

- *CPT Changes: An Insider's View* 2015, 2023
- *CPT Assistant* Sep 13:19, Mar 14:4

(To report bilateral procedure, report 27280 with modifier 50)

►(For percutaneous/minimally invasive arthrodesis of the sacroiliac joint without fracture and/or dislocation, see 27278, 27279)◄

27282 Arthrodesis, symphysis pubis (including obtaining graft)

27284 Arthrodesis, hip joint (including obtaining graft);

27286 with subtrochanteric osteotomy

- *CPT Assistant* May 20:14, Jul 21:7

Amputation

27290 Interpelviabdominal amputation (hindquarter amputation)

27295 Disarticulation of hip

Other Procedures

27299 Unlisted procedure, pelvis or hip joint

- *CPT Assistant* Jan 02:10, Dec 05:9, Dec 08:3, Oct 12:14, Nov 12:13, Mar 14:13, Jun 16:8, Feb 25:25

Femur (Thigh Region) and Knee Joint

Including tibial plateaus.

Incision

(For incision and drainage of abscess or hematoma, superficial, see 10040-10160)

27301 Incision and drainage, deep abscess, bursa, or hematoma, thigh or knee region

CPT Assistant Nov 98:9, Dec 08:3, Mar 20:14

27303 Incision, deep, with opening of bone cortex, femur or knee (eg, osteomyelitis or bone abscess)

CPT Assistant Nov 98:8

27305 Fasciotomy, iliotibial (tenotomy), open

CPT Assistant Dec 24:50

(For combined Ober-Yount fasciotomy, use 27025)

27306 Tenotomy, percutaneous, adductor or hamstring; single tendon (separate procedure)

CPT Assistant Nov 98:8, Aug 17:9

27307 multiple tendons

CPT Assistant Nov 98:8, Aug 17:9

27310 Arthrotomy, knee, with exploration, drainage, or removal of foreign body (eg, infection)

CPT Assistant Nov 98:8, Dec 08:3, Mar 20:14, Sep 21:8

Excision

27323 Biopsy, soft tissue of thigh or knee area; superficial

CPT Assistant Jun 97:12

27324 deep (subfascial or intramuscular)

CPT Assistant Mar 97:4, Nov 98:8

(For needle biopsy of soft tissue, use 20206)

27325 Neurectomy, hamstring muscle

CPT Changes: An Insider's View 2007

27326 Neurectomy, popliteal (gastrocnemius)

CPT Changes: An Insider's View 2007

27327 Excision, tumor, soft tissue of thigh or knee area, subcutaneous; less than 3 cm

CPT Changes: An Insider's View 2010

27337 3 cm or greater

CPT Changes: An Insider's View 2010

(For excision of benign lesions of cutaneous origin [eg, sebaceous cyst], see 11400-11406)

27328 Excision, tumor, soft tissue of thigh or knee area, subfascial (eg, intramuscular); less than 5 cm

CPT Changes: An Insider's View 2010

CPT Assistant Nov 16:9

27329 Code is out of numerical sequence. See 27358-27365

27339 5 cm or greater

CPT Changes: An Insider's View 2010

27330 Arthrotomy, knee; with synovial biopsy only

CPT Assistant Mar 12:9

27331 including joint exploration, biopsy, or removal of loose or foreign bodies

CPT Assistant May 96:6, Nov 98:8, Nov 12:13

27332 Arthrotomy, with excision of semilunar cartilage (meniscectomy) knee; medial OR lateral

CPT Assistant Nov 98:8

27333 medial AND lateral

CPT Assistant Mar 12:9

27334 Arthrotomy, with synovectomy, knee; anterior OR posterior

CPT Assistant Nov 98:8

27335 anterior AND posterior including popliteal area

27337 Code is out of numerical sequence. See 27326-27331

27339 Code is out of numerical sequence. See 27326-27331

27340 Excision, prepatellar bursa

27345 Excision of synovial cyst of popliteal space (eg, Baker's cyst)

27347 Excision of lesion of meniscus or capsule (eg, cyst, ganglion), knee

CPT Assistant Nov 98:11

27350 Patellectomy or hemipatellectomy

27355 Excision or curettage of bone cyst or benign tumor of femur;

27356 with allograft

27357 with autograft (includes obtaining graft)

CPT Assistant Dec 02:11

+ 27358 with internal fixation (List in addition to code for primary procedure)

(Use 27358 in conjunction with 27355, 27356, or 27357)

27360 Partial excision (craterization, saucerization, or diaphysectomy) bone, femur, proximal tibia and/or fibula (eg, osteomyelitis or bone abscess)

CPT Assistant Nov 98:8, Sep 21:7

27329 Radical resection of tumor (eg, sarcoma), soft tissue of thigh or knee area; less than 5 cm

CPT Changes: An Insider's View 2010, 2014

27364 5 cm or greater

CPT Changes: An Insider's View 2010, 2014

(For radical resection of tumor[s] of cutaneous origin [eg, melanoma], see 11600-11606)

27365 Radical resection of tumor, femur or knee

CPT Changes: An Insider's View 2010

(For radical resection of tumor, soft tissue of thigh or knee area, see 27329, 27364)

Introduction or Removal

27369 Injection procedure for contrast knee arthrography or contrast enhanced CT/MRI knee arthrography
- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Aug 19:7, Oct 24:9
- *Clinical Examples in Radiology* Winter 19:15

(Use 27369 in conjunction with 73580, 73701, 73702, 73722, 73723)

(Do not report 27369 in conjunction with 20610, 20611, 29871)

(For arthrocentesis of the knee or injection of any material other than contrast for subsequent arthrography, see 20610, 20611)

(When fluoroscopic guided injection is performed for enhanced CT arthrography, use 27369, 77002, and 73701 or 73702)

(When fluoroscopic guided injection is performed for enhanced MR arthrography, use 27369, 77002, and 73722 or 73723)

(For arthroscopic lavage and drainage of the knee, use 29871)

(For radiographic arthrography, radiological supervision and interpretation, use 73580)

(For arthrocentesis of the knee or injection of any material other than contrast for subsequent arthrography, see 20610, 20611)

(For injection procedure for contrast knee arthrography or contrast enhanced CT/MRI knee arthrography, use 27369)

27372 Removal of foreign body, deep, thigh region or knee area

(For removal of knee prosthesis including "total knee," use 27488)

(For surgical arthroscopic knee procedures, see 29870-29887)

Repair, Revision, and/or Reconstruction

27380 Suture of infrapatellar tendon; primary

27381 secondary reconstruction, including fascial or tendon graft

27385 Suture of quadriceps or hamstring muscle rupture; primary
- *CPT Assistant* Aug 17:9, Dec 23:38

27386 secondary reconstruction, including fascial or tendon graft
- *CPT Assistant* Apr 20:10

27390 Tenotomy, open, hamstring, knee to hip; single tendon
- *CPT Assistant* Nov 98:8

27391 multiple tendons, 1 leg
- *CPT Assistant* Nov 98:8

27392 multiple tendons, bilateral
- *CPT Assistant* Nov 98:8

27393 Lengthening of hamstring tendon; single tendon
- *CPT Assistant* Nov 98:8

27394 multiple tendons, 1 leg
- *CPT Assistant* Nov 98:8

27395 multiple tendons, bilateral
- *CPT Assistant* Nov 98:8

27396 Transplant or transfer (with muscle redirection or rerouting), thigh (eg, extensor to flexor); single tendon
- *CPT Changes: An Insider's View* 2009
- *CPT Assistant* Nov 98:8

27397 multiple tendons
- *CPT Changes: An Insider's View* 2009
- *CPT Assistant* Nov 98:8

27400 Transfer, tendon or muscle, hamstrings to femur (eg, Egger's type procedure)
- *CPT Assistant* Nov 98:8

27403 Arthrotomy with meniscus repair, knee

CPT Assistant Nov 98:8, May 19:10

(For arthroscopic repair, use 29882)

27405 Repair, primary, torn ligament and/or capsule, knee; collateral

CPT Assistant Dec 12:12

27407 cruciate

(For cruciate ligament reconstruction, use 27427)

27409 collateral and cruciate ligaments

(For ligament reconstruction, see 27427-27429)

27412 Autologous chondrocyte implantation, knee

CPT Changes: An Insider's View 2005

(Do not report 27412 in conjunction with 15769, 15771, 15772, 15773, 15774, 27331, 27570)

(For harvesting of chondrocytes, use 29870)

27415 Osteochondral allograft, knee, open

CPT Changes: An Insider's View 2005

CPT Assistant Apr 19:10

(For arthroscopic implant of osteochondral allograft, use 29867)

(Do not report 27415 in conjunction with 27416)

(For osteochondral xenograft scaffold, use 0737T)

27416 Osteochondral autograft(s), knee, open (eg, mosaicplasty) (includes harvesting of autograft[s])

CPT Changes: An Insider's View 2008

CPT Assistant Jan 08:4

(Do not report 27416 in conjunction with 27415, 29870, 29871, 29875, 29884 when performed at the same session and/or 29874, 29877, 29879, 29885-29887 when performed in the same compartment)

(For arthroscopic osteochondral autograft of knee, use 29866)

(For osteochondral xenograft scaffold, use 0737T)

27418 Anterior tibial tubercleplasty (eg, Maquet type procedure)

CPT Assistant Feb 10:13

27420 Reconstruction of dislocating patella; (eg, Hauser type procedure)

CPT Assistant Nov 12:13

27422 with extensor realignment and/or muscle advancement or release (eg, Campbell, Goldwaite type procedure)

CPT Assistant Mar 11:9, Oct 22:16

27424 with patellectomy

27425 Lateral retinacular release, open

CPT Changes: An Insider's View 2002, 2003
CPT Assistant Nov 00:11, Mar 11:9, Nov 15:7

(For arthroscopic lateral release, use 29873)

27427 Ligamentous reconstruction (augmentation), knee; extra-articular

CPT Changes: An Insider's View 2000
CPT Assistant Nov 99:13, Dec 12:12, May 17:10, Mar 24:25

27428 intra-articular (open)

CPT Changes: An Insider's View 2000
CPT Assistant Nov 99:13, Apr 09:8

27429 intra-articular (open) and extra-articular

CPT Changes: An Insider's View 2000
CPT Assistant Nov 99:13, Apr 09:8

(For primary repair of ligament(s) performed in conjunction with reconstruction, report 27405, 27407 or 27409 in conjunction with 27427, 27428 or 27429)

27430 Quadricepsplasty (eg, Bennett or Thompson type)

27435 Capsulotomy, posterior capsular release, knee

CPT Assistant Nov 98:8

27437 Arthroplasty, patella; without prosthesis

27438 with prosthesis

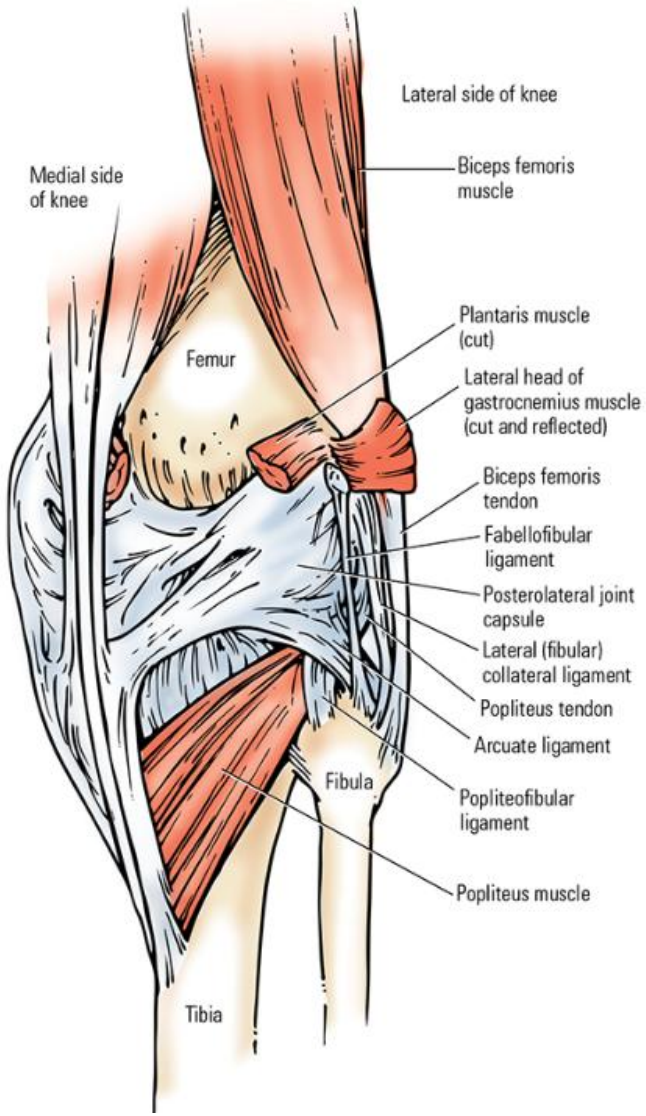
CPT Assistant Feb 21:12

27440 Arthroplasty, knee, tibial plateau;

27441 with debridement and partial synovectomy

27442 Arthroplasty, femoral condyles or tibial plateau(s), knee;

CPT Assistant Nov 99:13, Jun 16:8, Feb 21:12



27443 with debridement and partial synovectomy

►(27445 has been deleted. To report knee arthroplasty, see 27447, 27487)◄

27446 Arthroplasty, knee, condyle and plateau; medial OR lateral compartment

CPT Assistant Dec 17:13, Feb 21:12

Posterolateral Corner of the Knee
27405, 27427

27447 medial AND lateral compartments with or without patella resurfacing (total knee arthroplasty)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Jan 07:1

(For revision of total knee arthroplasty, use 27487)

(For removal of total knee prosthesis, use 27488)

27448 Osteotomy, femur, shaft or supracondylar; without fixation

(To report bilateral procedure, report 27448 with modifier 50)

27450 with fixation

(To report bilateral procedure, report 27450 with modifier 50)

#● **27458** Osteotomy(ies), femur, unilateral, with insertion of an externally controlled intramedullary lengthening device, including iliotibial band release when performed, imaging, alignment assessments, computations of adjustment schedules, and management of the intramedullary lengthening device

➔ *CPT Changes: An Insider's View* 2026

►(Do not report 27458 in conjunction with 27450, 27466, 27470, 27472, 27506)◄

27454 Osteotomy, multiple, with realignment on intramedullary rod, femoral shaft (eg, Sofield type procedure)

➔ *CPT Assistant* Nov 98:8

27455 Osteotomy, proximal tibia, including fibular excision or osteotomy (includes correction of genu varus [bowleg] or genu valgus [knock-knee]); before epiphyseal closure

(To report bilateral procedure, report 27455 with modifier 50)

27457 after epiphyseal closure

(To report bilateral procedure, report 27457 with modifier 50)

27458 Code is out of numerical sequence. See 27448-27455

27465 Osteoplasty, femur; shortening (excluding 64876)

27466 lengthening

►(27468 has been deleted)◄

27470 Repair, nonunion or malunion, femur, distal to head and neck; without graft (eg, compression technique)

27472 with iliac or other autogenous bone graft (includes obtaining graft)

27475 Arrest, epiphyseal, any method (eg, epiphysiodesis); distal femur

➔ *CPT Assistant* Nov 98:8

27477 tibia and fibula, proximal

27479 combined distal femur, proximal tibia and fibula

27485 Arrest, hemiepiphyseal, distal femur or proximal tibia or fibula (eg, genu varus or valgus)

➔ *CPT Assistant* Nov 98:8

27486 Revision of total knee arthroplasty, with or without allograft; 1 component

➔ *CPT Assistant* Dec 13:16, Jul 15:10, Apr 18:10, Sep 21:8, Nov 21:12-13, Jan 25:32

27487 femoral and entire tibial component

➔ *CPT Assistant* Nov 98:8, Jul 13:6, Sep 21:8-9, Nov 21:12-13

27488 Removal of prosthesis, including total knee prosthesis, methylmethacrylate with or without insertion of spacer, knee

➔ *CPT Assistant* Nov 98:8, Jul 13:6, Mar 20:14, Sep 21:7-8

27495 Prophylactic treatment (nailing, pinning, plating, or wiring) with or without methylmethacrylate, femur

27496 Decompression fasciotomy, thigh and/or knee, 1 compartment (flexor or extensor or adductor);

27497 with debridement of nonviable muscle and/or nerve

27498 Decompression fasciotomy, thigh and/or knee, multiple compartments;

27499 with debridement of nonviable muscle and/or nerve

Fracture and/or Dislocation

Coding Tip

Reporting for Categories of Manipulation and/or Fracture

The codes for treatment of fractures and joint injuries (dislocations) are categorized by the type of manipulation (reduction) and stabilization (fixation or immobilization). These codes can apply to either open (compound) or closed fractures or joint injuries.

CPT Coding Guidelines, Musculoskeletal System

(For arthroscopic treatment of intercondylar spine[s] and tuberosity fracture[s] of the knee, see 29850, 29851)

(For arthroscopic treatment of tibial fracture, see 29855, 29856)

27500 Closed treatment of femoral shaft fracture, without manipulation

27501 Closed treatment of supracondylar or transcondylar femoral fracture with or without intercondylar extension, without manipulation

27502 Closed treatment of femoral shaft fracture, with manipulation, with or without skin or skeletal traction

CPT Assistant Fall 93:22, Oct 99:5

27503 Closed treatment of supracondylar or transcondylar femoral fracture with or without intercondylar extension, with manipulation, with or without skin or skeletal traction

27506 Open treatment of femoral shaft fracture, with or without external fixation, with insertion of intramedullary implant, with or without cerclage and/or locking screws

CPT Assistant Winter 92:10, Jun 09:7

27507 Open treatment of femoral shaft fracture with plate/screws, with or without cerclage

27508 Closed treatment of femoral fracture, distal end, medial or lateral condyle, without manipulation

27509 Percutaneous skeletal fixation of femoral fracture, distal end, medial or lateral condyle, or supracondylar or transcondylar, with or without intercondylar extension, or distal femoral epiphyseal separation

CPT Assistant Dec 18:10

27510 Closed treatment of femoral fracture, distal end, medial or lateral condyle, with manipulation

27511 Open treatment of femoral supracondylar or transcondylar fracture without intercondylar extension, includes internal fixation, when performed

CPT Changes: An Insider's View 2008

CPT Assistant May 96:6

27513 Open treatment of femoral supracondylar or transcondylar fracture with intercondylar extension, includes internal fixation, when performed

CPT Changes: An Insider's View 2008

27514 Open treatment of femoral fracture, distal end, medial or lateral condyle, includes internal fixation, when performed

CPT Changes: An Insider's View 2008

27516 Closed treatment of distal femoral epiphyseal separation; without manipulation
27517 with manipulation, with or without skin or skeletal traction
27519 Open treatment of distal femoral epiphyseal separation, includes internal fixation, when performed
CPT Changes: An Insider's View 2008
27520 Closed treatment of patellar fracture, without manipulation
27524 Open treatment of patellar fracture, with internal fixation and/or partial or complete patellectomy and soft tissue repair
27530 Closed treatment of tibial fracture, proximal (plateau); without manipulation
27532 with or without manipulation, with skeletal traction

(For arthroscopic treatment, see 29855, 29856)
27535 Open treatment of tibial fracture, proximal (plateau); unicondylar, includes internal fixation, when performed
CPT Changes: An Insider's View 2008
27536 bicondylar, with or without internal fixation

(For arthroscopic treatment, see 29855, 29856)
27538 Closed treatment of intercondylar spine(s) and/or tuberosity fracture(s) of knee, with or without manipulation

(For arthroscopic treatment, see 29850, 29851)
27540 Open treatment of intercondylar spine(s) and/or tuberosity fracture(s) of the knee, includes internal fixation, when performed
CPT Changes: An Insider's View 2008
27550 Closed treatment of knee dislocation; without anesthesia
27552 requiring anesthesia
27556 Open treatment of knee dislocation, includes internal fixation, when performed; without primary ligamentous repair or augmentation/reconstruction
CPT Changes: An Insider's View 2008
27557 with primary ligamentous repair
CPT Changes: An Insider's View 2008
27558 with primary ligamentous repair, with augmentation/reconstruction
CPT Changes: An Insider's View 2008

27560 Closed treatment of patellar dislocation; without anesthesia
CPT Assistant Apr 02:15

(For recurrent dislocation, see 27420-27424)
27562 requiring anesthesia
27566 Open treatment of patellar dislocation, with or without partial or total patellectomy
CPT Assistant Oct 22:16

Manipulation

27570 Manipulation of knee joint under general anesthesia (includes application of traction or other fixation devices)

CPT Assistant Mar 11:9

Arthrodesis

27580 Arthrodesis, knee, any technique

CPT Assistant May 20:14, Jul 21:7

Amputation

27590 Amputation, thigh, through femur, any level;

CPT Assistant Dec 17:13

27591 immediate fitting technique including first cast

27592 open, circular (guillotine)

27594 secondary closure or scar revision

27596 re-amputation

27598 Disarticulation at knee

Other Procedures

27599 Unlisted procedure, femur or knee

CPT Assistant Mar 08:14, Dec 12:13, Jan 14:9, Jan 15:13, Jun 16:8, Nov 16:9, Mar 17:10, Aug 17:9, Apr 18:10, Dec 18:10, Apr 19:10, Feb 21:12, Dec 23:50, Mar 24:25

Leg (Tibia and Fibula) and Ankle Joint

Incision

27600 Decompression fasciotomy, leg; anterior and/or lateral compartments only

27601 posterior compartment(s) only

27602 anterior and/or lateral, and posterior compartment(s)

(For incision and drainage procedures, superficial, see 10040-10160)

(For decompression fasciotomy with debridement, see 27892-27894)

27603 Incision and drainage, leg or ankle; deep abscess or hematoma

CPT Assistant Mar 20:14

27604 infected bursa

27605 Tenotomy, percutaneous, Achilles tendon (separate procedure); local anesthesia

CPT Assistant Sep 18:14

27606 general anesthesia

CPT Assistant Sep 18:14

27607 Incision (eg, osteomyelitis or bone abscess), leg or ankle

27610 Arthrotomy, ankle, including exploration, drainage, or removal of foreign body

CPT Assistant Nov 98:9, Mar 20:14

27612 Arthrotomy, posterior capsular release, ankle, with or without Achilles tendon lengthening

CPT Assistant Nov 98:8

(See also 27685)

Excision

27613 Biopsy, soft tissue of leg or ankle area; superficial

27614 deep (subfascial or intramuscular)

CPT Assistant Nov 98:8

(For needle biopsy of soft tissue, use 20206)

27615 Radical resection of tumor (eg, sarcoma), soft tissue of leg or ankle area; less than 5 cm

CPT Changes: An Insider's View 2010, 2014

27616 5 cm or greater

CPT Changes: An Insider's View 2010, 2014

(For radical resection of tumor[s] of cutaneous origin [eg, melanoma], see 11600-11606)

27618 Excision, tumor, soft tissue of leg or ankle area, subcutaneous; less than 3 cm

CPT Changes: An Insider's View 2010

CPT Assistant Sep 18:7

 # 27632 3 cm or greater

CPT Changes: An Insider's View 2010

CPT Assistant Apr 10:3

(For excision of benign lesions of cutaneous origin [eg, sebaceous cyst], see 11400-11406)

27619 Excision, tumor, soft tissue of leg or ankle area, subfascial (eg, intramuscular); less than 5 cm

CPT Changes: An Insider's View 2010

CPT Assistant Oct 22:16

 # 27634 5 cm or greater

CPT Changes: An Insider's View 2010

CPT Assistant Oct 22:16

27620 Arthrotomy, ankle, with joint exploration, with or without biopsy, with or without removal of loose or foreign body

27625 Arthrotomy, with synovectomy, ankle;

CPT Assistant Nov 98:8

27626 including tenosynovectomy

27630 Excision of lesion of tendon sheath or capsule (eg, cyst or ganglion), leg and/or ankle

 # 27634 5 cm or greater

CPT Changes: An Insider's View 2010

CPT Assistant Oct 22:16

27620 Arthrotomy, ankle, with joint exploration, with or without biopsy, with or without removal of loose or foreign body

27625 Arthrotomy, with synovectomy, ankle;

CPT Assistant Nov 98:8

27626 including tenosynovectomy

27630 Excision of lesion of tendon sheath or capsule (eg, cyst or ganglion), leg and/or ankle

27632 Code is out of numerical sequence. See 27616-27625

27634 Code is out of numerical sequence. See 27616-27625

27635 Excision or curettage of bone cyst or benign tumor, tibia or fibula;

CPT Assistant Apr 12:17

27637 with autograft (includes obtaining graft)

27638 with allograft

27640 Partial excision (craterization, saucerization, or diaphysectomy), bone (eg, osteomyelitis); tibia

CPT Changes: An Insider's View 2010

CPT Assistant Apr 12:17

(For exostosis excision, use 27635)

27641 fibula

CPT Changes: An Insider's View 2010

(For exostosis excision, use 27635)

27645 Radical resection of tumor; tibia

CPT Changes: An Insider's View 2010

27646 fibula

CPT Changes: An Insider's View 2010

27647 talus or calcaneus

CPT Changes: An Insider's View 2010

Introduction or Removal

27648 Injection procedure for ankle arthrography

CPT Assistant Aug 15:6

Clinical Examples in Radiology Summer 18:15

(For radiological supervision and interpretation, use 73615. Do not report 77002 in conjunction with 73615)

(For ankle arthroscopy, see 29894-29898)

Repair, Revision, and/or Reconstruction

27650 Repair, primary, open or percutaneous, ruptured Achilles tendon;

CPT Assistant Jul 14:5

27652 with graft (includes obtaining graft)

CPT Assistant Jul 14:5

27654 Repair, secondary, Achilles tendon, with or without graft

CPT Assistant Jul 14:5, Dec 16:16, Mar 20:14

27656 Repair, fascial defect of leg

27658 Repair, flexor tendon, leg; primary, without graft, each tendon

CPT Assistant Nov 98:8

27659 secondary, with or without graft, each tendon

CPT Assistant Jan 15:13

27664 Repair, extensor tendon, leg; primary, without graft, each tendon

CPT Assistant Nov 98:8, Jan 15:13

27665 secondary, with or without graft, each tendon

CPT Assistant Nov 98:8

27675 Repair, dislocating peroneal tendons; without fibular osteotomy

27676 with fibular osteotomy

27680 Tenolysis, flexor or extensor tendon, leg and/or ankle; single, each tendon

CPT Assistant Nov 98:8, Mar 25:16

27681 multiple tendons (through separate incision[s])

CPT Assistant Nov 98:8

27685 Lengthening or shortening of tendon, leg or ankle; single tendon (separate procedure)

CPT Assistant Nov 98:8, Sep 09:11, Sep 18:14

27686 multiple tendons (through same incision), each

CPT Assistant Nov 98:8, Sep 09:11

27687 Gastrocnemius recession (eg, Strayer procedure)

CPT Assistant Oct 24:12

(Toe extensors are considered as a group to be a single tendon when transplanted into midfoot)

27690 Transfer or transplant of single tendon (with muscle redirection or rerouting); superficial (eg, anterior tibial extensors into midfoot)

CPT Assistant May 21:13

27691 deep (eg, anterior tibial or posterior tibial through interosseous space, flexor digitorum longus, flexor hallucis longus, or peroneal tendon to midfoot or hindfoot)

CPT Assistant May 21:13

+ 27692 each additional tendon (List separately in addition to code for primary procedure)

(Use 27692 in conjunction with 27690, 27691)

27695 Repair, primary, disrupted ligament, ankle; collateral

CPT Assistant Mar 14:14, Nov 18:11

27696 both collateral ligaments

CPT Assistant Mar 14:14, Nov 18:11

27698 Repair, secondary, disrupted ligament, ankle, collateral (eg, Watson-Jones procedure)

CPT Assistant Mar 14:14

27700 Arthroplasty, ankle;

27702 with implant (total ankle)

27703 revision, total ankle

27704 Removal of ankle implant

27705 Osteotomy; tibia

27707 fibula

27709 tibia and fibula

27712 multiple, with realignment on intramedullary rod (eg, Sofield type procedure)

(For osteotomy to correct genu varus [bowleg] or genu valgus [knock-knee], see 27455-27457)

● **27713** Osteotomy(ies), tibia, including fibula when performed, unilateral, with insertion of an externally controlled intramedullary lengthening device, including imaging, alignment assessments, computations of adjustment schedules, and management of the intramedullary lengthening device

CPT Changes: An Insider's View 2026

►(Do not report 27713 in conjunction with 27705, 27709, 27712, 27715, 27720, 27722, 27724, 27759)◄

27715 Osteoplasty, tibia and fibula, lengthening or shortening

27720 Repair of nonunion or malunion, tibia; without graft, (eg, compression technique)

27722 with sliding graft

27724 with iliac or other autograft (includes obtaining graft)

CPT Assistant May 12:11

27725 by synostosis, with fibula, any method

27726 Repair of fibula nonunion and/or malunion with internal fixation

CPT Changes: An Insider's View 2008

CPT Assistant Jan 08:4, Apr 09:9

(Do not report 27726 in conjunction with 27707)

27727 Repair of congenital pseudarthrosis, tibia

27730 Arrest, epiphyseal (epiphysiodesis), open; distal tibia

CPT Changes: An Insider's View 2003

CPT Assistant Nov 98:8

27732 distal fibula

27734 distal tibia and fibula

27740 Arrest, epiphyseal (epiphysiodesis), any method, combined, proximal and distal tibia and fibula;

CPT Assistant Nov 98:8

27742 and distal femur

(For epiphyseal arrest of proximal tibia and fibula, use 27477)

27745 Prophylactic treatment (nailing, pinning, plating or wiring) with or without methylmethacrylate, tibia

Fracture and/or Dislocation

Coding Tip

Reporting for Categories of Manipulation and/or Fracture

The codes for treatment of fractures and joint injuries (dislocations) are categorized by the type of manipulation (reduction) and stabilization (fixation or immobilization). These codes can apply to either open (compound) or closed fractures or joint injuries.

CPT Coding Guidelines, Musculoskeletal System

27750 Closed treatment of tibial shaft fracture (with or without fibular fracture); without manipulation

CPT Assistant Winter 92:10, Fall 93:21, Mar 96:10

27752 with manipulation, with or without skeletal traction

CPT Assistant Winter 92:10, Fall 93:21, Feb 96:3, Mar 96:10, Jan 18:3

27756 Percutaneous skeletal fixation of tibial shaft fracture (with or without fibular fracture) (eg, pins or screws)

CPT Assistant Winter 92:10

27758 Open treatment of tibial shaft fracture (with or without fibular fracture), with plate/screws, with or without cerclage

CPT Assistant Winter 92:10, Mar 00:11

27759 Treatment of tibial shaft fracture (with or without fibular fracture) by intramedullary implant, with or without interlocking screws and/or cerclage

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Winter 92:10

27760 Closed treatment of medial malleolus fracture; without manipulation

27762 with manipulation, with or without skin or skeletal traction

27766 Open treatment of medial malleolus fracture, includes internal fixation, when performed

- *CPT Changes: An Insider's View* 2008

27767 Closed treatment of posterior malleolus fracture; without manipulation

- *CPT Changes: An Insider's View* 2008

27768 with manipulation

- *CPT Changes: An Insider's View* 2008

27769 Open treatment of posterior malleolus fracture, includes internal fixation, when performed

- *CPT Changes: An Insider's View* 2008

(Do not report 27767-27769 in conjunction with 27808-27823)

27780 Closed treatment of proximal fibula or shaft fracture; without manipulation

- *CPT Assistant* Winter 92:11

27781 with manipulation

27784 Open treatment of proximal fibula or shaft fracture, includes internal fixation, when performed

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Mar 00:11

27786 Closed treatment of distal fibular fracture (lateral malleolus); without manipulation

27788 with manipulation

27792 Open treatment of distal fibular fracture (lateral malleolus), includes internal fixation, when performed

- *CPT Changes: An Insider's View* 2008

(For treatment of tibia and fibula shaft fractures, see 27750-27759)

27808 Closed treatment of bimalleolar ankle fracture (eg, lateral and medial malleoli, or lateral and posterior malleoli or medial and posterior malleoli); without manipulation

- *CPT Changes: An Insider's View* 2008

27810 with manipulation

- *CPT Changes: An Insider's View* 2008

27814 Open treatment of bimalleolar ankle fracture (eg, lateral and medial malleoli, or lateral and posterior malleoli, or medial and posterior malleoli), includes internal fixation, when performed

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Feb 16:13

27816 Closed treatment of trimalleolar ankle fracture; without manipulation

27818 with manipulation

27822 Open treatment of trimalleolar ankle fracture, includes internal fixation, when performed, medial and/or lateral malleolus; without fixation of posterior lip

CPT Changes: An Insider's View 2008

27823 with fixation of posterior lip

CPT Changes: An Insider's View 2008

27824 Closed treatment of fracture of weight bearing articular portion of distal tibia (eg, pilon or tibial plafond), with or without anesthesia; without manipulation

27825 with skeletal traction and/or requiring manipulation

27826 Open treatment of fracture of weight bearing articular surface/portion of distal tibia (eg, pilon or tibial plafond), with internal fixation, when performed; of fibula only

CPT Changes: An Insider's View 2008

27827 of tibia only

CPT Changes: An Insider's View 2008

27828 of both tibia and fibula

CPT Changes: An Insider's View 2008

CPT Assistant Apr 14:10

27829 Open treatment of distal tibiofibular joint (syndesmosis) disruption, includes internal fixation, when performed

CPT Changes: An Insider's View 2008

CPT Assistant Winter 92:11, Mar 09:10, Feb 16:13

27830 Closed treatment of proximal tibiofibular joint dislocation; without anesthesia

27831 requiring anesthesia

27832 Open treatment of proximal tibiofibular joint dislocation, includes internal fixation, when performed, or with excision of proximal fibula

CPT Changes: An Insider's View 2008

27840 Closed treatment of ankle dislocation; without anesthesia

27842 requiring anesthesia, with or without percutaneous skeletal fixation

27846 Open treatment of ankle dislocation, with or without percutaneous skeletal fixation; without repair or internal fixation

27848 with repair or internal or external fixation

(For surgical or diagnostic arthroscopic procedures, see 29894-29898)

Manipulation

27860 Manipulation of ankle under general anesthesia (includes application of traction or other fixation apparatus)

Arthrodesis

27870 Arthrodesis, ankle, open

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* May 20:14, Jul 21:7

(For arthroscopic ankle arthrodesis, use 29899)

27871 Arthrodesis, tibiofibular joint, proximal or distal

- *CPT Assistant* May 20:14, Jul 21:7

Amputation

27880 Amputation, leg, through tibia and fibula;
27881 with immediate fitting technique including application of first cast
27882 open, circular (guillotine)
27884 secondary closure or scar revision
27886 re-amputation
27888 Amputation, ankle, through malleoli of tibia and fibula (eg, Syme, Pirogoff type procedures), with plastic closure and resection of nerves
27889 Ankle disarticulation

Other Procedures

27892 Decompression fasciotomy, leg; anterior and/or lateral compartments only, with debridement of nonviable muscle and/or nerve

(For decompression fasciotomy of the leg without debridement, use 27600)

27893 posterior compartment(s) only, with debridement of nonviable muscle and/or nerve

(For decompression fasciotomy of the leg without debridement, use 27601)

27894 anterior and/or lateral, and posterior compartment(s), with debridement of nonviable muscle and/or nerve

(For decompression fasciotomy of the leg without debridement, use 27602)

27899 Unlisted procedure, leg or ankle

- *CPT Assistant* Aug 00:11, Dec 16:16, Mar 20:14, Mar 21:9, Oct 24:12

Foot and Toes

Incision

(For incision and drainage procedures, superficial, see 10040-10160)

28001 Incision and drainage, bursa, foot

CPT Assistant Nov 98:9

28002 Incision and drainage below fascia, with or without tendon sheath involvement, foot; single bursal space

CPT Assistant Nov 98:8, Feb 24:32

28003 multiple areas

CPT Assistant Nov 98:9

28005 Incision, bone cortex (eg, osteomyelitis or bone abscess), foot

CPT Assistant Nov 98:9

28008 Fasciotomy, foot and/or toe

(See also 28060, 28062, 28250)

28010 Tenotomy, percutaneous, toe; single tendon

CPT Assistant Nov 98:8

28011 multiple tendons

CPT Assistant Nov 98:8

(For open tenotomy, see 28230-28234)

28020 Arthrotomy, including exploration, drainage, or removal of loose or foreign body; intertarsal or tarsometatarsal joint

CPT Assistant Mar 20:14

28022 metatarsophalangeal joint

28024 interphalangeal joint

28035 Release, tarsal tunnel (posterior tibial nerve decompression)

CPT Assistant Nov 98:8

(For other nerve entrapments, see 64704, 64722)

Excision

28039 Code is out of numerical sequence. See 28035-28047

28041 Code is out of numerical sequence. See 28035-28047

28043 Excision, tumor, soft tissue of foot or toe, subcutaneous; less than 1.5 cm

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Aug 23:19-20

 # 28039 1.5 cm or greater

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Aug 23:19-20

(For excision of benign lesions of cutaneous origin [eg, sebaceous cyst], see 11420-11426)

28045 Excision, tumor, soft tissue of foot or toe, subfascial (eg, intramuscular); less than 1.5 cm

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Aug 23:19-20

 # 28041 1.5 cm or greater

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Aug 23:19-20

28046 Radical resection of tumor (eg, sarcoma), soft tissue of foot or toe; less than 3 cm

- *CPT Changes: An Insider's View* 2010, 2014

28047 3 cm or greater

- *CPT Changes: An Insider's View* 2010, 2014
- *CPT Assistant* Sep 18:7

(For radical resection of tumor[s] of cutaneous origin [eg, melanoma], see 11620-11626)

28050 Arthrotomy with biopsy; intertarsal or tarsometatarsal joint

28052 metatarsophalangeal joint

28054 interphalangeal joint

28055 Neurectomy, intrinsic musculature of foot

- *CPT Changes: An Insider's View* 2007

28060 Fasciectomy, plantar fascia; partial (separate procedure)

- *CPT Assistant* Mar 08:14

28062 radical (separate procedure)

(For plantar fasciotomy, see 28008, 28250)

28070 Synovectomy; intertarsal or tarsometatarsal joint, each

28072 metatarsophalangeal joint, each

28080 Excision, interdigital (Morton) neuroma, single, each
28086 Synovectomy, tendon sheath, foot; flexor
28088 extensor
28090 Excision of lesion, tendon, tendon sheath, or capsule (including synovectomy) (eg, cyst or ganglion); foot
CPT Assistant Nov 98:8
28092 toe(s), each
28100 Excision or curettage of bone cyst or benign tumor, talus or calcaneus;
CPT Assistant Mar 21:9, May 24:20
28102 with iliac or other autograft (includes obtaining graft)
CPT Assistant May 24:20
28103 with allograft
CPT Assistant May 24:20
28104 Excision or curettage of bone cyst or benign tumor, tarsal or metatarsal, except talus or calcaneus;
CPT Changes: An Insider's View 2002
CPT Assistant May 24:20
28106 with iliac or other autograft (includes obtaining graft)
CPT Assistant May 24:20
28107 with allograft
CPT Assistant May 24:20
28108 Excision or curettage of bone cyst or benign tumor, phalanges of foot
CPT Assistant May 24:20

(For partial excision of bossing or exostosis for phalanx in the foot, use 28124)
28110 Ostectomy, partial excision, fifth metatarsal head (bunionette) (separate procedure)
CPT Assistant Oct 98:10, Sep 00:9, Dec 10:17, Oct 21:13-14
28111 Ostectomy, complete excision; first metatarsal head
28112 other metatarsal head (second, third or fourth)
28113 fifth metatarsal head
28114 all metatarsal heads, with partial proximal phalangectomy, excluding first metatarsal (eg, Clayton type procedure)
28116 Ostectomy, excision of tarsal coalition
28118 Ostectomy, calcaneus;
CPT Assistant May 11:9, Jan 15:13
28119 for spur, with or without plantar fascial release
CPT Assistant May 11:9

28120 Partial excision (craterization, saucerization, sequestrectomy, or diaphysectomy) bone (eg, osteomyelitis or bossing); talus or calcaneus

CPT Assistant May 11:9, May 24:20

28122 tarsal or metatarsal bone, except talus or calcaneus

CPT Assistant Nov 98:11, Aug 20:14, May 24:20, Nov 24:1

(For partial excision of talus or calcaneus, use 28120)

(For cheilectomy for hallux rigidus, use 28289)

28124 phalanx of toe

CPT Assistant May 24:20

28126 Resection, partial or complete, phalangeal base, each toe

CPT Assistant Nov 98:8, Mar 15:9

28130 Talectomy (astragalectomy)

(For calcanectomy, use 28118)

28140 Metatarsectomy

28150 Phalangectomy, toe, each toe

CPT Assistant Nov 98:8

28153 Resection, condyle(s), distal end of phalanx, each toe

CPT Assistant Nov 98:8, Dec 11:15

28160 Hemiphalangectomy or interphalangeal joint excision, toe, proximal end of phalanx, each

CPT Assistant Nov 98:8

28171 Radical resection of tumor; tarsal (except talus or calcaneus)

CPT Changes: An Insider's View 2010

28173 metatarsal

CPT Changes: An Insider's View 2010

28175 phalanx of toe

CPT Changes: An Insider's View 2010

(For talus or calcaneus, use 27647)

Introduction or Removal

28190 Removal of foreign body, foot; subcutaneous

CPT Assistant Dec 13:16

28192 deep

CPT Assistant Dec 13:16

28193 complicated

Repair, Revision, and/or Reconstruction

28200 Repair, tendon, flexor, foot; primary or secondary, without free graft, each tendon

CPT Assistant Nov 98:8, Jul 14:5, Feb 16:15

28202 secondary with free graft, each tendon (includes obtaining graft)

28208 Repair, tendon, extensor, foot; primary or secondary, each tendon

CPT Assistant Nov 98:8

28210 secondary with free graft, each tendon (includes obtaining graft)

28220 Tenolysis, flexor, foot; single tendon

CPT Assistant Nov 98:8

28222 multiple tendons

CPT Assistant Nov 98:8

28225 Tenolysis, extensor, foot; single tendon

CPT Assistant Nov 98:8

28226 multiple tendons

CPT Assistant Nov 98:8

28230 Tenotomy, open, tendon flexor; foot, single or multiple tendon(s) (separate procedure)

CPT Assistant Nov 98:8

28232 toe, single tendon (separate procedure)

CPT Assistant Nov 98:8, Mar 15:9, Apr 20:10

28234 Tenotomy, open, extensor, foot or toe, each tendon

CPT Assistant Nov 98:8, Sep 10:9

(For tendon transfer to midfoot or hindfoot, see 27690, 27691)

28238 Reconstruction (advancement), posterior tibial tendon with excision of accessory tarsal navicular bone (eg, Kidner type procedure)

CPT Changes: An Insider's View 2002

(For subcutaneous tenotomy, see 28010, 28011)

(For transfer or transplant of tendon with muscle redirection or rerouting, see 27690-27692)

(For extensor hallucis longus transfer with great toe IP fusion (Jones procedure), use 28760)

28240 Tenotomy, lengthening, or release, abductor hallucis muscle

28250 Division of plantar fascia and muscle (eg, Steindler stripping) (separate procedure)

28260 Capsulotomy, midfoot; medial release only (separate procedure)

28261 with tendon lengthening

28262 extensive, including posterior talotibial capsulotomy and tendon(s) lengthening (eg, resistant clubfoot deformity)

28264 Capsulotomy, midtarsal (eg, Heyman type procedure)

28270 Capsulotomy; metatarsophalangeal joint, with or without tenorrhaphy, each joint (separate procedure)

CPT Assistant Sep 10:9, Sep 11:11, Sep 14:13

28272 interphalangeal joint, each joint (separate procedure)

CPT Assistant Dec 02:11

28280 Syndactylization, toes (eg, webbing or Kelikian type procedure)

CPT Assistant Nov 98:8

28285 Correction, hammertoe (eg, interphalangeal fusion, partial or total phalangectomy)

CPT Assistant Nov 98:8, May 06:18, Sep 10:9, Sep 11:11, Mar 15:9, Jun 16:8

28286 Correction, cock-up fifth toe, with plastic skin closure (eg, Ruiz-Mora type procedure)

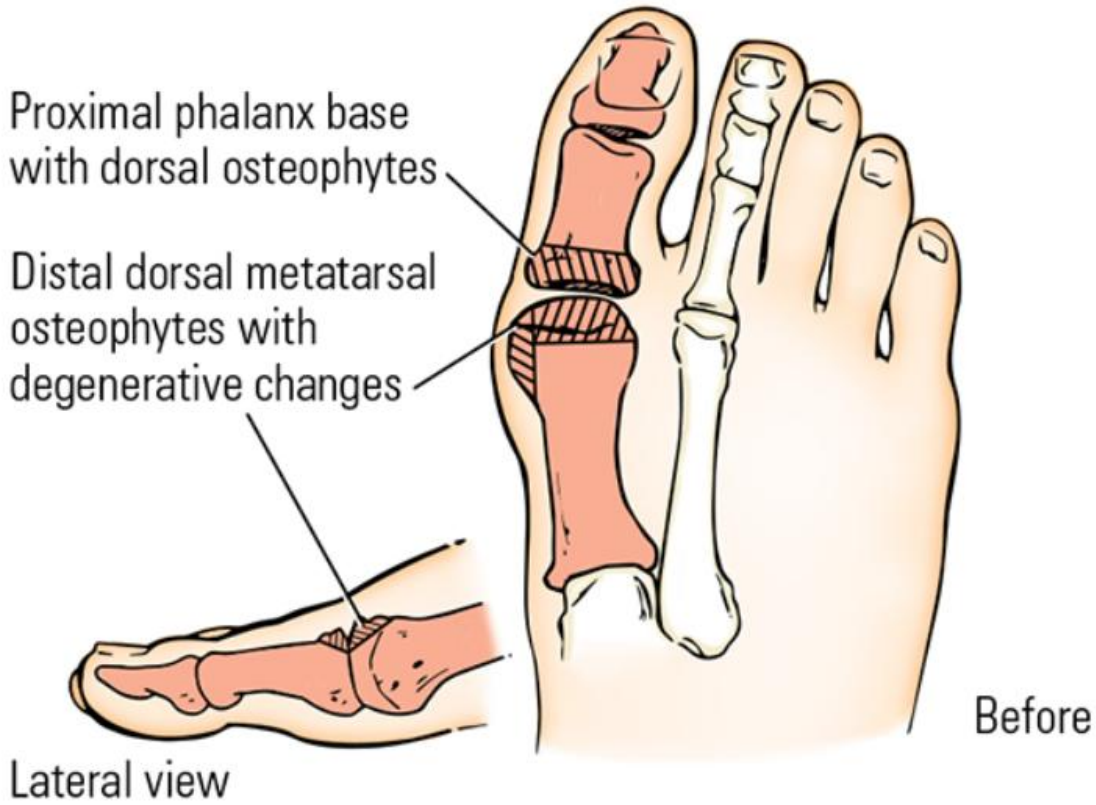
CPT Assistant Nov 98:8

28288 Ostectomy, partial, exostectomy or condylectomy, metatarsal head, each metatarsal head

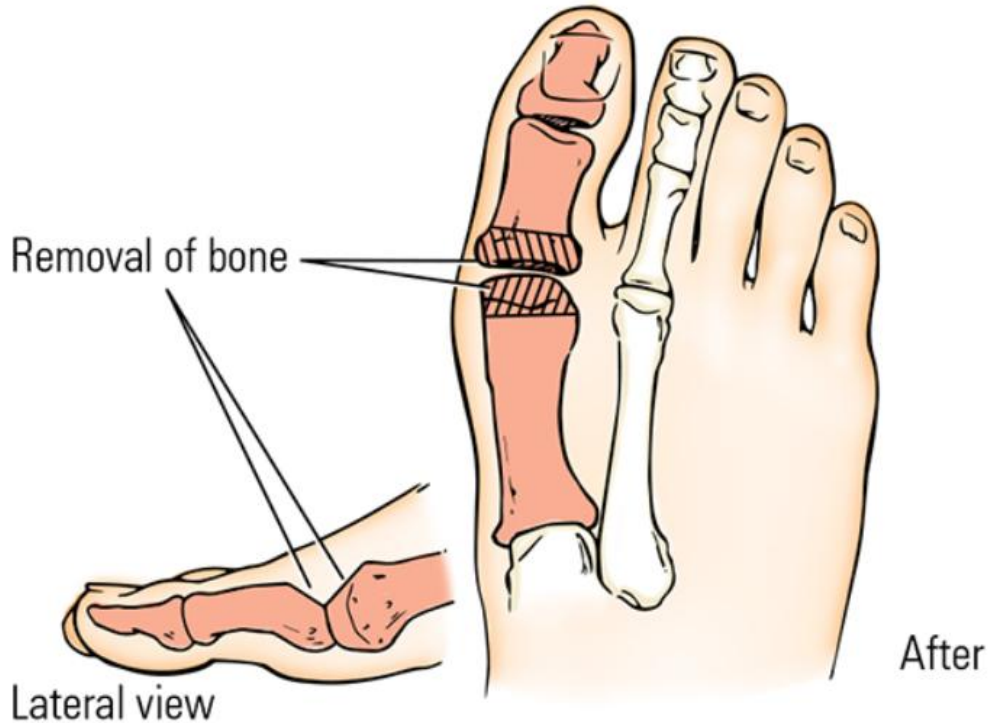
28289 Hallux rigidus correction with cheilectomy, debridement and capsular release of the first metatarsophalangeal joint; without implant

CPT Changes: An Insider's View 2017

CPT Assistant Nov 98:11, May 11:3, Sep 15:12, Dec 16:7, Jul 20:13, Aug 20:14



28291 with implant



CPT Changes: An Insider's View 2017

CPT Assistant Dec 16:7, Nov 17:10, Aug 20:14

Hallux Rigidus Correction

28289

28292 Correction, hallux valgus with bunionectomy, with sesamoidectomy when performed; with resection of proximal phalanx base, when performed, any method

- *CPT Changes: An Insider's View* 2017, 2024
- *CPT Assistant* Dec 96:5, Sep 00:9, Jan 07:31, May 10:9, Dec 10:12, Dec 16:3, Nov 24:1

28295 Code is out of numerical sequence. See 28292-28298

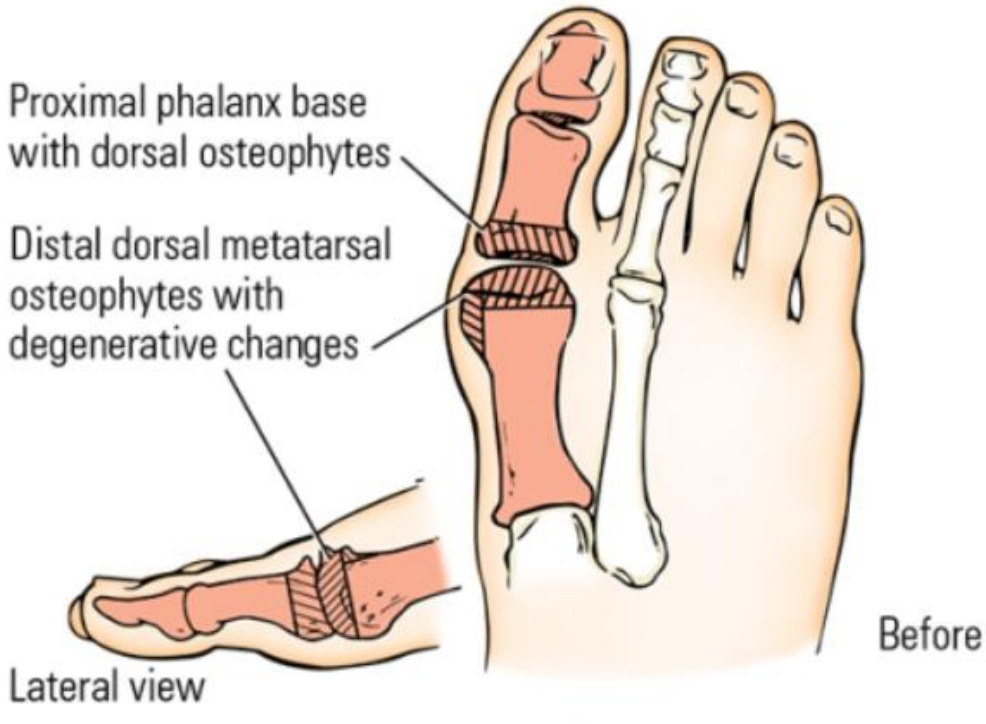
28296 with distal metatarsal osteotomy, any method

- *CPT Changes: An Insider's View* 2017, 2024
- *CPT Assistant* Dec 96:6, Jan 97:10, Jan 07:31, May 10:9, Sep 13:17, Dec 16:4, Sep 18:14, Jul 20:13, Apr 24:35, Nov 24:1

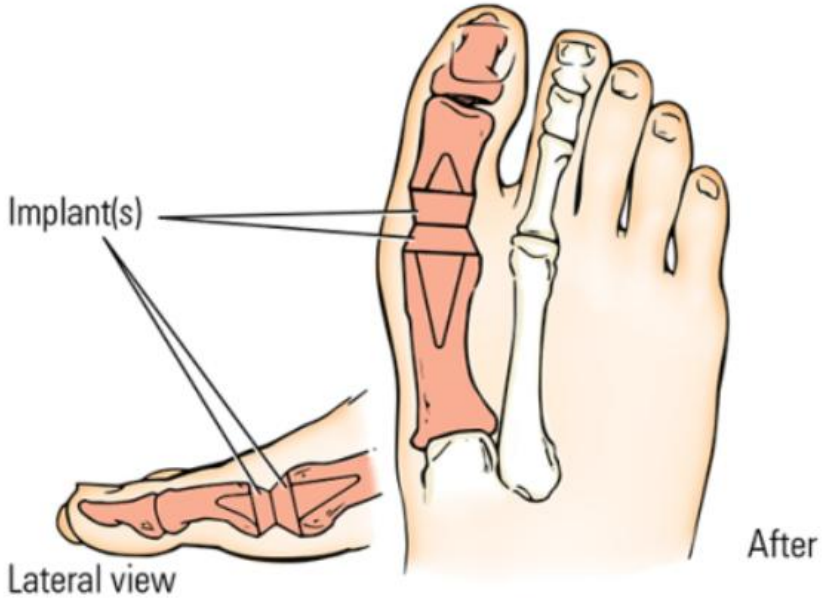
 # 28295 with proximal metatarsal osteotomy, any method

- *CPT Changes: An Insider's View* 2017, 2024
- *CPT Assistant* Dec 16:5, Nov 24:1

28297 with first metatarsal and medial cuneiform joint arthrodesis, any method



- *CPT Changes: An Insider's View* 2017, 2024
- *CPT Assistant* Dec 96:6, Jan 07:31, May 10:9, Dec 16:5, Apr 21:14, Nov 24:1



(For first metatarsal-cuneiform joint fusion without concomitant removal of the distal medial prominence of the first metatarsal for hallux valgus correction, use 28740)

Hallux Rigidus Correction with Implant

28291

A single- or double-stem implant may be used

28298 with proximal phalanx osteotomy, any method

- *CPT Changes: An Insider's View* 2017, 2024
- *CPT Assistant* Dec 96:7, Jan 07:31, May 10:9, Oct 13:18, Dec 16:6, Nov 24:1

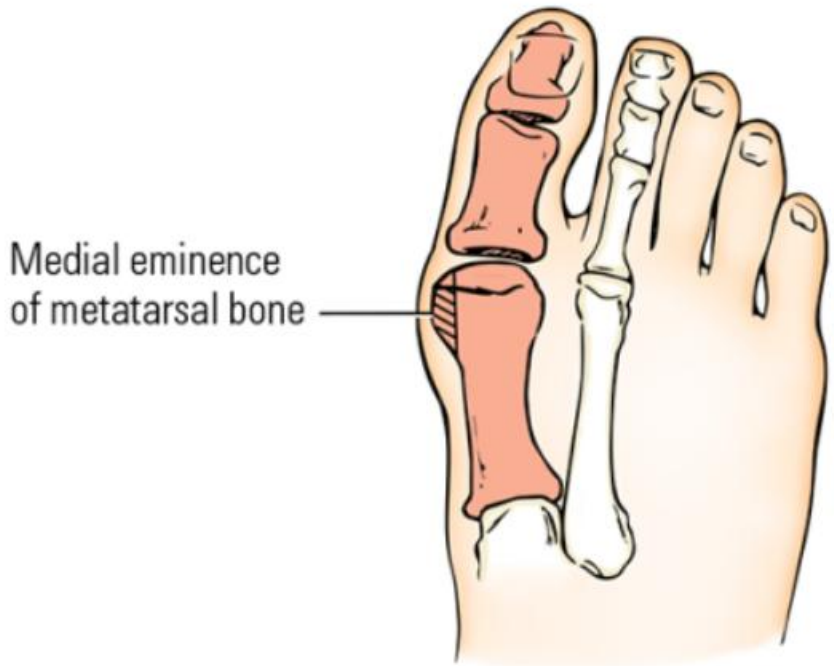
28299 with double osteotomy, any method

- *CPT Changes: An Insider's View* 2002, 2017, 2024
- *CPT Assistant* Dec 96:7, Jan 07:31, May 10:9, Sep 13:17, Oct 13:18, Apr 16:8, Dec 16:6, Nov 24:1

28300 Osteotomy; calcaneus (eg, Dwyer or Chambers type procedure), with or without internal fixation

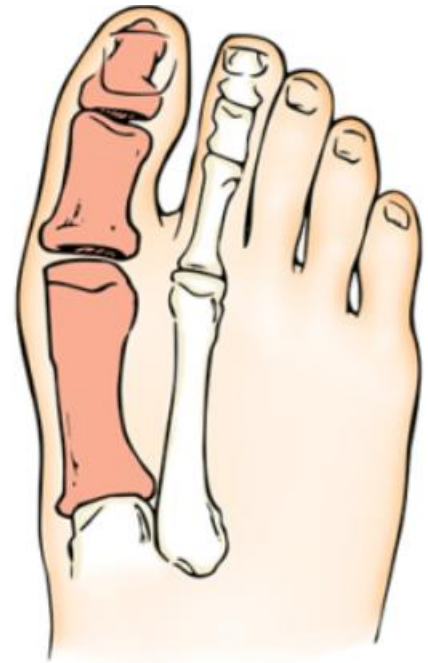
28302 talus

- *CPT Assistant* Mar 21:9



28304 Osteotomy, tarsal bones, other than calcaneus or talus;

- *CPT Assistant* Nov 98:8



28305 with autograft (includes obtaining graft) (eg, Fowler type)

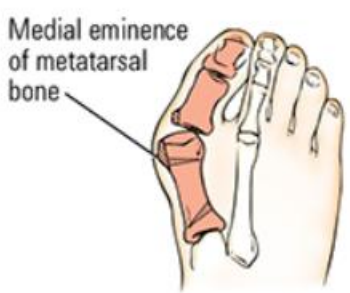
These illustrations depict medial resection of the first metatarsal along with several first ray double osteotomy options for hallux valgus and metatarsus primus adductus (high intermetatarsal angle) correction.

Surgical Option 1

PREOP

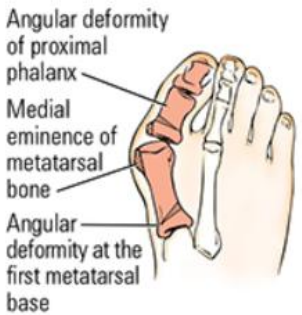


POSTOP

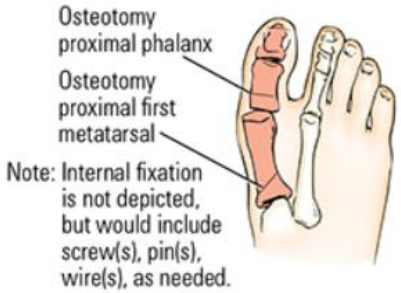
Note: Internal fixation is not depicted, but would include screw(s), pin(s), wire(s), as needed.

Surgical Option 2

PREOP



POSTOP



Note: Internal fixation is not depicted, but would include screw(s), pin(s), wire(s), as needed.

Surgical Option 3

PREOP

POSTOP

28306 Osteotomy, with or without lengthening, shortening or angular correction, metatarsal; first metatarsal
- *CPT Assistant* Nov 98:8, Dec 99:7, Dec 10:12, Nov 24:1

28307 first metatarsal with autograft (other than first toe)
- *CPT Assistant* Nov 98:9, Nov 24:1

28308 other than first metatarsal, each
- *CPT Assistant* Oct 21:13-14

28309 multiple (eg, Swanson type cavus foot procedure)
- *CPT Assistant* Nov 98:8, Dec 99:7

28310 Osteotomy, shortening, angular or rotational correction; proximal phalanx, first toe (separate procedure)
- *CPT Assistant* Sep 13:17, Nov 24:1

28312 other phalanges, any toe

28313 Reconstruction, angular deformity of toe, soft tissue procedures only (eg, overlapping second toe, fifth toe, curly toes)
- *CPT Assistant* Nov 98:8

28315 Sesamoidectomy, first toe (separate procedure)

28320 Repair, nonunion or malunion; tarsal bones
- *CPT Assistant* Nov 98:9

28322 metatarsal, with or without bone graft (includes obtaining graft)

28340 Reconstruction, toe, macrodactyly; soft tissue resection

28341 requiring bone resection

28344 Reconstruction, toe(s); polydactyly

28345 syndactyly, with or without skin graft(s), each web

28360 Reconstruction, cleft foot

Fracture and/or Dislocation

Coding Tip

Reporting for Categories of Manipulation and/or Fracture

The codes for treatment of fractures and joint injuries (dislocations) are categorized by the type of manipulation (reduction) and stabilization (fixation or immobilization). These codes can apply to either open (compound) or closed fractures or joint injuries.

CPT Coding Guidelines, Musculoskeletal System

28400 Closed treatment of calcaneal fracture; without manipulation
28405 with manipulation
28406 Percutaneous skeletal fixation of calcaneal fracture, with manipulation
28415 Open treatment of calcaneal fracture, includes internal fixation, when performed;
CPT Changes: An Insider's View 2008
28420 with primary iliac or other autogenous bone graft (includes obtaining graft)
CPT Changes: An Insider's View 2008
28430 Closed treatment of talus fracture; without manipulation
28435 with manipulation
28436 Percutaneous skeletal fixation of talus fracture, with manipulation
28445 Open treatment of talus fracture, includes internal fixation, when performed
CPT Changes: An Insider's View 2008
28446 Open osteochondral autograft, talus (includes obtaining graft[s])
CPT Changes: An Insider's View 2008
CPT Assistant Jan 08:4, Dec 08:6

(Do not report 28446 in conjunction with 27705, 27707)

(For arthroscopic osteochondral talus graft, use 29892)

(For open osteochondral allograft or repairs with industrial grafts, use 28899)
28450 Treatment of tarsal bone fracture (except talus and calcaneus); without manipulation, each
CPT Assistant Dec 01:7
28455 with manipulation, each
28456 Percutaneous skeletal fixation of tarsal bone fracture (except talus and calcaneus), with manipulation, each
28465 Open treatment of tarsal bone fracture (except talus and calcaneus), includes internal fixation, when performed, each
CPT Changes: An Insider's View 2008
CPT Assistant Aug 19:10
28470 Closed treatment of metatarsal fracture; without manipulation, each
28475 with manipulation, each
28476 Percutaneous skeletal fixation of metatarsal fracture, with manipulation, each

28456 Percutaneous skeletal fixation of tarsal bone fracture (except talus and calcaneus), with manipulation, each
28465 Open treatment of tarsal bone fracture (except talus and calcaneus), includes internal fixation, when performed, each
CPT Changes: An Insider's View 2008
CPT Assistant Aug 19:10
28470 Closed treatment of metatarsal fracture; without manipulation, each
28475 with manipulation, each
28476 Percutaneous skeletal fixation of metatarsal fracture, with manipulation, each
28485 Open treatment of metatarsal fracture, includes internal fixation, when performed, each
CPT Changes: An Insider's View 2008
CPT Assistant Aug 19:10
28490 Closed treatment of fracture great toe, phalanx or phalanges; without manipulation
28495 with manipulation
28496 Percutaneous skeletal fixation of fracture great toe, phalanx or phalanges, with manipulation
28505 Open treatment of fracture, great toe, phalanx or phalanges, includes internal fixation, when performed
CPT Changes: An Insider's View 2008
28510 Closed treatment of fracture, phalanx or phalanges, other than great toe; without manipulation, each
28515 with manipulation, each
28525 Open treatment of fracture, phalanx or phalanges, other than great toe, includes internal fixation, when performed, each
CPT Changes: An Insider's View 2008
28530 Closed treatment of sesamoid fracture
28531 Open treatment of sesamoid fracture, with or without internal fixation
28540 Closed treatment of tarsal bone dislocation, other than talotarsal; without anesthesia
28545 requiring anesthesia
28546 Percutaneous skeletal fixation of tarsal bone dislocation, other than talotarsal, with manipulation
28555 Open treatment of tarsal bone dislocation, includes internal fixation, when performed
CPT Changes: An Insider's View 2008
CPT Assistant Nov 24:1
28570 Closed treatment of talotarsal joint dislocation; without anesthesia
28575 requiring anesthesia
28576 Percutaneous skeletal fixation of talotarsal joint dislocation, with manipulation
28585 Open treatment of talotarsal joint dislocation, includes internal fixation, when performed
CPT Changes: An Insider's View 2008
CPT Assistant Sep 11:12
28600 Closed treatment of tarsometatarsal joint dislocation; without anesthesia
28605 requiring anesthesia
28606 Percutaneous skeletal fixation of tarsometatarsal joint dislocation, with manipulation
28615 Open treatment of tarsometatarsal joint dislocation, includes internal fixation, when performed
CPT Changes: An Insider's View 2008
CPT Assistant Dec 21:19, Nov 24:1
28630 Closed treatment of metatarsophalangeal joint dislocation; without anesthesia
28635 requiring anesthesia
28636 Percutaneous skeletal fixation of metatarsophalangeal joint dislocation, with manipulation

28645 Open treatment of metatarsophalangeal joint dislocation, includes internal fixation, when performed

CPT Changes: An Insider's View 2008

CPT Assistant Sep 14:13

28660 Closed treatment of interphalangeal joint dislocation; without anesthesia

28665 requiring anesthesia

28666 Percutaneous skeletal fixation of interphalangeal joint dislocation, with manipulation

28675 Open treatment of interphalangeal joint dislocation, includes internal fixation, when performed

CPT Changes: An Insider's View 2008

Arthrodesis

28705 Arthrodesis; pantalar

CPT Assistant May 20:14, Jul 21:7

28715 triple

28725 subtalar

CPT Assistant Sep 11:11

28730 Arthrodesis, midtarsal or tarsometatarsal, multiple or transverse;

28735 with osteotomy (eg, flatfoot correction)

CPT Assistant May 19:10

28737 Arthrodesis, with tendon lengthening and advancement, midtarsal, tarsal navicular-cuneiform (eg, Miller type procedure)

CPT Changes: An Insider's View 2002

28740 Arthrodesis, midtarsal or tarsometatarsal, single joint

CPT Assistant Dec 21:19, Nov 24:1

(For first metatarsal-cuneiform joint fusion without concomitant removal of the distal medial prominence of the first metatarsal for hallux valgus correction, use 28740)

28750 Arthrodesis, great toe; metatarsophalangeal joint

CPT Assistant Dec 96:7, Dec 16:8

28755 interphalangeal joint

28760 Arthrodesis, with extensor hallucis longus transfer to first metatarsal neck, great toe, interphalangeal joint (eg, Jones type procedure)

CPT Assistant Nov 98:8, May 20:14, Jul 21:7

(For hammertoe operation or interphalangeal fusion, use 28285)

Amputation

28800 Amputation, foot; midtarsal (eg, Chopart type procedure)

28805 transmetatarsal

CPT Assistant May 97:8, Mar 21:9

28810 Amputation, metatarsal, with toe, single

28820 Amputation, toe; metatarsophalangeal joint

CPT Assistant May 97:8

28825 interphalangeal joint

Other Procedures

28890 Extracorporeal shock wave, high energy, performed by a physician or other qualified health care professional, requiring anesthesia other than local, including ultrasound guidance, involving the plantar fascia

CPT Changes: An Insider's View 2006, 2013

CPT Assistant Dec 05:10, Mar 06:1, Dec 18:5

(For extracorporeal shock wave therapy involving musculoskeletal system not otherwise specified, see 0101T, 0102T)

(For extracorporeal shock wave therapy involving integumentary system not otherwise specified, see 0512T, 0513T)

(Do not report 28890 in conjunction with 0512T, 0513T, when treating the same area)

28899 Unlisted procedure, foot or toes

CPT Assistant Sep 11:12, Nov 15:10, Jun 16:8, Sep 17:14, Nov 17:10, Oct 18:11, Nov 24:1

Application of Casts and Strapping

All services that appear in the Musculoskeletal System section include the application and removal of the first cast, splint, or traction device, when performed. Supplies are reported separately. If a cast is removed by someone other than the physician or other qualified health care professional who applied the cast, report the cast removal code (29700, 29705, 29710).

Subsequent replacement of cast, splint, or strapping (29000-29750) and/or traction device (eg, 20690, 20692) during or after the global period may be reported separately.

A cast, splint, or strapping is not considered part of the preoperative care; therefore, the use of modifier 56 for preoperative management only is not applicable.

(For orthotics management and training, see 97760, 97761, 97763)

Body and Upper Extremity

Casts

29000 Application of halo type body cast (see 20661-20663 for insertion)
- *CPT Assistant* Feb 96:3, 5, Apr 02:13, Jan 18:3

29010 Application of Risser jacket, localizer, body; only
- *CPT Assistant* Feb 96:3, Apr 02:13

29015 including head
- *CPT Assistant* Feb 96:3, Apr 02:13

29035 Application of body cast, shoulder to hips;
- *CPT Assistant* Feb 96:3, Apr 02:13

29040 including head, Minerva type
- *CPT Assistant* Feb 96:3, Apr 02:13

29044 including 1 thigh
- *CPT Assistant* Feb 96:3, Apr 02:13

29046 including both thighs
- *CPT Assistant* Feb 96:3, Apr 02:13

29049 Application, cast; figure-of-eight
- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Feb 96:3, Apr 02:13

29055 shoulder spica
- *CPT Assistant* Feb 96:3, Apr 02:13

29058 plaster Velpeau
- *CPT Assistant* Feb 96:3, Apr 02:13

29065 shoulder to hand (long arm)
- *CPT Assistant* Feb 96:3, Apr 02:13

29075 elbow to finger (short arm)
- *CPT Assistant* Feb 96:3-4, Apr 02:13

29085 hand and lower forearm (gauntlet)
- *CPT Assistant* Feb 96:3, Apr 02:13, Dec 02:11

29086 finger (eg, contracture)
- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Apr 02:13

Splints

29105 Application of long arm splint (shoulder to hand)

CPT Assistant Feb 96:3, Apr 02:13, May 09:8, Jan 18:3, Jul 24:12

29125 Application of short arm splint (forearm to hand); static

CPT Assistant Feb 96:3-4, Apr 02:13, Jan 18:3

29126 dynamic

CPT Assistant Feb 96:3, Apr 02:13

29130 Application of finger splint; static

CPT Assistant Feb 96:3, Apr 02:13

29131 dynamic

CPT Assistant Feb 96:3, Apr 02:13

Strapping—Any Age

29200 Strapping; thorax

CPT Assistant Feb 96:3, Apr 02:13

(To report low back strapping, use 29799)

29240 shoulder (eg, Velpeau)

CPT Assistant Feb 96:3, Apr 02:13, Jun 10:8

29260 elbow or wrist

CPT Assistant Feb 96:3, Apr 02:13

29280 hand or finger

CPT Assistant Feb 96:3, Apr 02:13

Lower Extremity

Casts

29305 Application of hip spica cast; 1 leg

CPT Assistant Feb 96:3, Apr 02:13

29325 1 and one-half spica or both legs

CPT Assistant Feb 96:3, Apr 02:13

(For hip spica (body) cast, including thighs only, use 29046)

29345 Application of long leg cast (thigh to toes);

CPT Assistant Feb 96:3, Apr 02:13, Sep 11:11

29355 walker or ambulatory type

CPT Assistant Feb 96:3, Apr 02:13, Sep 11:11, Jan 18:3

29358 Application of long leg cast brace

CPT Assistant Feb 96:3, Apr 02:13, Sep 11:11

29365 Application of cylinder cast (thigh to ankle)

CPT Assistant Feb 96:3, Apr 02:13, Sep 11:11

29405 Application of short leg cast (below knee to toes);

CPT Assistant Feb 96:3, Apr 02:13, Mar 03:17, Sep 11:11, Jan 18:3

29425 walking or ambulatory type

CPT Assistant Feb 96:3, Apr 02:13, Sep 11:11

29435 Application of patellar tendon bearing (PTB) cast

CPT Assistant Feb 96:3, Apr 02:13, Sep 11:11

29440 Adding walker to previously applied cast

CPT Assistant Feb 96:3, Apr 02:13

29445 Application of rigid total contact leg cast

CPT Assistant Feb 96:3, Apr 02:13, Sep 11:11

29450 Application of clubfoot cast with molding or manipulation, long or short leg

CPT Assistant Feb 96:3, Apr 02:13

(To report bilateral procedure, use 29450 with modifier 50)

Splints

29505 Application of long leg splint (thigh to ankle or toes)

CPT Assistant Feb 96:3, Apr 02:13, May 09:8

29515 Application of short leg splint (calf to foot)

CPT Assistant Feb 96:3, Apr 02:13, Mar 03:18, Jan 18:3, Oct 19:10

Strapping—Any Age

29520 Strapping; hip

CPT Assistant Feb 96:3, Apr 02:13

29530 knee

CPT Assistant Feb 96:3, Apr 02:13, Jun 10:8, Aug 10:15

29540 ankle and/or foot

CPT Changes: An Insider's View 2003

CPT Assistant Feb 96:3, Apr 02:13, Mar 03:17, Jun 10:8, Aug 10:15, Mar 14:4

(Do not report 29540 in conjunction with 29580, 29581, for the same extremity)

29550 toes

CPT Assistant Feb 96:3, Apr 02:13

29580 Unna boot

CPT Assistant Feb 96:3, Jul 99:10, Apr 02:13, Mar 14:4

(Do not report 29580 in conjunction with 29540, 29581, for the same extremity)

29581 Application of multi-layer compression system; leg (below knee), including ankle and foot

CPT Changes: An Insider's View 2010, 2012

CPT Assistant May 11:11, Sep 12:16, Sep 13:17, Mar 14:4, Oct 14:6, Mar 15:10, Aug 16:3

(Do not report 29581 in conjunction with 29540, 29580, for the same extremity)

(Do not report 29520, 29530, 29540, 29550, 29580, 29581 in conjunction with 36465, 36466, 36468, 36470, 36471, 36473, 36474, 36475, 36476, 36478, 36479, 36482, 36483, for the same extremity)

29584 upper arm, forearm, hand, and fingers

CPT Changes: An Insider's View 2012

CPT Assistant Mar 15:10, Aug 16:3

(Do not report 29584 in conjunction with 36465, 36466, 36468, 36470, 36471, 36473, 36474, 36475, 36476, 36478, 36479, 36482, 36483, for the same extremity)

Removal or Repair

Codes for cast removals should be employed only for casts applied by another individual.

29700 Removal or bivalving; gauntlet, boot or body cast

CPT Assistant Apr 02:13, May 22:2

29705 full arm or full leg cast

CPT Assistant Apr 02:13, May 22:2

29710 shoulder or hip spica, Minerva, or Risser jacket, etc.

CPT Assistant Apr 02:13, May 22:2

29720 Repair of spica, body cast or jacket

CPT Assistant Apr 02:13

29730 Windowing of cast

CPT Assistant Apr 02:13

29740 Wedging of cast (except clubfoot casts)

CPT Assistant Apr 02:13

29750 Wedging of clubfoot cast

CPT Assistant Apr 02:13, Jan 18:3

(To report bilateral procedure, use 29750 with modifier 50)

Other Procedures

29799 Unlisted procedure, casting or strapping

CPT Assistant Sep 12:16, Aug 16:11, Jan 18:3

Endoscopy/Arthroscopy

Surgical endoscopy/arthroscopy always includes a diagnostic endoscopy/arthroscopy.

When arthroscopy is performed in conjunction with arthrotomy, add modifier 51.

Arthroscopic removal of loose body(ies) or foreign body(ies) (ie, 29819, 29834, 29861, 29874, 29894, 29904) may be reported only when the loose body(ies) or foreign body(ies) is equal to or larger than the diameter of the arthroscopic cannula(s) used for the specific procedure, and can only be removed through a cannula larger than that used for the specific procedure or through a separate incision or through a portal that has been enlarged to allow removal of the loose or foreign body(ies).

29800 Arthroscopy, temporomandibular joint, diagnostic, with or without synovial biopsy (separate procedure)

CPT Assistant May 13:12

29804 Arthroscopy, temporomandibular joint, surgical

CPT Assistant May 13:12

(For open procedure, use 21010)

29805 Arthroscopy, shoulder, diagnostic, with or without synovial biopsy (separate procedure)

CPT Changes: An Insider's View 2002

CPT Assistant May 13:12, Jun 15:10

(For open procedure, see 23065-23066, 23100-23101)

29806 Arthroscopy, shoulder, surgical; capsulorrhaphy

CPT Changes: An Insider's View 2002
CPT Assistant May 13:12, Mar 15:7, Jul 15:10, Jun 18:11

(For open procedure, see 23450-23466)

(To report thermal capsulorrhaphy, use 29999)

29807 repair of SLAP lesion

CPT Changes: An Insider's View 2002
CPT Assistant May 13:12, Mar 15:7

29819 with removal of loose body or foreign body

CPT Changes: An Insider's View 2002
CPT Assistant May 13:12, Mar 15:7, Jun 18:11, Dec 20:8

(For open procedure, see 23040-23044, 23107)

29820 synovectomy, partial

CPT Assistant May 13:12, Jun 13:13, Mar 15:7

(For open procedure, see 23105)

29821 synovectomy, complete

CPT Assistant May 13:12, Jun 13:13, Mar 15:7

(For open procedure, see 23105)

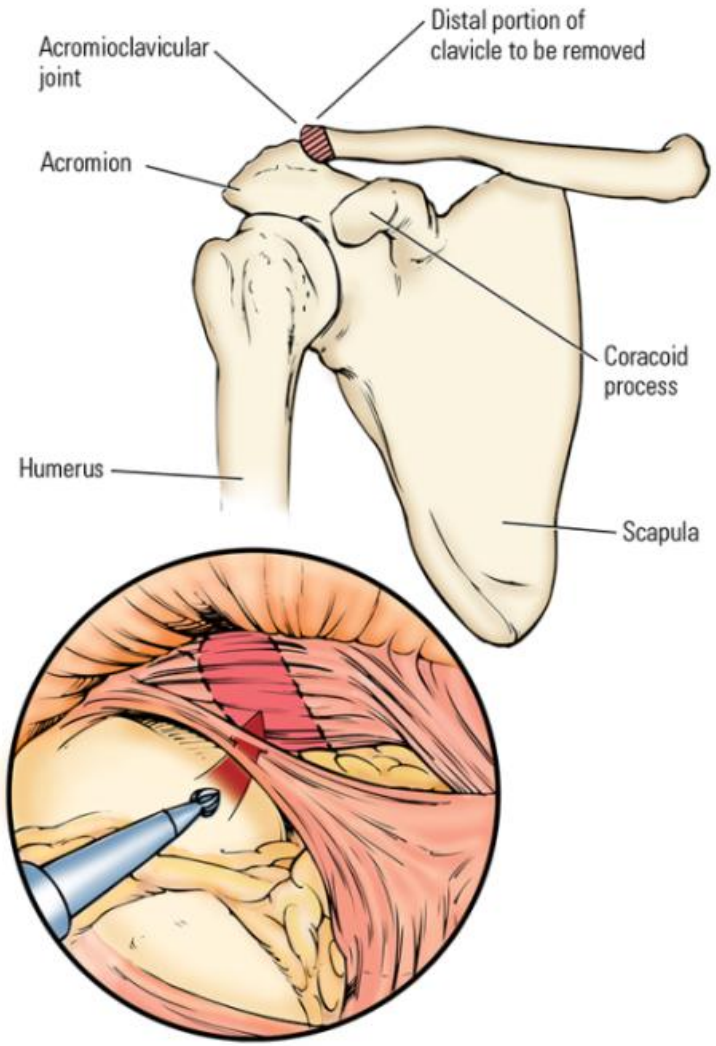
29822 debridement, limited, 1 or 2 discrete structures (eg, humeral bone, humeral articular cartilage, glenoid bone, glenoid articular cartilage, biceps tendon, biceps anchor complex, labrum, articular capsule, articular side of the rotator cuff, bursal side of the rotator cuff, subacromial bursa, foreign body[ies])

CPT Changes: An Insider's View 2021
CPT Assistant May 01:9, Apr 12:17, Sep 12:16, May 13:12, Mar 15:7, Jan 18:7, Dec 20:8, Dec 24:56

(For open procedure, see specific open shoulder procedure performed)

29823 debridement, extensive, 3 or more discrete structures (eg, humeral bone, humeral articular cartilage, glenoid bone, glenoid articular cartilage, biceps tendon, biceps anchor complex, labrum, articular capsule, articular side of the rotator cuff, bursal side of the rotator cuff, subacromial bursa, foreign body[ies])

CPT Changes: An Insider's View 2021
CPT Assistant Apr 12:17, Sep 12:16, May 13:12, Mar 15:7, Dec 16:16, Jan 18:7, Dec 20:8, Dec 24:56



(For open procedure, see specific open shoulder procedure performed)

29824 distal claviculectomy including distal articular surface (Mumford procedure)

CPT Changes: An Insider's View 2002
CPT Assistant May 13:12, Mar 15:7, Sep 23:47, May 24:17

(For open procedure, use 23120)

Arthroscopy, Shoulder, Distal Claviculectomy (Mumford Procedure)
29824

29825 with lysis and resection of adhesions, with or without manipulation

CPT Assistant May 13:12, Mar 15:7

(For open procedure, see specific open shoulder procedure performed)

+ 29826 decompression of subacromial space with partial acromioplasty, with coracoacromial ligament (ie, arch) release, when performed (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2012

CPT Assistant May 01:9, Aug 02:10, May 13:12, Mar 15:7

(For open procedure, use 23130 or 23415)

(Use 29826 in conjunction with 29806-29825, 29827, 29828)

29827 with rotator cuff repair

CPT Changes: An Insider's View 2003

CPT Assistant Mar 08:14, May 13:12, Mar 15:7, Jul 16:8, May 22:15

(For open or mini-open rotator cuff repair, use 23412)

(When arthroscopic distal clavicle resection is performed at the same setting, use 29824 and append modifier 51)

29828 biceps tenodesis

CPT Changes: An Insider's View 2008

CPT Assistant Feb 08:9, May 13:12, Mar 15:7, Jul 16:8

(Do not report 29828 in conjunction with 29805, 29820, 29822)

(For open biceps tenodesis, use 23430)

29830 Arthroscopy, elbow, diagnostic, with or without synovial biopsy (separate procedure)

CPT Assistant May 13:12

29834 Arthroscopy, elbow, surgical; with removal of loose body or foreign body

CPT Assistant May 13:12, Dec 20:8

29835 synovectomy, partial

CPT Assistant May 13:12

29836 synovectomy, complete

CPT Assistant May 13:12

29837 debridement, limited

CPT Assistant May 13:12

29838 debridement, extensive

CPT Assistant May 13:12

29840 Arthroscopy, wrist, diagnostic, with or without synovial biopsy (separate procedure)

CPT Assistant May 13:12

29843 Arthroscopy, wrist, surgical; for infection, lavage and drainage

CPT Assistant May 13:12

29844 synovectomy, partial

CPT Assistant May 13:12

29845 synovectomy, complete

CPT Assistant Dec 03:11, May 13:12

29846 excision and/or repair of triangular fibrocartilage and/or joint debridement

CPT Assistant Dec 03:11, May 13:12, Dec 24:50

29847 internal fixation for fracture or instability

CPT Assistant May 13:12

29848 Endoscopy, wrist, surgical, with release of transverse carpal ligament

CPT Assistant Dec 99:7, May 13:12, Jul 15:10, Jan 17:6, Apr 18:10

(Do not report 29848 in conjunction with 11960)

(For open procedure, use 64721)

29850 Arthroscopically aided treatment of intercondylar spine(s) and/or tuberosity fracture(s) of the knee, with or without manipulation; without internal or external fixation (includes arthroscopy)

CPT Assistant May 13:12

29851 with internal or external fixation (includes arthroscopy)

CPT Assistant May 13:12

(For bone graft, use 20900, 20902)

29855 Arthroscopically aided treatment of tibial fracture, proximal (plateau); unicondylar, includes internal fixation, when performed (includes arthroscopy)

CPT Changes: An Insider's View 2008

CPT Assistant May 13:12, Sep 18:14, Nov 19:13

29856 bicondylar, includes internal fixation, when performed (includes arthroscopy)

CPT Changes: An Insider's View 2008

CPT Assistant May 13:12

(For bone graft, use 20900, 20902)

29860 Arthroscopy, hip, diagnostic with or without synovial biopsy (separate procedure)

CPT Assistant Nov 97:15, Jul 98:8, Sep 11:6, May 13:12

29861 Arthroscopy, hip, surgical; with removal of loose body or foreign body

CPT Assistant Nov 97:15, Jul 98:8, Sep 11:5, May 13:12, Dec 20:8

29862 with debridement/shaving of articular cartilage (chondroplasty), abrasion arthroplasty, and/or resection of labrum

CPT Assistant Nov 97:15, Jul 98:8, Sep 11:5, May 13:12

29863 with synovectomy

CPT Assistant Nov 97:15, Jul 98:8, Sep 11:5, May 13:12

 # 29914 with femoroplasty (ie, treatment of cam lesion)

CPT Changes: An Insider's View 2011

CPT Assistant Sep 11:5

 # 29915 with acetabuloplasty (ie, treatment of pincer lesion)

CPT Changes: An Insider's View 2011

CPT Assistant Sep 11:5

(Do not report 29914, 29915 in conjunction with 29862, 29863)

 # 29916 with labral repair

CPT Changes: An Insider's View 2011

CPT Assistant Sep 11:5

(Do not report 29916 in conjunction with 29915, 29862, 29863)

29866 Arthroscopy, knee, surgical; osteochondral autograft(s) (eg, mosaicplasty) (includes harvesting of the autograft[s])

CPT Changes: An Insider's View 2005, 2008

CPT Assistant May 13:12

(Do not report 29866 in conjunction with 29870, 29871, 29875, 29884 when performed at the same session and/or 29874, 29877, 29879, 29885-29887 when performed in the same compartment)

(For open osteochondral autograft of knee, use 27416)

29867 osteochondral allograft (eg, mosaicplasty)

CPT Changes: An Insider's View 2005

CPT Assistant May 13:12

(Do not report 29867 in conjunction with 27570, 29870, 29871, 29875, 29884 when performed at the same session and/or 29874, 29877, 29879, 29885-29887 when performed in the same compartment)

(Do not report 29867 in conjunction with 27415)

29868 meniscal transplantation (includes arthrotomy for meniscal insertion), medial or lateral

CPT Changes: An Insider's View 2005

CPT Assistant May 13:12

(Do not report 29868 in conjunction with 29870, 29871, 29875, 29880, 29883, 29884 when performed at the same session or 29874, 29877, 29881, 29882 when performed in the same compartment)

29870 Arthroscopy, knee, diagnostic, with or without synovial biopsy (separate procedure)

CPT Assistant Dec 07:10, Mar 11:9, May 13:12, Nov 19:14

(For open autologous chondrocyte implantation of the knee, use 27412)

29871 Arthroscopy, knee, surgical; for infection, lavage and drainage

CPT Assistant Aug 01:6, May 13:12, Aug 19:7, Oct 24:9

(Do not report 29871 in conjunction with 27369)

(For implantation of osteochondral graft for treatment of articular surface defect, see 27412, 27415, 29866, 29867)

29873 with lateral release

CPT Changes: An Insider's View 2003

CPT Assistant Dec 07:10, Aug 09:11, May 13:12, Nov 15:7

(For open lateral release, use 27425)

29874 for removal of loose body or foreign body (eg, osteochondritis dissecans fragmentation, chondral fragmentation)

CPT Assistant Aug 01:6, Apr 03:12, May 13:12, Dec 20:8

29875 synovectomy, limited (eg, plica or shelf resection) (separate procedure)

CPT Assistant Aug 01:6, May 13:12, May 14:10, Jan 16:11, Aug 21:14

29876 synovectomy, major, 2 or more compartments (eg, medial or lateral)

CPT Assistant Aug 01:6, May 13:12, Aug 21:14

29877 debridement/shaving of articular cartilage (chondroplasty)

CPT Assistant Feb 96:9, Jun 99:11, Aug 01:7, Apr 03:7, Apr 05:14, Dec 07:10, May 13:12, May 20:13, Jun 21:12

(When performed with arthroscopic meniscectomy, see 29880 or 29881)

29879 abrasion arthroplasty (includes chondroplasty where necessary) or multiple drilling or microfracture

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:13, Aug 01:7, May 13:12

29880 with meniscectomy (medial AND lateral, including any meniscal shaving) including debridement/shaving of articular cartilage (chondroplasty), same or separate compartment(s), when performed

CPT Changes: An Insider's View 2012

CPT Assistant Jun 99:11, Aug 01:7, Jan 12:3, May 13:12

29881 with meniscectomy (medial OR lateral, including any meniscal shaving) including debridement/shaving of articular cartilage (chondroplasty), same or separate compartment(s), when performed

CPT Changes: An Insider's View 2012

CPT Assistant Feb 96:9, Jun 99:11, Aug 01:7, Oct 03:11, Apr 05:14, Dec 07:10, Jan 12:3, May 13:12, May 14:10, Jan 16:11, Nov 19:14, May 20:13, Sep 20:14, Jun 21:12

29882 with meniscus repair (medial OR lateral)

CPT Assistant Aug 01:7, Sep 04:12, Dec 07:10, Dec 11:15, May 13:12, May 19:10, Mar 25:16

29883 with meniscus repair (medial AND lateral)

CPT Assistant Aug 01:7, Sep 04:12, Dec 07:10, Dec 11:15, May 13:12

(For meniscal transplantation, medial or lateral, knee, use 29868)

29884 with lysis of adhesions, with or without manipulation (separate procedure)

CPT Assistant Aug 01:7, Mar 11:9, May 13:12

29885 drilling for osteochondritis dissecans with bone grafting, with or without internal fixation (including debridement of base of lesion)

CPT Assistant Aug 01:7, May 13:12

29886 drilling for intact osteochondritis dissecans lesion

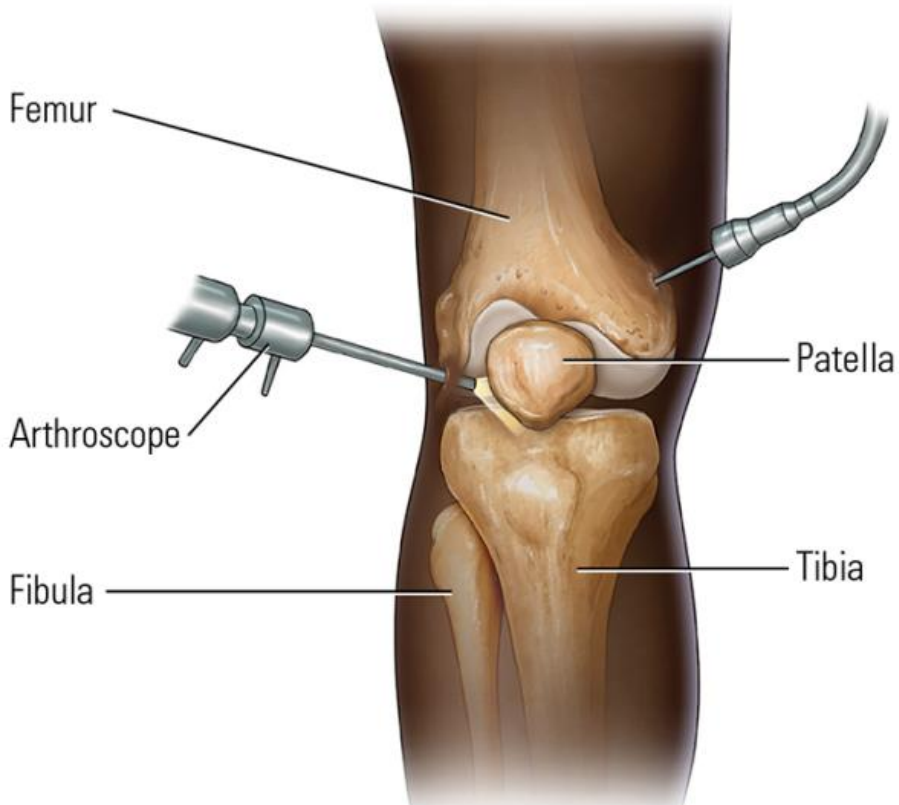
CPT Assistant Aug 01:12, May 13:12

29887 drilling for intact osteochondritis dissecans lesion with internal fixation

CPT Assistant Aug 01:12, May 13:12

29888 Arthroscopically aided anterior cruciate ligament repair/augmentation or reconstruction

CPT Assistant Oct 03:11, Dec 07:10, May 13:12, Nov 16:9, May 17:10



29889 Arthroscopically aided posterior cruciate ligament repair/augmentation or reconstruction

CPT Assistant Sep 96:9, Oct 98:11, Aug 01:8, Dec 07:10, May 13:12

Arthroscopy of the Knee

29866-29887

Portal incisions are made on either side of the patellar tendon and compartments of the knee are examined using the arthroscope and a probe. Additional treatment is performed as needed.

29891 Arthroscopy, ankle, surgical, excision of osteochondral defect of talus and/or tibia, including drilling of the defect

CPT Assistant Nov 97:15, May 13:12

29892 Arthroscopically aided repair of large osteochondritis dissecans lesion, talar dome fracture, or tibial plafond fracture, with or without internal fixation (includes arthroscopy)

CPT Assistant Nov 97:15, Dec 08:6, May 13:12

29893 Endoscopic plantar fasciotomy

CPT Assistant Nov 97:15, May 13:12

29894 Arthroscopy, ankle (tibiotalar and fibulotalar joints), surgical; with removal of loose body or foreign body

CPT Assistant May 13:12, Dec 20:8

29895 synovectomy, partial

CPT Assistant May 13:12

29897 debridement, limited

CPT Assistant May 13:12, Dec 24:56

29898 debridement, extensive

CPT Assistant May 13:12, Dec 24:56

29899 with ankle arthrodesis

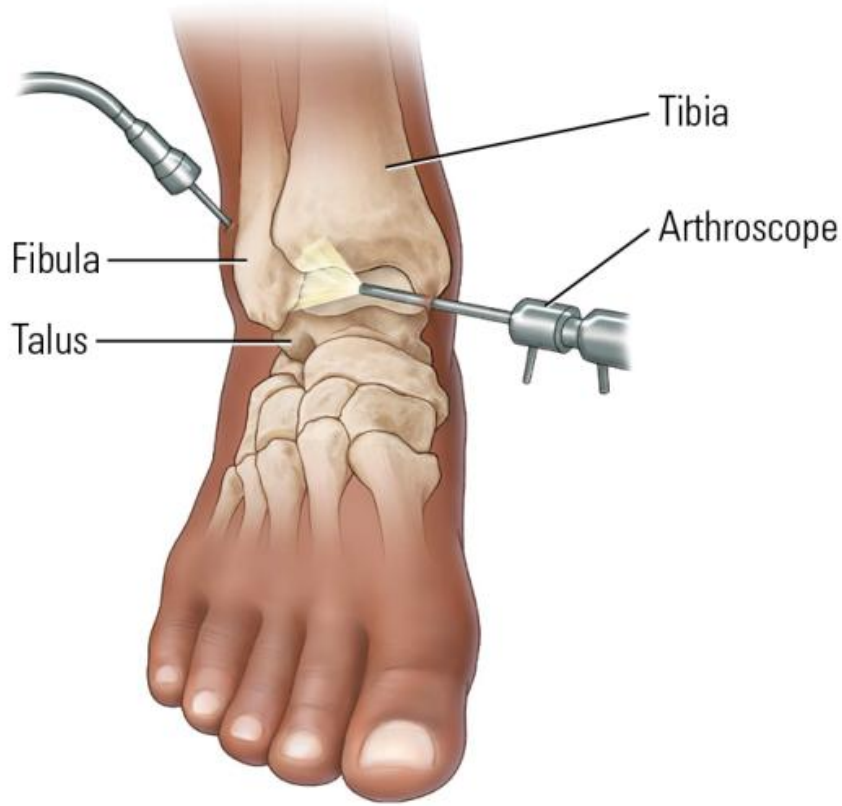
CPT Changes: An Insider's View 2003

CPT Assistant May 13:12

(For open ankle arthrodesis, use 27870)

29900 Arthroscopy, metacarpophalangeal joint, diagnostic, includes synovial biopsy

CPT Changes: An Insider's View 2002



CPT Assistant May 13:12

(Do not report 29900 with 29901, 29902)

Arthroscopy of the Ankle

29894-29899

Incisions are made allowing the ankle to be examined using the arthroscope and a probe. Additional treatment is performed as needed.

29901 Arthroscopy, metacarpophalangeal joint, surgical; with debridement

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* May 13:12

29902 with reduction of displaced ulnar collateral ligament (eg, Stener lesion)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* May 13:12

29904 Arthroscopy, subtalar joint, surgical; with removal of loose body or foreign body

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* May 13:12, Dec 20:8

29905 with synovectomy

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* May 13:12

29906 with debridement

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* May 13:12

29907 with subtalar arthrodesis

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* May 13:12

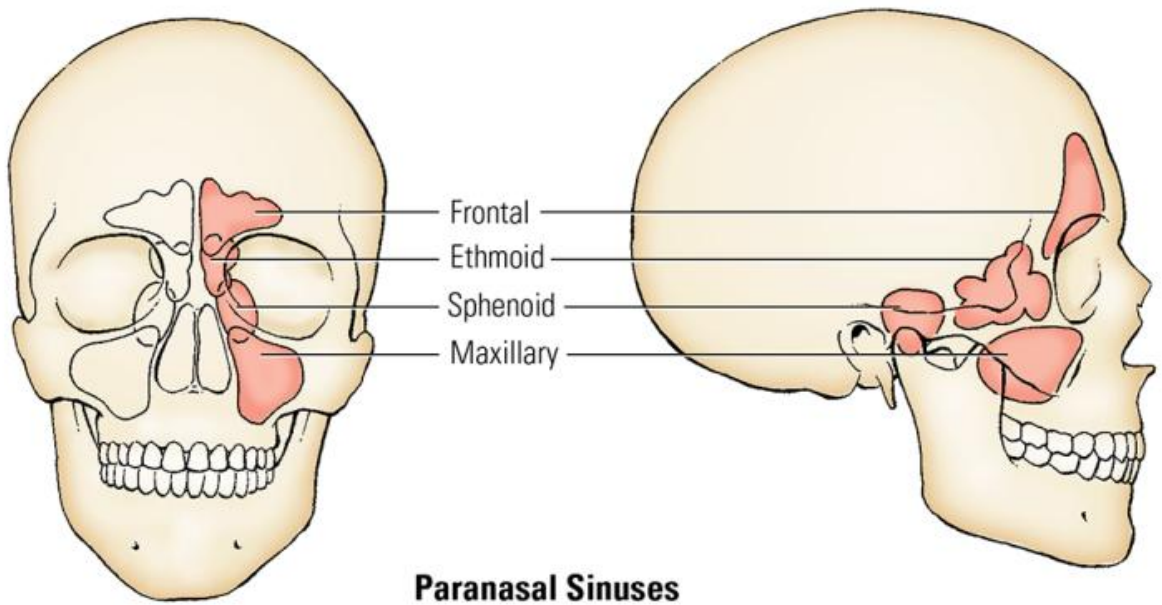
29914 Code is out of numerical sequence. See 29862-29867

29915 Code is out of numerical sequence. See 29862-29867

29916 Code is out of numerical sequence. See 29862-29867

29999 Unlisted procedure, arthroscopy

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Aug 02:10, Sep 04:12, Nov 08:10, Mar 09:10, Dec 11:15, Apr 12:17, May 13:12, Dec 15:18, Dec 16:16, Apr 17:9, Nov 19:13, Dec 19:12, Dec 23:38



Surgery

Respiratory System (30000-32999)

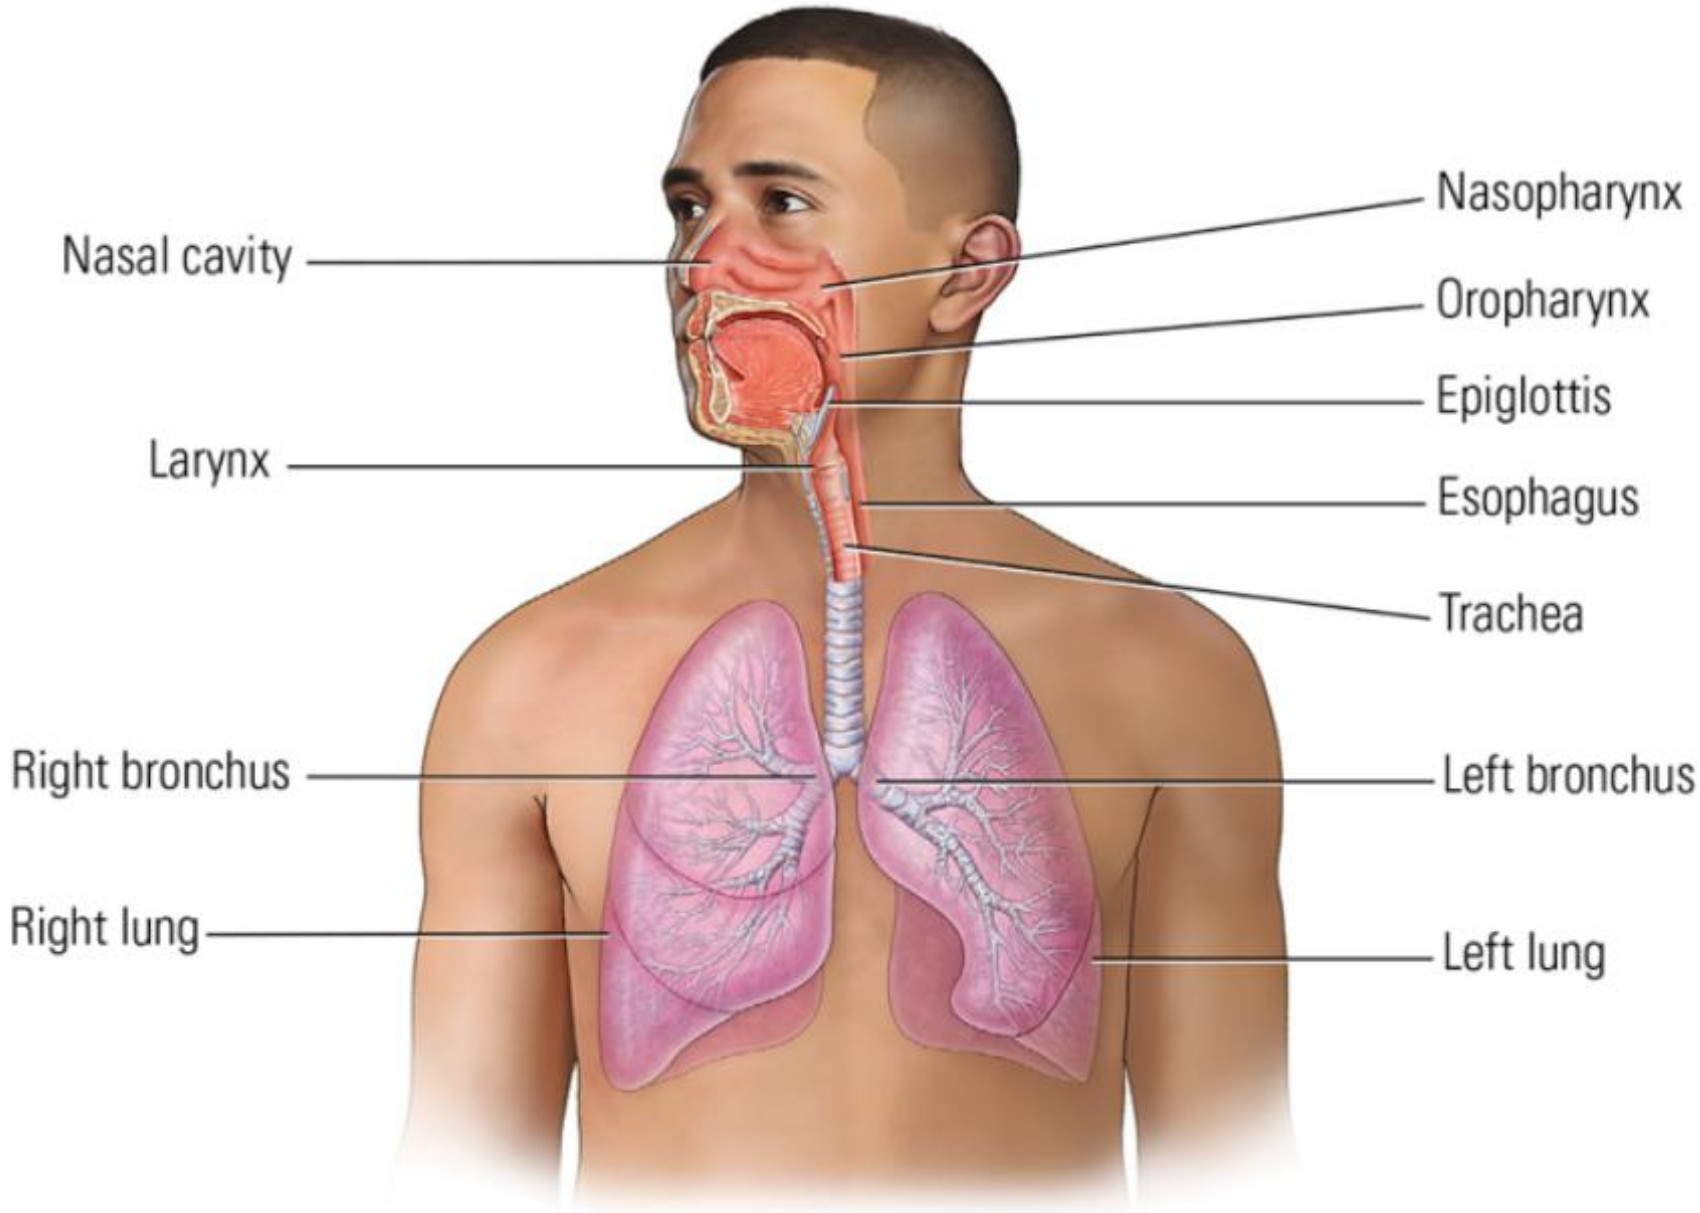
The following is a listing of headings and subheadings that appear within the Respiratory System section of the CPT codebook. The subheadings or subsections denoted with asterisks (*) below have special instructions unique to that subsection. Where these are indicated, special notes or guidelines will be presented preceding those procedural terminology listings, referring to that subsection specifically. Note that all code ranges in each subsection are listed as they appear in the subsection, even if the code numbers are out of numerical sequence and/or repeated in the next subsection.

Nose (30000-30999)
- Incision (30000-30020)
- Excision (30100-30160)
- Introduction (30200-30220)
- Removal of Foreign Body (30300-30320)
- Repair (30400-30630)
- Destruction (30801-30802)
- Other Procedures (30901-30999)

Accessory Sinuses (31000-31299)
- Incision (31000-31090)
- Excision (31200-31230)
- Endoscopy* (31231-31298)
- Other Procedures (31299)

Paranasal Sinuses

Larynx (31300-31599)



- Excision (31300-31420)
- Introduction (31500-31502)
- Endoscopy* (31505-31579)
- Repair (31580-31592)
- Other Procedures (31599)

Trachea and Bronchi (31600-31899)

- Incision (31600-31614)
- Endoscopy* (31615-31654)
- Bronchial Thermoplasty (31660-31661)
- Introduction (31717-31730)
- Excision, Repair (31750-31830)
- Other Procedures (31899)

Lungs and Pleura* (32035-32999)

- Incision (32035-32225)
- Excision/Resection (32310-32408)
- Removal (32440-32540)
- Introduction and Removal (32550-32557)
- Destruction* (32560-32562)
- Thoracoscopy (Video-assisted thoracic surgery [VATS])* (32601-32674)
- Stereotactic Radiation Therapy* (32701)
- Repair (32800-32820)
- Lung Transplantation* (32850-32856)
- Surgical Collapse Therapy; Thoracoplasty (32900-32960)
- Other Procedures (32997-32999)

Respiratory System

Respiratory System

Nose

Incision

30000 Drainage abscess or hematoma, nasal, internal approach

(For external approach, see 10060, 10140)

30020 Drainage abscess or hematoma, nasal septum

(For lateral rhinotomy, see specific application [eg, 30118, 30320])

Excision

30100 Biopsy, intranasal

(For biopsy skin of nose, see 11102, 11103, 11104, 11105, 11106, 11107)

30110 Excision, nasal polyp(s), simple

(30110 would normally be completed in an office setting)

(To report bilateral procedure, use 30110 with modifier 50)

30115 Excision, nasal polyp(s), extensive

(30115 would normally require the facilities available in a hospital setting)

(To report bilateral procedure, use 30115 with modifier 50)

30117 Excision or destruction (eg, laser), intranasal lesion; internal approach

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Jul 19:10, Nov 19:14, Sep 20:14, Jan 22:18, Feb 23:6, Dec 23:23

30118 external approach (lateral rhinotomy)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Dec 23:23

(For surgical nasal/sinus endoscopy with destruction by radiofrequency ablation of posterior nasal nerve, use 31242)

(For surgical nasal/sinus endoscopy with destruction by cryoablation of posterior nasal nerve, use 31243)

30120 Excision or surgical planing of skin of nose for rhinophyma

- *CPT Assistant* May 07:9

30124 Excision dermoid cyst, nose; simple, skin, subcutaneous

30125 complex, under bone or cartilage

30130 Excision inferior turbinate, partial or complete, any method

CPT Changes: An Insider's View 2006

CPT Assistant Feb 98:11, Nov 98:11, Sep 01:10, May 03:5

(For excision of superior or middle turbinate, use 30999)

30140 Submucous resection inferior turbinate, partial or complete, any method

CPT Changes: An Insider's View 2006

CPT Assistant Nov 98:11, Dec 02:10, Apr 03:26, May 03:5, Dec 04:18, Mar 08:14, Jan 20:12

(Do not report 30130 or 30140 in conjunction with 30801, 30802, 30930)

(For submucous resection of superior or middle turbinate, use 30999)

(For endoscopic resection of concha bullosa of middle turbinate, use 31240)

(For submucous resection of nasal septum, use 30520)

30150 Rhinectomy; partial

30160 total

(For closure and/or reconstruction, primary or delayed, see **Integumentary System,** 13151-13160, 14060-14302, 15120, 15121, 15260, 15261, 15760, 20900-20912)

Introduction

30200 Injection into turbinate(s), therapeutic

CPT Assistant Dec 04:19

30210 Displacement therapy (Proetz type)

30220 Insertion, nasal septal prosthesis (button)

Removal of Foreign Body

30300 Removal foreign body, intranasal; office type procedure

CPT Assistant Jan 12:13

30310 requiring general anesthesia

30320 by lateral rhinotomy

Repair

(For obtaining tissues for graft, see 15769, 20900, 20902, 20910, 20912, 20920, 20922, 20924, 21210)

(For correction of nasal defects using fat harvested via liposuction technique, see 15773, 15774)

30400 Rhinoplasty, primary; lateral and alar cartilages and/or elevation of nasal tip

(For columellar reconstruction, see 13151 et seq)

30410 complete, external parts including bony pyramid, lateral and alar cartilages, and/or elevation of nasal tip

CPT Assistant Jan 21:13

30420 including major septal repair

CPT Assistant Jul 16:8

30430 Rhinoplasty, secondary; minor revision (small amount of nasal tip work)

30435 intermediate revision (bony work with osteotomies)

30450 major revision (nasal tip work and osteotomies)

30460 Rhinoplasty for nasal deformity secondary to congenital cleft lip and/or palate, including columellar lengthening; tip only

CPT Assistant Dec 14:18

30462 tip, septum, osteotomies

CPT Assistant Dec 14:18

30465 Repair of nasal vestibular stenosis (eg, spreader grafting, lateral nasal wall reconstruction)

CPT Changes: An Insider's View 2001

CPT Assistant Sep 20:14, Feb 23:6, Mar 24:26

(Do not report 30465 in conjunction with 30468, 30469, when performed on the ipsilateral side)

(30465 excludes obtaining graft. For graft procedure, see 15769, 20900, 20902, 20910, 20912, 20920, 20922, 20924, 21210, 21235)

(For repair of nasal vestibular lateral wall collapse with subcutaneous/submucosal lateral wall implant[s], use 30468)

(For repair of nasal valve collapse with low energy, temperature-controlled [ie, radiofrequency] subcutaneous/submucosal remodeling, use 30469)

(30465 is used to report a bilateral procedure. For unilateral procedure, use modifier 52)

30468 Repair of nasal valve collapse with subcutaneous/submucosal lateral wall implant(s)

CPT Changes: An Insider's View 2021

CPT Assistant Feb 23:6, Mar 24:26

(Do not report 30468 in conjunction with 30465, 30469, when performed on the ipsilateral side)

(For repair of nasal vestibular stenosis [eg, spreader grafting, lateral nasal wall reconstruction], use 30465)

(For repair of nasal vestibular stenosis or collapse without cartilage graft, lateral wall reconstruction, or subcutaneous/submucosal implant [eg, lateral wall suspension, or stenting without graft or subcutaneous/submucosal implant], use 30999)

(30468 is used to report a bilateral procedure. For unilateral procedure, use modifier 52)

30469 Repair of nasal valve collapse with low energy, temperature-controlled (ie, radiofrequency) subcutaneous/submucosal remodeling

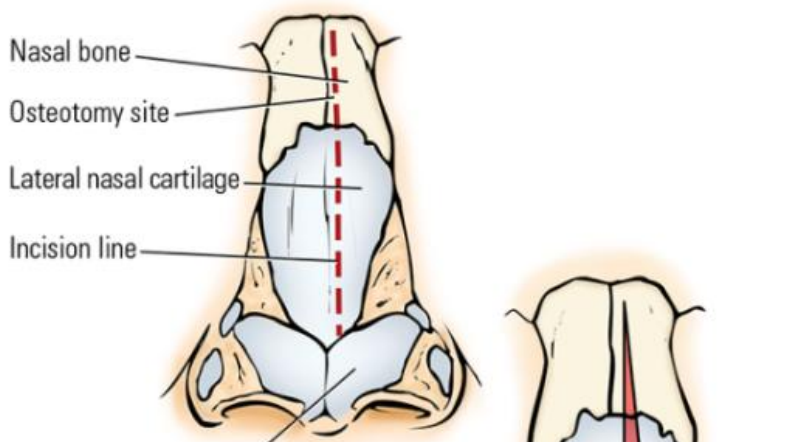
CPT Changes: An Insider's View 2023

CPT Assistant Feb 23:6

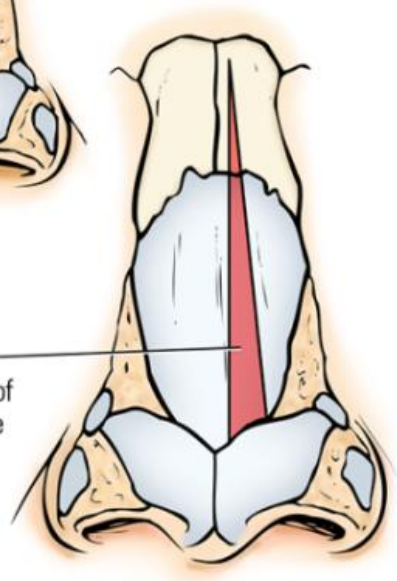
(Do not report 30469 in conjunction with 30465, 30468, when performed on the ipsilateral side)

(For repair of nasal vestibular stenosis [eg, spreader grafting, lateral nasal wall reconstruction], use 30465)

(For repair of nasal vestibular lateral wall collapse with subcutaneous/submucosal lateral wall implant[s], use 30468)



(For repair of nasal vestibular stenosis or collapse without cartilage graft, lateral wall reconstruction, or subcutaneous/submucosal implant [eg, lateral wall suspension or stenting without graft or subcutaneous/submucosal implant], use 30999)



(30469 is used to report a bilateral procedure. For unilateral procedure, use modifier 52)

Surgical Repair of Vestibular Stenosis

30465

An incision is made in the upper lateral cartilage and continued as an osteotomy of the medial aspect of the nasal bones. The spreader graft is placed to widen the nasal vestibule.

30520 Septoplasty or submucous resection, with or without cartilage scoring, contouring or replacement with graft

CPT Assistant Oct 97:11, Dec 02:10, Mar 12:9, Jul 15:10, Jul 19:10, Jan 21:13, Feb 23:6, Jul 23:15

(For submucous resection of turbinates, use 30140)

30540 Repair choanal atresia; intranasal

30545 transpalatine

(Do not report modifier 63 in conjunction with 30540, 30545)

30560 Lysis intranasal synechia

30580 Repair fistula; oromaxillary (combine with 31030 if antrotomy is included)

30600 oronasal

30620 Septal or other intranasal dermatoplasty (does not include obtaining graft)

30630 Repair nasal septal perforations

CPT Assistant Aug 12:13

Destruction

30801 Ablation, soft tissue of inferior turbinates, unilateral or bilateral, any method (eg, electrocautery, radiofrequency ablation, or tissue volume reduction); superficial

CPT Changes: An Insider's View 2002, 2006, 2010

CPT Assistant Jul 19:10

(For ablation of superior or middle turbinates, use 30999)

30802 intramural (ie, submucosal)

CPT Changes: An Insider's View 2010

CPT Assistant Mar 08:14, Sep 10:10, Jul 19:10, Feb 23:6

(Do not report 30801 in conjunction with 30802)

(Do not report 30801, 30802, 30930 in conjunction with 30130 or 30140)

(For cautery performed for control of nasal hemorrhage, see 30901-30906)

Other Procedures

30901 Control nasal hemorrhage, anterior, simple (limited cautery and/or packing) any method
- *CPT Assistant* Jul 20:13, Oct 20:13

(To report bilateral procedure, use 30901 with modifier 50)

30903 Control nasal hemorrhage, anterior, complex (extensive cautery and/or packing) any method

(To report bilateral procedure, use 30903 with modifier 50)

30905 Control nasal hemorrhage, posterior, with posterior nasal packs and/or cautery, any method; initial
- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Sep 10:7

30906 subsequent

30915 Ligation arteries; ethmoidal

30920 internal maxillary artery, transantral

(For ligation external carotid artery, use 37600)

30930 Fracture nasal inferior turbinate(s), therapeutic
- *CPT Changes: An Insider's View* 2006
- *CPT Assistant* Jul 01:11, Dec 02:10, Jul 03:15, Aug 03:14, Dec 04:18, Sep 10:10, Jul 16:8

(Do not report 30801, 30802, 30930 in conjunction with 30130 or 30140)

(For fracture of superior or middle turbinate[s], use 30999)

30999 Unlisted procedure, nose
- *CPT Assistant* Feb 13:13, Nov 19:14, Sep 20:14, Jan 21:13, Jan 22:18, Feb 23:6

Accessory Sinuses

Incision

31000 Lavage by cannulation; maxillary sinus (antrum puncture or natural ostium)
- *CPT Assistant* Apr 14:10

(To report bilateral procedure, use 31000 with modifier 50)

31002 sphenoid sinus

31020 Sinusotomy, maxillary (antrotomy); intranasal

(To report bilateral procedure, use 31020 with modifier 50)

31030 radical (Caldwell-Luc) without removal of antrochoanal polyps

(To report bilateral procedure, use 31030 with modifier 50)

31032 radical (Caldwell-Luc) with removal of antrochoanal polyps

(To report bilateral procedure, use 31032 with modifier 50)

31040 Pterygomaxillary fossa surgery, any approach

(For transantral ligation of internal maxillary artery, use 30920)

31050 Sinusotomy, sphenoid, with or without biopsy;

31051 with mucosal stripping or removal of polyp(s)

31070 Sinusotomy frontal; external, simple (trephine operation)

(For frontal intranasal sinusotomy, use 31276)

31075 transorbital, unilateral (for mucocele or osteoma, Lynch type)

31080 obliterative without osteoplastic flap, brow incision (includes ablation)

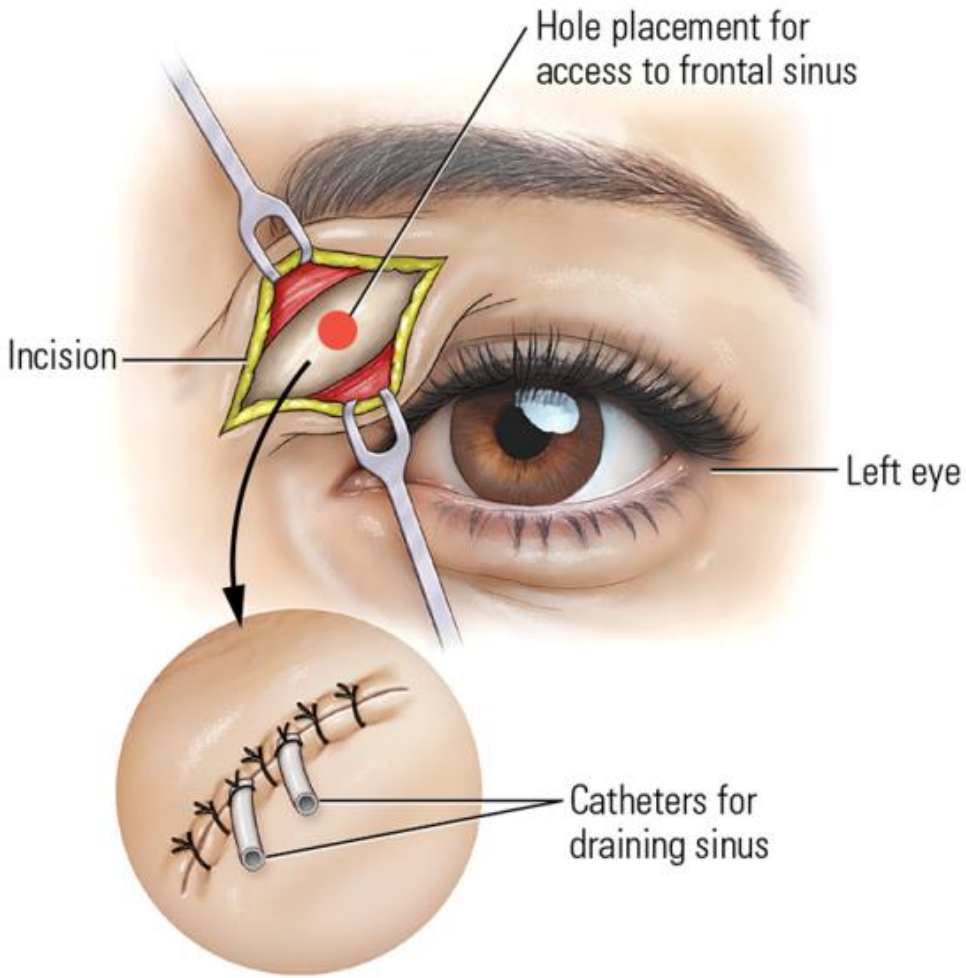
31081 obliterative, without osteoplastic flap, coronal incision (includes ablation)

31084 obliterative, with osteoplastic flap, brow incision

31085 obliterative, with osteoplastic flap, coronal incision

31086 nonobliterative, with osteoplastic flap, brow incision

31087 nonobliterative, with osteoplastic flap, coronal incision



31090 Sinusotomy, unilateral, 3 or more paranasal sinuses (frontal, maxillary, ethmoid, sphenoid)

CPT Assistant Nov 97:15, Nov 98:11

Sinusotomy, Frontal

31070

A trephine is used to access the frontal sinus.

Excision

31200 Ethmoidectomy; intranasal, anterior
- *CPT Assistant* Feb 16:10

31201 intranasal, total
- *CPT Assistant* Feb 16:10

31205 extranasal, total
- *CPT Assistant* Feb 16:10

31225 Maxillectomy; without orbital exenteration

31230 with orbital exenteration (en bloc)

(For orbital exenteration only, see 65110 et seq)

(For skin grafts, see 15120 et seq)

Endoscopy

A surgical sinus endoscopy includes a sinusotomy (when appropriate) and diagnostic endoscopy.

Codes 31295-31298 describe dilation of sinus ostia by displacement of tissue, any method, and include fluoroscopy if performed.

Stereotactic computer-assisted navigation may be used to facilitate the performance of endoscopic sinus surgery, and may be reported with 61782.

Codes 31233-31298 are used to report unilateral procedures unless otherwise specified.

Codes 31231-31235 for diagnostic evaluation refer to employing a nasal/sinus endoscope to inspect the interior of the nasal cavity and the middle and superior meatus, the turbinates, and the spheno-ethmoid recess. Any time a diagnostic evaluation is performed all these areas would be inspected and a separate code is not reported for each area. To report these services when all of the elements are not fully examined (eg, judged not clinically pertinent), or because the clinical situation precludes such exam (eg, technically unable, altered anatomy), append modifier 52 if repeat examination is not planned, or modifier 53 if repeat examination is planned.

31231 Nasal endoscopy, diagnostic, unilateral or bilateral (separate procedure)
- *CPT Assistant* Winter 93:22, Jan 97:4, Feb 16:10, Jan 17:6, Apr 18:3, Apr 21:12, Jul 21:3, Dec 23:23, May 24:21

31233 Nasal/sinus endoscopy, diagnostic; with maxillary sinusoscopy (via inferior meatus or canine fossa puncture)
- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Winter 93:22, Jan 97:4, Jun 11:11, Apr 18:3

(Do not report 31233 in conjunction with 31256, 31267, 31295, when performed on the ipsilateral side)

31235 with sphenoid sinusoscopy (via puncture of sphenoidal face or cannulation of ostium)
- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Winter 93:22, Jan 97:4, Apr 18:3

(Do not report 31235 in conjunction with 31257, 31259, 31287, 31288, 31297, 31298, when performed on the ipsilateral side)

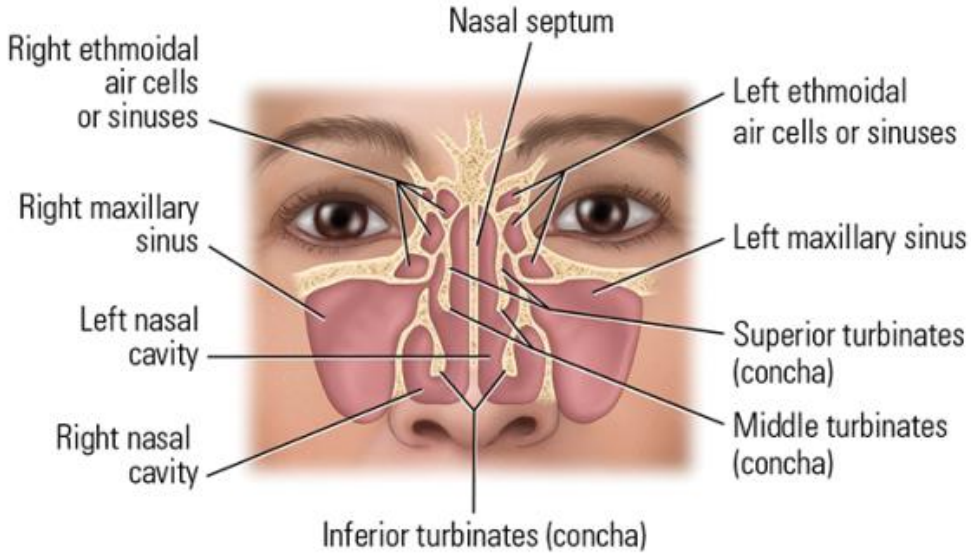
(To report endoscopic placement of a drug-eluting implant in the ethmoid sinus without any other nasal/sinus endoscopic surgical service, use 31299. To report endoscopic placement of a drug-eluting implant in the ethmoid sinus in conjunction with biopsy, polypectomy, or debridement, use 31237)

31237 Nasal/sinus endoscopy, surgical; with biopsy, polypectomy or debridement (separate procedure)
- *CPT Assistant* Winter 93:23, Jan 97:4, Dec 01:6, May 03:5, Dec 11:13, Jan 15:13, Feb 16:10, Apr 18:3, Apr 19:10, Jul 19:7, Jan 20:12, Jul 21:3, Nov 21:13, Feb 23:6, Jul 23:15

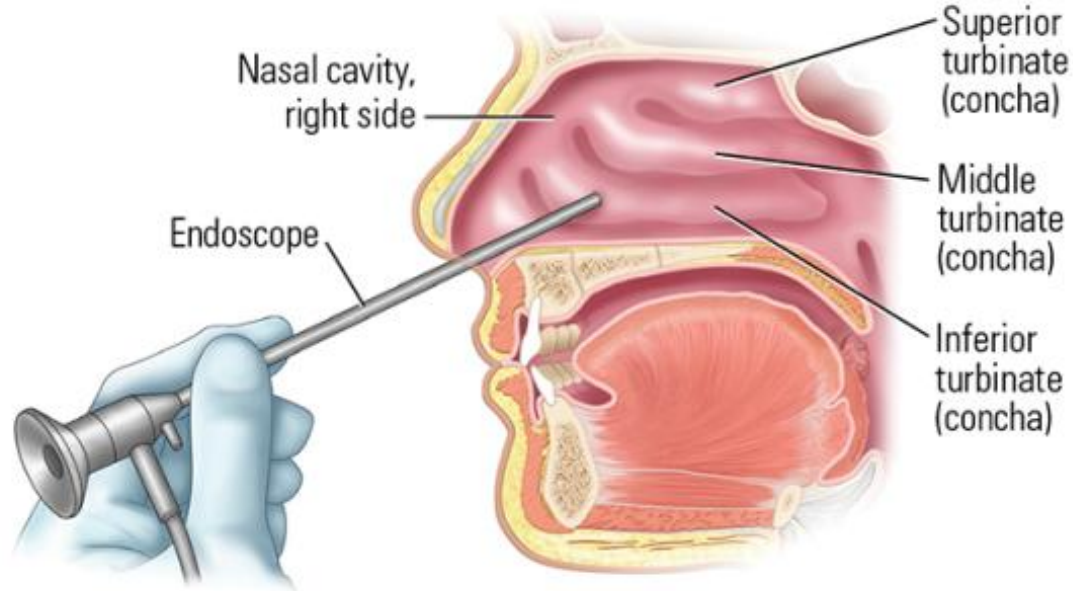
(Do not report 31237 in conjunction with 31238, 31253, 31254, 31255, 31256, 31257, 31259, 31267, 31276, 31287, 31288, 31290, 31291, 31292, 31293, 31294, when performed on the ipsilateral side)

 # 31242 with destruction by radiofrequency ablation, posterior nasal nerve
- *CPT Changes: An Insider's View* 2024
- *CPT Assistant* Dec 23:39, Dec 23:23

 # 31243 with destruction by cryoablation, posterior nasal nerve
- *CPT Changes: An Insider's View* 2024
- *CPT Assistant* Dec 23:23



(Do not report 31242, 31243 in conjunction with 31231, 92511)



(31242, 31243 are used to report bilateral procedures. For unilateral procedure, use modifier 52)

Sinus Endoscopy

31231-31294

The physician uses an endoscope for visualizing and magnifying the internal structure of the sinuses.

31238 with control of nasal hemorrhage

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Winter 93:23, Jan 97:4, Apr 18:3

(Do not report 31238 in conjunction with 31237, 31241, when performed on the ipsilateral side)

31239 with dacryocystorhinostomy

- *CPT Assistant* Winter 93:23, Jan 97:4, Apr 18:3

31240 with concha bullosa resection

- *CPT Assistant* Winter 93:23, Jan 97:4, May 03:5, Feb 16:10, Apr 18:3

31241 with ligation of sphenopalatine artery

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Apr 18:3

(Do not report 31241 in conjunction with 31238, when performed on the ipsilateral side)

31242 Code is out of numerical sequence. See 31235-31239

31243 Code is out of numerical sequence. See 31235-31239

31253 Code is out of numerical sequence. See 31254-31267

31254 Nasal/sinus endoscopy, surgical with ethmoidectomy; partial (anterior)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Winter 93:23, Jan 97:4, Sep 97:10, Oct 97:5, Dec 01:6, May 03:5, Jul 11:13, Feb 16:10, Apr 18:3

(Do not report 31254 in conjunction with 31237, 31253, 31255, 31257, 31259, 31290, 31291, 31292, 31293, 31294, when performed on the ipsilateral side)

31255 total (anterior and posterior)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Winter 93:23, Jan 97:4, Dec 02:10, May 03:5, Jul 11:13, Feb 16:10, Apr 18:4

(Do not report 31255 in conjunction with 31237, 31253, 31254, 31257, 31259, 31276, 31287, 31288, 31290, 31291, 31292, 31293, 31294, when performed on the ipsilateral side)

 # 31253 total (anterior and posterior), including frontal sinus exploration, with removal of tissue from frontal sinus, when performed

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Apr 18:4, Apr 19:10, Dec 21:19

(Do not report 31253 in conjunction with 31237, 31254, 31255, 31276, 31290, 31291, 31292, 31293, 31294, 31296, 31298, when performed on the ipsilateral side)

 # 31257 total (anterior and posterior), including sphenoidotomy

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Apr 18:4, Apr 19:10

(Do not report 31257 in conjunction with 31235, 31237, 31254, 31255, 31259, 31287, 31288, 31290, 31291, 31292, 31293, 31294, 31297, 31298, when performed on the ipsilateral side)

 # 31259 total (anterior and posterior), including sphenoidotomy, with removal of tissue from the sphenoid sinus

CPT Changes: An Insider's View 2018

CPT Assistant Apr 18:3, Apr 19:10, Dec 21:19

(Do not report 31259 in conjunction with 31235, 31237, 31254, 31255, 31257, 31287, 31288, 31290, 31291, 31292, 31293, 31294, 31297, 31298, when performed on the ipsilateral side)

31256 Nasal/sinus endoscopy, surgical, with maxillary antrostomy;

CPT Assistant Winter 93:23, Jan 97:4, Jun 11:11, Jul 11:13, Jun 13:13, Apr 18:11, Apr 19:10

(Do not report 31256 in conjunction with 31233, 31237, 31267, 31295, when performed on the ipsilateral side)

31257 Code is out of numerical sequence. See 31254-31267

31259 Code is out of numerical sequence. See 31254-31267

31267 with removal of tissue from maxillary sinus

CPT Assistant Jan 97:4, Dec 01:6, Jun 11:11, Jul 11:13, Apr 18:3, Apr 19:10

(Do not report 31267 in conjunction with 31233, 31237, 31256, 31295, when performed on the ipsilateral side)

31276 Nasal/sinus endoscopy, surgical, with frontal sinus exploration, including removal of tissue from frontal sinus, when performed

CPT Changes: An Insider's View 2018

CPT Assistant Winter 93:24, Jan 97:4, Jan 10:11, Jun 11:13, Apr 18:4, Apr 19:10, Dec 21:19

(Do not report 31276 in conjunction with 31237, 31253, 31255, 31296, 31298, when performed on the ipsilateral side)

31287 Nasal/sinus endoscopy, surgical, with sphenoidotomy;

CPT Assistant Winter 93:24, Jan 97:4, Jun 11:11, Apr 18:3, Apr 19:10

(Do not report 31287 in conjunction with 31235, 31237, 31255, 31257, 31259, 31288, 31291, 31294, 31297, 31298, when performed on the ipsilateral side)

31288 with removal of tissue from the sphenoid sinus

CPT Assistant Winter 93:24, Jan 97:4, Jun 11:11, Feb 16:10, Apr 18:3, Apr 19:10

(Do not report 31288 in conjunction with 31235, 31237, 31255, 31257, 31259, 31287, 31291, 31294, 31297, 31298, when performed on the ipsilateral side)

31290 Nasal/sinus endoscopy, surgical, with repair of cerebrospinal fluid leak; ethmoid region

CPT Assistant Winter 93:24, Jan 97:4, Jul 11:13, Feb 16:10, Apr 18:3

(Do not report 31290 in conjunction with 31237, 31253, 31254, 31255, 31257, 31259, when performed on the ipsilateral side)

31291 sphenoid region

CPT Assistant Winter 93:24, Jan 97:4, Jul 11:13, Apr 18:3

(Do not report 31291 in conjunction with 31237, 31253, 31254, 31255, 31257, 31259, 31287, 31288, when performed on the ipsilateral side)

31292 Nasal/sinus endoscopy, surgical, with orbital decompression; medial or inferior wall

CPT Changes: An Insider's View 2020

CPT Assistant Winter 93:24, Jan 97:4, Jul 11:3, Apr 18:3

(Do not report 31292 in conjunction with 31237, 31253, 31254, 31255, 31257, 31259, 31293, 31296, when performed on the ipsilateral side)

31293 medial and inferior wall

- *CPT Changes: An Insider's View* 2020

(Do not report 31293 in conjunction with 31237, 31253, 31254, 31255, 31257, 31259, 31292, when performed on the ipsilateral side)

31294 Nasal/sinus endoscopy, surgical, with optic nerve decompression

- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Winter 93:24, Jan 97:4, Jul 11:13, Apr 18:3

(Do not report 31294 in conjunction with 31237, 31253, 31254, 31255, 31257, 31259, 31287, 31288, when performed on the ipsilateral side)

31295 Nasal/sinus endoscopy, surgical, with dilation (eg, balloon dilation); maxillary sinus ostium, transnasal or via canine fossa

- *CPT Changes: An Insider's View* 2011, 2020
- *CPT Assistant* Jun 11:11, Apr 18:3

(Do not report 31295 in conjunction with 31233, 31256, 31267, when performed on the ipsilateral side)

31296 frontal sinus ostium

- *CPT Changes: An Insider's View* 2011, 2020
- *CPT Assistant* Jun 11:11, Apr 18:3

(Do not report 31296 in conjunction with 31253, 31276, 31297, 31298, when performed on the ipsilateral side)

31297 sphenoid sinus ostium

- *CPT Changes: An Insider's View* 2011, 2020
- *CPT Assistant* Jun 11:11, Apr 18:3

(Do not report 31297 in conjunction with 31235, 31257, 31259, 31287, 31288, 31296, 31298, when performed on the ipsilateral side)

31298 frontal and sphenoid sinus ostia

- *CPT Changes: An Insider's View* 2018, 2020
- *CPT Assistant* Apr 18:3, Feb 23:6

(Do not report 31298 in conjunction with 31235, 31253, 31257, 31259, 31276, 31287, 31288, 31296, 31297, when performed on the ipsilateral side)

Other Procedures

(For hypophysectomy, transantral or transeptal approach, use 61548)

(For transcranial hypophysectomy, use 61546)

31299 Unlisted procedure, accessory sinuses

CPT Assistant Jan 10:11, Jun 11:11, Jun 13:13, Jul 15:10, Feb 16:10, Apr 19:10, Jul 19:7, Dec 23:39

Larynx

Excision

31300 Laryngotomy (thyrotomy, laryngofissure), with removal of tumor or laryngocele, cordectomy

31360 Laryngectomy; total, without radical neck dissection

CPT Assistant Aug 10:4

31365 total, with radical neck dissection

CPT Assistant Oct 01:10, Aug 10:4

31367 subtotal supraglottic, without radical neck dissection

CPT Assistant Aug 10:4

31368 subtotal supraglottic, with radical neck dissection

31370 Partial laryngectomy (hemilaryngectomy); horizontal

31375 laterovertical

31380 anterovertical

31382 antero-latero-vertical

31390 Pharyngolaryngectomy, with radical neck dissection; without reconstruction

31395 with reconstruction

31400 Arytenoidectomy or arytenoidopexy, external approach

(For endoscopic arytenoidectomy, use 31560)

31420 Epiglottidectomy

Introduction

31500 Intubation, endotracheal, emergency procedure

- *CPT Assistant* Nov 99:32-33, Oct 03:2, Aug 04:8, Jul 06:4, Jul 07:1, Dec 09:10, May 16:3, Oct 16:8, Jul 21:8

31502 Tracheotomy tube change prior to establishment of fistula tract

- *CPT Assistant* Winter 90:6, Dec 20:11

Endoscopy

For endoscopic procedures, report appropriate endoscopy of each anatomic site examined. Laryngoscopy includes examination of the tongue base, larynx, and hypopharynx. The anatomic structures examined with this procedure include both midline (single anatomic sites) and paired structures. Midline, single anatomic sites include tongue base, vallecula, epiglottis, subglottis, and posterior pharyngeal wall. Paired structures include true vocal cords, arytenoids, false vocal cords, ventricles, pyriform sinuses, and aryepiglottic folds. For the purposes of reporting therapeutic interventions, all paired structures contained within one side of the larynx/pharynx are considered unilateral. If using operating microscope, telescope, or both, use the applicable code only once per operative session.

31505 Laryngoscopy, indirect; diagnostic (separate procedure)

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:13

31510 with biopsy

- *CPT Assistant* Nov 99:13

31511 with removal of foreign body

- *CPT Assistant* Nov 99:13

31512 with removal of lesion

- *CPT Assistant* Nov 99:13

31513 with vocal cord injection

- *CPT Assistant* Nov 99:13

31515 Laryngoscopy direct, with or without tracheoscopy; for aspiration

31520 diagnostic, newborn

(Do not report modifier 63 in conjunction with 31520)

31525 diagnostic, except newborn

- *CPT Assistant* Aug 10:3

31526 diagnostic, with operating microscope or telescope

- *CPT Changes: An Insider's View* 2006
- *CPT Assistant* Nov 98:11-12, Jun 17:10

(Do not report 31526 in conjunction with 69990)

31527 with insertion of obturator

31528 with dilation, initial

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* May 21:14, Nov 23:24

31529 with dilation, subsequent

31575 Laryngoscopy, flexible; diagnostic

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Dec 16:13, Apr 17:8, Jul 17:7, Dec 20:11, Dec 21:20, Mar 23:1

(Do not report 31575 in conjunction with 31231, unless performed for a separate condition using a separate endoscope)

(Do not report 31575 in conjunction with 31572, 31573, 31574, 31576, 31577, 31578, 42975, 43197, 43198, 92511, 92612, 92614, 92616)

31576 with biopsy(ies)

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Dec 16:13, Apr 17:8, Jul 17:7

(Do not report 31576 in conjunction with 31572, 31578)

31577 with removal of foreign body(s)

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Dec 16:13, Apr 17:8, Jul 17:7, Aug 23:20

31578 with removal of lesion(s), non-laser

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Dec 16:13, Apr 17:8, Jul 17:7

 # 31572 with ablation or destruction of lesion(s) with laser, unilateral

CPT Changes: An Insider's View 2017

CPT Assistant Dec 16:13, Apr 17:8, Jul 17:7, Sep 19:10

(Do not report 31572 in conjunction with 31576, 31578)

(To report flexible endoscopic evaluation of swallowing, see 92612-92613)

(To report flexible endoscopic evaluation with sensory testing, see 92614-92615)

(To report flexible endoscopic evaluation of swallowing with sensory testing, see 92616-92617)

(For flexible laryngoscopy as part of flexible endoscopic evaluation of swallowing and/or laryngeal sensory testing by cine or video recording, see 92612-92617)

 # 31573 with therapeutic injection(s) (eg, chemodenervation agent or corticosteroid, injected percutaneous, transoral, or via endoscope channel), unilateral

CPT Changes: An Insider's View 2017

CPT Assistant Dec 16:13, Apr 17:8, Jul 17:7, May 18:7

 # 31574 with injection(s) for augmentation (eg, percutaneous, transoral), unilateral

CPT Changes: An Insider's View 2017

CPT Assistant Dec 16:13, Apr 17:8, Jul 17:7, May 18:7

31579 Laryngoscopy, flexible or rigid telescopic, with stroboscopy

CPT Changes: An Insider's View 2017

CPT Assistant Dec 16:13, Apr 17:8, Jul 17:7

Repair

31580 Laryngoplasty; for laryngeal web, with indwelling keel or stent insertion

CPT Changes: An Insider's View 2017

CPT Assistant Mar 17:10, Apr 17:5

(Do not report 31580 in conjunction with 31551, 31552, 31553, 31554)

(To report tracheostomy, see 31600, 31601, 31603, 31605, 31610)

(To report removal of the keel or stent, use 31599)

 # 31551 for laryngeal stenosis, with graft, without indwelling stent placement, younger than 12 years of age

CPT Changes: An Insider's View 2017

CPT Assistant Mar 17:10, Apr 17:5, Jul 17:7

(Do not report graft separately if harvested through the laryngoplasty incision [eg, thyroid cartilage graft])

(Do not report 31551 in conjunction with 31552, 31553, 31554, 31580)

(To report tracheostomy, see 31600, 31601, 31603, 31605, 31610)

 # 31552 for laryngeal stenosis, with graft, without indwelling stent placement, age 12 years or older

CPT Changes: An Insider's View 2017

CPT Assistant Mar 17:10, Apr 17:5, Jul 17:7

(Do not report graft separately if harvested through the laryngoplasty incision [eg, thyroid cartilage graft])

(Do not report 31552 in conjunction with 31551, 31553, 31554, 31580)

(To report tracheostomy, see 31600, 31601, 31603, 31605, 31610)

 # 31553 for laryngeal stenosis, with graft, with indwelling stent placement, younger than 12 years of age

CPT Changes: An Insider's View 2017

CPT Assistant Mar 17:10, Apr 17:5, Jul 17:7

(Do not report graft separately if harvested through the laryngoplasty incision [eg, thyroid cartilage graft])

(Do not report 31553 in conjunction with 31551, 31552, 31554, 31580)

(To report tracheostomy, see 31600, 31601, 31603, 31605, 31610)

(To report removal of the stent, use 31599)

 # 31554 for laryngeal stenosis, with graft, with indwelling stent placement, age 12 years or older

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Mar 17:10, Apr 17:5, Jul 17:7

(Do not report graft separately if harvested through the laryngoplasty incision [eg, thyroid cartilage graft])

(Do not report 31554 in conjunction with 31551, 31552, 31553, 31580)

(To report tracheostomy, see 31600, 31601, 31603, 31605, 31610)

(To report removal of the stent, use 31599)

31584 with open reduction and fixation of (eg, plating) fracture, includes tracheostomy, if performed

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Mar 17:10, Apr 17:5

(Do not report graft separately if harvested through the laryngoplasty incision [eg, thyroid cartilage graft])

31587 Laryngoplasty, cricoid split, without graft placement

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Mar 17:10, Apr 17:5

(To report tracheostomy, see 31600, 31601, 31603, 31605, 31610)

31590 Laryngeal reinnervation by neuromuscular pedicle

- *CPT Assistant* Mar 17:10

31591 Laryngoplasty, medialization, unilateral

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Mar 17:10, Apr 17:5, Jul 17:7

31592 Cricotracheal resection

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Feb 17:14, Mar 17:10, Apr 17:5, Jul 17:7

(Do not report graft separately if harvested through cricotracheal resection incision [eg, trachealis muscle])

(Do not report local advancement and rotational flaps separately if performed through the same incision)

(To report tracheostomy, see 31600, 31601, 31603, 31605, 31610)

(To report excision of tracheal stenosis and anastomosis, see 31780, 31781)

Other Procedures

31599 Unlisted procedure, larynx

CPT Assistant Nov 12:14, Jan 17:6, Apr 22:13, Jul 22:18

Trachea and Bronchi

Incision

31600 Tracheostomy, planned (separate procedure);

CPT Assistant Aug 10:5, Sep 19:10, Dec 20:12, Jul 23:1

31601 younger than 2 years

CPT Assistant Dec 20:12

31603 Tracheostomy, emergency procedure; transtracheal

CPT Assistant Dec 20:12

31605 cricothyroid membrane

31610 Tracheostomy, fenestration procedure with skin flaps

CPT Assistant Dec 20:12

(For endotracheal intubation, use 31500)

(For tracheal aspiration under direct vision, use 31515)

31611 Construction of tracheoesophageal fistula and subsequent insertion of an alaryngeal speech prosthesis (eg, voice button, Blom-Singer prosthesis)

31612 Tracheal puncture, percutaneous with transtracheal aspiration and/or injection

31613 Tracheostoma revision; simple, without flap rotation

31614 complex, with flap rotation

Endoscopy

For endoscopy procedures, code appropriate endoscopy of each anatomic site examined. Surgical bronchoscopy always includes diagnostic bronchoscopy when performed by the same physician. Codes 31622-31651, 31660, 31661 include fluoroscopic guidance, when performed.

Codes 31652 and 31653 are complete services used for sampling (eg, aspiration/biopsy) lymph node(s) or adjacent structure(s) utilizing endobronchial ultrasound (EBUS) and are reported separately. Code 31654 is an add-on code and should be reported for identifying one or more peripheral lesion(s) with transendoscopic ultrasound.

31615 Tracheobronchoscopy through established tracheostomy incision

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Feb 10:6, Nov 12:14, Dec 20:11, Aug 21:14

(For tracheoscopy, see laryngoscopy codes 31515-31574)

(For bronchoscopy with endobronchial ultrasound [EBUS] guided transtracheal/transbronchial sampling of mediastinal and/or hilar lymph node stations or structures, see 31652, 31653. For transendoscopic ultrasound during bronchoscopic diagnostic or therapeutic intervention[s] for peripheral lesion[s], use 31654)

31622 Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; diagnostic, with cell washing, when performed (separate procedure)

- *CPT Changes: An Insider's View* 2004, 2010, 2017
- *CPT Assistant* Jul 96:11, Nov 98:12, Dec 98:8, Mar 99:3, Apr 00:10, Jun 01:10, Jan 02:10, Sep 04:8, 12, Aug 05:4, Dec 09:10, Feb 10:6, Apr 10:5, Feb 11:8, Jun 23:21

31623 with brushing or protected brushings

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Nov 98:12, Mar 99:3, Nov 99:13, Jan 02:10, Sep 04:8, Aug 05:4, May 08:15, Apr 10:5, Mar 13:8, Apr 21:8, Jun 23:21

31624 with bronchial alveolar lavage

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Nov 98:12, Feb 99:9, Mar 99:3, 11, Jan 02:10, Sep 04:8, Aug 05:4, May 08:15, Feb 10:6, Apr 10:5, Mar 13:8, Jun 17:10, Aug 21:14, Jun 23:21

31625 with bronchial or endobronchial biopsy(s), single or multiple sites

- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Spring 91:2, Jan 02:10, Jun 02:10, Sep 03:15, Sep 04:9, Aug 05:4, Feb 10:6, Apr 10:5, Mar 13:8, Apr 21:8, Sep 21:14, Jun 23:21

31626 with placement of fiducial markers, single or multiple

- *CPT Changes: An Insider's View* 2010, 2017
- *CPT Assistant* Feb 10:6, Apr 10:5, Jan 11:6, Mar 13:8, Jun 15:6, Jun 17:10, Jun 23:21, Oct 23:21

(Report supply of device separately)

+ 31627 with computer-assisted, image-guided navigation (List separately in addition to code for primary procedure[s])

- *CPT Changes: An Insider's View* 2010, 2017
- *CPT Assistant* Feb 10:6, Apr 10:5, Jan 11:6, Mar 13:8, Jun 23:21

(31627 includes 3D reconstruction. Do not report 31627 in conjunction with 76376, 76377)

(Use 31627 in conjunction with 31615, 31622-31626, 31628-31631, 31635, 31636, 31638-31643)

31628 with transbronchial lung biopsy(s), single lobe

- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Jun 01:10, Jan 02:10, Sep 04:9, Aug 05:4, May 08:15, Feb 10:6, Apr 10:5, Mar 13:8, Jun 17:10, Mar 21:10, Apr 21:9, Sep 21:14, Jun 23:21, Dec 23:39

(31628 should be reported only once regardless of how many transbronchial lung biopsies are performed in a lobe)

(To report transbronchial lung biopsies performed on additional lobe, use 31632)

31629 with transbronchial needle aspiration biopsy(s), trachea, main stem and/or lobar bronchus(i)

- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Apr 00:10, Jan 02:10, Sep 03:15, May 04:15, Jul 04:13, Aug 05:4, Nov 09:8, Feb 10:6, Apr 10:5, Apr 11:12, Mar 13:8, Mar 21:10, Apr 21:9, Sep 21:14, Jun 23:21

(31629 should be reported only once for upper airway biopsies regardless of how many transbronchial needle aspiration biopsies are performed in the upper airway or in a lobe)

(To report transbronchial needle aspiration biopsies performed on additional lobe[s], use 31633)

31630 with tracheal/bronchial dilation or closed reduction of fracture

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* Jan 02:10, Aug 05:4, Feb 10:6, Apr 10:5, Mar 13:8, Jun 23:21

31631 with placement of tracheal stent(s) (includes tracheal/bronchial dilation as required)

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* Jan 02:10, Aug 05:4, Feb 10:6, Apr 10:5, Mar 13:8, Jun 23:21

(For placement of bronchial stent, see 31636, 31637)

(For revision of tracheal/bronchial stent, use 31638)

+ 31632 with transbronchial lung biopsy(s), each additional lobe (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2004, 2016, 2017
- *CPT Assistant* Jan 02:10, Sep 04:9, Aug 05:4, Mar 13:8, Apr 21:8, Sep 21:14, Jun 23:21, Dec 23:39

(Use 31632 in conjunction with 31628)

(31632 should be reported only once regardless of how many transbronchial lung biopsies are performed in a lobe)

+ 31633 with transbronchial needle aspiration biopsy(s), each additional lobe (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2004, 2016, 2017
- *CPT Assistant* Jan 02:10, May 04:15, Jul 04:13, Sep 04:10, Aug 05:4, Nov 09:8, Apr 11:12, Mar 13:8, Apr 21:8, Sep 21:14, Jun 23:21

(Use 31633 in conjunction with 31629)

(31633 should be reported only once regardless of how many transbronchial needle aspiration biopsies are performed in the trachea or the additional lobe)

31634 with balloon occlusion, with assessment of air leak, with administration of occlusive substance (eg, fibrin glue), if performed

- *CPT Changes: An Insider's View* 2011, 2017
- *CPT Assistant* Jan 11:6, Mar 13:8, Jun 23:21, Dec 23:39

(Do not report 31634 in conjunction with 31647, 31651 at the same session)

31635 with removal of foreign body

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Jan 02:10, Jun 02:10, Feb 10:6, Apr 10:5, Jan 11:6, Mar 13:8, Jun 23:21

(For removal of implanted bronchial valves, see 31648-31649)

31636 with placement of bronchial stent(s) (includes tracheal/bronchial dilation as required), initial bronchus

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* Aug 05:4, Apr 10:5, Mar 13:8, Jun 23:21

+ 31637 each additional major bronchus stented (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* Aug 05:4, Mar 13:8, Jun 23:21

(Use 31637 in conjunction with 31636)

31638 with revision of tracheal or bronchial stent inserted at previous session (includes tracheal/bronchial dilation as required)

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* Aug 05:4, Apr 10:5, Mar 13:8, Jun 23:21

31640 with excision of tumor

- *CPT Assistant* Jan 02:10, Aug 05:4, Apr 10:5, Mar 13:8, Jun 23:21

31641 with destruction of tumor or relief of stenosis by any method other than excision (eg, laser therapy, cryotherapy)

- *CPT Changes: An Insider's View* 2002, 2010
- *CPT Assistant* Nov 99:13, Sep 00:5, Jan 02:10, Aug 05:4, Apr 10:5, Oct 11:11, Mar 13:8, Apr 13:8, Jun 23:21

(For bronchoscopic photodynamic therapy, report 31641 in addition to 96570, 96571 as appropriate)

31643 with placement of catheter(s) for intracavitary radioelement application

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Nov 98:12, Mar 99:3, Jan 02:10, Aug 05:4, Apr 09:3, Mar 13:8, Jun 23:21

(For intracavitary radioelement application, see 77761-77763, 77770, 77771, 77772)

31645 with therapeutic aspiration of tracheobronchial tree, initial

CPT Changes: An Insider's View 2010, 2017, 2018

CPT Assistant Jan 02:10, Aug 05:4, Mar 13:8, Jun 23:21

31646 with therapeutic aspiration of tracheobronchial tree, subsequent, same hospital stay

CPT Changes: An Insider's View 2010, 2017, 2018

CPT Assistant Jan 02:10, Aug 05:4, Mar 13:8, Jun 23:21, 27

(For catheter aspiration of tracheobronchial tree with fiberscope at bedside, use 31725)

31647 with balloon occlusion, when performed, assessment of air leak, airway sizing, and insertion of bronchial valve(s), initial lobe

CPT Changes: An Insider's View 2013, 2017

CPT Assistant Mar 13:8, Jun 23:21

#+ 31651 with balloon occlusion, when performed, assessment of air leak, airway sizing, and insertion of bronchial valve(s), each additional lobe (List separately in addition to code for primary procedure[s])

CPT Changes: An Insider's View 2013, 2017

CPT Assistant Mar 13:8, Sep 18:3, Jun 23:21

(Use 31651 in conjunction with 31647)

31648 with removal of bronchial valve(s), initial lobe

CPT Changes: An Insider's View 2013, 2017

CPT Assistant Mar 13:8, Sep 18:3, Jun 23:21

(For removal and insertion of a bronchial valve at the same session, see 31647, 31648, and 31651)

+ 31649 with removal of bronchial valve(s), each additional lobe (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2013, 2017

CPT Assistant Mar 13:8, Sep 18:3, Jun 23:21

(Use 31649 in conjunction with 31648)

31651 Code is out of numerical sequence. See 31646-31649

31652 with endobronchial ultrasound (EBUS) guided transtracheal and/or transbronchial sampling (eg, aspiration[s]/biopsy[ies]), one or two mediastinal and/or hilar lymph node stations or structures

CPT Changes: An Insider's View 2016, 2017

CPT Assistant Apr 16:5, Apr 21:7, Sep 21:14, Jun 23:21

31653 with endobronchial ultrasound (EBUS) guided transtracheal and/or transbronchial sampling (eg, aspiration[s]/biopsy[ies]), 3 or more mediastinal and/or hilar lymph node stations or structures

CPT Changes: An Insider's View 2016, 2017

CPT Assistant Apr 16:5, Apr 21:8, Sep 21:14, Jun 23:21

+ 31654 with transendoscopic endobronchial ultrasound (EBUS) during bronchoscopic diagnostic or therapeutic intervention(s) for peripheral lesion(s) (List separately in addition to code for primary procedure[s])

CPT Changes: An Insider's View 2016, 2017

CPT Assistant Apr 16:5, Apr 21:8, Sep 21:14, Jun 23:21

(Use 31654 in conjunction with 31622, 31623, 31624, 31625, 31626, 31628, 31629, 31640, 31643, 31645, 31646)

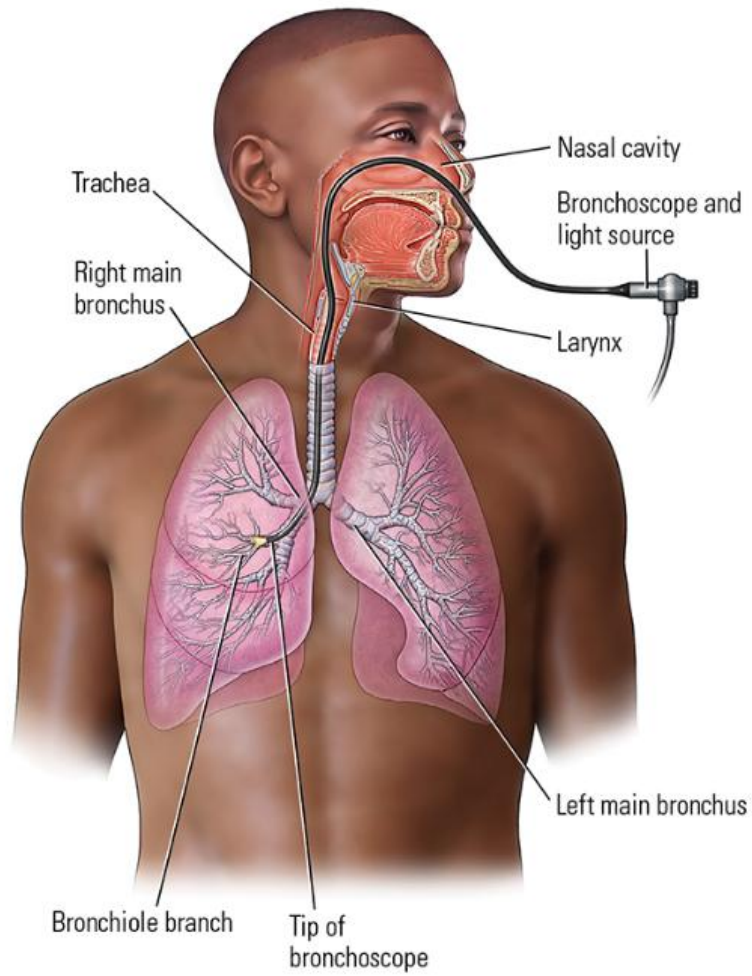
(For EBUS to access mediastinal or hilar lymph node station[s] or adjacent structure[s], see 31652, 31653)

(Report 31652, 31653, 31654 only once per session)

Bronchial Thermoplasty

31660 Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with bronchial thermoplasty, 1 lobe

- *CPT Changes: An Insider's View* 2013, 2017
- *CPT Assistant* Mar 13:8, Jun 23:21



31661 with bronchial thermoplasty, 2 or more lobes

- *CPT Changes: An Insider's View* 2013, 2017
- *CPT Assistant* Mar 13:8, Jun 23:21

(For radiofrequency destruction of pulmonary nerves of the bronchi, see 0781T, 0782T)

Bronchoscopy
31622-31661

A rigid or flexible bronchoscope is inserted through the oropharynx and vocal cords and beyond the trachea into the right or left bronchi.

Introduction

(For endotracheal intubation, use 31500)

(For tracheal aspiration under direct vision, see 31515)

31717 Catheterization with bronchial brush biopsy

CPT Assistant Feb 01:11

31720 Catheter aspiration (separate procedure); nasotracheal

31725 tracheobronchial with fiberscope, bedside

CPT Changes: An Insider's View 2017

31730 Transtracheal (percutaneous) introduction of needle wire dilator/stent or indwelling tube for oxygen therapy

Excision, Repair

31750 Tracheoplasty; cervical

CPT Assistant Jul 11:12

31755 tracheopharyngeal fistulization, each stage

31760 intrathoracic

31766 Carinal reconstruction

31770 Bronchoplasty; graft repair

31775 excision stenosis and anastomosis

(For lobectomy and bronchoplasty, use 32501)

31780 Excision tracheal stenosis and anastomosis; cervical

CPT Assistant Feb 17:14

31781 cervicothoracic

CPT Assistant Feb 17:14

31785 Excision of tracheal tumor or carcinoma; cervical

31786 thoracic

31800 Suture of tracheal wound or injury; cervical

31805 intrathoracic

31820 Surgical closure tracheostomy or fistula; without plastic repair

31825 with plastic repair

(For repair tracheoesophageal fistula, see 43305, 43312)

31830 Revision of tracheostomy scar

Other Procedures

31899 Unlisted procedure, trachea, bronchi

CPT Assistant Jan 10:11, May 14:10, Dec 20:11, Jun 23:21

Lungs and Pleura

Pleural cavity or lung biopsy procedures may be accomplished using a percutaneous, thoracoscopic (Video-Assisted Thoracoscopic Surgery [VATS]), or thoracotomy approach. They involve the removal of differing amounts of tissue for diagnosis. A biopsy may be performed using different techniques such as incision or wedge. Lung resection procedures include diagnostic and therapeutic procedures, including the removal of blebs, bullae, cysts, and benign or malignant tumors or lesions. These procedures may involve the removal of small portions of the lung or even an entire lung. Additionally, lung resection procedures may require the removal of adjacent structures. Both diagnostic lung biopsies and therapeutic lung resections can be performed utilizing a wedge technique. However, a diagnostic biopsy of a lung nodule using a wedge technique requires only that a tissue sample be obtained without particular attention to resection margins. A therapeutic wedge resection requires attention to margins and complete resection even when the wedge resection is ultimately followed by a more extensive resection. In the case of a wedge resection in which intraoperative pathology consultation determines that a more extensive resection is required in the same anatomic location, it becomes classified as a diagnostic wedge resection (32507, 32668). When no more extensive resection is required, the same procedure is a therapeutic wedge resection (32505, 32666).

Pleural or lung biopsies or diagnostic wedge resections should be reported using codes 32096, 32097, 32098, 32400, 32408, 32507, 32607, 32608, 32609, or 32668. The open or thoracoscopic (VATS) therapeutic resection of lung mass or nodules via a wedge resection is reported using codes 32505, 32506, 32666, and 32667. More extensive anatomic lung resection procedures, which can be performed with either thoracotomy or thoracoscopic (VATS) approaches, include: segmentectomy, lobectomy, bilobectomy, and pneumonectomy.

When diagnostic biopsy(ies) of the lung are performed, regardless of the approach (ie, open or thoracoscopic [VATS]) or technique (eg, incisional resection, cautery resection, or stapled wedge), and the specimen is sent for intraoperative pathology consultation, and during that same operative session the surgeon uses these results to determine the extent of the necessary surgical resection that includes the anatomical location biopsied, only the most extensive procedure performed (eg, segmentectomy, lobectomy, thoracoscopic [VATS] lobectomy) should be reported.

The therapeutic wedge resection codes (32505, 32506, 32666, or 32667) should not be reported in addition to the more extensive lung procedure (eg, lobectomy) unless the therapeutic wedge resection was performed on a different lobe or on the contralateral lung, whether or not an intraoperative pathology consultation is used to determine the extent of lung resection. When a diagnostic wedge resection is followed by a more extensive procedure in the same anatomical location, report add-on codes 32507 or 32668 with the more extensive procedure(s). When a therapeutic wedge resection (32505, 32506, 32666, or 32667) is performed in a different lobe than the more extensive lung resection (eg, lobectomy), report the therapeutic wedge resection with modifier 59.

Incision

32035 Thoracostomy; with rib resection for empyema

32036 with open flap drainage for empyema

CPT Assistant Jan 25:33

(To report wound exploration due to penetrating trauma without thoractomy, use 20101)

32096 Thoracotomy, with diagnostic biopsy(ies) of lung infiltrate(s) (eg, wedge, incisional), unilateral

CPT Changes: An Insider's View 2012

CPT Assistant Sep 12:3

(Do not report 32096 more than once per lung)

(Do not report 32096 in conjunction with 32440, 32442, 32445, 32488)

32097 Thoracotomy, with diagnostic biopsy(ies) of lung nodule(s) or mass(es) (eg, wedge, incisional), unilateral

CPT Changes: An Insider's View 2012

CPT Assistant Sep 12:3

(Do not report 32097 more than once per lung)

(Do not report 32097 in conjunction with 32440, 32442, 32445, 32488)

32098 Thoracotomy, with biopsy(ies) of pleura

CPT Changes: An Insider's View 2012

CPT Assistant Sep 12:3

32100 Thoracotomy; with exploration

CPT Changes: An Insider's View 2012

CPT Assistant Mar 07:1, Sep 12:3, Jan 13:6

(Do not report 32100 in conjunction with 21601, 21602, 21603, 32503, 32504, 33955, 33956, 33957, 33963, 33964)

32110 with control of traumatic hemorrhage and/or repair of lung tear

CPT Changes: An Insider's View 2012

CPT Assistant Sep 12:3

32120 for postoperative complications

CPT Changes: An Insider's View 2012

32124 with open intrapleural pneumonolysis

CPT Changes: An Insider's View 2012

CPT Assistant Sep 12:3

32140 with cyst(s) removal, includes pleural procedure when performed

CPT Changes: An Insider's View 2012

CPT Assistant Sep 12:3

32141 with resection-plication of bullae, includes any pleural procedure when performed

CPT Changes: An Insider's View 2012

CPT Assistant Sep 12:3

(For lung volume reduction, use 32491)

32150 with removal of intrapleural foreign body or fibrin deposit

CPT Changes: An Insider's View 2012

CPT Assistant Sep 12:3

32151 with removal of intrapulmonary foreign body

CPT Changes: An Insider's View 2012

32160 with cardiac massage

CPT Changes: An Insider's View 2012

(For segmental or other resections of lung, see 32480-32504)

32200 Pneumonostomy, with open drainage of abscess or cyst

CPT Assistant Nov 97:15

(For percutaneous image-guided drainage of abscess or cyst of lungs or mediastinum by catheter placement, use 49405)

32215 Pleural scarification for repeat pneumothorax

32220 Decortication, pulmonary (separate procedure); total

32225 partial

Excision/Resection

32310 Pleurectomy, parietal (separate procedure)

32320 Decortication and parietal pleurectomy

32400 Biopsy, pleura, percutaneous needle

CPT Assistant Fall 94:1-2

Clinical Examples in Radiology Summer 08:5-6, Winter 17:5

(If imaging guidance is performed, see 76942, 77002, 77012, 77021)

(For fine needle aspiration biopsy, see 10004, 10005, 10006, 10007, 10008, 10009, 10010, 10011, 10012, 10021)

A **core needle biopsy** is typically performed with a needle that is designed to obtain a core sample of tissue for histopathologic evaluation. A **fine needle aspiration** (FNA) biopsy is performed when material is aspirated with a fine needle and the cells are examined cytologically.

A core needle biopsy of the lung or mediastinum is most commonly performed with imaging guidance (ie, ultrasound, fluoroscopy, CT, MRI). Imaging guidance codes (ie, 76942, 77002, 77012, 77021) may not be reported separately with 32408. Code 32408 is reported once per lesion sampled in a single session.

Code 32408 includes all imaging guidance regardless of the number of imaging modalities used on the same lesion during the same session.

When more than one core needle biopsy of the lung or mediastinum with imaging guidance is performed on separate lesions at the same session on the same day, use 32408 once for each lesion with modifier 59 for the second and each additional core needle lung or mediastinal biopsy.

When a core needle biopsy of the lung or mediastinum with imaging guidance is performed at the same session as a core biopsy of a site other than the lung or mediastinum (eg, liver), both the core needle biopsy for the other site (eg, 47000) and the imaging guidance for that additional core needle biopsy may be reported separately with modifier 59.

When FNA biopsy and core needle biopsy of the lung or mediastinum are performed on the same lesion at the same session on the same day using the same type of imaging guidance, modifier 52 should be used with either the FNA biopsy code or the core lung or mediastinal biopsy code.

When FNA biopsy and core needle biopsy of the lung or mediastinum are performed on the same lesion at the same session on the same day using different types of imaging guidance, both image-guided biopsy codes may be reported separately and one of them should be appended with modifier 59.

When FNA biopsy is performed on one lesion and core needle biopsy of the lung or mediastinum is performed on a separate lesion at the same session on the same day using the same type of imaging guidance, both the modality-specific image-guided FNA biopsy code and 32408 may be reported separately and one of the codes should be appended with modifier 59.

When FNA biopsy is performed on one lesion and core needle biopsy of the lung or mediastinum is performed on a separate lesion at the same session on the same day using different types of imaging guidance, both the modality-specific image-guided FNA biopsy code and 32408 may be reported separately and one of the codes should be appended with modifier 59.

32408 Core needle biopsy, lung or mediastinum, percutaneous, including imaging guidance, when performed

- *CPT Changes: An Insider's View* 2021
- *CPT Assistant* Apr 21:10, Sep 21:14
- *Clinical Examples in Radiology* Fall 20:3-4, Summer 21:12

(Do not report 32408 in conjunction with 76942, 77002, 77012, 77021)

(For open biopsy of lung, see 32096, 32097. For open biopsy of mediastinum, see 39000 or 39010. For thoracoscopic [VATS] biopsy of lung, pleura, pericardium, or mediastinal space structure, see 32604, 32606, 32607, 32608, 32609)

(For fine needle aspiration biopsy, see 10004, 10005, 10006, 10007, 10008, 10009, 10010, 10011, 10012, 10021)

Removal

32440 Removal of lung, pneumonectomy;

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Fall 94:1, Sep 12:3

32442 with resection of segment of trachea followed by broncho-tracheal anastomosis (sleeve pneumonectomy)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Fall 94:1, 3, Jun 17:10

32445 extrapleural

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Fall 94:1, 3, Sep 12:3

(For extrapleural pneumonectomy, with empyemectomy, use 32445 and 32540)

(If lung resection is performed with chest wall tumor resection, report the appropriate chest wall tumor resection code [21601, 21602, 21603], in addition to lung resection code [32440-32445])

32480 Removal of lung, other than pneumonectomy; single lobe (lobectomy)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Spring 91:5, Fall 94:1, 4, Sep 12:3

32482 2 lobes (bilobectomy)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Fall 94:1, 4, Jan 07:31, Sep 12:3

32484 single segment (segmentectomy)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Fall 94:1, 4, Sep 12:3

(For removal of lung with bronchoplasty, use 32501)

32486 with circumferential resection of segment of bronchus followed by broncho-bronchial anastomosis (sleeve lobectomy)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Fall 94:1, 4, Jun 17:10

32488 with all remaining lung following previous removal of a portion of lung (completion pneumonectomy)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Fall 94:1, 4, Sep 12:3

(For lobectomy or segmentectomy, with concomitant decortication, use 32320 and the appropriate removal of lung code)

32491 with resection-plication of emphysematous lung(s) (bullous or non-bullous) for lung volume reduction, sternal split or transthoracic approach, includes any pleural procedure, when performed

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Nov 96:7, Sep 12:3

(If lung resection is performed with chest wall tumor resection, report the appropriate chest wall tumor resection code [21601, 21602, 21603] in addition to lung resection code [32480, 32482, 32484, 32486, 32488, 32505, 32506, 32507])

+ 32501 Resection and repair of portion of bronchus (bronchoplasty) when performed at time of lobectomy or segmentectomy (List separately in addition to code for primary procedure)

(Use 32501 in conjunction with 32480, 32482, 32484)

(32501 is to be used when a portion of the bronchus to preserved lung is removed and requires plastic closure to preserve function of that preserved lung. It is not to be used for closure for the proximal end of a resected bronchus)

32503 Resection of apical lung tumor (eg, Pancoast tumor), including chest wall resection, rib(s) resection(s), neurovascular dissection, when performed; without chest wall reconstruction(s)

- *CPT Changes: An Insider's View* 2006

32504 with chest wall reconstruction

- *CPT Changes: An Insider's View* 2006

(Do not report 32503, 32504 in conjunction with 21601, 21602, 21603, 32100, 32551, 32554, 32555)

32505 Thoracotomy; with therapeutic wedge resection (eg, mass, nodule), initial

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Sep 12:3

(Do not report 32505 in conjunction with 32440, 32442, 32445, 32488)

+ 32506 with therapeutic wedge resection (eg, mass or nodule), each additional resection, ipsilateral (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Sep 12:3

(Report 32506 only in conjunction with 32505)

(If lung resection is performed with chest wall tumor resection, report the appropriate chest wall tumor resection code [21601, 21602, 21603], in addition to lung resection code [32480, 32482, 32484, 32486, 32488, 32505, 32506, 32507])

+ 32507 with diagnostic wedge resection followed by anatomic lung resection (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Sep 12:3

(Report 32507 in conjunction with 32440, 32442, 32445, 32480, 32482, 32484, 32486, 32488, 32503, 32504)

32540 Extrapleural enucleation of empyema (empyemectomy)

(For extrapleural enucleation of empyema [empyemectomy] with lobectomy, use 32540 and the appropriate removal of lung code)

Introduction and Removal

32550 Insertion of indwelling tunneled pleural catheter with cuff

- *CPT Changes: An Insider's View* 2008, 2017
- *CPT Assistant* Jul 10:10, Mar 14:14, May 14:3

(Do not report 32550 in conjunction with 32554, 32555, 32556, 32557 when performed on the same side of the chest)

(If imaging guidance is performed, use 75989)

32551 Tube thoracostomy, includes connection to drainage system (eg, water seal), when performed, open (separate procedure)

- *CPT Changes: An Insider's View* 2008, 2013, 2017
- *CPT Assistant* Feb 09:7, Sep 10:6, Aug 11:4, Nov 12:3, May 14:3, Jun 17:10, Jul 18:7, Nov 21:13, Mar 23:1
- *Clinical Examples in Radiology* Fall 10:10, Winter 13:5

(Do not report 32551 in conjunction with 33020, 33025, if pleural drain/chest tube is placed on the ipsilateral side)

32552 Removal of indwelling tunneled pleural catheter with cuff

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Feb 10:6

32553 Placement of interstitial device(s) for radiation therapy guidance (eg, fiducial markers, dosimeter), percutaneous, intra-thoracic, single or multiple

- *CPT Changes: An Insider's View* 2010, 2017
- *CPT Assistant* Feb 10:6-7, Jun 15:6, Jun 16:3
- *Clinical Examples in Radiology* Winter 23:16

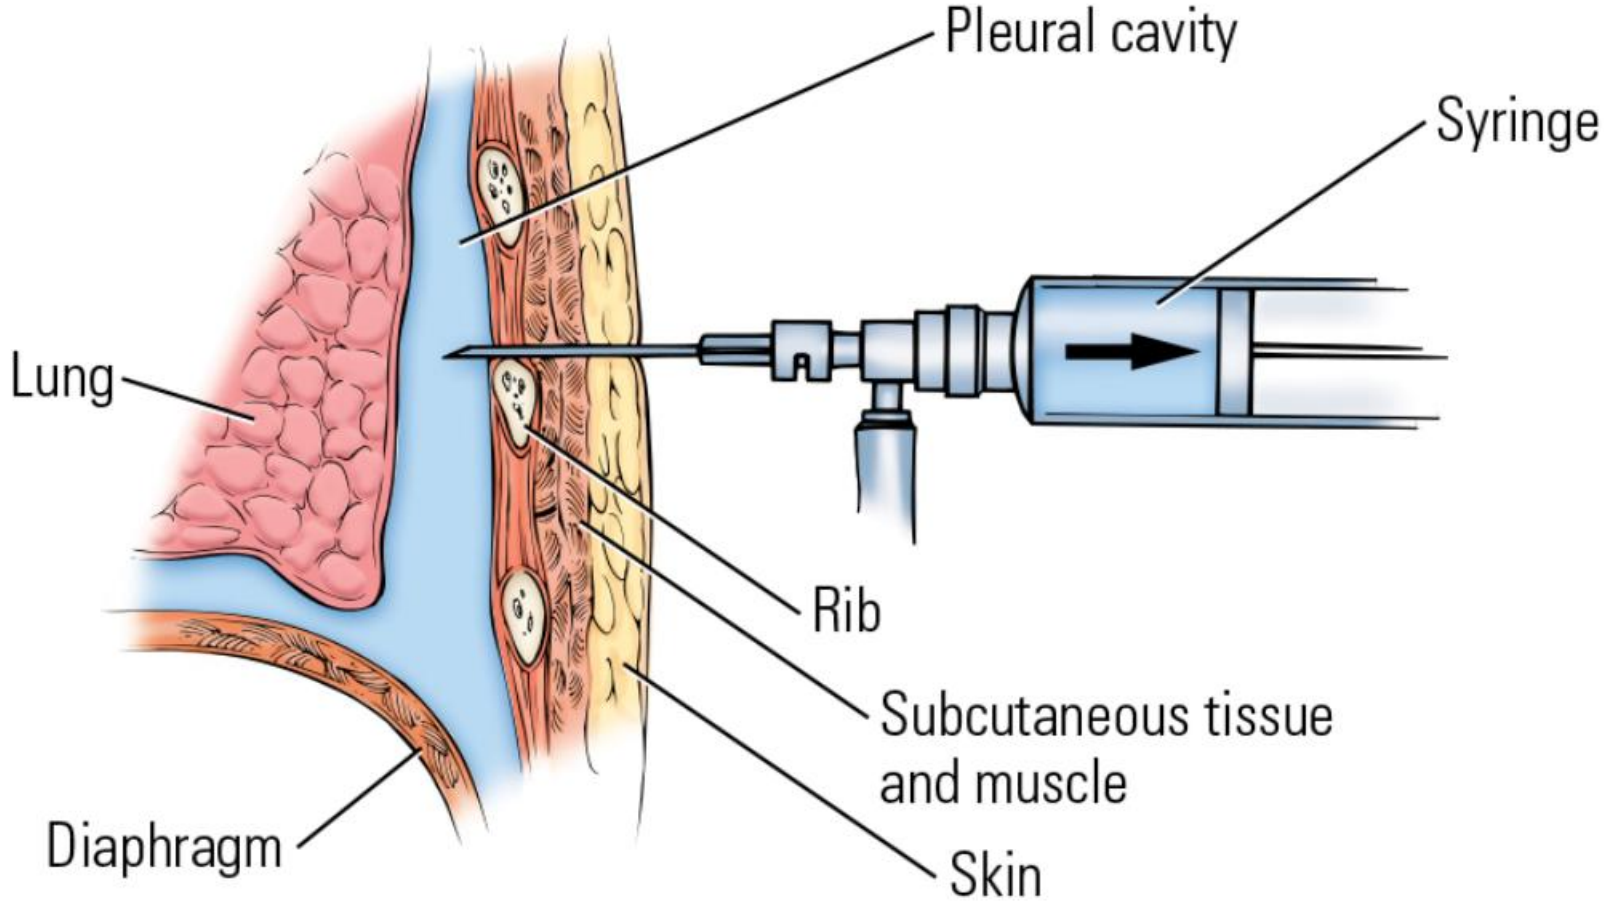
(Report supply of device separately)

(For imaging guidance, see 76942, 77002, 77012, 77021)

(For percutaneous placement of interstitial device[s] for intra-abdominal, intrapelvic, and/or retroperitoneal radiation therapy guidance, use 49411)

32554 Thoracentesis, needle or catheter, aspiration of the pleural space; without imaging guidance

- *CPT Changes: An Insider's View* 2013
- *CPT Assistant* Nov 12:3, May 14:3
- *Clinical Examples in Radiology* Winter 13:5-6, Summer 13:6



32555 with imaging guidance

- *CPT Changes: An Insider's View* 2013
- *CPT Assistant* Nov 12:3
- *Clinical Examples in Radiology* Winter 13:6, Summer 13:6

Thoracentesis

32554, 32555

Accumulated fluid or air is removed from the pleural space by puncturing space between the ribs. In 32555, a tube is inserted and a syringe attached to the catheter for the removal of fluid and/or air.

32556 Pleural drainage, percutaneous, with insertion of indwelling catheter; without imaging guidance

- *CPT Changes: An Insider's View* 2013
- *Clinical Examples in Radiology* Winter 13:6, Summer 13:6

32557 with imaging guidance

- *CPT Changes: An Insider's View* 2013
- *CPT Assistant* Nov 12:3, May 14:3
- *Clinical Examples in Radiology* Winter 13:5-6, Summer 13:5-6

(For insertion of indwelling tunneled pleural catheter with cuff, use 32550)

(For open procedure, use 32551)

(Do not report 32554-32557 in conjunction with 32550, 32551 when performed on the same side of the chest)

(Do not report 32554-32557 in conjunction with 75989, 76942, 77002, 77012, 77021)

Destruction

The instillation of a fibrinolytic agent may be performed multiple times per day over the course of several days. Code 32561 should be reported only once on the initial day treatment. Code 32562 should be reported only once on each subsequent day of treatment.

32560 Instillation, via chest tube/catheter, agent for pleurodesis (eg, talc for recurrent or persistent pneumothorax)

- *CPT Changes: An Insider's View* 2008, 2010
- *CPT Assistant* Feb 10:6

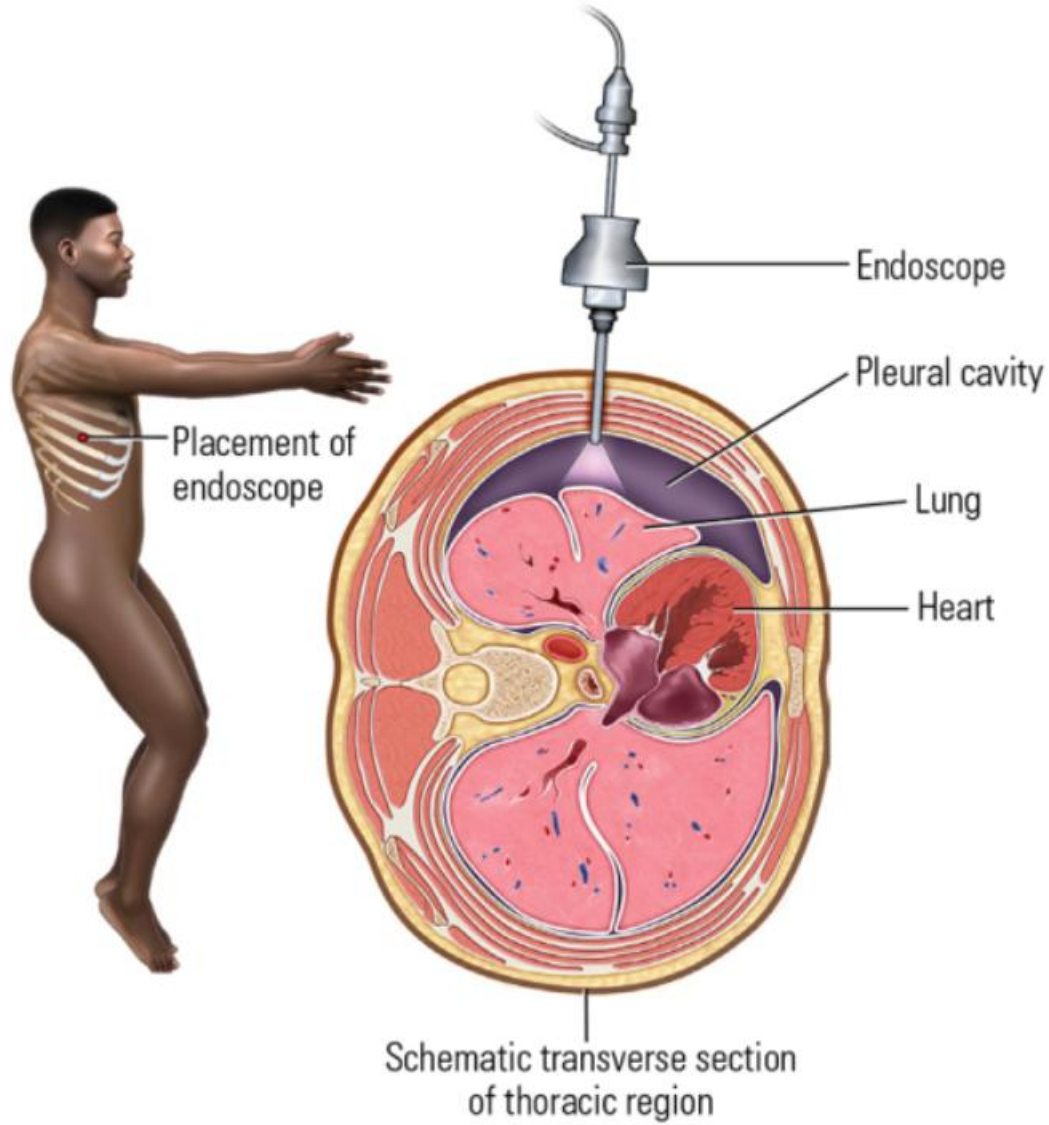
(For chest tube insertion, use 32551)

32561 Instillation(s), via chest tube/catheter, agent for fibrinolysis (eg, fibrinolytic agent for break up of multiloculated effusion); initial day

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Feb 10:6

(For chest tube insertion, use 32551)

32562 subsequent day



- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Feb 10:6

(For chest tube insertion, use 32551)

Thoracoscopy

32601-32665

The inside of the chest cavity is examined through a fiberoptic endoscope.

32608 with diagnostic biopsy(ies) of lung nodule(s) or mass(es) (eg, wedge, incisional), unilateral

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Sep 12:3, Aug 13:14

(Do not report 32608 more than once per lung)

(Do not report 32608 in conjunction with 32440, 32442, 32445, 32488, 32671)

32609 with biopsy(ies) of pleura

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Sep 12:3, Aug 13:14

32650 Thoracoscopy, surgical; with pleurodesis (eg, mechanical or chemical)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Fall 94:1, 6, Aug 13:14

32651 with partial pulmonary decortication

- *CPT Assistant* Fall 94:1, 6, Aug 13:14

32652 with total pulmonary decortication, including intrapleural pneumonolysis

- *CPT Assistant* Fall 94:1, 6, Aug 13:14

32653 with removal of intrapleural foreign body or fibrin deposit

- *CPT Assistant* Fall 94:1, 6, Aug 13:14

32654 with control of traumatic hemorrhage

- *CPT Assistant* Fall 94:1, 6, Aug 13:14

32655 with resection-plication of bullae, includes any pleural procedure when performed

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Fall 94:1, 6, Aug 05:15, Aug 13:14, Feb 24:33

(For thoracoscopic [VATS] lung volume reduction surgery, use 32672)

32656 with parietal pleurectomy

- *CPT Assistant* Fall 94:1, 6, Aug 13:14, Feb 24:33

32658 with removal of clot or foreign body from pericardial sac

- *CPT Assistant* Fall 94:1, 6, Aug 13:14

32659 with creation of pericardial window or partial resection of pericardial sac for drainage

- *CPT Assistant* Fall 94:1, 6, Aug 13:14

32661 with excision of pericardial cyst, tumor, or mass

- *CPT Assistant* Fall 94:1, 6, Aug 13:14

32662 with excision of mediastinal cyst, tumor, or mass

CPT Assistant Fall 94:1, 6, Aug 13:14

32663 with lobectomy (single lobe)

CPT Changes: An Insider's View 2012

CPT Assistant Fall 94:1, 6, Sep 12:3, Aug 13:14

(For thoracoscopic [VATS] segmentectomy, use 32669)

32664 with thoracic sympathectomy

CPT Assistant Fall 94:1, Oct 99:10, Aug 13:14, Dec 15:16, Apr 24:36

32665 with esophagomyotomy (Heller type)

CPT Assistant Fall 94:1, 6, Aug 13:14

(Do not report 32665 in conjunction with 43497)

(For exploratory thoracoscopy, and exploratory thoracoscopy with biopsy, see 32601-32609)

32666 with therapeutic wedge resection (eg, mass, nodule), initial unilateral

CPT Changes: An Insider's View 2012

CPT Assistant Sep 12:3, Aug 13:14

(To report bilateral procedure, report 32666 with modifier 50)

(Do not report 32666 in conjunction with 32440, 32442, 32445, 32488, 32671)

+ 32667 with therapeutic wedge resection (eg, mass or nodule), each additional resection, ipsilateral (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2012

CPT Assistant Sep 12:3, Aug 13:14

(Report 32667 only in conjunction with 32666)

(Do not report 32667 in conjunction with 32440, 32442, 32445, 32488, 32671)

+ 32668 with diagnostic wedge resection followed by anatomic lung resection (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2012

CPT Assistant Sep 12:3, Aug 13:14

(Report 32668 in conjunction with 32440, 32442, 32445, 32480, 32482, 32484, 32486, 32488, 32503, 32504, 32663, 32669, 32670, 32671)

32669 with removal of a single lung segment (segmentectomy)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Sep 12:3, Aug 13:14

32670 with removal of two lobes (bilobectomy)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Sep 12:3, Aug 13:14

32671 with removal of lung (pneumonectomy)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Sep 12:3, Aug 13:14

32672 with resection-plication for emphysematous lung (bullous or non-bullous) for lung volume reduction (LVRS), unilateral includes any pleural procedure, when performed

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Sep 12:3, Aug 13:14

32673 with resection of thymus, unilateral or bilateral

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Sep 12:3, Aug 13:14

(For open thymectomy see 60520, 60521, 60522)

(For open excision mediastinal cyst, see 39200; for open excision mediastinal tumor, use 39220)

(For exploratory thoracoscopy, and exploratory thoracoscopy with biopsy, see 32601-32609)

+ 32674 with mediastinal and regional lymphadenectomy (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Sep 12:3, Aug 13:14, May 14:3

(On the right, mediastinal lymph nodes include the paratracheal, subcarinal, paraesophageal, and inferior pulmonary ligament)

(On the left, mediastinal lymph nodes include the aortopulmonary window, subcarinal, paraesophageal, and inferior pulmonary ligament)

(Report 32674 in conjunction with 21601, 31760, 31766, 31786, 32096-32200, 32220-32320, 32440-32491, 32503-32505, 32601-32663, 32666, 32669-32673, 32815, 33025, 33030, 33050-33130, 39200-39220, 39560, 39561, 43101, 43112, 43117, 43118, 43122, 43123, 43287, 43288, 43351, 60270, 60505)

(To report mediastinal and regional lymphadenectomy via thoracotomy, use 38746)

Stereotactic Radiation Therapy

Thoracic stereotactic body radiation therapy (SRS/SBRT) is a distinct procedure which may involve collaboration between a surgeon and radiation oncologist. The surgeon identifies and delineates the target for therapy. The radiation oncologist reports the appropriate code(s) for clinical treatment planning, physics and dosimetry, treatment delivery and management from the Radiation Oncology section (see 77295, 77331, 77370, 77373, 77435). The same physician should not report target delineation services with radiation treatment management codes (77427-77499).

Target delineation involves specific determination of tumor borders to identify tumor volume and relationship with adjacent structures (eg, chest wall, intraparenchymal vasculature and atelectatic lung) and previously placed fiducial markers, when present. Target delineation also includes availability to identify and validate the thoracic target prior to treatment delivery when a fiducial-less tracking system is utilized.

Do not report target delineation more than once per entire course of treatment when the treatment requires greater than one session.

32701 Thoracic target(s) delineation for stereotactic body radiation therapy (SRS/SBRT), (photon or particle beam), entire course of treatment

- *CPT Changes: An Insider's View* 2013
- *CPT Assistant* Jun 15:6

(Do not report 32701 in conjunction with 77261-77799)

(For placement of fiducial markers, see 31626, 32553)

Repair

32800 Repair lung hernia through chest wall

32810 Closure of chest wall following open flap drainage for empyema (Clagett type procedure)

- *CPT Assistant* Jan 25:33

32815 Open closure of major bronchial fistula

32820 Major reconstruction, chest wall (posttraumatic)

- *CPT Assistant* Mar 23:33

Lung Transplantation

Lung allotransplantation involves three distinct components of physician work:

1. ***Cadaver donor pneumonectomy(s)***, which include(s) harvesting the allograft and cold preservation of the allograft (perfusing with cold preservation solution and cold maintenance) (use 32850).
2. ***Backbench work:***

   Preparation of a cadaver donor single lung allograft prior to transplantation, including dissection of the allograft from surrounding soft tissues to prepare the pulmonary venous/atrial cuff, pulmonary artery, and bronchus unilaterally (use 32855).

   Preparation of a cadaver donor double lung allograft prior to transplantation, including dissection of the allograft from surrounding soft tissues to prepare the pulmonary venous/atrial cuff, pulmonary artery, and bronchus bilaterally (use 32856).
3. ***Recipient lung allotransplantation***, which includes transplantation of a single or double lung allograft and care of the recipient (see 32851-32854).

Mediastinal Lymph Nodes: Station Number and Descriptions

32674

Relevant mediastinal lymph nodes typically removed with procedures described by code 38746, and sampled removal described with code 39402.

1

6
Pulmonary
artery
5
7
8
Inferior pulmonary
ligament
9

Station #	Lymph Node Descriptions
1	Low cervical, supraclavicular, and sternal notch
2	Upper paratracheal (R & L)
4	Lower paratracheal (R & L)
5	Subaortic or aortopulmonary window
6	Para-aortic
7	Subcarinal
8	Paraesophageal (below the carina)
9	Inferior pulmonary ligament
*Station #3 is not depicted as it is not applicable to the use of codes 32674, 38746, or 39402.	

(For ex-vivo assessment of marginal donor lung transplant, see 0494T, 0495T, 0496T)

32850 Donor pneumonectomy(s) (including cold preservation), from cadaver donor

CPT Changes: An Insider's View 2005

32851 Lung transplant, single; without cardiopulmonary bypass

32852 with cardiopulmonary bypass

32853 Lung transplant, double (bilateral sequential or en bloc); without cardiopulmonary bypass

32854 with cardiopulmonary bypass

32855 Backbench standard preparation of cadaver donor lung allograft prior to transplantation, including dissection of allograft from surrounding soft tissues to prepare pulmonary venous/atrial cuff, pulmonary artery, and bronchus; unilateral

CPT Changes: An Insider's View 2005

32856 bilateral

CPT Changes: An Insider's View 2005

(For repair or resection procedures on the donor lung, see 32491, 32505, 32506, 32507, 35216, 35276)

Surgical Collapse Therapy; Thoracoplasty

(See also 32503, 32504)

32900 Resection of ribs, extrapleural, all stages

32905 Thoracoplasty, Schede type or extrapleural (all stages);

32906 with closure of bronchopleural fistula

(For open closure of major bronchial fistula, use 32815)

(For resection of first rib for thoracic outlet compression, see 21615, 21616)

32940 Pneumonolysis, extraperiosteal, including filling or packing procedures

32960 Pneumothorax, therapeutic, intrapleural injection of air

Other Procedures

32994 Code is out of numerical sequence. See 32997-32999

32997 Total lung lavage (unilateral)

- *CPT Changes: An Insider's View* 2000, 2002
- *CPT Assistant* Nov 98:13, Nov 99:14

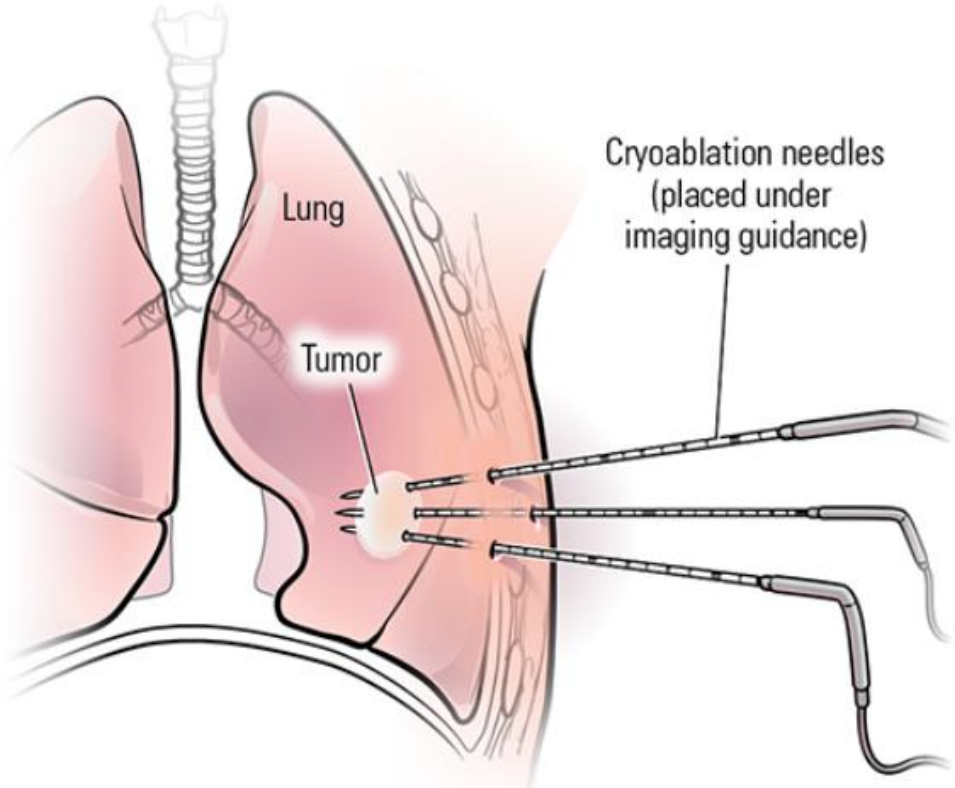
(For bronchoscopic bronchial alveolar lavage, use 31624)

32998 Ablation therapy for reduction or eradication of 1 or more pulmonary tumor(s) including pleura or chest wall when involved by tumor extension, percutaneous, including imaging guidance when performed, unilateral; radiofrequency

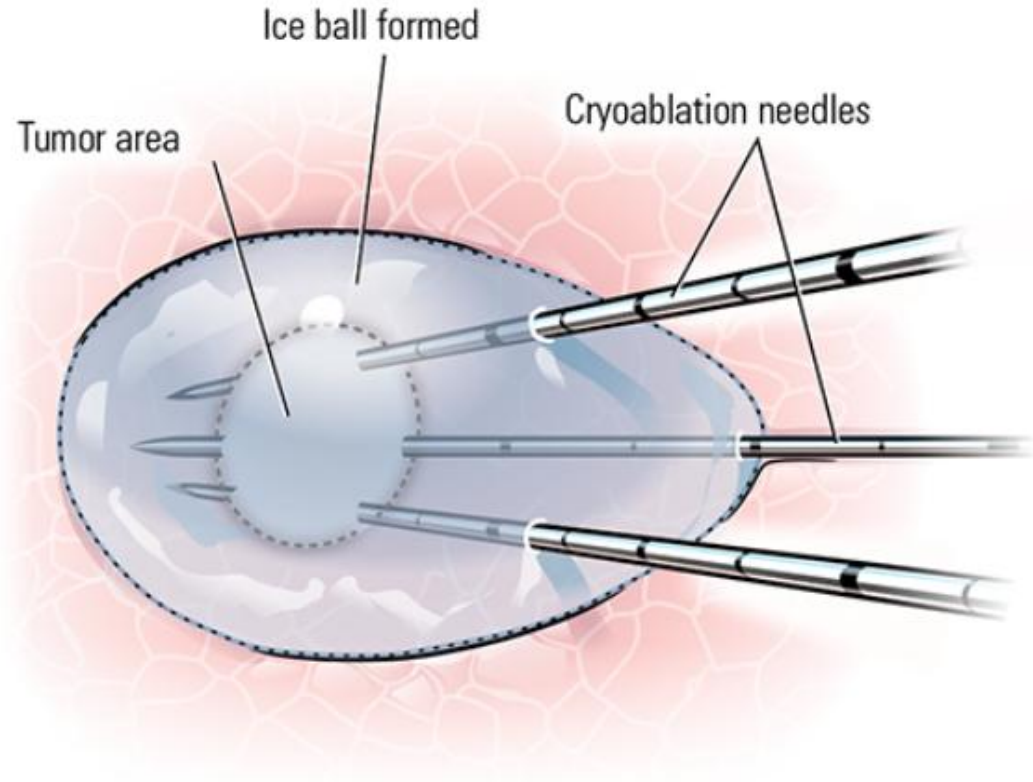
- *CPT Changes: An Insider's View* 2007, 2018
- *CPT Assistant* Nov 17:8
- *Clinical Examples in Radiology* Summer 12:11

 # 32994 cryoablation

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Nov 17:8
- *Clinical Examples in Radiology* Fall 17:4



(For bilateral procedure, report 32994, 32998 with modifier 50)

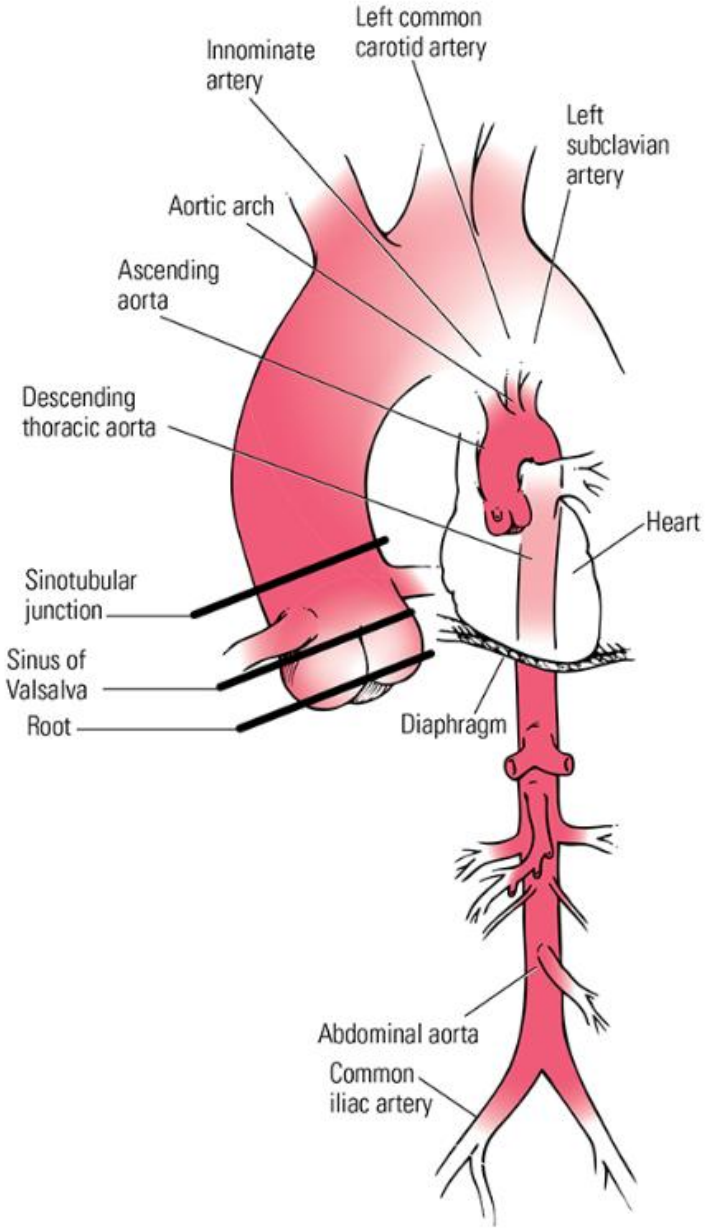


32999 Unlisted procedure, lungs and pleura

- *CPT Assistant* Jan 02:11, Feb 02:11, Jul 08:10, Apr 10:10, Aug 11:9, Jun 15:6, Dec 15:16
- *Clinical Examples in Radiology* Spring 06:8-9, Winter 23:16

Cryoablation Therapy of Pulmonary Tumors

32994



Surgery

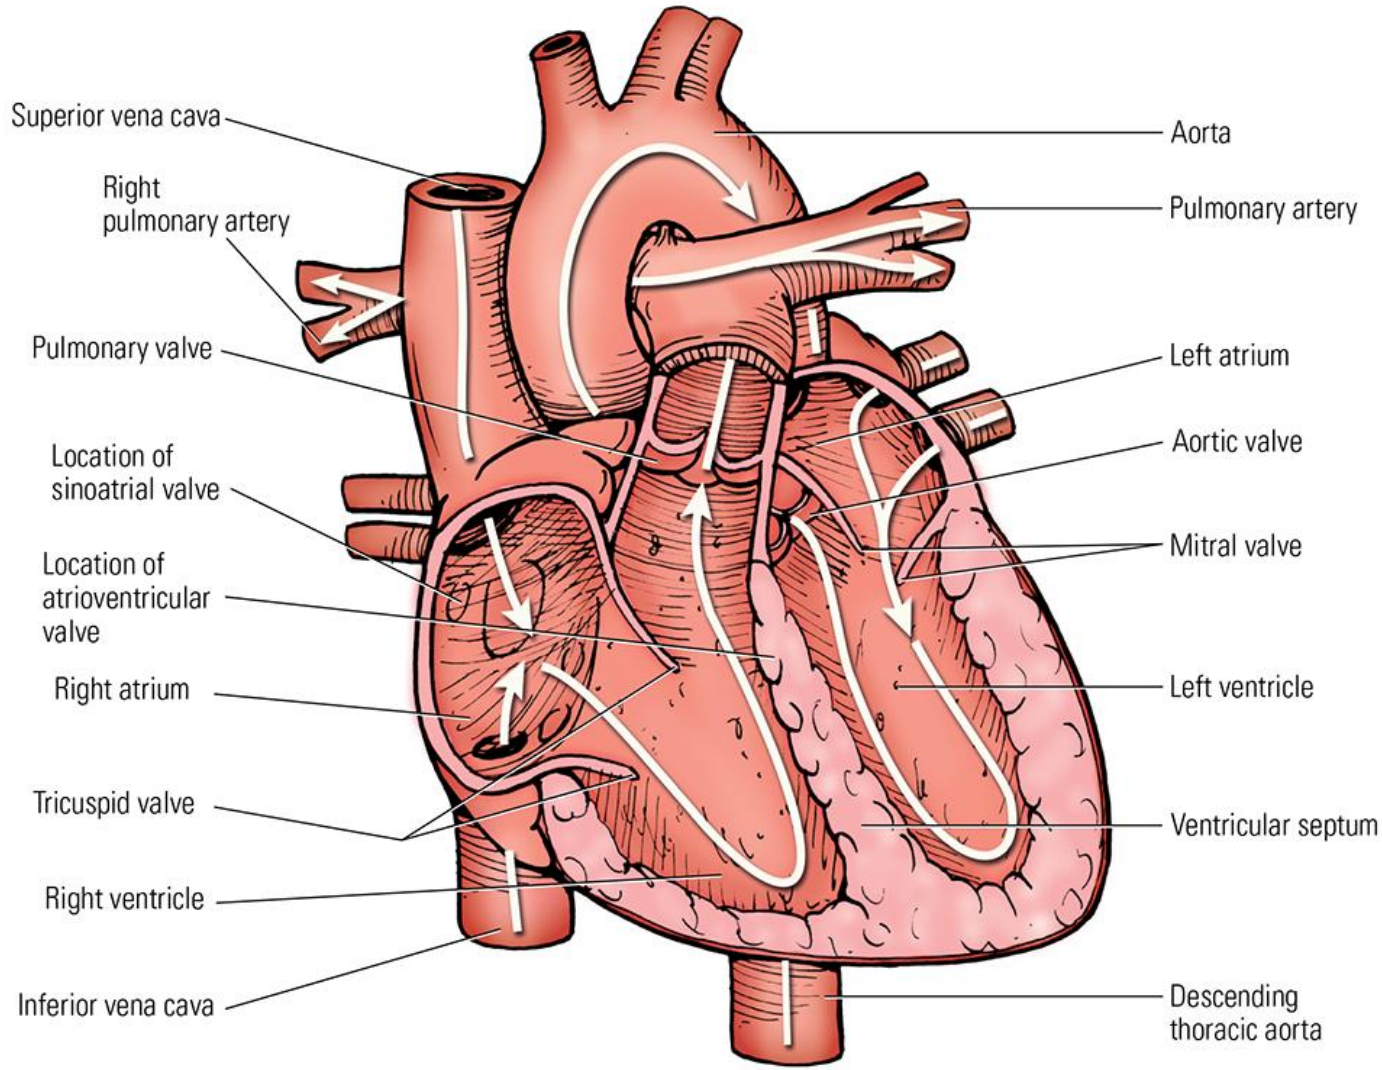
Cardiovascular System* (33016-37799)

The following is a listing of headings and subheadings that appear within the Cardiovascular System section of the CPT codebook. The subheadings or subsections denoted with asterisks (*) below have special instructions unique to that subsection. Where these are indicated, special notes or guidelines will be presented preceding those procedural terminology listings, referring to that subsection specifically. Note that all code ranges in each subsection are listed as they appear in the subsection, even if the code numbers are out of numerical sequence and/or repeated in the next subsection.

Heart and Pericardium (33016-33999)

- **Pericardium* (33016-33050)**
- **Cardiac Tumor (33120-33130)**
- **Transmyocardial Revascularization (33140-33141)**
- **Pacemaker or Implantable Defibrillator* (33202-33275)**
- **Phrenic Nerve Stimulation System* (33276-33288)**
- **Electrophysiologic Operative Procedures* (33250-33266)**
  - **Incision (33250-33268)**

Left common carotid artery
Innominate artery
Left subclavian artery
Aortic arch
Ascending aorta
Descending thoracic aorta
Heart
Sinotubular junction
Sinus of Valsalva
Root
Diaphragm
Abdominal aorta
Common iliac artery



Aortic Anatomy

- Endoscopy (33269-33266)

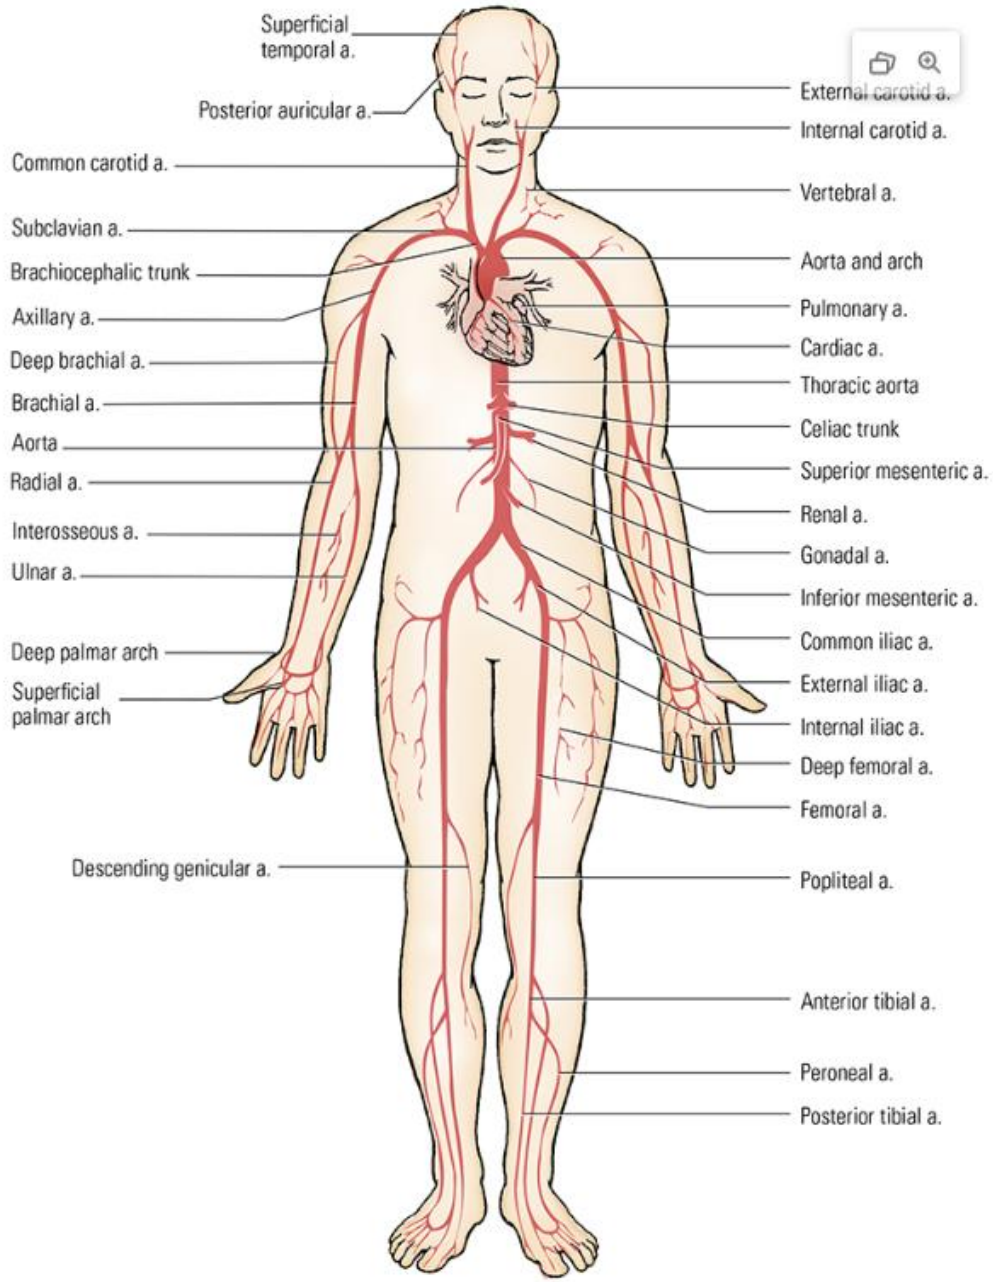
Subcutaneous Cardiac Rhythm Monitor* (33285-33286)
Implantable Hemodynamic Monitors* (33289)
Heart (Including Valves) and Great Vessels* (33300-33340)
Cardiac Valves (33361-33478)

- Aortic Valve* (33361-33417)
- Mitral Valve* (33418-33430)
- Tricuspid Valve (33460-33468)
- Pulmonary Valve* (33474-33478)

Other Valvular Procedures (33496)
Coronary Artery Anomalies* (33500-33507)
Endoscopy* (33508-33509)
Venous Grafting Only for Coronary Artery Bypass* (33510-33516)
Combined Arterial-Venous Grafting for Coronary Bypass* (33517-33530)

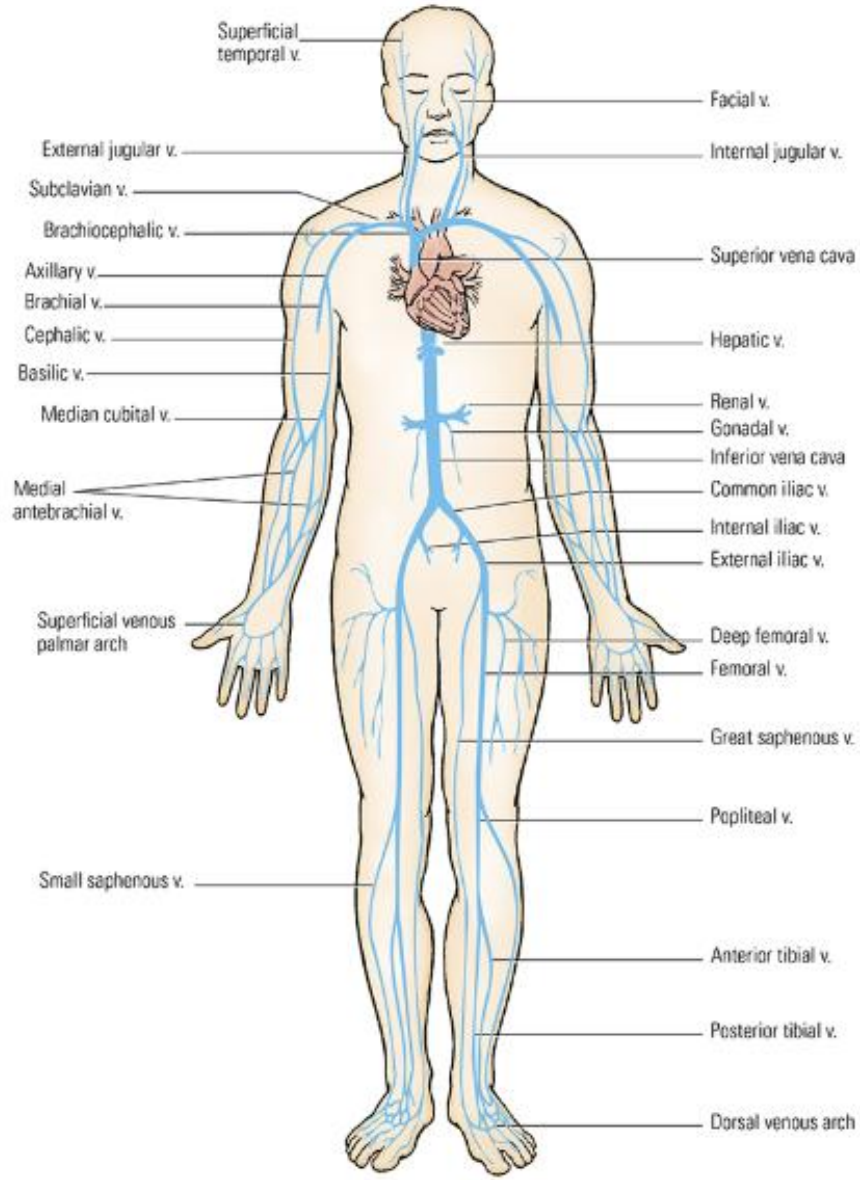
Cardiac Anatomy, Heart Blood Flow

Arterial Grafting for Coronary Artery Bypass* (33533-33548)
Coronary Endarterectomy (33572)
Single Ventricle and Other Complex Cardiac Anomalies (33600-33622)
Septal Defect (33641-33697)
Sinus of Valsalva (33702-33720)
Venous Anomalies (33724-33732)
Shunting Procedures* (33735-33768)
Transposition of the Great Vessels (33770-33783)
Truncus Arteriosus (33786-33788)
Aortic Anomalies (33800-33853)
Thoracic Aortic Aneurysm* (33858-33877)
►Endovascular Repair of Thoracic Aorta*◄ (33880-33886)
Endovascular Repair of Congenital Heart and Vascular Defects* (33894-33904)
Pulmonary Artery (33910-33926)
Heart/Lung Transplantation* (33927-33945)
Extracorporeal Membrane Oxygenation or Extracorporeal Life Support Services* (33946-33989)
Cardiac Assist* (33967-33993)
Other Procedures (33999)



Arteries and Veins* (34001-37799)

Embolectomy/Thrombectomy (34001-34490)
Arterial, With or Without Catheter (34001-34203)
Venous, Direct or With Catheter (34401-34490)
Venous Reconstruction (34501-34530)
Endovascular Repair of Abdominal Aorta and/or Iliac Arteries* (34701-34832)
Fenestrated Endovascular Repair of the Visceral and Infrarenal Aorta* (34839-34848)
Direct Repair of Aneurysm or Excision (Partial or Total) and Graft Insertion for Aneurysm, Pseudoaneurysm, Ruptured Aneurysm, and Associated Occlusive Disease* (35001-35152)
Repair Arteriovenous Fistula (35180-35190)
Repair Blood Vessel Other Than for Fistula, With or Without Patch Angioplasty (35201-35286)
Thromboendarterectomy (35301-35390)
Angioscopy (35400)



Bypass Graft (35500-35671)
- **Vein* (35500-35572)**
- **In-Situ Vein (35583-35587)**
- **Other Than Vein (35600-35671)**

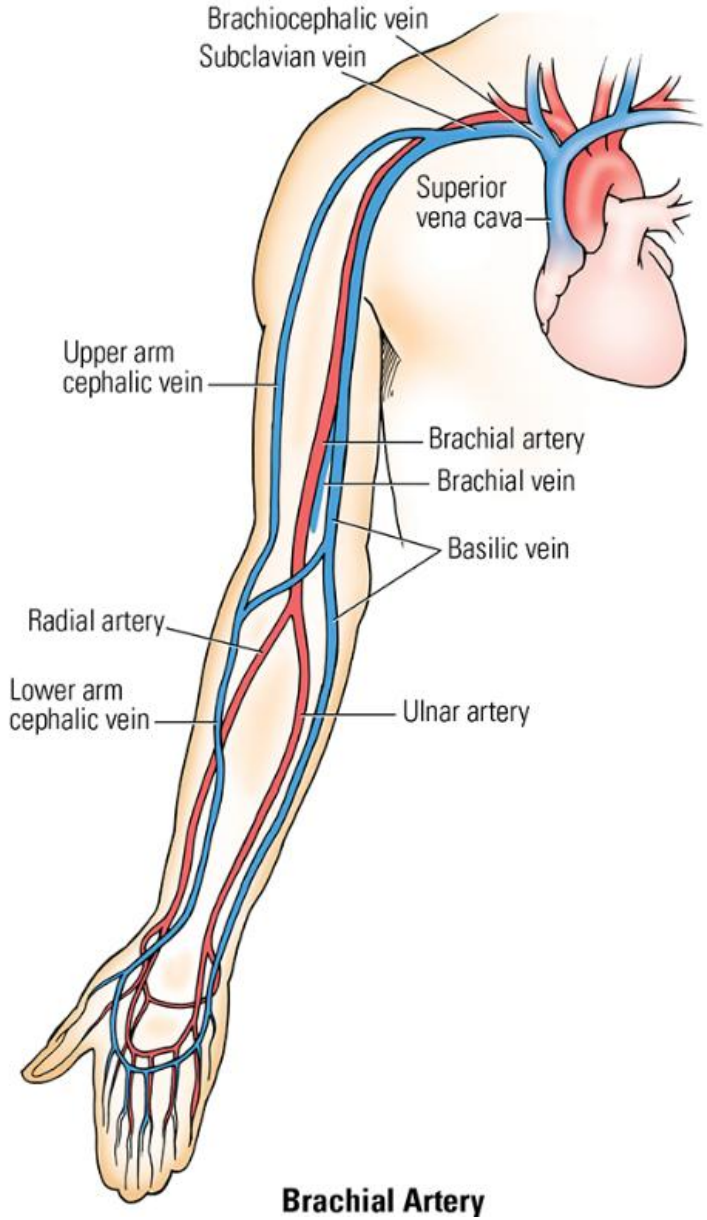
Composite Grafts* (35681-35683)
Adjuvant Techniques* (35685-35686)
Arterial Transposition (35691-35697)
Excision, Exploration, Repair, Revision (35700-35907)
Vascular Injection Procedures* (36000-36598)
- **Intravenous* (36000-36015)**
- **Intra-Arterial—Intra-Aortic (36100-36299)**
- **Venous* (36400-36522)**
- **Central Venous Access Procedures* (36555-36598)**
  - *Insertion of Central Venous Access Device (36555-36571)*
  - *Repair of Central Venous Access Device (36575-36576)*
  - *Partial Replacement of Central Venous Access Device (Catheter Only) (36578)*
  - *Complete Replacement of Central Venous Access Device Through Same Venous Access Site (36580-36585)*
  - *Removal of Central Venous Access Device (36589-36590)*
  - *Other Central Venous Access Procedures (36591-36598)*

Arterial (36600-36660)
Intraosseous (36680)
Hemodialysis Access, Intervascular Cannulation for Extracorporeal Circulation, or Shunt Insertion (36800-36861)
Dialysis Circuit* (36901-36909)
Portal Decompression Procedures (37140-37183)

Circulatory System, Arteries

Circulatory System, Veins

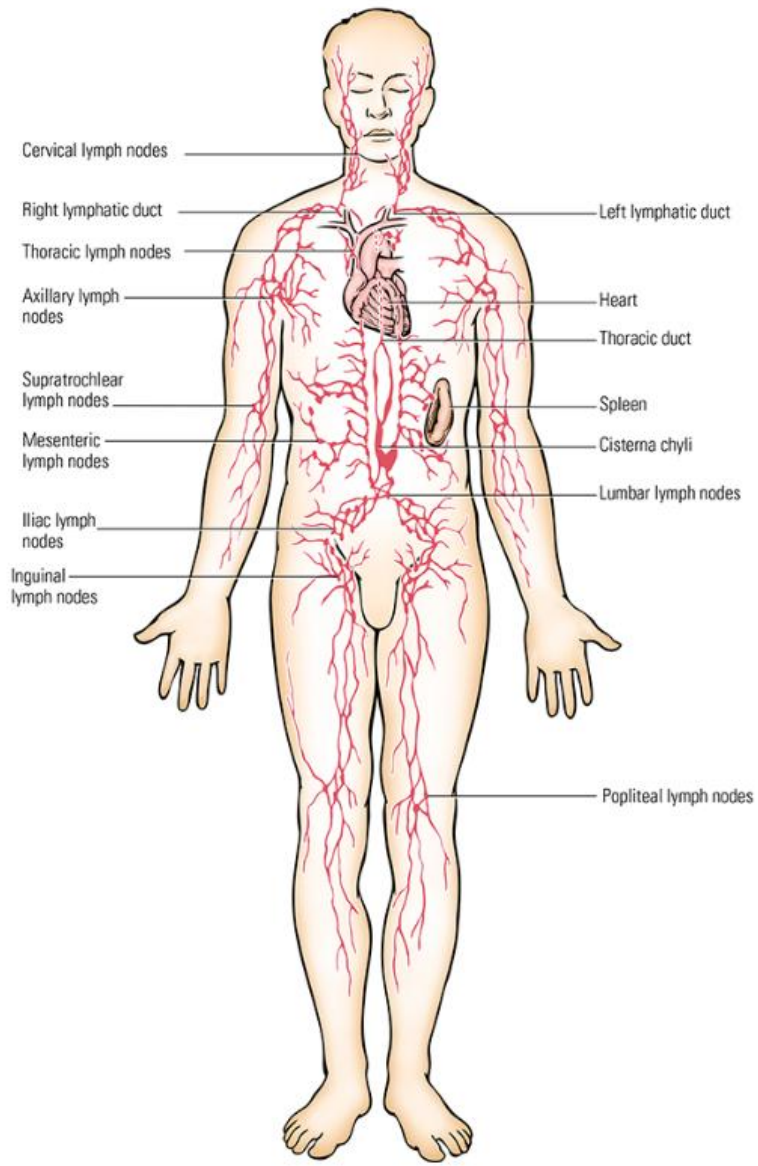
Transcatheter Procedures* (37184-37218)



- **Arterial Mechanical Thrombectomy (37184-37186)**
- **Venous Mechanical Thrombectomy (37187-37188)**
- **Other Procedures (37191-37218)**

Endovascular Revascularization (Open or Percutaneous, Transcatheter) (37254-37239)

- **►Endovascular Revascularization of Lower Extremities for Arterial Occlusive Disease*◄ (37254-37299)**
  - *►Iliac Vascular Territory◄ (37254-37262)*
  - *►Femoral and Popliteal Vascular Territory◄ (37263-37279)*
  - *►Tibial and Peroneal Vascular Territory◄ (37280-37295)*
  - *►Inframalleolar Vascular Territory◄ (37296-37299)*
- **►Endovascular Revascularization, Transluminal Balloon Angioplasty (Other Than Central Nervous System, Coronary, Pulmonary, Lower Extremity for Occlusive Disease, and Dialysis Circuit When Approached Through Ipsilateral Dialysis Access)*◄ (37246-37249)**
- **►Endovascular Revascularization, Transcatheter Intravascular Stent (Other Than Lower Extremity for Arterial Occlusive Disease, Cervical Carotid, Intracranial, Intracoronary Innominate and/or Intrathoracic Carotid, Extracranial Vertebral Artery, and Dialysis Circuit When Approached Through Ipsilateral Dialysis Access)*◄ (37236-37239)**



Vascular Embolization and Occlusion* (37241-37244)

Intravascular Ultrasound Services* (37252-37253)

Brachial Artery

Endoscopy* (37501)
Ligation (37565-37785)
Other Procedures (37788-37799)

Hemic and Lymphatic Systems (38100-38999)

Spleen (38100-38200)

- Excision (38100-38102)
- Repair (38115)

Transplantation and Post-Transplantation Cellular Infusions* (38240-38242)

Lymph Nodes and Lymphatic Channels (38300-38999)

- Incision (38300-38382)
- Excision (38500-38555)
- Limited Lymphadenectomy for Staging (38562-38564)
- Laparoscopy* (38570-38589)
- Radical Lymphadenectomy (Radical Resection of Lymph Nodes) (38700-38780)
- Introduction (38790-38794)
- Other Procedures (38900-38999)

Mediastinum and Diaphragm (39000-39599)

Mediastinum (39000-39499)

- Incision (39000-39010)
- Excision/Resection (39200-39220)
- Endoscopy (39401-39402)
- Other Procedures (39499)

Diaphragm (39501-39599)

- Repair (39501-39561)
- Other Procedures (39599)

Cardiovascular System

Selective vascular catheterizations should be coded to include introduction and all lesser order selective catheterizations used in the approach (eg, the description for a selective right middle cerebral artery catheterization includes the introduction and placement catheterization of the right common and internal carotid arteries).

Additional second and/or third order arterial catheterizations within the same family of arteries supplied by a single first order artery should be expressed by 36218 or 36248. Additional first order or higher catheterizations in vascular families supplied by a first order vessel different from a previously selected and coded family should be separately coded using the conventions described above.

(For monitoring, operation of pump and other nonsurgical services, see 99190-99192, 99291, 99292, 99358, 99359, 99360)

(For other medical or laboratory related services, see appropriate section)

(For radiological supervision and interpretation, see 75600-75970)

(For anatomic guidance of arterial and venous anatomy, see Appendix L)

Heart and Pericardium

Pericardium

In order to report pericardial drainage with insertion of indwelling catheter (33017, 33018, 33019), the catheter needs to remain in place when the procedure is completed. Codes 33017, 33018, 33019 should not be reported when a catheter is placed to aspirate fluid and then removed at the conclusion of the procedure.

Congenital cardiac anomaly for reporting percutaneous pericardial drainage with insertion of indwelling catheter is defined as abnormal situs (heterotaxy, dextrocardia, mesocardia), single ventricle anomaly/physiology, or any patient in the first 90-day postoperative period after repair of a congenital cardiac anomaly.

(For thoracoscopic (VATS) pericardial procedures, see 32601, 32604, 32658, 32659, 32661)

33016 Pericardiocentesis, including imaging guidance, when performed

- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Jan 20:7, Aug 22:18
- *Clinical Examples in Radiology* Winter 20:11

(Do not report 33016 in conjunction with 76942, 77002, 77012, 77021)

33017 Pericardial drainage with insertion of indwelling catheter, percutaneous, including fluoroscopy and/or ultrasound guidance, when performed; 6 years and older without congenital cardiac anomaly

- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Jan 20:7, Mar 20:14, Aug 22:18

33018 birth through 5 years of age or any age with congenital cardiac anomaly

- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Jan 20:7, Mar 20:14

(Do not report 33017, 33018 in conjunction with 75989, 76942, 77002, 77012, 77021)

(Do not report 33016, 33017, 33018 in conjunction with 93303-93325 when echocardiography is performed solely for the purpose of pericardiocentesis guidance)

(For CT-guided pericardial drainage, use 33019)

33019 Pericardial drainage with insertion of indwelling catheter, percutaneous, including CT guidance

- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Jan 20:7

(Do not report 33019 in conjunction with 75989, 76942, 77002, 77012, 77021)

33020 Pericardiotomy for removal of clot or foreign body (primary procedure)

- *CPT Assistant* Nov 21:13

33025 Creation of pericardial window or partial resection for drainage

- *CPT Assistant* Nov 21:13

(Do not report 33020, 33025 in conjunction with 32551, if pleural drain/chest tube is placed on the ipsilateral side)

(For thoracoscopic (VATS) pericardial window, use 32659)

33030 Pericardiectomy, subtotal or complete; without cardiopulmonary bypass

33031 with cardiopulmonary bypass

33050 Resection of pericardial cyst or tumor

- *CPT Changes: An Insider's View* 2012

(For open pericardial biopsy, use 39010)

(For thoracoscopic (VATS) resection of pericardial cyst, tumor or mass, use 32661)

Cardiac Tumor

33120 Excision of intracardiac tumor, resection with cardiopulmonary bypass

- *CPT Assistant* Mar 07:1

33130 Resection of external cardiac tumor

- *CPT Assistant* Mar 07:1

Transmyocardial Revascularization

33140 Transmyocardial laser revascularization, by thoracotomy; (separate procedure)

- *CPT Changes: An Insider's View* 2000, 2001, 2002
- *CPT Assistant* Nov 99:14, Nov 00:5, Apr 01:7

+ 33141 performed at the time of other open cardiac procedure(s) (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Apr 01:7

(Use 33141 in conjunction with 33390, 33391, 33404-33496, 33510-33536, 33542)

Pacemaker or Implantable Defibrillator

A pacemaker system with lead(s) includes a pulse generator containing electronics, a battery, and one or more leads. A lead consists of one or more electrodes, as well as conductor wires, insulation, and a fixation mechanism. Pulse generators are placed in a subcutaneous "pocket" created in either a subclavicular site or just above the abdominal muscles just below the ribcage. Leads may be inserted through a vein (transvenous) or they may be placed on the surface of the heart (epicardial). The epicardial location of leads requires a thoracotomy for insertion.

A single chamber pacemaker system with lead includes a pulse generator and one electrode inserted in either the atrium or ventricle. A dual chamber pacemaker system with two leads includes a pulse generator and one lead inserted in the right atrium and one lead inserted in the right ventricle. In certain circumstances, an additional lead may be required to achieve pacing of the left ventricle (bi-ventricular pacing). In this event, transvenous (cardiac vein) placement of the lead should be separately reported using code 33224 or 33225. For body surface–activation mapping to optimize electrical synchrony of a biventricular pacing or biventricular pacing-defibrillator system at the time of implant, also report 0695T with the appropriate code (ie, 33224, 33225, 33226). Epicardial placement of the lead should be separately reported using 33202, 33203.

A leadless cardiac pacemaker system includes a pulse generator with built-in battery and electrode for implantation in a cardiac chamber via a transvenous transcatheter approach. For implantation of a right ventricular leadless pacemaker system, use 33274. Insertion, replacement, or removal of a right ventricular leadless pacemaker system includes insertion of a catheter via transvenous access under fluoroscopic guidance into the right ventricle. For a complete dual-chamber leadless cardiac pacemaker system which is implanted in both the right ventricle and right atrium, or individual components of a dual-chamber leadless pacemaker system, see 0795T, 0796T, 0797T, 0798T, 0799T, 0800T, 0801T, 0802T, 0803T. Device evaluation at the time of leadless pacemaker insertion, replacement, or removal is included in 33274, 33275, 0795T, 0796T, 0797T, 0798T, 0799T, 0800T, 0801T, 0802T, 0803T, 0823T, 0824T, 0825T and is not separately reported. For subsequent leadless pacemaker device evaluation, see 93279, 93286, 93288, 93294, 93296, 0804T, 0826T.

For a single-chamber leadless cardiac pacemaker implanted in the right atrium that is not a component of a dual-chamber leadless pacemaker system, see 0823T, 0824T, 0825T.

Right heart catheterization (93451, 93453, 93456, 93457, 93460, 93461, 93593, 93594, 93596, 93597) may not be reported in conjunction with leadless pacemaker insertion and removal codes 33274, 33275, 0795T, 0796T, 0797T, 0798T, 0799T, 0800T, 0801T, 0802T, 0803T, 0823T, 0824T, 0825T, unless complete right heart catheterization is performed for an indication distinct from the leadless pacemaker procedure.

Like a pacemaker system, an implantable defibrillator system includes a pulse generator and electrodes. Three general categories of implantable defibrillators exist: transvenous implantable pacing cardioverter-defibrillator (ICD), subcutaneous implantable defibrillator (S-ICD), and substernal implantable cardioverter-defibrillator. Implantable pacing cardioverter-defibrillator devices use a combination of antitachycardia pacing, low-energy cardioversion or defibrillating shocks to treat ventricular tachycardia or ventricular fibrillation. The subcutaneous implantable defibrillator uses a single subcutaneous electrode to treat ventricular tachyarrhythmias. The substernal implantable cardioverter-defibrillator uses at least one substernal electrode to perform defibrillation, cardioversion, and antitachycardia pacing. Subcutaneous implantable defibrillators differ from transvenous implantable pacing cardioverter-defibrillators in that subcutaneous defibrillators do not provide antitachycardia pacing or chronic pacing. Substernal implantable defibrillators differ from both subcutaneous and transvenous implantable pacing cardioverter-defibrillators in that they provide antitachycardia pacing, but not chronic pacing.

Implantable defibrillator pulse generators may be implanted in a subcutaneous infraclavicular, axillary, or abdominal pocket. Removal of an implantable defibrillator pulse generator requires opening of the existing subcutaneous pocket and disconnection of the pulse generator from its electrode(s). A thoracotomy (or laparotomy in the case of abdominally placed pulse generators) is not required to remove the pulse generator.

The electrodes (leads) of an implantable defibrillator system may be positioned within the atrial and/or ventricular chambers of the heart via the venous system (transvenously), or placed on the surface of the heart (epicardial), or positioned under the skin overlying the heart (subcutaneous). Electrode positioning on the epicardial surface of the heart requires a thoracotomy or thoracoscopic placement of the leads. Epicardial placement of electrode(s) may be separately reported using 33202, 33203. The electrode (lead) of a subcutaneous implantable defibrillator system is tunneled under the skin to the left parasternal margin. Subcutaneous placement of electrode may be reported using 33270 or 33271. The electrode (lead) of a substernal implantable defibrillator system is tunneled subcutaneously and placed into the substernal anterior mediastinum without entering the pericardial cavity and may be reported using 0571T, 0572T. In certain circumstances, an additional electrode may be required to achieve pacing of the left ventricle (bi-ventricular pacing). In this event, transvenous (cardiac vein) placement of the electrode may be separately reported using 33224 or 33225.

Removal of a transvenous electrode(s) may first be attempted by transvenous extraction (33234, 33235, or 33244). However, if transvenous extraction is unsuccessful, a thoracotomy may be required to remove the electrodes (33238 or 33243). Use 33212, 33213, 33221, 33230, 33231, 33240 as appropriate, in addition to the thoracotomy or endoscopic epicardial lead placement codes (33202 or 33203) to report the insertion of the generator if done by the same physician during the same session. Removal of a subcutaneous implantable defibrillator electrode may be separately reported using 33272. For removal of a leadless pacemaker system without replacement, use 33275. For removal and replacement of a leadless pacemaker system during the same session, use 33274.

When the “battery” of a pacemaker system with lead(s) or implantable defibrillator is changed, it is actually the pulse generator that is changed. Removal of only the pacemaker or implantable defibrillator pulse generator is reported with 33233 or 33241. If only a pulse generator is inserted or replaced without any right atrial and/or right ventricular lead(s) inserted or replaced, report the appropriate code for only pulse generator insertion or replacement based on the number of final existing lead(s) (33227, 33228, 33229 and 33262, 33263, 33264). Do not report removal of a pulse generator (33233 or 33241) separately for this service. Insertion of a new pulse generator, when existing lead(s) are already in place and when no prior pulse generator is removed, is reported with 33212, 33213, 33221, 33230, 33231, 33240. When a pulse generator insertion involves the insertion or replacement of one or more right atrial and/or right ventricular lead(s) or subcutaneous lead(s), use system codes 33206, 33207, 33208 for pacemaker, 33249 for implantable pacing cardioverter-defibrillator, or 33270 for subcutaneous implantable defibrillator. When reporting the system insertion or replacement codes, removal of a pulse generator (33233 or 33241) may be reported separately, when performed. In addition, extraction of leads 33234, 33235 or 33244 for transvenous or 33272 for subcutaneous may be reported separately, when performed. An exception involves a pacemaker upgrade from single to dual system that includes removal of pulse generator, replacement of new pulse generator, and insertion of new lead, reported with 33214. For insertion, removal, relocation, and repositioning of cardiac contractility modulation-defibrillation codes, see 0915T-0925T.

Revision of a skin pocket is included in 33206-33249, 33262, 33263, 33264, 33270, 33271, 33272, 33273. When revision of a skin pocket involves incision and drainage of a hematoma or complex wound infection, see 10140, 10180, 11042, 11043, 11044, 11045, 11046, 11047, as appropriate.

Relocation of a skin pocket for a pacemaker (33222) or implantable defibrillator (33223) is necessary for various clinical situations such as infection or erosion. Relocation of an existing pulse generator may be performed as a stand-alone procedure or at the time of a pulse generator or electrode insertion, replacement, or repositioning. When skin pocket relocation is performed as part of an explant of an existing generator followed by replacement with a new generator, the pocket relocation is reported separately. Skin pocket relocation includes all work associated with the initial pocket (eg, opening the pocket, incision and drainage of hematoma or abscess if performed, and any closure performed), in addition to the creation of a new pocket for the new generator to be placed.

Repositioning of a pacemaker electrode, implantable defibrillator electrode(s), or a left ventricular pacing electrode is reported using 33215, 33226, or 33273, as appropriate.

Device evaluation codes 93260, 93261, 93279-93298 for pacemaker system with lead(s) may not be reported in conjunction with pulse generator and lead insertion or revision codes 33206-33249, 33262, 33263, 33264, 33270, 33271, 33272, 33273. For leadless pacemaker systems, device evaluation codes 93279, 93286, 93288, 93294, 93296 may not be reported in conjunction with leadless pacemaker insertion and removal codes 33274, 33275. Defibrillator threshold testing (DFT) during transvenous implantable defibrillator insertion or replacement may be separately reported using 93640, 93641. DFT testing during subcutaneous implantable defibrillator system insertion is not separately reportable. DFT testing for transvenous or subcutaneous implantable defibrillator in follow-up or at the time of replacement may be separately reported using 93642 or 93644.

Radiological supervision and interpretation related to the pacemaker or implantable defibrillator procedure is included in 33206-33249, 33262, 33263, 33264, 33270, 33271, 33272, 33273, 33274, 33275. Fluoroscopy (76000, 77002), ultrasound guidance for vascular access (76937), right ventriculography (93566), and femoral venography (75820) are included in 33274, 33275, when performed). To report fluoroscopic guidance for diagnostic lead evaluation without lead insertion, replacement, or revision procedures, use 76000.

Procedure	System	
	Pacemaker	**Implantable Defibrillator**
Insert transvenous single lead only without pulse generator	33216	33216
Insert transvenous dual leads without pulse generator	33217	33217
Insert transvenous multiple leads without pulse generator	33217 + 33224	33217 + 33224
Insert subcutaneous defibrillator electrode only without pulse generator	N/A	33271
Initial pulse generator insertion only with existing single lead, includes transvenous or subcutaneous defibrillator lead	33212	33240
Initial pulse generator insertion only with existing dual leads	33213	33230
Initial pulse generator insertion only with existing multiple leads	33221	33231
Initial pulse generator insertion or replacement plus insertion of transvenous single lead	33206 (atrial) or 33207 (ventricular)	33249
Initial pulse generator insertion or replacement plus insertion of transvenous dual leads	33208	33249
Initial pulse generator insertion or replacement plus insertion of transvenous multiple leads	33208 + 33225	33249 + 33225
Initial pulse generator insertion or replacement plus insertion of subcutaneous defibrillator electrode	N/A	33270
Insertion, replacement, or removal and replacement of permanent single-chamber leadless ventricular pacemaker	33274	N/A
Insertion permanent single-chamber leadless pacemaker, right atrial	0823T	N/A
Insertion permanent dual-chamber leadless pacemaker, right atrial and right ventricular components	0795T	N/A
Insertion permanent dual-chamber leadless pacemaker, right atrial component	0796T	N/A
Insertion permanent dual-chamber leadless pacemaker, right ventricular component (when part of a dual-chamber leadless pacemaker system)	0797T	N/A
Upgrade single chamber system to dual chamber system	33214 (includes removal of existing pulse generator)	33241 + 33249
Removal pulse generator only (without replacement)	33233	33241
Removal pulse generator with replacement pulse generator only single lead system (applies to transvenous or subcutaneous defibrillator lead systems)	33227	33262
Removal pulse generator with replacement pulse generator only dual lead system (transvenous)	33228	33263

Removal pulse generator with replacement pulse generator only multiple lead system (transvenous)	33229	33264
Removal transvenous electrode only single lead system	33234	33244
Removal transvenous electrode only dual lead system	33235	33244
Removal subcutaneous defibrillator lead only	N/A	33272
Removal and replacement of pulse generator and transvenous electrodes	33233 + (33234 or 33235) + (33206, 33207 or 33208) and 33225, when appropriate	33241 + 33244 + 33249 and 33225, when appropriate
Removal and replacement of implantable defibrillator pulse generator and subcutaneous electrode	N/A	33272 + 33241 + 33270
Removal and replacement permanent single-chamber leadless pacemaker, right atrial	0825T	N/A
Removal and replacement permanent dual-chamber leadless pacemaker, right atrial and right ventricular components	0801T	N/A
Removal and replacement permanent dual-chamber leadless pacemaker, right atrial component	0802T	N/A
Removal and replacement permanent dual-chamber leadless pacemaker, right ventricular component (when part of a dual-chamber leadless pacemaker system)	0803T	N/A
Removal of permanent single-chamber leadless ventricular pacemaker	33275	N/A
Removal permanent single-chamber leadless right atrial pacemaker	0824T	N/A
Removal permanent dual-chamber leadless pacemaker, right atrial and right ventricular components	0798T	N/A
Removal permanent dual-chamber leadless pacemaker, right atrial component	0799T	N/A
Removal permanent dual-chamber leadless pacemaker, right ventricular component (when part of a dual-chamber leadless pacemaker system)	0800T	N/A
Conversion of existing system to bi-ventricular system (addition of LV lead and removal of current pulse generator with insertion of new pulse generator with bi-ventricular pacing capabilities)	33225 + 33228 or 33229	33225 + 33263 or 33264

The following definitions apply to 33206-33249, 33262, 33263, 33264, 33270, 33271, 33272, 33273.

Single lead: a pacemaker or implantable defibrillator with pacing and sensing function in only one chamber of the heart or a subcutaneous electrode.

Dual lead: a pacemaker or implantable defibrillator with pacing and sensing function in only two chambers of the heart.

Multiple lead: a pacemaker or implantable defibrillator with pacing and sensing function in three or more chambers of the heart.

33202 Insertion of epicardial electrode(s); open incision (eg, thoracotomy, median sternotomy, subxiphoid approach)

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Jun 12:5, Nov 14:5, May 15:3, Aug 16:5, Mar 19:6

33203 endoscopic approach (eg, thoracoscopy, pericardioscopy)

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Jun 12:4, Nov 14:5, May 15:3, Aug 16:5

(When epicardial lead placement is performed with insertion of the generator, report 33202, 33203 in conjunction with 33212, 33213, 33221, 33230, 33231, 33240)

33206 Insertion of new or replacement of permanent pacemaker with transvenous electrode(s); atrial

- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Summer 94:10, 17, Oct 96:9, Nov 99:15, Jun 08:14, Jun 12:3, Apr 13:10, Nov 14:5, May 15:3, Aug 16:5

33207 ventricular

- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Summer 94:10, 17, Oct 96:9, Nov 99:15, Jun 08:14, Jun 12:3, Apr 13:10, May 15:3, Aug 16:5

33208 atrial and ventricular

- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Summer 94:10, 17, Jul 96:10, Nov 99:15, Jun 08:14, Jun 12:3, Apr 13:10, Nov 14:5, May 15:3, Aug 16:5

(Do not report 33206-33208 in conjunction with 33227-33229)

(Do not report 33206, 33207, 33208 in conjunction with 33216, 33217)

(Codes 33206-33208 include subcutaneous insertion of the pulse generator and transvenous placement of electrode[s])

(For removal and replacement of pacemaker pulse generator and transvenous electrode(s), use 33233 in conjunction with either 33234 or 33235 and 33206-33208)

33210 Insertion or replacement of temporary transvenous single chamber cardiac electrode or pacemaker catheter (separate procedure)

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Summer 94:10, 17, Mar 07:1, Aug 11:4, Jun 12:3, Jan 13:6, May 15:3, Aug 16:5

33211 Insertion or replacement of temporary transvenous dual chamber pacing electrodes (separate procedure)

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Summer 94:10, 17, Mar 07:1, Aug 11:4, Jun 12:3, May 15:3, Aug 16:5

33212 Insertion of pacemaker pulse generator only; with existing single lead

- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Summer 94:10, 18, Fall 94:24, May 04:15, Jun 08:14, Jun 12:3, Nov 14:5, May 15:3, Aug 16:5

33213 with existing dual leads

- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Summer 94:10, 18, Oct 96:10, Feb 98:11, Jun 12:3, Nov 14:5, May 15:3, Aug 16:5

 # 33221 with existing multiple leads

- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Jun 12:3, Nov 14:5, May 15:3, Aug 16:5

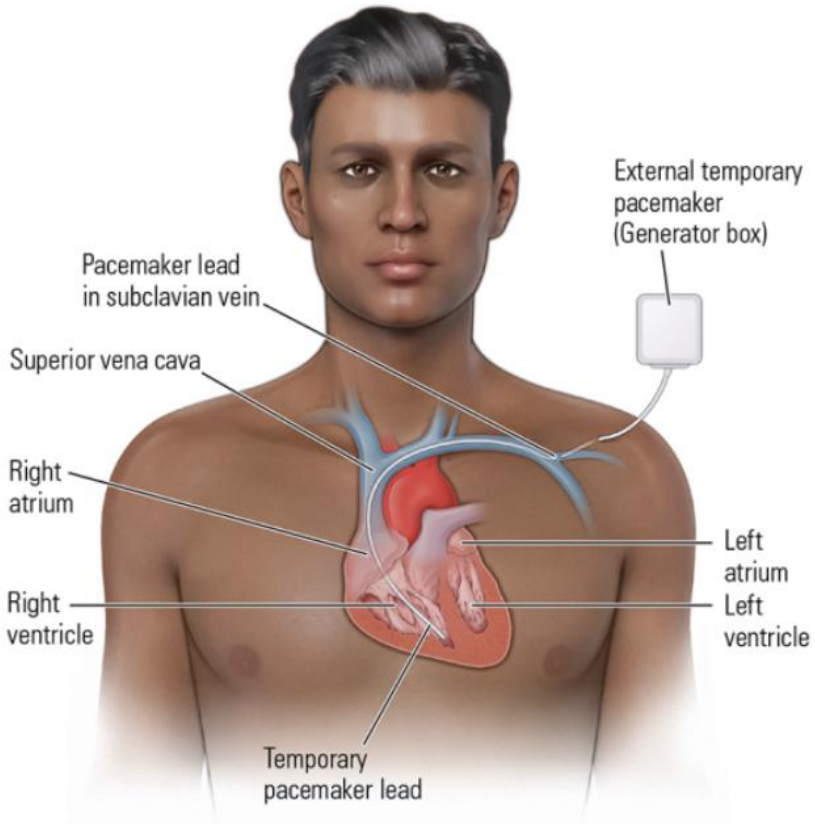
(Do not report 33212, 33213, 33221 in conjunction with 33216, 33217)

(Do not report 33212, 33213, 33221 in conjunction with 33233 for removal and replacement of the pacemaker pulse generator. Use 33227-33229, as appropriate, when pulse generator replacement is indicated)

(When epicardial lead placement is performed with insertion of generator, report 33202, 33203 in conjunction with 33212, 33213, 33221)

33214 Upgrade of implanted pacemaker system, conversion of single chamber system to dual chamber system (includes removal of previously placed pulse generator, testing of existing lead, insertion of new lead, insertion of new pulse generator)

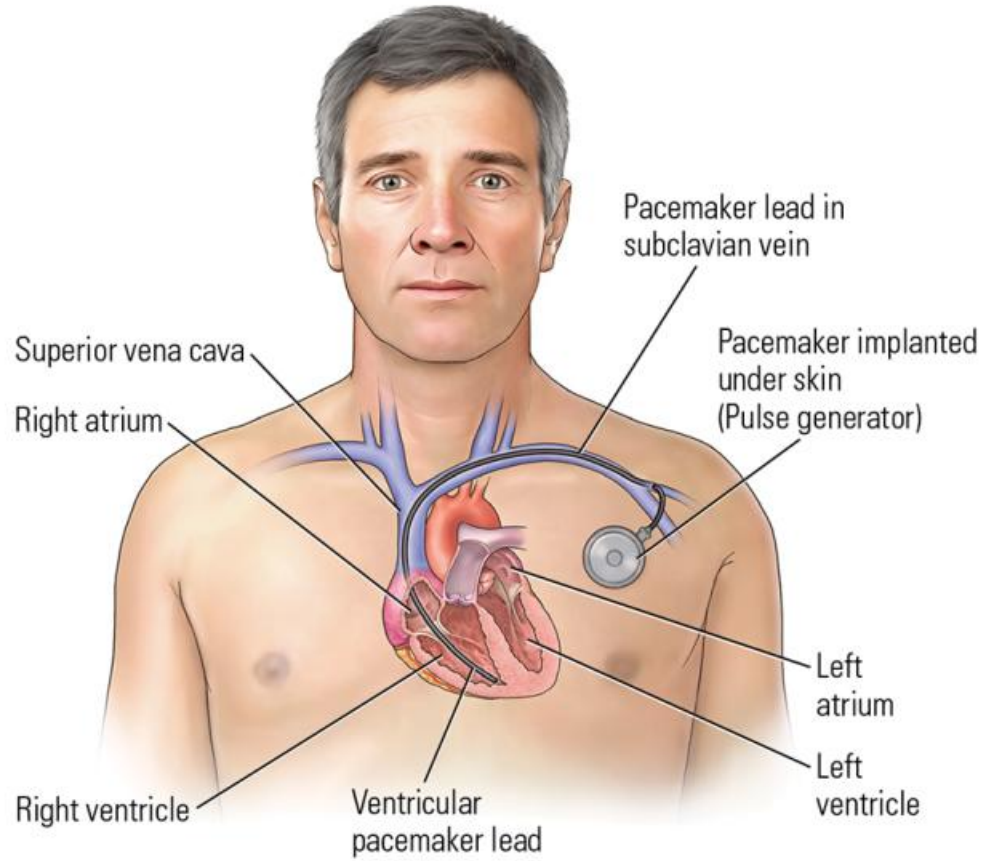
- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Summer 94:10, 18, Fall 94:24, Jun 08:14, Jun 12:3, Nov 14:5, Aug 16:5



(Do not report 33214 in conjunction with 33216, 33217, 33227, 33228, 33229)

33215 Repositioning of previously implanted transvenous pacemaker or implantable defibrillator (right atrial or right ventricular) electrode

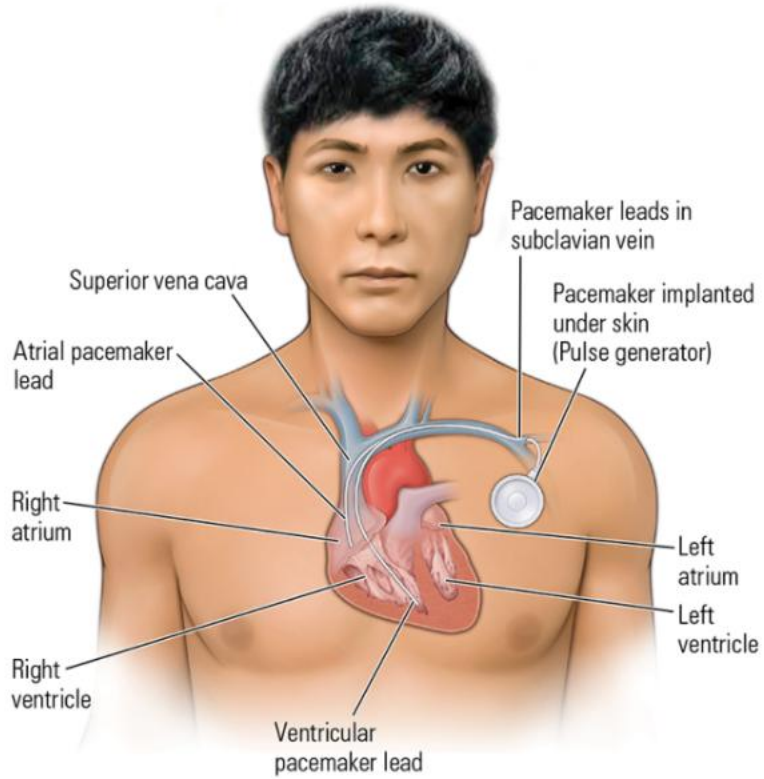
- *CPT Changes: An Insider's View* 2003, 2015
- *CPT Assistant* Jun 12:3, Nov 14:5, Aug 16:5



Temporary Pacemaker
33210

The pacemaker pulse generator with the electrodes transvenously placed

Implanted Pacemaker
33212



In 33212, a pacemaker pulse generator is inserted with an existing single lead.

Implanted Pacemaker

33213, 33214

In 33213, a pacemaker pulse generator is inserted with existing dual leads.
In 33214, an upgrade to an existing pacemaker system is done.

33216 Insertion of a single transvenous electrode, permanent pacemaker or implantable defibrillator

CPT Changes: An Insider's View 2000, 2003, 2010, 2015, 2017

CPT Assistant Summer 94:10, 18, Jul 96:10, Nov 99:15-16, Aug 16:5

(Do not report 33216 in conjunction with 33206, 33207, 33208, 33212, 33213, 33214, 33221, 33227, 33228, 33229, 33230, 33231, 33240, 33249, 33262, 33263, 33264)

33217 Insertion of 2 transvenous electrodes, permanent pacemaker or implantable defibrillator

CPT Changes: An Insider's View 2000, 2010, 2015, 2017

CPT Assistant Summer 94:10, 18, Jul 96:10, Nov 99:15-16, Jul 00:5, Apr 09:8, Jun 12:3, Aug 16:5

(Do not report 33217 in conjunction with 33206, 33207, 33208, 33212, 33213, 33214, 33221, 33227, 33228, 33229, 33230, 33231, 33240, 33249, 33262, 33263, 33264)

(For insertion or replacement of a cardiac venous system lead, see 33224, 33225)

33218 Repair of single transvenous electrode, permanent pacemaker or implantable defibrillator

CPT Changes: An Insider's View 2000, 2012, 2015, 2017

CPT Assistant Summer 94:10, 19, Oct 96:9, Nov 99:15-16, Jun 12:3, Aug 16:5

(For repair of single permanent pacemaker or implantable defibrillator electrode with replacement of pulse generator, see 33227, 33228, 33229 or 33262, 33263, 33264 and 33218)

33220 Repair of 2 transvenous electrodes for permanent pacemaker or implantable defibrillator

CPT Changes: An Insider's View 2000, 2012, 2015, 2017

CPT Assistant Summer 94:10, 19, Oct 96:9, Nov 99:15-16, Jun 08:14, Jun 12:3, Aug 16:5

(For repair of 2 transvenous electrodes for permanent pacemaker or implantable defibrillator with replacement of pulse generator, use 33220 in conjunction with 33228, 33229, 33263, 33264)

33221 Code is out of numerical sequence. See 33212-33215

33222 Relocation of skin pocket for pacemaker

CPT Changes: An Insider's View 2000, 2014, 2017

CPT Assistant Spring 94:30, Summer 94:10, Nov 99:15-16, Jun 08:14, Jun 12:3, Nov 14:5, May 15:3, Aug 16:5

(Do not report 33222 in conjunction with 10140, 10180, 11042, 11043, 11044, 11045, 11046, 11047, 13100, 13101, 13102)

33223 Relocation of skin pocket for implantable defibrillator

CPT Changes: An Insider's View 2000, 2010, 2014, 2015, 2017

CPT Assistant Summer 94:10, 19, Nov 99:15-16, Jun 08:14, Jun 12:3, Nov 14:5, Aug 16:5

(Do not report 33223 in conjunction with 10140, 10180, 11042, 11043, 11044, 11045, 11046, 11047, 13100, 13101, 13102)

33224 Insertion of pacing electrode, cardiac venous system, for left ventricular pacing, with attachment to previously placed pacemaker or implantable defibrillator pulse generator (including revision of pocket, removal, insertion, and/or replacement of existing generator)

CPT Changes: An Insider's View 2003, 2012, 2015

CPT Assistant Dec 07:16, Jun 12:3, Nov 14:5, May 15:3, Aug 16:5

(When epicardial electrode placement is performed, report 33224 in conjunction with 33202, 33203)

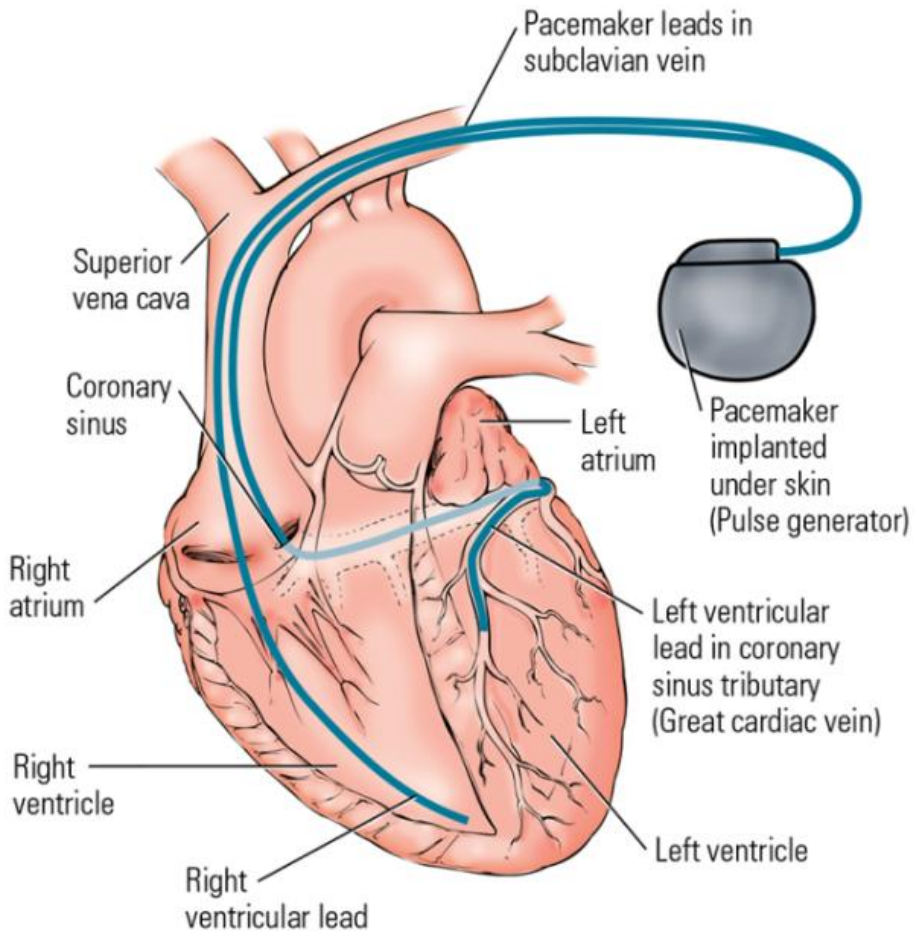
(Use 33224 in conjunction with 0695T when body surface–activation mapping to optimize electrical synchrony is also performed)

+ 33225 Insertion of pacing electrode, cardiac venous system, for left ventricular pacing, at time of insertion of implantable defibrillator or pacemaker pulse generator (eg, for upgrade to dual chamber system) (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2003, 2012, 2013, 2015

CPT Assistant Dec 07:16, Jun 12:3, Nov 14:5, May 15:3, Aug 16:5

(Use 33225 in conjunction with 33206, 33207, 33208, 33212, 33213, 33214, 33216, 33217, 33221, 33223, 33228, 33229, 33230, 33231, 33233, 33234, 33235, 33240, 33249, 33263, 33264)



(Use 33225 in conjunction with 33222 only with pacemaker pulse generator pocket relocation and with 33223 only with implantable defibrillator [ICD] pocket relocation)

(Use 33225 in conjunction with 0695T when body surface–activation mapping to optimize electrical synchrony is also performed)

Biventricular Pacing

33224-33226

Insertion or repositioning of venous pacing electrode

33226 Repositioning of previously implanted cardiac venous system (left ventricular) electrode (including removal, insertion and/or replacement of existing generator)
- *CPT Changes: An Insider's View* 2003, 2012
- *CPT Assistant* Jun 12:3, Nov 14:5, May 15:3, Aug 16:5

(Use 33226 in conjunction with 0695T when body surface–activation mapping to optimize electrical synchrony is also performed)

33227 Code is out of numerical sequence. See 33226-33244

33228 Code is out of numerical sequence. See 33226-33244

33229 Code is out of numerical sequence. See 33226-33244

33230 Code is out of numerical sequence. See 33226-33244

33231 Code is out of numerical sequence. See 33226-33244

33233 Removal of permanent pacemaker pulse generator only
- *CPT Changes: An Insider's View* 2000, 2012, 2017
- *CPT Assistant* Summer 94:10, 19, Fall 94:24, Oct 96:10, Jun 12:3, Nov 14:5, Aug 16:5

 # 33227 Removal of permanent pacemaker pulse generator with replacement of pacemaker pulse generator; single lead system
- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Jun 12:3, Apr 13:10, Nov 14:5, Aug 16:5

 # 33228 dual lead system
- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Jun 12:3, Apr 13:10, Aug 16:5

 # 33229 multiple lead system
- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Jun 12:3, Apr 13:10, Nov 14:5, Aug 16:5

(Do not report 33227, 33228, 33229 in conjunction with 33214, 33216, 33217, 33233)

(For removal and replacement of pacemaker pulse generator and transvenous electrode[s], use 33233 in conjunction with either 33234 or 33235 and 33206-33208)

33234 Removal of transvenous pacemaker electrode(s); single lead system, atrial or ventricular
- *CPT Changes: An Insider's View* 2000, 2017
- *CPT Assistant* Summer 94:10, 19, Nov 99:16, Jun 12:3, Oct 12:15, Nov 14:5, Aug 16:5

33235 dual lead system
- *CPT Changes: An Insider's View* 2000, 2017
- *CPT Assistant* Summer 94:10, 19, Nov 99:16, Jun 12:3, Oct 12:15, Dec 13:14, Nov 14:5, Aug 16:5

33236 Removal of permanent epicardial pacemaker and electrodes by thoracotomy; single lead system, atrial or ventricular
- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Summer 94:10, 19, Nov 99:16, Jun 12:3, Aug 16:5

33237 dual lead system
- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Summer 94:10, 19, Nov 99:16, Jun 12:3, Aug 16:5, Mar 19:6

33238 Removal of permanent transvenous electrode(s) by thoracotomy
- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Summer 94:10, 19, Nov 99:16, Jun 12:3, Nov 14:5, Aug 16:5

33240 Insertion of implantable defibrillator pulse generator only; with existing single lead
- *CPT Changes: An Insider's View* 2000, 2012, 2015, 2017
- *CPT Assistant* Summer 94:40, Jun 96:10, Nov 99:16-17, Jul 00:5, Apr 04:6, Jun 08:14, Jun 12:3, Nov 14:5, Aug 16:5

(Do not report 33240 in conjunction with 33271, 93260, 93261)

(Use 33240, as appropriate, in addition to the epicardial lead placement codes to report the insertion of the generator when done by the same physician during the same session)

 # 33230 with existing dual leads

CPT Changes: An Insider's View 2012, 2015, 2017

CPT Assistant Jun 12:3, Nov 14:5, Aug 16:5

 # 33231 with existing multiple leads

CPT Changes: An Insider's View 2012, 2015, 2017

CPT Assistant Jun 12:3, Nov 14:5, Aug 16:5

(Do not report 33230, 33231, 33240 in conjunction with 33216, 33217)

(Do not report 33230, 33231, 33240 in conjunction with 33241 for removal and replacement of the implantable defibrillator pulse generator. Use 33262, 33263, 33264, as appropriate, when pulse generator replacement is indicated)

(When epicardial lead placement is performed with insertion of generator, report 33202, 33203 in conjunction with 33230, 33231, 33240)

33241 Removal of implantable defibrillator pulse generator only

CPT Changes: An Insider's View 2000, 2012, 2015, 2017

CPT Assistant Summer 94:40, Nov 99:16-17, Jun 12:3, Nov 14:5, Aug 16:5

(Do not report 33241 in conjunction with 93260, 93261)

(Do not report 33241 in conjunction with 33230, 33231, 33240 for removal and replacement of the implantable defibrillator pulse generator. Use 33262, 33263, 33264, as appropriate, when pulse generator replacement is indicated)

(For removal and replacement of an implantable defibrillator pulse generator and electrode[s], use 33241 in conjunction with either 33243 or 33244 and 33249 for transvenous electrode[s] or 33270 and 33272 for subcutaneous electrode)

(For removal of implantable defibrillator with substernal lead, generator only, use 0580T)

 # 33262 Removal of implantable defibrillator pulse generator with replacement of implantable defibrillator pulse generator; single lead system

CPT Changes: An Insider's View 2012, 2015, 2017

CPT Assistant Jun 12:3, Nov 14:5, Aug 16:5

(Do not report 33262 in conjunction with 33271, 93260, 93261, 0614T)

(For removal and replacement of substernal implantable pulse generator, use 0614T)

 # 33263 dual lead system

CPT Changes: An Insider's View 2012, 2015, 2017

CPT Assistant Jun 12:3, Dec 13:17, Nov 14:5, Aug 16:5

 # 33264 multiple lead system

CPT Changes: An Insider's View 2012, 2015, 2017

CPT Assistant Jun 12:3, Dec 13:17, Nov 14:5, Aug 16:5

(Do not report 33262, 33263, 33264 in conjunction with 33216, 33217, 33241)

(For removal of electrode[s] by thoracotomy in conjunction with pulse generator removal or replacement, use 33243 in conjunction with 33241 or 33262, 33263, 33264)

(For removal of electrode[s] by transvenous extraction in conjunction with pulse generator removal or replacement, use 33244 in conjunction with 33241 or 33262, 33263, 33264)

(For repair of implantable defibrillator pulse generator and/or leads, see 33218, 33220)

(For removal of subcutaneous electrode in conjunction with implantable defibrillator pulse generator removal or replacement, use 33272 in conjunction with 33241 or 33262)

Coding Tip

Reporting for Electrode Removal and Lead Placement

Removal of electrode(s) may first be attempted by transvenous extraction (code 33244). However, if transvenous extraction is unsuccessful, a thoracotomy may be required to remove the electrodes (code 33243). Use codes 33212, 33213, 33240 as appropriate in addition to the thoracotomy or endoscopic epicardial lead placement codes to report the insertion of the generator if done by the same physician during the same session.

CPT Coding Guidelines, Pacemaker or Pacing Cardioverter-Defibrillator

33243 Removal of single or dual chamber implantable defibrillator electrode(s); by thoracotomy

- *CPT Changes: An Insider's View* 2000, 2015
- *CPT Assistant* Summer 94:40, Nov 99:16-17, Jun 12:3, Nov 14:5, Aug 16:5

33244 by transvenous extraction

- *CPT Changes: An Insider's View* 2000, 2012, 2015, 2017
- *CPT Assistant* Summer 94:40, Nov 99:16-17, Jul 00:5, Jun 12:3, Nov 14:5, Aug 16:5

33249 Insertion or replacement of permanent implantable defibrillator system, with transvenous lead(s), single or dual chamber

- *CPT Changes: An Insider's View* 2000, 2012, 2015, 2017
- *CPT Assistant* Summer 94:21, Nov 99:16-17, Apr 04:6, May 08:14, Jun 08:14, Jun 12:3, Nov 14:5, Aug 16:5

(Do not report 33249 in conjunction with 33216, 33217)

(For removal and replacement of an implantable defibrillator pulse generator and transvenous electrode[s], use 33241 in conjunction with either 33243 or 33244 and 33249)

(For insertion of transvenous implantable defibrillator lead(s), without thoracotomy, use 33216 or 33217)

 # 33270 Insertion or replacement of permanent subcutaneous implantable defibrillator system, with subcutaneous electrode, including defibrillation threshold evaluation, induction of arrhythmia, evaluation of sensing for arrhythmia termination, and programming or reprogramming of sensing or therapeutic parameters, when performed

- *CPT Changes: An Insider's View* 2015
- *CPT Assistant* Nov 14:5, Aug 16:5

(Do not report 33270 in conjunction with 33271, 93260, 93261, 93644)

(For removal and replacement of an implantable defibrillator pulse generator and subcutaneous electrode, use 33241 in conjunction with 33270 and 33272)

(For insertion of subcutaneous implantable defibrillator lead[s], use 33271)

(For insertion or replacement of permanent implantable defibrillator system with substernal electrode, use 0571T)

 # 33271 Insertion of subcutaneous implantable defibrillator electrode

- *CPT Changes: An Insider's View* 2015
- *CPT Assistant* Nov 14:5, Aug 16:5

(Do not report 33271 in conjunction with 33240, 33262, 33270, 93260, 93261)

(For insertion or replacement of a cardiac venous system lead, see 33224, 33225)

(For insertion of substernal defibrillator electrode, use 0572T)

 # 33272 Removal of subcutaneous implantable defibrillator electrode

- *CPT Changes: An Insider's View* 2015
- *CPT Assistant* Nov 14:5, Aug 16:5

(For removal of substernal defibrillator electrode, use 0573T)

 # 33273 Repositioning of previously implanted subcutaneous implantable defibrillator electrode

CPT Changes: An Insider's View 2015

CPT Assistant Nov 14:5, Aug 16:5

(Do not report 33272, 33273 in conjunction with 93260, 93261)

(For repositioning of substernal defibrillator electrode, use 0574T)

 # 33274 Transcatheter insertion or replacement of permanent leadless pacemaker, right ventricular, including imaging guidance (eg, fluoroscopy, venous ultrasound, ventriculography, femoral venography) and device evaluation (eg, interrogation or programming), when performed

CPT Changes: An Insider's View 2019

CPT Assistant Mar 19:6, Mar 24:1

 # 33275 Transcatheter removal of permanent leadless pacemaker, right ventricular, including imaging guidance (eg, fluoroscopy, venous ultrasound, ventriculography, femoral venography), when performed

CPT Changes: An Insider's View 2019, 2020

CPT Assistant Mar 19:6

(Do not report 33275 in conjunction with 33274)

(Do not report 33274, 33275 in conjunction with femoral venography [75820], fluoroscopy [76000, 77002], ultrasound guidance for vascular access [76937], right ventriculography [93566])

(Do not report 33274, 33275 in conjunction with 93451, 93453, 93456, 93457, 93460, 93461, 93593, 93594, 93596, 93597, 93598, unless complete right heart catheterization is performed for indications distinct from the leadless pacemaker procedure)

(Do not report 33274, 33275 in conjunction with dual-chamber leadless pacemaker codes 0795T, 0796T, 0797T, 0798T, 0799T, 0800T, 0801T, 0802T, 0803T)

(Do not report 33274, 33275 in conjunction with 0823T, 0824T, 0825T, for right atrial single-chamber leadless pacemaker)

(Do not report 33274, 33275 when the right ventricular single-chamber leadless pacemaker is part of a complete dual-chamber leadless pacemaker system)

(For insertion, replacement, repositioning, and removal of pacemaker systems with leads, see 33202, 33203, 33206, 33207, 33208, 33212, 33213, 33214, 33215, 33216, 33217, 33218, 33220, 33221, 33227, 33228, 33229, 33233, 33234, 33235, 33236, 33237)

(For subsequent leadless pacemaker device evaluation, see 93279, 93286, 93288, 93294, 93296, 0804T, 0826T)

(For dual-chamber leadless pacemaker, see 0795T, 0796T, 0797T, 0798T, 0799T, 0800T, 0801T, 0802T, 0803T)

(For insertion or replacement of a leadless pacemaker into the right ventricle as part of a complete dual-chamber leadless pacemaker system, use 0797T)

(For removal of right ventricular pacemaker component of a complete dual-chamber leadless pacemaker system, use 0800T)

Phrenic Nerve Stimulation System

Insertion of a phrenic nerve stimulation system includes a pulse generator (containing electronics and a battery) and one stimulation lead and is reported with 33276. Pulse generators are placed in a submuscular or subcutaneous "pocket" in the pectoral region. The stimulation lead is placed transvenously into the right brachiocephalic vein or left pericardiophrenic vein. Rarely, a separate sensing lead may be needed to augment system function and, when performed at time of system insertion, is reported with 33277. This sensing lead is placed transvenously into the azygos vein. Initial system placement includes initiation of diagnostic mode and associated system evaluation. Codes 33276, 33277, 33278, 33279, 33280, 33281, 33287, 33288 include vessel catheterization and all imaging guidance required for the procedure, when performed. For therapeutic activation of the phrenic nerve stimulation system, see 93150, 93151, 93152, 93153.

 # 33276 Insertion of phrenic nerve stimulator system (pulse generator and stimulating lead[s]), including vessel catheterization, all imaging guidance, and pulse generator initial analysis with diagnostic mode activation, when performed

CPT Changes: An Insider's View 2024
CPT Assistant Apr 24:9

(Do not report 33276 in conjunction with 93150, 93151, 93152, 93153)

#+ 33277 Insertion of phrenic nerve stimulator transvenous sensing lead (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2024
CPT Assistant Apr 24:9

(Use 33277 in conjunction with 33276, 33287)

(For insertion of a phrenic nerve sensing lead other than at initial insertion of the phrenic nerve stimulator system, use 33999)

 # 33278 Removal of phrenic nerve stimulator, including vessel catheterization, all imaging guidance, and interrogation and programming, when performed; system, including pulse generator and lead(s)

CPT Changes: An Insider's View 2024
CPT Assistant Apr 24:9

 # 33279 transvenous stimulation or sensing lead(s) only

CPT Changes: An Insider's View 2024
CPT Assistant Apr 24:9

(Use 33279 once for removal of one or more lead[s])

 # 33280 pulse generator only

CPT Changes: An Insider's View 2024
CPT Assistant Apr 24:9

(Do not report 33278, 33279, 33280 in conjunction with 33276, 33277, 33281, 33287, 33288)

 # 33281 Repositioning of phrenic nerve stimulator transvenous lead(s)

CPT Changes: An Insider's View 2024
CPT Assistant Apr 24:9

(Do not report 33281 in conjunction with 33276, 33277)

(Report 33281 only once per patient per day)

 # 33287 Removal and replacement of phrenic nerve stimulator, including vessel catheterization, all imaging guidance, and interrogation and programming, when performed; pulse generator

CPT Changes: An Insider's View 2024
CPT Assistant Apr 24:9

(Do not report 33287 in conjunction with 33276, 33278)

 # 33288 transvenous stimulation or sensing lead(s)

CPT Changes: An Insider's View 2024
CPT Assistant Apr 24:9

(Use 33288 once for removal of one or more lead[s])

(Do not report 33288 in conjunction with 33277, 33279, 33281)

Electrophysiologic Operative Procedures

This family of codes describes the surgical treatment of supraventricular dysrhythmias. Tissue ablation, disruption, and reconstruction can be accomplished by many methods including surgical incision or through the use of a variety of energy sources (eg, radiofrequency, cryotherapy, microwave, ultrasound, laser). If excision or isolation of the left atrial appendage by any method, including stapling, oversewing, ligation, or plication, is performed in conjunction with any of the atrial tissue ablation and reconstruction (maze) procedures (33254-33259, 33265-33266), it is considered part of the procedure. Codes 33254-33256 are only to be reported when there is no concurrently performed procedure that requires median sternotomy or cardiopulmonary bypass. The appropriate atrial tissue ablation add-on code, 33257, 33258, 33259 should be reported in addition to an open cardiac procedure requiring sternotomy or cardiopulmonary bypass if performed concurrently.

Definitions

Limited operative ablation and reconstruction includes:

Surgical isolation of triggers of supraventricular dysrhythmias by operative ablation that isolates the pulmonary veins or other anatomically defined triggers in the left or right atrium.

Extensive operative ablation and reconstruction includes:

1. The services included in *"limited"*
2. Additional ablation of atrial tissue to eliminate sustained supraventricular dysrhythmias. This must include operative ablation that involves either the right atrium, the atrial septum, or left atrium in continuity with the atrioventricular annulus.

Codes 33267, 33268, 33269 describe surgical left atrial appendage (LAA) exclusion (eg, excision, isolation via stapling, oversewing, ligation, plication, clip) performed to treat atrial fibrillation and mitigate postoperative thromboembolic complications. Surgical LAA exclusion may be performed as a stand-alone procedure via a sternotomy, thoracotomy, or thoracoscopic approach. It is most commonly performed in conjunction with other procedures requiring a sternotomy or thoracotomy approach. Surgical LAA exclusion is inherent to maze procedures (33254, 33255, 33256, 33257, 33258, 33259, 33265, 33266) and mitral valve repair/replacement procedures (33420, 33422, 33425, 33426, 33427, 33430) and may not be reported separately when performed in the same operative session.

Code 33267 may only be reported when there is no concurrently performed procedure that requires a sternotomy or thoracotomy approach.

Add-on code 33268, if performed concurrently, may be reported in conjunction with a primary procedure performed via a sternotomy or thoracotomy.

Code 33269 may be reported for thoracoscopic LAA exclusion, other than with maze or mitral valve procedures (33254, 33255, 33256, 33257, 33258, 33259, 33265, 33266, 33420, 33422, 33425, 33426, 33427, 33430), when performed during the same operative session.

Incision

33250 Operative ablation of supraventricular arrhythmogenic focus or pathway (eg, Wolff-Parkinson-White, atrioventricular node re-entry), tract(s) and/or focus (foci); without cardiopulmonary bypass

CPT Changes: An Insider's View 2000, 2002

CPT Assistant Summer 94:16, Nov 99:17-18

(For intraoperative pacing and mapping by a separate provider, use 93631)

33251 with cardiopulmonary bypass

CPT Changes: An Insider's View 2000

CPT Assistant Summer 94:16, Nov 99:17-18

Coding Tip

Reporting Restriction for Operative Tissue Ablation

Codes 33254-33256 are only to be reported when there is no concurrently performed procedure that requires median sternotomy or cardiopulmonary bypass.

CPT Coding Guidelines, Electrophysiologic Operative Procedures

---

33254 Operative tissue ablation and reconstruction of atria, limited (eg, modified maze procedure)

- *CPT Changes: An Insider's View* 2007

Subcutaneous Cardiac Rhythm Monitor

A subcutaneous cardiac rhythm monitor, also known as a cardiac event recorder or implantable/insertable loop recorder (ILR), is a subcutaneously placed device that continuously records the electrocardiographic rhythm, triggered automatically by rapid, irregular and/or slow heart rates or by the patient during a symptomatic episode. A subcutaneous cardiac rhythm monitor is placed using a small parasternal incision followed by insertion of the monitor into a small subcutaneous pre-pectoral pocket, followed by closure of the incision.

33285 Insertion, subcutaneous cardiac rhythm monitor, including programming

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Apr 19:3, Sep 22:1

33286 Removal, subcutaneous cardiac rhythm monitor

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Apr 19:3

(Initial insertion includes programming. For subsequent electronic analysis and/or reprogramming, see 93285, 93291, 93298)

33287 Code is out of numerical sequence. See 33244-33251

33288 Code is out of numerical sequence. See 33244-33251

Implantable Hemodynamic Monitors

Transcatheter implantation of a wireless pulmonary artery pressure sensor (33289) establishes an intravascular device used for long-term remote monitoring of pulmonary artery pressures (93264). The hemodynamic data derived from this device is used to guide management of patients with heart failure. Code 33289 includes deployment and calibration of the sensor, right heart catheterization, selective pulmonary artery catheterization, radiological supervision and interpretation, and pulmonary artery angiography, when performed.

33289 Transcatheter implantation of wireless pulmonary artery pressure sensor for long-term hemodynamic monitoring, including deployment and calibration of the sensor, right heart catheterization, selective pulmonary catheterization, radiological supervision and interpretation, and pulmonary artery angiography, when performed

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Jun 19:3, May 23:1, Apr 25:17

(Do not report 33289 in conjunction with 36013, 36014, 36015, 75741, 75743, 75746, 76000, 93451, 93453, 93456, 93457, 93460, 93461, 93568, 93569, 93573, 93593, 93594, 93596, 93597, 93598)

(For remote monitoring of an implantable wireless pulmonary artery pressure sensor, use 93264)

(For implantation of a wireless left atrial pressure sensor, use 0933T)

►(For implantation of a wireless inferior vena cava sensor, use 0981T)◄

Heart (Including Valves) and Great Vessels

Patients receiving major cardiac procedures may require simultaneous cardiopulmonary bypass insertion of cannulae into the venous and arterial vasculatures with support of circulation and oxygenation by a heart-lung machine. Most services are described by codes in dyad arrangements to allow distinct reporting of procedures with or without cardiopulmonary bypass. Cardiopulmonary bypass is distinct from support of cardiac output using devices (eg, ventricular assist or intra-aortic balloon). For cardiac assist services, see 33946, 33947, 33948, 33949, 33967-33983, 33990, 33991, 33992, 33993, 33995, 33997.

33300 Repair of cardiac wound; without bypass

33305 with cardiopulmonary bypass

33310 Cardiotomy, exploratory (includes removal of foreign body, atrial or ventricular thrombus); without bypass

CPT Changes: An Insider's View 2004

33315 with cardiopulmonary bypass

CPT Assistant Oct 10:12, Dec 10:12

(Do not report removal of thrombus [33310-33315] in conjunction with other cardiac procedures unless a separate incision in the heart is required to remove the atrial or ventricular thrombus)

(If removal of thrombus with cardiopulmonary bypass [33315] is reported in conjunction with 33120, 33130, 33420-33430, 33460-33468, 33496, 33542, 33545, 33641-33647, 33670, 33681, 33975-33980 which requires a separate heart incision, report 33315 with modifier 59)

33320 Suture repair of aorta or great vessels; without shunt or cardiopulmonary bypass

CPT Assistant Fall 91:7, Jun 18:11

33321 with shunt bypass

CPT Assistant Fall 91:7, Jun 18:11

33322 with cardiopulmonary bypass

CPT Assistant Fall 91:7, Jun 18:11

33330 Insertion of graft, aorta or great vessels; without shunt, or cardiopulmonary bypass

CPT Assistant Jun 18:11

33335 with cardiopulmonary bypass

CPT Assistant Jun 18:11

33340 Percutaneous transcatheter closure of the left atrial appendage with endocardial implant, including fluoroscopy, transseptal puncture, catheter placement(s), left atrial angiography, left atrial appendage angiography, when performed, and radiological supervision and interpretation

CPT Changes: An Insider's View 2017

CPT Assistant Jul 17:3, Nov 21:3

(Do not report 33340 in conjunction with 93462)

(Do not report 33340 in conjunction with 93452, 93453, 93458, 93459, 93460, 93461, 93595, 93596, 93597, 93598, unless catheterization of the left ventricle is performed by a non-transseptal approach for indications distinct from the left atrial appendage closure procedure)

(Do not report 33340 in conjunction with 93451, 93453, 93456, 93460, 93461, 93593, 93594, 93596, 93597, 93598, unless complete right heart catheterization is performed for indications distinct from the left atrial appendage closure procedure)

Cardiac Valves

(For multiple valve procedures, see 33390, 33391, 33404-33478 and add modifier 51 to the secondary valve procedure code)

Aortic Valve

Codes 33361, 33362, 33363, 33364, 33365, 33366 are used to report transcatheter aortic valve replacement (TAVR)/transcatheter aortic valve implantation (TAVI). TAVR/TAVI requires two physician operators and all components of the procedure are reported using modifier 62.

Codes 33361, 33362, 33363, 33364, 33365, 33366 include the work, when performed, of percutaneous access, placing the access sheath, balloon aortic valvuloplasty, advancing the valve delivery system into position, repositioning the valve as needed, deploying the valve, temporary pacemaker insertion for rapid pacing (33210), and closure of the arteriotomy when performed. Codes 33361, 33362, 33363, 33364, 33365, 33366 include open arterial or cardiac approach.

Angiography, radiological supervision, and interpretation performed to guide TAVR/TAVI (eg, guiding valve placement, documenting completion of the intervention, assessing the vascular access site for closure) are included in these codes.

Add-on code 33370 may be reported for cerebral embolic protection in conjunction with TAVR/TAVI codes 33361, 33362, 33363, 33364, 33365, 33366. Code 33370 includes percutaneous arterial (eg, right radial or femoral) access, placement of a guiding catheter, and delivery of the embolic protection filter(s) prior to the procedure. Placement of additional/multiple filters is not separately reportable. Code 33370 includes removal of the filter(s) and debris, removal of the arterial sheath, and closure of the arteriotomy by pressure and application of an arterial closure device or standard closure of the puncture by suture. Extensive repair or replacement of an artery may be additionally reported. Code 33370 includes all imaging guidance and radiological supervision and interpretation associated with performing cerebral embolic protection (eg, 75600, 75710, 76937).

Diagnostic left heart catheterization codes (93452, 93453, 93458-93461) and the supravalvular aortography code (93567) should **not** be used with TAVR/TAVI services (33361, 33362, 33363, 33364, 33365, 33366) to report:

1. Contrast injections, angiography, roadmapping, and/or fluoroscopic guidance for the TAVR/TAVI,
2. Aorta/left ventricular outflow tract measurement for the TAVR/TAVI, or
3. Post-TAVR/TAVI aortic or left ventricular angiography, as this work is captured in the TAVR/TAVI services codes (33361, 33362, 33363, 33364, 33365, 33366).

Diagnostic coronary angiography performed at the time of TAVR/TAVI may be separately reportable if:

1. No prior catheter-based coronary angiography study is available and a full diagnostic study is performed, or
2. A prior study is available, but as documented in the medical record:
    a. The patient's condition with respect to the clinical indication has changed since the prior study, or
    b. There is inadequate visualization of the anatomy and/or pathology, or
    c. There is a clinical change during the procedure that requires new evaluation.
    d. For same session/same day diagnostic coronary angiography services, report the appropriate diagnostic cardiac catheterization code(s) appended with modifier 59 indicating separate and distinct procedural service from TAVR/TAVI.

Diagnostic coronary angiography performed at a separate session from an interventional procedure may be separately reportable.

Other cardiac catheterization services may be reported separately when performed for diagnostic purposes not intrinsic to TAVR/TAVI.

Percutaneous coronary interventional procedures are reported separately, when performed.

When transcatheter ventricular support is required in conjunction with TAVR/TAVI, the appropriate code may be reported with the appropriate ventricular assist device (VAD) procedure code (33975, 33976, 33990, 33991, 33992, 33993, 33995, 33997) or balloon pump insertion code (33967, 33970, 33973).

The TAVR/TAVI cardiovascular access and delivery procedures are reported with 33361, 33362, 33363, 33364, 33365, 33366. When cardiopulmonary bypass is performed in conjunction with TAVR/TAVI, codes 33361, 33362, 33363, 33364, 33365, 33366 should be reported with the appropriate add-on code for percutaneous peripheral bypass (33367), open peripheral bypass (33368), or central bypass (33369).

33361 Transcatheter aortic valve replacement (TAVR/TAVI) with prosthetic valve; percutaneous femoral artery approach

33417 Aortoplasty (gusset) for supravalvular stenosis

CPT Assistant Feb 05:14, Apr 19:6

Mitral Valve

Codes 33418 and 33419 are used to report transcatheter mitral valve repair (TMVR). Code 33419 should only be reported once per session.

Codes 33418 and 33419 include the work, when performed, of percutaneous access, placing the access sheath, transseptal puncture, advancing the repair device delivery system into position, repositioning the device as needed, and deploying the device(s).

Angiography, radiological supervision, and interpretation performed to guide TMVR (eg, guiding device placement and documenting completion of the intervention) are included in these codes.

Diagnostic right and left heart catheterization codes (93451, 93452, 93453, 93456, 93457, 93458, 93459, 93460, 93461, 93593, 93594, 93595, 93596, 93597, 93598) should **not** be used with 33418, 33419 to report:

1. Contrast injections, angiography, road-mapping, and/or fluoroscopic guidance for the transcatheter mitral valve repair (TMVR),
2. Left ventricular angiography to assess mitral regurgitation for guidance of TMVR, or
3. Right and left heart catheterization for hemodynamic measurements before, during, and after TMVR for guidance of TMVR.

Diagnostic right and left heart catheterization codes (93451, 93452, 93453, 93456, 93457, 93458, 93459, 93460, 93461, 93593, 93594, 93595, 93596, 93597, 93598) and diagnostic coronary angiography codes (93454, 93455, 93456, 93457, 93458, 93459, 93460, 93461, 93563, 93564) may be reported with 33418, 33419, representing separate and distinct services from TMVR, if:

1. No prior study is available and a full diagnostic study is performed, or
2. A prior study is available, but as documented in the medical record:
    a. There is inadequate visualization of the anatomy and/or pathology, or
    b. The patient's condition with respect to the clinical indication has changed since the prior study, or
    c. There is a clinical change during the procedure that requires new evaluation.

Other cardiac catheterization services may be reported separately when performed for diagnostic purposes not intrinsic to TMVR.

For same session/same day diagnostic cardiac catheterization services, report the appropriate diagnostic cardiac catheterization code(s) appended with modifier 59 indicating separate and distinct procedural service from TMVR.

Diagnostic coronary angiography performed at a separate session from an interventional procedure may be separately reportable.

Percutaneous coronary interventional procedures may be reported separately, when performed.

When transcatheter ventricular support is required in conjunction with TMVR, the appropriate code may be reported with the appropriate ventricular assist device (VAD) procedure code (33990, 33991, 33992, 33993, 33995, 33997) or balloon pump insertion code (33967, 33970, 33973).

When cardiopulmonary bypass is performed in conjunction with TMVR, 33418, 33419 may be reported with the appropriate add-on code for percutaneous peripheral bypass (33367), open peripheral bypass (33368), or central bypass (33369).

33418 Transcatheter mitral valve repair, percutaneous approach, including transseptal puncture when performed; initial prosthesis

CPT Changes: An Insider's View 2015

CPT Assistant Sep 15:3

(Do not report 33418 in conjunction with 93462 unless transapical puncture is performed)

+ 33419 additional prosthesis(es) during same session (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2015

CPT Assistant Sep 15:3

(Use 33419 in conjunction with 33418)

(For transcatheter mitral valve repair, percutaneous approach via the coronary sinus, use 0345T)

(For transcatheter mitral valve implantation/replacement [TMVI], see 0483T, 0484T)

(For transcatheter mitral valve annulus reconstruction, use 0544T)

33430 Replacement, mitral valve, with cardiopulmonary bypass

CPT Assistant Feb 05:14, Oct 24:13

33440 Code is out of numerical sequence. See 33406-33412

Tricuspid Valve

(For transcatheter tricuspid valve implantation [TTVI]/replacement, use 0646T)

(For transcatheter tricuspid valve repair [TTVr], see 0569T, 0570T)

33460 Valvectomy, tricuspid valve, with cardiopulmonary bypass

CPT Assistant Feb 05:14

33463 Valvuloplasty, tricuspid valve; without ring insertion

CPT Assistant Feb 05:14

33464 with ring insertion

CPT Assistant Feb 05:14

33465 Replacement, tricuspid valve, with cardiopulmonary bypass

CPT Assistant Feb 05:14

33468 Tricuspid valve repositioning and plication for Ebstein anomaly

CPT Assistant Feb 05:14

(For transcatheter tricuspid valve annulus reconstruction, use 0545T)

Pulmonary Valve

Code 33477 is used to report transcatheter pulmonary valve implantation (TPVI). Code 33477 should only be reported once per session.

Code 33477 includes the work, when performed, of percutaneous access, placing the access sheath, advancing the repair device delivery system into position, repositioning the device as needed, and deploying the device(s). Angiography, radiological supervision, and interpretation performed to guide TPVI (eg, guiding device placement and documenting completion of the intervention) are included in the code.

Code 33477 includes all cardiac catheterization(s), intraprocedural contrast injection(s), fluoroscopic radiological supervision and interpretation, and imaging guidance performed to complete the pulmonary valve procedure. Do not report 33477 in conjunction with 76000, 93451, 93453, 93454, 93455, 93456, 93457, 93458, 93459, 93460, 93461, 93563, 93566, 93567, 93568, 93569, 93573, 93593, 93594, 93596, 93597, 93598, for angiography intrinsic to the procedure.

Code 33477 includes percutaneous balloon angioplasty of the conduit/treatment zone, valvuloplasty of the pulmonary valve conduit, and stent deployment within the pulmonary conduit or an existing bioprosthetic pulmonary valve, when performed. Do not report 33477 in conjunction with 37236, 37237, 92997, 92998 for pulmonary artery angioplasty/valvuloplasty or stenting within the prosthetic valve delivery site.

Codes 92997, 92998 may be reported separately when pulmonary artery angioplasty is performed at a site separate from the prosthetic valve delivery site. Codes 37236, 37237 may be reported separately when pulmonary artery stenting is performed at a site separate from the prosthetic valve delivery site.

Diagnostic right heart catheterization and diagnostic angiography codes (93451, 93453, 93454, 93455, 93456, 93457, 93458, 93459, 93460, 93461, 93563, 93566, 93567, 93568, 93569, 93573, 93593, 93594, 93596, 93597, 93598) should **not** be used with 33477 to report:

1. Contrast injections, angiography, roadmapping, and/or fluoroscopic guidance for the TPVI,
2. Pulmonary conduit angiography for guidance of TPVI, or
3. Right heart catheterization for hemodynamic measurements before, during, and after TPVI for guidance of TPVI.

Diagnostic right and left heart catheterization codes (93451, 93452, 93453, 93456, 93457, 93458, 93459, 93460, 93461, 93593, 93594, 93595, 93596, 93597, 93598), diagnostic coronary angiography codes (93454, 93455, 93456, 93457, 93458, 93459, 93460, 93461, 93563, 93564), and diagnostic pulmonary angiography codes (93568, 93569, 93573, 93574, 93575) may be reported with 33477, representing separate and distinct services from TPVI, if:

1. No prior study is available and a full diagnostic study is performed, or
2. A prior study is available, but as documented in the medical record:
    a. There is inadequate visualization of the anatomy and/or pathology, or
    b. The patient's condition with respect to the clinical indication has changed since the prior study, or
    c. There is a clinical change during the procedure that requires new evaluation.

Other cardiac catheterization services may be reported separately when performed for diagnostic purposes not intrinsic to TPVI.

For same session/same day diagnostic cardiac catheterization services, report the appropriate diagnostic cardiac catheterization code(s) appended with modifier 59 to indicate separate and distinct procedural services from TPVI.

Diagnostic coronary angiography performed at a separate session from an interventional procedure may be separately reportable, when performed.

Percutaneous coronary interventional procedures may be reported separately, when performed.

Percutaneous pulmonary artery branch interventions may be reported separately, when performed.

When transcatheter ventricular support is required in conjunction with TPVI, the appropriate code may be reported with the appropriate percutaneous ventricular assist device (VAD) procedure codes (33990, 33991, 33992, 33993, 33995, 33997), extracorporeal membrane oxygenation (ECMO) or extracorporeal life support services (ECLS) procedure codes (33946-33989), or balloon pump insertion codes (33967, 33970, 33973).

When cardiopulmonary bypass is performed in conjunction with TPVI, code 33477 may be reported with the appropriate add-on code for percutaneous peripheral bypass (33367), open peripheral bypass (33368), or central bypass (33369).

(33471 has been deleted)

33474 Valvotomy, pulmonary valve, open heart, with cardiopulmonary bypass

CPT Assistant Feb 05:14

33475 Replacement, pulmonary valve

CPT Assistant Feb 05:14, Apr 19:6

33476 Right ventricular resection for infundibular stenosis, with or without commissurotomy

CPT Assistant Feb 05:14

33477 Transcatheter pulmonary valve implantation, percutaneous approach, including pre-stenting of the valve delivery site, when performed

CPT Changes: An Insider's View 2016

CPT Assistant Mar 16:5, Aug 16:10

33478 Outflow tract augmentation (gusset), with or without commissurotomy or infundibular resection

CPT Assistant Feb 05:14

(Use 33478 in conjunction with 33768 when a cavopulmonary anastomosis to a second superior vena cava is performed)

Other Valvular Procedures

33496 Repair of non-structural prosthetic valve dysfunction with cardiopulmonary bypass (separate procedure)

CPT Assistant Nov 97:16, Feb 05:14

(For reoperation, use 33530 in addition to 33496)

Coronary Artery Anomalies

Basic procedures include endarterectomy or angioplasty.

33500 Repair of coronary arteriovenous or arteriocardiac chamber fistula; with cardiopulmonary bypass

CPT Assistant Dec 21:18

33501 without cardiopulmonary bypass

33502 Repair of anomalous coronary artery from pulmonary artery origin; by ligation

CPT Changes: An Insider's View 2006

33503 by graft, without cardiopulmonary bypass

(Do not report modifier 63 in conjunction with 33502, 33503)

33504 by graft, with cardiopulmonary bypass

33505 with construction of intrapulmonary artery tunnel (Takeuchi procedure)

33506 by translocation from pulmonary artery to aorta

(Do not report modifier 63 in conjunction with 33505, 33506)

33507 Repair of anomalous (eg, intramural) aortic origin of coronary artery by unroofing or translocation

CPT Changes: An Insider's View 2006

CPT Assistant Mar 07:1

Endoscopy

To report endoscopic harvesting of a vein for coronary artery bypass procedure, use 33508 in addition to the code for the associated bypass procedure. To report endoscopic harvesting of an upper extremity artery for a bypass procedure, use 33509.

Surgical vascular endoscopy always includes diagnostic endoscopy.

+ 33508 Endoscopy, surgical, including video-assisted harvest of vein(s) for coronary artery bypass procedure (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2003

CPT Assistant Dec 21:18

(Use 33508 in conjunction with 33510-33523)

(For open harvest of upper extremity vein procedure, use 35500)

⦸ 33509 Harvest of upper extremity artery, 1 segment, for coronary artery bypass procedure, endoscopic

CPT Changes: An Insider's View 2022

CPT Assistant Dec 21:17

(For open harvest of upper extremity artery, use 35600)

(For bilateral procedure, report 33509 with modifier 50)

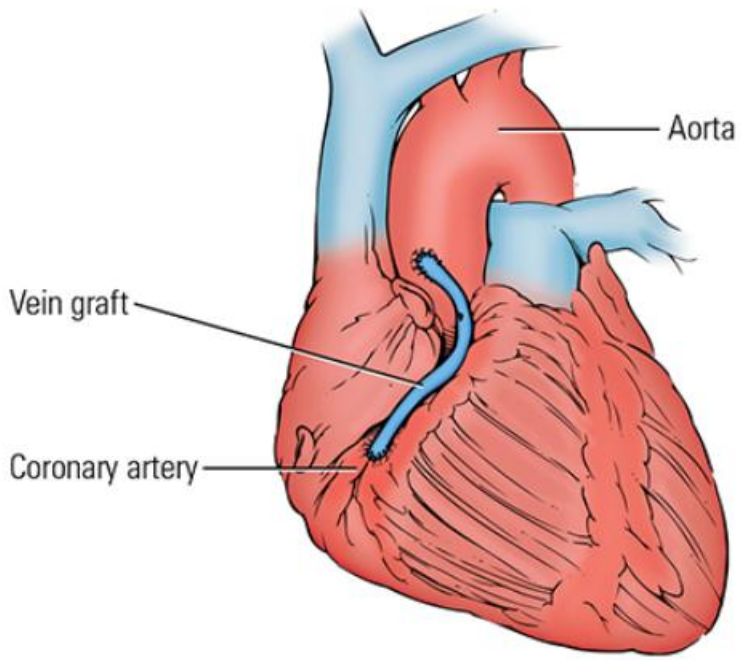
Venous Grafting Only for Coronary Artery Bypass

The following codes are used to report coronary artery bypass procedures using venous grafts only. These codes should NOT be used to report the performance of coronary artery bypass procedures using arterial grafts and venous grafts during the same procedure. See 33517-33523 and 33533-33536 for reporting combined arterial-venous grafts.

Procurement of the saphenous vein graft is included in the description of the work for 33510-33516 and should not be reported as a separate service or co-surgery. To report harvesting of an upper extremity vein, use 35500 in addition to the bypass procedure. To report harvesting of a femoropopliteal vein segment, report 35572 in addition to the bypass procedure. When surgical assistant performs graft procurement, add modifier 80 to 33510-33516. For percutaneous ventricular assist device insertion, removal, repositioning, see 33990, 33991, 33992, 33993, 33995, 33997.

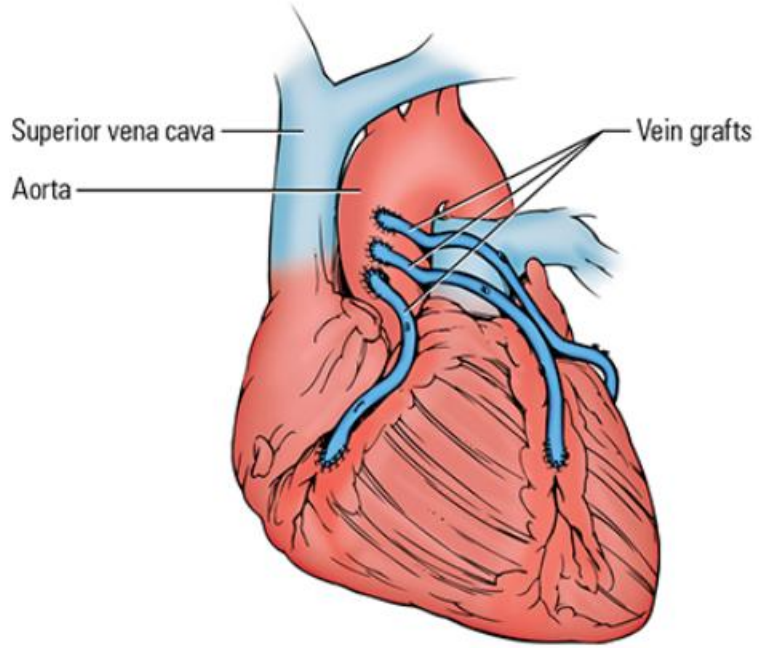
33510 Coronary artery bypass, vein only; single coronary venous graft

CPT Assistant Fall 91:5, Winter 92:12, Jul 99:11, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1, Aug 14:14



33511 2 coronary venous grafts

CPT Assistant Fall 91:5, Winter 92:12, Jul 99:11, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1



Coronary Artery Bypass-Venous Grafting Only

33510-33516

A. Use 33510 to report a single coronary venous graft.

B. Report 33512 when 3 coronary venous grafts are performed.

33512 3 coronary venous grafts

CPT Assistant Fall 91:5, Winter 92:12, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1

33513 4 coronary venous grafts

CPT Assistant Fall 91:5, Winter 92:12, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1

33514 5 coronary venous grafts

CPT Assistant Fall 91:5, Winter 92:12, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1

33516 6 or more coronary venous grafts

CPT Assistant Fall 91:5, Winter 92:12, Jul 99:11, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1, Aug 14:14

Combined Arterial-Venous Grafting for Coronary Bypass

The following codes are used to report coronary artery bypass procedures using venous grafts and arterial grafts during the same procedure. These codes may NOT be used alone.

To report combined arterial-venous grafts it is necessary to report two codes: (1) the appropriate combined arterial-venous graft code (33517-33523); and (2) the appropriate arterial graft code (33533-33536).

Procurement of the saphenous vein graft is included in the description of the work for 33517-33523 and should not be reported as a separate service or co-surgery. Procurement of the artery for grafting is included in the description of the work for 33533-33536 and should not be reported as a separate service or co-surgery, except when an upper extremity artery (eg, radial artery) is procured. To report harvesting of an upper extremity artery, use 33509 or 35600. To report harvesting of an upper extremity vein, use 35500 in addition to the bypass procedure. To report harvesting of a femoropopliteal vein segment, report 35572 in addition to the bypass procedure. When surgical assistant performs arterial and/or venous graft procurement, add modifier 80 to 33517-33523, 33533-33536, as appropriate. For percutaneous ventricular assist device insertion, removal, repositioning, see 33990, 33991, 33992, 33993, 33995, 33997.

+33517 Coronary artery bypass, using venous graft(s) and arterial graft(s); single vein graft (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2000, 2008

CPT Assistant Fall 91:5, Winter 92:13, Nov 99:18, Apr 01:7, Feb 05:14, Dec 21:18

(Use 33517 in conjunction with 33533-33536)

+33518 2 venous grafts (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2008

CPT Assistant Fall 91:5, Winter 92:13, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1, Dec 21:18

(Use 33518 in conjunction with 33533-33536)

+33519 3 venous grafts (List separately in addition to code for primary procedure)

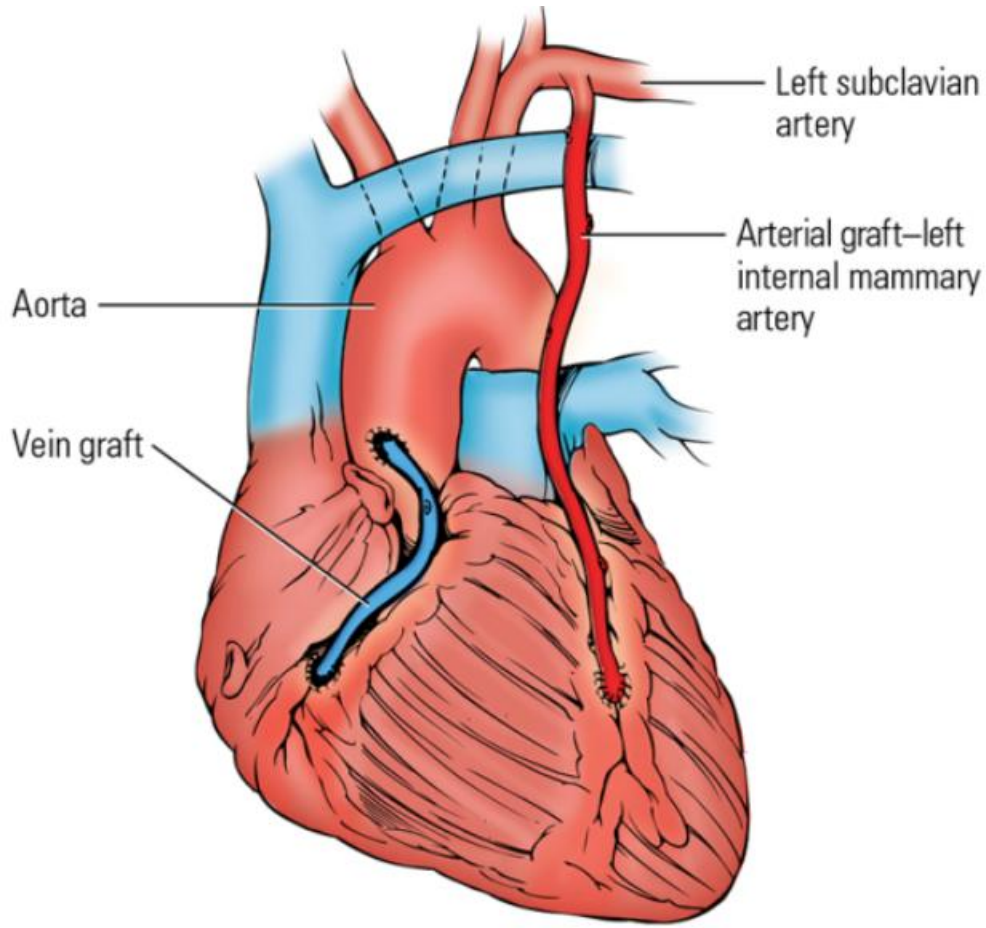
CPT Changes: An Insider's View 2008

CPT Assistant Fall 91:5, Winter 92:13, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1, Dec 21:18

(Use 33519 in conjunction with 33533-33536)

+33521 4 venous grafts (List separately in addition to code for primary procedure)

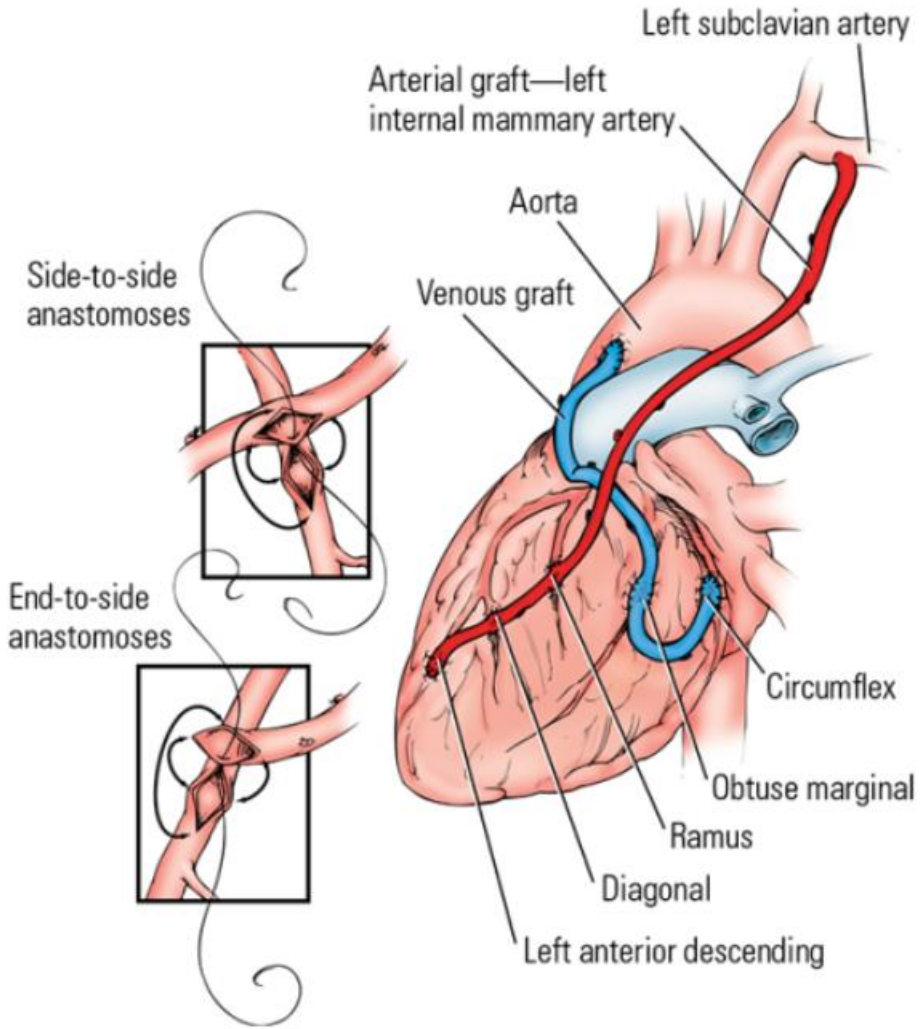
CPT Changes: An Insider's View 2008



CPT Assistant Fall 91:5, Winter 92:13, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1, Dec 21:18

(Use 33521 in conjunction with 33533-33536)

Coronary Artery Bypass Combined Arterial-Venous Grafting



33517-33530

Both venous and arterial grafts are used in these bypass procedures. The appropriate arterial graft codes (33533-33536) must also be reported in conjunction with codes 33517-33530.

Coronary Artery Bypass-Sequential Combined Arterial-Venous Grafting

33517-33530

Note: To determine the number of bypass grafts in a coronary artery bypass (CABG), count the number of distal anastomoses (contact point[s]) where the bypass graft artery or vein is sutured to the diseased coronary artery(s).

+ 33522 5 venous grafts (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2008

CPT Assistant Fall 91:5, Winter 92:13, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1, Dec 21:18

(Use 33522 in conjunction with 33533-33536)

+ 33523 6 or more venous grafts (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2008

CPT Assistant Fall 91:5, Winter 92:13, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1, Dec 21:18

(Use 33523 in conjunction with 33533-33536)

+ 33530 Reoperation, coronary artery bypass procedure or valve procedure, more than 1 month after original operation (List separately in addition to code for primary procedure)

CPT Assistant Winter 90:6, Fall 91:5, Winter 92:13, Apr 01:7, Jul 01:11, Feb 05:13-14, Jan 07:7, Feb 11:8

(Use 33530 in conjunction with 33390, 33391, 33404-33496, 33510-33523, 33533, 33534, 33535, 33536, 33863)

Arterial Grafting for Coronary Artery Bypass

The following codes are used to report coronary artery bypass procedures using either arterial grafts only or a combination of arterial-venous grafts. The codes include the use of the internal mammary artery, gastroepiploic artery, epigastric artery, radial artery, and arterial conduits procured from other sites.

To report combined arterial-venous grafts it is necessary to report two codes: (1) the appropriate arterial graft code (33533-33536); and (2) the appropriate combined arterial-venous graft code (33517-33523).

Procurement of the artery for grafting is included in the description of the work for 33533-33536 and should not be reported as a separate service or co-surgery, except when an upper extremity artery (eg, radial artery) is procured. To report harvesting of an upper extremity artery, use 33509 or 35600. To report harvesting of an upper extremity vein, use 35500 in addition to the bypass procedure. To report harvesting of a femoropopliteal vein segment, report 35572 in addition to the bypass procedure. When surgical assistant performs arterial and/or venous graft procurement, add modifier 80 to 33517-33523, 33533-33536, as appropriate. For percutaneous ventricular assist device insertion, removal, repositioning, see 33990, 33991, 33992, 33993, 33995, 33997.

33533 Coronary artery bypass, using arterial graft(s); single arterial graft

CPT Changes: An Insider's View 2000

CPT Assistant Winter 92:12, Nov 99:18, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1, Nov 14:14, Dec 21:18

33534 2 coronary arterial grafts

CPT Assistant Winter 92:12, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1, Dec 21:18

33535 3 coronary arterial grafts

CPT Assistant Winter 92:12, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1, Dec 21:18

33536 4 or more coronary arterial grafts

CPT Assistant Winter 92:12, Apr 01:7, Feb 05:14, Jan 07:7, Mar 07:1, Nov 14:14, Dec 21:18

33542 Myocardial resection (eg, ventricular aneurysmectomy)

CPT Assistant Winter 92:12, Mar 07:1

33545 Repair of postinfarction ventricular septal defect, with or without myocardial resection

CPT Assistant Winter 92:12, Mar 07:1

33548 Surgical ventricular restoration procedure, includes prosthetic patch, when performed (eg, ventricular remodeling, SVR, SAVER, Dor procedures)

CPT Changes: An Insider's View 2006

CPT Assistant Nov 06:21, Dec 06:10, Mar 07:1

(Do not report 33548 in conjunction with 32551, 33210, 33211, 33310, 33315)

(For Batista procedure or pachopexy, use 33999)

(For transcatheter left ventricular restoration device implantation, use 0643T)

Coronary Endarterectomy

+ 33572 Coronary endarterectomy, open, any method, of left anterior descending, circumflex, or right coronary artery performed in conjunction with coronary artery bypass graft procedure, each vessel (List separately in addition to primary procedure)

(Use 33572 in conjunction with 33510-33516, 33533-33536)

Single Ventricle and Other Complex Cardiac Anomalies

33600 Closure of atrioventricular valve (mitral or tricuspid) by suture or patch

CPT Assistant Mar 07:1, Dec 21:17

33602 Closure of semilunar valve (aortic or pulmonary) by suture or patch

33606 Anastomosis of pulmonary artery to aorta (Damus-Kaye-Stansel procedure)

33608 Repair of complex cardiac anomaly other than pulmonary atresia with ventricular septal defect by construction or replacement of conduit from right or left ventricle to pulmonary artery

CPT Assistant Apr 19:6

(For repair of pulmonary artery arborization anomalies by unifocalization, see 33925-33926)

33610 Repair of complex cardiac anomalies (eg, single ventricle with subaortic obstruction) by surgical enlargement of ventricular septal defect

CPT Changes: An Insider's View 2002

(Do not report modifier 63 in conjunction with 33610)

33611 Repair of double outlet right ventricle with intraventricular tunnel repair;

(Do not report modifier 63 in conjunction with 33611)

33612 with repair of right ventricular outflow tract obstruction

33615 Repair of complex cardiac anomalies (eg, tricuspid atresia) by closure of atrial septal defect and anastomosis of atria or vena cava to pulmonary artery (simple Fontan procedure)

33617 Repair of complex cardiac anomalies (eg, single ventricle) by modified Fontan procedure

(Use 33617 in conjunction with 33768 when a cavopulmonary anastomosis to a second superior vena cava is performed)

33619 Repair of single ventricle with aortic outflow obstruction and aortic arch hypoplasia (hypoplastic left heart syndrome) (eg, Norwood procedure)

CPT Assistant Mar 07:1, Apr 11:6, May 12:14, Jul 16:3

(Do not report modifier 63 in conjunction with 33619)

33620 Application of right and left pulmonary artery bands (eg, hybrid approach stage 1)

CPT Changes: An Insider's View 2011

CPT Assistant Apr 11:3, May 12:14, Jul 16:3

33621 Transthoracic insertion of catheter for stent placement with catheter removal and closure (eg, hybrid approach stage 1)

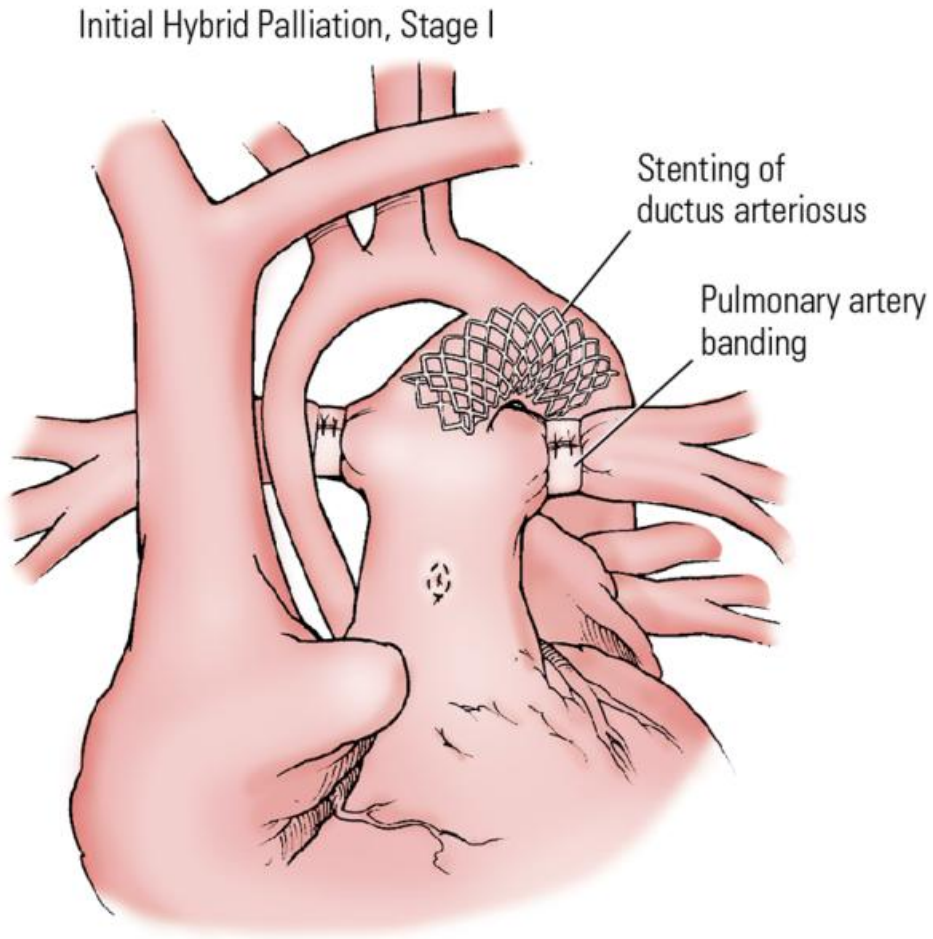
CPT Changes: An Insider's View 2011

CPT Assistant Apr 11:3, Jul 16:3

(For placement of stent, use 37236)

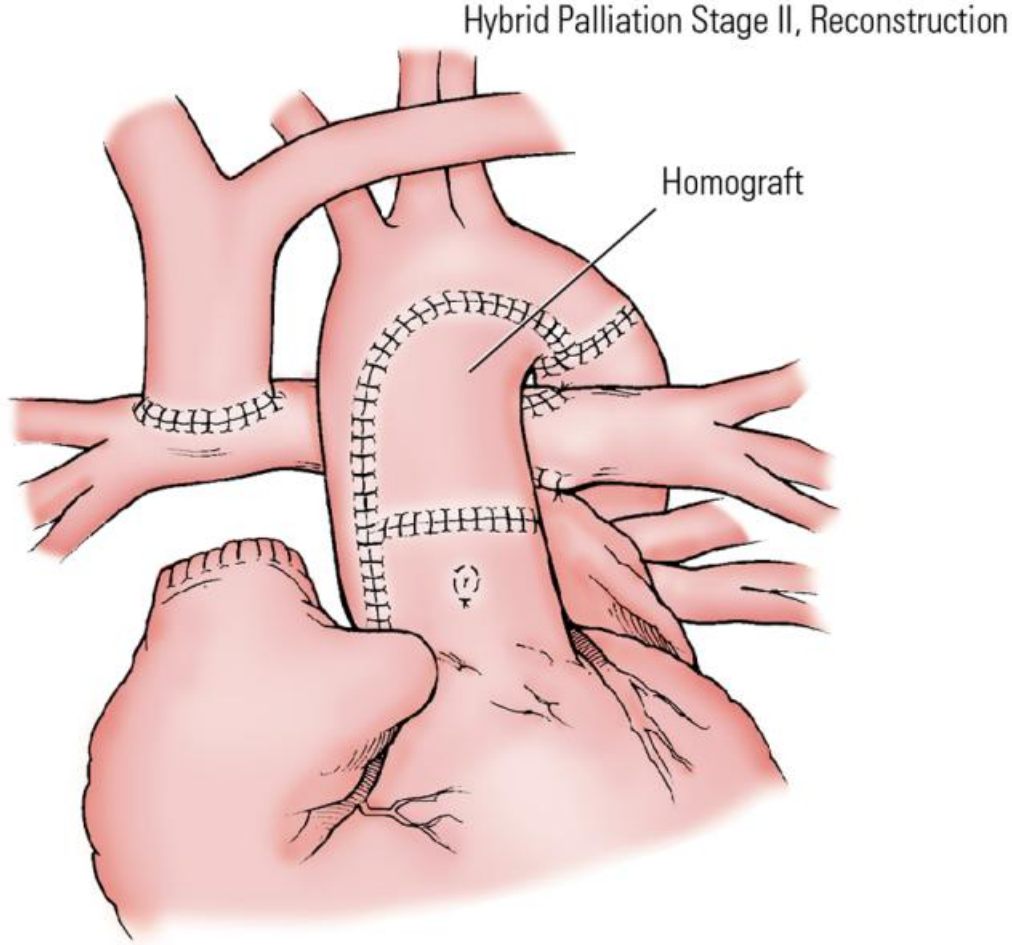
(Report both 33620, 33621 if performed in same session)

33622 Reconstruction of complex cardiac anomaly (eg, single ventricle or hypoplastic left heart) with palliation of single ventricle with aortic outflow obstruction and aortic arch hypoplasia, creation of cavopulmonary anastomosis, and removal of right and left pulmonary bands (eg, hybrid approach stage 2, Norwood, bidirectional Glenn, pulmonary artery debanding)



CPT Changes: An Insider's View 2011

CPT Assistant Apr 11:3, May 12:14, Jul 16:3



(Do not report 33622 in conjunction with 33619, 33767, 33822, 33840, 33845, 33851, 33853, 33917)

(For bilateral, bidirectional Glenn procedure, use 33622 in conjunction with 33768)

Initial Hybrid Palliation
33621

Hybrid Reconstruction
33622

Septal Defect

33641 Repair atrial septal defect, secundum, with cardiopulmonary bypass, with or without patch
- *CPT Assistant* Mar 07:1, Dec 10:12

33645 Direct or patch closure, sinus venosus, with or without anomalous pulmonary venous drainage

(Do not report 33645 in conjunction with 33724, 33726)

33647 Repair of atrial septal defect and ventricular septal defect, with direct or patch closure

(Do not report modifier 63 in conjunction with 33647)

(For repair of tricuspid atresia (eg, Fontan, Gago procedures), use 33615)

33660 Repair of incomplete or partial atrioventricular canal (ostium primum atrial septal defect), with or without atrioventricular valve repair

33665 Repair of intermediate or transitional atrioventricular canal, with or without atrioventricular valve repair

33670 Repair of complete atrioventricular canal, with or without prosthetic valve

(Do not report modifier 63 in conjunction with 33670)

33675 Closure of multiple ventricular septal defects;
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Mar 07:1

33676 with pulmonary valvotomy or infundibular resection (acyanotic)
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Mar 07:1

33677 with removal of pulmonary artery band, with or without gusset
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Mar 07:1

(Do not report 33675-33677 in conjunction with 32100, 32551, 32554, 32555, 33210, 33681, 33684, 33688)

(For percutaneous closure, use 93581)

33681 Closure of single ventricular septal defect, with or without patch;
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Mar 07:1

33684 with pulmonary valvotomy or infundibular resection (acyanotic)

33688 with removal of pulmonary artery band, with or without gusset

(For pulmonary vein repair requiring creation of atrial septal defect, use 33724)

33690 Banding of pulmonary artery
- *CPT Assistant* Apr 11:4, May 12:14

(For right and left pulmonary artery banding in a single ventricle [eg, hybrid approach stage 1], use 33620)

(Do not report modifier 63 in conjunction with 33690)

33692 Complete repair tetralogy of Fallot without pulmonary atresia;

33694 with transannular patch

(Do not report modifier 63 in conjunction with 33694)

(For ligation and takedown of a systemic-to-pulmonary artery shunt, performed in conjunction with a congenital heart procedure; see 33924)

33697 Complete repair tetralogy of Fallot with pulmonary atresia including construction of conduit from right ventricle to pulmonary artery and closure of ventricular septal defect
- *CPT Assistant* Mar 07:1

(For ligation and takedown of a systemic-to-pulmonary artery shunt, performed in conjunction with a congenital heart procedure; see 33924)

Sinus of Valsalva

33702 Repair sinus of Valsalva fistula, with cardiopulmonary bypass;
- *CPT Assistant* Mar 07:1

33710 with repair of ventricular septal defect

33720 Repair sinus of Valsalva aneurysm, with cardiopulmonary bypass

Venous Anomalies

33724 Repair of isolated partial anomalous pulmonary venous return (eg, Scimitar Syndrome)
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Mar 07:1

(Do not report 33724 in conjunction with 32551, 33210, 33211)

33726 Repair of pulmonary venous stenosis
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Mar 07:1

(Do not report 33726 in conjunction with 32551, 33210, 33211)

33730 Complete repair of anomalous pulmonary venous return (supracardiac, intracardiac, or infracardiac types)
- *CPT Assistant* Mar 07:1

(Do not report modifier 63 in conjunction with 33730)

(For partial anomalous pulmonary venous return, use 33724; for repair of pulmonary venous stenosis, use 33726)

33732 Repair of cor triatriatum or supravalvular mitral ring by resection of left atrial membrane
- *CPT Assistant* Mar 07:1

(Do not report modifier 63 in conjunction with 33732)

Shunting Procedures

Codes 33741, 33745 are typically used to report creation of effective intracardiac blood flow in the setting of congenital heart defects. Code 33741 (transcatheter atrial septostomy) involves the percutaneous creation of improved atrial blood flow (eg, balloon/blade method), typically in infants ≤4 kg with congenital heart disease. Code 33745 is typically used for intracardiac shunt creation by stent placement to establish improved intracardiac blood flow (eg, atrial septum, Fontan fenestration, right ventricular outflow tract, Mustard/Senning/Warden baffles). Code 33746 is used to describe each additional intracardiac shunt creation by stent placement at a separate location during the same session as the primary intervention (33745).

Code 33741 includes percutaneous access, placing the access sheath(s), advancement of the transcatheter delivery system, and creation of effective intracardiac atrial blood flow. Codes 33741, 33745 include, when performed, ultrasound guidance for vascular access and fluoroscopic guidance for the intervention. Code 33745 additionally includes intracardiac stent placement, target zone angioplasty preceding or after stent implantation, and complete diagnostic right and left heart catheterization, when performed.

Diagnostic cardiac catheterization is not typically performed at the same session as transcatheter atrial septostomy (33741) and, when performed, may be separately reported. Diagnostic cardiac catheterization is typically performed at the same session with 33745 and the code descriptor includes this work, when performed.

Cardiovascular injection procedures for diagnostic angiography reported using 93563, 93565, 93566, 93567, 93568, 93569, 93573, 93574, 93575 are not typically performed at the same session as 33741. Although diagnostic angiography is typically performed during 33745, target vessels and chambers are highly variable and, when performed for an evaluation separate and distinct from the shunt creation, may be reported separately.

Codes 33745, 33746 are used to describe intracardiac stent placement. Multiple stents placed in a single location may only be reported with a single code. When additional, different intracardiac locations are treated in the same session, 33746 may be reported. Codes 33745, 33746 include all balloon angioplasty(ies) performed in the target lesion, including any pre-dilation (whether performed as a primary or secondary dilation), post-dilation following stent placement, or use of larger/smaller balloon, to achieve therapeutic result. Angioplasty in a separate and distinct intracardiac lesion may be reported separately. Use 33746 in conjunction with 33745.

Diagnostic right and left heart catheterization codes (93451, 93452, 93453, 93456, 93457, 93458, 93459, 93460, 93461, 93593, 93594, 93595, 93596, 93597) should not be used in conjunction with 33741, 33745 to report:

1. Fluoroscopic guidance for the intervention, or
2. Limited hemodynamic and angiographic data used solely for purposes of accomplishing the intervention (eg, measurement of atrial pressures before and after septostomy, atrial injections to determine appropriate catheter position).

Diagnostic right and left heart catheterization (93451, 93452, 93453, 93456, 93457, 93458, 93459, 93460, 93461, 93593, 93594, 93595, 93596, 93597) performed at the same session as 33741 may be separately reported, if:

1. No prior study is available, and a full diagnostic study is performed, or
2. A prior study is available, but as documented in the medical record:
   a. There is inadequate visualization of the anatomy and/or pathology, or
   b. The patient's condition with respect to the clinical indication has changed since the prior study, or
   c. There is a clinical change during the procedure that requires a more thorough evaluation.

For same-session diagnostic cardiac angiography for an evaluation separate and distinct from 33741 or 33745, the appropriate contrast injection(s) performed (93563, 93565, 93566, 93567, 93568, 93569, 93573, 93574, 93575) may be reported.

33735 Atrial septectomy or septostomy; closed heart (Blalock-Hanlon type operation)
CPT Assistant Mar 07:1

33736 open heart with cardiopulmonary bypass

(Do not report modifier 63 in conjunction with 33735, 33736)

(33737 has been deleted)

33741 Transcatheter atrial septostomy (TAS) for congenital cardiac anomalies to create effective atrial flow, including all imaging guidance by the proceduralist, when performed, any method (eg, Rashkind, Sang-Park, balloon, cutting balloon, blade)
CPT Changes: An Insider's View 2021
CPT Assistant Nov 20:7, Dec 21:20-21, May 23:1, Dec 23:47

(Do not report modifier 63 in conjunction with 33741)

(For transseptal puncture, use 93462)

33745 Transcatheter intracardiac shunt (TIS) creation by stent placement for congenital cardiac anomalies to establish effective intracardiac flow, including all imaging guidance by the proceduralist, when performed, left and right heart diagnostic cardiac catheterization for congenital cardiac anomalies, and target zone angioplasty, when performed (eg, atrial septum, Fontan fenestration, right ventricular outflow tract, Mustard/Senning/Warden baffles); initial intracardiac shunt

33851 repair using either left subclavian artery or prosthetic material as gusset for enlargement
- *CPT Assistant* Apr 11:6, Jul 16:3, Dec 21:8

Patent Ductus Arteriosus

33820

The tissues surrounding the ductus are dissected away and then several heavy ligatures are passed around the ductus and tied off on both ends.

33852 Repair of hypoplastic or interrupted aortic arch using autogenous or prosthetic material; without cardiopulmonary bypass
33853 with cardiopulmonary bypass

CPT Assistant Mar 07:1, Apr 11:6, Jul 16:3

(For repair of hypoplastic left heart syndrome (eg, Norwood type), via excision of coarctation of aorta, use 33619)

33852 Repair of hypoplastic or interrupted aortic arch using autogenous or prosthetic material; without cardiopulmonary bypass
33853 with cardiopulmonary bypass

CPT Assistant Mar 07:1, Apr 11:6, Jul 16:3

(For repair of hypoplastic left heart syndrome (eg, Norwood type), via excision of coarctation of aorta, use 33619)

Thoracic Aortic Aneurysm

When ascending aortic disease involves the aortic arch, an aortic hemiarch graft may be necessary in conjunction with the ascending aortic graft and may be reported with add-on code 33866 in conjunction with the appropriate ascending aortic graft code (33858, 33859, 33863, 33864). Aortic hemiarch graft requires all of the following components:

1. Either total circulatory arrest or isolated cerebral perfusion (retrograde or antegrade);
2. Incision into the transverse arch extending under one or more of the arch vessels (eg, innominate, left common carotid, or left subclavian arteries); and
3. Extension of the ascending aortic graft under the aortic arch by construction of a beveled anastomosis to the distal ascending aorta and aortic arch without a cross-clamp (an open anastomosis).

An ascending aortic repair with a beveled anastomosis into the arch with a cross-clamp cannot be reported separately as a hemiarch graft using 33866. Use 33866 for aortic hemiarch graft when performed in conjunction with the ascending aortic graft codes 33858, 33859, 33863, 33864. Code 33871 describes a complete transverse arch graft placement, and is not used to report an aortic hemiarch graft procedure.

33858 Ascending aorta graft, with cardiopulmonary bypass, includes valve suspension, when performed; for aortic dissection

CPT Changes: An Insider's View 2020

CPT Assistant Nov 19:9

33859 for aortic disease other than dissection (eg, aneurysm)

CPT Changes: An Insider's View 2020

CPT Assistant Nov 19:9

33863 Ascending aorta graft, with cardiopulmonary bypass, with aortic root replacement using valved conduit and coronary reconstruction (eg, Bentall)

CPT Changes: An Insider's View 2011

CPT Assistant Feb 05:14, Mar 07:1, Aug 11:3, Nov 19:9

(Do not report 33863 in conjunction with 33405, 33406, 33410, 33411, 33412, 33413, 33858, 33859)

33864 Ascending aorta graft, with cardiopulmonary bypass with valve suspension, with coronary reconstruction and valve-sparing aortic root remodeling (eg, David Procedure, Yacoub Procedure)

- *CPT Changes: An Insider's View* 2008, 2011
- *CPT Assistant* Aug 11:3, Nov 19:9

(Do not report 33864 in conjunction with 33858, 33859, 33863)

+ 33866 Aortic hemiarch graft including isolation and control of the arch vessels, beveled open distal aortic anastomosis extending under one or more of the arch vessels, and total circulatory arrest or isolated cerebral perfusion (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Nov 19:9

(Use 33866 for aortic hemiarch graft performed in conjunction with ascending aortic graft [33858, 33859, 33863, 33864])

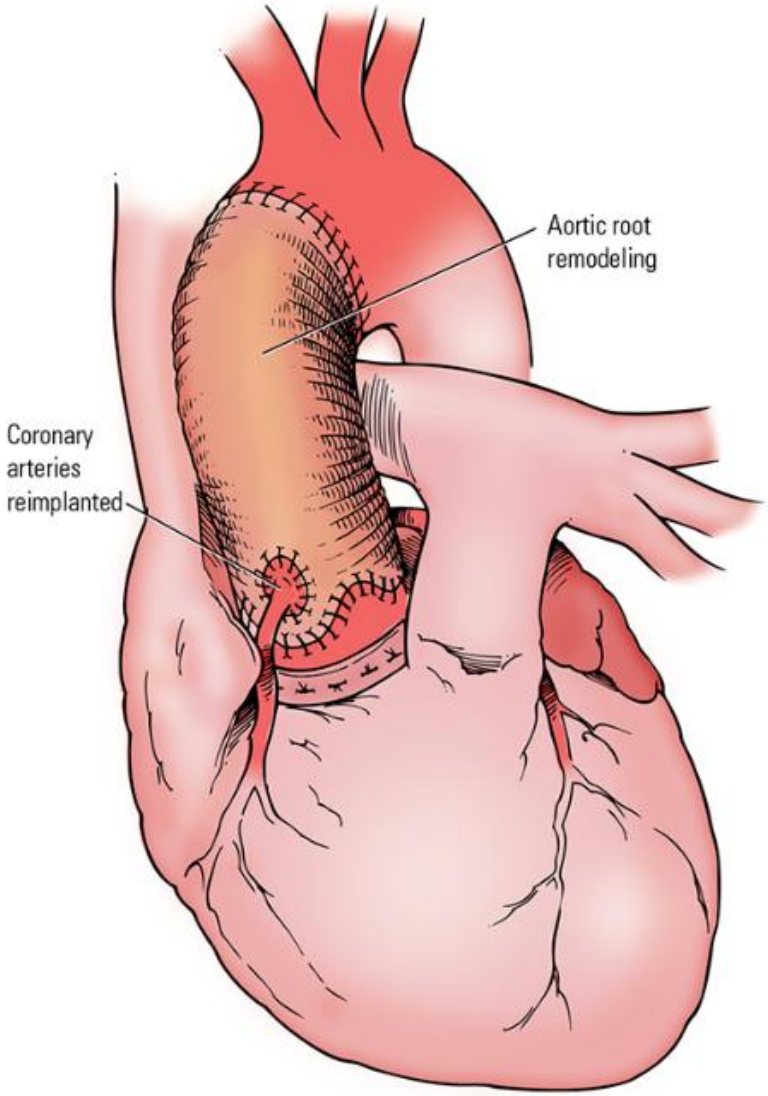
(Do not report 33866 in conjunction with 33871)

33871 Transverse aortic arch graft, with cardiopulmonary bypass, with profound hypothermia, total circulatory arrest and isolated cerebral perfusion with reimplantation of arch vessel(s) (eg, island pedicle or individual arch vessel reimplantation)

- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Nov 19:9

(Do not report 33871 for aortic hemiarch graft)

(Do not report 33871 in conjunction with 33866)



(For aortic hemiarch graft performed in conjunction with ascending aortic graft [33858, 33859, 33863, 33864], use 33866)

33875 Descending thoracic aorta graft, with or without bypass

33877 Repair of thoracoabdominal aortic aneurysm with graft, with or without cardiopulmonary bypass

Aortic Root Remodeling: Coronary Arteries Reimplanted
33864

Valve-sparing aortic root replacement (code 33864)

►Endovascular Repair of Thoracic Aorta◄

►Codes 33880, 33881, 33882, 33883, 33886 describe delivery, positioning, and deployment of an endograft for treatment of thoracic aortic pathology (with or without rupture), such as aneurysm, pseudoaneurysm, dissection, penetrating ulcer, intramural hematoma (IMH), or traumatic disruption. The terms, endovascular graft, endoprosthesis, endograft, and stent graft, refer to a covered stent. The thoracic aorta includes the ascending aorta, the aortic arch which includes the arch or brachiocephalic vessels (eg, innominate artery, left common carotid artery, left subclavian artery) and the descending thoracic aorta to the level of the diaphragm above the origin of the celiac arteries. Reporting endovascular repair of the thoracic aorta is based on anatomy with regard to the left subclavian artery.

Code selection for endovascular repair of the thoracic aorta is based on the most proximal extent of thoracic aortic coverage with an endoprosthesis at the end of the operative session and includes all aortic stent graft(s) implanted both proximally to the aortic root and distally up to the celiac artery, when performed.

When the endoprosthesis is placed proximal to the left subclavian artery, the innominate, common carotid, and/or subclavian arteries may require revascularization through open surgical or endovascular techniques. Open surgical treatment may be performed as a bypass (eg, debranching) or transposition procedure. Endovascular revascularization may also be accomplished through separate parallel stent graft(s) extending alongside the aortic tube stent graft into a brachiocephalic vessel(s). Alternatively, a fenestrated and/or branched endograft multipiece (modular) system may be implanted, which involves an aortic tube device that has a fenestration through which an additional stent-graft extension(s) is placed into a brachiocephalic vessel as needed. Fenestrations within the fabric allow for selective catheterization of the branch vessels and subsequent placement of an endoprosthesis to maintain flow to the branch artery. Parallel stent grafts placed alongside the thoracic graft permit branch flow to the brachiocephalic vessels that preserve flow to these critical branches otherwise covered by the thoracic endograft. Anatomic variation in the location and orientation of the brachiocephalic (innominate, left common carotid, left subclavian) artery origins requires use of a patient-specific fenestrated endograft for endovascular repair that preserves flow to essential arteries and that allows proximal seal and fixation to be achieved. These procedures involve selective catheterization.

The thoracic aortic endograft may be configured in three orientations:

1. Aortic tube device not covering the left subclavian artery;
2. Aortic tube device with a separate parallel stent graft(s) extending alongside the aortic stent graft into one or more of the brachiocephalic vessels; or
3. Fenestrated and/or branched endograft multipiece (modular) system involving an aortic tube device that has a fenestration through which an additional stent-graft extension(s) is placed into one or more of the brachiocephalic vessels as needed.

Report 33880, 33881 for deployment of an aorto-aortic tube device. Report 33882 for deployment of a fenestrated and/or branched endograft multipiece (modular) system involving an aorto-aortic tube device that has a fenestration through which an additional stent-graft extension(s) is placed into the left subclavian artery.

For brachiocephalic branch vessel preservation, subclavian to carotid artery transposition is reported with 35694; carotid artery to subclavian artery bypass with other than vein is reported with 35606; and carotid to contralateral carotid artery bypass with other than vein is reported with 35602.

The treatment zone for endograft procedures is defined by those vessels that contain an endograft(s) (aortic tube device, parallel/fenestration stent graft[s], and/or proximal and distal extension[s]) deployed during that operative session. Adjunctive procedures outside the treatment zone (eg, angioplasty, endovascular stent placement, embolization) may be separately reported.

Code 33883 is reported for delayed placement of a proximal extension prosthesis(es) for endovascular repair of the thoracic aortic aneurysm, pseudoaneurysm, dissection, endoleak, or endograft migration. Code 33883 includes pre-procedure sizing and device selection, nonselective catheterization(s), all associated radiological supervision and interpretation, and treatment zone angioplasty/stenting, when performed. Code 33883 may only be reported once for all proximal stent-graft extensions placed up to the left subclavian artery proximally. For delayed placement of a proximal aortic stent-graft extension that covers the left subclavian artery, see 33880, 33882.

Code 33886 is reported for delayed placement of distal extension prosthesis(es) for endovascular repair of the descending thoracic aortic aneurysm, false aneurysm, dissection, endoleak, or endograft migration. Code 33886 includes pre-procedure sizing and device selection, nonselective catheterization(s), all associated radiological supervision and interpretation, and treatment zone angioplasty/stenting, when performed. Code 33886 may only be reported once for all distal stent-graft extensions placed up to the celiac artery distally.

Nonselective catheterization from iliac (with or without conduit) and femoral (with or without conduit) access is included in 33880, 33881, 33882, 33883, 33886 and is not separately reported. However, selective catheterization of the innominate, left common carotid, subclavian, anomalous brachiocephalic (arch) vessels, and/or arterial families outside the treatment zone of the endograft may be separately reported. Selective catheterization of the left subclavian artery from iliac (with or without conduit) and femoral (with or without conduit) access is included in 33882. Intravascular ultrasound (37252, 37253) performed during endovascular aneurysm repair may be separately reported, when performed. Balloon angioplasty and/or stenting within the treatment zone of the endograft, either before or after endograft deployment, is not separately reported.

Fluoroscopic guidance and radiological supervision and interpretation in conjunction with endograft repair is not separately reported. Thoracic endograft services for treatment of thoracic aortic pathology include all intraprocedural imaging (eg, angiography, rotational computed tomography) of the aorta and its branches prior to deployment of the endovascular device, fluoroscopic guidance and roadmapping used in the delivery of the endovascular components, and intraprocedural and completion angiography (eg, confirm position, detect endoleak, evaluate runoff) performed at the time of the endovascular thoracic aorta repair.

Code 34712 describes transcatheter delivery of accessory-enhanced fixation devices to the endograft (eg, anchor, screw, tack), including all associated radiological supervision and interpretation. Code 34712 may only be reported once per operative session for the thoracic aortic repair.

Percutaneous vascular access requiring use of closure devices for large sheaths (ie, 12 French or larger) or access requiring open surgical arterial exposure may be separately reported (eg, 34713, 34714, 34715, 34716, 34812, 34820, 34833, 34834). Code 34713 describes percutaneous access and closure of a femoral arteriotomy for delivery of endovascular prosthesis through a large arterial sheath (ie, 12 French or larger). Ultrasound guidance (ie, 76937), when performed, is included in 34713 and not separately reported for the same access. (Percutaneous access using a sheath smaller than 12 French is included in 33880, 33881, 33883, 33886 and is not separately reported).

Code 34812 describes open repair and closure of the femoral artery. Extensive repair of an artery (eg, 35226, 35286, 35371) may also be reported separately. Iliac exposure for device delivery through a retroperitoneal incision, open brachial exposure, or axillary or subclavian exposure through an infraclavicular, supraclavicular, or sternotomy incision during endovascular aneurysm repair may be separately reported (eg, 34715, 34812, 34820, 34834). Endovascular device delivery or establishment of cardiopulmonary bypass that requires creation of a prosthetic conduit utilizing a femoral artery, iliac artery with a retroperitoneal incision, or axillary or subclavian artery exposure through an infraclavicular, supraclavicular, or sternotomy incision (34714, 34716, 34833) and oversewing of the conduit at the time of procedure completion may be separately reported during endovascular aneurysm repair or cardiac procedures requiring cardiopulmonary bypass. If a conduit is converted to a bypass, report the bypass (eg, 35665) and not the arterial exposure with conduit (34714, 34716, 34833). Arterial embolization(s) of arteries outside the treatment zone (eg, intercostal) to facilitate complete endovascular aneurysm exclusion may be separately reported (eg, 37242) along with selective and/or nonselective catheterizations of those arteries.

Balloon angioplasty and/or stenting at the sealing zone(s) of an endograft is an integral part of the procedure and is not separately reported. However, balloon angioplasty and/or stent deployment in vessels that do not contain endograft (outside the treatment zone for the endograft), either before or after endograft deployment, may be separately reported. To maintain patency of branch vessels during aortic stent-graft deployment, separate smaller stent grafts may be inserted alongside the aortic stent graft and are termed "parallel grafts," "chimney grafts," and "snorkel grafts." Parallel stent graft(s) that are deployed in the vessels during thoracic aortic endovascular repair are outside the treatment zone and may be reported with the corresponding arterial stent, catheterization, and exposure codes as indicated. For example, percutaneous left axillary artery access with a 6-French sheath, retrograde catheterization of the aorta, and placement of a stent graft that extends from left subclavian artery into the thoracic aorta may be reported with 36200 and 37236.

Interventional procedures that are performed either before or after endograft deployment during the same operative session for endovascular thoracic aortic aneurysm repair may be separately reported (eg, arterial embolization, intravascular ultrasound, balloon angioplasty, or stenting of native artery[ies] outside the endograft treatment zone).◀

For endovascular stenting or balloon angioplasty of congenital coarctation or postsurgical recoarctation of the ascending, transverse, or descending thoracic or abdominal aorta, see 33894, 33895, 33897.

▲ **33880** Endovascular repair of thoracic aorta, including pre-procedure sizing and device selection, nonselective catheterization(s), all associated radiological supervision and interpretation; by deployment of an aorto-aortic tube endograft covering the left subclavian artery and all aortic tube endograft extension(s) proximally in the aortic arch and ascending aorta and distally to the celiac artery, when performed

Endovascular Repair of Congenital Heart and Vascular Defects

Codes 33894, 33895, 33897 describe transcatheter interventions for revascularization or repair for coarctation of the aorta. Code 33897 describes dilation of the coarctation using balloon angioplasty without stent placement. Codes 33894, 33895 describe stent placement to treat the coarctation. The procedure described in 33894 involves stent placement across one or more major side branches of the aorta. For reporting purposes, the major side branches of the thoracic aorta are the brachiocephalic, carotid, and subclavian arteries, and the major side branches of the abdominal aorta are the celiac, superior mesenteric, inferior mesenteric, and renal arteries.

Codes 33894, 33895, 33897 include all fluoroscopic guidance of the intervention, diagnostic congenital left heart catheterization, all catheter and wire introductions and manipulation, and angiography of the target lesion.

Codes 33894, 33895 include stent introduction, manipulation, positioning, and deployment, temporary pacemaker insertion for rapid pacing (33210) to facilitate stent positioning, when performed, as well as any additional stent delivery in tandem with the initial stent for extension purposes. Balloon angioplasty within the target-treatment zone, either before or after stent deployment, is not separately reportable. For balloon angioplasty of an additional coarctation of the aorta in a segment separate from the treatment zone for the coarctation stent, use 33897.

For balloon angioplasty or stenting of the aorta for lesions other than coarctation (eg, atherosclerosis) of the aorta in a segment separate from the coarctation treatment zone, see 37236, 37246.

For additional diagnostic right heart catheterization in the same setting as 33894, 33895, see 93593, 93594.

Other interventional procedures performed at the time of endovascular repair of coarctation of the aorta (33894, 33895) may be reported separately (eg, innominate, carotid, subclavian, visceral, iliac, or pulmonary artery balloon angioplasty or stenting, arterial or venous embolization), when performed before or after coarctation stent deployment.

33894 Endovascular stent repair of coarctation of the ascending, transverse, or descending thoracic or abdominal aorta, involving stent placement; across major side branches

(For angioplasty and other transcatheter revascularization interventions of additional upper or lower extremity vessels in same setting, use the appropriate code from the Surgery/Cardiovascular System section)

Coarctation of the Aorta and Its Repair

33894, 33895

Codes 33900, 33901, 33902, 33903, 33904 describe endovascular repair of pulmonary artery stenosis by stent placement. Codes 33900, 33901 describe stent placement within the pulmonary arteries via normal native connections, defined as superior vena cava/inferior vena cava to right atrium, then right ventricle, then pulmonary arteries. Codes 33902, 33903 describe stent placement within the pulmonary arteries, ductus arteriosus, or within a surgical shunt, via abnormal connections or through post-surgical shunts (eg, Blalock-Taussig shunt, Sano shunt, or post Glenn or Fontan procedures). Code 33904 is an add-on code that describes placement of stent(s) in additional vessels or lesions beyond the primary vessel or lesion treated whether access is via normal or abnormal connection.

Codes 33900, 33901, 33902, 33903, 33904 include vascular access and all catheter and guidewire manipulation, fluoroscopy to guide the intervention, any post-diagnostic angiography for roadmapping purposes and post-implant evaluation, stent positioning and balloon inflation for stent delivery, and radiologic supervision and interpretation of the intervention. Angiography at the same session, as part of a diagnostic cardiac catheterization, may be reported with the appropriate angiographic codes from the Radiology or Medicine/Cardiovascular/Cardiac Catheterization/Injection Procedures sections.

Diagnostic cardiac catheterization and diagnostic angiography codes (93451, 93452, 93453, 93454, 93455, 93456, 93457, 93458, 93459, 93460, 93461, 93563, 93566, 93567, 93568, 93593, 93594, 93596, 93597, 93598) should **not** be used with 33900, 33901, 33902, 33903, 33904 to report:

1. Contrast injections, angiography, roadmapping, and/or fluoroscopic guidance for the percutaneous pulmonary artery revascularization by stent placement,
2. Pulmonary conduit angiography for guidance of percutaneous pulmonary artery revascularization by stent placement, or
3. Right heart catheterization for hemodynamic measurements before, during, and after percutaneous pulmonary artery revascularization by stent placement for guidance of percutaneous pulmonary artery revascularization by stent placement.

Diagnostic right and left heart catheterization codes (93451, 93452, 93453, 93456, 93457, 93458, 93459, 93460, 93461, 93593, 93594, 93595, 93596, 93597, 93598), diagnostic coronary angiography codes (93454, 93455, 93456, 93457, 93458, 93459, 93460, 93461, 93563, 93564), and diagnostic angiography codes 93565, 93566, 93567, 93568 may be separately reported in conjunction with 33900, 33901, 33902, 33903, 33904, representing separate and distinct services from pulmonary artery revascularization, if:

1. No prior study is available and a full diagnostic study is performed, or
2. A prior study is available, but as documented in the medical record:
   a. There is inadequate visualization of the anatomy and/or pathology, or
   b. The patient's condition with respect to the clinical indication has changed since the prior study, or
   c. There is a clinical change during the procedure that requires new evaluation.

Do not report 33900, 33901, 33902, 33903, 33904 in conjunction with 76000, 93451, 93452, 93453, 93454, 93455, 93456, 93457, 93458, 93459, 93460, 93461, 93563, 93564, 93565, 93566, 93567, 93568, 93593, 93594, 93596, 93597, 93598 for catheterization and angiography services intrinsic to the procedure.

Balloon angioplasty (92997, 92998) within the same target lesion as stent implant, either before or after stent deployment, is not separately reported.

For balloon angioplasty at the same session as 33900, 33901, 33902, 33903, 33904, but for a distinct lesion or in a different artery, see 92997, 92998.

To report percutaneous pulmonary artery revascularization by stent placement in conjunction with diagnostic congenital cardiac catheterization, see 33900, 33901, 33902, 33903, 33904.

For transcatheter intracardiac shunt (TIS) creation by stent placement for congenital cardiac anomalies to establish effective intracardiac flow, see 33745, 33746.

33900 Percutaneous pulmonary artery revascularization by stent placement, initial; normal native connections, unilateral

- *CPT Changes: An Insider's View* 2023
- *CPT Assistant* Jun 23:1

33901 normal native connections, bilateral

- *CPT Changes: An Insider's View* 2023
- *CPT Assistant* Jun 23:1

33902 abnormal connections, unilateral

- *CPT Changes: An Insider's View* 2023
- *CPT Assistant* Jun 23:1

33903 abnormal connections, bilateral

- *CPT Changes: An Insider's View* 2023
- *CPT Assistant* Jun 23:1

+ 33904 Percutaneous pulmonary artery revascularization by stent placement, each additional vessel or separate lesion, normal or abnormal connections (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2023
- *CPT Assistant* Jun 23:1

(Use 33904 in conjunction with 33900, 33901, 33902, 33903)

Pulmonary Artery

33910 Pulmonary artery embolectomy; with cardiopulmonary bypass

- *CPT Assistant* Mar 07:1, Jan 23:30

33915 without cardiopulmonary bypass

- *CPT Assistant* Mar 07:1, Jan 23:30

33916 Pulmonary endarterectomy, with or without embolectomy, with cardiopulmonary bypass

- *CPT Assistant* Mar 07:1, Jan 23:30

33917 Repair of pulmonary artery stenosis by reconstruction with patch or graft

- *CPT Assistant* Mar 07:1, Apr 11:6, Jul 16:3

33920 Repair of pulmonary atresia with ventricular septal defect, by construction or replacement of conduit from right or left ventricle to pulmonary artery

- *CPT Assistant* Mar 07:1, Apr 19:6

(For repair of other complex cardiac anomalies by construction or replacement of right or left ventricle to pulmonary artery conduit, use 33608)

33922 Transection of pulmonary artery with cardiopulmonary bypass

(Do not report modifier 63 in conjunction with 33922)

+ 33924 Ligation and takedown of a systemic-to-pulmonary artery shunt, performed in conjunction with a congenital heart procedure (List separately in addition to code for primary procedure)

(Use 33924 in conjunction with 33474, 33475, 33476, 33477, 33478, 33600-33617, 33622, 33684-33688, 33692-33697, 33735-33767, 33770-33783, 33786, 33917, 33920, 33922, 33925, 33926, 33935, 33945)

33925 Repair of pulmonary artery arborization anomalies by unifocalization; without cardiopulmonary bypass

- *CPT Changes: An Insider's View* 2006

33926 with cardiopulmonary bypass

- *CPT Changes: An Insider's View* 2006

Heart/Lung Transplantation

Heart with or without lung allotransplantation involves three distinct components of physician work:

1. ***Cadaver donor cardiectomy with or without pneumonectomy,*** which includes harvesting the allograft and cold preservation of the allograft (perfusing with cold preservation solution and cold maintenance) (see 33930, 33940).

2. ***Backbench work:***

   Preparation of a cadaver donor heart and lung allograft prior to transplantation, including dissection of the allograft from surrounding soft tissues to prepare the aorta, superior vena cava, inferior vena cava, and trachea for implantation (use 33933).

   Preparation of a cadaver donor heart allograft prior to transplantation, including dissection of the allograft from surrounding soft tissues to prepare aorta, superior vena cava, inferior vena cava, pulmonary artery, and left atrium for implantation (use 33944).

3. ***Recipient heart with or without lung allotransplantation,*** which includes transplantation of allograft and care of the recipient (see 33935, 33945).

(For implantation of a total replacement heart system [artificial heart] with recipient cardiectomy, use 33927)

33927 Implantation of a total replacement heart system (artificial heart) with recipient cardiectomy

CPT Changes: An Insider's View 2018

CPT Assistant Jun 18:3

(For implantation of ventricular assist device, see 33975, 33976, 33979, 33990, 33991, 33995)

33928 Removal and replacement of total replacement heart system (artificial heart)

CPT Changes: An Insider's View 2018

CPT Assistant Jun 18:3

(For revision or replacement of components only of a replacement heart system [artificial heart], use 33999)

+ 33929 Removal of a total replacement heart system (artificial heart) for heart transplantation (List separately in addition to code for primary procedure)

Total Heart Implantation Device

33927, 33928, 33929

Total heart implantation device in place after cardiectomy

33930 Donor cardiectomy-pneumonectomy (including cold preservation)

CPT Changes: An Insider's View 2005

33933 Backbench standard preparation of cadaver donor heart/lung allograft prior to transplantation, including dissection of allograft from surrounding soft tissues to prepare aorta, superior vena cava, inferior vena cava, and trachea for implantation

CPT Changes: An Insider's View 2005

33935 Heart-lung transplant with recipient cardiectomy-pneumonectomy

33940 Donor cardiectomy (including cold preservation)

CPT Changes: An Insider's View 2005

CPT Assistant Apr 05:10-11

33944 Backbench standard preparation of cadaver donor heart allograft prior to transplantation, including dissection of allograft from surrounding soft tissues to prepare aorta, superior vena cava, inferior vena cava, pulmonary artery, and left atrium for implantation

CPT Changes: An Insider's View 2005

(For repair or resection procedures on the donor heart, see 33300, 33310, 33320, 33390, 33463, 33464, 33510, 33641, 35216, 35276, 35685)

33945 Heart transplant, with or without recipient cardiectomy

CPT Assistant Fall 92:20, Jun 18:3

Extracorporeal Membrane Oxygenation or Extracorporeal Life Support Services

Prolonged extracorporeal membrane oxygenation (ECMO) or extracorporeal life support (ECLS) is a procedure that provides cardiac and/or respiratory support to the heart and/or lungs, which allows them to rest and recover when sick or injured. ECMO/ECLS supports the function of the heart and/or lungs by continuously pumping some of the patient's blood out of the body to an oxygenator (membrane lung) where oxygen is added to the blood, carbon dioxide (CO_2) is removed, and the blood is warmed before it is returned to the patient. There are two methods that can be used to accomplish ECMO/ECLS. One method is veno-arterial extracorporeal life support, which will support both the heart and lungs. Veno-arterial ECMO/ECLS requires that two cannula(e) are placed—one in a large vein and one in a large artery. The other method is veno-venous extracorporeal life support. Veno-venous ECMO/ECLS is used for lung support only and requires one or two cannula(e), which are placed in a vein.

Services directly related to the cannulation, initiation, management, and discontinuation of the ECMO/ECLS circuit and parameters (33946, 33947, 33948, 33949) are distinct from the daily overall management of the patient. The daily overall management of the patient is a factor that will vary greatly depending on the patient's age, disease process, and condition. Daily overall management of the patient may be separately reported using the relevant hospital inpatient or observation care services (99221, 99222, 99223, 99231, 99232, 99233, 99234, 99235, 99236) or critical care or intensive care evaluation and management codes (99291, 99292, 99468, 99469, 99471, 99472, 99475, 99476, 99477, 99478, 99479, 99480).

Services directly related to the ECMO/ECLS involve the initial cannulation and repositioning, removing, or adding cannula(e) while the patient is being supported by the ECMO/ECLS. Initiation of the ECMO/ECLS circuit and setting parameters (33946, 33947) is performed by the physician and involves determining the necessary ECMO/ECLS device components, blood flow, gas exchange, and other necessary parameters to manage the circuit. The daily management of the ECMO/ECLS circuit and monitoring parameters (33948, 33949) requires physician oversight to ensure that specific features of the interaction of the circuit with the patient are met. Daily management of the circuit and parameters includes management of blood flow, oxygenation, CO_2 clearance by the membrane lung, systemic response, anticoagulation and treatment of bleeding, and cannula(e) positioning, alarms and safety. Once the patient's heart and/or lung function has sufficiently recovered, the physician will wean the patient from the ECMO/ECLS circuit and finally decannulate the patient. The basic management of the ECMO/ECLS circuit and parameters are similar, regardless of the patient's condition.

ECMO/ECLS commonly involves multiple physicians and supporting nonphysician personnel to manage each patient. Different physicians may insert the cannula(e) and initiate ECMO/ECLS, manage the ECMO/ECLS circuit, and decannulate the patient. In addition, it would be common for one physician to manage the ECMO/ECLS circuit and patient-related issues (eg, anticoagulation, complications related to the ECMO/ECLS devices), while another physician manages the overall patient medical condition and underlying disorders, all on a daily basis. The physicians involved in the patient's care are commonly of different specialties, and significant physician team interaction may be required. Depending on the type of circuit and the patient's condition, there is substantial nonphysician work by ECMO/ECLS specialists, cardiac perfusionists, respiratory therapists, and specially trained nurses who provide long periods of constant attention.

If the same physician provides any or all of the services for placing a patient on an ECMO/ECLS circuit, they may report the appropriate codes for the services they performed, which may include codes for the cannula(e) insertion (33951, 33952, 33953, 33954, 33955, 33956), ECMO/ECLS initiation (33946 or 33947), and overall patient management (99221, 99222, 99223, 99231, 99232, 99233, 99234, 99235, 99236, 99291, 99292, 99468, 99469, 99471, 99472, 99475, 99476, 99477, 99478, 99479, 99480).

ECMO/ECLS daily management (33948, 33949) and repositioning services (33957, 33958, 33959, 33962, 33963, 33964) may not be reported on the same day as initiation services (33946, 33947) by the same or different individuals.

If different physicians provide parts of the service, each physician may report the correct code(s) for the service(s) they provided, except as noted.

Repositioning of the ECMO/ECLS cannula(e) (33957, 33958, 33959, 33962, 33963, 33964) at the same session as insertion (33951, 33952, 33953, 33954, 33955, 33956) is not separately reportable. Replacement of ECMO/ECLS cannula(e) in the same vessel should only be reported using the insertion code (33951, 33952, 33953, 33954, 33955, 33956). If cannula(e) are removed from one vessel and new cannula(e) are placed in a different vessel, report the appropriate cannula(e) removal (33965, 33966, 33969, 33984, 33985, 33986) and insertion (33951, 33952, 33953, 33954, 33955, 33956) codes. Extensive repair or replacement of an artery may be additionally reported (eg, 35266, 35286, 35371, and 35665). Fluoroscopic guidance used for cannula(e) repositioning (33957, 33958, 33959, 33962, 33963, 33964) is included in the procedure when performed and should not be separately reported.

Daily management codes (33948 and 33949) should not be reported on the same day as initiation of ECMO (33946 or 33947).

Initiation codes (33946 or 33947) should not be reported on the same day as repositioning codes (33957, 33958, 33959, 33962, 33963, 33964). See the CPT codes for ECMO/ECLS Procedures chart.

33946 Extracorporeal membrane oxygenation (ECMO)/extracorporeal life support (ECLS) provided by physician; initiation, veno-venous

 # 33989 Removal of left heart vent by thoracic incision (eg, sternotomy, thoracotomy) for ECMO/ECLS
- *CPT Changes: An Insider's View* 2015
- *CPT Assistant* Jul 15:3, Mar 16:5

Cardiac Assist

A ventricular assist device is placed to provide hemodynamic support to the right heart, left heart, or both. The insertion of a ventricular assist device (VAD) can be performed via percutaneous (33990, 33991, 33995) or transthoracic (33975, 33976, 33979) approach. The location of the ventricular assist device may be intracorporeal or extracorporeal.

Removal of a transthoracic ventricular assist device (33977, 33978, 33980) or percutaneous ventricular assist device (33992, 33997) includes removal of the entire device, including the cannulas. Removal of a percutaneous ventricular assist device at the same session as insertion is not separately reportable. For removal of a percutaneous ventricular assist device at a separate and distinct session, but on the same day as insertion, report 33992, 33997 appended with modifier 59 indicating a distinct procedural service.

Repositioning of a percutaneous ventricular assist device at the same session as insertion is not separately reportable. Repositioning of percutaneous ventricular assist device not necessitating imaging guidance is not a reportable service. For repositioning of a percutaneous ventricular assist device necessitating imaging guidance at a separate and distinct session, but on the same day as insertion, report 33993 with modifier 59 indicating a distinct procedural service.

Replacement of a ventricular assist device pump (ie, 33981-33983) includes the removal of the pump and insertion of a new pump, connection, de-airing, and initiation of the new pump.

Replacement of the entire implantable ventricular assist device system, ie, pump(s) and cannulas, is reported using the insertion codes (ie, 33975, 33976, 33979). Removal (ie, 33977, 33978, 33980) of the ventricular assist device system being replaced is not separately reported. Replacement of a percutaneous ventricular assist device is reported using implantation codes (ie, 33990, 33991, 33995). Removal (ie, 33992, 33997) is not reported separately when a device is replaced.

33967 Insertion of intra-aortic balloon assist device, percutaneous

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Feb 02:2, Nov 11:8, Mar 13:10, Sep 15:3, Mar 16:5

33968 Removal of intra-aortic balloon assist device, percutaneous

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:19, Jan 00:10, Nov 11:8

33969 Code is out of numerical sequence. See 33958-33968

33970 Insertion of intra-aortic balloon assist device through the femoral artery, open approach

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:19, Nov 11:8, Mar 13:10, Sep 15:3, Mar 16:5

33971 Removal of intra-aortic balloon assist device including repair of femoral artery, with or without graft

- *CPT Assistant* Nov 11:8

33973 Insertion of intra-aortic balloon assist device through the ascending aorta

- *CPT Assistant* Nov 11:8, Mar 13:10, Sep 15:3, Mar 16:5

33974 Removal of intra-aortic balloon assist device from the ascending aorta, including repair of the ascending aorta, with or without graft

- *CPT Assistant* Nov 11:8

33975 Insertion of ventricular assist device; extracorporeal, single ventricle

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Feb 92:2, Jan 04:28, Nov 09:10, Jan 10:11, Apr 10:6, Mar 13:10

33976 extracorporeal, biventricular

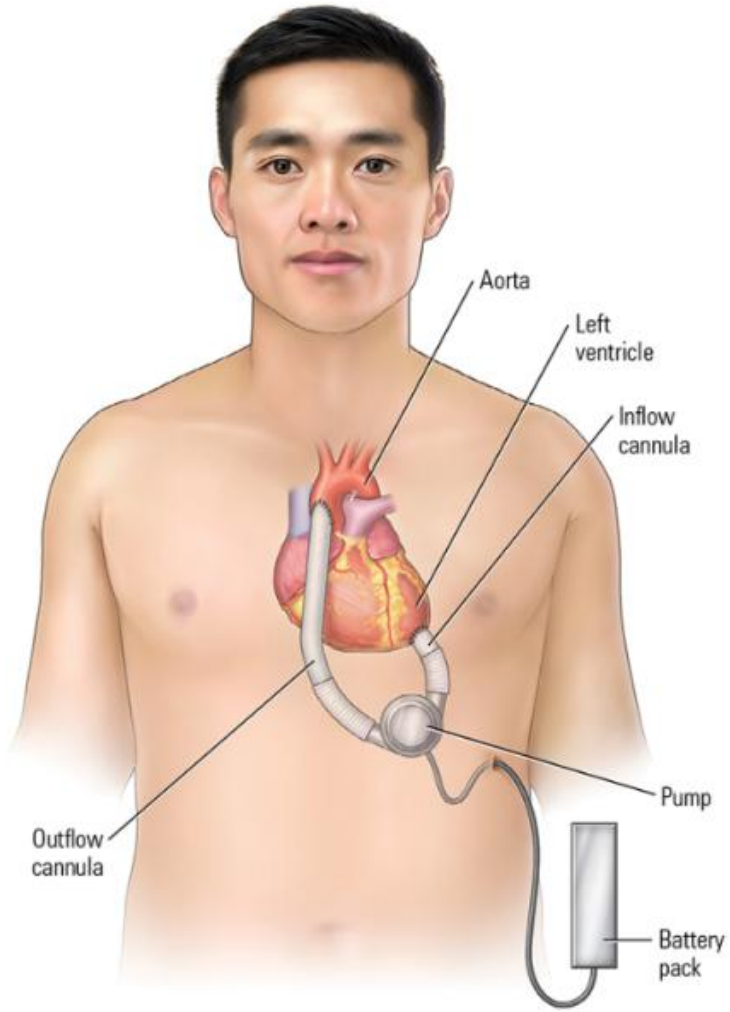
- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Feb 02:2, Nov 09:10, Jan 10:11, Apr 10:6, Mar 13:10

33977 Removal of ventricular assist device; extracorporeal, single ventricle

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Feb 02:2, Nov 09:10, Jan 10:11, Apr 10:6, Mar 13:10

33978 extracorporeal, biventricular

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Feb 02:2, Nov 09:10, Jan 10:11, Apr 10:6, Mar 13:10



33979 Insertion of ventricular assist device, implantable intracorporeal, single ventricle

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Feb 02:3, Jan 04:28, Nov 09:10, Jan 10:11, Apr 10:6, Mar 13:10

33980 Removal of ventricular assist device, implantable intracorporeal, single ventricle

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Feb 02:3, Nov 09:10, Apr 10:6, Mar 13:10

Insertion of Implantable Single Ventricle Assist Device
33979

33981 Replacement of extracorporeal ventricular assist device, single or biventricular, pump(s), single or each pump

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Apr 10:6

33982 Replacement of ventricular assist device pump(s); implantable intracorporeal, single ventricle, without cardiopulmonary bypass

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Apr 10:6

33983 implantable intracorporeal, single ventricle, with cardiopulmonary bypass

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Apr 10:6

33997 Code is out of numerical sequence. See 33991-33993

Other Procedures

33999 Unlisted procedure, cardiac surgery

CPT Assistant Oct 99:11, Jan 04:7, Mar 07:1, Nov 09:10, Jan 10:11, Apr 10:6, Feb 13:13, Mar 13:10, Dec 13:14, Dec 14:17, Apr 19:10, Nov 21:3, Apr 24:9, Oct 24:13, Nov 24:20

Arteries and Veins

Primary vascular procedure listings include establishing both inflow and outflow by whatever procedures necessary. Also included is that portion of the operative arteriogram performed by the surgeon, as indicated. Sympathectomy, when done, is included in the listed aortic procedures. For unlisted vascular procedure, use 37799.

Embolectomy/Thrombectomy

Arterial, With or Without Catheter

34001 Embolectomy or thrombectomy, with or without catheter; carotid, subclavian or innominate artery, by neck incision

CPT Assistant Jun 22:22

34051 innominate, subclavian artery, by thoracic incision

34101 axillary, brachial, innominate, subclavian artery, by arm incision

34111 radial or ulnar artery, by arm incision

34151 renal, celiac, mesentery, aortoiliac artery, by abdominal incision

34201 femoropopliteal, aortoiliac artery, by leg incision

CPT Assistant Aug 11:9

34203 popliteal-tibio-peroneal artery, by leg incision

Venous, Direct or With Catheter

34401 Thrombectomy, direct or with catheter; vena cava, iliac vein, by abdominal incision

34421 vena cava, iliac, femoropopliteal vein, by leg incision

CPT Assistant Spring 94:30

34451 vena cava, iliac, femoropopliteal vein, by abdominal and leg incision

34471 subclavian vein, by neck incision

34490 axillary and subclavian vein, by arm incision

CPT Assistant Jun 22:22

Venous Reconstruction

34501 Valvuloplasty, femoral vein

(For insertion of bioprosthetic valve into femoral vein, use 0744T)

34502 Reconstruction of vena cava, any method

34510 Venous valve transposition, any vein donor

(For insertion of bioprosthetic valve into femoral vein, use 0744T)

34520 Cross-over vein graft to venous system

CPT Assistant Mar 23:33

34530 Saphenopopliteal vein anastomosis

Endovascular Repair of Abdominal Aorta and/or Iliac Arteries

►Codes 34701, 34702, 34703, 34704, 34705, 34706 describe introduction, positioning, and deployment of an endograft for treatment of abdominal aortic pathology (with or without rupture), such as aneurysm, pseudoaneurysm, dissection, penetrating ulcer, or traumatic disruption in the infrarenal abdominal aorta with or without extension into the iliac artery(ies). The terms, endovascular graft, endoprosthesis, endograft, and stent graft, refer to a covered stent. The infrarenal aortic endograft may be an aortic tube device, a bifurcated unibody device, a modular bifurcated docking system with docking limb(s), or an aorto-uni-iliac device. Codes 34707, 34708 describe introduction, positioning, and deployment of an ilio-iliac endograft for treatment of isolated arterial pathology (with or without rupture), such as aneurysm, pseudoaneurysm, arteriovenous malformation, or trauma involving the iliac artery. For treatment of atherosclerotic occlusive disease in the iliac artery(ies) with a covered stent(s), see 37258, 37259, 37260, 37261. For covered stent placement for atherosclerotic occlusive disease in the aorta, see 37236, 37237.◄

Add-on code 34717 is reported at the time of aorto-iliac artery endograft placement (34703, 34704, 34705, 34706) for deployment of a bifurcated endograft in the common iliac artery with extension(s) into both the internal iliac and external iliac arteries, when performed, to maintain perfusion in both vessels for treatment of iliac artery pathology (with or without rupture), such as aneurysm, pseudoaneurysm, dissection, penetrating ulcer, arteriovenous malformation, or traumatic disruption. The iliac branched endograft is a multi-piece system consisting of a bifurcated device that is placed in the common iliac artery and then additional extension(s) are placed into both the internal iliac artery and external iliac/common femoral arteries as needed, as well as a proximal extension that overlaps with an aorto-iliac endograft, when performed. All additional extensions proximally into the common iliac artery or distally into the external iliac and/or common femoral arteries are inherent to these codes.

Report 34705 or 34706 for simultaneous bilateral iliac artery aneurysm repairs with aorto-bi-iliac endograft. For isolated bilateral iliac artery repair using iliac artery tube endografts, report 34707 or 34708 with modifier 50 appended.

Decompressive laparotomy for abdominal compartment syndrome after ruptured abdominal aortic and/or iliac artery aneurysm repair may be separately reported with 49000 in addition to 34702, 34704, 34706, or 34708.

The treatment zone for endograft procedures is defined by those vessels that contain an endograft(s) (main body, docking limb[s], and/or extension[s]) deployed during that operative session. Adjunctive procedures outside the treatment zone may be separately reported (eg, angioplasty, endovascular stent placement, embolization). For example, when an endograft terminates in the common iliac artery, any additional treatment performed in the external and/or internal iliac artery may be separately reportable. Placement of a docking limb is inherent to a modular endograft(s), and, therefore, 34709 may not be reported separately if the docking limb extends into the external iliac artery. In addition, any interventions (eg, angioplasty, stenting, additional stent graft extension[s]) in the external iliac artery where the docking limb terminates may not be reported separately. Any catheterization or treatment of the internal iliac artery, such as embolization, may be separately reported. For 34701 and 34702, the abdominal aortic treatment zone is defined as the infrarenal aorta. For 34703 and 34704, the abdominal aortic treatment zone is typically defined as the infrarenal aorta and ipsilateral common iliac artery. For 34705 and 34706, the abdominal aortic treatment zone is typically defined as the infrarenal aorta and both common iliac arteries. For 34707, 34708, 34717, 34718, the treatment zone is defined as the portion of the iliac artery(ies) (eg, common, internal, external iliac arteries) that contains the endograft.

Codes 34702, 34704, 34706, 34708 are reported when endovascular repair is performed on ruptured aneurysm in the aorta or iliac artery(ies). Rupture is defined as clinical and/or radiographic evidence of acute hemorrhage for purposes of reporting these codes. A chronic, contained rupture is considered a pseudoaneurysm, and endovascular treatment of a chronic, contained rupture is reported with 34701, 34703, 34705, or 34707.

Code 34709 is reported for placement of extension prosthesis(es) that terminate(s) either in the internal iliac, external iliac, or common femoral artery(ies) or in the abdominal aorta proximal to the renal artery(ies) in conjunction with 34701, 34702, 34703, 34704, 34705, 34706, 34707, 34708. Code 34709 may only be reported once per vessel treated (ie, multiple endograft extensions placed in a single vessel may only be reported once). Endograft extension(s) that terminate(s) in the common iliac arteries are included in 34703, 34704, 34705, 34706, 34707, 34708 and are not separately reported. Treatment zone angioplasty/stenting, when performed, is included in 34709. In addition, proximal infrarenal abdominal aortic extension prosthesis(es) that terminate(s) in the aorta below the renal artery(ies) are also included in 34701, 34702, 34703, 34704, 34705, 34706 and are not separately reportable.

Codes 34710, 34711 are reported for delayed placement of distal or proximal extension prosthesis(es) for endovascular repair of infrarenal abdominal aortic or iliac aneurysm, false aneurysm, dissection, endoleak, or endograft migration. Pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, and treatment zone angioplasty/stenting, when performed, are included in 34710 and 34711. Codes 34710 and 34711 may only be reported once per vessel treated (ie, multiple endograft extensions placed in a single vessel may only be reported once).

If an aorto-iliac artery endograft (34703, 34704, 34705, 34706) is not being placed during the same operative session, 34718 may be reported for placement of a bifurcated endograft in the common iliac artery with extension(s) into both the internal iliac and external iliac arteries, to maintain perfusion in both vessels for treatment of iliac artery pathology (without rupture), such as aneurysm, pseudoaneurysm, dissection, arteriovenous malformation. The iliac branched endograft is a multi-piece system consisting of a bifurcated device that is placed in the common iliac artery and then additional extension(s) are placed into both the internal iliac artery and external iliac/common femoral arteries as needed as well as a proximal extension that overlaps with an aorto-iliac endograft, when performed. All additional extensions placed proximally into the common iliac artery or distally into the external iliac and/or common femoral arteries are inherent to these codes. For isolated bilateral iliac artery repair using iliac artery branched endografts, use 34718 with modifier 50 appended.

Codes 34709, 34710, 34711 may not be separately reported with 34717, 34718 for ipsilateral extension prosthesis(es). However, 34709, 34710, 34711 may be reported separately for extension prosthesis(es) in the iliac/femoral arteries contralateral to the iliac branched endograft.

Nonselective catheterization is included in 34701, 34702, 34703, 34704, 34705, 34706, 34707, 34708 and is not separately reported. However, selective catheterization of the hypogastric artery(ies), renal artery(ies), and/or arterial families outside the treatment zone of the endograft may be separately reported. Intravascular ultrasound (37252, 37253) performed during endovascular aneurysm repair may be separately reported. Balloon angioplasty and/or stenting within the treatment zone of the endograft, either before or after endograft deployment, is not separately reported. Fluoroscopic guidance and radiological supervision and interpretation in conjunction with endograft repair is not separately reported, and includes all intraprocedural imaging (eg, angiography, rotational CT) of the aorta and its branches prior to deployment of the endovascular device, fluoroscopic guidance and roadmapping used in the delivery of the endovascular components, and intraprocedural and completion angiography (eg, confirm position, detect endoleak, evaluate runoff) performed at the time of the endovascular infrarenal aorta and/or iliac repair.

Selective arterial catheterization of the internal and external iliac arteries (eg, 36245, 36246, 36247, 36248) ipsilateral to an iliac branched endograft is included in 34717, 34718 and not separately reported. However, selective catheterization of the renal artery(ies), the contralateral hypogastric artery, and/or arterial families outside the treatment zone of the graft may be separately reported. Intravascular ultrasound (37252, 37253) performed during endovascular aneurysm repair may be separately reported. Balloon angioplasty within the target treatment zone of the endograft, either before or after endograft deployment, is not separately reported. Fluoroscopic guidance and radiological supervision and interpretation performed in conjunction with endovascular iliac branched repair is not separately reported. Endovascular iliac branched repair includes all intraprocedural imaging (eg, angiography, rotational CT) of the aorta and its branches prior to deployment of the endovascular device, fluoroscopic guidance in the delivery of the endovascular components, and intraprocedural arterial angiography (eg, confirm position, detect endoleak, evaluate runoff) performed at the time of the endovascular aorto-iliac repair).

Codes 34709, 34710, 34711 include nonselective introduction of guidewires and catheters into the treatment zone from peripheral artery access(es). However, selective catheterization of the hypogastric artery(ies), renal artery(ies), and/or arterial families outside the treatment zone may be separately reported. Codes 34709, 34710, 34711 also include balloon angioplasty and/or stenting within the treatment zone of the endograft extension, either before or after deployment of the endograft, fluoroscopic guidance, and all associated radiological supervision and interpretation performed in conjunction with endovascular endograft extension (eg, angiographic diagnostic imaging of the aorta and its branches prior to deployment of the endovascular device, fluoroscopic guidance in the delivery of the endovascular components, and intraprocedural and completion angiography to confirm endograft position, detect endoleak, and evaluate runoff).

Code 34712 describes transcatheter delivery of accessory-enhanced fixation devices to the endograft (eg, anchor, screw, tack), including all associated radiological supervision and interpretation. Code 34712 may only be reported once per operative session.

Vascular access requiring use of closure devices for large sheaths (ie, 12 French or larger) or access requiring open surgical arterial exposure may be separately reported (eg, 34713, 34714, 34715, 34716, 34812, 34820, 34833, 34834). Code 34713 describes percutaneous access and closure of a femoral arteriotomy for delivery of endovascular prosthesis through a large arterial sheath (ie, 12 French or larger). Ultrasound guidance (ie, 76937), when performed, is included in 34713. (Percutaneous access using a sheath smaller than 12 French is included in 34701-34712 and is not separately reported.)

Code 34812 describes open repair and closure of the femoral artery. Extensive repair of an artery (eg, 35226, 35286, 35371) may also be reported separately. Iliac exposure for device delivery through a retroperitoneal incision, open brachial exposure, or axillary or subclavian exposure through an infraclavicular, or supraclavicular or sternotomy incision during endovascular aneurysm repair may be separately reported (eg, 34715, 34812, 34820, 34834). Endovascular device delivery or establishment of cardiopulmonary bypass that requires creation of a prosthetic conduit utilizing a femoral artery, iliac artery with a retroperitoneal incision, or axillary or subclavian artery exposure through an infraclavicular, supraclavicular, or sternotomy incision (34714, 34716, 34833) and oversewing of the conduit at the time of procedure completion may be separately reported during endovascular aneurysm repair or cardiac procedures requiring cardiopulmonary bypass. If a conduit is converted to a bypass, report the bypass (eg, 35665) and not the arterial exposure with conduit (34714, 34716, 34833). Arterial embolization(s) of renal, lumbar, inferior mesenteric, hypogastric or external iliac arteries to facilitate complete endovascular aneurysm exclusion may be separately reported (eg, 37242).

►Balloon angioplasty and/or stenting at the sealing zone(s) of an endograft is an integral part of the procedure and is not separately reported. However, balloon angioplasty and/or stent deployment in vessels that do not contain endograft (outside the treatment zone for the endograft), either before or after endograft deployment, may be separately reported (eg, 37254, 37255, 37256, 37257, 37258, 37259, 37260, 37261).◄

Other interventional procedures performed at the time of endovascular abdominal aortic aneurysm repair may be additionally reported (eg, renal transluminal angioplasty, arterial embolization, intravascular ultrasound, balloon angioplasty or stenting of native artery[s] outside the endograft treatment zone, when done before or after deployment of endograft).

(For fenestrated endovascular repair of the visceral aorta, see 34841-34844. For fenestrated endovascular repair of the visceral aorta and concomitant infrarenal abdominal aorta, see 34845-34848)

34701 Endovascular repair of infrarenal aorta by deployment of an aorto-aortic tube endograft including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, all endograft extension(s) placed in the aorta from the level of the renal arteries to the aortic bifurcation, and all angioplasty/stenting performed from the level of the renal arteries to the aortic bifurcation; for other than rupture (eg, for aneurysm, pseudoaneurysm, dissection, penetrating ulcer)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Dec 17:3

(For covered stent placement[s] for atherosclerotic occlusive disease isolated to the aorta, see 37236, 37237)

34702 for rupture including temporary aortic and/or iliac balloon occlusion, when performed (eg, for aneurysm, pseudoaneurysm, dissection, penetrating ulcer, traumatic disruption)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Dec 17:3

34703 Endovascular repair of infrarenal aorta and/or iliac artery(ies) by deployment of an aorto-uni-iliac endograft including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, all endograft extension(s) placed in the aorta from the level of the renal arteries to the iliac bifurcation, and all angioplasty/stenting performed from the level of the renal arteries to the iliac bifurcation; for other than rupture (eg, for aneurysm, pseudoaneurysm, dissection, penetrating ulcer)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Dec 17:3, Nov 19:6

34704 for rupture including temporary aortic and/or iliac balloon occlusion, when performed (eg, for aneurysm, pseudoaneurysm, dissection, penetrating ulcer, traumatic disruption)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Dec 17:3, Nov 19:6

34705 Endovascular repair of infrarenal aorta and/or iliac artery(ies) by deployment of an aorto-bi-iliac endograft including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, all endograft extension(s) placed in the aorta from the level of the renal arteries to the iliac bifurcation, and all angioplasty/stenting performed from the level of the renal arteries to the iliac bifurcation; for other than rupture (eg, for aneurysm, pseudoaneurysm, dissection, penetrating ulcer)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Dec 17:3, Nov 19:6

34706 for rupture including temporary aortic and/or iliac balloon occlusion, when performed (eg, for aneurysm, pseudoaneurysm, dissection, penetrating ulcer, traumatic disruption)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Dec 17:3, Nov 19:6

34707 Endovascular repair of iliac artery by deployment of an ilio-iliac tube endograft including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, and all endograft extension(s) proximally to the aortic bifurcation and distally to the iliac bifurcation, and treatment zone angioplasty/stenting, when performed, unilateral; for other than rupture (eg, for aneurysm, pseudoaneurysm, dissection, arteriovenous malformation)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Dec 17:3

►(For covered stent placement[s] for atherosclerotic occlusive disease of the iliac artery, see 37258, 37259, 37260, 37261)◄

34708 for rupture including temporary aortic and/or iliac balloon occlusion, when performed (eg, for aneurysm, pseudoaneurysm, dissection, arteriovenous malformation, traumatic disruption)

- *CPT Assistant* Dec 17:3

(For endovascular repair of iliac artery by deployment of an iliac branched endograft, see 34717, 34718)

Endovascular Repair

34705, 34706, 34709, 34710, 34711

Endovascular repair of abdominal aorta and/or iliac arteries

#✚ 34717 Endovascular repair of iliac artery at the time of aorto-iliac artery endograft placement by deployment of an iliac branched endograft including pre-procedure sizing and device selection, all ipsilateral selective iliac artery catheterization(s), all associated radiological supervision and interpretation, and all endograft extension(s) proximally to the aortic bifurcation and distally in the internal iliac, external iliac, and common femoral artery(ies), and treatment zone angioplasty/stenting, when performed, for rupture or other than rupture (eg, for aneurysm, pseudoaneurysm, dissection, arteriovenous malformation, penetrating ulcer, traumatic disruption), unilateral (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2020
CPT Assistant Nov 19:6

(Use 34717 in conjunction with 34703, 34704, 34705, 34706)

(34717 may only be reported once per side. For bilateral procedure, report 34717 twice. Do not report modifier 50 in conjunction with 34717)

(Do not report 34717 in conjunction with 34709 on the same side)

(Do not report 34717 in conjunction with 34710, 34711)

(For placement of an iliac branched endograft at a separate setting than aorto-iliac endograft placement, use 34718)

✚ 34709 Placement of extension prosthesis(es) distal to the common iliac artery(ies) or proximal to the renal artery(ies) for endovascular repair of infrarenal abdominal aortic or iliac aneurysm, false aneurysm, dissection, penetrating ulcer, including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, and treatment zone angioplasty/stenting, when performed, per vessel treated (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2018
CPT Assistant Dec 17:3

(Use 34709 in conjunction with 34701, 34702, 34703, 34704, 34705, 34706, 34707, 34708, 34845, 34846, 34847, 34848)

(34709 may only be reported once per vessel treated [ie, multiple endograft extensions placed in a single vessel may only be reported once])

(Do not report 34709 for placement of a docking limb that extends into the external iliac artery)

(For placement of an iliac branched endograft, see 34717, 34718)

(For endograft placement into a renal artery that is being covered by a proximal extension, see 37236, 37237)

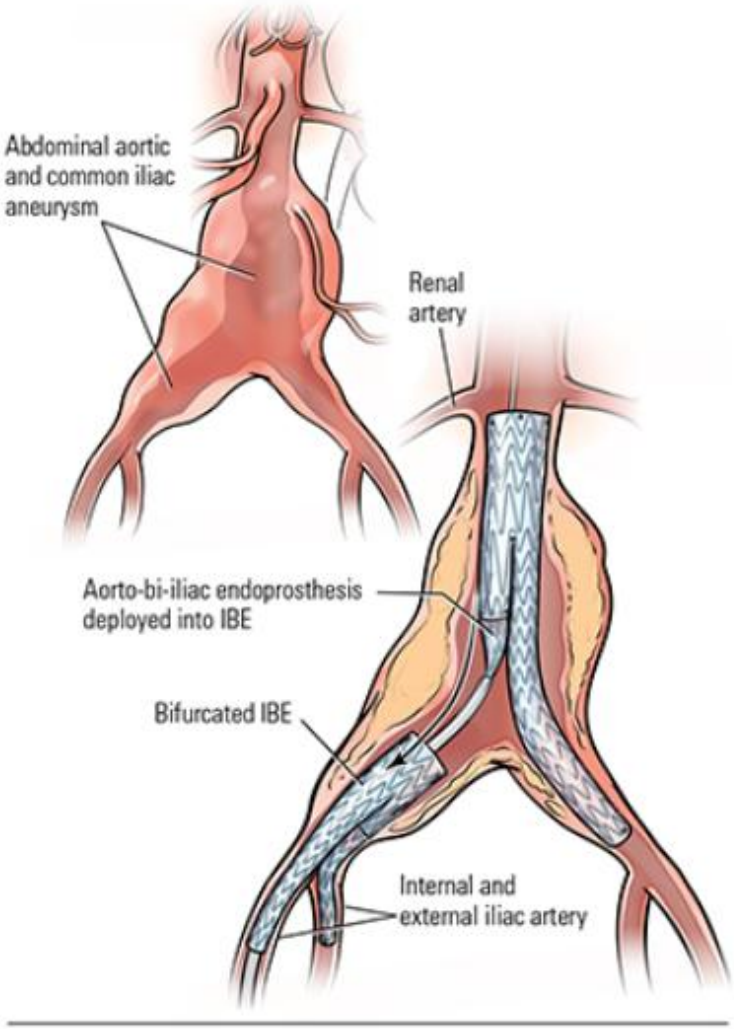
 # 34718 Endovascular repair of iliac artery, not associated with placement of an aorto-iliac artery endograft at the same session, by deployment of an iliac branched endograft, including pre-procedure sizing and device selection, all ipsilateral selective iliac artery catheterization(s), all associated radiological supervision and interpretation, and all endograft extension(s) proximally to the aortic bifurcation and distally in the internal iliac, external iliac, and common femoral artery(ies), and treatment zone angioplasty/stenting, when performed, for other than rupture (eg, for aneurysm, pseudoaneurysm, dissection, arteriovenous malformation, penetrating ulcer), unilateral

CPT Changes: An Insider's View 2020
CPT Assistant Nov 19:6

(For bilateral placement of an iliac branched endograft, report modifier 50)

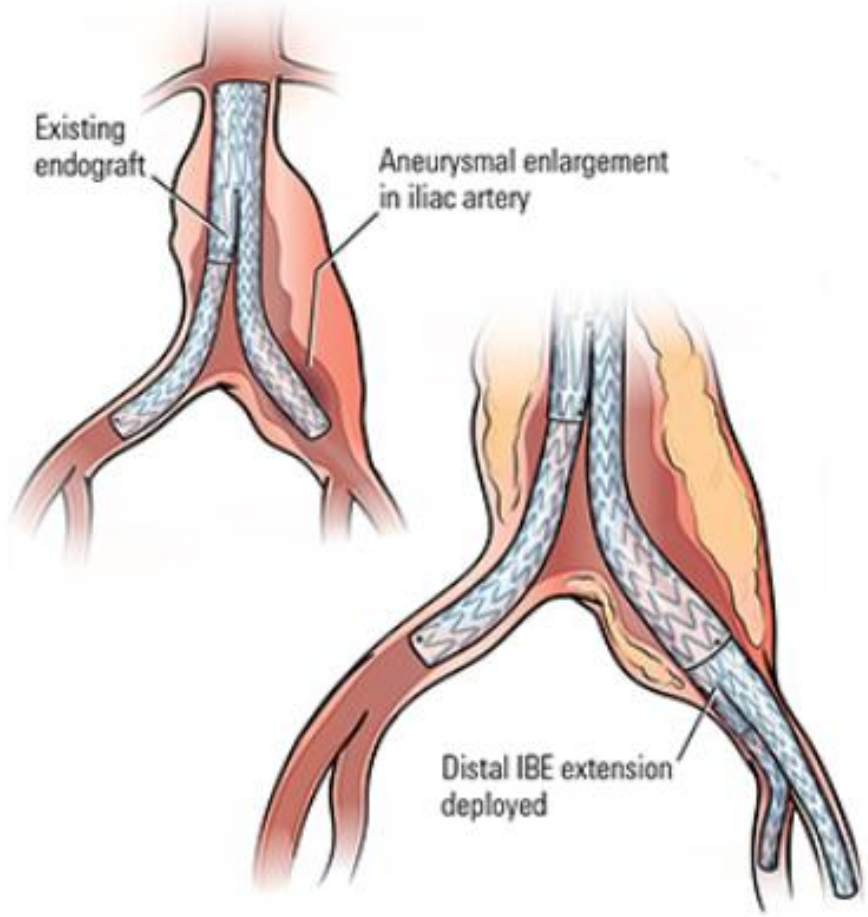
(Do not report 34718 in conjunction with 34701, 34702, 34703, 34704, 34705, 34706, 34707, 34708, 34709, 34717)

(Do not report 34718 in conjunction with 34710, 34711 on the same side)



(For placement of an iliac branched endograft in the same setting as aorto-iliac endograft placement, use 34717)

(For placement of an isolated iliac branched endograft for rupture, use 37799)



Endovascular Repair

34717, 34718

A. Placement of iliac branch endoprosthesis (IBE) associated with placement of aorto-bi-iliac artery endoprosthesis (same session)

B. Placement of IBE, not associated with placement of aorto-bi-iliac endoprosthesis (different session)

34710 Delayed placement of distal or proximal extension prosthesis for endovascular repair of infrarenal abdominal aortic or iliac aneurysm, false aneurysm, dissection, endoleak, or endograft migration, including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, and treatment zone angioplasty/stenting, when performed; initial vessel treated

CPT Changes: An Insider's View 2018

CPT Assistant Dec 17:3

+34711 each additional vessel treated (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2018

CPT Assistant Dec 17:3

(Use 34711 in conjunction with 34710)

(34710, 34711 may each be reported only once per operative session [ie, multiple endograft extensions placed in a single vessel may only be reported with a single code])

(For decompressive laparotomy, use 49000 in conjunction with 34702, 34704, 34706, 34708, 34710)

(If the delayed revision is a transcatheter enhanced fixation device [eg, anchors, screws], report 34712)

(Do not report 34710, 34711 in conjunction with 34701, 34702, 34703, 34704, 34705, 34706, 34707, 34708, 34709)

(Do not report 34710, 34711 in conjunction with 34718 on the same side)

(Do not report 34701-34711 in conjunction with 34841, 34842, 34843, 34844, 34845, 34846, 34847, 34848)

(For endovascular repair of iliac artery bifurcation [eg, aneurysm, pseudoaneurysm, arteriovenous malformation, trauma] using bifurcated endograft, see 34717, 34718)

(Report 37252, 37253 for intravascular ultrasound when performed during endovascular aneurysm repair)

(For isolated bilateral iliac artery repair using iliac artery tube endografts, report 34707 or 34708 with modifier 50)

(For open arterial exposure, report 34714, 34715, 34716, 34812, 34820, 34833, 34834 as appropriate, in conjunction with 34701, 34702, 34703, 34704, 34705, 34706, 34707, 34708, 34710, 34712, 34718)

(For percutaneous arterial closure, report 34713 as appropriate, in conjunction with 34701, 34702, 34703, 34704, 34705, 34706, 34707, 34708, 34710, 34712, 34718)

(For simultaneous bilateral iliac artery aneurysm repairs with aorto-biiliac endograft, see 34705, 34706, as appropriate)

34712 Transcatheter delivery of enhanced fixation device(s) to the endograft (eg, anchor, screw, tack) and all associated radiological supervision and interpretation

CPT Changes: An Insider's View 2018

CPT Assistant Dec 17:3

(Report 34712 only once per operative session)

+34713 Percutaneous access and closure of femoral artery for delivery of endograft through a large sheath (12 French or larger), including ultrasound guidance, when performed, unilateral (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2018

CPT Assistant Dec 17:3, Oct 22:17

►(Use 34713 in conjunction with 33880, 33881, 33882, 33883, 33886, 34701, 34702, 34703, 34704, 34705, 34706, 34707, 34708, 34710, 34712, 34718, 34841, 34842, 34843, 34844, 34845, 34846, 34847, 34848, as appropriate. Do not report 34713 in conjunction with 33880, 33881, 33882, 33883, 33886, 34701, 34702, 34703, 34704, 34705, 34706, 34707, 34708, 34710, 34712, 34718, 34841, 34842, 34843, 34844, 34845, 34846, 34847, 34848, for percutaneous closure of femoral artery after delivery of endovascular prosthesis if a sheath smaller than 12 French was used)◄

(34713 may only be reported once per side. For bilateral procedure, report 34713 twice. Do not report modifier 50 in conjunction with 34713)

(Do not report ultrasound guidance [ie, 76937] for percutaneous vascular access in conjunction with 34713 for the same access)

►(Do not report 34713 for percutaneous access and closure of the femoral artery in conjunction with 37236, 37237, 37258, 37259, 37260, 37261)◄

►(Do not report 34713 in conjunction with 37258, 37259, 37260, 37261, for covered stent placement[s] for atherosclerotic occlusive disease of the iliac artery[ies])◄

#✚ 34812 Open femoral artery exposure for delivery of endovascular prosthesis, by groin incision, unilateral (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2001, 2003, 2018
CPT Assistant Dec 00:6, Sep 02:3, Feb 03:2, Mar 04:10, Jul 06:7, Mar 13:10, Dec 13:8, Dec 17:3, Mar 25:17
Clinical Examples in Radiology Summer 14:2-3

►(Use 34812 in conjunction with 33880, 33881, 33882, 33883, 33886, 33990, 33991, 34701, 34702, 34703, 34704, 34705, 34706, 34707, 34708, 34710, 34712, 34718, 34841, 34842, 34843, 34844, 34845, 34846, 34847, 34848)◄

(34812 may only be reported once per side. For bilateral procedure, report 34812 twice. Do not report modifier 50 in conjunction with 34812)

(Do not report 34812 in conjunction with 33953, 33954, 33959, 33962, 33969, 33984, 33987)

✚ 34714 Open femoral artery exposure with creation of conduit for delivery of endovascular prosthesis or for establishment of cardiopulmonary bypass, by groin incision, unilateral (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2018
CPT Assistant Dec 17:3

►(Use 34714 in conjunction with 32852, 32854, 33031, 33120, 33251, 33256, 33259, 33261, 33305, 33315, 33322, 33335, 33390, 33391, 33404, 33405, 33406, 33410, 33411, 33412, 33413, 33414, 33415, 33416, 33417, 33422, 33425, 33426, 33427, 33430, 33440, 33460, 33463, 33464, 33465, 33468, 33474, 33475, 33476, 33478, 33496, 33500, 33502, 33504, 33505, 33506, 33507, 33510, 33511, 33512, 33513, 33514, 33516, 33533, 33534, 33535, 33536, 33542, 33545, 33548, 33600-33688, 33692, 33694, 33697, 33702, 33710, 33720, 33724, 33726, 33730, 33732, 33736, 33750, 33755, 33762, 33764, 33766, 33767, 33770-33783, 33786, 33788, 33802, 33803, 33814, 33820, 33822, 33824, 33840, 33845, 33851, 33853, 33858, 33859, 33863, 33864, 33871, 33875, 33877, 33880, 33881, 33882, 33883, 33886, 33910, 33916, 33917, 33920, 33922, 33926, 33935, 33945, 33975, 33976, 33977, 33978, 33979, 33980, 33983, 33990, 33991, 34701, 34702, 34703, 34704, 34705, 34706, 34707, 34708, 34710, 34712, 34718, 34841, 34842, 34843, 34844, 34845, 34846, 34847, 34848)◄

(34714 may only be reported once per side. For bilateral procedure, report 34714 twice. Do not report modifier 50 in conjunction with 34714)

Fenestrated Endovascular Repair of the Visceral and Infrarenal Aorta

The upper abdominal aorta that contains the celiac, superior mesenteric, and renal arteries is termed the visceral aorta. For reporting purposes, the thoracic aorta extends from the aortic valve to the aortic segment just proximal to the celiac artery.

Code 34839 is used to report the physician planning and sizing for a patient-specific fenestrated visceral aortic endograft. The planning includes review of high-resolution cross-sectional images (eg, CT, CTA, MRI) and utilization of 3D software for iterative modeling of the aorta and device in multiplanar views and center line of flow analysis. Code 34839 may only be reported when the physician spends a minimum of 90 total minutes performing patient-specific fenestrated endograft planning. Physician planning time does not need to be continuous and should be clearly documented in the patient record. Code 34839 is reported on the date that planning work is complete and may not include time spent on the day before or the day of the fenestrated endovascular repair procedure (34841, 34842, 34843, 34844, 34845, 34846, 34847, 34848) nor be reported on the day before or the day of the fenestrated endovascular repair procedure.

Codes 34841, 34842, 34843, 34844, 34845, 34846, 34847, 34848 are used to report placement of a fenestrated endovascular graft in the visceral aorta, either alone or in combination with the infrarenal aorta for aneurysm, pseudoaneurysm, dissection, penetrating ulcer, intramural hematoma, or traumatic disruption. The fenestrated main body endoprosthesis is deployed within the visceral aorta. Fenestrations within the fabric allow for selective catheterization of the visceral and/or renal arteries and subsequent placement of an endoprosthesis (ie, bare metal or covered stent) to maintain flow to the visceral artery. Patient variation in the location and relative orientation of the renal and visceral artery origins requires use of a patient-specific fenestrated endograft for endovascular repair that preserves flow to essential visceral arteries and allows proximal seal and fixation to be achieved above the renal level as well as in the distal aorta or iliac vessel(s).

Fenestrated aortic repair is reported based on the extent of aorta treated. Codes 34841, 34842, 34843, 34844 describe repair using proximal endoprostheses that span from the visceral aortic component to one, two, three, or four visceral artery origins and distal extent limited to the infrarenal aorta. These devices do not extend into the common iliac arteries. Codes 34845, 34846, 34847, 34848 are used to report deployment of a fenestrated endograft that spans from the visceral aorta (including one, two, three, or four visceral artery origins) through the infrarenal aorta into the common iliac arteries. The infrarenal component may be a bifurcated unibody device, a modular bifurcated docking system with docking limb(s), or an aorto-uniiliac device. Codes 34845, 34846, 34847, 34848 include placement of unilateral or bilateral docking limbs (depending on the device). Any additional endograft extensions that terminate in the common iliac arteries are included in 34845, 34846, 34847, 34848. Codes 34709, 34710, 34711 may not be separately reported for proximal abdominal aortic extension prosthesis(es) or for distal extension prosthesis(es) that terminate(s) in the aorta or the common iliac arteries. However, 34709, 34710, 34711 may be reported for distal extension prosthesis(es) that terminate(s) in the internal iliac, external iliac, or common femoral artery(ies).

Codes 34841-34844 and 34845-34848 define the total number of visceral and/or renal arteries (ie, celiac, superior mesenteric, and/or unilateral or bilateral renal artery[s]) requiring placement of an endoprosthesis (ie, bare metal or covered stent) through an aortic endograft fenestration.

Introduction of guide wires and catheters in the aorta and visceral and/or renal arteries is included in the work of 34841-34848 and is not separately reportable. However, catheterization of the hypogastric artery(s) and/or arterial families outside the treatment zone of the graft may be separately reported. Balloon angioplasty within the target treatment zone of the endograft, either before or after endograft deployment, is not separately reportable. Fluoroscopic guidance and radiological supervision and interpretation in conjunction with fenestrated endovascular aortic repair is not separately reportable and includes angiographic diagnostic imaging of the aorta and its branches prior to deployment of the fenestrated endovascular device, fluoroscopic guidance in the delivery of the fenestrated endovascular components, and intraprocedural arterial angiography (eg, confirm position, detect endoleak, evaluate runoff) done at the time of the endovascular aortic repair.

►Exposure of the access vessels (eg, 34713, 34714, 34715, 34716, 34812, 34820, 34833, 34834) may be reported separately. Extensive repair of an artery (eg, 35226, 35286) may be reported separately. For concomitant endovascular treatment of the thoracic aorta, 33880-33886 may be reported with 34841, 34842, 34843, 34844, 34845, 34846, 34847, 34848. For isolated endovascular infrarenal abdominal aortic aneurysm repair that does not require placement of a fenestrated graft to preserve flow to the visceral branch(es), see 34701, 34702, 34703, 34704, 34705, 34706.◄

Other interventional procedures performed at the time of fenestrated endovascular abdominal aortic aneurysm repair may be reported separately (eg, arterial embolization, intravascular ultrasound, balloon angioplasty or stenting of native artery[s] outside the endoprosthesis target zone, when done before or after deployment of endoprosthesis).

34839 Physician planning of a patient-specific fenestrated visceral aortic endograft requiring a minimum of 90 minutes of physician time

CPT Changes: An Insider's View 2015

(Do not report 34839 in conjunction with 76376, 76377)

CPT Assistant Nov 07:8
35671 popliteal-tibial or -peroneal artery

Composite Grafts

Codes 35682-35683 are used to report harvest and anastomosis of multiple vein segments from distant sites for use as arterial bypass graft conduits. These codes are intended for use when the two or more vein segments are harvested from a limb other than that undergoing bypass.

+ 35681 Bypass graft; composite, prosthetic and vein (List separately in addition to code for primary procedure)

CPT Assistant Nov 98:13-14, Mar 99:6, Apr 99:11

(Do not report 35681 in addition to 35682, 35683)

+ 35682 autogenous composite, 2 segments of veins from 2 locations (List separately in addition to code for primary procedure)

CPT Assistant Nov 98:13-14, Mar 99:6, Apr 99:11, Sep 02:4

(Use 35682 in conjunction with 35556, 35566, 35570, 35571, 35583-35587)

(Do not report 35682 in addition to 35681, 35683)

+ 35683 autogenous composite, 3 or more segments of vein from 2 or more locations (List separately in addition to code for primary procedure)

CPT Assistant Nov 98:13-14, Mar 99:6, Apr 99:11, Sep 02:4

(Use 35683 in conjunction with 35556, 35566, 35570, 35571, 35583-35587)

(Do not report 35683 in addition to 35681, 35682)

Adjuvant Techniques

Adjuvant (additional) technique(s) may be required at the time a bypass graft is created to improve patency of the lower extremity autogenous or synthetic bypass graft (eg, femoral-popliteal, femoral-tibial, or popliteal-tibial arteries). Code 35685 should be reported in addition to the primary synthetic bypass graft procedure, when an interposition of venous tissue (vein patch or cuff) is placed at the anastomosis between the synthetic bypass conduit and the involved artery (includes harvest).

Code 35686 should be reported in addition to the primary bypass graft procedure, when autogenous vein is used to create a fistula between the tibial or peroneal artery and vein at or beyond the distal bypass anastomosis site of the involved artery.

(For composite graft(s), see 35681-35683)

+ 35685 Placement of vein patch or cuff at distal anastomosis of bypass graft, synthetic conduit (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2002

CPT Assistant Sep 02:3

(Use 35685 in conjunction with 35656, 35666, or 35671)

+ 35686 Creation of distal arteriovenous fistula during lower extremity bypass surgery (non-hemodialysis) (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2002

CPT Assistant Sep 02:3, Apr 12:4

(Use 35686 in conjunction with 35556, 35566, 35570, 35571, 35583-35587, 35623, 35656, 35666, 35671)

Arterial Transposition

35691 Transposition and/or reimplantation; vertebral to carotid artery
35693 vertebral to subclavian artery
35694 subclavian to carotid artery
35695 carotid to subclavian artery
+ 35697 Reimplantation, visceral artery to infrarenal aortic prosthesis, each artery (List separately in addition to code for primary procedure)
CPT Changes: An Insider's View 2004

(Do not report 35697 in conjunction with 33877)

Excision, Exploration, Repair, Revision

+ 35700 Reoperation, femoral-popliteal or femoral (popliteal)-anterior tibial, posterior tibial, peroneal artery, or other distal vessels, more than 1 month after original operation (List separately in addition to code for primary procedure)
CPT Assistant Apr 12:4

(Use 35700 in conjunction with 35556, 35566, 35570, 35571, 35583, 35585, 35587, 35656, 35666, 35671)
35701 Exploration not followed by surgical repair, artery; neck (eg, carotid, subclavian)
CPT Changes: An Insider's View 2020
CPT Assistant Dec 19:5

►(Do not report 35701 in conjunction with 64654, 64655, 64656, 64657, 64658, 64659)◄

(Do not report 35701 in conjunction with 35201, 35231, 35261, 35800, when performed on the same side of the neck)
35702 upper extremity (eg, axillary, brachial, radial, ulnar)
CPT Changes: An Insider's View 2020
CPT Assistant Dec 19:5
35703 lower extremity (eg, common femoral, deep femoral, superficial femoral, popliteal, tibial, peroneal)
CPT Changes: An Insider's View 2020
CPT Assistant Dec 19:5

(When additional surgical procedures are performed at the same setting by the same surgeon, 35701, 35702, 35703 may only be reported when a nonvascular surgical procedure is performed and only when the artery exploration is performed through a separate incision)

(Do not report 35702, 35703 in conjunction with 35206, 35207, 35236, 35256, 35266, 35286, 35860 in the same extremity)

(Do not report 35701, 35702, 35703 to explore and identify a recipient artery [eg, external carotid artery] when performed in conjunction with 15756, 15757, 15758, 20955, 20956, 20957, 20962, 20969, 20970, 20972, 20973, 43496, 49906)

(To report exploration of lower extremity artery, use 35703)

(To report vascular exploration not followed by surgical repair, other than neck artery, upper extremity artery, lower extremity artery, chest, abdomen, or retroperitoneal area, use 37799)

(For vascular exploration of the chest not followed by surgical repair, use 32100)

(For vascular exploration of the abdomen not followed by surgical repair, use 49000)

(For vascular exploration of the retroperitoneal area not followed by surgical repair, use 49010)

35800 Exploration for postoperative hemorrhage, thrombosis or infection; neck

35820 chest

CPT Assistant May 24:24, Oct 24:13

CPT Assistant Fall 92:21, Apr 14:10

35870 Repair of graft-enteric fistula

35875 Thrombectomy of arterial or venous graft (other than hemodialysis graft or fistula);

CPT Assistant Nov 98:14, Feb 99:6, Mar 99:6, Apr 00:10

35876 with revision of arterial or venous graft

CPT Assistant Nov 98:14

(For thrombectomy of hemodialysis graft or fistula, see 36831, 36833)

Codes 35879 and 35881 describe open revision of graft-threatening stenoses of lower extremity arterial bypass graft(s) (previously constructed with autogenous vein conduit) using vein patch angioplasty or segmental vein interposition techniques. For thrombectomy with revision of any noncoronary arterial or venous graft, including those of the lower extremity, (other than hemodialysis graft or fistula), use 35876. For direct repair (other than for fistula) of a lower extremity blood vessel (with or without patch angioplasty), use 35226. For repair (other than for fistula) of a lower extremity blood vessel using a vein graft, use 35256.

35879 Revision, lower extremity arterial bypass, without thrombectomy, open; with vein patch angioplasty

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:19

35881 with segmental vein interposition

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:19

35907 abdomen

Vascular Injection Procedures

Listed services for injection procedures include necessary local anesthesia, introduction of needles or catheter, injection of contrast media with or without automatic power injection, and/or necessary pre- and postinjection care specifically related to the injection procedure.

Selective vascular catheterization should be coded to include introduction and all lesser order selective catheterization used in the approach (eg, the description for a selective right middle cerebral artery catheterization includes the introduction and placement catheterization of the right common and internal carotid arteries).

Additional second and/or third order arterial catheterization within the same family of arteries or veins supplied by a single first order vessel should be expressed by 36012, 36218, or 36248.

Additional first order or higher catheterization in vascular families supplied by a first order vessel different from a previously selected and coded family should be separately coded using the conventions described above.

(For radiological supervision and interpretation, see **Radiology**)

(For injection procedures in conjunction with cardiac catheterization, see 93452, 93453, 93454, 93455, 93456, 93457, 93458, 93459, 93460, 93461, 93563, 93564, 93565, 93566, 93567, 93568, 93569, 93573, 93574, 93575)

(For chemotherapy of malignant disease, see 96401-96549)

Intravenous

An intracatheter is a sheathed combination of needle and short catheter.

36000 Introduction of needle or intracatheter, vein

CPT Assistant Summer 95:2, Apr 98:1, 3, 7, Jul 98:1, Apr 03:26, Oct 03:2, Jul 06:4, Feb 07:10, Jul 07:1, Dec 08:7, May 14:4, Sep 14:13, Oct 14:6, Aug 19:8, Jan 22:3

(Do not report 36140 in conjunction with 36836, 36837)

(For insertion of arteriovenous cannula, see 36810-36821)

36160 Introduction of needle or intracatheter, aortic, translumbar
- *CPT Assistant* Aug 96:3

Diagnostic Studies of Cervicocerebral Arteries: Codes 36221-36228 describe non-selective and selective arterial catheter placement and diagnostic imaging of the aortic arch, carotid, and vertebral arteries. Codes 36221-36226 include the work of accessing the vessel, placement of catheter(s), contrast injection(s), fluoroscopy, radiological supervision and interpretation, and closure of the arteriotomy by pressure, or application of an arterial closure device. Codes 36221-36228 describe arterial contrast injections with arterial, capillary, and venous phase imaging, when performed.

Code 36227 is an add-on code to report unilateral selective arterial catheter placement and diagnostic imaging of the ipsilateral external carotid circulation and includes all the work of accessing the additional vessel, placement of catheter(s), contrast injection(s), fluoroscopy, radiological supervision and interpretation. Code 36227 is reported in conjunction with 36222, 36223, or 36224.

Code 36228 is an add-on code to report unilateral selective arterial catheter placement and diagnostic imaging of the initial and each additional intracranial branch of the internal carotid or vertebral arteries. Code 36228 is reported in conjunction with 36223, 36224, 36225 or 36226. This includes any additional second or third order catheter selective placement in the same primary branch of the internal carotid, vertebral, or basilar artery and includes all the work of accessing the additional vessel, placement of catheter(s), contrast injection(s), fluoroscopy, radiological supervision and interpretation. It is not reported more than twice per side, regardless of the number of additional branches selectively catheterized.

Codes 36221-36226 are built on progressive hierarchies with more intensive services inclusive of less intensive services. The code inclusive of all of the services provided for that vessel should be reported (ie, use the code inclusive of the most intensive services provided). Only one code in the range 36222-36224 may be reported for each ipsilateral carotid territory. Only one code in the range 36225-36226 may be reported for each ipsilateral vertebral territory.

Code 36221 is reported for non-selective arterial catheter placement in the thoracic aorta and diagnostic imaging of the aortic arch and great vessel origins. Codes 36222-36228 are reported for unilateral artery catheterization. Do not report 36221 in conjunction with 36222-36226 as these selective codes include the work of 36221 when performed.

Do not report 36222, 36223, or 36224 together for ipsilateral angiography. Instead, select the code that represents the most comprehensive service using the following hierarchy of complexity (listed in descending order of complexity): 36224>36223>36222.

Do not report 36225 and 36226 together for ipsilateral angiography. Select the code that represents the more comprehensive service using the following hierarchy of complexity (listed in descending order of complexity): 36226>36225.

When bilateral carotid and/or vertebral arterial catheterization and imaging is performed, report 36222, 36223, 36224, 36225, 36226 with modifier 50, and report add-on codes 36227, 36228 twice (do not report modifier 50 in conjunction with 36227, 36228) if the same procedure is performed on both sides. For example, bilateral extracranial carotid angiography with selective catheterization of each common carotid artery would be reported with 36222 and modifier 50. However, when different territory(ies) is studied in the same session on both sides of the body, modifiers may be required to report the imaging performed. Use modifier 59 to denote that different carotid and/or vertebral arteries are being studied. For example, when selective right internal carotid artery catheterization accompanied by right extracranial and intracranial carotid angiography is followed by selective left common carotid artery catheterization with left extracranial carotid angiography, use 36224 to report the right side and 36222-59 to report the left side.

Diagnostic angiography of the cervicocerebral vessels may be followed by an interventional procedure at the same session. Interventional procedures may be separately reportable using standard coding conventions.

Do not report 36218 or 75774 as part of diagnostic angiography of the extracranial and intracranial cervicocerebral vessels. It may be appropriate to report 36218 and 75774 for diagnostic angiography of upper extremities and other vascular beds of the neck and/or shoulder girdle performed in the same session as vertebral angiography (eg, workup of a neck tumor that requires catheterization and angiography of the vertebral artery as well as other brachiocephalic arteries).

Report 76376 or 76377 for 3D rendering when performed in conjunction with 36221-36228.

Report 76937 for ultrasound guidance for vascular access, when performed in conjunction with 36221-36228.

36200 Introduction of catheter, aorta

- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Fall 93:16, Aug 96:3, Jul 06:7, Dec 07:10, 14, Apr 08:11, Dec 09:13, Jul 11:5, Oct 11:9, Apr 12:4, Feb 13:16, Mar 17:4, Jul 21:4
- *Clinical Examples in Radiology* Spring 12:6, Winter 14:5-6, Summer 14:2-3

(For non-selective angiography of the extracranial carotid and/or cerebral vessels and cervicocerebral arch, when performed, use 36221)

36215 Selective catheter placement, arterial system; each first order thoracic or brachiocephalic branch, within a vascular family

- *CPT Assistant* Fall 93:15, Aug 96:3, Nov 97:16, Apr 98:9, Sep 00:11, Oct 00:4, Feb 03:3, Apr 12:4, Mar 17:4, May 17:8, Jul 21:4, Oct 23:21
- *Clinical Examples in Radiology* Spring 12:4, Spring 13:4-6, Winter 18:2

(For catheter placement for coronary angiography, see 93454-93461)

36216 initial second order thoracic or brachiocephalic branch, within a vascular family

- *CPT Assistant* Fall 93:15, Aug 96:3, Oct 00:4, Dec 07:10, Dec 11:12, Apr 12:4, Nov 13:14, Oct 23:21
- *Clinical Examples in Radiology* Spring 13:4-6, Winter 18:2

36217 initial third order or more selective thoracic or brachiocephalic branch, within a vascular family

- *CPT Assistant* Fall 93:15, Aug 96:3, Oct 00:4, Dec 07:10, Dec 11:12, Apr 12:5
- *Clinical Examples in Radiology* Summer 07:1-2

+36218 additional second order, third order, and beyond, thoracic or brachiocephalic branch, within a vascular family (List in addition to code for initial second or third order vessel as appropriate)

- *CPT Assistant* Fall 93:15, Aug 96:3, Oct 00:4, Jul 06:7, Dec 07:10, Apr 12:5, May 13:3, Oct 18:3
- *Clinical Examples in Radiology* Winter 15:4-6, Winter 18:2

(Use 36218 in conjunction with 36216, 36217, 36225, 36226)

(Do not report 36215, 36216, 36217, 36218 in conjunction with 36836, 36837)

(For angiography, see 36222-36228, 75600-75774)

(For transluminal balloon angioplasty [except lower extremity artery[ies] for occlusive disease, intracranial, coronary, pulmonary, or dialysis circuit], see 37246, 37247)

(For transcatheter therapies, see 37200, 37211, 37213, 37214, 37236, 37237, 37238, 37239, 37241, 37242, 37243, 37244, 61624, 61626)

(When arterial [eg, internal mammary, inferior epigastric or free radial artery] or venous bypass graft angiography is performed in conjunction with cardiac catheterization, see the appropriate cardiac catheterization, injection procedure, and imaging supervision code[s] [93454, 93455, 93456, 93457, 93458, 93459, 93460, 93461, 93564, 93593, 93594, 93595, 93596, 93597] in the **Medicine** section. When internal mammary artery angiography only is performed without a concomitant cardiac catheterization, use 36216 or 36217 as appropriate)

36221 Non-selective catheter placement, thoracic aorta, with angiography of the extracranial carotid, vertebral, and/or intracranial vessels, unilateral or bilateral, and all associated radiological supervision and interpretation, includes angiography of the cervicocerebral arch, when performed

- *CPT Changes: An Insider's View* 2013, 2017

36246 initial second order abdominal, pelvic, or lower extremity artery branch, within a vascular family

- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Fall 93:15, Aug 96:3, Jan 01:14, Jan 07:7, Dec 07:10-11, Jul 11:5, Oct 11:9, Apr 12:4, Nov 13:14
- *Clinical Examples in Radiology* Winter 13:2-3, Winter 14:1, 3, Winter 18:11, Spring 19:3, Fall 21:16

Angiography, Carotid Artery

36222-36228

A radiologic contrast study is performed on the carotid artery vascular family.

36247 initial third order or more selective abdominal, pelvic, or lower extremity artery branch, within a vascular family

- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Fall 93:15, Aug 96:3, Jan 01:14, Jan 07:7, Dec 07:10, Jul 11:5, Apr 12:4, Nov 13:14, Sep 20:14
- *Clinical Examples in Radiology* Winter 08:1, Summer 08:1, 3, Winter 13:1, 3, Fall 13:2-4, Summer 15:2, Winter 18:11, Summer 18:2, Summer 19:4, Fall 21:16

+ 36248 additional second order, third order, and beyond, abdominal, pelvic, or lower extremity artery branch, within a vascular family (List in addition to code for initial second or third order vessel as appropriate)

- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Fall 93:15, Aug 96:3, Apr 98:1, 7, Oct 00:4, Jan 01:14, Jan 07:7, Jul 11:5, Apr 12:4, Oct 18:3
- *Clinical Examples in Radiology* Winter 10:7, Fall 21:16

(Use 36248 in conjunction with 36246, 36247)

(Do not report 36245, 36246, 36247, 36248 in conjunction with 36836, 36837)

36251 Selective catheter placement (first-order), main renal artery and any accessory renal artery(s) for renal angiography, including arterial puncture and catheter placement(s), fluoroscopy, contrast injection(s), image postprocessing, permanent recording of images, and radiological supervision and interpretation, including pressure gradient measurements when performed, and flush aortogram when performed; unilateral

- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Apr 12:6, Aug 12:13, Nov 13:14
- *Clinical Examples in Radiology* Fall 11:2, Spring 19:2, Summer 24:19

36252 bilateral

- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Apr 12:6
- *Clinical Examples in Radiology* Fall 11:2, Summer 24:19

36253 Superselective catheter placement (one or more second order or higher renal artery branches) renal artery and any accessory renal artery(s) for renal angiography, including arterial puncture, catheterization, fluoroscopy, contrast injection(s), image postprocessing, permanent recording of images, and radiological supervision and interpretation, including pressure gradient measurements when performed, and flush aortogram when performed; unilateral

- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Apr 12:6, Aug 12:13, Nov 13:14
- *Clinical Examples in Radiology* Fall 11:2

(Do not report 36253 in conjunction with 36251 when performed for the same kidney)

36254 bilateral

- *CPT Changes: An Insider's View* 2012, 2017
- *CPT Assistant* Apr 12:6, Aug 12:13
- *Clinical Examples in Radiology* Fall 11:2

(Do not report 36254 in conjunction with 36252)

(Placement of closure device at the vascular access site is not separately reported with 36251-36254)

(Do not report 36251, 36252, 36253, 36254 in conjunction with 0338T, 0339T)

36260 Insertion of implantable intra-arterial infusion pump (eg, for chemotherapy of liver)

- *CPT Assistant* Fall 95:5

36261 Revision of implanted intra-arterial infusion pump

36262 Removal of implanted intra-arterial infusion pump

36299 Unlisted procedure, vascular injection

36260 Insertion of implantable intra-arterial infusion pump (eg, for chemotherapy of liver)

- *CPT Assistant* Fall 95:5

36261 Revision of implanted intra-arterial infusion pump

36262 Removal of implanted intra-arterial infusion pump

36299 Unlisted procedure, vascular injection

Venous

Venipuncture, needle or catheter for diagnostic study or intravenous therapy, percutaneous. These codes are also used to report the therapy as specified. For collection of a specimen from an established catheter, use 36592. For collection of a specimen from a completely implantable venous access device, use 36591.

36400 Venipuncture, younger than age 3 years, necessitating the skill of a physician or other qualified health care professional, not to be used for routine venipuncture; femoral or jugular vein

- *CPT Changes: An Insider's View* 2002, 2004, 2013
- *CPT Assistant* Jul 06:4, Jul 07:1, Dec 08:7, May 14:4
- *Clinical Examples in Radiology* Fall 18:9, Winter 19:12

36405 scalp vein

- *CPT Changes: An Insider's View* 2013
- *CPT Assistant* Jul 06:4, Jul 07:1, Dec 08:7, May 14:4
- *Clinical Examples in Radiology* Fall 18:9, Winter 19:12

36406 other vein

- *CPT Changes: An Insider's View* 2013
- *CPT Assistant* Jul 06:4, Jul 07:1, May 14:4
- *Clinical Examples in Radiology* Fall 18:9, Winter 19:12

36410 Venipuncture, age 3 years or older, necessitating the skill of a physician or other qualified health care professional (separate procedure), for diagnostic or therapeutic purposes (not to be used for routine venipuncture)

- *CPT Changes: An Insider's View* 2004, 2013
- *CPT Assistant* Jun 96:10, May 01:11, Aug 02:2, Oct 03:10, Feb 07:10, Jul 07:1, Dec 08:7, Sep 13:18, Oct 14:6, Aug 19:8, Jan 22:3
- *Clinical Examples in Radiology* Spring 09:8, Fall 18:9, Winter 19:12

Coding Tip

Instructions for Use of the CPT Codebook

When advanced practice nurses and physician assistants are working with physicians they are considered as working in the exact same specialty and exact same subspecialties as the physician. A "physician or other qualified health care professional" is an individual who is qualified by education, training, licensure/regulation (when applicable), and facility privileging (when applicable) who performs a professional service within his or her scope of practice and independently reports that professional service. The professionals are distinct from "clinical staff." A clinical staff member is a person who works under the supervison of a physician or other qualified health care professional, and who is allowed by law, regulation, and facility policy to perform or assist in the performance of a specific professional service, but does not individually report that professional service. Other policies may also affect who may report specific services.

CPT Coding Guidelines, Introduction, Instructions for Use of the CPT Codebook

36415 Collection of venous blood by venipuncture

CPT Changes: An Insider's View 2003

CPT Assistant Jun 96:10, Mar 98:10, Oct 99:11, Aug 00:2, Feb 07:10, Jul 07:1, Dec 08:7, May 14:4, Aug 19:8, Jan 22:3

(Do not report modifier 63 in conjunction with 36415)

36416 Collection of capillary blood specimen (eg, finger, heel, ear stick)

CPT Changes: An Insider's View 2003

36420 Venipuncture, cutdown; younger than age 1 year

CPT Assistant Nov 99:32-33, Aug 00:2, Oct 03:2, Jul 06:4

(Do not report modifier 63 in conjunction with 36420)

36425 age 1 or over

CPT Assistant Oct 14:6

Clinical Examples in Radiology Summer 08:1

(Do not report 36425 in conjunction with 36475, 36476, 36478)

36430 Transfusion, blood or blood components

CPT Assistant Aug 97:18, Nov 99:32-33, Aug 00:2, Mar 01:10, Oct 03:2, Jul 06:4, Jul 07:1, Jul 17:4, Mar 25:17

(When a partial exchange transfusion is performed in a newborn, use 36456)

36440 Push transfusion, blood, 2 years or younger

CPT Assistant Aug 00:2, Oct 03:2, Jul 06:4, Jul 07:1, Jul 17:4

(When a partial exchange transfusion is performed in a newborn, use 36456)

36450 Exchange transfusion, blood; newborn

CPT Assistant Jul 17:3, Oct 21:12

(When a partial exchange transfusion is performed in a newborn, use 36456)

(Do not report modifier 63 in conjunction with 36450)

(For manual red cell exchange, see 36450, 36455, 36456)

(For automated red cell exchange, use 36512)

36455 other than newborn

CPT Assistant Oct 21:12

36456 Partial exchange transfusion, blood, plasma or crystalloid necessitating the skill of a physician or other qualified health care professional, newborn

CPT Changes: An Insider's View 2017, 2018

CPT Assistant Jul 17:3, Oct 21:12

(Do not report 36456 in conjunction with 36430, 36440, 36450)

(Do not report modifier 63 in conjunction with 36456)

36460 Transfusion, intrauterine, fetal

(Do not report modifier 63 in conjunction with 36460)

(For radiological supervision and interpretation, use 76941)

Codes 36468, 36470, 36471 describe injection(s) of a sclerosant for sclerotherapy of telangiectasia and/or incompetent vein(s). Code 36468 may only be reported once per extremity per session, regardless of the number of needle injections performed. Codes 36466, 36471 may only be reported once per extremity, regardless of the number of veins treated. Ultrasound guidance (76942), when performed, is not included in 36468, 36470, 36471 and may be reported separately.

Codes 36465, 36466 describe injection(s) of a non-compounded foam sclerosant into an extremity truncal vein (eg, great saphenous vein, accessory saphenous vein) using ultrasound-guided compression of the junction of the central vein (saphenofemoral junction or saphenopopliteal junction) to limit the dispersion of injectate. Do not report 36465, 36466 for injection of compounded foam sclerosant(s).

Compounding is a practice in which a qualified health care professional (eg, pharmacist, physician) combines, mixes, or alters ingredients of a drug to create a medication tailored to the needs of an individual patient.

When performed in the office setting, all required supplies and equipment are included in 36465, 36466, 36468, 36470, 36471 and may not be separately reported. In addition, application of compression dressing(s) (eg, compression bandages/stockings) is included in 36465, 36466, 36468, 36470, 36471, when performed, and may not be reported separately.

36465 Code is out of numerical sequence. See 36470-36474

36466 Code is out of numerical sequence. See 36470-36474

36468 Injection(s) of sclerosant for spider veins (telangiectasia), limb or trunk

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Aug 14:14, Oct 14:6, Apr 15:10, Nov 16:3, Mar 18:3
- *Clinical Examples in Radiology* Summer 15:8, Spring 17:3

(For ultrasound imaging guidance performed in conjunction with 36468, use 76942)

(Do not report 36468 in conjunction with 29520, 29530, 29540, 29550, 29580, 29581, 29584, for the same extremity)

(Do not report 36468 more than once per extremity)

(Do not report 36468 in conjunction with 37241 in the same surgical field)

36470 Injection of sclerosant; single incompetent vein (other than telangiectasia)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Oct 14:6, Apr 15:10, Nov 15:10, Nov 16:3, Mar 18:3, Dec 18:10
- *Clinical Examples in Radiology* Summer 15:8, Spring 17:3

36471 multiple incompetent veins (other than telangiectasia), same leg

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Oct 14:6, Apr 15:10, Aug 15:8, Nov 15:10, Nov 16:3, Mar 18:3, Dec 18:10
- *Clinical Examples in Radiology* Summer 15:8, Spring 17:3

(For ultrasound imaging guidance performed in conjunction with 36470, 36471, use 76942)

(Do not report 36470, 36471 in conjunction with 29520, 29530, 29540, 29550, 29580, 29581, 29584, for the same extremity)

(Do not report 36471 more than once per extremity)

(If the targeted vein is an extremity truncal vein and injection of non-compounded foam sclerosant with ultrasound guided compression maneuvers to guide dispersion of the injectate is performed, see 36465, 36466)

(Do not report 36470, 36471 in conjunction with 37241 in the same surgical field)

 # 36465 Injection of non-compounded foam sclerosant with ultrasound compression maneuvers to guide dispersion of the injectate, inclusive of all imaging guidance and monitoring; single incompetent extremity truncal vein (eg, great saphenous vein, accessory saphenous vein)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Mar 18:3, Dec 18:10, Feb 19:9

(If the targeted vein is an extremity truncal vein and injection of non-compounded foam sclerosant with ultrasound guided compression maneuvers to guide dispersion of the injectate is performed, see 36465, 36466)

(Do not report 36470, 36471 in conjunction with 37241 in the same surgical field)

 # 36465 Injection of non-compounded foam sclerosant with ultrasound compression maneuvers to guide dispersion of the injectate, inclusive of all imaging guidance and monitoring; single incompetent extremity truncal vein (eg, great saphenous vein, accessory saphenous vein)

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Mar 18:3, Dec 18:10, Feb 19:9

 # 36466 multiple incompetent truncal veins (eg, great saphenous vein, accessory saphenous vein), same leg

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Mar 18:3, Dec 18:10, Feb 19:9

(Do not report 36465, 36466 in conjunction with 29520, 29530, 29540, 29550, 29580, 29581, 29584, for the same extremity)

(Do not report 36465, 36466 in conjunction with 37241 in the same surgical field)

(For extremity truncal vein injection of compounded foam sclerosant[s], see 36470, 36471)

(For injection of a sclerosant into an incompetent vein without compression maneuvers to guide dispersion of the injectate, see 36470, 36471)

(For endovenous ablation therapy of incompetent vein[s] by transcatheter delivery of a chemical adhesive, see 36482, 36483)

(For vascular embolization and occlusion procedures, see 37241, 37242, 37243, 37244)

Codes 36473, 36474, 36475, 36476, 36478, 36479, 36482, 36483 describe endovascular ablation therapy of incompetent extremity vein(s), including all necessary imaging guidance and monitoring. Sclerosant injection(s) of vein(s) by needle or mini-catheter (36468, 36470, 36471) followed by a compression technique is not endovascular ablation therapy. Codes 36473, 36474, 36482, 36483 can be performed under local anesthesia without the need for tumescent (peri-saphenous) anesthesia. Codes 36475, 36476, 36478, 36479 are performed using adjunctive tumescent anesthesia.

Codes 36473, 36474 involve concomitant use of an intraluminal device that mechanically disrupts/abrades the venous intima and infusion of a physician-specified medication in the target vein(s).

Codes 36482, 36483 involve positioning an intravenous catheter the length of an incompetent vein, remote from the percutaneous access site, with subsequent delivery of a chemical adhesive to ablate the incompetent vein. This often includes ultrasound compression of the outflow vein to limit the dispersion of the injected solution.

Codes 36475, 36476 involve advancing a radiofrequency device the length of an incompetent vein, with subsequent delivery of radiofrequency energy to ablate the incompetent vein.

Codes 36478, 36479 involve advancing a laser device the length of an incompetent vein, with subsequent delivery of thermal energy to ablate the incompetent vein.

Codes 36474, 36476, 36479, 36483 for subsequent vein(s) treated in the same extremity may only be reported once per extremity, regardless of the number of additional vein(s) treated.

When performed in the office setting, all required supplies and equipment are included in 36473, 36474, 36475, 36476, 36478, 36479, 36482, 36483 and may not be separately reported. In addition, application of compression dressing(s) (eg, compression bandages/stockings) is included in 36473, 36474, 36475, 36476, 36478, 36479, 36482, 36483, when performed, and may not be reported separately.

36473 Endovenous ablation therapy of incompetent vein, extremity, inclusive of all imaging guidance and monitoring, percutaneous, mechanochemical; first vein treated

(For therapeutic ultrafiltration, use 0692T)

(For therapeutic apheresis for white blood cells, red blood cells, platelets and plasma pheresis, see 36511, 36512, 36513, 36514)

(For therapeutic apheresis extracorporeal adsorption procedures, use 36516)

Central Venous Access Procedures

To qualify as a central venous access catheter or device, the tip of the catheter/device must terminate in the subclavian, brachiocephalic (innominate) or iliac veins, the superior or inferior vena cava, or the right atrium. The venous access device may be either centrally inserted (jugular, subclavian, femoral vein or inferior vena cava catheter entry site) or peripherally inserted (eg, basilic, cephalic, or saphenous vein entry site). The device may be accessed for use either via exposed catheter (external to the skin), via a subcutaneous port or via a subcutaneous pump.

The procedures involving these types of devices fall into five categories:

1. ***Insertion*** (placement of catheter through a newly established venous access)
2. ***Repair*** (fixing device without replacement of either catheter or port/pump, other than pharmacologic or mechanical correction of intracatheter or pericatheter occlusion [see 36595 or 36596])
3. ***Partial replacement*** of only the catheter component associated with a port/pump device, but not entire device
4. ***Complete replacement*** of entire device via same venous access site (complete exchange)
5. ***Removal*** of entire device.

There is no coding distinction between venous access achieved percutaneously versus by cutdown or based on catheter size.

For the repair, partial (catheter only) replacement, complete replacement, or removal of both catheters (placed from separate venous access sites) of a multi-catheter device, with or without subcutaneous ports/pumps, use the appropriate code describing the service with a frequency of two.

If an existing central venous access device is removed and a new one placed via a separate venous access site, appropriate codes for both procedures (removal of old, if code exists, and insertion of new device) should be reported.

When imaging guidance is used for centrally inserted central venous catheters, for gaining access to the venous entry site and/or for manipulating the catheter into final central position, imaging guidance codes (eg, 76937, 77001) may be reported separately. Do not use 76937, 77001 in conjunction with 36568, 36569, 36572, 36573, 36584.

(For refilling and maintenance of an implantable pump or reservoir for intravenous or intra-arterial drug delivery, use 96522)

Insertion of Central Venous Access Device

36555 Insertion of non-tunneled centrally inserted central venous catheter; younger than 5 years of age

- *CPT Changes: An Insider's View* 2004, 2017

- *CPT Assistant* Dec 04:7, Jun 08:8, Jan 15:13
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10

(For peripherally inserted central venous catheter with port, 5 years or older, use 36571)

36560 Insertion of tunneled centrally inserted central venous access device, with subcutaneous port; younger than 5 years of age

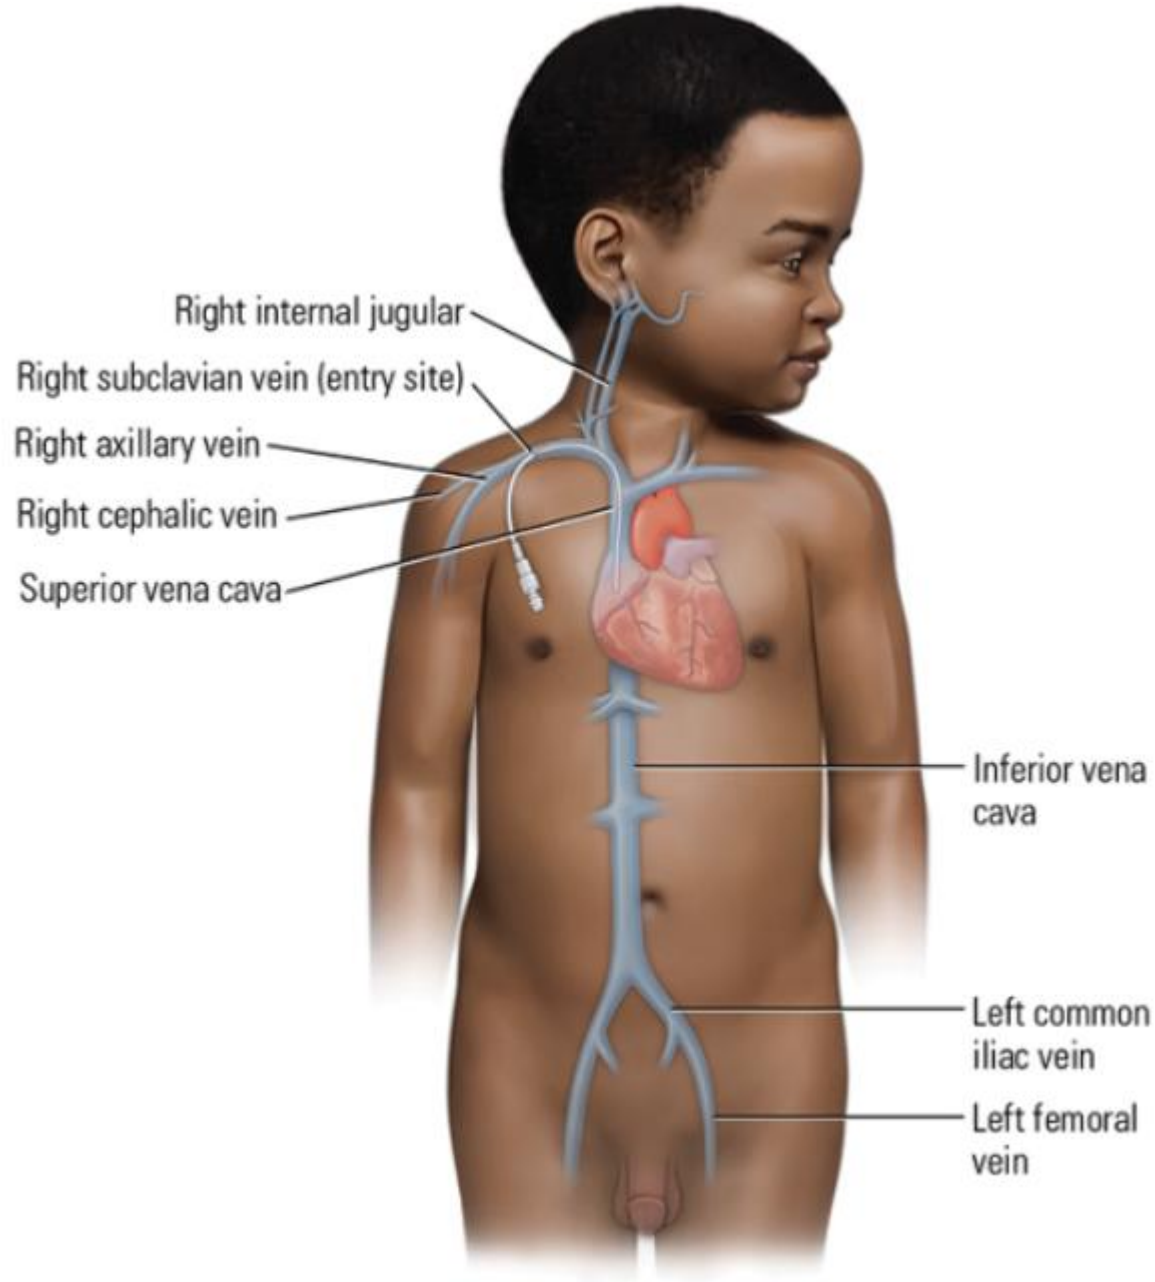
- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Dec 04:7, Jun 08:8, Dec 09:11
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10

(For peripherally inserted central venous access device with subcutaneous port, younger than 5 years of age, use 36570)

36561 age 5 years or older

- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Dec 04:7, Jun 08:8, Dec 09:11, Jan 22:18
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10

(For peripherally inserted central venous catheter with subcutaneous port, 5 years or older, use 36571)



36563 Insertion of tunneled centrally inserted central venous access device with subcutaneous pump

- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Dec 04:8, Jun 08:8
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10

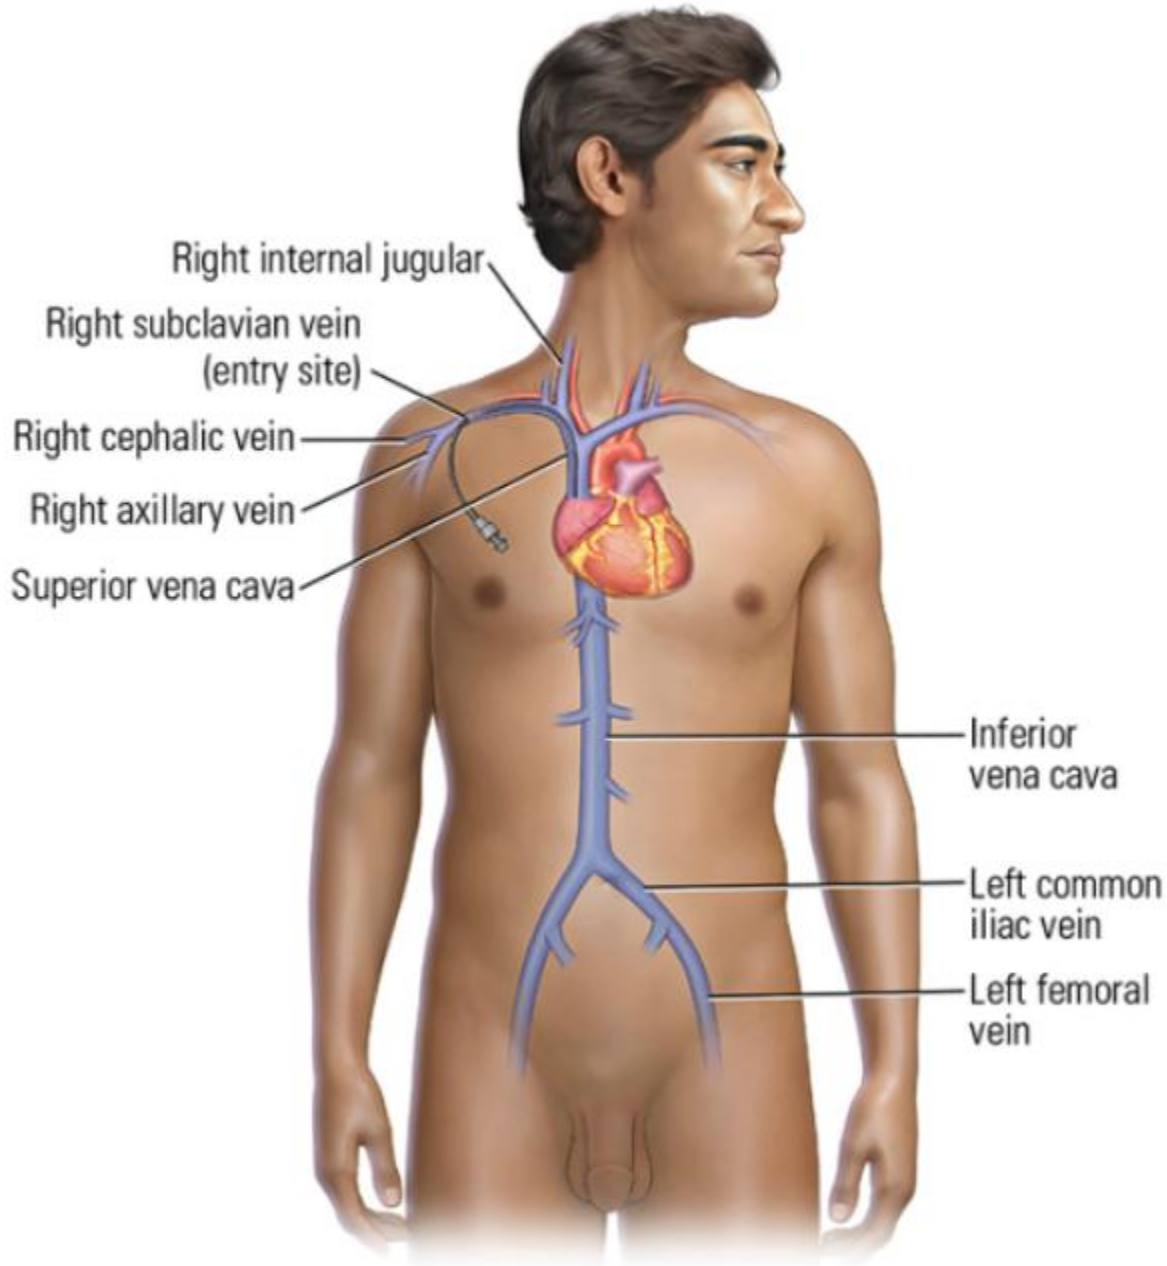
Insertion of Non-Tunneled Centrally Inserted Central Venous Catheter

36555

During placement of a central venous catheter, a short tract is developed as the catheter is advanced from the skin entry site to the point of venous cannulation. The catheter tip must reside in the subclavian, innominate or iliac veins, the inferior or superior vena cava, or right atrium to be considered a "central venous" catheter.

36565 Insertion of tunneled centrally inserted central venous access device, requiring 2 catheters via 2 separate venous access sites; without subcutaneous port or pump (eg, Tesio type catheter)

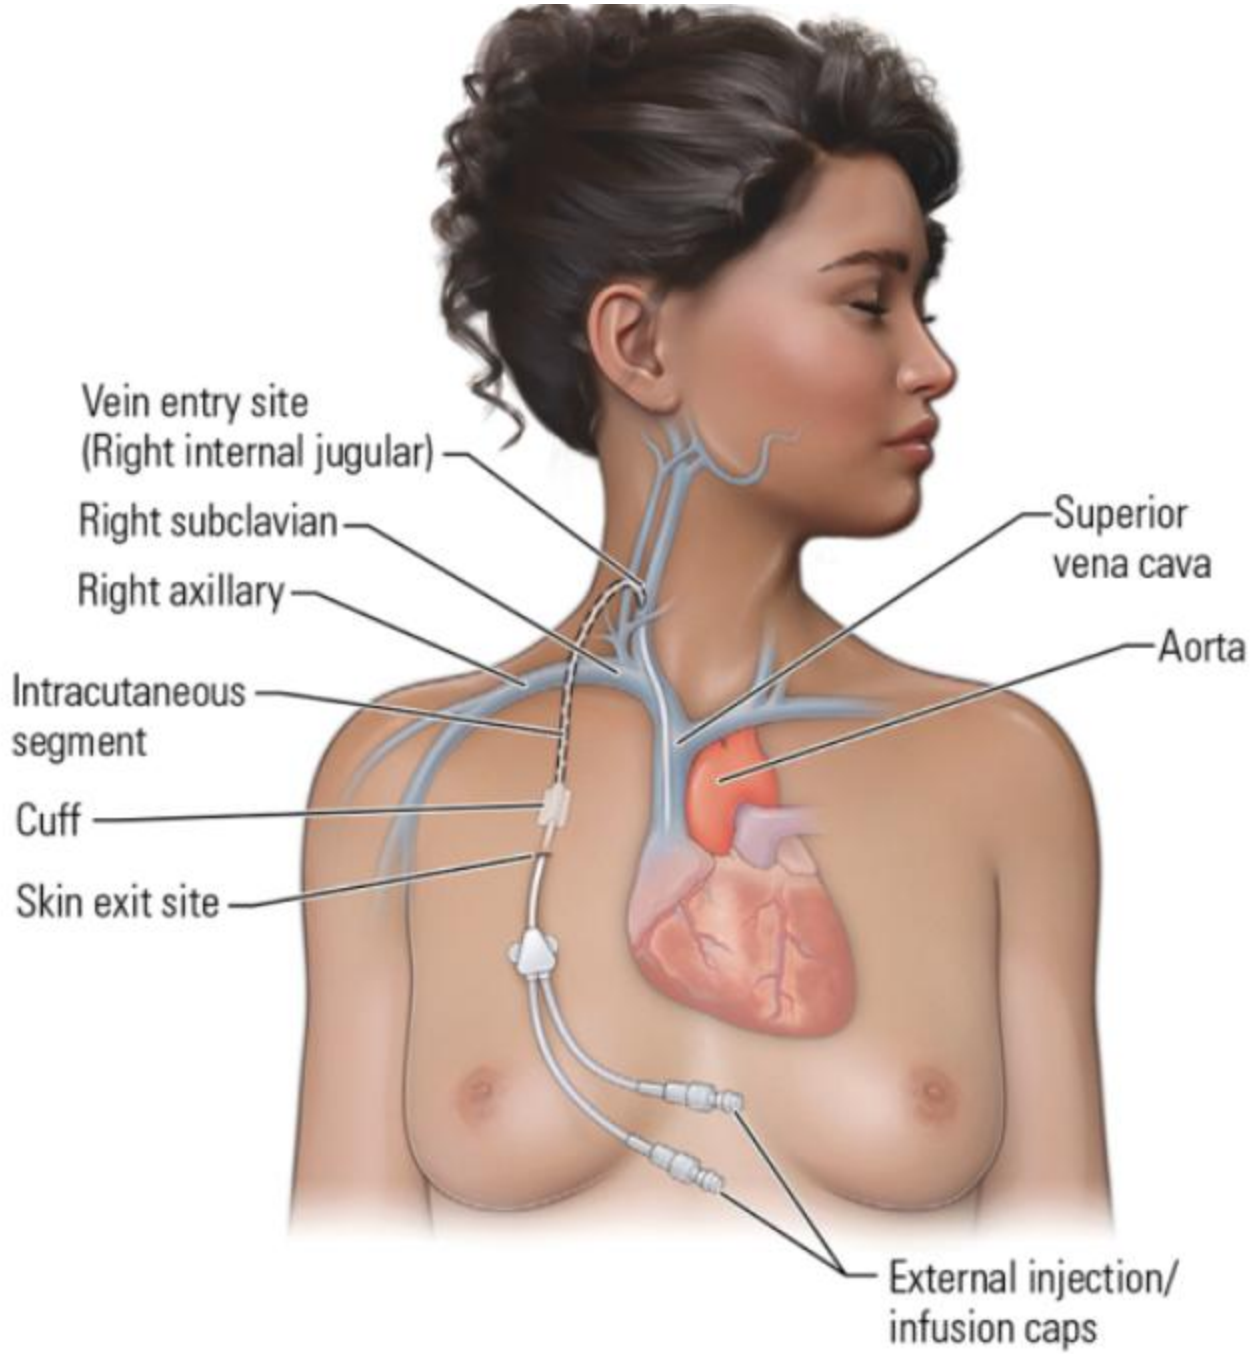
- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Dec 04:8, Jun 08:8
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10



36566 with subcutaneous port(s)

- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Dec 04:8, Jun 08:8
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10

Insertion of Non-Tunneled Centrally Inserted Central Venous Catheter



36556

During placement of a central venous catheter, a short tract is developed as the catheter is advanced from the skin entry site to the point of venous cannulation. The catheter tip must reside in the subclavian, innominate or iliac veins, the inferior or superior vena cava, or right atrium, to be considered a "central venous" catheter.

Insertion of Tunneled Central Venous Catheter

36557-36558

The Central Venous Access Procedures Table

	Non-tunneled	Tunneled Without Port or Pump (w/out port or pump)	Central Tunneled	Tunneled With Port (w/port)	Tunneled With Pump (w/pump)	Peripheral	<5 years	≥5 years	Any Age

Peripherally inserted central venous catheters (PICCs) may be placed or replaced with or without imaging guidance. When performed without imaging guidance, report using 36568 or 36569. When imaging guidance (eg, ultrasound, fluoroscopy) is used for PICC placement or complete replacement, bundled service codes 36572, 36573, 36584 include all imaging necessary to complete the procedure, image documentation (representative images from all modalities used are stored to patient's permanent record), associated radiological supervision and interpretation, venography performed through the same venous puncture, and documentation of final central position of the catheter with imaging. Ultrasound guidance for PICC placement should include documentation of evaluation of the potential puncture sites, patency of the entry vein, and real-time ultrasound visualization of needle entry into the vein.

Codes 71045, 71046, 71047, 71048 should not be reported for the purpose of documenting the final catheter position on the same day of service as 36572, 36573, 36584. Codes 36572, 36573, 36584 include confirmation of catheter tip location. The physician or other qualified health care professional reporting image-guided PICC insertion cannot report confirmation of catheter tip location separately (eg, via X ray, ultrasound). Report 36572, 36573, 36584 with modifier 52 when performed without confirmation of catheter tip location.

"Midline" catheters by definition terminate in the peripheral venous system. They are **not** central venous access devices and may not be reported as a PICC service. Midline catheter placement may be reported with 36400, 36406, or 36410. PICCs placed using magnetic guidance or any other guidance modality that does not include imaging or image documentation are reported with 36568, 36569.

36568 Insertion of peripherally inserted central venous catheter (PICC), without subcutaneous port or pump, without imaging guidance; younger than 5 years of age

- *CPT Changes: An Insider's View* 2004, 2017, 2019

(Do not report 36568, 36569 in conjunction with 76937, 77001)

(For placement of centrally inserted non-tunneled central venous catheter, without subcutaneous port or pump, age 5 years or older, use 36556)

(For placement of peripherally inserted non-tunneled central venous catheter, without subcutaneous port or pump, with imaging guidance, age 5 years or older, use 36573)

 # 36572 Insertion of peripherally inserted central venous catheter (PICC), without subcutaneous port or pump, including all imaging guidance, image documentation, and all associated radiological supervision and interpretation required to perform the insertion; younger than 5 years of age

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Mar 19:10, May 19:3
- *Clinical Examples in Radiology* Fall 18:7, Winter 19:12, Fall 19:11

(For placement of centrally inserted non-tunneled central venous catheter, without subcutaneous port or pump, younger than 5 years of age, use 36555)

(For placement of peripherally inserted non-tunneled central venous catheter, without subcutaneous port or pump, without imaging guidance, younger than 5 years of age, use 36568)

 # 36573 age 5 years or older

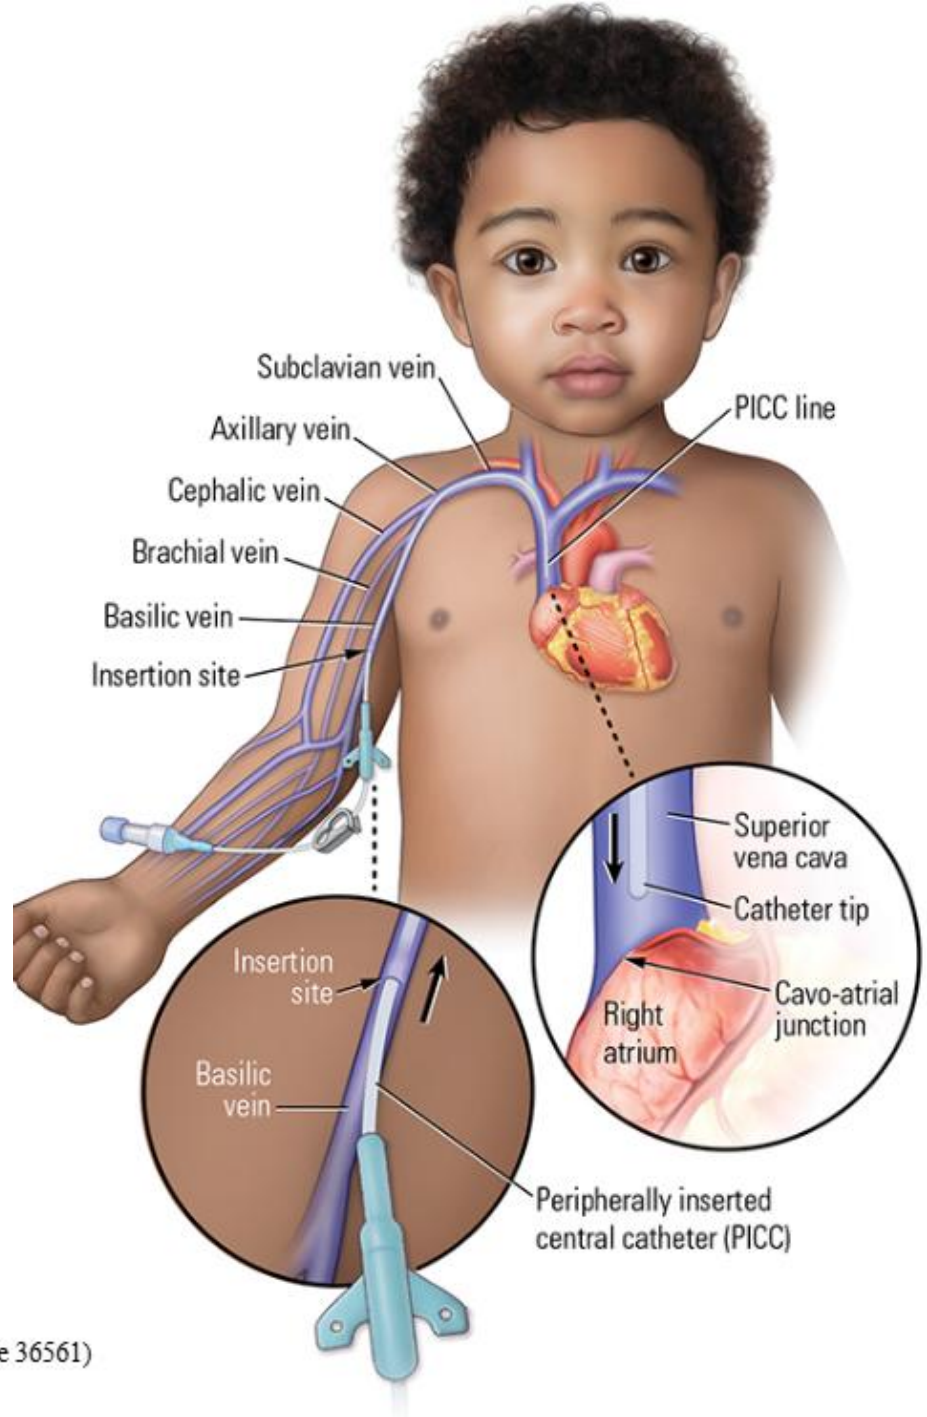
- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Mar 19:10, May 19:3
- *Clinical Examples in Radiology* Fall 18:7, Winter 19:13, Fall 19:11

(For placement of centrally inserted non-tunneled central venous catheter, without subcutaneous port or pump, age 5 years or older, use 36556)

(For placement of peripherally inserted non-tunneled central venous catheter, without subcutaneous port or pump, without imaging guidance, age 5 years or older, use 36569)

(Do not report 36572, 36573 in conjunction with 76937, 77001)

36570 Insertion of peripherally inserted central venous access device, with subcutaneous port; younger than 5 years of age



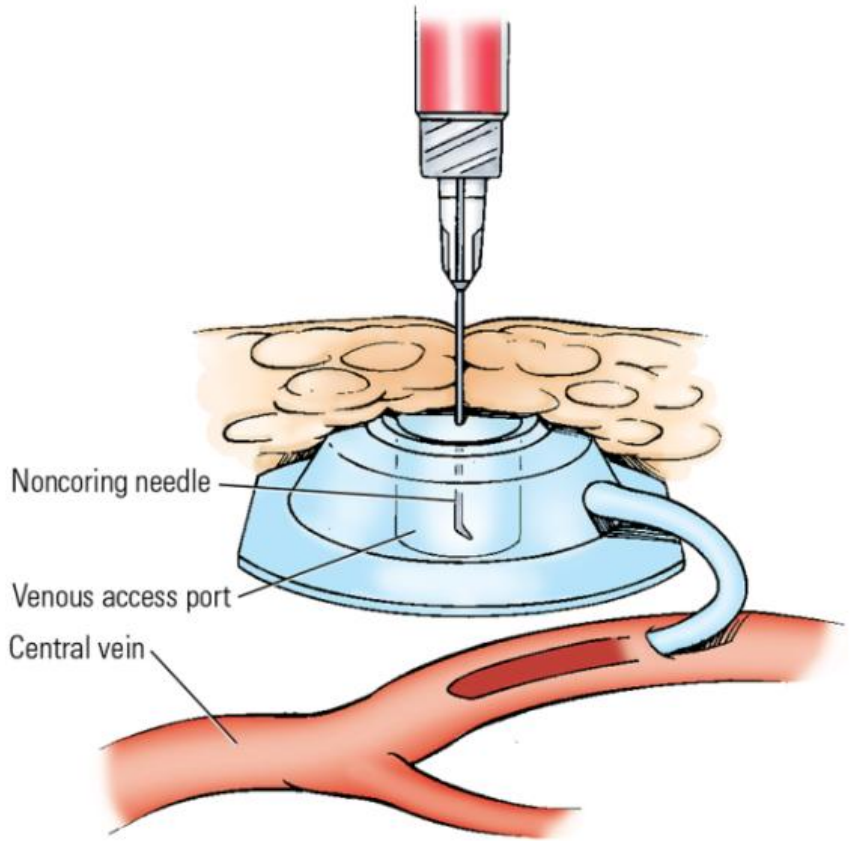
- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Dec 04:8, Jun 08:8, Dec 09:11
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10

(For insertion of tunneled centrally inserted central venous access device with subcutaneous port, younger than 5 years of age, use 36560)

Peripherally Inserted Central Catheter

36572

A peripherally inserted central catheter, which is non-tunneled and without a subcutaneous port/pump, is placed in a child younger than 5 years of age.



36571 age 5 years or older

- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Dec 04:9, Jun 08:8, Dec 09:11
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10

(For insertion of tunneled centrally inserted central venous access device with subcutaneous port, age 5 years or older, use 36561)

Implantable Venous Access Port

36570, 36571, 36576, 36578

36572 Code is out of numerical sequence. See 36568-36571
36573 Code is out of numerical sequence. See 36568-36571

Repair of Central Venous Access Device

(For mechanical removal of pericatheter obstructive material, use 36595)

(For mechanical removal of intracatheter obstructive material, use 36596)

36575 Repair of tunneled or non-tunneled central venous access catheter, without subcutaneous port or pump, central or peripheral insertion site
- *CPT Changes: An Insider's View* 2004
- *Clinical Examples in Radiology* Spring 09:10, Summer 10:11

36576 Repair of central venous access device, with subcutaneous port or pump, central or peripheral insertion site
- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Dec 04:9, Jun 08:8
- *Clinical Examples in Radiology* Spring 09:10

Partial Replacement of Central Venous Access Device (Catheter Only)

36578 Replacement, catheter only, of central venous access device, with subcutaneous port or pump, central or peripheral insertion site
- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Dec 04:10, Jun 08:8
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10

(For complete replacement of entire device through same venous access, use 36582 or 36583)

Complete Replacement of Central Venous Access Device Through Same Venous Access Site

36580 Replacement, complete, of a non-tunneled centrally inserted central venous catheter, without subcutaneous port or pump, through same venous access
- *CPT Changes: An Insider's View* 2004
- *CPT Assistant* Dec 04:10, Jun 08:8
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10

36581 Replacement, complete, of a tunneled centrally inserted central venous catheter, without subcutaneous port or pump, through same venous access
- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Dec 04:10, Jun 08:8, Jul 23:17
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10, Fall 23:28

36582 Replacement, complete, of a tunneled centrally inserted central venous access device, with subcutaneous port, through same venous access

- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Dec 04:10, Jun 08:8
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10

36583 Replacement, complete, of a tunneled centrally inserted central venous access device, with subcutaneous pump, through same venous access

- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Dec 04:10-11, Jun 08:8
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10

36584 Replacement, complete, of a peripherally inserted central venous catheter (PICC), without subcutaneous port or pump, through same venous access, including all imaging guidance, image documentation, and all associated radiological supervision and interpretation required to perform the replacement

- *CPT Changes: An Insider's View* 2004, 2019
- *CPT Assistant* Dec 04:11, Jun 08:8, Mar 19:10, May 19:3
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10, Fall 18:8

(For replacement of a peripherally inserted central venous catheter [PICC] without subcutaneous port or pump, through same venous access, without imaging guidance, use 37799)

(Do not report 36584 in conjunction with 76937, 77001)

36585 Replacement, complete, of a peripherally inserted central venous access device, with subcutaneous port, through same venous access

- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Dec 04:11, Jun 08:8
- *Clinical Examples in Radiology* Winter 09:9, Spring 09:10, Winter 17:10

Removal of Central Venous Access Device

36589 Removal of tunneled central venous catheter, without subcutaneous port or pump

- *CPT Changes: An Insider's View* 2004
- *CPT Assistant* Dec 04:11, Jun 08:8, Nov 15:10

36590 Removal of tunneled central venous access device, with subcutaneous port or pump, central or peripheral insertion

- *CPT Changes: An Insider's View* 2004, 2017
- *CPT Assistant* Dec 04:11, Jun 08:8, Jul 10:10
- *Clinical Examples in Radiology* Spring 08:7

(Do not report 36589 or 36590 for removal of non-tunneled central venous catheters)

Other Central Venous Access Procedures

36591 Collection of blood specimen from a completely implantable venous access device

CPT Changes: An Insider's View 2008
CPT Assistant Apr 08:9, Jul 11:16, May 14:4, Aug 19:8, Jan 22:3

(Do not report 36591 in conjunction with other services except a laboratory service)

(For collection of venous blood specimen by venipuncture, use 36415)

(For collection of capillary blood specimen, use 36416)

36592 Collection of blood specimen using established central or peripheral catheter, venous, not otherwise specified

CPT Changes: An Insider's View 2008
CPT Assistant Apr 08:9, Jul 11:16

(For blood collection from an established arterial catheter, use 37799)

(Do not report 36592 in conjunction with other services except a laboratory service)

36593 Declotting by thrombolytic agent of implanted vascular access device or catheter

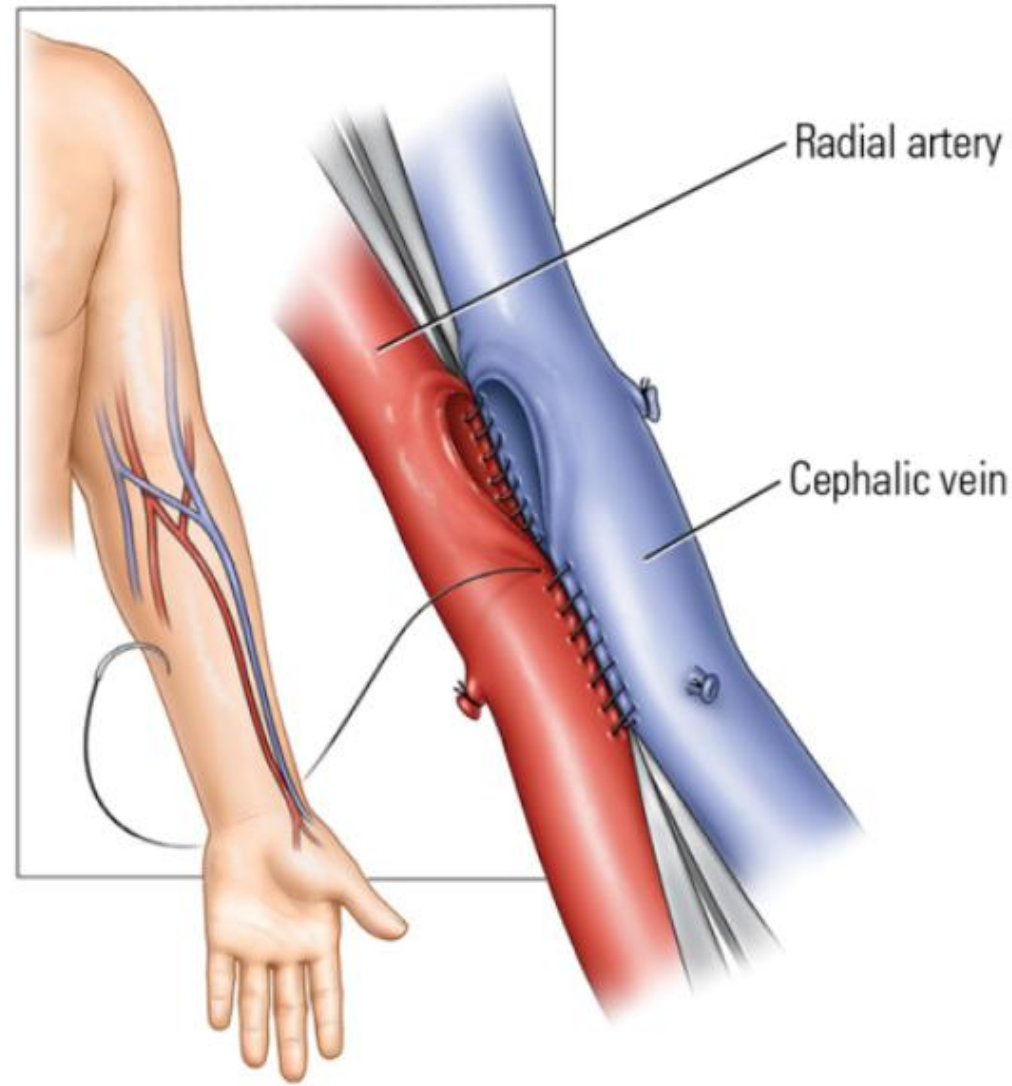
36821 direct, any site (eg, Cimino type) (separate procedure)

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Fall 93:3, Feb 97:2, Nov 99:20, Jul 05:9, Aug 15:8, Mar 17:5, Mar 23:23

36823 Insertion of arterial and venous cannula(s) for isolated extracorporeal circulation including regional chemotherapy perfusion to an extremity, with or without hyperthermia, with removal of cannula(s) and repair of arteriotomy and venotomy sites



- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Nov 98:14-15, Mar 17:5

(36823 includes chemotherapy perfusion supported by a membrane oxygenator/perfusion pump. Do not report 96409-96425 in conjunction with 36823)

Arteriovenous Anastomosis, Direct

36821

A section of artery and a neighboring vein are joined, allowing blood to flow down the artery and into the vein for the purpose of increasing blood flow, usually in hemodialysis.

36825 Creation of arteriovenous fistula by other than direct arteriovenous anastomosis (separate procedure); autogenous graft

CPT Assistant Fall 93:3, Feb 97:2, Jul 05:9, Mar 17:5

(For direct arteriovenous anastomosis, use 36821)

36830 nonautogenous graft (eg, biological collagen, thermoplastic graft)

CPT Changes: An Insider's View 2003

CPT Assistant Fall 93:3, Feb 97:2, Jul 05:9, Jan 15:13, Mar 17:5, Nov 23:25

(For direct arteriovenous anastomosis, use 36821)

36831 Thrombectomy, open, arteriovenous fistula without revision, autogenous or nonautogenous dialysis graft (separate procedure)

CPT Changes: An Insider's View 2001

CPT Assistant Nov 98:14-15, Feb 99:6, Mar 99:6, Apr 99:11, Mar 17:5

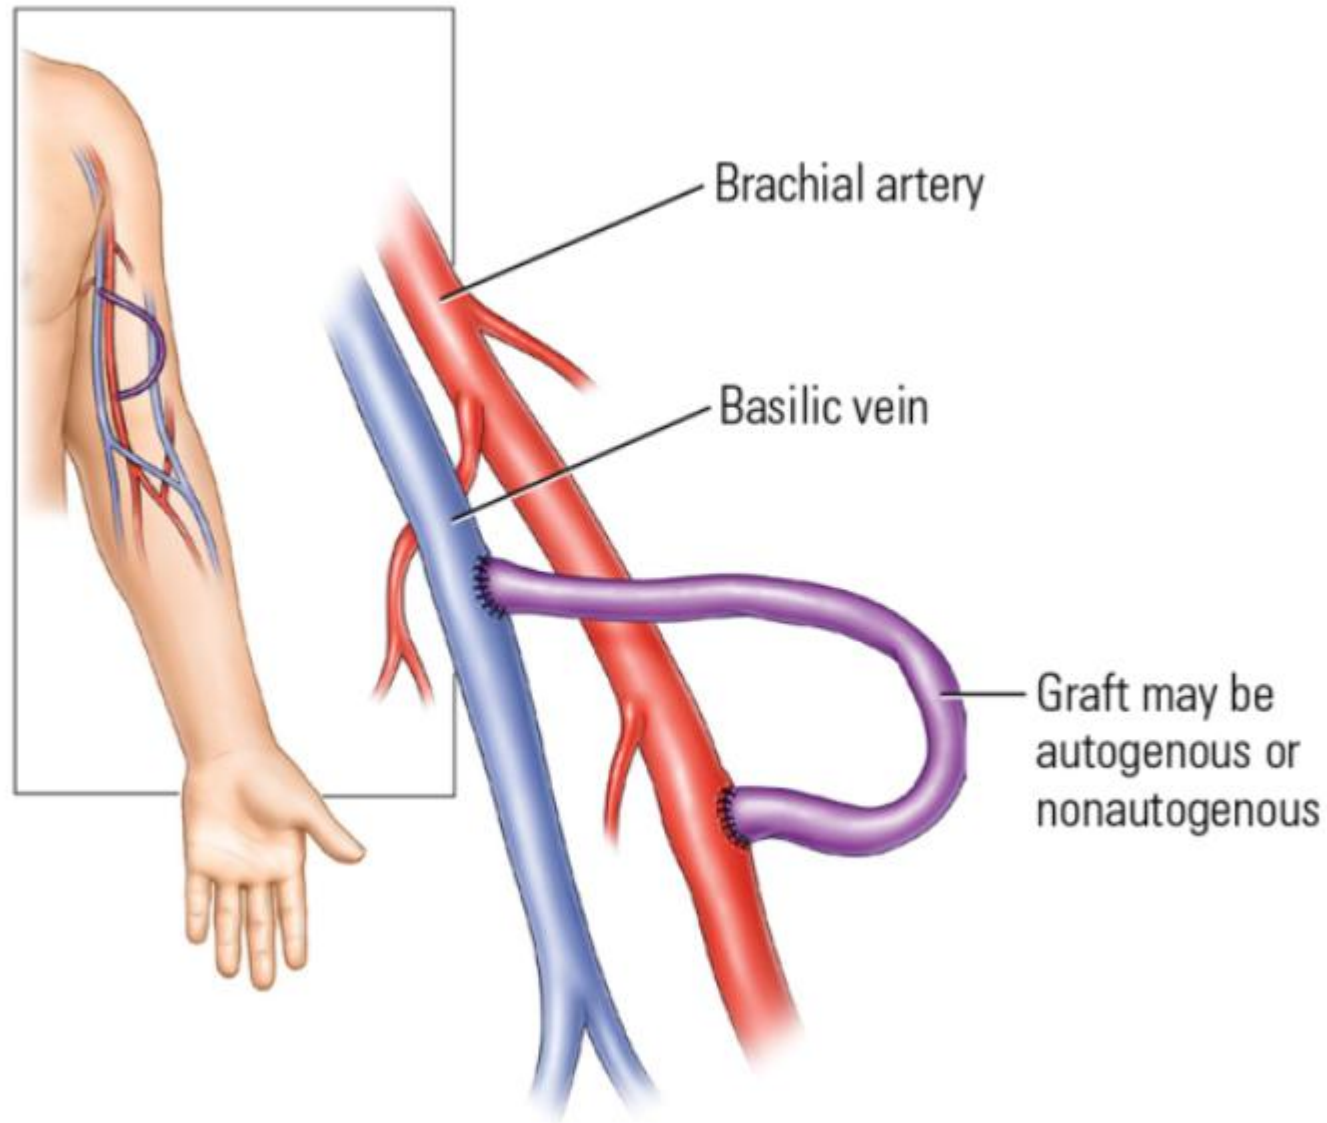
36832 Revision, open, arteriovenous fistula; without thrombectomy, autogenous or nonautogenous dialysis graft (separate procedure)

CPT Changes: An Insider's View 2000, 2001

CPT Assistant Fall 93:3, Feb 97:2, Nov 98:15, Feb 99:6, Mar 99:6, Apr 99:11, Nov 99:20-21, Mar 17:5, May 22:16

36833 with thrombectomy, autogenous or nonautogenous dialysis graft (separate procedure)

CPT Assistant Nov 98:15, Feb 99:6, Apr 99:11, Mar 17:5



(For percutaneous thrombectomy within the dialysis circuit, see 36904, 36905, 36906)

(For central dialysis segment angioplasty in conjunction with 36818-36833, use 36907)

Arteriovenous Fistula

36825-36830

A donor's vein (36825) or a synthetic vein (36830) is used to connect an arte
and vein.

(For central dialysis segment stent placement in conjunction with 36818-36833, use 36908)

(Do not report 36832, 36833 in conjunction with 36901, 36902, 36903, 36904, 36905, 36906 for revision of the dialysis circuit)

Codes 36836, 36837 describe percutaneous arteriovenous fistula creation in the upper extremity for hemodialysis access, including image-guided percutaneous access into a peripheral artery and peripheral vein via single access (36836) or two separate access sites (36837). The artery and vein are approximated and then energy (eg, thermal) is applied to establish the fistulous communication between the two vessels. Fistula maturation procedures promote blood flow through the newly created fistula by augmentation (eg, angioplasty) or redirection (eg, coil embolization of collateral pathways) of blood flow. Codes 36836, 36837 include all vascular access, angiography, imaging guidance, and blood flow redirection or maturation techniques (eg, transluminal balloon angioplasty, coil embolization) performed for fistula creation. These procedures may not be reported separately with 36836, 36837, when performed at the same operative session.

 # 36836 Percutaneous arteriovenous fistula creation, upper extremity, single access of both the peripheral artery and peripheral vein, including fistula maturation procedures (eg, transluminal balloon angioplasty, coil embolization) when performed, including all vascular access, imaging guidance and radiologic supervision and interpretation

CPT Changes: An Insider's View 2023
CPT Assistant Oct 22:11, Mar 23:23

(Do not report 36836 in conjunction with 36005, 36140, 36215, 36216, 36217, 36218, 36245, 36246, 36247, 36837, 36901, 36902, 36903, 36904, 36905, 36906, 36907, 36908, 36909, 37236, 37238, 37241, 37242, 37246, 37248, 37252, 75710, 75716, 75820, 75822, 75894, 75898, 76937, 77001)

(For arteriovenous fistula creation via an open approach, see 36800, 36810, 36815, 36818, 36819, 36820, 36821)

(For percutaneous arteriovenous fistula creation in any location other than the upper extremity, use 37799)

 # 36837 Percutaneous arteriovenous fistula creation, upper extremity, separate access sites of the peripheral artery and peripheral vein, including fistula maturation procedures (eg, transluminal balloon angioplasty, coil embolization) when performed, including all vascular access, imaging guidance and radiologic supervision and interpretation

CPT Changes: An Insider's View 2023
CPT Assistant Oct 22:11, Mar 23:23

(Do not report 36837 in conjunction with 36005, 36140, 36215, 36216, 36217, 36218, 36245, 36246, 36247, 36836, 36901, 36902, 36903, 36904, 36905, 36906, 36907, 36908, 36909, 37236, 37238, 37241, 37242, 37246, 37248, 37252, 75710, 75716, 75820, 75822, 75894, 75898, 76937, 77001)

(For arteriovenous fistula creation via an open approach, see 36800, 36810, 36815, 36818, 36819, 36820, 36821)

(For percutaneous arteriovenous fistula creation in any location other than the upper extremity, use 37799)

36835 Insertion of Thomas shunt (separate procedure)

36836 Code is out of numerical sequence. See 36832-36838

36837 Code is out of numerical sequence. See 36832-36838

36838 Distal revascularization and interval ligation (DRIL), upper extremity hemodialysis access (steal syndrome)

CPT Changes: An Insider's View 2004

(Do not report 36838 in conjunction with 35512, 35522, 35523, 36832, 37607, 37618)

36860 External cannula declotting (separate procedure); without balloon catheter

CPT Assistant Fall 93:3, Feb 97:2, Nov 98:15, Feb 99:6, May 01:3

CPT Assistant Fall 93:3, Feb 97:2, Nov 98:15, Feb 99:6, May 01:3

36861 with balloon catheter

CPT Assistant Fall 93:3, Feb 97:2, May 01:3

(If imaging guidance is performed, use 76000)

Dialysis Circuit

Definitions

Dialysis circuit: The arteriovenous (AV) dialysis circuit is designed for easy and repetitive access to perform hemodialysis. It begins at the arterial anastomosis and extends to the right atrium. The circuit may be created using either an arterial-venous anastomosis, known as an arteriovenous fistula (AVF), or a prosthetic graft placed between an artery and vein, known as an arteriovenous graft (AVG). The dialysis circuit is comprised of two segments, termed the (1) peripheral dialysis segment and (2) central dialysis segment. Both are defined as follows.

Peripheral dialysis segment: The peripheral dialysis segment is the portion of the dialysis circuit that begins at the arterial anastomosis and extends to the central dialysis segment. In the upper extremity, the peripheral dialysis segment extends through the axillary vein (or entire cephalic vein in the case of cephalic venous outflow). In the lower extremity, the peripheral dialysis segment extends through the common femoral vein. The peripheral dialysis segment includes the historic "peri-anastomotic region" (defined below).

Central dialysis segment: The central dialysis segment includes all draining veins central to the peripheral dialysis segment. In the upper extremity, the central dialysis segment includes the veins central to the axillary and cephalic veins, including the subclavian and innominate veins through the superior vena cava. In the lower extremity, the central dialysis segment includes the veins central to the common femoral vein, including the external iliac and common iliac veins through the inferior vena cava.

Peri-anastomotic region: A historic term referring to the region of a dialysis circuit near the arterial anastomosis encompassing a short segment of the parent artery, the anastomosis, and a short segment of the dialysis circuit immediately adjacent to the anastomosis. The peri-anastomotic region is included within the peripheral segment of the dialysis circuit.

Performed through dialysis circuit: Any diagnostic study or therapeutic intervention within the dialysis circuit that is performed through a direct percutaneous access to the dialysis circuit.

Code 36901 includes direct access and imaging of the entire dialysis circuit. Antegrade and/or retrograde punctures of the dialysis circuit are typically used for imaging, and contrast may be injected directly through a needle or through a catheter placed into the dialysis circuit. All dialysis circuit punctures required to perform the procedure are included in 36901. Occasionally, the catheter needs to be advanced further into the circuit to adequately visualize the arterial anastomosis or the central veins, or selective catheterization of a venous branch may be required. All manipulation(s) of the catheter for diagnostic imaging of the dialysis circuit is included in 36901. Advancement of the catheter to the vena cava to adequately image that segment of the dialysis circuit is included in 36901 and is not separately reported. Code 36901 also includes catheterization of additional venous side branches communicating with the dialysis circuit, known as accessory veins. Advancement of the catheter tip through the arterial anastomosis to adequately visualize the anastomosis is also included in the service described by 36901 and is not separately reported. Evaluation of the peri-anastomotic portion of the inflow is an integral part of the dialysis circuit angiogram and is included in 36901.

For the purposes of reporting dialysis access maintenance services, the arterial inflow to the dialysis circuit is considered a separate vessel. If a more proximal arterial inflow problem separate from the peripheral dialysis segment is suspected, additional catheter placement and imaging required for adequate evaluation of the artery may be separately reported. If a catheter is selectively advanced from the dialysis circuit puncture beyond the peri-anastomotic segment into the inflow artery, an additional catheterization code may be reported. For example, 36215 may be used to report image-guided retrograde catheter placement into the inflow artery and into the aorta, if necessary (36200 is not reported in addition to 36215 in this example). Note that 75710 may also be reported if contrast injection for diagnostic arteriography is performed through this catheter and radiological supervision and interpretation and imaging documentation is performed.

Ultrasound guidance for puncture of the dialysis circuit access is not typically performed and is not included in 36901, 36902, 36903, 36904, 36905, 36906. However, in the case of a new (immature) or failing AVF, ultrasound may be necessary to safely and effectively puncture the dialysis circuit for evaluation, and this may be reported separately with 76937, if all the appropriate elements for reporting 76937 are performed and documented.

For radiological supervision and interpretation of dialysis circuit angiography performed through existing access(es) or catheter-based arterial access, report 36901 with modifier 52.

Dialysis Circuit Interventions (AV Grafts and AV Fistulae): For the purposes of coding interventional procedures in the dialysis circuit (both AVF and AVG), the dialysis circuit is artificially divided into two distinct segments: peripheral dialysis segment and central dialysis segment (see definitions).

Codes 36901, 36902, 36903 and 36904, 36905, 36906 are built on progressive hierarchies that have more intensive services, which include less intensive services. Report only one code (36901, 36902, 36903, 36904, 36905, 36906) for services provided in a dialysis circuit.

Code 36901 describes the diagnostic evaluation of the dialysis circuit, and this service is included in the services described by 36901, 36902, 36903, 36904, 36905, 36906. All catheterizations required to perform diagnostic fistulography are included in 36901. All catheterizations required to perform additional interventional services are included in codes 36902, 36903, 36904, 36905, 36906, 36907, 36908, 36909 and not separately reported. All angiography, fluoroscopic image guidance, roadmapping, and radiological supervision and interpretation required to perform each service are included in each code. Closure of the puncture(s) by any method is included in the service of each individual code.

Code 36902 includes the services in 36901 plus transluminal balloon angioplasty in the peripheral segment of the dialysis circuit. Code 36902 would be reported only once per session to describe all angioplasty services performed in the peripheral segment of the dialysis circuit, regardless of the number of distinct lesions treated within that segment, the number of times the balloon is inflated, or the number of balloon catheters or sizes required to open all lesions, and includes angioplasty of the peri-anastomotic segment when performed. Code 36903 includes the services in 36902 plus transcatheter stent placement in the peripheral segment of the dialysis circuit. Code 36903 is reported only once per session to describe placing stent(s) within the peripheral segment, regardless of the number of stent(s) placed or the number of discrete lesion(s) treated within the peripheral segment. If both angioplasty and stenting are performed in the peripheral segment, including treatment of separate lesions, report 36903 only once.

Code 36904 describes percutaneous transluminal mechanical thrombectomy and/or infusion for thrombolysis in the dialysis circuit (all thrombus treated in both the peripheral and central dialysis circuit segments) and includes diagnostic angiography (36901), fluoroscopic image guidance, catheter placement(s), and all maneuvers required to remove thrombus from the peripheral and/or central segments, including all intraprocedural pharmacological thrombolytic injection(s)/infusion(s). It is never appropriate to report removal of the arterial plug during a declot/thrombectomy procedure as an angioplasty (36905). Removal of the arterial plug is included in a fistula thrombectomy, even if a balloon catheter is used to mechanically dislodge the resistant thrombus. Codes 36905 (angioplasty) and 36906 (stent) describe services in the peripheral circuit when performed in conjunction with thrombolysis/thrombectomy. Code 36905 includes the services in 36904 plus transluminal balloon angioplasty in the peripheral segment of the dialysis circuit. Code 36905 may be reported only once per session to describe all angioplasty performed in the peripheral segment of the dialysis circuit, regardless of the number of distinct lesions treated within that segment, the number of times the balloon is inflated, or the number of balloon catheters required to open all lesions. Code 36906 includes the services in 36905 plus transcatheter stent placement in the peripheral segment of the dialysis circuit. Code 36906 is reported only once per session to describe placing stent(s) within the peripheral segment, regardless of the number of stent(s) placed or the number of discrete lesion(s) treated within the peripheral segment.

Codes 36907 and 36908 describe procedures performed through puncture(s) in the dialysis circuit. Similar procedures performed from a different access (eg, common femoral vein) may be reported using 37248, 37249 or 37238, 37239. Code 36907 is an add-on code used in conjunction with 36901, 36902, 36903, 36904, 36905, 36906 to report angioplasty within the central dialysis segment when performed through puncture of the dialysis circuit, and is reported once per session independent of the number of discrete lesions treated, the number of balloon inflations, and number of balloon catheters or sizes required. These additional services should be clearly documented in the patient record, including the recorded images. Code 36907 may be reported only once per session with 36901, 36902, 36903, 36904, 36905, 36906, as appropriate. Report 36907 once for all angioplasty performed within the central dialysis segment.

Code 36908 is an add-on code used in conjunction with 36901, 36902, 36903, 36904, 36905, 36906 to report stenting lesion(s) in the central dialysis segment when performed through puncture of the dialysis circuit. It is reported once, regardless of the number of discrete lesions treated or the number of stents placed. Code 36908 includes the services in 36907; therefore, 36908 may not be reported with 36907 in the same session. Code 36908 may be reported only once per session with 36901, 36902, 36903, 36904, 36905, 36906, as appropriate.

Code 36909 is an add-on code used to report endovascular embolization or occlusion of the main vessel or side branches arising from (emptying into) the dialysis circuit. Code 36909 may only be reported once per therapeutic session, irrespective of the number of branches embolized or occluded. Embolization or occlusion of the main vessel or these side branches may not be reported with 37241.

If open dialysis circuit creation, revision, and/or thrombectomy (36818-36833) are performed, completion angiography is bundled, as is peripheral segment angioplasty and/or stent placement (36901, 36902, 36903) and, therefore, not separately reported. However, dialysis circuit central segment angioplasty and/or stent placement may be separately reported (36907, 36908).

36901 Introduction of needle(s) and/or catheter(s), dialysis circuit, with diagnostic angiography of the dialysis circuit, including all direct puncture(s) and catheter placement(s), injection(s) of contrast, all necessary imaging from the arterial anastomosis and adjacent artery through entire venous outflow including the inferior or superior vena cava, fluoroscopic guidance, radiological supervision and interpretation and image documentation and report;

CPT Assistant Dec 03:2, Jan 23:32

Clinical Examples in Radiology Fall 09:9, Summer 10:3

(Do not report 75885 or 75887 in conjunction with 37183)

(For repair of arteriovenous aneurysm, use 36832)

Transcatheter Procedures

Codes for catheter placement and the radiologic supervision and interpretation should also be reported, in addition to the code(s) for the therapeutic aspect of the procedure.

Mechanical Thrombectomy

Code(s) for catheter placement(s), diagnostic studies, and other percutaneous interventions (eg, transluminal balloon angioplasty, stent placement) provided are separately reportable.

Codes 37184-37188 specifically include intraprocedural fluoroscopic radiological supervision and interpretation services for guidance of the procedure.

Intraprocedural injection(s) of a thrombolytic agent is an included service and not separately reportable in conjunction with mechanical thrombectomy. However, subsequent or prior continuous infusion of a thrombolytic is not an included service and is separately reportable (see 37211-37214).

►For coronary mechanical aspiration thrombectomy, use 92973.◄

For intracranial arterial mechanical thrombectomy, use 61645.

Transcatheter Thrombolytic Infusion

Codes 37211 or 37212 are used to report the initial day of transcatheter thrombolytic infusion(s) including follow-up arteriography/venography, and catheter position change or exchange, when performed. To report bilateral thrombolytic infusion through a separate access site(s), use modifier 50 in conjunction with 37211, 37212. Code 37213 is used to report continued transcatheter thrombolytic infusion(s) on subsequent day(s), other than initial day and final day of treatment. Code 37214 is used to report final day of transcatheter thrombolytic infusion(s). When initiation and completion of thrombolysis occur on the same day, report only 37211 or 37212.

Code(s) for catheter placement(s), diagnostic studies, and other percutaneous interventions (eg, transluminal balloon angioplasty, stent placement) provided may be separately reportable.

Codes 37211-37214 include fluoroscopic guidance and associated radiological supervision and interpretation.

Ongoing evaluation and management services on the day of the procedure related to thrombolysis are included in 37211-37214. If a significant, separately identifiable E/M service is performed by the same physician on the same day of the procedure, report the appropriate level of E/M service and append modifier 25.

Ultrasound guidance for vascular access is not included in 37211-37214. Code 76937 may be reported separately when performed if all the required elements are performed.

For intracranial arterial mechanical thrombectomy and/or infusion for thrombolysis, use 61645.

Arterial Mechanical Thrombectomy

Arterial mechanical thrombectomy may be performed as a “primary” transcatheter procedure with pretreatment planning, performance of the procedure, and postprocedure evaluation focused on providing this service. Typically, the diagnosis of thrombus has been made prior to the procedure, and a mechanical thrombectomy is planned preoperatively. Primary mechanical thrombectomy is reported per vascular family using 37184 for the initial vessel treated and 37185 for second or all subsequent vessel(s) within the same vascular family. To report mechanical thrombectomy of an additional vascular family treated through a separate access site, use modifier 59 in conjunction with the primary service code (37184) for the mechanical transluminal thrombectomy.

Primary mechanical thrombectomy may precede or follow another percutaneous intervention. Most commonly primary mechanical thrombectomy will precede another percutaneous intervention with the decision regarding the need for other services not made until after mechanical thrombectomy has been performed. Occasionally, the performance of primary mechanical thrombectomy may follow another percutaneous intervention.

Do **NOT** report 37184-37185 for mechanical thrombectomy performed for the retrieval of short segments of thrombus or embolus evident during other percutaneous interventional procedures. See 37186 for these procedures.

Arterial mechanical thrombectomy is considered a "secondary" transcatheter procedure for removal or retrieval of short segments of thrombus or embolus when performed either before or after another percutaneous intervention (eg, percutaneous transluminal balloon angioplasty, stent placement). Secondary mechanical thrombectomy is reported using 37186. Do **NOT** report 37186 in conjunction with 37184-37185.

Venous Mechanical Thrombectomy

Use 37187 to report the initial application of venous mechanical thrombectomy. To report bilateral venous mechanical thrombectomy performed through a separate access site(s), use modifier 50 in conjunction with 37187. For repeat treatment on a subsequent day during a course of thrombolytic therapy, use 37188.

Arterial Mechanical Thrombectomy

37184 Primary percutaneous transluminal mechanical thrombectomy, noncoronary, non-intracranial, arterial or arterial bypass graft, including fluoroscopic guidance and intraprocedural pharmacological thrombolytic injection(s); initial vessel

- *Clinical Examples in Radiology* Winter 13:4, Spring 13:11, Summer 13:1-4, Spring 16:4

37214 cessation of thrombolysis including removal of catheter and vessel closure by any method

- *CPT Changes: An Insider's View* 2013, 2017
- *CPT Assistant* Feb 13:3, Nov 15:3, Mar 16:3, Sep 19:6, Jun 22:22
- *Clinical Examples in Radiology* Winter 13:4, Spring 13:11, Summer 13:2-4, Spring 16:4

(Report 37211-37214 once per date of treatment)

(For declotting by thrombolytic agent of implanted vascular access device or catheter, use 36593)

(Do not report 37211-37214 in conjunction with 75898)

37215 Transcatheter placement of intravascular stent(s), cervical carotid artery, open or percutaneous, including angioplasty, when performed, and radiological supervision and interpretation; with distal embolic protection

- *CPT Changes: An Insider's View* 2005, 2015, 2017
- *CPT Assistant* May 05:7, Feb 13:3, Mar 14:8
- *Clinical Examples in Radiology* Winter 15:2-3

37216 without distal embolic protection

- *CPT Changes: An Insider's View* 2005, 2015, 2017
- *CPT Assistant* May 05:7, Feb 13:3, Mar 14:8
- *Clinical Examples in Radiology* Winter 15:3

(37215 and 37216 include all ipsilateral selective carotid catheterization, all diagnostic imaging for ipsilateral, cervical and cerebral carotid arteriography, and all related radiological supervision and interpretation. When ipsilateral carotid arteriogram (including imaging and selective catheterization) confirms the need for carotid stenting, 37215 and 37216 are inclusive of these services. If carotid stenting is not indicated, then the appropriate codes for carotid catheterization and imaging should be reported in lieu of 37215 and 37216)

(Do not report 37215, 37216 in conjunction with 36222-36224 for the treated carotid artery)

(For open or percutaneous transcatheter placement of extracranial vertebral artery stent[s], see Category III codes 0075T, 0076T)

37217 Transcatheter placement of intravascular stent(s), intrathoracic common carotid artery or innominate artery by retrograde treatment, open ipsilateral cervical carotid artery exposure, including angioplasty, when performed, and radiological supervision and interpretation

- *CPT Changes: An Insider's View* 2014, 2015
- *CPT Assistant* Mar 14:8, May 15:7

►(37217 includes open vessel exposure and vascular access closure, all access and selective catheterization of the vessel, traversing the lesion, and any radiological supervision and interpretation directly related to the intervention when performed, standard closure of arteriotomy by suture, and imaging performed to document completion of the intervention in addition to the intervention[s] performed. Carotid artery revascularization services [eg, 35301, 35509, 35510, 35601, 35602, 35606] performed during the same session may be reported separately, when performed)◄

(Do not report 37217 in conjunction with 35201, 36221-36227, 37246, 37247 for ipsilateral services)

(For open or percutaneous transcatheter placement of intravascular cervical carotid artery stent[s], see 37215, 37216)

(For open or percutaneous antegrade transcatheter placement of innominate and/or intrathoracic carotid artery stent[s], use 37218)

(For transcatheter placement of intracranial stent[s], use 61635)

(For open or percutaneous transcatheter placement of extracranial vertebral artery stent[s], see 0075T, 0076T)

37218 Transcatheter placement of intravascular stent(s), intrathoracic common carotid artery or innominate artery, open or percutaneous antegrade approach, including angioplasty, when performed, and radiological supervision and interpretation

CPT Changes: An Insider's View 2015, 2017

CPT Assistant May 15:7

(37218 includes all ipsilateral extracranial intrathoracic selective innominate and carotid catheterization, all diagnostic imaging for ipsilateral extracranial intrathoracic innominate and/or carotid artery stenting, and all related radiologic supervision and interpretation. Report 37218 when the ipsilateral extracranial intrathoracic carotid arteriogram (including imaging and selective catheterization) confirms the need for stenting. If stenting is not indicated, report the appropriate codes for selective catheterization and imaging)

(Do not report 37218 in conjunction with 36222, 36223, 36224 for the treated carotid artery)

(For open or percutaneous transcatheter placement of intravascular cervical carotid artery stent[s], see 37215, 37216)

(For open or percutaneous transcatheter placement of extracranial vertebral artery stent[s], see 0075T, 0076T)

(For transcatheter placement of intracranial stent[s], use 61635)

Endovascular Revascularization (Open or Percutaneous, Transcatheter)

►Endovascular Revascularization of Lower Extremities for Arterial Occlusive Disease◄

►Codes 37254-37299 describe lower extremity endovascular revascularization services performed percutaneously and/or through an open surgical exposure for occlusive disease, including:

1. All maneuvers necessary for
   a. accessing and selectively catheterizing the artery,
   b. crossing the lesion,
   c. performing the endovascular intervention;

2. All imaging
    a. for intraprocedural guidance including radiological supervision and interpretation directly related to the intervention performed,
    b. to document completion of the intervention, and
    c. to document completion of the procedure;
3. Embolic protection if used; and
4. Closure of the arteriotomy by pressure and application of an arterial closure device or standard closure of the puncture by suture.

Extensive repair or replacement of an artery may be additionally reported (eg, 35226, 35286).

For lower extremity endovascular revascularization treatment, a straightforward lesion is a stenosis and a complex lesion is an occlusion.

A vascular territory is a collection of anatomically related arteries considered together for coding purposes. Codes 37254-37299 are divided into four vascular territories: iliac, femoral and popliteal, tibial and peroneal, and inframalleolar. Territories are further divided into vessels (ie, one or more arteries) for which a primary intervention code may only be reported once. The four territories each have specific guidelines:

1. ***Iliac Vascular Territory (37254, 37255, 37256, 37257, 37258, 37259, 37260, 37261, 37262)*** includes the common iliac, internal iliac, and external iliac arteries:
    - The initial vessel in the iliac vascular territory treated with angioplasty alone is reported with 37254 (straightforward lesion) or 37256 (complex lesion). The initial vessel in the iliac vascular territory treated with stent placement and angioplasty when performed is reported with 37258 (straightforward lesion) or 37260 (complex lesion).
    - Additional vessels in the iliac vascular territory treated with angioplasty or angioplasty/stent in the same leg may be reported with the appropriate add-on code(s) (37255, 37257, 37259, 37261). Add-on codes may only be reported for distinct lesions in different vessels, not distinct lesions within the same vessel. If a lesion crosses from one vessel to another vessel, report only a single treatment code. A maximum of two angioplasty and/or stent add-on codes may be reported in a unilateral iliac vascular territory because there are three vessels (common iliac artery, internal iliac artery, external iliac artery) that could be treated.
    - Add-on code 37262 may be reported for intravascular lithotripsy(ies) in the iliac vascular territory, including all imaging guidance and radiological supervision and interpretation necessary to perform the intervention. A maximum of three intravascular lithotripsy add-on codes may be reported in a unilateral iliac vascular territory because there are three vessels (common iliac artery, internal iliac artery, external iliac artery) that could be treated.
    - For atherectomy in the iliac vascular territory, use 0238T.

2. ***Femoral and Popliteal Vascular Territory (37263-37279)*** includes the common femoral, profunda femoris, superficial femoral, and popliteal arteries. For coding purposes, the common femoral and profunda femoris arteries are considered a single vessel, and the superficial femoral and popliteal arteries are considered a single vessel.
   - The initial vessel in the femoral and popliteal vascular territory treated with angioplasty alone is reported with 37263 (straightforward lesion) or 37265 (complex lesion). The initial vessel in the femoral and popliteal vascular territory treated with angioplasty and stent placement is reported with 37267 (straightforward lesion) or 37269 (complex lesion). The initial vessel in the femoral and popliteal vascular territory treated with angioplasty and atherectomy is reported with 37271 (straightforward lesion) or 37273 (complex lesion). The initial vessel in the femoral and popliteal vascular territory treated with angioplasty, stent, and atherectomy is reported with 37275 (straightforward lesion) or 37277 (complex lesion).
   - Additional vessels in the femoral and popliteal vascular territory treated with angioplasty, angioplasty/stent, or angioplasty/stent/atherectomy in the same leg may be reported with the appropriate add-on code (37264, 37266, 37268, 37270, 37272, 37274, 37276, 37278). An add-on code may only be reported for a distinct lesion in a different vessel, not a distinct lesion within the same vessel. If a lesion crosses from one vessel to another vessel, report only a single treatment code. A maximum of one angioplasty, stent, atherectomy, or stent/atherectomy add-on code may be reported in a unilateral femoral and popliteal vascular territory because there are only two vessels for coding purposes (the common femoral/profunda femoris and the superficial femoral/popliteal) that could be treated.
   - Add-on code 37279 may be reported for intravascular lithotripsy(ies) in the femoral and popliteal vascular territory, including all imaging guidance and radiological supervision and interpretation necessary to perform the intervention. A maximum of two intravascular lithotripsy add-on codes may be reported in a unilateral femoral and popliteal vascular territory because there are only two vessels for coding purposes (the common femoral/profunda femoris and the superficial femoral/popliteal) that could be treated.
3. ***Tibial and Peroneal Vascular Territory (37280-37295)*** includes the anterior tibial, posterior tibial, and peroneal arteries. For coding purposes, the tibioperoneal trunk is considered part of the posterior tibial or peroneal artery and not a separate vessel unless it is the only vessel treated.
   - The initial vessel in the tibial and peroneal vascular territory treated with angioplasty alone is reported with 37280 (straightforward lesion) or 37282 (complex lesion). The initial vessel in the tibial and peroneal vascular territory treated with angioplasty and stent placement is reported with 37284 (straightforward lesion) or 37286 (complex lesion). The initial vessel in the tibial and peroneal vascular territory treated with angioplasty and atherectomy is reported with 37288 (straightforward lesion) or 37290 (complex lesion). The initial vessel in the tibial and peroneal vascular territory treated with angioplasty, stent placement, and atherectomy is reported with 37292 (straightforward lesion) or 37294 (complex lesion).
   - Additional vessels in the tibial and peroneal vascular territory treated with angioplasty, angioplasty/stent, or angioplasty/stent/atherectomy in the same leg may be reported with the appropriate add-on code(s) (37281, 37283, 37285, 37287, 37289, 37291, 37293, 37295). An add-on code may only be reported for a distinct lesion in a different vessel, not a distinct lesion within the same vessel. If a lesion crosses from one vessel to another vessel, report only a single treatment code. A maximum of two angioplasty, stent, atherectomy, and/or stent/atherectomy add-on codes may be reported in a unilateral tibial and peroneal vascular territory because there are only three vessels for coding purposes (the anterior tibial artery, posterior tibial artery, and peroneal artery) that could be treated.

4. ***Inframalleolar Vascular Territory (37296, 37297, 37298, 37299)*** includes the dorsalis pedis and the plantar arteries. For coding purposes, the pedal arch is considered part of the dorsalis pedis or plantar arteries and not a separate vessel unless it is the only vessel treated.
    - The initial vessel in the inframalleolar vascular territory treated with angioplasty alone is reported with 37296 (straightforward lesion) or 37298 (complex lesion).
    - Additional vessels in the inframalleolar vascular territory treated with angioplasty in the same leg may be reported with the appropriate add-on code (37297, 37299). An add-on code may only be reported for a distinct lesion in a different vessel, not a distinct lesion within the same vessel. If a lesion crosses from one vessel to another vessel, report only a single treatment code. A maximum of one angioplasty add-on code may be reported in a unilateral inframalleolar vascular territory because there are only two vessels for coding purposes (the dorsalis pedis artery and plantar artery) that could be treated.

When treating multiple vessels in the same vascular territory, one primary lower extremity revascularization code (37254, 37256, 37258, 37260, 37263, 37265, 37267, 37269, 37271, 37273, 37275, 37277, 37280, 37282, 37284, 37286, 37288, 37290, 37292, 37294, 37296, 37298) is reported. Treatment of additional vessels within a vascular territory may be reported with add-on codes 37255, 37257, 37259, 37261, 37262, 37264, 37266, 37268, 37270, 37272, 37274, 37276, 37278, 37279, 37281, 37283, 37285, 37287, 37289, 37291, 37293, 37295, 37297, 37299, as appropriate. However, if a lesion extends across the margins of one vessel into another vessel in the same or adjacent vascular territory, but can be treated with a single therapy, the intervention should be reported with a single primary code for the more distal of the adjacent vessels. For example, if a unilateral lesion extends from the common iliac vessel to the external iliac vessel and a single angioplasty with stent placement is performed to open the entire lesion, report 37258, 37260, as appropriate (ie, do not report revascularization of both the common iliac and external iliac vessels). If discrete lesions (ie, not contiguous) are treated with a single therapy, the intervention should be reported with a single primary code. However, if discrete lesions (ie, not contiguous) in two territories are treated with two separate therapeutic maneuvers, both primary codes may be reported. For example, if a lesion is found in the common iliac vessel and a separate lesion is found in the midportion of the superficial femoral vessel and both lesions are treated with separate balloons, 37254 and 37263 may be reported.

When the same treatment in an initial vessel is performed in the same vascular territory of both legs in the same session, append modifier 50 to the initial vessel procedure code to denote a bilateral procedure. When the same treatment in an additional vessel is performed in the same vascular territory of both legs in the same session, report the add-on code for the same treatment additional vessel twice with modifier 59 appended to denote different legs are being treated. When different treatments in either the same or different vascular territory(ies) are performed in the same leg or each leg, append modifier 59 to denote distinct procedures.

Traversing a lower extremity occlusive lesion may include the use of multiple techniques or devices designed to cross arterial occlusions (eg, crossing catheters, re-entry devices, specialty wires). A procedure that does not result in successful crossing of a lesion and successful endovascular intervention is considered a diagnostic procedure and is reported using the appropriate catheterization and diagnostic angiography code(s). For example, an unsuccessful attempted crossing of an occluded 16-cm superficial femoral artery lesion from contralateral access would be reported as a diagnostic arteriogram (eg, 36247, 75710).

Intravascular ultrasound (eg, 37252, 37253) used during lower extremity arterial revascularization may be separately reported, when performed. Catheterization codes (36140, 36200, 36245, 36246, 36247, 36248) may not be additionally reported for diagnostic lower extremity angiography, when performed through the same access site, when therapy codes (37254-37299) are reported for the same session. However, catheterization for the diagnostic lower extremity angiogram may be reported separately if a different arterial puncture site is necessary. Diagnostic lower extremity arteriography performed at the time of an interventional procedure is separately reportable, only if:

1. No prior catheter-based angiographic study is available and a full diagnostic study is performed, and the decision to intervene is based on the diagnostic study, **or**
2. A prior study is available, but as documented in the medical record:
   a. The patient's condition with respect to the clinical indication has changed since the prior study, **or**
   b. There is inadequate visualization of the anatomy and/or pathology, **or**
   c. There is a clinical change during the procedure that requires new evaluation outside the target area of intervention.◀

Mechanical thrombectomy and/or thrombolysis in the lower extremity vessels are sometimes necessary to aid in restoring flow to areas of occlusive disease, and are reported separately.

▶*Iliac Vascular Territory*◀

#● 37254 Revascularization, endovascular, open or percutaneous, iliac vascular territory, with transluminal angioplasty, including all maneuvers necessary for accessing and selectively catheterizing the artery and crossing the lesion, including all imaging guidance and radiological supervision and interpretation necessary to perform the angioplasty within the same artery, unilateral; straightforward lesion, initial vessel

►Endovascular Revascularization, Transluminal Balloon Angioplasty (Other Than Central Nervous System, Coronary, Pulmonary, Lower Extremity for Occlusive Disease, and Dialysis Circuit When Approached Through Ipsilateral Dialysis Access)◄

►Codes 37246, 37247, 37248, 37249 describe open or percutaneous transluminal balloon angioplasty (eg, conventional, low profile, cutting, drug-coated balloon). Codes 37246, 37247 describe transluminal balloon angioplasty in an artery, excluding the central nervous system (61630, 61635), coronary (92920-92945, 0913T), pulmonary (92997, 92998), and lower extremities for occlusive disease (37254-37299). Codes 37248 and 37249 describe transluminal balloon angioplasty in a vein excluding the dialysis circuit (36902, 36905, 36907) when approached through the ipsilateral dialysis access. Transluminal balloon angioplasty is inherent to stenting in the extracranial carotid and innominate arteries (37215, 37216, 37217, 37218), peripheral arteries (37254-37299), and in peripheral veins (37238, 37239) and, therefore, is not separately reportable. Multiple angioplasties performed in a single vessel, including treatment of separate and distinct lesions within a single vessel, are reported with a single code. If a lesion extends across the margins of one vessel into another, but can be treated with a single therapy, the intervention should be reported only once. When additional, separate and distinct ipsilateral or contralateral vessels are treated in the same session, 37247 and/or 37249 may be reported as appropriate.◄

Non-selective and/or selective catheterization (eg, 36005, 36010, 36011, 36012, 36200, 36215, 36216, 36217, 36218, 36245, 36246, 36247, 36248) is reported separately. Codes 37246, 37247, 37248, 37249 include radiological supervision and interpretation directly related to the intervention performed and imaging performed to document completion of the intervention. Extensive repair or replacement of an artery may be reported separately (eg, 35226, 35286). Intravascular ultrasound may be reported separately (ie, 37252, 37253). Mechanical thrombectomy and/or thrombolytic therapy, when performed, may be reported separately (eg, 37184, 37185, 37186, 37187, 37188, 37211, 37212, 37213, 37214).

 # 37246 Transluminal balloon angioplasty (except lower extremity artery(ies) for occlusive disease, intracranial, coronary, pulmonary, or dialysis circuit), open or percutaneous, including all imaging and radiological supervision and interpretation necessary to perform the angioplasty within the same artery; initial artery

- *CPT Changes: An Insider's View* 2017

(Do not report 37248, 37249 in conjunction with 36836, 36837)

Transluminal Balloon Angioplasty

37246

A balloon catheter is inserted and advanced across the lesion into the narrowed portion of the vessel. The balloon is inflated to enlarge the diameter and restore normal blood flow.

(Do not report 37248, 37249 in conjunction with 37238, 37239 when performed in the same vein during the same operative session)

(Do not report 37248, 37249 in conjunction with 0505T, within the femoral-popliteal segment)

(Do not report 37248, 37249 in conjunction with 0620T within the tibial-peroneal segment)

(For transluminal balloon angioplasty in aorta/visceral artery[ies] in conjunction with fenestrated endovascular repair, see 34841, 34842, 34843, 34844, 34845, 34846, 34847, 34848)

(For transluminal balloon angioplasty in a dialysis circuit performed through the circuit, see 36902, 36903, 36904, 36905, 36906, 36907, 36908)

►(For transluminal balloon angioplasty to treat stenosis or occlusion in iliac, femoral, popliteal, tibial, peroneal, or inframalleolar artery[ies], see 37254, 37255, 37256, 37257, 37263, 37264, 37265, 37266, 37280, 37281, 37282, 37283, 37296, 37297, 37298, 37299)◄

(For transluminal balloon angioplasty in an intracranial artery, see 61630, 61635)

►(For transluminal balloon angioplasty in a coronary artery, see 92920-92945)◄

(For transluminal balloon angioplasty in a pulmonary artery, see 92997, 92998)

►Endovascular Revascularization, Transcatheter Intravascular Stent (Other Than Lower Extremity for Arterial Occlusive Disease, Cervical Carotid, Intracranial, Intracoronary Innominate and/or Intrathoracic Carotid, Extracranial Vertebral Artery, and Dialysis Circuit When Approached Through Ipsilateral Dialysis Access)◄

►Codes 37236-37239 are used to report endovascular revascularization for vessels other than lower extremity artery(ies) for occlusive disease (ie, 37254-37299), cervical carotid (ie, 37215, 37216), intracranial (ie, 61635), intracoronary (ie, 92920, 92924, 92928, 92930, 92933, 92937, 92941, 92943, 92945), innominate and/or intrathoracic carotid artery through an antegrade approach (37218), extracranial vertebral (ie, 0075T, 0076T) performed percutaneously and/or through an open surgical exposure, open retrograde intrathoracic common carotid or innominate (37217), or dialysis circuit when performed through the dialysis circuit (36903, 36905, 36908).◄

Codes 37236, 37237 describe transluminal intravascular stent insertion in an artery while 37238, 37239 describe transluminal intravascular stent insertion in a vein. Multiple stents placed in a single vessel may only be reported with a single code. If a lesion extends across the margins of one vessel into another, but can be treated with a single therapy, the intervention should be reported only once. When additional, different vessels are treated in the same session, report 37237 and/or 37239 as appropriate. Each code in this family (37236-37239) includes any and all balloon angioplasty(s) performed in the treated vessel, including any pre-dilation (whether performed as a primary or secondary angioplasty), post-dilation following stent placement, treatment of a lesion outside the stented segment but in the same vessel, or use of larger/smaller balloon to achieve therapeutic result. Angioplasty in a separate and distinct vessel may be reported separately. Non-selective and/or selective catheterization(s) (eg, 36005, 36010-36015, 36200, 36215-36218, 36245-36248) is reported separately.

Codes 37236-37239 include radiological supervision and interpretation directly related to the intervention(s) performed, closure of the arteriotomy by pressure, application of an arterial closure device or standard closure of the puncture by suture, and imaging performed to document completion of the intervention in addition to the intervention(s) performed. Extensive repair or replacement of an artery may be reported separately (eg, 35226 or 35286). Report 76937 for ultrasound guidance for vascular access, when performed in conjunction with 37236-37239. Intravascular ultrasound may be reported separately (ie, 37252, 37253). For mechanical thrombectomy and/or thrombolytic therapy, when performed, see 37184-37188, 37211-37214.

Intravascular stents, both covered and uncovered, are a class of devices that may be used as part of an embolization procedure. As such, there is the potential for overlap among codes used for placement of vascular stents and those used for embolization. When a stent is placed for the purpose of providing a latticework for deployment of embolization coils, such as for embolization of an aneurysm, the embolization code is reported and not the stent code. If a covered stent is deployed as the sole management of an aneurysm, pseudoaneurysm, or vascular extravasation, then the stent deployment code should be reported and not the embolization code.

37236 Transcatheter placement of an intravascular stent(s) (except lower extremity artery(s) for occlusive disease, cervical carotid, extracranial vertebral or intrathoracic carotid, intracranial, or coronary), open or percutaneous, including radiological supervision and interpretation and including all angioplasty within the same vessel, when performed; initial artery

(For transcatheter placement of an intravascular stent[s] within central dialysis segment when performed through the dialysis circuit, use 36908)

Vascular Embolization and Occlusion

►Codes 37241-37244 are used to describe vascular embolization and occlusion procedures, excluding the central nervous system and the head and neck, which are reported using 61624, 61626, and 61710, and excluding the ablation/sclerotherapy procedures for venous insufficiency/telangiectasia of the extremities/skin, which are reported using 36468, 36470, and 36471. Embolization and occlusion procedures are performed for a wide variety of clinical indications and in a range of vascular territories. Arteries, veins, and lymphatics may all be the target of embolization.◄

The embolization codes include all associated radiological supervision and interpretation, intra-procedural guidance and road-mapping, and imaging necessary to document completion of the procedure. They do not include diagnostic angiography and all necessary catheter placement(s). Code(s) for catheter placement(s) may be separately reported using selective catheter placement code(s), if used consistent with guidelines. Code(s) for diagnostic angiography may also be separately reported, when performed according to guidelines for diagnostic angiography during endovascular procedures, using the appropriate diagnostic angiography codes. Report these services with an appropriate modifier (eg, modifier 59). Please see the guidelines on the reporting of diagnostic angiography preceding 75600 in the **Vascular Procedures, Aorta and Arteries** section.

Code 37241 is used to report endovascular embolization or occlusion procedures performed for venous conditions other than hemorrhage or hemodialysis access. Examples include embolization of venous malformations, capillary hemangiomas, varicoceles, and visceral varices. (For endovascular embolization or occlusion of side branch[es] of an outflow vein[s] from a hemodialysis access, use 36909.)

Code 37242 is used to report vascular embolization or occlusion performed for arterial conditions other than hemorrhage or tumor such as arteriovenous malformations and arteriovenous fistulas whether congenital or acquired. Embolizations of aneurysms and pseudoaneurysms are also reported with 37242. Tumor embolization is reported with 37243. Note that injection to treat an extremity pseudoaneurysm is correctly reported with 36002. Sometimes, embolization and occlusion of an artery are performed prior to another planned interventional procedure; an example is embolization of the left gastric artery prior to planned implantation of a hepatic artery chemotherapy port. The artery embolization is reported with 37242.

Code 37243 is used to report embolization for the purpose of tissue ablation and organ infarction or ischemia. This can be performed in many clinical circumstances, including embolization of benign or malignant tumors of the liver, kidney, uterus, or other organs. When chemotherapy is given as part of an embolization procedure, additional codes (eg, 96420) may be separately reported. When a radioisotope (eg, Yttrium-90) is injected as part of an embolization, then additional codes (eg, 79445) may be separately reported. Uterine fibroid embolization is reported with 37243.

Code 37244 is used to report embolization for treatment of hemorrhage or vascular or lymphatic extravasation. Examples include embolization for management of gastrointestinal bleed, trauma-induced hemorrhage of the viscera or pelvis, embolization of the thoracic duct for chylous effusion and bronchial artery embolization for hemoptysis. Embolization of the uterine arteries for management of hemorrhage (eg, postpartum hemorrhage) is also reported with 37244.

Intravascular stents, both covered and uncovered, are a class of devices that may be used as part of an embolization procedure. As such, there is the potential for overlap among codes used for placement of vascular stents and those used for embolization. When a stent is placed for the purpose of providing a latticework for deployment of embolization coils, such as for embolization of an aneurysm, the embolization code is reported and not the stent code. If a stent is deployed as the sole management of an aneurysm, pseudoaneurysm, or vascular extravasation, then the stent deployment code should be reported and not the embolization code.

Only one embolization code should be reported for each surgical field (ie, the area immediately surrounding and directly involved in a treatment/procedure). Embolization procedures performed at a single setting and including multiple surgical fields (eg, a patient with multiple trauma and bleeding from the pelvis and the spleen) may be reported with multiple embolization codes with the appropriate modifier (eg, modifier 59).

There may be overlapping indications for an embolization procedure. The code for the immediate indication for the embolization should be used. For instance, if the immediate cause for embolization is bleeding in a patient with an aneurysm, report 37244.

37241 Vascular embolization or occlusion, inclusive of all radiological supervision and interpretation, intraprocedural roadmapping, and imaging guidance necessary to complete the intervention; venous, other than hemorrhage (eg, congenital or acquired venous malformations, venous and capillary hemangiomas, varices, varicoceles)

37249 Code is out of numerical sequence. See 37217-37237

Intravascular Ultrasound Services

Intravascular ultrasound (IVUS) services include all transducer manipulations and repositioning within the specific vessel being examined during a diagnostic procedure or before, during, and/or after therapeutic intervention (eg, stent or stent graft placement, angioplasty, atherectomy, embolization, thrombolysis, transcatheter biopsy).

IVUS is included in the work described by codes 37191, 37192, 37193, 37197 (intravascular vena cava [IVC] filter placement, repositioning and removal, and intravascular foreign body retrieval) and should not be separately reported with those procedures. If a lesion extends across the margins of one vessel into another, this should be reported with a single code despite imaging more than one vessel.

Non-selective and/or selective vascular catheterization may be separately reportable (eg, 36005-36248).

+ 37252 Intravascular ultrasound (noncoronary vessel) during diagnostic evaluation and/or therapeutic intervention, including radiological supervision and interpretation; initial noncoronary vessel (List separately in addition to code for primary procedure)

Introduction

38200 Injection procedure for splenoportography

(For radiological supervision and interpretation, use 75810)

General

Cellular and Gene Therapies

Cellular and gene therapies involve the collection, processing and handling of cells or other tissues, genetic modification of those cells or tissues, and administration of the genetically modified cells or tissues with the intent to treat, modify, reverse, or cure a serious or life-threatening disease or condition.

Codes 38225, 38226, 38227, 38228 describe the various steps required to collect, prepare, transport, receive, and administer genetically modified T cells. The collection and handling code (38225) may be reported only once per day, regardless of the number of collections or quantity of cells collected. Similarly, the administration code (38228) may only be reported once per day, regardless of the number of units administered. The development of genetically modified cells is not reported with this family of codes.

Chimeric antigen receptor therapy (CAR-T) with genetically modified T cells begins with the collection of cells from the patient by peripheral blood leukocyte cell harvesting. The cells are then cryopreserved and/or otherwise prepared for processing or shipping to a manufacturing or cell-processing facility, if applicable, where gene modification and expansion of the cells are performed. When gene modification and expansion of the cells by the manufacturer are complete, the genetically modified cells are returned to the physician or other qualified health care professional when additional preparation occurs, including thawing of the cryopreserved CAR-T cells, if necessary, before the cells are administered to the patient.

The procedure to administer CAR-T cells includes physician or other qualified health care professional monitoring of multiple physiologic parameters, verification of cell processing, evaluation of the patient during, as well as immediately before and after the administration of the CAR-T cells, direct supervision of clinical staff, and management of any adverse events during the administration. Care on the same date of service that is not directly related to the service of administration of the CAR-T cells (eg, care provided after the administration is complete, care for the patient's underlying condition or other medical problems) may be separately reported using the appropriate evaluation and management code with modifier 25. Management of uncomplicated adverse events (eg, nausea, urticaria) during the infusion is not reported separately.

The fluid used to administer the cells and other infusions for incidental hydration (eg, 96360, 96361) are not reported separately. Similarly, infusion(s) of any supportive medication(s) (eg, steroids) concurrently with the CAR-T cell administration are not reported separately. However, hydration or administration of medications (eg, antibiotics, opioids) unrelated to the CAR-T administration may be reported separately with modifier 59.

(For administration of drugs, agents and biologic response modifiers, see Chemotherapy and Other Highly Complex Drug or Highly Complex Biologic Agent Administration)

(For transplant services/procedures, see Bone Marrow or Stem Cell Services/Procedures)

 # 38225 Chimeric antigen receptor T-cell (CAR-T) therapy; harvesting of blood-derived T lymphocytes for development of genetically modified autologous CAR-T cells, per day

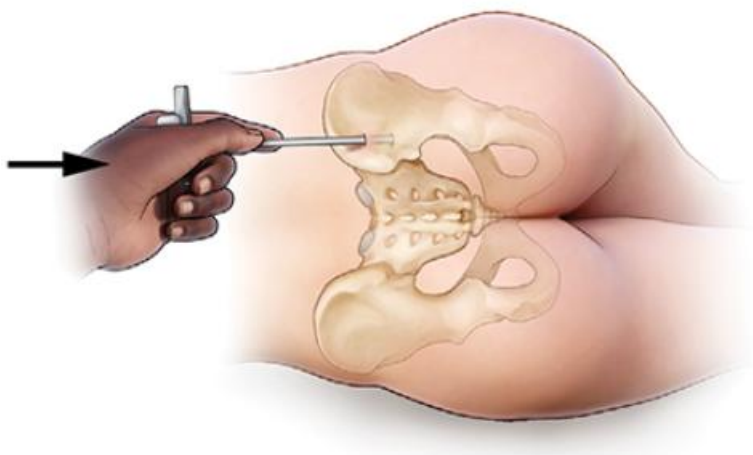
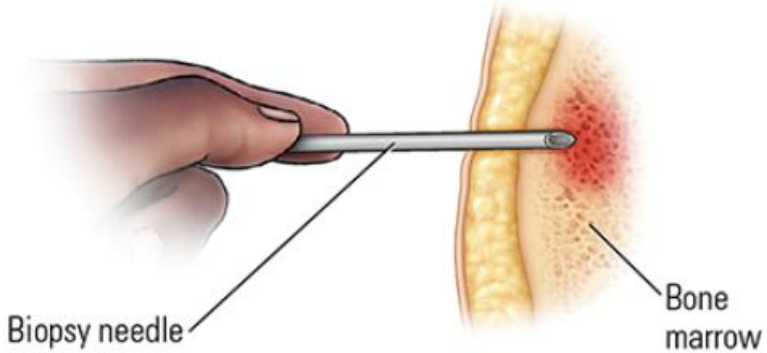
38230 Bone marrow harvesting for transplantation; allogeneic



- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Apr 96:1, Jun 09:3, May 12:11, Oct 13:3



Bone Marrow Harvesting for Transplantation

38230

A biopsy needle is inserted into the marrow cavity of the iliac crest and bone marrow is removed from the donor.

38232 autologous

CPT Changes: An Insider's View 2012

CPT Assistant Oct 13:3

(For autologous and allogeneic blood-derived peripheral stem cell harvesting for transplantation, see 38205, 38206)

(For diagnostic bone marrow aspiration[s], see 38220, 38222)

(For aspiration of bone marrow for bone graft, spine surgery only, use 20939)

(For bone marrow aspiration[s] for platelet-rich stem cell injection, use 0232T)

Transplantation and Post-Transplantation Cellular Infusions

Hematopoietic cell transplantation (HCT) refers to the infusion of hematopoietic progenitor cells (HPC) obtained from bone marrow, peripheral blood apheresis, and/or umbilical cord blood. These procedure codes (38240-38243) include physician monitoring of multiple physiologic parameters, physician verification of cell processing, evaluation of the patient during as well as immediately before and after the HPC/lymphocyte infusion, physician presence during the HPC/lymphocyte infusion with associated direct physician supervision of clinical staff, and management of uncomplicated adverse events (eg, nausea, urticaria) during the infusion, which is not separately reportable.

HCT may be autologous (when the HPC donor and recipient are the same person) or allogeneic (when the HPC donor and recipient are not the same person). Code 38241 is used to report any autologous transplant while 38240 is used to report an allogeneic transplant. In some cases allogeneic transplants involve more than one donor and cells from each donor are infused sequentially whereby one unit of 38240 is reported for each donor infused. Code 38242 is used to report a donor lymphocyte infusion. Code 38243 is used to report a HPC boost from the original allogeneic HPC donor. A lymphocyte infusion or HPC boost can occur days, months or even years after the initial hematopoietic cell transplant. HPC boost represents an infusion of hematopoietic progenitor cells from the original donor that is being used to treat post-transplant cytopenia(s). Codes 38240, 38242, and 38243 should not be reported together on the same date of service.

If a separately identifiable evaluation and management service is performed on the same date of service, the appropriate E/M service code, including office or other outpatient services, established (99211-99215), hospital inpatient or observation care services (99221-99223, 99231-99239), and inpatient neonatal and pediatric critical care (99471, 99472, 99475, 99476), may be reported using modifier 25 in addition to 38240, 38242 or 38243. Post-transplant infusion management of adverse reactions is reported separately using the appropriate E/M, prolonged service or critical care code(s). In accordance with place of service and facility reporting guidelines, the fluid used to administer the cells and other infusions for incidental hydration (eg, 96360, 96361) are not separately reportable. Similarly, infusion(s) of any medication(s) concurrently with the transplant infusion are not separately reportable. However, hydration or administration of medications (eg, antibiotics, narcotics) unrelated to the transplant are separately reportable using modifier 59.

38240 Hematopoietic progenitor cell (HPC); allogeneic transplantation per donor

38530 open, internal mammary node(s)

CPT Changes: An Insider's View 2001
CPT Assistant May 98:10, Jul 99:6, Aug 10:6, Apr 14:11, Feb 19:8, Feb 22:13-14

(Do not report 38530 with 38720-38746)

(For percutaneous needle biopsy, retroperitoneal lymph node or mass, use 49180)

(For fine needle aspiration biopsy, retroperitoneal lymph node or mass, see 10005, 10006, 10007, 10008, 10009, 10010, 10011, 10012)

38531 open, inguinofemoral node(s)

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Feb 19:8

(For bilateral procedure, report 38531 with modifier 50)

38542 Dissection, deep jugular node(s)

- *CPT Assistant* Jul 99:7, Aug 10:6

(For radical cervical neck dissection, use 38720)

38550 Excision of cystic hygroma, axillary or cervical; without deep neurovascular dissection

38555 with deep neurovascular dissection

Limited Lymphadenectomy for Staging

38562 Limited lymphadenectomy for staging (separate procedure); pelvic and para-aortic

- *CPT Assistant* Mar 01:10

(When combined with prostatectomy, use 55812 or 55842)

(When combined with insertion of radioactive substance into prostate, use 55862)

38564 retroperitoneal (aortic and/or splenic)

Laparoscopy

►Surgical laparoscopy always includes diagnostic laparoscopy. To report a diagnostic laparoscopy (separate procedure), use 49320.◄

38570 Laparoscopy, surgical; with retroperitoneal lymph node sampling (biopsy), single or multiple

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:21, Mar 00:8

38571 with bilateral total pelvic lymphadenectomy

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:21, Mar 00:8

38572 with bilateral total pelvic lymphadenectomy and peri-aortic lymph node sampling (biopsy), single or multiple

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:21, Jan 15:14

(For drainage of lymphocele to peritoneal cavity, use 49323)

38573 with bilateral total pelvic lymphadenectomy and peri-aortic lymph node sampling, peritoneal washings, peritoneal biopsy(ies), omentectomy, and diaphragmatic washings, including diaphragmatic and other serosal biopsy(ies), when performed

- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Apr 18:11, Mar 19:5

(Do not report 38573 in conjunction with 38562, 38564, 38570, 38571, 38572, 38589, 38770, 38780, 49255, 49320, 49326, 58541, 58542, 58543, 58544, 58548, 58550, 58552, 58553, 58554)

►(Do not report 38570, 38571, 38572, 38573 in conjunction with 55866, 55868, 55869)◄

38589 Unlisted laparoscopy procedure, lymphatic system

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:21, Mar 00:8, Apr 18:11

Radical Lymphadenectomy (Radical Resection of Lymph Nodes)

(For limited pelvic and retroperitoneal lymphadenectomies, see 38562, 38564)

38700 Suprahyoid lymphadenectomy

- *CPT Assistant* Aug 02:8, Aug 10:3

(For bilateral procedure, report 38700 with modifier 50)

38720 Cervical lymphadenectomy (complete)

- *CPT Assistant* Oct 01:10, Aug 02:8, Aug 10:4, Apr 20:10

(For bilateral procedure, report 38720 with modifier 50)

38724 Cervical lymphadenectomy (modified radical neck dissection)

- *CPT Assistant* Jan 01:13, Aug 02:8, Aug 10:4, Dec 12:3, Mar 19:11

38740 Axillary lymphadenectomy; superficial

- *CPT Assistant* Apr 14:11

38745 complete

+ 38746 Thoracic lymphadenectomy by thoracotomy, mediastinal and regional lymphadenectomy (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Sep 12:3, May 14:3

(On the right, mediastinal lymph nodes include the paratracheal, subcarinal, paraesophageal, and inferior pulmonary ligament)

(On the left, mediastinal lymph nodes include the aortopulmonary window, subcarinal, paraesophageal, and inferior pulmonary ligament)

(Report 38746 in conjunction with 21601, 31760, 31766, 31786, 32096-32200, 32220-32320, 32440-32491, 32503-32505, 33025, 33030, 33050-33130, 39200-39220, 39560, 39561, 43101, 43112, 43117, 43118, 43122, 43123, 43351, 60270, 60505)

(To report mediastinal and regional lymphadenectomy via thoracoscopy [VATS], see 32674)

+ 38747 Abdominal lymphadenectomy, regional, including celiac, gastric, portal, peripancreatic, with or without para-aortic and vena caval nodes (List separately in addition to code for primary procedure)

- *CPT Assistant* Nov 98:15, Apr 20:10

38760 Inguinofemoral lymphadenectomy, superficial, including Cloquet's node (separate procedure)

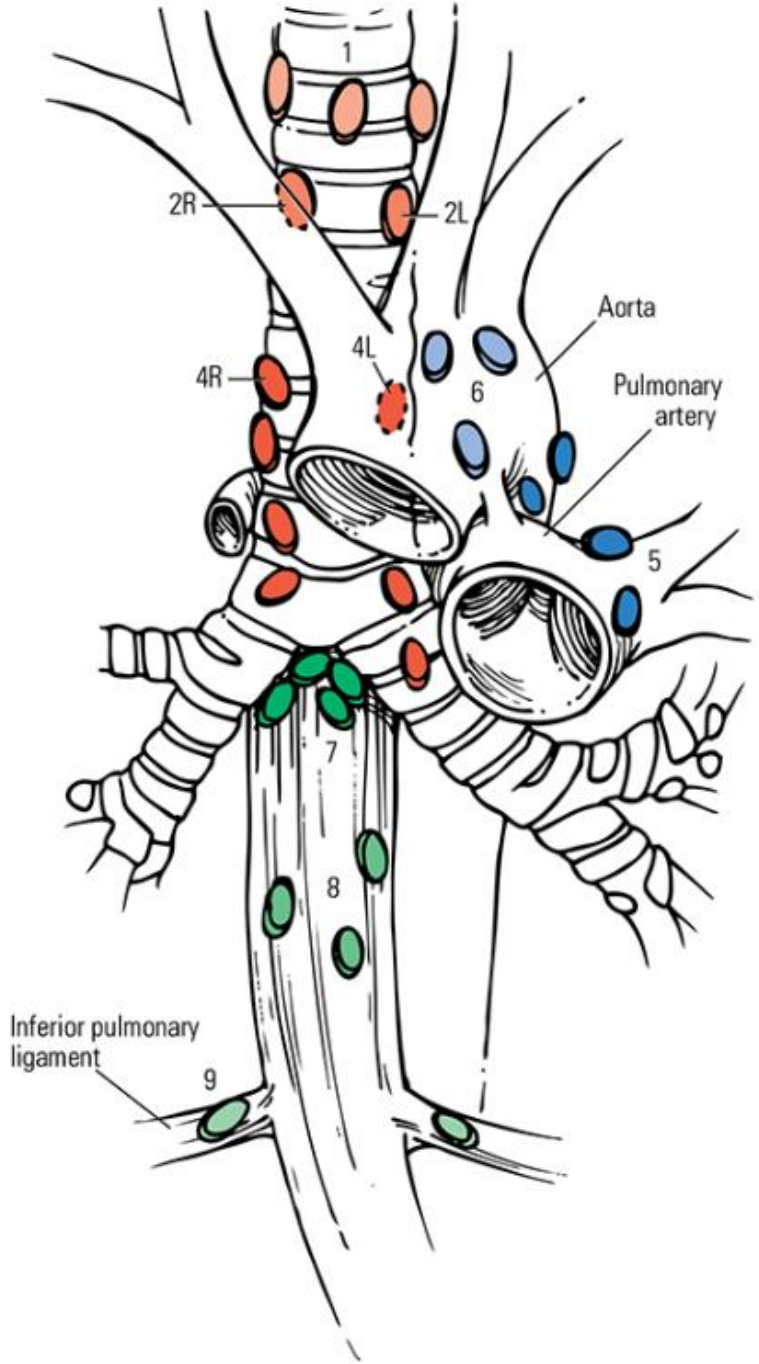
(For bilateral procedure, report 38760 with modifier 50)

38765 Inguinofemoral lymphadenectomy, superficial, in continuity with pelvic lymphadenectomy, including external iliac, hypogastric, and obturator nodes (separate procedure)

(For bilateral procedure, report 38765 with modifier 50)

38770 Pelvic lymphadenectomy, including external iliac, hypogastric, and obturator nodes (separate procedure)

(For bilateral procedure, report 38770 with modifier 50)



38780 Retroperitoneal transabdominal lymphadenectomy, extensive, including pelvic, aortic, and renal nodes (separate procedure)

(For excision and repair of lymphedematous skin and subcutaneous tissue, see 15004-15005, 15570-15650)

Mediastinal Lymph Nodes: Station Number and Descriptions

38746

Relevant mediastinal lymph nodes typically removed with procedures described by code 38746, and sampled removal described with code 39402.

Station #	Lymph Node Descriptions
1	Low cervical, supraclavicular, and sternal notch
2	Upper paratracheal (R & L)
4	Lower paratracheal (R & L)
5	Subaortic or aortopulmonary window
6	Para-aortic
7	Subcarinal
8	Paraesophageal (below the carina)
9	Inferior pulmonary ligament
*Station #3 is not depicted as it is not applicable to the use of codes 32674, 38746, or 39402.	

Introduction

38790 Injection procedure; lymphangiography

CPT Assistant Jul 99:6, Apr 21:14

Clinical Examples in Radiology Summer 15:8, Winter 21:12, Winter 23:19

(For bilateral procedure, report 38790 with modifier 50)

(For radiological supervision and interpretation, see 75801-75807)

38792 radioactive tracer for identification of sentinel node

CPT Changes: An Insider's View 2008, 2012

CPT Assistant Nov 98:15, Jul 99:6, Dec 99:8, Sep 08:5, Mar 15:5

Clinical Examples in Radiology Summer 24:12

(For excision of sentinel node, see 38500-38542)

(For nuclear medicine lymphatics and lymph gland imaging, use 78195)

(For intraoperative identification (eg, mapping) of sentinel lymph node(s) including injection of non-radioactive dye, see 38900)

38794 Cannulation, thoracic duct

Other Procedures

+ 38900 Intraoperative identification (eg, mapping) of sentinel lymph node(s) includes injection of non-radioactive dye, when performed (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2011

CPT Assistant Mar 15:5, Feb 19:8

(Use 38900 in conjunction with 19302, 19307, 38500, 38510, 38520, 38525, 38530, 38531, 38542, 38562, 38564, 38570, 38571, 38572, 38740, 38745, 38760, 38765, 38770, 38780, 56630, 56631, 56632, 56633, 56634, 56637, 56640)

(For injection of radioactive tracer for identification of sentinel node, use 38792)

38999 Unlisted procedure, hemic or lymphatic system

CPT Assistant May 98:10, Oct 21:14, Sep 23:51

Mediastinum and Diaphragm

Mediastinum

Incision

39000 Mediastinotomy with exploration, drainage, removal of foreign body, or biopsy; cervical approach

39010 transthoracic approach, including either transthoracic or median sternotomy

CPT Assistant Jan 13:6, Jan 14:5

(Do not report 39010 in conjunction with 33955, 33956, 33963, 33964)

(For VATS pericardial biopsy, use 32604)

Excision/Resection

39200 Resection of mediastinal cyst

CPT Changes: An Insider's View 2012

39220 Resection of mediastinal tumor

CPT Changes: An Insider's View 2012

(For substernal thyroidectomy, use 60270)

(For thymectomy, use 60520)

(For thoracoscopic [VATS] resection of mediastinal cyst, tumor, or mass, use 32662)

Endoscopy

39401 Mediastinoscopy; includes biopsy(ies) of mediastinal mass (eg, lymphoma), when performed

CPT Changes: An Insider's View 2016

CPT Assistant Jun 16:4

39402 with lymph node biopsy(ies) (eg, lung cancer staging)

CPT Changes: An Insider's View 2016

CPT Assistant Jun 16:4

Other Procedures

39499 Unlisted procedure, mediastinum

Diaphragm

Other Procedures

39499 Unlisted procedure, mediastinum

Diaphragm

Repair

(For transabdominal repair of diaphragmatic [esophageal hiatal] hernia, use 43325)

(For laparoscopic repair of diaphragmatic [esophageal hiatal] hernias and fundoplication, see 43280, 43281, 43282)

39501 Repair, laceration of diaphragm, any approach

CPT Assistant Nov 00:3, Dec 14:16

(For laparoscopic paraesophageal hernia repair, see 43281, 43282)

39503 Repair, neonatal diaphragmatic hernia, with or without chest tube insertion and with or without creation of ventral hernia

CPT Assistant Feb 12:3

(Do not report modifier 63 in conjunction with 39503)

(For laparoscopic paraesophageal hernia repair, see 43281, 43282)

39540 Repair, diaphragmatic hernia (other than neonatal), traumatic; acute

CPT Assistant Nov 00:9, Jun 08:3

39541 chronic

39545 Imbrication of diaphragm for eventration, transthoracic or transabdominal, paralytic or nonparalytic

CPT Assistant Nov 00:3

39560 Resection, diaphragm; with simple repair (eg, primary suture)

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:21, Nov 00:3

39561 with complex repair (eg, prosthetic material, local muscle flap)

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:21, Nov 00:3

Other Procedures

39599 Unlisted procedure, diaphragm

(For laparoscopic insertion or replacement of a permanent synchronized diaphragmatic stimulation system, see 0674T, 0675T, 0680T)

Surgery

Digestive System (40490-49999)

The following is a listing of headings and subheadings that appear within the Digestive System section of the CPT codebook. The subheadings or subsections denoted with asterisks (*) below have special instructions unique to that subsection. Where these are indicated, special notes or guidelines will be presented preceding those procedural terminology listings, referring to that subsection specifically. Note that all code ranges in each subsection are listed as they appear in the subsection, even if the code numbers are out of numerical sequence and/or repeated in the next subsection.

Lips (40490-40799)

- Excision (40490-40530)
- Repair (Cheiloplasty) (40650-40761)
- Other Procedures (40799)

Vestibule of Mouth* (40800-40899)

- Incision (40800-40806)
- Excision, Destruction (40808-40820)
- Repair (40830-40845)
- Other Procedures (40899)

Tongue and Floor of Mouth (41000-41599)

- Incision (41000-41019)
- Excision (41100-41155)
- Repair (41250-41252)
- Other Procedures (41510-41599)

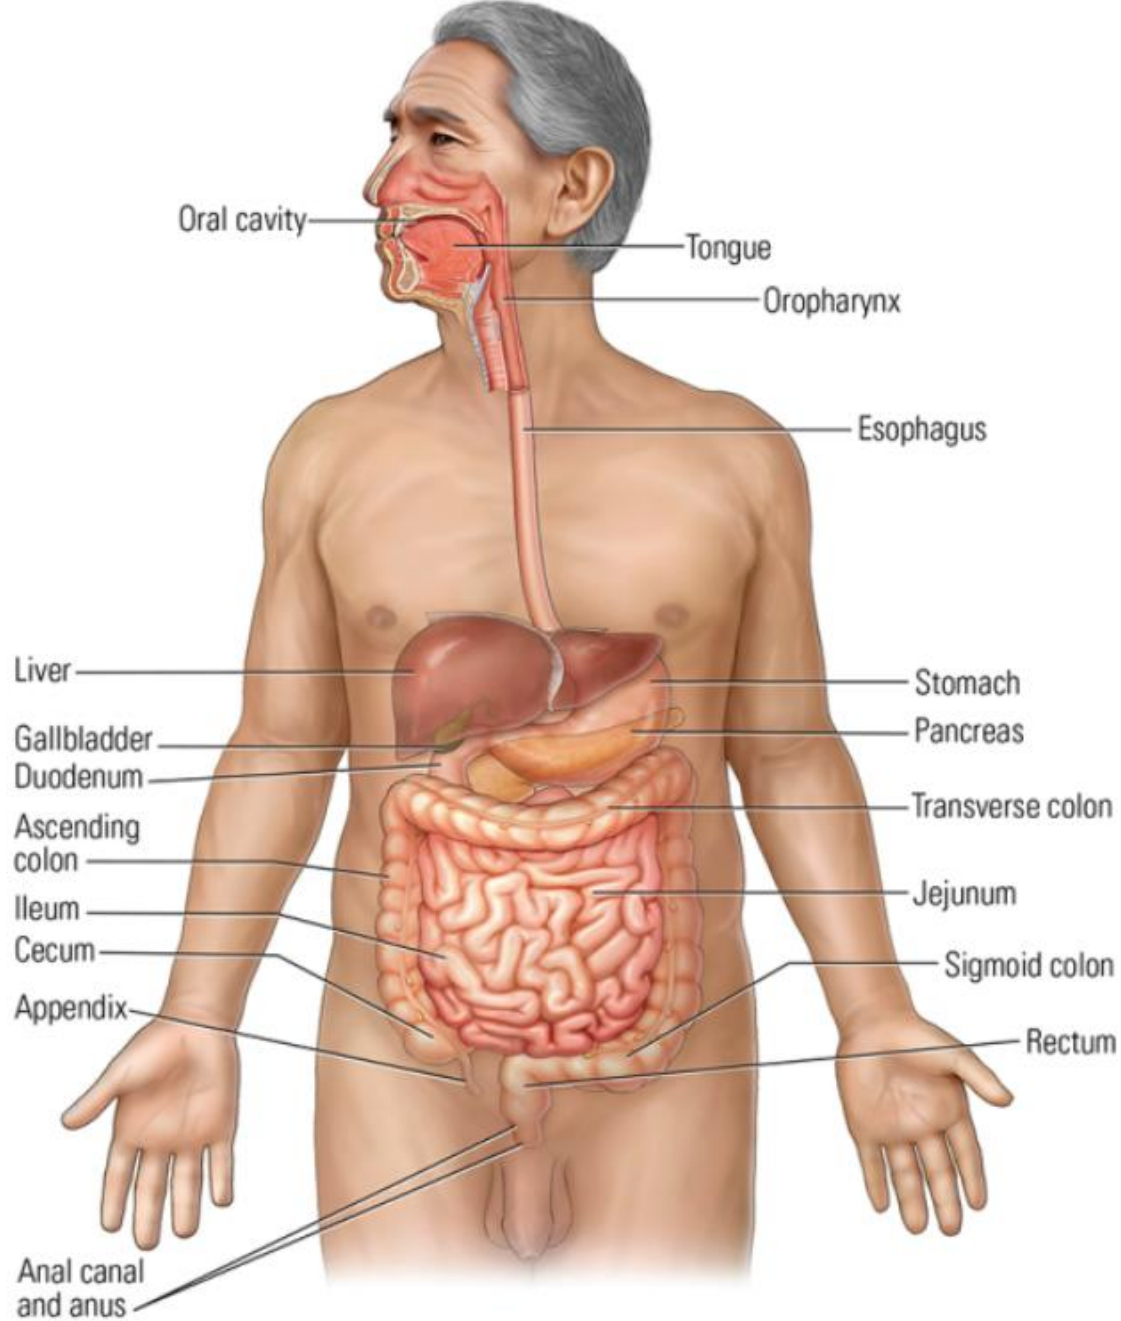
Dentoalveolar Structures (41800-41899)

- Incision (41800-41806)
- Excision, Destruction (41820-41850)
- Other Procedures (41870-41899)

Palate and Uvula (42000-42299)

- Incision (42000)
- Excision, Destruction (42100-42160)
- Repair (42180-42281)
- Other Procedures (42299)

Salivary Gland and Ducts (42300-42699)



- Incision (42300-42340)
- Excision (42400-42450)
- Repair (42500-42510)
- Other Procedures (42550-42699)

Pharynx, Adenoids, and Tonsils (42700-42999)

- Incision (42700-42725)
- Excision, Destruction (42800-42894)
- Repair (42900-42953)
- Other Procedures (42955-42999)

Esophagus (43020-43499)

- **Incision (43020-43045)**
- **Excision (43100-43135)**
- **Endoscopy* (43180-43273)**
  - **Esophagoscopy (43180-43232)**
  - **Esophagogastroduodenoscopy* (43235-43210)**
  - **Endoscopic Retrograde Cholangiopancreatography (ERCP)* (43260-43273)**

Digestive System

- Laparoscopy* (43279-43289)
- Repair (43300-43425)

- Other Procedures (43496-43499)

Stomach (43500-43999)
- Incision (43500-43520)
- Excision (43605-43641)
- Laparoscopy* (43644-43659)
- Introduction (43752-43763)
- Bariatric Surgery* (43770-43775)
  - Laparoscopy* (43770-43775)
- Other Procedures (43800-43999)

Intestines (Except Rectum) (44005-44799)
- Incision (44005-44055)
- Excision* (44100-44160)
- Laparoscopy* (44180-44238)
  - Incision (44180)
  - Enterostomy—External Fistulization of Intestines (44186-44188)
  - Excision (44202-44213)
  - Repair (44227)
  - Other Procedures (44238)
- Enterostomy—External Fistulization of Intestines (44300-44346)
- Endoscopy, Small Intestine* (44360-44379)
- Endoscopy, Stomal* (44380-44408)
- Introduction (44500)
- Repair (44602-44680)
- Other Procedures (44700-44799)

Meckel's Diverticulum and the Mesentery (44800-44899)
- Excision (44800-44820)
- Suture (44850)
- Other Procedures (44899)

Appendix (44900-44979)
- Incision (44900)
- Excision (44950-44960)
- Laparoscopy* (44970-44979)

Colon and Rectum (45000-45999)
- Incision (45000-45020)
- Excision (45100-45172)
- Destruction (45190)
- Endoscopy* (45300-45398)
- Laparoscopy* (45395-45499)
  - Excision (45395-45397)
  - Repair (45400-45499)
- Repair (45500-45825)
- Manipulation (45900-45915)
- Other Procedures* (45399-45999)

Anus* (46020-46999)
- Incision (46020-46083)
- Excision (46200-46288)
- Introduction (46500-46505)
- Endoscopy* (46600-46615)
- Repair (46700-46947)
- Destruction (46900-46942)
- Other Procedures (46999)

Liver (47000-47399)
- Incision (47000-47015)
- Excision (47100-47130)
- Liver Transplantation* (47133-47147)
- Repair (47300-47362)
- Laparoscopy* (47370-47379)
- Other Procedures (47380-47399)

Biliary Tract (47400-47999)
- Incision (47400-47480)
- Introduction* (47490-47544)
- Endoscopy* (47550-47556)
- Laparoscopy* (47562-47579)
- Excision (47600-47715)
- Repair (47720-47900)
- Other Procedures (47999)

Pancreas (48000-48999)
- Incision (48000-48020)
- Excision (48100-48160)

Digestive System

Lips

(For procedures on skin of lips, see 10040 et seq)

Excision

40490 Biopsy of lip
40500 Vermilionectomy (lip shave), with mucosal advancement
40510 Excision of lip; transverse wedge excision with primary closure
40520 V-excision with primary direct linear closure

(For excision of mucous lesions, see 40810-40816)

40525 full thickness, reconstruction with local flap (eg, Estlander or fan)
40527 full thickness, reconstruction with cross lip flap (Abbe-Estlander)
40530 Resection of lip, more than one-fourth, without reconstruction

(For reconstruction, see 13131 et seq)

Repair (Cheiloplasty)

40650 Repair lip, full thickness; vermilion only
CPT Assistant Jul 00:10, Nov 16:7
40652 up to half vertical height
CPT Assistant Jul 00:10, Nov 16:7
40654 over one-half vertical height, or complex
CPT Assistant Nov 16:7
40700 Plastic repair of cleft lip/nasal deformity; primary, partial or complete, unilateral
CPT Assistant Dec 14:18
40701 primary bilateral, 1-stage procedure
40702 primary bilateral, 1 of 2 stages
40720 secondary, by recreation of defect and reclosure
CPT Assistant Dec 14:18

(For bilateral procedure, report 40720 with modifier 50)

(To report rhinoplasty only for nasal deformity secondary to congenital cleft lip, see 30460, 30462)

(For repair of cleft lip, with cross lip pedicle flap (Abbe-Estlander type), use 40527)

Digestive System

Lips

(For procedures on skin of lips, see 10040 et seq)

Excision

40490 Biopsy of lip
40500 Vermilionectomy (lip shave), with mucosal advancement
40510 Excision of lip; transverse wedge excision with primary closure
40520 V-excision with primary direct linear closure

(For excision of mucous lesions, see 40810-40816)

40525 full thickness, reconstruction with local flap (eg, Estlander or fan)
40527 full thickness, reconstruction with cross lip flap (Abbe-Estlander)
40530 Resection of lip, more than one-fourth, without reconstruction

(For reconstruction, see 13131 et seq)

Repair (Cheiloplasty)

40650 Repair lip, full thickness; vermilion only
CPT Assistant Jul 00:10, Nov 16:7
40652 up to half vertical height
CPT Assistant Jul 00:10, Nov 16:7
40654 over one-half vertical height, or complex
CPT Assistant Nov 16:7
40700 Plastic repair of cleft lip/nasal deformity; primary, partial or complete, unilateral
CPT Assistant Dec 14:18
40701 primary bilateral, 1-stage procedure
40702 primary bilateral, 1 of 2 stages
40720 secondary, by recreation of defect and reclosure
CPT Assistant Dec 14:18

(For bilateral procedure, report 40720 with modifier 50)

(To report rhinoplasty only for nasal deformity secondary to congenital cleft lip, see 30460, 30462)

(For repair of cleft lip, with cross lip pedicle flap (Abbe-Estlander type), use 40527)

40761 with cross lip pedicle flap (Abbe-Estlander type), including sectioning and inserting of pedicle

(For repair cleft palate, see 42200 et seq)

(For other reconstructive procedures, see 14060, 14061, 15120-15261, 15574, 15576, 15630)

Other Procedures

40799 Unlisted procedure, lips

Vestibule of Mouth

The vestibule is the part of the oral cavity outside the dentoalveolar structures; it includes the mucosal and submucosal tissue of lips and cheeks.

Incision

40800 Drainage of abscess, cyst, hematoma, vestibule of mouth; simple
40801 complicated
40804 Removal of embedded foreign body, vestibule of mouth; simple
40805 complicated
40806 Incision of labial frenum (frenotomy)

Excision, Destruction

40808 Biopsy, vestibule of mouth
40810 Excision of lesion of mucosa and submucosa, vestibule of mouth; without repair
40812 with simple repair
40814 with complex repair
40816 complex, with excision of underlying muscle
40818 Excision of mucosa of vestibule of mouth as donor graft
40819 Excision of frenum, labial or buccal (frenumectomy, frenulectomy, frenectomy)
CPT Assistant Aug 20:14
40820 Destruction of lesion or scar of vestibule of mouth by physical methods (eg, laser, thermal, cryo, chemical)

Repair

40830 Closure of laceration, vestibule of mouth; 2.5 cm or less
40831 over 2.5 cm or complex
40840 Vestibuloplasty; anterior
CPT Assistant Feb 25:25
40842 posterior, unilateral
40843 posterior, bilateral
40844 entire arch
40845 complex (including ridge extension, muscle repositioning)

(For skin grafts, see 15002 et seq)

Other Procedures

40899 Unlisted procedure, vestibule of mouth

Tongue and Floor of Mouth

Incision

41000 Intraoral incision and drainage of abscess, cyst, or hematoma of tongue or floor of mouth; lingual
41005 sublingual, superficial
41006 sublingual, deep, supramylohyoid
41007 submental space
41008 submandibular space
41009 masticator space
41010 Incision of lingual frenum (frenotomy)

CPT Assistant Sep 17:14, Nov 17:10, Aug 20:14

41015 Extraoral incision and drainage of abscess, cyst, or hematoma of floor of mouth; sublingual
41016 submental
41017 submandibular
41018 masticator space

(For frenoplasty, use 41520)

41019 Placement of needles, catheters, or other device(s) into the head and/or neck region (percutaneous, transoral, or transnasal) for subsequent interstitial radioelement application

CPT Changes: An Insider's View 2008

(For imaging guidance, see 76942, 77002, 77012, 77021)

(For stereotactic insertion of intracranial brachytherapy radiation sources, use 61770)

(For interstitial radioelement application, see 77770, 77771, 77772, 77778)

Excision

41100 Biopsy of tongue; anterior two-thirds
41105 posterior one-third
41108 Biopsy of floor of mouth
41110 Excision of lesion of tongue without closure
41112 Excision of lesion of tongue with closure; anterior two-thirds
41113 posterior one-third
41114 with local tongue flap

(Do not report 41114 in conjunction with 41112 or 41113)

41115 Excision of lingual frenum (frenectomy)

CPT Assistant Sep 17:14, Nov 17:10

41116 Excision, lesion of floor of mouth
41120 Glossectomy; less than one-half tongue

CPT Assistant Aug 10:10

41130 hemiglossectomy
CPT Assistant Aug 10:5
41135 partial, with unilateral radical neck dissection
CPT Assistant Aug 10:5
41140 complete or total, with or without tracheostomy, without radical neck dissection
CPT Assistant Aug 10:5
41145 complete or total, with or without tracheostomy, with unilateral radical neck dissection
CPT Assistant Aug 10:5
41150 composite procedure with resection floor of mouth and mandibular resection, without radical neck dissection
CPT Assistant Aug 10:5
41153 composite procedure with resection floor of mouth, with suprahyoid neck dissection
CPT Assistant Aug 10:3
41155 composite procedure with resection floor of mouth, mandibular resection, and radical neck dissection (Commando type)
CPT Assistant Jan 01:13, Aug 10:3

►(For cryolysis therapy for reduction of adipocytes or lymphatic structures in the soft palate, base of tongue, and lingual tonsil, see 0978T, 0979T, 0980T)◄

Repair

41250 Repair of laceration 2.5 cm or less; floor of mouth and/or anterior two-thirds of tongue
41251 posterior one-third of tongue
41252 Repair of laceration of tongue, floor of mouth, over 2.6 cm or complex

Other Procedures

41510 Suture of tongue to lip for micrognathia (Douglas type procedure)
CPT Assistant Aug 10:11
41512 Tongue base suspension, permanent suture technique
CPT Changes: An Insider's View 2009
CPT Assistant Aug 10:11, Aug 12:13

(For suture of tongue to lip for micrognathia, use 41510)
41520 Frenoplasty (surgical revision of frenum, eg, with Z-plasty)
CPT Assistant Sep 17:14, Nov 17:10, Aug 20:14

(For frenotomy, see 40806, 41010)
41530 Submucosal ablation of the tongue base, radiofrequency, 1 or more sites, per session
CPT Changes: An Insider's View 2009
CPT Assistant Aug 10:10

►(For cryolysis therapy for reduction of adipocytes or lymphatic structures in the soft palate, base of tongue, and lingual tonsil, see 0978T, 0979T, 0980T)◄
41599 Unlisted procedure, tongue, floor of mouth
CPT Assistant Dec 00:14
Clinical Examples in Radiology Fall 09:11

Dentoalveolar Structures

Incision

41800 Drainage of abscess, cyst, hematoma from dentoalveolar structures
41805 Removal of embedded foreign body from dentoalveolar structures; soft tissues
41806 bone

Excision, Destruction

41820 Gingivectomy, excision gingiva, each quadrant
41821 Operculectomy, excision pericoronal tissues
41822 Excision of fibrous tuberosities, dentoalveolar structures
41823 Excision of osseous tuberosities, dentoalveolar structures
41825 Excision of lesion or tumor (except listed above), dentoalveolar structures; without repair
41826 with simple repair
41827 with complex repair

(For nonexcisional destruction, use 41850)
41828 Excision of hyperplastic alveolar mucosa, each quadrant (specify)
41830 Alveolectomy, including curettage of osteitis or sequestrectomy
41850 Destruction of lesion (except excision), dentoalveolar structures

Other Procedures

41870 Periodontal mucosal grafting
41872 Gingivoplasty, each quadrant (specify)
41874 Alveoloplasty, each quadrant (specify)

(For closure of lacerations, see 40830, 40831)

(For segmental osteotomy, use 21206)

(For reduction of fractures, see 21421-21490)
41899 Unlisted procedure, dentoalveolar structures

Palate and Uvula

Incision

42000 Drainage of abscess of palate, uvula

Excision, Destruction

42100 Biopsy of palate, uvula
42104 Excision, lesion of palate, uvula; without closure
42106 with simple primary closure
42107 with local flap closure

(For skin graft, see 14040-14302)

(For mucosal graft, use 40818)
42120 Resection of palate or extensive resection of lesion

(For reconstruction of palate with extraoral tissue, see 14040-14302, 15050, 15120, 15240, 15576)

►(For cryolysis therapy for reduction of adipocytes or lymphatic structures in the soft palate, base of tongue, and lingual tonsil, see 0978T, 0979T, 0980T)◄
42140 Uvulectomy, excision of uvula
CPT Assistant Oct 24:14

►(For cryolysis therapy for reduction of adipocytes or lymphatic structures in the soft palate, base of tongue, and lingual tonsil, see 0978T, 0979T, 0980T)◄
42145 Palatopharyngoplasty (eg, uvulopalatopharyngoplasty, uvulopharyngoplasty)
CPT Assistant Dec 04:19

(For removal of exostosis of the bony palate, see 21031, 21032)

►(For cryolysis therapy for reduction of adipocytes or lymphatic structures in the soft palate, base of tongue, and lingual tonsil, see 0978T, 0979T, 0980T)◄
42160 Destruction of lesion, palate or uvula (thermal, cryo or chemical)
CPT Assistant Apr 10:10

Repair

42180 Repair, laceration of palate; up to 2 cm
42182 over 2 cm or complex
42200 Palatoplasty for cleft palate, soft and/or hard palate only
CPT Assistant Jul 14:8, Mar 15:9
42205 Palatoplasty for cleft palate, with closure of alveolar ridge; soft tissue only
42210 with bone graft to alveolar ridge (includes obtaining graft)
42215 Palatoplasty for cleft palate; major revision
42220 secondary lengthening procedure
42225 attachment pharyngeal flap
42226 Lengthening of palate, and pharyngeal flap
42227 Lengthening of palate, with island flap
42235 Repair of anterior palate, including vomer flap

(For repair of oronasal fistula, use 30600)
42260 Repair of nasolabial fistula

(For repair of cleft lip, see 40700 et seq)
42280 Maxillary impression for palatal prosthesis
42281 Insertion of pin-retained palatal prosthesis

Other Procedures

42299 Unlisted procedure, palate, uvula

CPT Assistant Dec 04:19, Apr 10:10, Nov 10:9, Jul 14:8

Salivary Gland and Ducts

Incision

42300 Drainage of abscess; parotid, simple

42305 parotid, complicated

42310 Drainage of abscess; submaxillary or sublingual, intraoral

CPT Changes: An Insider's View 2003

42320 submaxillary, external

42330 Sialolithotomy; submandibular (submaxillary), sublingual or parotid, uncomplicated, intraoral

42335 submandibular (submaxillary), complicated, intraoral

42340 parotid, extraoral or complicated intraoral

Excision

42400 Biopsy of salivary gland; needle

Clinical Examples in Radiology Winter 17:5

(For fine needle aspiration biopsy, see 10004, 10005, 10006, 10007, 10008, 10009, 10010, 10011, 10012, 10021)

(For evaluation of fine needle aspirate, see 88172, 88173)

(If imaging guidance is performed, see 76942, 77002, 77012, 77021)

42405 incisional

(If imaging guidance is performed, see 76942, 77002, 77012, 77021)

42408 Excision of sublingual salivary cyst (ranula)

42409 Marsupialization of sublingual salivary cyst (ranula)

42410 Excision of parotid tumor or parotid gland; lateral lobe, without nerve dissection

42415 lateral lobe, with dissection and preservation of facial nerve

42420 total, with dissection and preservation of facial nerve

CPT Assistant Aug 10:4

42425 total, en bloc removal with sacrifice of facial nerve

42426 total, with unilateral radical neck dissection

(For suture or grafting of facial nerve, see 64864, 64865, 69740, 69745)

42440 Excision of submandibular (submaxillary) gland

42450 Excision of sublingual gland

Repair

42500 Plastic repair of salivary duct, sialodochoplasty; primary or simple
42505 secondary or complicated
42507 Parotid duct diversion, bilateral (Wilke type procedure);
42509 with excision of both submandibular glands
42510 with ligation of both submandibular (Wharton's) ducts

Other Procedures

42550 Injection procedure for sialography
Clinical Examples in Radiology Fall 09:9

(For radiological supervision and interpretation, use 70390)
42600 Closure salivary fistula
42650 Dilation salivary duct
42660 Dilation and catheterization of salivary duct, with or without injection
42665 Ligation salivary duct, intraoral
42699 Unlisted procedure, salivary glands or ducts

Pharynx, Adenoids, and Tonsils

Incision

42700 Incision and drainage abscess; peritonsillar
CPT Assistant Apr 24:35
42720 retropharyngeal or parapharyngeal, intraoral approach
42725 retropharyngeal or parapharyngeal, external approach

Excision, Destruction

42800 Biopsy; oropharynx
42804 nasopharynx, visible lesion, simple
42806 nasopharynx, survey for unknown primary lesion

(For laryngoscopic biopsy, see 31510, 31535, 31536)
42808 Excision or destruction of lesion of pharynx, any method
CPT Assistant May 24:22
42809 Removal of foreign body from pharynx

42810 Excision branchial cleft cyst or vestige, confined to skin and subcutaneous tissues

42815 Excision branchial cleft cyst, vestige, or fistula, extending beneath subcutaneous tissues and/or into pharynx

42820 Tonsillectomy and adenoidectomy; younger than age 12

CPT Assistant Feb 98:11, Mar 08:15, May 08:14, Jun 21:14

42821 age 12 or over

CPT Assistant Aug 97:18, Feb 98:11, Mar 08:15, May 08:14, Jun 21:14

42825 Tonsillectomy, primary or secondary; younger than age 12

CPT Assistant Aug 97:18, Feb 98:11, Mar 08:15, Jun 21:14, Apr 24:35

42826 age 12 or over

CPT Assistant Aug 97:18, Feb 98:11, Mar 08:15, Apr 10:10, Jun 21:14, Sep 21:14, Apr 24:35

42830 Adenoidectomy, primary; younger than age 12

42831 age 12 or over

42835 Adenoidectomy, secondary; younger than age 12

42836 age 12 or over

CPT Assistant Feb 98:11, Nov 10:9

42842 Radical resection of tonsil, tonsillar pillars, and/or retromolar trigone; without closure

CPT Assistant Aug 10:6

42844 closure with local flap (eg, tongue, buccal)

CPT Assistant Aug 10:6

42845 closure with other flap

CPT Assistant Aug 10:6

(For closure with other flap(s), use appropriate number for flap(s))

(When combined with radical neck dissection, use also 38720)

42860 Excision of tonsil tags

CPT Assistant May 24:22

42870 Excision or destruction lingual tonsil, any method (separate procedure)

CPT Assistant May 24:22

(For resection of the nasopharynx [eg, juvenile angiofibroma] by bicoronal and/or transzygomatic approach, see 61586 and 61600)

►(For cryolysis therapy for reduction of adipocytes or lymphatic structures in the soft palate, base of tongue, and lingual tonsil, see 0978T, 0979T, 0980T)◄

42890 Limited pharyngectomy

42892 Resection of lateral pharyngeal wall or pyriform sinus, direct closure by advancement of lateral and posterior pharyngeal walls

CPT Assistant Aug 10:6

(When combined with radical neck dissection, use also 38720)

42894 Resection of pharyngeal wall requiring closure with myocutaneous or fasciocutaneous flap or free muscle, skin, or fascial flap with microvascular anastomosis

CPT Changes: An Insider's View 2010

CPT Assistant Nov 07:8, Aug 10:6

(When combined with radical neck dissection, use also 38720)

(For limited pharyngectomy with radical neck dissection, use 38720 with 42890)

(For flap used for reconstruction, see 15730, 15733, 15734, 15756, 15757, 15758)

Repair

42900 Suture pharynx for wound or injury

42950 Pharyngoplasty (plastic or reconstructive operation on pharynx)

CPT Assistant Apr 16:8, Oct 19:10, Feb 25:25

(For pharyngeal flap, use 42225)

42953 Pharyngoesophageal repair

(For closure with myocutaneous or other flap, use appropriate number in addition)

Other Procedures

42955 Pharyngostomy (fistulization of pharynx, external for feeding)

42960 Control oropharyngeal hemorrhage, primary or secondary (eg, post-tonsillectomy); simple

42961 complicated, requiring hospitalization

42962 with secondary surgical intervention

42970 Control of nasopharyngeal hemorrhage, primary or secondary (eg, postadenoidectomy); simple, with posterior nasal packs, with or without anterior packs and/or cautery

CPT Changes: An Insider's View 2002

42971 complicated, requiring hospitalization

42972 with secondary surgical intervention

42975 Drug-induced sleep endoscopy, with dynamic evaluation of velum, pharynx, tongue base, and larynx for evaluation of sleep-disordered breathing, flexible, diagnostic

CPT Changes: An Insider's View 2022

CPT Assistant Dec 21:20

(Do not report 42975 in conjunction with 31231, unless performed for a separate condition [ie, other than sleep-disordered breathing] and using a separate endoscope)

(Do not report 42975 in conjunction with 31575, 92511)

42999 Unlisted procedure, pharynx, adenoids, or tonsils

CPT Assistant Feb 14:11

Esophagus

Incision

(For esophageal intubation with laparotomy, use 43510)

43020 Esophagotomy, cervical approach, with removal of foreign body

43030 Cricopharyngeal myotomy

CPT Assistant Jul 20:13

43045 Esophagotomy, thoracic approach, with removal of foreign body

xcision

(For gastrointestinal reconstruction for previous esophagectomy, see 43360, 43361)

43100 Excision of lesion, esophagus, with primary repair; cervical approach

43101 thoracic or abdominal approach

CPT Assistant Aug 10:4

(For wide excision of malignant lesion of cervical esophagus, with total laryngectomy without radical neck dissection, see 43107, 43116, 43124, and 31360)

(For wide excision of malignant lesion of cervical esophagus, with total laryngectomy with radical neck dissection, see 43107, 43116, 43124, and 31365)

43107 Total or near total esophagectomy, without thoracotomy; with pharyngogastrostomy or cervical esophagogastrostomy, with or without pyloroplasty (transhiatal)

CPT Assistant Aug 10:4

43108 with colon interposition or small intestine reconstruction, including intestine mobilization, preparation and anastomosis(es)

CPT Changes: An Insider's View 2002

43112 Total or near total esophagectomy, with thoracotomy; with pharyngogastrostomy or cervical esophagogastrostomy, with or without pyloroplasty (ie, McKeown esophagectomy or tri-incisional esophagectomy)

CPT Changes: An Insider's View 2018

CPT Assistant Aug 13:14, Jul 18:7

43113 with colon interposition or small intestine reconstruction, including intestine mobilization, preparation, and anastomosis(es)

CPT Changes: An Insider's View 2002

43116 Partial esophagectomy, cervical, with free intestinal graft, including microvascular anastomosis, obtaining the graft and intestinal reconstruction

CPT Assistant Nov 97:17, Nov 98:16, Aug 10:4

(Do not report 43116 in conjunction with 69990)

(Report 43116 with the modifier 52 appended if intestinal or free jejunal graft with microvascular anastomosis is performed by another physician)

(For free jejunal graft with microvascular anastomosis performed by another physician, use 43496)

43117 Partial esophagectomy, distal two-thirds, with thoracotomy and separate abdominal incision, with or without proximal gastrectomy; with thoracic esophagogastrostomy, with or without pyloroplasty (Ivor Lewis)

43118 with colon interposition or small intestine reconstruction, including intestine mobilization, preparation, and anastomosis(es)

CPT Changes: An Insider's View 2002

(For total esophagectomy with gastropharyngostomy, see 43107, 43124)

(For esophagogastrectomy (lower third) and vagotomy, use 43122)

43121 Partial esophagectomy, distal two-thirds, with thoracotomy only, with or without proximal gastrectomy, with thoracic esophagogastrostomy, with or without pyloroplasty

43122 Partial esophagectomy, thoracoabdominal or abdominal approach, with or without proximal gastrectomy; with esophagogastrostomy, with or without pyloroplasty

43123 with colon interposition or small intestine reconstruction, including intestine mobilization, preparation, and anastomosis(es)

CPT Changes: An Insider's View 2002

43124 Total or partial esophagectomy, without reconstruction (any approach), with cervical esophagostomy

43130 Diverticulectomy of hypopharynx or esophagus, with or without myotomy; cervical approach

CPT Assistant Oct 10:12, Dec 10:12

43135 thoracic approach

CPT Assistant Oct 10:12, Dec 10:12

(For endoscopic diverticulectomy of hypopharynx or cervical esophagus, use 43180)

Endoscopy

When bleeding occurs as a result of an endoscopic procedure, control of bleeding is not reported separately during the same operative session.

Esophagoscopy includes examination from the cricopharyngeus muscle (upper esophageal sphincter) to and including the gastroesophageal junction. It may also include examination of the proximal region of the stomach via retroflexion when performed.

Esophagoscopy

43180 Esophagoscopy, rigid, transoral with diverticulectomy of hypopharynx or cervical esophagus (eg, Zenker's diverticulum), with cricopharyngeal myotomy, includes use of telescope or operating microscope and repair, when performed

CPT Changes: An Insider's View 2015

CPT Assistant Nov 15:8

(Do not report 43180 in conjunction with 43210, 69990)

(For diverticulectomy of hypopharynx or esophagus [open], see 43130, 43135)

43191 Esophagoscopy, rigid, transoral; diagnostic, including collection of specimen(s) by brushing or washing when performed (separate procedure)

CPT Changes: An Insider's View 2014

CPT Assistant Dec 13:3, Feb 14:9, 11, Nov 15:8, Sep 22:13

(Do not report 43191 in conjunction with 43192, 43193, 43194, 43195, 43196, 43197, 43198, 43210, 43497, 0884T)

(For diagnostic transnasal esophagoscopy, see 43197, 43198)

(For diagnostic flexible transoral esophagoscopy, use 43200)

43192 with directed submucosal injection(s), any substance

CPT Changes: An Insider's View 2014

CPT Assistant Dec 13:3, Sep 22:13

(Do not report 43192 in conjunction with 43191, 43197, 43198)

(For flexible transoral esophagoscopy with directed submucosal injection(s), use 43201)

(For flexible transoral esophagoscopy with injection sclerosis of esophageal varices, use 43204)

(For rigid transoral esophagoscopy with injection sclerosis of esophageal varices, use 43499)

43193 with biopsy, single or multiple

CPT Changes: An Insider's View 2014

CPT Assistant Dec 13:3, Sep 22:13

(Do not report 43193 in conjunction with 43191, 43197, 43198)

(For flexible transoral esophagoscopy with biopsy, use 43202)

43194 with removal of foreign body(s)

CPT Changes: An Insider's View 2014, 2015

CPT Assistant Dec 13:3, Sep 22:13

(Do not report 43194 in conjunction with 43191, 43197, 43198)

(If fluoroscopic guidance is performed, use 76000)

(For flexible transoral esophagoscopy with removal of foreign body(s), use 43215)

43195 with balloon dilation (less than 30 mm diameter)

CPT Changes: An Insider's View 2014

CPT Assistant Dec 13:3, Sep 22:13

(Do not report 43195 in conjunction with 43191, 43197, 43198, 0884T)

(If fluoroscopic guidance is performed, use 74360)

(For esophageal dilation with balloon 30 mm diameter or larger, see 43214, 43233)

(For dilation without endoscopic visualization, see 43450, 43453)

(For flexible transoral esophagoscopy with balloon dilation [less than 30 mm diameter], use 43220)

43196 with insertion of guide wire followed by dilation over guide wire

CPT Changes: An Insider's View 2014

CPT Assistant Dec 13:3, Feb 14:9, Sep 22:13

(Do not report 43196 in conjunction with 43191, 43197, 43198, 0884T)

(If fluoroscopic guidance is performed, use 74360)

(For flexible transoral esophagoscopy with insertion of guide wire followed by dilation over guide wire, use 43226)

43197 Esophagoscopy, flexible, transnasal; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)

CPT Changes: An Insider's View 2014, 2015

CPT Assistant Dec 13:3, Feb 14:9, Nov 15:8, Sep 22:13, Nov 22:12

(Do not report 43197 in conjunction with 31575, 43191, 43192, 43193, 43194, 43195, 43196, 43198, 43200-43232, 43235-43259, 43266, 43270, 43290, 43291, 43497, 92511, 0652T, 0653T, 0654T)

(Do not report 43197 in conjunction with 31231 unless separate type of endoscope [eg, rigid endoscope] is used)

(For transoral esophagoscopy, see 43191, 43200)

43198 with biopsy, single or multiple

CPT Changes: An Insider's View 2014

CPT Assistant Dec 13:3, Feb 14:9, Sep 22:13, Nov 22:12

(Do not report 43198 in conjunction with 31575, 43191, 43192, 43193, 43194, 43195, 43196, 43197, 43200-43232, 43235-43259, 43266, 43270, 43290, 43291, 92511, 0652T, 0653T, 0654T)

(Do not report 43198 in conjunction with 31231 unless separate type of endoscope [eg, rigid endoscope] is used)

(For transoral esophagoscopy with biopsy, see 43193, 43202)

43200 Esophagoscopy, flexible, transoral; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)

CPT Changes: An Insider's View 2000, 2014, 2017

CPT Assistant Spring 91:7, Spring 94:1, Jun 98:10, Nov 99:21, Sep 03:3, Oct 08:6, Jan 13:11, Feb 13:16, Dec 13:3, Feb 14:9, Nov 15:8, Sep 22:13

(Do not report 43200 in conjunction with 43197, 43198, 43201-43232, 43497, 0884T)

(For diagnostic rigid transoral esophagoscopy, use 43191)

(For diagnostic flexible transnasal esophagoscopy, use 43197)

(For diagnostic flexible esophagogastroduodenoscopy, use 43235)

43201 with directed submucosal injection(s), any substance

CPT Changes: An Insider's View 2003, 2014, 2017

CPT Assistant Jun 10:4, Jan 13:11, Dec 13:3

(Do not report 43201 in conjunction with 43204, 43211, 43227 for the same lesion)

(Do not report 43201 in conjunction with 43197, 43198, 43200)

(For rigid transoral esophagoscopy with directed submucosal injection[s], use 43192)

(For flexible transoral esophagoscopy with injection sclerosis of esophageal varices, use 43204)

(For rigid transoral esophagoscopy with injection sclerosis of esophageal varices, use 43499)

43202 with biopsy, single or multiple

CPT Changes: An Insider's View 2014, 2017

CPT Assistant Spring 94:1, Oct 08:6, Jan 13:11, Dec 13:3

(Do not report 43202 in conjunction with 43211 for the same lesion)

(Do not report 43202 in conjunction with 43197, 43198, 43200)

(For rigid transoral esophagoscopy with biopsy, use 43193)

(For flexible transnasal esophagoscopy with biopsy, use 43198)

43204 with injection sclerosis of esophageal varices

CPT Changes: An Insider's View 2014, 2017

CPT Assistant Spring 94:1, Oct 08:6, Jun 10:5, Jan 13:11, Dec 13:3

(Do not report 43204 in conjunction with 43201, 43227 for the same lesion)

(Do not report 43204 in conjunction with 43197, 43198, 43200)

(For rigid transoral esophagoscopy with injection sclerosis of esophageal varices, use 43499)

43205 with band ligation of esophageal varices

CPT Changes: An Insider's View 2014, 2017

CPT Assistant Spring 94:1, Oct 08:6, Jan 13:11, Dec 13:3

(Do not report 43205 in conjunction with 43227 for the same lesion)

(Do not report 43205 in conjunction with 43197, 43198, 43200)

(To report control of nonvariceal bleeding with band ligation, use 43227)

43206 with optical endomicroscopy

CPT Changes: An Insider's View 2013, 2014, 2017

CPT Assistant Jan 13:11, Aug 13:5, Dec 13:3, Nov 17:10

(Report supply of contrast agent separately)

(Do not report 43206 in conjunction with 43197, 43198, 43200, 88375)

43210 Code is out of numerical sequence. See 43254-43261

43211 Code is out of numerical sequence. See 43216-43227

43212 Code is out of numerical sequence. See 43216-43227

43213 Code is out of numerical sequence. See 43216-43227

43214 Code is out of numerical sequence. See 43216-43227

43215 with removal of foreign body(s)

CPT Changes: An Insider's View 2014, 2015, 2017

CPT Assistant Spring 94:1, Oct 08:6, Dec 13:3

(Do not report 43215 in conjunction with 43197, 43198, 43200)

(If fluoroscopic guidance is performed, use 76000)

(For rigid transoral esophagoscopy with removal of foreign body(s), use 43194)

43216 with removal of tumor(s), polyp(s), or other lesion(s) by hot biopsy forceps

CPT Changes: An Insider's View 2014, 2015, 2017

CPT Assistant Spring 94:1, Oct 08:6, Jan 13:11, Dec 13:3

(Do not report 43216 in conjunction with 43197, 43198, 43200)

43217 with removal of tumor(s), polyp(s), or other lesion(s) by snare technique

CPT Changes: An Insider's View 2014, 2017

CPT Assistant Spring 94:1, Oct 08:6, Jan 13:11, Dec 13:3, May 20:13

(Do not report 43217 in conjunction with 43211 for the same lesion)

(Do not report 43217 in conjunction with 43197, 43198, 43200)

(For esophagogastroduodenoscopy with removal of tumor[s], polyp[s], or other lesion[s] by snare technique, use 43251)

(For endoscopic mucosal resection, use 43211)

 # 43211 with endoscopic mucosal resection

CPT Changes: An Insider's View 2014, 2017

CPT Assistant Dec 13:3, Nov 17:10, Dec 19:14

(Do not report 43211 in conjunction with 43201, 43202, 43217 for the same lesion)

(Do not report 43211 in conjunction with 43197, 43198, 43200)

 # 43212 with placement of endoscopic stent (includes pre- and post-dilation and guide wire passage, when performed)

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Dec 13:3

(Do not report 43212 in conjunction with 43197, 43198, 43200, 43220, 43226, 43241)

(If fluoroscopic guidance is performed, use 74360)

43220 with transendoscopic balloon dilation (less than 30 mm diameter)

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Spring 94:2, Jan 97:10, May 05:3, Oct 08:6, Jan 13:11, Dec 13:3

(Do not report 43220 in conjunction with 43197, 43198, 43200, 43212, 43226, 43229, 0884T)

(If fluoroscopic guidance is performed, use 74360)

(For rigid transoral esophagoscopy with balloon dilation [less than 30 mm diameter], use 43195)

(For esophageal dilation with balloon 30 mm diameter or larger, use 43214)

(For dilation without endoscopic visualization, see 43450, 43453)

(For esophagoscopy with predilation followed by therapeutic drug delivery by drug-coated balloon catheter, use 0884T)

 # 43213 with dilation of esophagus, by balloon or dilator, retrograde (includes fluoroscopic guidance, when performed)

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Dec 13:3

(Do not report 43213 in conjunction with 43197, 43198, 43200, 74360, 76000, 0884T)

(For transendoscopic balloon dilation of multiple strictures during the same session, report 43213 with modifier 59 for each additional stricture dilated)

 # 43214 with dilation of esophagus with balloon (30 mm diameter or larger) (includes fluoroscopic guidance, when performed)

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Dec 13:3

(Do not report 43214 in conjunction with 43197, 43198, 43200, 74360, 76000, 0884T)

43226 with insertion of guide wire followed by passage of dilator(s) over guide wire

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Spring 94:2, Jan 13:11, Dec 13:3

(Do not report 43226 in conjunction with 43229 for the same lesion)

(Do not report 43226 in conjunction with 43197, 43198, 43200, 43212, 43220, 0884T)

(If fluoroscopic guidance is performed, use 74360)

(For rigid transoral esophagoscopy with insertion of guide wire followed by dilation over guide wire, use 43196)

(For esophagoscopy with predilation followed by therapeutic drug delivery by drug-coated balloon catheter, use 0884T)

43227 with control of bleeding, any method

CPT Changes: An Insider's View 2002, 2014, 2017

CPT Assistant Spring 94:2, Oct 08:6, Jun 10:4, Jan 13:11, Dec 13:3, Feb 14:11

(Do not report 43227 in conjunction with 43201, 43204, 43205 for the same lesion)

(Do not report 43227 in conjunction with 43197, 43198, 43200)

43229 with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed)

CPT Changes: An Insider's View 2014, 2017

CPT Assistant Dec 13:3

(Do not report 43229 in conjunction with 43220, 43226 for the same lesion)

(Do not report 43229 in conjunction with 43197, 43198, 43200)

(For esophagoscopic photodynamic therapy, report 43229 in conjunction with 96570, 96571 as appropriate)

43231 with endoscopic ultrasound examination

CPT Changes: An Insider's View 2001, 2014, 2017

CPT Assistant Oct 01:4, May 04:6, Oct 08:6, Mar 09:8, Jan 13:11, Dec 13:3

(Do not report 43231 in conjunction with 43197, 43198, 43200, 43232, 76975)

(Do not report 43231 more than once per session)

43232 with transendoscopic ultrasound-guided intramural or transmural fine needle aspiration/biopsy(s)

CPT Changes: An Insider's View 2001, 2014, 2017

CPT Assistant Oct 01:4, Mar 04:11, May 04:6, Oct 08:6, Mar 09:8, Jan 13:11, Dec 13:3, Feb 14:9, Sep 22:13

(Do not report 43232 in conjunction with 43197, 43198, 43200, 43231, 76942, 76975)

(Do not report 43232 more than once per session)

43233 Code is out of numerical sequence. See 43248-43251

Esophagogastroduodenoscopy

(For examination of the esophagus from the cricopharyngeus muscle [upper esophageal sphincter] to and including the gastroesophageal junction, including examination of the proximal region of the stomach via retroflexion when performed, see 43197, 43198, 43200, 43201, 43202, 43204, 43205, 43206, 43211, 43212, 43213, 43214, 43215, 43216, 43217, 43220, 43226, 43227, 43229, 43231, 43232)

(Use 43233, 43235-43259, 43266, 43270 for examination of a surgically altered stomach where the jejunum is examined distal to the anastomosis [eg, gastric bypass, gastroenterostomy {Billroth II}])

To report esophagogastroscopy where the duodenum is deliberately not examined (eg, judged clinically not pertinent), or because the clinical situation precludes such exam (eg, significant gastric retention precludes safe exam of duodenum), append modifier 52 if repeat examination is not planned, or modifier 53 if repeat examination is planned.

43235 Esophagogastroduodenoscopy, flexible, transoral; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)

CPT Changes: An Insider's View 2014, 2017

CPT Assistant Spring 94:4, Dec 97:11, Jun 03:11, Sep 03:3, Oct 08:6, May 09:8, Jan 13:11, Dec 13:3, Nov 15:8, Jul 17:10, Jul 18:14, Oct 19:10, Sep 22:13, Nov 22:12, May 23:27

(Do not report 43235 in conjunction with 43197, 43198, 43210, 43236-43259, 43266, 43270, 43290, 43291, 43497, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

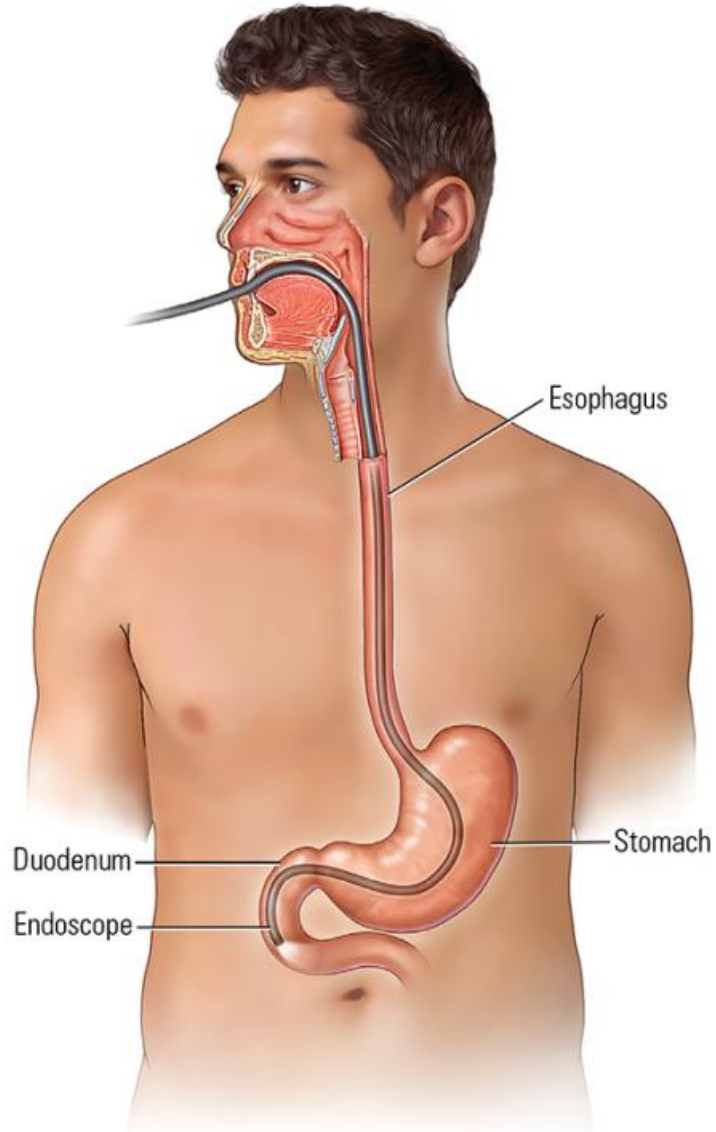
43236 with directed submucosal injection(s), any substance

- *CPT Changes: An Insider's View* 2003, 2014, 2017
- *CPT Assistant* Jun 10:4, Jan 13:11, Dec 13:3

(Do not report 43236 in conjunction with 43243, 43254, 43255 for the same lesion)

(Do not report 43236 in conjunction with 43197, 43198, 43235, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

(For flexible, transoral esophagogastroduodenoscopy with injection sclerosis of esophageal and/or gastric varices, use 43243)



43237 with endoscopic ultrasound examination limited to the esophagus, stomach or duodenum, and adjacent structures

- *CPT Changes: An Insider's View* 2004, 2014, 2017
- *CPT Assistant* Jan 13:11, Dec 13:3, Jan 16:11

(Do not report 43237 in conjunction with 43197, 43198, 43235, 43238, 43242, 43253, 43259, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379, 76975)

(Do not report 43237 more than once per session)

Esophagogastroduodenoscopy
43235

43238 with transendoscopic ultrasound-guided intramural or transmural fine needle aspiration/biopsy(s), (includes endoscopic ultrasound examination limited to the esophagus, stomach or duodenum, and adjacent structures)

- *CPT Changes: An Insider's View* 2004, 2014, 2017
- *CPT Assistant* Jan 13:11, Dec 13:3

(Do not report 43238 in conjunction with 43197, 43198, 43235, 43237, 43242, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379, 76942, 76975)

(Do not report 43238 more than once per session)

43239 with biopsy, single or multiple

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Spring 94:4, Apr 98:14, Feb 99:11, Oct 01:4, Nov 07:9, Jan 13:11, Dec 13:3, Jul 18:14, Jan 20:12

(Do not report 43239 in conjunction with 43254 for the same lesion)

(Do not report 43239 in conjunction with 43197, 43198, 43235, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

43240 with transmural drainage of pseudocyst (includes placement of transmural drainage catheter[s]/stent[s], when performed, and endoscopic ultrasound, when performed)

- *CPT Changes: An Insider's View* 2001, 2014, 2017
- *CPT Assistant* Oct 01:4, Jan 13:11, Dec 13:3

(Do not report 43240 in conjunction with 43253 for the same lesion)

(Do not report 43240 in conjunction with 43197, 43198, 43235, 43242, 43259, 43266, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

(Do not report 43240 more than once per session)

(For endoscopic pancreatic necrosectomy, use 48999)

43241 with insertion of intraluminal tube or catheter

- *CPT Changes: An Insider's View* 2001, 2014, 2017
- *CPT Assistant* Spring 94:4, Nov 01:7, Apr 09:3, Jan 13:11, Dec 13:3, Oct 21:5-6, Nov 22:12

(Do not report 43241 in conjunction with 43197, 43198, 43212, 43235, 43266, 43290, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

(For naso- or oro-gastric tube placement requiring physician's or other qualified health care professional's skill and fluoroscopic guidance, use 43752)

(For nonendoscopic enteric tube placement, see 44500, 74340)

43242 with transendoscopic ultrasound-guided intramural or transmural fine needle aspiration/biopsy(s) (includes endoscopic ultrasound examination of the esophagus, stomach, and either the duodenum or a surgically altered stomach where the jejunum is examined distal to the anastomosis)

- *CPT Changes: An Insider's View* 2001, 2004, 2014, 2017
- *CPT Assistant* Oct 01:4, Mar 09:8, Jan 13:11, Dec 13:3

(Do not report 43242 in conjunction with 43197, 43198, 43235, 43237, 43238, 43240, 43259, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379, 76942, 76975)

(Do not report 43242 more than once per session)

(For transendoscopic ultrasound-guided transmural fine needle aspiration/biopsy limited to the esophagus, stomach, duodenum, or adjacent structure, use 43238)

43243 with injection sclerosis of esophageal/gastric varices

CPT Changes: An Insider's View 2014, 2017

CPT Assistant Spring 94:4, Jun 10:5, Jan 13:11, Dec 13:3

(Do not report 43243 in conjunction with 43236, 43255 for the same lesion)

(Do not report 43243 in conjunction with 43197, 43198, 43235, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

43244 with band ligation of esophageal/gastric varices

CPT Changes: An Insider's View 2014, 2017

CPT Assistant Spring 94:4, Jun 11:13, Jan 13:11, Dec 13:3

(Do not report 43244 in conjunction with 43197, 43198, 43235, 43255, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

(To report control of nonvariceal bleeding with band ligation, use 43255)

43245 with dilation of gastric/duodenal stricture(s) (eg, balloon, bougie)

CPT Changes: An Insider's View 2002, 2003, 2014, 2017

CPT Assistant Spring 94:4, Oct 01:4, Jan 04:26, Jan 13:11, Dec 13:3

(Do not report 43245 in conjunction with 43197, 43198, 43235, 43266, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

(If fluoroscopic guidance is performed, use 74360)

43246 with directed placement of percutaneous gastrostomy tube

CPT Changes: An Insider's View 2014, 2017

CPT Assistant Spring 94:4, Feb 97:10, Mar 10:10, Jan 13:11, May 13:12, Dec 13:3, Feb 19:5, Oct 21:5, Jul 23:1

Clinical Examples in Radiology Winter 19:12

(Do not report 43246 in conjunction with 43197, 43198, 43235, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44376, 44377, 44378, 44379)

(For percutaneous insertion of gastrostomy tube under fluoroscopic guidance, use 49440)

(For percutaneous replacement of gastrostomy tube without imaging or endoscopy, see 43762, 43763)

43247 with removal of foreign body(s)

CPT Changes: An Insider's View 2014, 2015, 2017

CPT Assistant Spring 94:4, Jan 13:11, Dec 13:3, Nov 22:12

(Do not report 43247 in conjunction with 43197, 43198, 43235, 43290, 43291, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

(If fluoroscopic guidance is performed, use 76000)

 # 43290 with deployment of intragastric bariatric balloon

CPT Changes: An Insider's View 2023

CPT Assistant Nov 22:12, Dec 22:20

(Do not report 43290 in conjunction with 43197, 43198, 43235, 43241, 43247)

 # 43291 with removal of intragastric bariatric balloon(s)

- *CPT Changes: An Insider's View* 2023
- *CPT Assistant* Nov 22:12, Dec 22:20

(Do not report 43291 in conjunction with 43197, 43198, 43235, 43247)

43248 with insertion of guide wire followed by passage of dilator(s) through esophagus over guide wire

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Spring 94:4, Dec 97:11, Oct 08:6, Jan 13:11, Dec 13:3, Jul 17:10

(Do not report 43248 in conjunction with 43197, 43198, 43235, 43266, 43270, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

(If fluoroscopic guidance is performed, use 74360)

43249 with transendoscopic balloon dilation of esophagus (less than 30 mm diameter)

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* May 05:3, Jan 13:11, Dec 13:3, Jul 18:14

(Do not report 43249 in conjunction with 43197, 43198, 43235, 43266, 43270, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

(If fluoroscopic guidance is performed, use 74360)

 # 43233 with dilation of esophagus with balloon (30 mm diameter or larger) (includes fluoroscopic guidance, when performed)

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Dec 13:3, Oct 19:10, Sep 22:13

(Do not report 43233 in conjunction with 43197, 43198, 43235, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379, 74360, 76000)

43250 with removal of tumor(s), polyp(s), or other lesion(s) by hot biopsy forceps

- *CPT Changes: An Insider's View* 2014, 2015, 2017
- *CPT Assistant* Spring 94:4, Feb 99:11, Nov 07:9, Jan 13:11, Dec 13:3

(Do not report 43250 in conjunction with 43197, 43198, 43235, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

43251 with removal of tumor(s), polyp(s), or other lesion(s) by snare technique

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Spring 94:4, Oct 04:12, Nov 07:9, Jun 11:13, Jan 13:11, Dec 13:3

(Do not report 43251 in conjunction with 43254 for the same lesion)

(Do not report 43251 in conjunction with 43197, 43198, 43235, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

(For endoscopic mucosal resection, use 43254)

43252 with optical endomicroscopy

- *CPT Changes: An Insider's View* 2013, 2014, 2017
- *CPT Assistant* Jan 13:11, Aug 13:5, Dec 13:3

(Report supply of contrast agent separately)

(Do not report 43252 in conjunction with 43197, 43198, 43235, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379, 88375)

43253 with transendoscopic ultrasound-guided transmural injection of diagnostic or therapeutic substance(s) (eg, anesthetic, neurolytic agent) or fiducial marker(s) (includes endoscopic ultrasound examination of the esophagus, stomach, and either the duodenum or a surgically altered stomach where the jejunum is examined distal to the anastomosis)

CPT Changes: An Insider's View 2014, 2017
CPT Assistant Dec 13:3, Apr 18:11

(Do not report 43253 in conjunction with 43240 for the same lesion)

(Do not report 43253 in conjunction with 43197, 43198, 43235, 43237, 43259, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379, 76942, 76975)

(Do not report 43253 more than once per session)

(For transendoscopic ultrasound-guided transmural fine needle aspiration/biopsy, see 43238, 43242)

43254 with endoscopic mucosal resection

CPT Changes: An Insider's View 2014, 2017
CPT Assistant Dec 13:3, Dec 19:14

(Do not report 43254 in conjunction with 43236, 43239, 43251 for the same lesion)

(Do not report 43254 in conjunction with 43197, 43198, 43235, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

43255 with control of bleeding, any method

CPT Changes: An Insider's View 2014, 2017
CPT Assistant Spring 94:4, Jun 10:4, Dec 13:3

(Do not report 43255 in conjunction with 43236, 43243, 43244 for the same lesion)

(Do not report 43255 in conjunction with 43197, 43198, 43235, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

 # 43266 with placement of endoscopic stent (includes pre- and post-dilation and guide wire passage, when performed)

CPT Changes: An Insider's View 2014, 2017
CPT Assistant Dec 13:3, Oct 19:10, Sep 22:13

(Do not report 43266 in conjunction with 43197, 43198, 43235, 43240, 43241, 43245, 43248, 43249, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

(If fluoroscopic guidance is performed, use 74360)

43257 with delivery of thermal energy to the muscle of lower esophageal sphincter and/or gastric cardia, for treatment of gastroesophageal reflux disease

CPT Changes: An Insider's View 2005, 2014, 2017
CPT Assistant May 05:3, Jan 13:11, Dec 13:3

(Do not report 43257 in conjunction with 43197, 43198, 43235, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

(For ablation of metaplastic/dysplastic esophageal lesion [eg, Barrett's esophagus], see 43229, 43270)

 # 43270 with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed)

CPT Changes: An Insider's View 2014, 2017
CPT Assistant Dec 13:3, Oct 19:10, Sep 22:13, May 23:27

(Do not report 43270 in conjunction with 43248, 43249 for the same lesion)

(Do not report 43270 in conjunction with 43197, 43198, 43235, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379)

(For esophagoscopic photodynamic therapy, use 43270 in conjunction with 96570, 96571 as appropriate)

43259 with endoscopic ultrasound examination, including the esophagus, stomach, and either the duodenum or a surgically altered stomach where the jejunum is examined distal to the anastomosis

CPT Changes: An Insider's View 2004, 2014, 2017

CPT Assistant Spring 94:4, May 04:7, Mar 09:8, Jan 13:11, Dec 13:3, Jan 16:11, Oct 19:10, Sep 22:13

(Do not report 43259 in conjunction with 43197, 43198, 43235, 43237, 43240, 43242, 43253, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373, 44376, 44377, 44378, 44379, 76975)

(Do not report 43259 more than once per session)

 # 43210 with esophagogastric fundoplasty, partial or complete, includes duodenoscopy when performed

CPT Changes: An Insider's View 2016

CPT Assistant Nov 15:8, Sep 22:13

(Do not report 43210 in conjunction with 43180, 43191, 43197, 43200, 43235)

Endoscopic Retrograde Cholangiopancreatography (ERCP)

Report the appropriate code(s) for each service performed. Therapeutic ERCP (43261, 43262, 43263, 43264, 43265, 43274, 43275, 43276, 43277, 43278) includes diagnostic ERCP (43260). ERCP includes guide wire passage when performed. An ERCP is considered complete if one or more of the ductal system(s), (pancreatic/biliary) is visualized. To report ERCP attempted but with unsuccessful cannulation of any ductal system, see 43235-43259, 43266, 43270.

(For percutaneous biliary catheter procedures, see 47490-47544)

Codes 43274, 43275, 43276, and 43277 describe ERCP with stent placement, removal or replacement (exchange) of stent(s), and balloon dilation within the pancreatico-biliary system. For reporting purposes, ducts that may be reported as stented or subject to stent replacement (exchange) or to balloon dilation include:

Pancreas: major and minor ducts

Biliary tree: common bile duct, right hepatic duct, left hepatic duct, cystic duct/gallbladder

ERCP with stent placement includes any balloon dilation performed in that duct. ERCP with more than one stent placement (eg, different ducts or side by side in the same duct) performed during the same day/session may be reported with 43274 more than once with modifier 59 appended to the subsequent procedure(s). For ERCP with more than one stent exchanged during the same day/session, 43276 may be reported for the initial stent exchange, and 43276 with modifier 59 for each additional stent exchange. ERCP with balloon dilation of more than one duct during the same day/session may be reported with modifier 59 appended to the subsequent procedure(s). Sphincteroplasty, which is balloon dilation of the ampulla (sphincter of Oddi), is reported with 43277, and includes sphincterotomy (43262) when performed.

To report ERCP via altered postoperative anatomy, see 43260, 43262, 43263, 43264, 43265, 43273, 43274, 43275, 43276, 43277, 43278, for Billroth II gastroenterostomy. See 47999 (Unlisted procedure, biliary tract) or 48999 (Unlisted procedure, pancreas) for ERCP via gastrostomy (laparoscopic or open) or via Roux-en-Y anatomy (eg, post-bariatric gastric bypass, post-total gastrectomy).

To report optical endomicroscopy of the biliary tract and pancreas, use 0397T. Do not report optical endomicroscopy more than once per session.

Stone destruction includes any stone removal in the same ductal system (biliary/pancreatic). Code 43277 may be separately reported if sphincteroplasty or dilation of a ductal stricture is required before proceeding to remove stones/debris from the duct during the same session. Dilation that is incidental to the passage of an instrument to clear stones or debris is not separately reported.

(Do not report 43277 for use of a balloon catheter to clear stones/debris from a duct. Any dilation of the duct that may occur during this maneuver is considered inherent to the work of 43264 and 43265)

(If imaging of the ductal systems is performed, including images saved to the permanent record and report of the imaging, see 74328, 74329, 74330)

43260 Endoscopic retrograde cholangiopancreatography (ERCP); diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Spring 94:5, Oct 04:13, May 08:14, Aug 08:12, Jan 12:12, Jan 13:11, Dec 13:3

(Do not report 43260 in conjunction with 43261, 43262, 43263, 43264, 43265, 43274, 43275, 43276, 43277, 43278)

43261 with biopsy, single or multiple

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Spring 94:5, Aug 08:12, Jun 11:13, Jan 13:11

(Do not report 43261 in conjunction with 43260)

(For percutaneous endoluminal biopsy of biliary tree, use 47543)

43262 with sphincterotomy/papillotomy

- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Spring 94:5, Oct 04:13, Jul 09:10, Jan 13:11

(43262 may be reported when sphincterotomy is performed in addition to 43261, 43263, 43264, 43265, 43275, 43278)

(Do not report 43262 in conjunction with 43274 for stent placement or with 43276 for stent replacement [exchange] in the same location)

(Do not report 43262 in conjunction with 43260, 43277)

(For percutaneous balloon dilation of biliary duct(s) or of ampulla, use 47542)

43263 with pressure measurement of sphincter of Oddi

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Spring 94:5, Oct 04:13, Jan 13:11, Dec 13:3

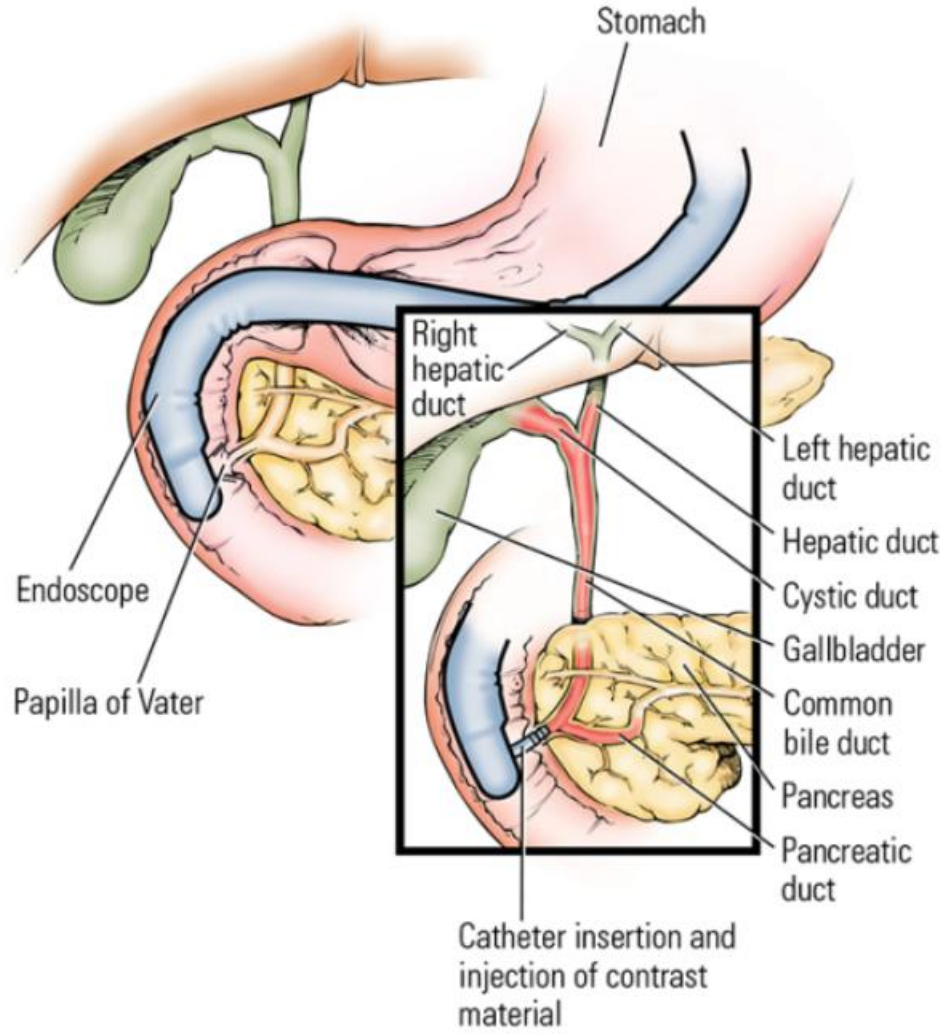
(Do not report 43263 in conjunction with 43260)

(Do not report 43263 more than once per session)

43264 with removal of calculi/debris from biliary/pancreatic duct(s)

- *CPT Changes: An Insider's View* 2002, 2014, 2017
- *CPT Assistant* Spring 94:5, Jan 13:11, Dec 13:3

(Do not report 43264 if no calculi or debris are found, even if balloon catheter is deployed)



(Do not report 43264 in conjunction with 43260, 43265)

(For percutaneous removal of calculi/debris, use 47544)

Endoscopic Retrograde Cholangiopancreatography (ERCP)

43260

Examination of the hepatobiliary system (pancreatic ducts, hepatic ducts, common bile ducts, duodenal papilla [ampulla of Vater] and gallbladder [if present]) is performed through a side-viewing flexible fiberoptic endoscope.

43265 with destruction of calculi, any method (eg, mechanical, electrohydraulic, lithotripsy)

- *CPT Changes: An Insider's View* 2002, 2014, 2017
- *CPT Assistant* Spring 94:5, Jan 13:11, Dec 13:3

(Do not report 43265 in conjunction with 43260, 43264)

(For percutaneous removal of calculi/debris, use 47544)

43266 Code is out of numerical sequence. See 43254-43261

43270 Code is out of numerical sequence. See 43254-43261

 # 43274 with placement of endoscopic stent into biliary or pancreatic duct, including pre- and post-dilation and guide wire passage, when performed, including sphincterotomy, when performed, each stent

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Dec 13:3

(Do not report 43274 in conjunction with 43262, 43275, 43276, 43277 for stent placement or replacement [exchange] in the same duct)

(For stent placement in both the pancreatic duct and the common bile duct during the same operative session, placement of separate stents in both the right and left hepatic ducts, or placement of two side-by-side stents in the same duct, 43274 may be reported for each additional stent placed, using modifier 59 with the subsequent procedure[s])

(To report naso-biliary or naso-pancreatic drainage tube placement, use 43274)

(For percutaneous placement of biliary stent(s), see 47538, 47539, 47540)

 # 43275 with removal of foreign body(s) or stent(s) from biliary/pancreatic duct(s)

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Dec 13:3

(Do not report 43275 in conjunction with 43260, 43274, 43276)

(For removal of stent from biliary or pancreatic duct without ERCP, use 43247)

(Report 43275 only once for removal of one or more stents or foreign bodies from biliary/pancreatic duct[s] during the same session)

(For percutaneous removal of calculi/debris, use 47544)

 # 43276 with removal and exchange of stent(s), biliary or pancreatic duct, including pre- and post-dilation and guide wire passage, when performed, including sphincterotomy, when performed, each stent exchanged

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Dec 13:3

(43276 includes removal and replacement [exchange] of one stent. For replacement [exchange] of additional stent[s] during the same session, report 43276 with modifier 59 for each additional replacement [exchange])

(Do not report 43276 in conjunction with 43260, 43275)

(Do not report 43276 in conjunction with 43262, 43274 for stent placement or exchange in the same duct)

 # 43277 with trans-endoscopic balloon dilation of biliary/pancreatic duct(s) or of ampulla (sphincteroplasty), including sphincterotomy, when performed, each duct

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Dec 13:3, Jul 24:13

(Do not report 43277 in conjunction with 43278 for the same lesion)

(Do not report 43277 in conjunction with 43260, 43262)

(Do not report 43277 for incidental dilation using balloon for stone/debris removal performed with 43264, 43265)

(If sphincterotomy without sphincteroplasty is performed on a separate pancreatic duct orifice during the same session [ie, pancreas divisum], report 43262 with modifier 59)

(Do not report 43277 in conjunction with 43274, 43276 for dilation and stent placement/replacement [exchange] in the same duct)

(For transendoscopic balloon dilation of multiple strictures during the same session, use 43277 with modifier 59 for each additional stricture dilated)

(For bilateral balloon dilation [both right and left hepatic ducts], 43277 may be reported twice with modifier 59 appended to the second procedure)

(For percutaneous balloon dilation of biliary duct(s) or of ampulla (sphincteroplasty), use 47542)

 # 43278 with ablation of tumor(s), polyp(s), or other lesion(s), including pre- and post-dilation and guide wire passage, when performed

- *CPT Changes: An Insider's View* 2014, 2017
- *CPT Assistant* Dec 13:3

(Do not report 43278 in conjunction with 43277 for the same lesion)

(Do not report 43278 in conjunction with 43260)

(For ampullectomy, use 43254)

✚ 43273 Endoscopic cannulation of papilla with direct visualization of pancreatic/common bile duct(s) (List separately in addition to code(s) for primary procedure)

- *CPT Changes: An Insider's View* 2009, 2014, 2017
- *CPT Assistant* Jan 13:11, Dec 13:3

(Report 43273 once per procedure)

(Use 43273 in conjunction with 43260, 43261, 43262, 43263, 43264, 43265, 43274, 43275, 43276, 43277, 43278)

43274 Code is out of numerical sequence. See 43264-43279

43275 Code is out of numerical sequence. See 43264-43279

43276 Code is out of numerical sequence. See 43264-43279

43277 Code is out of numerical sequence. See 43264-43279

43278 Code is out of numerical sequence. See 43264-43279

Laparoscopy

►Surgical laparoscopy always includes diagnostic laparoscopy. To report a diagnostic laparoscopy (separate procedure), use 49320.◄

43279 Laparoscopy, surgical, esophagomyotomy (Heller type), with fundoplasty, when performed

CPT Changes: An Insider's View 2009
CPT Assistant Feb 12:3

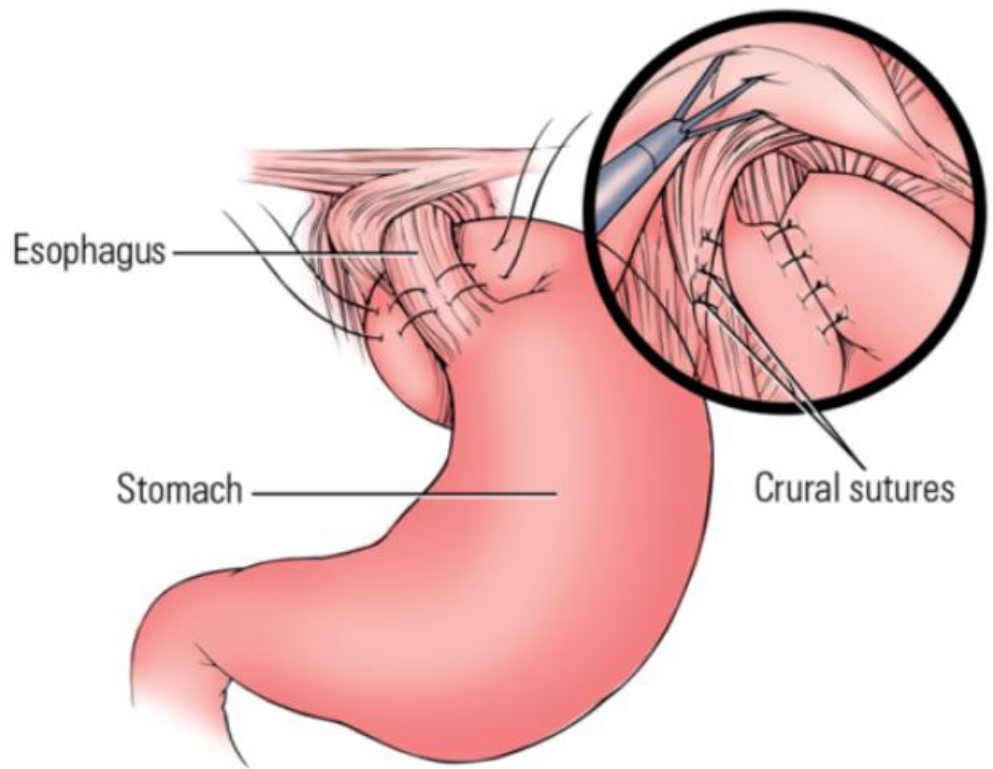
(For open approach, see 43330, 43331)

(Do not report 43279 in conjunction with 43280)

43280 Laparoscopy, surgical, esophagogastric fundoplasty (eg, Nissen, Toupet procedures)

CPT Changes: An Insider's View 2000
CPT Assistant Nov 99:22, Mar 00:8, Dec 02:2, Jun 11:8, Feb 12:3, Dec 14:16, Nov 15:8

(Do not report 43280 in conjunction with 43279, 43281, 43282)



(For open esophagogastric fundoplasty, see 43327, 43328)

(For laparoscopy, surgical, esophageal sphincter augmentation procedure, placement of sphincter augmentation device, see 43284, 43285)

(For esophagogastroduodenoscopy fundoplasty, partial or complete, transoral approach, use 43210)

Laparoscopic Fundoplasty
43280

With the esophagus and fundus held aside, sutures are placed in both crus diaphragmatis muscles below the esophagus to bring them together to close the hiatal hernia, and the anterior and posterior walls of the fundus are wrapped and stitched around the esophagus to complete the laparoscopic fundoplasty.

43281 Laparoscopy, surgical, repair of paraesophageal hernia, includes fundoplasty, when performed; without implantation of mesh

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Jun 11:9, Feb 12:3, Dec 14:16, Sep 18:14, Nov 18:11

43282 with implantation of mesh

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Jun 11:9, Feb 12:3, Dec 14:16, Aug 16:9

(To report transabdominal paraesophageal hiatal hernia repair, see 43332, 43333)

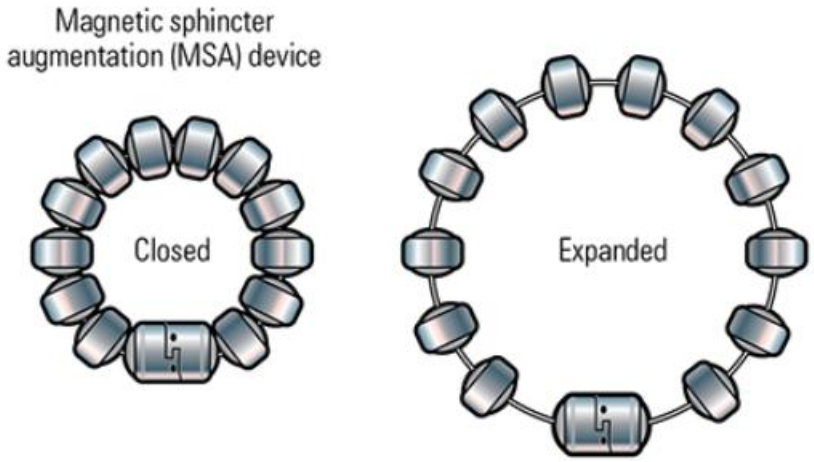
(To report transthoracic diaphragmatic hernia repair, see 43334, 43335)

(Do not report 43281, 43282 in conjunction with 43280, 43450, 43453)

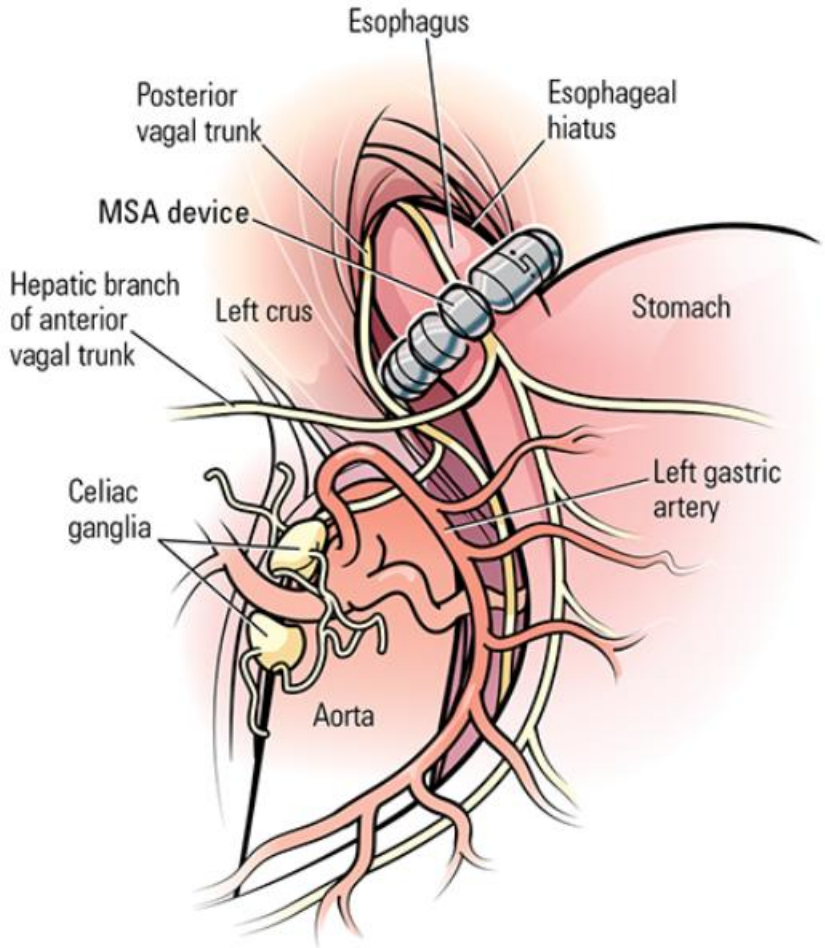
+ 43283 Laparoscopy, surgical, esophageal lengthening procedure (eg, Collis gastroplasty or wedge gastroplasty) (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Jun 11:9, Feb 12:3

(Use 43283 in conjunction with 43280, 43281, 43282)



43284 Laparoscopy, surgical, esophageal sphincter augmentation procedure, placement of sphincter augmentation device (ie, magnetic band), including cruroplasty when performed



- *CPT Changes: An Insider's View* 2017
- *CPT Assistant* Aug 17:6, Sep 18:14, Apr 19:11

(Do not report 43284 in conjunction with 43279, 43280, 43281, 43282)

Laparoscopic Esophageal Sphincter Augmentation
43284

Implanted magnetic sphincter augmentation device

43285 Removal of esophageal sphincter augmentation device

CPT Changes: An Insider's View 2017

CPT Assistant Aug 17:6

43286 Esophagectomy, total or near total, with laparoscopic mobilization of the abdominal and mediastinal esophagus and proximal gastrectomy, with laparoscopic pyloric drainage procedure if performed, with open cervical pharyngogastrostomy or esophagogastrostomy (ie, laparoscopic transhiatal esophagectomy)

CPT Changes: An Insider's View 2018

CPT Assistant Jul 18:7

43287 Esophagectomy, distal two-thirds, with laparoscopic mobilization of the abdominal and lower mediastinal esophagus and proximal gastrectomy, with laparoscopic pyloric drainage procedure if performed, with separate thoracoscopic mobilization of the middle and upper mediastinal esophagus and thoracic esophagogastrostomy (ie, laparoscopic thoracoscopic esophagectomy, Ivor Lewis esophagectomy)

CPT Changes: An Insider's View 2018

CPT Assistant Jul 18:7

(Do not report 43287 in conjunction with 32551 for right tube thoracostomy)

43288 Esophagectomy, total or near total, with thoracoscopic mobilization of the upper, middle, and lower mediastinal esophagus, with separate laparoscopic proximal gastrectomy, with laparoscopic pyloric drainage procedure if performed, with open cervical pharyngogastrostomy or esophagogastrostomy (ie, thoracoscopic, laparoscopic and cervical incision esophagectomy, McKeown esophagectomy, tri-incisional esophagectomy)

CPT Changes: An Insider's View 2018

CPT Assistant Jul 18:7

(Do not report 43288 in conjunction with 32551 for right tube thoracostomy)

43289 Unlisted laparoscopy procedure, esophagus

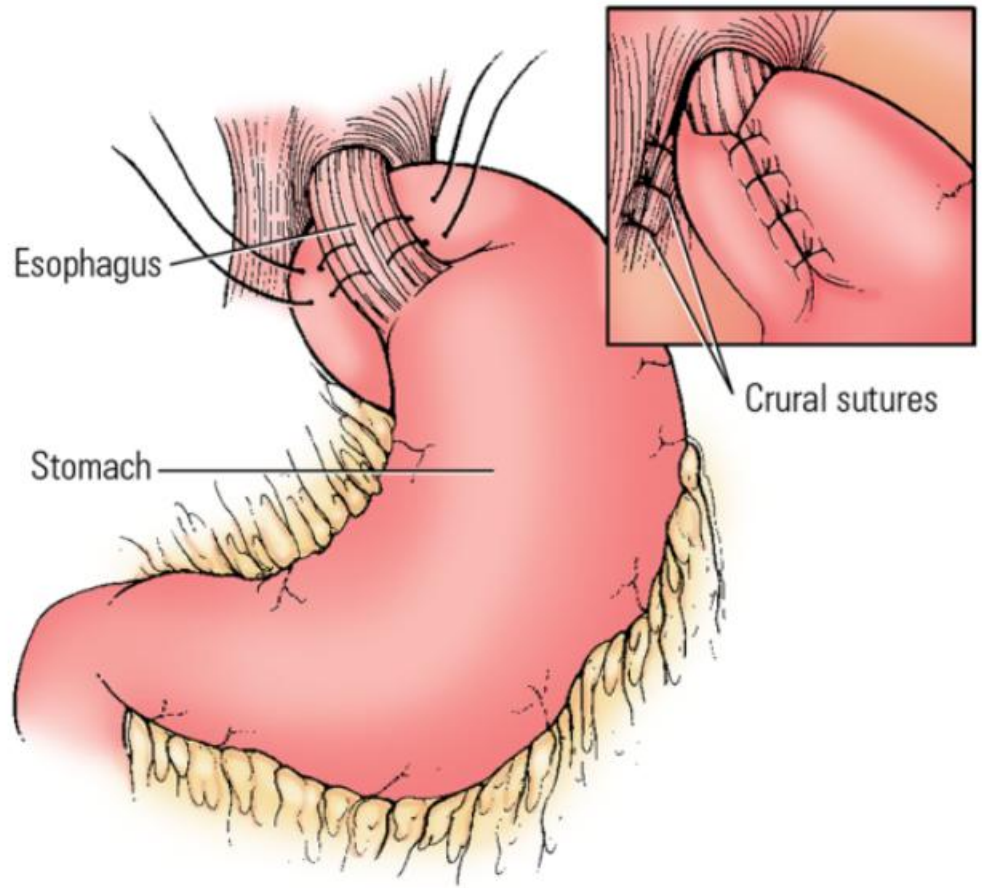
CPT Assistant Jun 11:8, Feb 12:3, Nov 15:8

43328 thoracotomy

CPT Changes: An Insider's View 2011



CPT Assistant Jun 11:8, Feb 12:3, Nov 15:8

(For esophagogastroduodenoscopy fundoplasty, partial or complete, transoral approach, use 43210)

Nissen Fundoplasty

43327, 43328

The lower esophagus is accessed through an upper abdominal or lower thoracic incision. The fundus of the stomach is mobilized and wrapped around the lower esophageal sphincter, and the wrap is sutured into place.

43330 Esophagomyotomy (Heller type); abdominal approach

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:22

(For laparoscopic esophagomyotomy procedure, use 43279)

43331 thoracic approach

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:22

(For thoracoscopic esophagomyotomy, use 32665)

43332 Repair, paraesophageal hiatal hernia (including fundoplication), via laparotomy, except neonatal; without implantation of mesh or other prosthesis

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Feb 12:3

43333 with implantation of mesh or other prosthesis

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Feb 12:3

(For neonatal diaphragmatic hernia repair, use 39503)

43334 Repair, paraesophageal hiatal hernia (including fundoplication), via thoracotomy, except neonatal; without implantation of mesh or other prosthesis

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Feb 12:3

43335 with implantation of mesh or other prosthesis

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Feb 12:3

(For neonatal diaphragmatic hernia repair, use 39503)

43336 Repair, paraesophageal hiatal hernia, (including fundoplication), via thoracoabdominal incision, except neonatal; without implantation of mesh or other prosthesis

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Feb 12:3

43337 with implantation of mesh or other prosthesis

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Feb 12:3

(For neonatal diaphragmatic hernia repair, use 39503)

+ 43338 Esophageal lengthening procedure (eg, Collis gastroplasty or wedge gastroplasty) (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Jun 11:10, Feb 12:3

(Use 43338 in conjunction with 43280, 43327-43337)

43340 Esophagojejunostomy (without total gastrectomy); abdominal approach

43341 thoracic approach

43351 Esophagostomy, fistulization of esophagus, external; thoracic approach

CPT Changes: An Insider's View 2015

43352 cervical approach

CPT Changes: An Insider's View 2015

43360 Gastrointestinal reconstruction for previous esophagectomy, for obstructing esophageal lesion or fistula, or for previous esophageal exclusion; with stomach, with or without pyloroplasty

43361 with colon interposition or small intestine reconstruction, including intestine mobilization, preparation, and anastomosis(es)

CPT Changes: An Insider's View 2002

43400 Ligation, direct, esophageal varices

43405 Ligation or stapling at gastroesophageal junction for pre-existing esophageal perforation

43410 Suture of esophageal wound or injury; cervical approach

CPT Assistant Jun 96:7

43415 transthoracic or transabdominal approach

43420 Closure of esophagostomy or fistula; cervical approach

43425 transthoracic or transabdominal approach

(To report transabdominal paraesophageal hiatal hernia repair, see 43332, 43333. To report transthoracic diaphragmatic hernia repair, see 43334, 43335)

Manipulation

(For associated esophagogram, use 74220)

43450 Dilation of esophagus, by unguided sound or bougie, single or multiple passes

CPT Changes: An Insider's View 2014

CPT Assistant Spring 94:1, Jan 97:10, Apr 98:14, Jun 98:10, Dec 13:3, Jul 17:10, Jul 24:13

(For radiological supervision and interpretation, use 74360)

43453 Dilation of esophagus, over guide wire

CPT Changes: An Insider's View 2017

CPT Assistant Spring 94:1, Jan 97:10, Dec 97:11

(For dilation with endoscopic visualization, see 43195, 43226)

(For dilation of esophagus, by balloon or dilator, see 43214, 43220, 43233, 43249)

(For radiological supervision and interpretation, use 74360)

(For endoscopic dilation of esophagus with balloon less than 30 mm diameter, see 43195, 43220, 43249)

(For endoscopic dilation of esophagus with balloon 30 mm diameter or larger, see 43214, 43233)

43460 Esophagogastric tamponade, with balloon (Sengstaken type)

CPT Changes: An Insider's View 2009

(For removal of esophageal foreign body by balloon catheter, see 43499, 74235)

Other Procedures

43496 Free jejunum transfer with microvascular anastomosis

CPT Assistant Nov 96:8, Apr 97:4, Jun 97:10, Nov 97:17, Nov 98:16

(Do not report code 69990 in addition to code 43496)

43497 Lower esophageal myotomy, transoral (ie, peroral endoscopic myotomy [POEM])

CPT Changes: An Insider's View 2022

CPT Assistant Dec 21:20

(Do not report 43497 in conjunction with 32665, 43191, 43197, 43200, 43235)

43499 Unlisted procedure, esophagus

CPT Assistant May 07:10, Oct 10:12, Dec 10:12, May 11:9, Dec 11:19, Mar 13:13, Nov 15:8, 11, Jul 18:7, Sep 22:13

Stomach

Incision

43500 Gastrotomy; with exploration or foreign body removal

43501 with suture repair of bleeding ulcer

43502 with suture repair of pre-existing esophagogastric laceration (eg, Mallory-Weiss)

43510 with esophageal dilation and insertion of permanent intraluminal tube (eg, Celestin or Mousseaux-Barbin)

43520 Pyloromyotomy, cutting of pyloric muscle (Fredet-Ramstedt type operation)

(Do not report modifier 63 in conjunction with 43520)

Excision

43605 Biopsy of stomach, by laparotomy

CPT Changes: An Insider's View 2011

43610 Excision, local; ulcer or benign tumor of stomach

43611 malignant tumor of stomach

43620 Gastrectomy, total; with esophagoenterostomy

43621 with Roux-en-Y reconstruction

43622 with formation of intestinal pouch, any type

43631 Gastrectomy, partial, distal; with gastroduodenostomy

43632 with gastrojejunostomy

43633 with Roux-en-Y reconstruction

43634 with formation of intestinal pouch

+ 43635 Vagotomy when performed with partial distal gastrectomy (List separately in addition to code[s] for primary procedure)

CPT Assistant Nov 97:17

(Use 43635 in conjunction with 43631, 43632, 43633, 43634)

43640 Vagotomy including pyloroplasty, with or without gastrostomy; truncal or selective

(For pyloroplasty, use 43800)

(For vagotomy, see 64755, 64760)

43641 parietal cell (highly selective)

(For upper gastrointestinal endoscopy, see 43235-43259)

Laparoscopy

►Surgical laparoscopy always includes diagnostic laparoscopy. To report a diagnostic laparoscopy (separate procedure), use 49320.◄

(For upper gastrointestinal endoscopy including esophagus, stomach, and either the duodenum and/or jejunum, see 43235-43259)

43644 Laparoscopy, surgical, gastric restrictive procedure; with gastric bypass and Roux-en-Y gastroenterostomy (roux limb 150 cm or less)

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* May 05:3, Nov 22:12, Feb 24:33

(Do not report 43644 in conjunction with 43846, 49320)

(Esophagogastroduodenoscopy [EGD] performed for a separate condition should be reported with modifier 59)

(For greater than 150 cm, use 43645)

(For open procedure, use 43846)

43645 with gastric bypass and small intestine reconstruction to limit absorption

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* May 05:3, Nov 22:12, Feb 24:33

(Do not report 43645 in conjunction with 49320, 43847)

43647 Laparoscopy, surgical; implantation or replacement of gastric neurostimulator electrodes, antrum

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Mar 07:4

43648 revision or removal of gastric neurostimulator electrodes, antrum

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Mar 07:4

(For open approach, see 43881, 43882)

(For insertion of gastric neurostimulator pulse generator, use 64590)

(For revision or removal of gastric neurostimulator pulse generator, use 64595)

(For electronic analysis and programming of gastric neurostimulator pulse generator, see 95980, 95981, 95982)

(For laparoscopic implantation, revision, or removal of gastric neurostimulator electrodes, lesser curvature [morbid obesity], use 43659)

43651 Laparoscopy, surgical; transection of vagus nerves, truncal

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:22, Mar 00:8

43652 transection of vagus nerves, selective or highly selective

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:22, Mar 00:8

43653 gastrostomy, without construction of gastric tube (eg, Stamm procedure) (separate procedure)

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:22, Mar 00:8

43659 Unlisted laparoscopy procedure, stomach

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:22, Mar 00:8, Apr 06:19, Jun 06:16, Dec 07:12, Jun 11:8, Dec 11:19, Feb 13:13, Jun 13:13, Jul 18:7, Jun 23:27

Introduction

43752 Naso- or oro-gastric tube placement, requiring physician's skill and fluoroscopic guidance (includes fluoroscopy, image documentation and report)

- *CPT Changes: An Insider's View* 2001, 2004
- *CPT Assistant* Jan 02:11, Apr 03:7, Oct 03:2, Jul 06:4, Feb 07:10, Jul 07:1, Aug 08:7, Sep 11:4, May 14:4, Mar 18:11, Aug 19:8, Jan 22:3, Jun 22:19, Dec 22:10, Nov 23:26
- *Clinical Examples in Radiology* Fall 21:17, Winter 25:29

(Do not report 43752 in conjunction with critical care codes 99291-99292, neonatal critical care codes 99468, 99469, pediatric critical care codes 99471, 99472 or low birth weight intensive care service codes 99478, 99479)

(For percutaneous placement of gastrostomy tube, use 49440)

(For enteric tube placement, see 44500, 74340)

43753 Gastric intubation and aspiration(s) therapeutic, necessitating physician's skill (eg, for gastrointestinal hemorrhage), including lavage if performed

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Sep 11:3, May 14:4, Aug 19:8, Jan 22:3, Jun 22:19, Dec 22:10

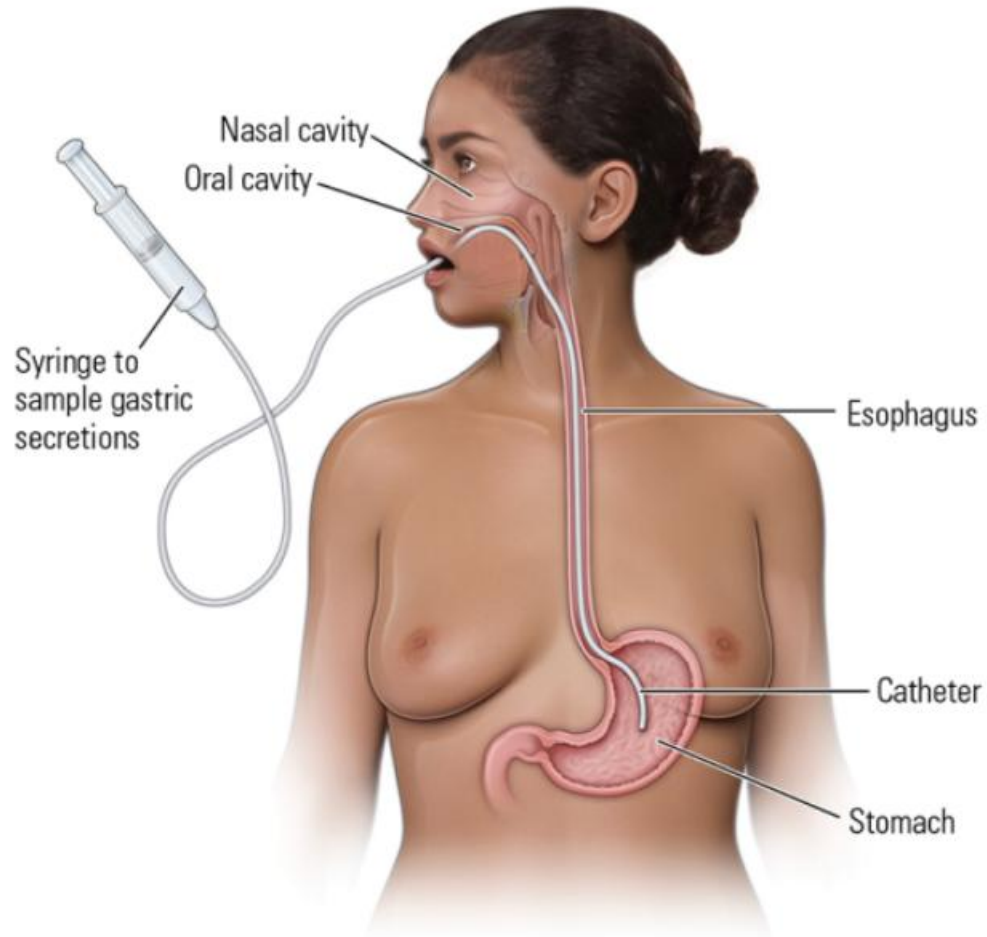
43754 Gastric intubation and aspiration, diagnostic; single specimen (eg, acid analysis)

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Dec 10:10, Sep 11:3

43755 collection of multiple fractional specimens with gastric stimulation, single or double lumen tube (gastric secretory study) (eg, histamine, insulin, pentagastrin, calcium, secretin), includes drug administration

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Dec 10:10, Sep 11:3

(For gastric acid analysis, use 82930)



(For naso- or oro-gastric tube placement by physician with fluoroscopic guidance, use 43752)

(Report the drug[s] or substance[s] administered. The fluid used to administer the drug[s] is not separately reported)

Gastric Intubation

43753

A large-bore gastric lavage tube is inserted orally through the esophagus into the stomach for expedient lavage and evacuation of stomach contents (eg, poisonings, hemorrhage).

43756 Duodenal intubation and aspiration, diagnostic, includes image guidance; single specimen (eg, bile study for crystals or afferent loop culture)

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Dec 10:10, Sep 11:3

43757 collection of multiple fractional specimens with pancreatic or gallbladder stimulation, single or double lumen tube, includes drug administration

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Dec 10:10, Sep 11:3

(For appropriate chemical analysis procedures, see 89049-89240)

(Report the substances[s] or drug[s] administered. The fluid used to administer the drug[s] is not separately reported)

(To report fluoroscopically guided replacement of gastrostomy tube, use 49450)

(For endoscopic placement of gastrostomy tube, use 43246)

43761 Repositioning of a naso- or oro-gastric feeding tube, through the duodenum for enteric nutrition

- *CPT Changes: An Insider's View* 2000, 2008, 2010
- *CPT Assistant* Oct 96:9, Nov 99:22, Jun 08:8, Aug 08:7
- *Clinical Examples in Radiology* Winter 25:29

(Do not report 43761 in conjunction with 44500, 49446)

(If imaging guidance is performed, use 76000)

(For endoscopic conversion of a gastrostomy tube to jejunostomy tube, use 44373)

(For placement of a long gastrointestinal tube into the duodenum, use 44500)

43762 Replacement of gastrostomy tube, percutaneous, includes removal, when performed, without imaging or endoscopic guidance; not requiring revision of gastrostomy tract

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Feb 19:5, Oct 21:5-6, Jun 22:6-8
- *Clinical Examples in Radiology* Winter 19:12, Summer 22:15

43763 requiring revision of gastrostomy tract

- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Feb 19:5, Oct 19:10, Oct 21:5-6, Jun 22:6-8
- *Clinical Examples in Radiology* Winter 19:12, Summer 22:15

(For percutaneous replacement of gastrostomy tube under fluoroscopic guidance, use 49450)

(For endoscopically directed placement of gastrostomy tube, use 43246)

Bariatric Surgery

Bariatric surgical procedures may involve the stomach, duodenum, jejunum, and/or the ileum.

Laparoscopy

Surgical laparoscopy always includes diagnostic laparoscopy. To report a diagnostic laparoscopy (separate procedure), use 49320.

Typical postoperative follow-up care (see Surgery Guidelines, CPT Surgical Package Definition) after gastric restriction using the adjustable gastric restrictive device includes subsequent restrictive device adjustment(s through the postoperative period for the typical patient. Adjustment consists of changing the gastric restrictive device component diameter by injection or aspiration of fluid through the subcutaneous port component.

43770 Laparoscopy, surgical, gastric restrictive procedure; placement of adjustable gastric restrictive device (eg, gastric band and subcutaneous port components)

- *CPT Changes: An Insider's View* 2006, 2008
- *CPT Assistant* Dec 10:13, Nov 22:12

(For individual component placement, report 43770 with modifier 52)

43771 revision of adjustable gastric restrictive device component only

- *CPT Changes: An Insider's View* 2006, 2008
- *CPT Assistant* Nov 22:12

43772 removal of adjustable gastric restrictive device component only

- *CPT Changes: An Insider's View* 2006, 2008
- *CPT Assistant* Nov 22:12

43773 removal and replacement of adjustable gastric restrictive device component only

- *CPT Changes: An Insider's View* 2006, 2008
- *CPT Assistant* Nov 22:12

(Do not report 43773 in conjunction with 43772)

43774 removal of adjustable gastric restrictive device and subcutaneous port components

- *CPT Changes: An Insider's View* 2006, 2008
- *CPT Assistant* Nov 22:12

(For removal and replacement of both gastric band and subcutaneous port components, use 43659)

43775 longitudinal gastrectomy (ie, sleeve gastrectomy)

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Oct 19:10, Nov 22:12

(For open gastric restrictive procedure, without gastric bypass, for morbid obesity, other than vertical-banded gastroplasty, use 43843)

Other Procedures

43800 Pyloroplasty

(For pyloroplasty and vagotomy, use 43640)

43810 Gastroduodenostomy

43820 Gastrojejunostomy; without vagotomy

43825 with vagotomy, any type

43830 Gastrostomy, open; without construction of gastric tube (eg, Stamm procedure) (separate procedure)

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:22

43831 neonatal, for feeding

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:22, Feb 19:5

(For percutaneous replacement of gastrostomy tube with removal when performed without imaging or endoscopy, see 43762, 43763)

(For percutaneous replacement of gastrostomy tube under fluoroscopic guidance, use 49450)

(Do not report modifier 63 in conjunction with 43831)

43832 with construction of gastric tube (eg, Janeway procedure)

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:22

(For percutaneous endoscopic gastrostomy, use 43246)

43840 Gastrorrhaphy, suture of perforated duodenal or gastric ulcer, wound, or injury

43842 Gastric restrictive procedure, without gastric bypass, for morbid obesity; vertical-banded gastroplasty

- *CPT Assistant* May 98:5

43843 other than vertical-banded gastroplasty

- *CPT Assistant* May 98:5

(For laparoscopic longitudinal gastrectomy [ie, sleeve gastrectomy], use 43775)

43845 Gastric restrictive procedure with partial gastrectomy, pylorus-preserving duodenoileostomy and ileoileostomy (50 to 100 cm common channel) to limit absorption (biliopancreatic diversion with duodenal switch)

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* May 05:3, Nov 22:12

(Do not report 43845 in conjunction with 43633, 43847, 44130, 49000)

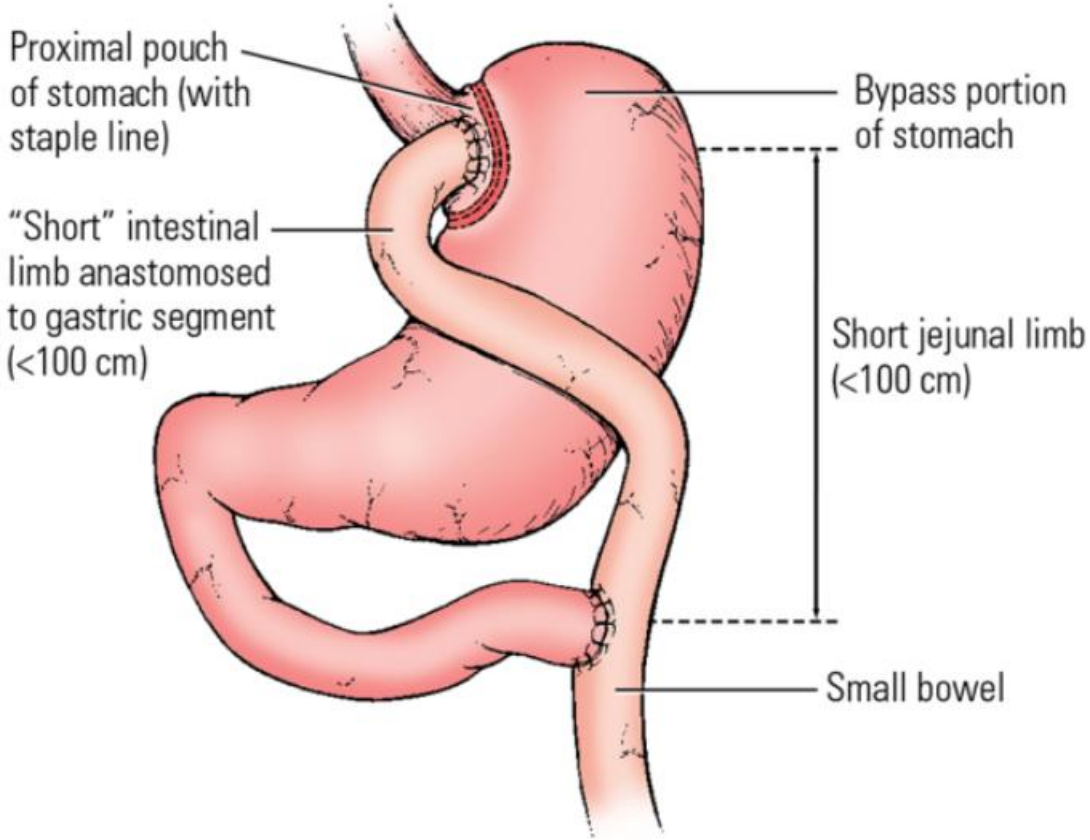
43846 Gastric restrictive procedure, with gastric bypass for morbid obesity; with short limb (150 cm or less) Roux-en-Y gastroenterostomy

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* May 98:5, May 05:3, Nov 22:12

(For greater than 150 cm, use 43847)

(For laparoscopic procedure, use 43644)

(For laparoscopic procedure, use 43644)



43847 with small intestine reconstruction to limit absorption

- *CPT Changes: An Insider's View* 2015
- *CPT Assistant* May 98:5, May 02:7

Gastric Bypass for Morbid Obesity

43846

The stomach is partitioned with a staple line on the lesser curvature (no band, no gastric transection). A short limb of small bowel (less than 100 cm) is divided and anastomosed to the small upper stomach pouch.

43848 Revision, open, of gastric restrictive procedure for morbid obesity, other than adjustable gastric restrictive device (separate procedure)

CPT Changes: An Insider's View 2006, 2008

CPT Assistant May 98:5, Apr 06:1

(For laparoscopic adjustable gastric restrictive procedures, see 43770-43774)

(For gastric restrictive port procedures, see 43886-43888)

43860 Revision of gastrojejunal anastomosis (gastrojejunostomy) with reconstruction, with or without partial gastrectomy or intestine resection; without vagotomy

CPT Changes: An Insider's View 2002

43865 with vagotomy

43870 Closure of gastrostomy, surgical

CPT Assistant Jul 18:14

43880 Closure of gastrocolic fistula

43881 Implantation or replacement of gastric neurostimulator electrodes, antrum, open

CPT Changes: An Insider's View 2007

CPT Assistant Mar 07:4

43882 Revision or removal of gastric neurostimulator electrodes, antrum, open

CPT Changes: An Insider's View 2007

CPT Assistant Mar 07:4

(For laparoscopic approach, see 43647, 43648)

(For insertion of gastric neurostimulator pulse generator, use 64590)

(For revision or removal of gastric neurostimulator pulse generator, use 64595)

(For electronic analysis and programming of gastric neurostimulator pulse generator, see 95980, 95981, 95982)

(For open implantation, revision, or removal of gastric neurostimulator electrodes, lesser curvature [morbid obesity] or vagal trunk [EGJ] neurostimulator electrodes, use 43999)

43886 Gastric restrictive procedure, open; revision of subcutaneous port component only

CPT Changes: An Insider's View 2006

43887 removal of subcutaneous port component only

CPT Changes: An Insider's View 2006

43888 removal and replacement of subcutaneous port component only

CPT Changes: An Insider's View 2006

(Do not report 43888 in conjunction with 43774, 43887)

(For laparoscopic removal of both gastric restrictive device and subcutaneous port components, use 43774)

● **43889** Gastric restrictive procedure, transoral, endoscopic sleeve gastroplasty (ESG), including argon plasma coagulation, when performed

CPT Changes: An Insider's View 2026

►(Do not report 43889 in conjunction with 43191, 43197, 43200, 43235)◄

43999 Unlisted procedure, stomach

CPT Assistant Mar 10:10, Jun 11:13, Feb 13:13, Jul 18:14, Dec 18:10, Dec 21:20, Sep 22:13

Intestines (Except Rectum)

Incision

44005 Enterolysis (freeing of intestinal adhesion) (separate procedure)

CPT Changes: An Insider's View 2000

CPT Assistant Winter 90:6, Nov 97:17, Nov 99:23, Jan 00:11, Apr 00:10, Feb 18:11

(Do not report 44005 in addition to 45136)

(For laparoscopic approach, use 44180)

44010 Duodenotomy, for exploration, biopsy(s), or foreign body removal

+ 44015 Tube or needle catheter jejunostomy for enteral alimentation, intraoperative, any method (List separately in addition to primary procedure)

CPT Assistant Mar 02:10, Jul 10:10

44020 Enterotomy, small intestine, other than duodenum; for exploration, biopsy(s), or foreign body removal

CPT Changes: An Insider's View 2002

44021 for decompression (eg, Baker tube)

44025 Colotomy, for exploration, biopsy(s), or foreign body removal

(For exteriorization of intestine (Mikulicz resection with crushing of spur), see 44602-44605)

44050 Reduction of volvulus, intussusception, internal hernia, by laparotomy

44055 Correction of malrotation by lysis of duodenal bands and/or reduction of midgut volvulus (eg, Ladd procedure)

(Do not report modifier 63 in conjunction with 44055)

Excision

Intestinal allotransplantation involves three distinct components of physician work:

1. ***Cadaver donor enterectomy,*** which includes harvesting the intestine graft and cold preservation of the graft (perfusing with cold preservation solution and cold maintenance) (use 44132). ***Living donor enterectomy,*** which includes harvesting the intestine graft, cold preservation of the graft (perfusing with cold preservation solution and cold maintenance), and care of the donor (use 44133).
2. ***Backbench work:***

   Standard preparation of an intestine allograft prior to transplantation includes mobilization and fashioning of the superior mesenteric artery and vein (see 44715).

   Additional reconstruction of an intestine allograft prior to transplantation may include venous and/or arterial anastomosis(es) (see 44720-44721).
3. ***Recipient intestinal allotransplantation with or without recipient enterectomy,*** which includes transplantation of allograft and care of the recipient (see 44135, 44136).

44100 Biopsy of intestine by capsule, tube, peroral (1 or more specimens)

44110 Excision of 1 or more lesions of small or large intestine not requiring anastomosis, exteriorization, or fistulization; single enterotomy

CPT Changes: An Insider's View 2002

44111 multiple enterotomies

44120 Enterectomy, resection of small intestine; single resection and anastomosis

CPT Assistant Mar 04:3, Aug 08:7, Nov 18:11, Nov 22:22

+ **44121** each additional resection and anastomosis (List separately in addition to code for primary procedure)

(Use 44121 in conjunction with 44120)

44125 with enterostomy

44126 Enterectomy, resection of small intestine for congenital atresia, single resection and anastomosis of proximal segment of intestine; without tapering

CPT Changes: An Insider's View 2002

44127 with tapering

CPT Changes: An Insider's View 2002

+ **44128** each additional resection and anastomosis (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2002

(Use 44128 in conjunction with 44126, 44127)

(Do not report modifier 63 in conjunction with 44126, 44127, 44128)

44130 Enteroenterostomy, anastomosis of intestine, with or without cutaneous enterostomy (separate procedure)

44132 Donor enterectomy (including cold preservation), open; from cadaver donor

CPT Changes: An Insider's View 2001, 2005

44133 partial, from living donor

CPT Changes: An Insider's View 2001

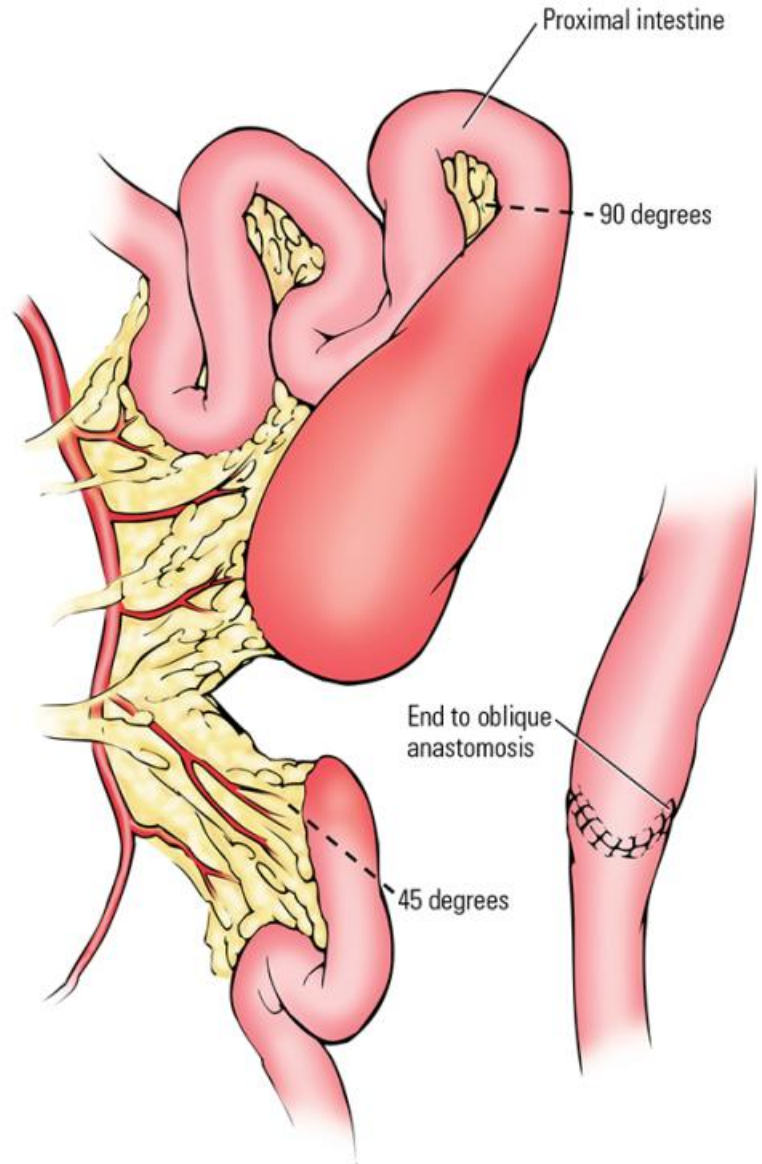
(For backbench intestinal graft preparation or reconstruction, see 44715, 44720, 44721)

44135 Intestinal allotransplantation; from cadaver donor

CPT Changes: An Insider's View 2001

44136 from living donor

CPT Changes: An Insider's View 2001



44137 Removal of transplanted intestinal allograft, complete

CPT Changes: An Insider's View 2005

(For partial removal of transplant allograft, see 44120, 44121, 44140)

Enterectomy, Resection for Congenital Atresia

44127

+ 44139 Mobilization (take-down) of splenic flexure performed in conjunction with partial colectomy (List separately in addition to primary procedure)

(Use 44139 in conjunction with 44140-44147)

44140 Colectomy, partial; with anastomosis

CPT Assistant Fall 92:23, Aug 08:7, Nov 08:7, Sep 10:7, Apr 20:10, Jul 23:1

(For laparoscopic procedure, use 44204)

44141 with skin level cecostomy or colostomy

CPT Assistant Fall 92:24, Nov 08:7

44143 with end colostomy and closure of distal segment (Hartmann type procedure)

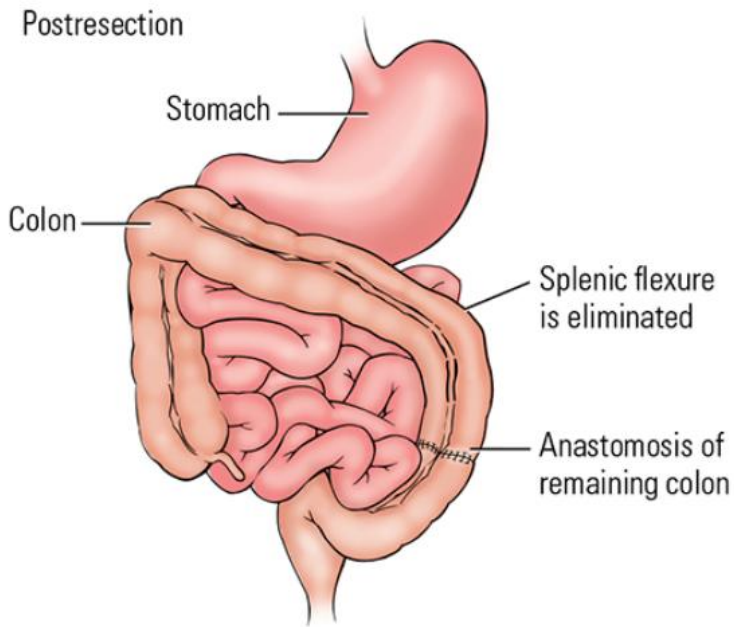
CPT Assistant Fall 92:24, Nov 08:7

(For laparoscopic procedure, use 44206)

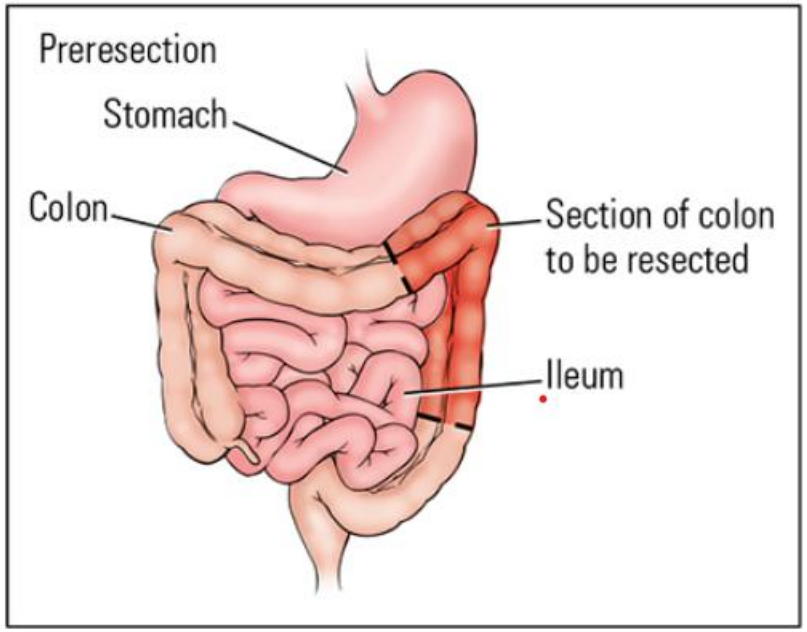
44144 with resection, with colostomy or ileostomy and creation of mucofistula

CPT Assistant Fall 92:24, Nov 08:7

44145 with coloproctostomy (low pelvic anastomosis)



CPT Assistant Fall 92:24, Aug 24:18



(For laparoscopic procedure, use 44207)

Colectomy, Partial

44140

A segment of the colon is resected and an anastomosis is performed between the remaining ends of the colon.

44146 with coloproctostomy (low pelvic anastomosis), with colostomy

CPT Assistant Fall 92:24, Nov 08:7, Jun 18:11, Aug 24:18

(For laparoscopic procedure, use 44208)

44147 abdominal and transanal approach

CPT Assistant Fall 92:24, Nov 08:7

44150 Colectomy, total, abdominal, without proctectomy; with ileostomy or ileoproctostomy

(For laparoscopic procedure, use 44210)

44151 with continent ileostomy

44155 Colectomy, total, abdominal, with proctectomy; with ileostomy

(For laparoscopic procedure, use 44212)

44156 with continent ileostomy

44157 with ileoanal anastomosis, includes loop ileostomy, and rectal mucosectomy, when performed

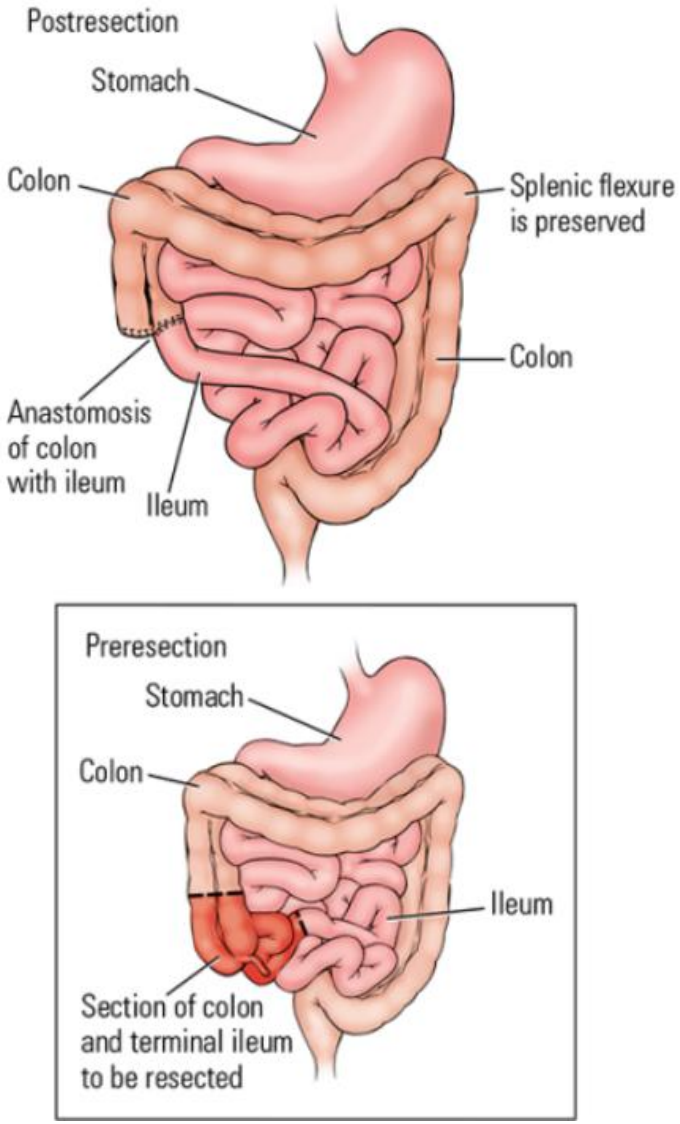
CPT Changes: An Insider's View 2007

44158 with ileoanal anastomosis, creation of ileal reservoir (S or J), includes loop ileostomy, and rectal mucosectomy, when performed

CPT Changes: An Insider's View 2007

(For laparoscopic procedure, use 44211)

44160 Colectomy, partial, with removal of terminal ileum with ileocolostomy



CPT Changes: An Insider's View 2002

(For laparoscopic procedure, use 44205)

Colectomy With Removal of Terminal Ileum and Ileocolostomy

44160

A segment of the colon and terminal ileum is removed and an anastomosis is performed between the remaining ileum and colon.

Laparoscopy

►Surgical laparoscopy always includes diagnostic laparoscopy. To report a diagnostic laparoscopy (separate procedure), use 49320.◄

Incision

44180 Laparoscopy, surgical, enterolysis (freeing of intestinal adhesion) (separate procedure)

- *CPT Changes: An Insider's View* 2006
- *CPT Assistant* Feb 18:11

(For laparoscopy with salpingolysis, ovariolysis, use 58660)

Enterostomy—External Fistulization of Intestines

44186 Laparoscopy, surgical; jejunostomy (eg, for decompression or feeding)

(Do not report 44310 in conjunction with 44144, 44150-44151, 44155, 44156, 45113, 45119, 45136)

44312 Revision of ileostomy; simple (release of superficial scar) (separate procedure)

CPT Assistant Spring 93:35

44314 complicated (reconstruction in-depth) (separate procedure)

44316 Continent ileostomy (Kock procedure) (separate procedure)

(For fiberoptic evaluation, use 44385)

44320 Colostomy or skin level cecostomy;

CPT Changes: An Insider's View 2006

(For laparoscopic procedure, use 44188)

(Do not report 44320 in conjunction with 44141, 44144, 44146, 44605, 45110, 45119, 45126, 45563, 45805, 45825, 50810, 51597, 57307, or 58240)

44322 with multiple biopsies (eg, for congenital megacolon) (separate procedure)

CPT Changes: An Insider's View 2002

44340 Revision of colostomy; simple (release of superficial scar) (separate procedure)

44345 complicated (reconstruction in-depth) (separate procedure)

44346 with repair of paracolostomy hernia (separate procedure)

Endoscopy, Small Intestine

When bleeding occurs as the result of an endoscopic procedure, control of bleeding is not reported separately during the same operative session.

Antegrade transoral small intestinal endoscopy (enteroscopy) is defined by the most distal segment of small intestine that is examined. Codes 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373 are endoscopic procedures to visualize the esophagus through the jejunum using an antegrade approach. Codes 44376, 44377, 44378, 44379 are endoscopic procedures to visualize the esophagus through the ileum using an antegrade approach. If an endoscope cannot be advanced at least 50 cm beyond the pylorus, see 43233, 43235-43259, 43266, 43270; if an endoscope can be passed at least 50 cm beyond pylorus but only into jejunum, see 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373.

To report retrograde examination of small intestine via anus or colon stoma, use 44799, unlisted procedure, intestine.

(Do not report 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373 in conjunction with 43233, 43235-43259, 43266, 43270, 44376, 44377, 44378, 44379)

(Do not report 44376, 44377, 44378, 44379 in conjunction with 43233, 43235-43259, 43266, 43270, 44360, 44361, 44363, 44364, 44365, 44366, 44369, 44370, 44372, 44373)

(For esophagogastroduodenoscopy, see 43233, 43235-43259, 43266, 43270)

44360 Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, not including ileum; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)

- *CPT Changes: An Insider's View* 2015, 2017
- *CPT Assistant* Spring 94:7, Mar 11:10, Dec 13:3, Nov 14:3, Jan 25:33

44361 with biopsy, single or multiple

Endoscopy, Stomal

Definitions

Proctosigmoidoscopy is the examination of the rectum and may include examination of a portion of the sigmoid colon.

Sigmoidoscopy is the examination of the entire rectum, sigmoid colon and may include examination of a portion of the descending colon.

Colonoscopy is the examination of the entire colon, from the rectum to the cecum, and may include examination of the terminal ileum or small intestine proximal to an anastomosis.

Colonoscopy through stoma is the examination of the colon, from the colostomy stoma to the cecum or colon-small intestine anastomosis, and may include examination of the terminal ileum or small intestine proximal to an anastomosis.

When performing a diagnostic or screening endoscopic procedure on a patient who is scheduled and prepared for a total colonoscopy, if the physician is unable to advance the colonoscope to the cecum or colon-small intestine anastomosis due to unforeseen circumstances, report 45378 (colonoscopy) or 44388 (colonoscopy through stoma) with modifier 53 and provide appropriate documentation.

If a therapeutic colonoscopy (44389-44407, 45379, 45380, 45381, 45382, 45384, 45388, 45398) is performed and does not reach the cecum or colon-small intestine anastomosis, report the appropriate therapeutic colonoscopy code with modifier 52 and provide appropriate documentation.

Report ileoscopy through stoma (44380, 44381, 44382, 44384) for endoscopic examination of a patient who has an ileostomy.

Report colonoscopy through stoma (44388-44408) for endoscopic examination of a patient who has undergone segmental resection of the colon (eg, hemicolectomy, sigmoid colectomy, low anterior resection) and has a colostomy.

Coding Tip

For definitions of proctosigmoidoscopy, sigmoidoscopy, colonoscopy, and guidelines for colonoscopies that do not reach the cecum or colon-small intestine anastomosis, see Colon and Rectum/Endoscopy.

For colonoscopy per rectum, see 45378, 45390, 45392, 45393, 45398.

Report proctosigmoidoscopy (45300-45327), flexible sigmoidoscopy (45330-45347), or anoscopy (46600, 46604, 46606, 46608, 46610, 46611, 46612, 46614, 46615), as appropriate for endoscopic examination of the defunctionalized rectum or distal colon in a patient who has undergone colectomy, in addition to colonoscopy through stoma (44388-44408) or ileoscopy through stoma (44380, 44381, 44382, 44384) if appropriate.

When bleeding occurs as the result of an endoscopic procedure, control of bleeding is not reported separately during the same operative session.

For computed tomographic colonography, see 74261, 74262, 74263.

44380 Ileoscopy, through stoma; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)

CPT Changes: An Insider's View 2015, 2017
CPT Assistant Dec 13:3, Nov 14:3, Dec 14:3

(Do not report 44380 in conjunction with 44381, 44382, 44384)

44381 Code is out of numerical sequence. See 44380-44385

44382 with biopsy, single or multiple

(Do not report 44382 in conjunction with 44380)

 # 44381 with transendoscopic balloon dilation

CPT Changes: An Insider's View 2015, 2017
CPT Assistant Nov 14:3

(Do not report 44381 in conjunction with 44380, 44384)

(If fluoroscopic guidance is performed, use 74360)

(For transendoscopic balloon dilation of multiple strictures during the same session, report 44381 with modifier 59 for each additional stricture dilated)

44384 with placement of endoscopic stent (includes pre- and post-dilation and guide wire passage, when performed)

CPT Changes: An Insider's View 2015, 2017
CPT Assistant Nov 14:3

(Do not report 44384 in conjunction with 44380, 44381)

(If fluoroscopic guidance is performed, use 74360)

44385 Endoscopic evaluation of small intestinal pouch (eg, Kock pouch, ileal reservoir [S or J]); diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)

CPT Changes: An Insider's View 2015, 2017

(Do not report 44385 in conjunction with 44386)

44386 with biopsy, single or multiple

CPT Changes: An Insider's View 2015, 2017
CPT Assistant Dec 13:3

(Do not report 44386 in conjunction with 44385)

Coding Tip

Definition of Colonoscopy Through Stoma

Colonoscopy through stoma is the examination of the colon, from the stoma to the cecum, and may include the examination of the terminal ileum or small intestine proximal to an anastomosis. When performing an endoscopic procedure on a patient who is scheduled and prepared for a colonoscopy through stoma, if the physician is unable to advance the colonoscope to the cecum or colon-small intestine anastomosis due to unforeseen circumstances, report 44388 with modifier 53 and provide appropriate documentation.

44388 Colonoscopy through stoma; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)

Introduction

⦸ **44500** Introduction of long gastrointestinal tube (eg, Miller-Abbott) (separate procedure)

CPT Changes: An Insider's View 2017
CPT Assistant Sep 16:9, Apr 25:27
Clinical Examples in Radiology Winter 25:29

(For radiological supervision and interpretation, use 74340)

(For naso- or oro-gastric tube placement, use 43752)

Repair

44602 Suture of small intestine (enterorrhaphy) for perforated ulcer, diverticulum, wound, injury or rupture; single perforation

CPT Assistant Feb 20:13

44603 multiple perforations

44604 Suture of large intestine (colorrhaphy) for perforated ulcer, diverticulum, wound, injury or rupture (single or multiple perforations); without colostomy

CPT Assistant Jul 23:1

44605 with colostomy

44615 Intestinal stricturoplasty (enterotomy and enterorrhaphy) with or without dilation, for intestinal obstruction

44620 Closure of enterostomy, large or small intestine;

CPT Assistant Nov 97:17, May 02:7

44625 with resection and anastomosis other than colorectal

CPT Assistant Nov 97:17

44626 with resection and colorectal anastomosis (eg, closure of Hartmann type procedure)

CPT Assistant Nov 97:17

(For laparoscopic procedure, use 44227)

44640 Closure of intestinal cutaneous fistula

44650 Closure of enteroenteric or enterocolic fistula

44660 Closure of enterovesical fistula; without intestinal or bladder resection

44661 with intestine and/or bladder resection

CPT Changes: An Insider's View 2002

(For closure of renocolic fistula, see 50525, 50526)

(For closure of gastrocolic fistula, use 43880)

(For closure of rectovesical fistula, see 45800, 45805)

44680 Intestinal plication (separate procedure)

Other Procedures

44700 Exclusion of small intestine from pelvis by mesh or other prosthesis, or native tissue (eg, bladder or omentum)

CPT Changes: An Insider's View 2002
CPT Assistant Nov 97:18

(For therapeutic radiation clinical treatment, see **Radiation Oncology** section)

+ 44701 Intraoperative colonic lavage (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2003

(Use 44701 in conjunction with 44140, 44145, 44150, or 44604 as appropriate)

(Do not report 44701 in conjunction with 44950-44960)

44705 Preparation of fecal microbiota for instillation, including assessment of donor specimen

CPT Changes: An Insider's View 2013
CPT Assistant Jan 13:11, May 13:12

(Do not report 44705 in conjunction with 74283, 0780T)

(For fecal instillation by oro-nasogastric tube, use 44799)

(For instillation of fecal microbiota suspension via rectal enema, use 0780T)

44715 Backbench standard preparation of cadaver or living donor intestine allograft prior to transplantation, including mobilization and fashioning of the superior mesenteric artery and vein

CPT Changes: An Insider's View 2005

44720 Backbench reconstruction of cadaver or living donor intestine allograft prior to transplantation; venous anastomosis, each

CPT Changes: An Insider's View 2005

44721 arterial anastomosis, each

44799 Unlisted procedure, small intestine

CPT Changes: An Insider's View 2015
CPT Assistant Dec 00:14, May 08:15, Nov 08:11, Mar 10:10, Jul 10:10, Mar 11:10, May 11:9, May 13:12, Nov 14:3, Sep 22:13, Nov 23:26, Jan 25:33, Apr 25:27
Clinical Examples in Radiology Winter 25:30

(For unlisted laparoscopic procedure, intestine except rectum, use 44238)

(For unlisted procedure, colon, use 45399)

Meckel's Diverticulum and the Mesentery

Excision

44800 Excision of Meckel's diverticulum (diverticulectomy) or omphalomesenteric duct

44820 Excision of lesion of mesentery (separate procedure)

(With intestine resection, see 44120 or 44140 et seq)

Suture

44850 Suture of mesentery (separate procedure)

(For reduction and repair of internal hernia, use 44050)

Other Procedures

44899 Unlisted procedure, Meckel's diverticulum and the mesentery

CPT Assistant Jul 20:14

Appendix

Incision

44900 Incision and drainage of appendiceal abscess, open

CPT Assistant Nov 97:18

(For percutaneous image-guided drainage by catheter of appendiceal abscess, use 49406)

Excision

44950 Appendectomy;

CPT Assistant Feb 92:22, Sep 96:4, Aug 02:2, Nov 08:7

(Incidental appendectomy during intra-abdominal surgery does not usually warrant a separate identification. If necessary to report, add modifier 52)

+ 44955 when done for indicated purpose at time of other major procedure (not as separate procedure) (List separately in addition to code for primary procedure)

CPT Assistant Fall 92:22, Sep 96:4, Apr 97:3, Nov 08:7, Jan 12:13

44960 for ruptured appendix with abscess or generalized peritonitis

CPT Assistant Fall 92:22, Nov 08:7, Dec 19:12

Laparoscopy

►Surgical laparoscopy always includes diagnostic laparoscopy. To report a diagnostic laparoscopy (separate procedure), use 49320.◄

44970 Laparoscopy, surgical, appendectomy

44979 Unlisted laparoscopy procedure, appendix

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:23, Mar 00:9, Jan 12:13

Colon and Rectum

Incision

45000 Transrectal drainage of pelvic abscess

(For transrectal image-guided fluid collection drainage by catheter of pelvic abscess, use 49407)

45005 Incision and drainage of submucosal abscess, rectum

45020 Incision and drainage of deep supralevator, pelvirectal, or retrorectal abscess

(See also 46050, 46060)

Excision

45100 Biopsy of anorectal wall, anal approach (eg, congenital megacolon)

(For endoscopic biopsy, use 45305)

45108 Anorectal myomectomy

45110 Proctectomy; complete, combined abdominoperineal, with colostomy

(For laparoscopic procedure, use 45395)

45111 partial resection of rectum, transabdominal approach

45112 Proctectomy, combined abdominoperineal, pull-through procedure (eg, colo-anal anastomosis)

CPT Assistant Nov 97:18

(For colo-anal anastomosis with colonic reservoir or pouch, use 45119)

45113 Proctectomy, partial, with rectal mucosectomy, ileoanal anastomosis, creation of ileal reservoir (S or J), with or without loop ileostomy

45114 Proctectomy, partial, with anastomosis; abdominal and transsacral approach

45116 transsacral approach only (Kraske type)

45116 transsacral approach only (Kraske type)

45119 Proctectomy, combined abdominoperineal pull-through procedure (eg, colo-anal anastomosis), with creation of colonic reservoir (eg, J-pouch), with diverting enterostomy when performed

CPT Changes: An Insider's View 2006

CPT Assistant Nov 97:18, Apr 06:1

(For laparoscopic procedure, use 45397)

45120 Proctectomy, complete (for congenital megacolon), abdominal and perineal approach; with pull-through procedure and anastomosis (eg, Swenson, Duhamel, or Soave type operation)

45121 with subtotal or total colectomy, with multiple biopsies

45123 Proctectomy, partial, without anastomosis, perineal approach

45126 Pelvic exenteration for colorectal malignancy, with proctectomy (with or without colostomy), with removal of bladder and ureteral transplantations, and/or hysterectomy, or cervicectomy, with or without removal of tube(s), with or without removal of ovary(s), or any combination thereof

CPT Assistant Nov 98:16

45130 Excision of rectal procidentia, with anastomosis; perineal approach

45135 abdominal and perineal approach

45136 Excision of ileoanal reservoir with ileostomy

CPT Changes: An Insider's View 2002

(Do not report 45136 in conjunction with 44005, 44310)

45150 Division of stricture of rectum

45160 Excision of rectal tumor by proctotomy, transsacral or transcoccygeal approach

45171 Excision of rectal tumor, transanal approach; not including muscularis propria (ie, partial thickness)

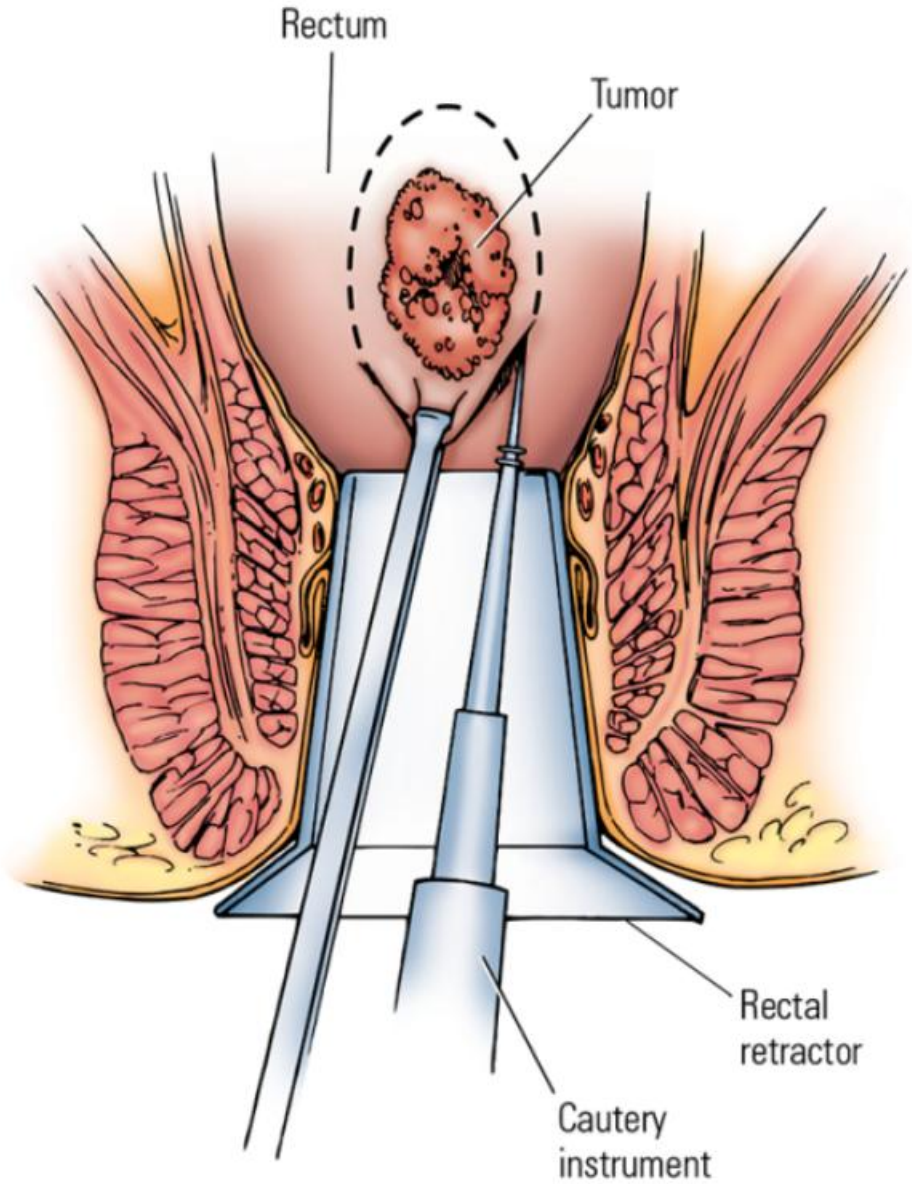
CPT Changes: An Insider's View 2010

CPT Assistant Jun 10:3

45172 including muscularis propria (ie, full thickness)

CPT Changes: An Insider's View 2010

CPT Assistant Jun 10:3, Feb 18:11



(For destruction of rectal tumor, transanal approach, use 45190)

(For transanal endoscopic microsurgical [ie, TEMS] excision of rectal tumor, including muscularis propria [ie, full thickness], use 0184T)

Rectal Tumor Excision

45171-45172

A rectal tumor is excised via transanal approach.

Destruction

45190 Destruction of rectal tumor (eg, electrodesiccation, electrosurgery, laser ablation, laser resection, cryosurgery) transanal approach

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Jun 10:3

(For excision of rectal tumor, transanal approach, see 45171, 45172)

(For transanal endoscopic microsurgical [ie, TEMS] excision of rectal tumor, including muscularis propria [ie, full thickness], use 0184T)

Endoscopy

Definitions

Proctosigmoidoscopy is the examination of the rectum and may include examination of a portion of the sigmoid colon.

Sigmoidoscopy is the examination of the entire rectum, sigmoid colon and may include examination of a portion of the descending colon.

Colonoscopy is the examination of the entire colon, from the rectum to the cecum, and may include examination of the terminal ileum or small intestine proximal to an anastomosis.

Colonoscopy through stoma is the examination of the colon, from the colostomy stoma to the cecum, and may include examination of the terminal ileum or small intestine proximal to an anastomosis.

When performing a diagnostic or screening endoscopic procedure on a patient who is scheduled and prepared for a total colonoscopy, if the physician is unable to advance the colonoscope to the cecum or colon-small intestine anastomosis due to unforeseen circumstances, report 45378 (colonoscopy) or 44388 (colonoscopy through stoma) with modifier 53 and provide appropriate documentation.

If a therapeutic colonoscopy (44389-44407, 45379, 45380, 45381, 45382, 45384, 45388, 45398) is performed and does not reach the cecum or colon-small intestine anastomosis, report the appropriate therapeutic colonoscopy code with modifier 52 and provide appropriate documentation.

Report flexible sigmoidoscopy (45330-45347) for endoscopic examination during which the endoscope is not advanced beyond the splenic flexure.

Report flexible sigmoidoscopy (45330-45347) for endoscopic examination of a patient who has undergone resection of the colon proximal to the sigmoid (eg, subtotal colectomy) and has an ileo-sigmoid or ileo-rectal anastomosis. Report pouch endoscopy codes (44385, 44386) for endoscopic examination of a patient who has undergone resection of colon with ileo-anal anastomosis (eg, J-pouch).

Report colonoscopy (45378-45398) for endoscopic examination of a patient who has undergone segmental resection of the colon (eg, hemicolectomy, sigmoid colectomy, low anterior resection).

For colonoscopy through stoma, see 44388-44408.

Report proctosigmoidoscopy (45300-45327), flexible sigmoidoscopy (45330-45347), or anoscopy (46600, 46604, 46606, 46608, 46610, 46611, 46612, 46614, 46615), as appropriate for endoscopic examination of the defunctionalized rectum or distal colon in a patient who has undergone colectomy, in addition to colonoscopy through stoma (44388-44408) or ileoscopy through stoma (44380, 44381, 44382, 44384) if appropriate.

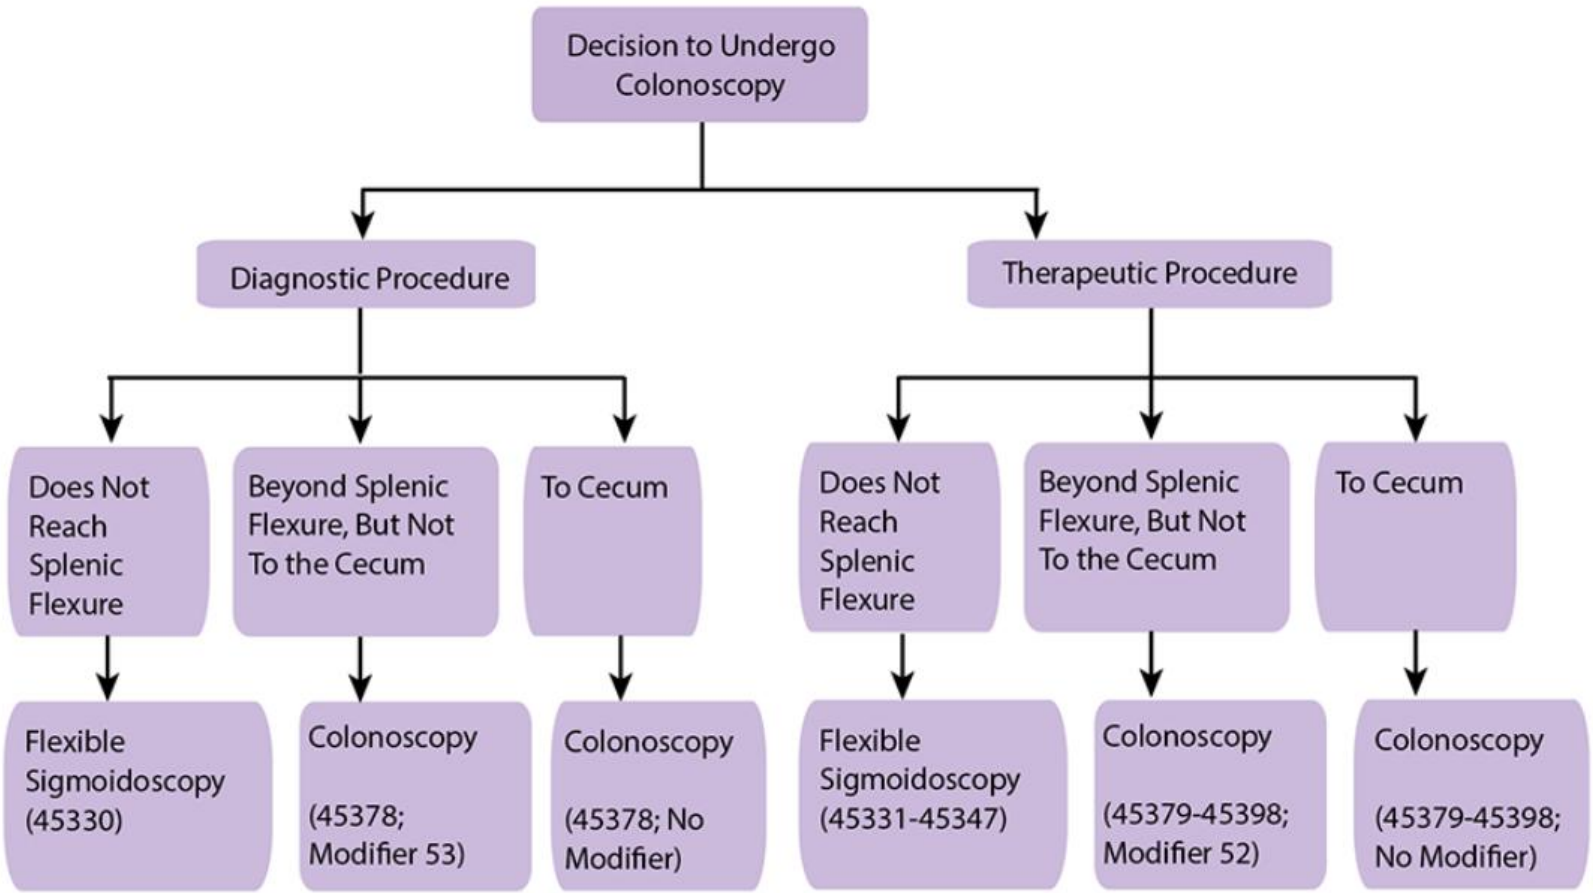
When bleeding occurs as a result of an endoscopic procedure, control of bleeding is not reported separately during the same operative session.

For computed tomographic colonography, see 74261-74263.

45300 Proctosigmoidoscopy, rigid; diagnostic, with or without collection of specimen(s) by brushing or washing (separate procedure)

CPT Assistant Spring 94:8, Oct 97:6, Apr 06:1

45303 with dilation (eg, balloon, guide wire, bougie)



CPT Changes: An Insider's View 2002, 2017

CPT Assistant Spring 94:8, Oct 97:6, Apr 06:1

(Do not report 45300, 45303 in conjunction with 0886T)

(For radiological supervision and interpretation, use 74360)

CPT Changes: An Insider's View 2015, 2017

CPT Assistant Spring 94:9, Dec 14:3

(Do not report 45337 in conjunction with 45330)

(Do not report 45337 more than once per session)

45338 with removal of tumor(s), polyp(s), or other lesion(s) by snare technique

CPT Changes: An Insider's View 2017

CPT Assistant Spring 94:9

(Do not report 45338 in conjunction with 45349 for the same lesion)

(Do not report 45338 in conjunction with 45330)

(For endoscopic mucosal resection, use 45349)

 # 45346 with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed)

CPT Changes: An Insider's View 2015, 2017

CPT Assistant Dec 14:3

(Do not report 45346 in conjunction with 45330)

(Do not report 45346 in conjunction with 45340 for the same lesion)

45340 with transendoscopic balloon dilation

CPT Changes: An Insider's View 2003, 2015, 2017

CPT Assistant Dec 14:3

(Do not report 45340 in conjunction with 45330, 45346, 45347, 0886T)

(If fluoroscopic guidance is performed, use 74360)

(For sigmoidoscopy with predilation followed by therapeutic drug delivery by drug-coated balloon catheter, use 0886T)

(For transendoscopic balloon dilation of multiple strictures during the same session, use 45340 with modifier 59 for each additional stricture dilate

45341 with endoscopic ultrasound examination

CPT Changes: An Insider's View 2001, 2017

CPT Assistant Oct 01:4, May 05:3, Dec 13:3

(Do not report 45341 in conjunction with 45330, 45342, 76872, 76975)

(Do not report 45341 more than once per session)

45342 with transendoscopic ultrasound guided intramural or transmural fine needle aspiration/biopsy(s)

CPT Changes: An Insider's View 2001, 2017

CPT Assistant Oct 01:4, May 05:3, Dec 13:3

(Do not report 45342 in conjunction with 45330, 45341, 76872, 76942, 76975)

(Do not report 45342 more than once per session)

45346 Code is out of numerical sequence. See 45337-45341

45347 with placement of endoscopic stent (includes pre- and post-dilation and guide wire passage, when performed)

- *CPT Changes: An Insider's View* 2015, 2017
- *CPT Assistant* Dec 14:3, Feb 16:13

(Do not report 45347 in conjunction with 45330, 45340)

(If fluoroscopic guidance is performed, use 74360)

45349 with endoscopic mucosal resection

- *CPT Changes: An Insider's View* 2015, 2017
- *CPT Assistant* Dec 14:3, Dec 19:14, May 20:13

(Do not report 45349 in conjunction with 45331, 45335, 45338, 45350 for the same lesion)

(Do not report 45349 in conjunction with 45330)

45350 with band ligation(s) (eg, hemorrhoids)

- *CPT Changes: An Insider's View* 2015, 2017
- *CPT Assistant* Dec 14:3

(Do not report 45350 in conjunction with 45334 for the same lesion)

(Do not report 45350 in conjunction with 45330, 45349, 46221)

(Do not report 45350 more than once per session)

(To report control of active bleeding with band ligation[s], use 45334)

Coding Tip

Definition of Colonoscopy

Colonoscopy is the examination of the entire colon, from the rectum to the cecum, and may include the examination of the terminal ileum or small intestine proximal to an anastomosis.

When performing a diagnostic or screening endoscopic procedure on a patient who is scheduled and prepared for a total colonoscopy, if the physician is unable to advance the colonoscope to the cecum or colon-small intestine anastomosis due to unforeseen circumstances, report 45378 (colonoscopy) or 44388 (colonoscopy through stoma) with modifier 53 and provide appropriate documentation.

CPT Coding Guidelines, Endoscopy

45378 Colonoscopy, flexible; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)

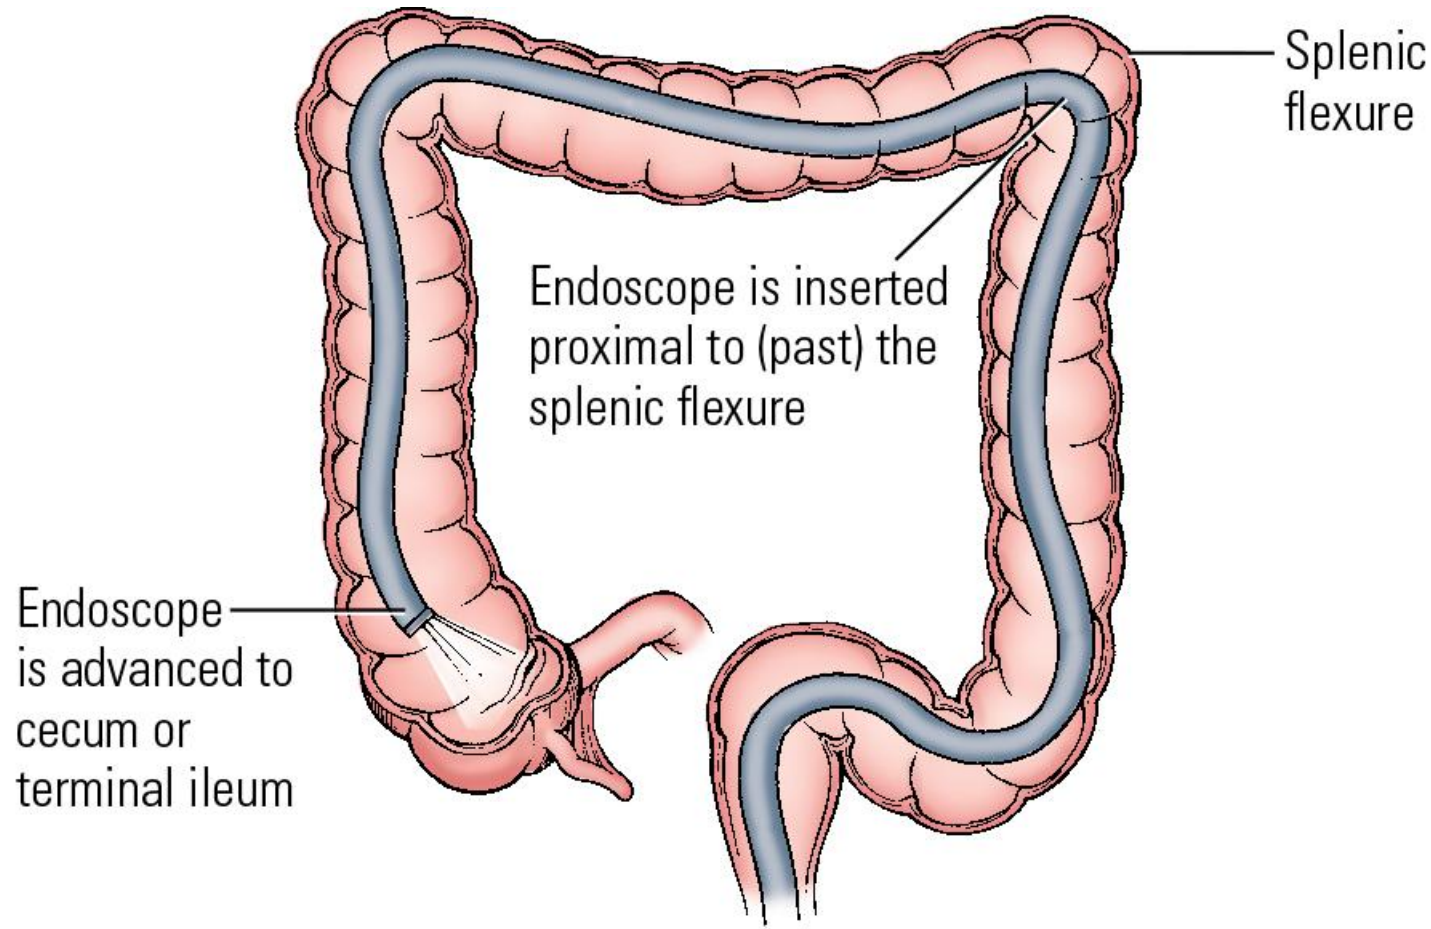
- *CPT Changes: An Insider's View* 2015, 2017
- *CPT Assistant* Spring 94:9, Aug 99:3, Jan 02:12, Jan 04:4, May 05:3, Dec 10:3, Apr 11:12, Jan 13:11, Nov 14:3, Dec 14:3, Sep 15:12, Sep 17:14, Jan 18:7, Aug 21:15

(Do not report 45378 in conjunction with 45379-45393, 45398, 0885T)

(For colonoscopy with decompression [pathologic distention], use 45393)

45379 with removal of foreign body(s)

- *CPT Changes: An Insider's View* 2015, 2017
- *CPT Assistant* Spring 94:9, Aug 99:3, Dec 14:3, Aug 21:15



(Do not report 45379 in conjunction with 45378)

(If fluoroscopic guidance is performed, use 76000)

Colonoscopy

45378

A colonoscope is inserted in the anus and moved through the colon to the cecum in order to visualize the lumen of the rectum and colon.

45380 with biopsy, single or multiple

CPT Changes: An Insider's View 2015, 2017

CPT Assistant Spring 94:9, Jan 96:7, Feb 99:11, Aug 99:3, Jan 04:7, Jul 04:15, Dec 14:3, Aug 21:15, Jun 24:16

(Do not report 45380 in conjunction with 45390 for the same lesion)

(Do not report 45380 in conjunction with 45378)

45381 with directed submucosal injection(s), any substance

CPT Changes: An Insider's View 2003, 2015, 2017

CPT Assistant Mar 03:22, Jan 04:7, Jun 10:5, Jan 17:6

(Do not report 45381 in conjunction with 45382, 45390 for the same lesion)

(Do not report 45381 in conjunction with 45378)

45382 with control of bleeding, any method

CPT Changes: An Insider's View 2002, 2015, 2017

CPT Assistant Spring 94:9, Aug 99:3, Jun 10:5, Dec 14:3

(Do not report 45382 in conjunction with 45381, 45398 for the same lesion)

(Do not report 45382 in conjunction with 45378)

 # 45388 with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed)

CPT Changes: An Insider's View 2015, 2017

CPT Assistant Dec 14:3

(Do not report 45388 in conjunction with 45386 for the same lesion)

(Do not report 45388 in conjunction with 45378)

45384 with removal of tumor(s), polyp(s), or other lesion(s) by hot biopsy forceps

CPT Changes: An Insider's View 2015, 2017

CPT Assistant Spring 94:9, Jul 98:10, Feb 99:11, Aug 99:3, Jan 04:6, Jul 04:15, Apr 11:12, Dec 14:3, Jun 15:10

(Do not report 45384 in conjunction with 45378)

45385 with removal of tumor(s), polyp(s), or other lesion(s) by snare technique

CPT Changes: An Insider's View 2015, 2017

CPT Assistant Spring 94:9, Jan 96:7, Jul 98:10, Aug 99:3, Jan 04:5, Jul 04:15, Jun 10:5, Jan 17:6

(Do not report 45385 in conjunction with 45390 for the same lesion)

(Do not report 45385 in conjunction with 45378)

(For endoscopic mucosal resection, use 45390)

(For endoscopic mucosal resection, use 45390)

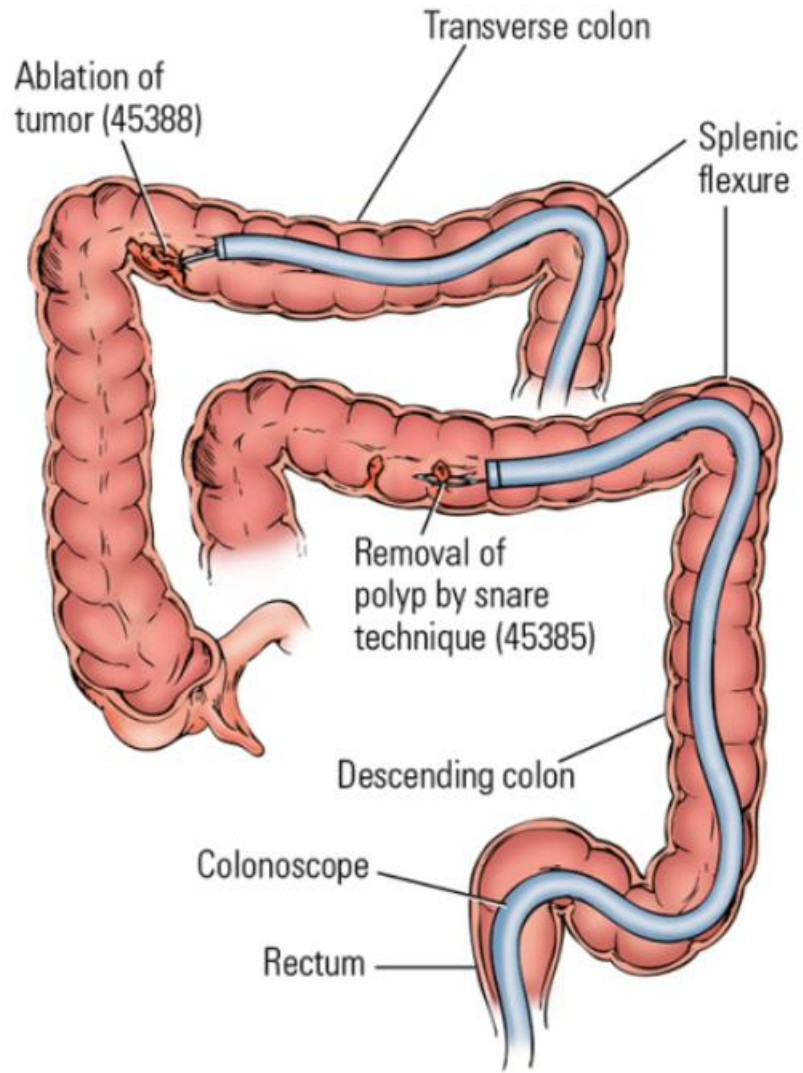
45386 with transendoscopic balloon dilation

- *CPT Changes: An Insider's View* 2003, 2015, 2017
- *CPT Assistant* Dec 14:3

(Do not report 45386 in conjunction with 45378, 45388, 45389, 0885T)

(If fluoroscopic guidance is performed, use 74360)

(For colonoscopy with predilation followed by therapeutic drug delivery by drug-coated balloon catheter, use 0885T)



(For transendoscopic balloon dilation of multiple strictures during the same session, report 45386 with modifier 59 for each additional stricture dilated)

45388 Code is out of numerical sequence. See 45381-45385

Colonoscopy With Lesion Ablation or Removal

45385, 45388

Insertion and advancement of a colonoscope through the colon and to the cecum for ablation (45388) or removal (45385) of tumors, polyps, or other lesions

45389 with endoscopic stent placement (includes pre- and post-dilation and guide wire passage, when performed)

- *CPT Changes: An Insider's View* 2015, 2017
- *CPT Assistant* Dec 14:3

(Do not report 45389 in conjunction with 45378, 45386)

(If fluoroscopic guidance is performed, use 74360)

45390 Code is out of numerical sequence. See 45391-45397

45391 with endoscopic ultrasound examination limited to the rectum, sigmoid, descending, transverse, or ascending colon and cecum, and adjacent structures

- *CPT Changes: An Insider's View* 2005, 2015, 2017
- *CPT Assistant* May 05:3, Dec 13:3, Dec 14:3

(Do not report 45391 in conjunction with 45378, 45392, 76872, 76975)

(Do not report 45391 more than once per session)

45392 with transendoscopic ultrasound guided intramural or transmural fine needle aspiration/biopsy(s), includes endoscopic ultrasound examination limited to the rectum, sigmoid, descending, transverse, or ascending colon and cecum, and adjacent structures

- *CPT Changes: An Insider's View* 2005, 2015, 2017
- *CPT Assistant* May 05:3, Dec 13:3, Dec 14:3

(Do not report 45392 in conjunction with 45378, 45391, 76872, 76942, 76975)

(Do not report 45392 more than once per session)

 # 45390 with endoscopic mucosal resection

- *CPT Changes: An Insider's View* 2015, 2017
- *CPT Assistant* Dec 14:3, Jan 17:6, Dec 19:14, May 20:13

(Do not report 45390 in conjunction with 45380, 45381, 45385, 45398 for the same lesion)

(Do not report 45390 in conjunction with 45378)

45393 with decompression (for pathologic distention) (eg, volvulus, megacolon), including placement of decompression tube, when performed

- *CPT Changes: An Insider's View* 2015, 2017
- *CPT Assistant* Dec 14:4

(Do not report 45393 in conjunction with 45378)

(Do not report 45393 more than once per session)

 # 45398 with band ligation(s) (eg, hemorrhoids)

- *CPT Changes: An Insider's View* 2015, 2017
- *CPT Assistant* Dec 14:3, Sep 17:14, Jan 18:7, Aug 21:15

(Do not report 45398 in conjunction with 45382 for the same lesion)

(Do not report 45398 in conjunction with 45378, 45390, 46221)

(Do not report 45398 more than once per session)

(To report control of active bleeding with band ligation[s], use 45382)

Laparoscopy

►Surgical laparoscopy always includes diagnostic laparoscopy. To report a diagnostic laparoscopy (separate procedure), use 49320.◄

Excision

45395 Laparoscopy, surgical; proctectomy, complete, combined abdominoperineal, with colostomy

CPT Changes: An Insider's View 2006

(For open procedure, use 45110)

Repair

45500 Proctoplasty; for stenosis

45505 for prolapse of mucous membrane

CPT Assistant Oct 13:19, Mar 15:10

45520 Perirectal injection of sclerosing solution for prolapse

CPT Assistant Jul 01:11, Aug 01:10

45540 Proctopexy (eg, for prolapse); abdominal approach

CPT Changes: An Insider's View 2006

(For laparoscopic procedure, use 45400)

45541 perineal approach

45550 with sigmoid resection, abdominal approach

CPT Changes: An Insider's View 2006

(For laparoscopic procedure, use 45402)

45560 Repair of rectocele (separate procedure)

(For repair of rectocele with posterior colporrhaphy, use 57250)

45562 Exploration, repair, and presacral drainage for rectal injury;

45563 with colostomy

45800 Closure of rectovesical fistula;

45805 with colostomy

45820 Closure of rectourethral fistula;

45825 with colostomy

(For rectovaginal fistula closure, see 57300-57308)

Repair

45500 Proctoplasty; for stenosis

45505 for prolapse of mucous membrane

CPT Assistant Oct 13:19, Mar 15:10

45520 Perirectal injection of sclerosing solution for prolapse

CPT Assistant Jul 01:11, Aug 01:10

45540 Proctopexy (eg, for prolapse); abdominal approach

CPT Changes: An Insider's View 2006

(For laparoscopic procedure, use 45400)

45541 perineal approach

45550 with sigmoid resection, abdominal approach

CPT Changes: An Insider's View 2006

(For laparoscopic procedure, use 45402)

45560 Repair of rectocele (separate procedure)

(For repair of rectocele with posterior colporrhaphy, use 57250)

45562 Exploration, repair, and presacral drainage for rectal injury;

45563 with colostomy

45800 Closure of rectovesical fistula;

45805 with colostomy

45820 Closure of rectourethral fistula;

45825 with colostomy

(For rectovaginal fistula closure, see 57300-57308)

Manipulation

45900 Reduction of procidentia (separate procedure) under anesthesia

45905 Dilation of anal sphincter (separate procedure) under anesthesia other than local

45910 Dilation of rectal stricture (separate procedure) under anesthesia other than local

45915 Removal of fecal impaction or foreign body (separate procedure) under anesthesia

CPT Changes: An Insider's View 2003

Other Procedures

Surgical diagnostic anorectal exam (45990) includes the following elements: external perineal exam, digital rectal exam, pelvic exam (when performed), diagnostic anoscopy, and diagnostic rigid proctoscopy.

 # 45399 Unlisted procedure, colon

CPT Changes: An Insider's View 2015

CPT Assistant Nov 14:3, Dec 14:4

45990 Anorectal exam, surgical, requiring anesthesia (general, spinal, or epidural), diagnostic

CPT Changes: An Insider's View 2006

(Do not report 45990 in conjunction with 45300-45327, 46600, 57410, 99170)

45999 Unlisted procedure, rectum

(For unlisted laparoscopic procedure, rectum, use 45499)

Anus

►For incision of thrombosed external hemorrhoid, use 46083. For ligation of internal hemorrhoid(s), see 46221, 46945, 46946. For excision of internal and/or external hemorrhoid(s), see 46250-46262, 46320. For injection of hemorrhoid(s), use 46500. For destruction of internal hemorrhoid(s) by thermal energy, use 46930. For destruction of hemorrhoid(s) by cryosurgery, use 46999. For transanal hemorrhoidal dearterialization, including ultrasound guidance, with mucopexy, when performed, use 46948. For hemorrhoidopexy, use 46947. Do not report 46600 in conjunction with 46020-46947, 0184T, 0963T, during the same operative session.◄

Incision

(For subcutaneous fistulotomy, use 46270)

46020 Placement of seton

CPT Changes: An Insider's View 2002

(Do not report 46020 in conjunction with 46060, 46280, 46600)

46030 Removal of anal seton, other marker

46040 Incision and drainage of ischiorectal and/or perirectal abscess (separate procedure)

46045 Incision and drainage of intramural, intramuscular, or submucosal abscess, transanal, under anesthesia

46050 Incision and drainage, perianal abscess, superficial

(See also 45020, 46060)

Incision

(For subcutaneous fistulotomy, use 46270)

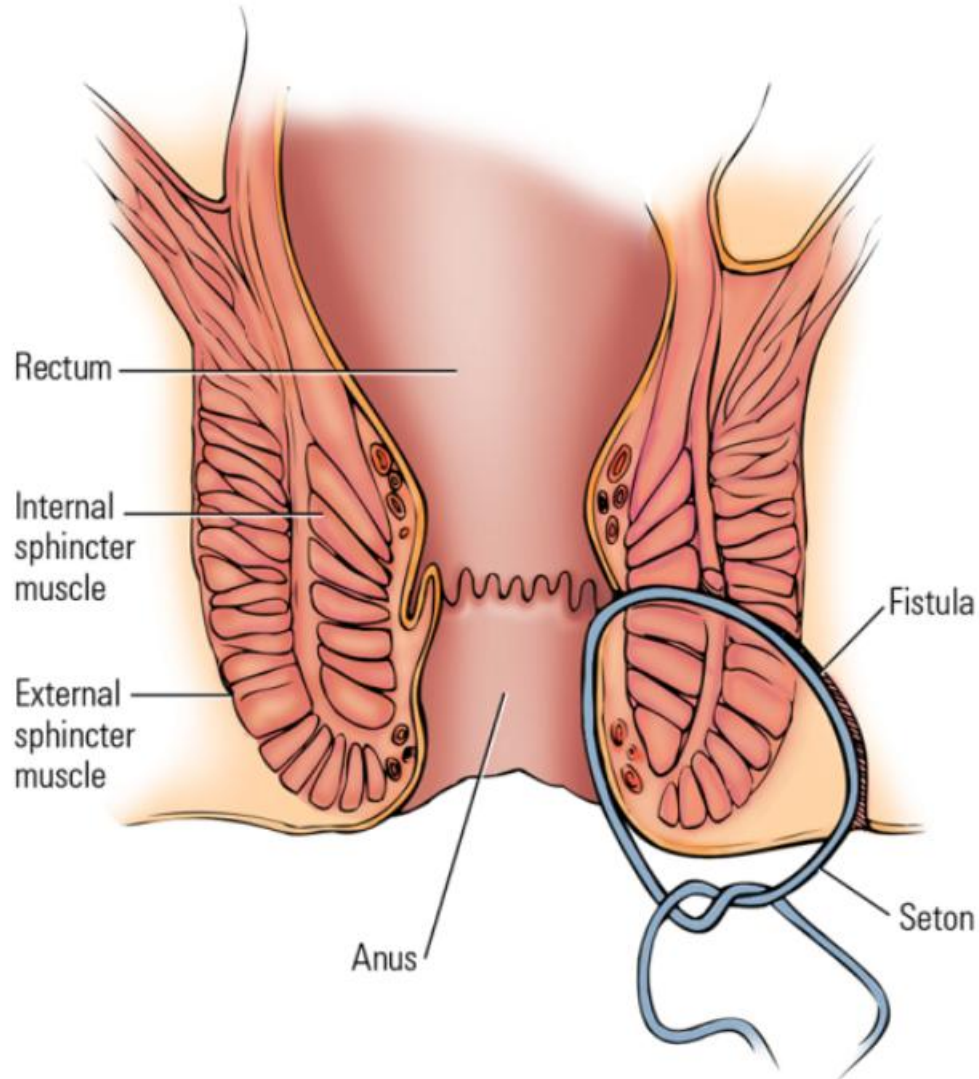
46020 Placement of seton

CPT Changes: An Insider's View 2002

(Do not report 46020 in conjunction with 46060, 46280, 46600)

46030 Removal of anal seton, other marker

46040 Incision and drainage of ischiorectal and/or perirectal abscess (separate procedure)



46045 Incision and drainage of intramural, intramuscular, or submucosal abscess, transanal, under anesthesia

46050 Incision and drainage, perianal abscess, superficial

(See also 45020, 46060)

Placement of Seton

46020

46060 Incision and drainage of ischiorectal or intramural abscess, with fistulectomy or fistulotomy, submuscular, with or without placement of seton

(Do not report 46060 in addition to 46020)

(See also 45020)

46070 Incision, anal septum (infant)

(For anoplasty, see 46700-46705)

(Do not report modifier 63 in conjunction with 46070)

46080 Sphincterotomy, anal, division of sphincter (separate procedure)

46083 Incision of thrombosed hemorrhoid, external

- *CPT Assistant* Jun 97:10

Excision

46200 Fissurectomy, including sphincterotomy, when performed

- *CPT Changes: An Insider's View* 2010

46220 Code is out of numerical sequence. See 46200-46255

46221 Hemorrhoidectomy, internal, by rubber band ligation(s)

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Oct 97:8, Dec 14:3, Apr 15:10, Sep 17:14, Jan 18:7

(Do not report 46221 in conjunction with 45350, 45398)

 # 46945 Hemorrhoidectomy, internal, by ligation other than rubber band; single hemorrhoid column/group, without imaging guidance

- *CPT Changes: An Insider's View* 2010, 2020
- *CPT Assistant* Apr 15:10, Feb 20:11

 # 46946 2 or more hemorrhoid columns/groups, without imaging guidance

- *CPT Changes: An Insider's View* 2010, 2020
- *CPT Assistant* Apr 15:10, Feb 20:11

(Do not report 46221, 46945, 46946 in conjunction with 46948)

(Do not report 46945, 46946 in conjunction with 76872, 76942, 76998)

 # 46948 Hemorrhoidectomy, internal, by transanal hemorrhoidal dearterialization, 2 or more hemorrhoid columns/groups, including ultrasound guidance, with mucopexy, when performed

- *CPT Changes: An Insider's View* 2020
- *CPT Assistant* Feb 20:11, Jun 24:16

(Do not report 46948 in conjunction with 76872, 76942, 76998)

(For transanal hemorrhoidal dearterialization, single hemorrhoid column/group, use 46999)

 # 46220 Excision of single external papilla or tag, anus

CPT Changes: An Insider's View 2010

46230 Excision of multiple external papillae or tags, anus

CPT Changes: An Insider's View 2010

 # 46320 Excision of thrombosed hemorrhoid, external

CPT Changes: An Insider's View 2010

46250 Hemorrhoidectomy, external, 2 or more columns/groups

CPT Changes: An Insider's View 2010

CPT Assistant May 22:17

(For hemorrhoidectomy, external, single column/group, use 46999)

46255 Hemorrhoidectomy, internal and external, single column/group;

CPT Changes: An Insider's View 2010

CPT Assistant Oct 14:15, May 22:17

46257 with fissurectomy

CPT Assistant Apr 25:27

46258 with fistulectomy, including fissurectomy, when performed

CPT Changes: An Insider's View 2010

46260 Hemorrhoidectomy, internal and external, 2 or more columns/groups;

CPT Changes: An Insider's View 2010

CPT Assistant Aug 21:15

46261 with fissurectomy

46262 with fistulectomy, including fissurectomy, when performed

CPT Changes: An Insider's View 2010

CPT Assistant May 05:3

(Do not report 46250-46262 in conjunction with 46948)

Hemorrhoidectomy of Internal Prolapsed Hemorrhoid Columns

46250-46262

46270 Surgical treatment of anal fistula (fistulectomy/fistulotomy); subcutaneous

46275 intersphincteric

CPT Changes: An Insider's View 2010

46280 transsphincteric, suprasphincteric, extrasphincteric or multiple, including placement of seton, when performed

CPT Changes: An Insider's View 2010

(Do not report 46280 in conjunction with 46020)

46285 second stage

46288 Closure of anal fistula with rectal advancement flap

46320 Code is out of numerical sequence. See 46200-46255

Anal column is considered to be an internal hemorrhoid with 3 major areas in the anal canal: right posterior (1 o'clock), right anterior (5 o'clock), and left lateral (9 o'clock) positions of the anus.

Introduction

46500 Injection of sclerosing solution, hemorrhoids

CPT Assistant May 05:3

►(For anoscopy with directed submucosal injection of bulking agent into anal canal, use 0963T)◄

46505 Chemodenervation of internal anal sphincter

CPT Changes: An Insider's View 2006

(For chemodenervation of other muscles, see 64612, 64616, 64617, 64642, 64643, 64644, 64645, 64646, 64647. For destruction of nerve by neurolytic agent, use 64630)

(Report the specific service in conjunction with the specific substance(s) or drug(s) provided)

Endoscopy

Surgical endoscopy always includes diagnostic endoscopy.

46600 Anoscopy; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)

CPT Changes: An Insider's View 2015

CPT Assistant Spring 94:9, Oct 97:6, Apr 06:1, Jun 10:3, Aug 11:9, Jan 18:7

►(Do not report 46600 in conjunction with 46020-46947, 0184T, 0963T, during the same operative session)◄

(For diagnostic high-resolution anoscopy [HRA], use 46601)

46601 diagnostic, with high-resolution magnification (HRA) (eg, colposcope, operating microscope) and chemical agent enhancement, including collection of specimen(s) by brushing or washing, when performed

CPT Changes: An Insider's View 2015

CPT Assistant Oct 18:11

(Do not report 46601 in conjunction with 69990)

46604 with dilation (eg, balloon, guide wire, bougie)

CPT Changes: An Insider's View 2002

CPT Assistant Spring 94:9, Oct 97:6

46606 with biopsy, single or multiple

CPT Assistant Spring 94:9, Oct 97:6, Sep 19:11

(For high-resolution anoscopy [HRA] with biopsy, use 46607)

46607 with high-resolution magnification (HRA) (eg, colposcope, operating microscope) and chemical agent enhancement, with biopsy, single or multiple

CPT Changes: An Insider's View 2015

CPT Assistant Oct 18:11, Dec 19:12

(Do not report 46607 in conjunction with 69990)

46608 with removal of foreign body

CPT Assistant Spring 94:9, Oct 97:6

46610 with removal of single tumor, polyp, or other lesion by hot biopsy forceps or bipolar cautery

CPT Assistant Spring 94:10, Oct 97:6

46611 with removal of single tumor, polyp, or other lesion by snare technique

CPT Assistant Spring 94:10, Oct 97:6

46612 with removal of multiple tumors, polyps, or other lesions by hot biopsy forceps, bipolar cautery or snare technique

CPT Assistant Spring 94:10, Oct 97:6

46614 with control of bleeding (eg, injection, bipolar cautery, unipolar cautery, laser, heater probe, stapler, plasma coagulator)

CPT Changes: An Insider's View 2002

CPT Assistant Spring 94:10, Oct 97:6

46615 with ablation of tumor(s), polyp(s), or other lesion(s) not amenable to removal by hot biopsy forceps, bipolar cautery or snare technique

CPT Assistant Spring 94:10, Oct 97:6

Repair

46700 Anoplasty, plastic operation for stricture; adult

46705 infant

(Do not report modifier 63 in conjunction with 46705)

(For simple incision of anal septum, use 46070)

46706 Repair of anal fistula with fibrin glue

CPT Changes: An Insider's View 2003

46707 Repair of anorectal fistula with plug (eg, porcine small intestine submucosa [SIS])

CPT Changes: An Insider's View 2010

CPT Assistant Jan 12:10, Oct 13:15

46710 Repair of ileoanal pouch fistula/sinus (eg, perineal or vaginal), pouch advancement; transperineal approach

CPT Changes: An Insider's View 2006

46712 combined transperineal and transabdominal approach

CPT Changes: An Insider's View 2006

46715 Repair of low imperforate anus; with anoperineal fistula (cut-back procedure)

46716 with transposition of anoperineal or anovestibular fistula

(Do not report modifier 63 in conjunction with 46715, 46716)

46730 Repair of high imperforate anus without fistula; perineal or sacroperineal approach

46735 combined transabdominal and sacroperineal approaches

(Do not report modifier 63 in conjunction with 46730, 46735)

47125 total left lobectomy

47130 total right lobectomy

Liver Transplantation

Liver allotransplantation involves three distinct components of physician work:

1. ***Cadaver donor hepatectomy*,** which includes harvesting the graft and cold preservation of the graft (perfusing with cold preservation solution and cold maintenance) (use 47133). ***Living donor hepatectomy*,** which includes harvesting the graft, cold preservation of the graft (perfusing with cold preservation solution and cold maintenance), and care of the donor (see 47140-47142).
2. ***Backbench work:***

   Standard preparation of the whole liver graft will include one of the following:

   Preparation of whole liver graft (including cholecystectomy, if necessary, and dissection and removal of surrounding soft tissues to prepare vena cava, portal vein, hepatic artery, and common bile duct for implantation) (use 47143).

   Preparation as described for whole liver graft, plus trisegment split into two partial grafts (use 47144).

   Preparation as described for whole liver graft, plus lobe split into two partial grafts (use 47145).

   Additional reconstruction of the liver graft may include venous and/or arterial anastomosis(es) (see 47146, 47147).
3. ***Recipient liver allotransplantation*,** which includes recipient hepatectomy (partial or whole), transplantation of the allograft (partial or whole), and care of the recipient (use 47135).

47133 Donor hepatectomy (including cold preservation), from cadaver donor
- *CPT Changes: An Insider's View* 2005

47135 Liver allotransplantation, orthotopic, partial or whole, from cadaver or living donor, any age
- *CPT Assistant* Dec 11:16

47140 Donor hepatectomy (including cold preservation), from living donor; left lateral segment only (segments II and III)

(For percutaneous cholecystostomy, use 47490)

Introduction

Percutaneous biliary procedures (eg, transhepatic, transcholecystic) are described by 47490 and 47531-47544, and are performed with imaging guidance. They are differentiated from endoscopic procedures that utilize an access to the biliary tree from a hollow viscus for diagnosis and therapy. Diagnostic cholangiography is typically performed with percutaneous biliary procedures, and is included in 47490, 47533, 47534, 47535, 47536, 47537, 47538, 47539, 47540, and 47541.

Codes 47531 and 47532 describe percutaneous diagnostic cholangiography that includes injection(s) of contrast material, all associated radiological supervision and interpretation, and procedural imaging guidance (eg, ultrasound and/or fluoroscopy). Code 47532 also includes accessing the biliary system with a needle or catheter. Codes 47531 and 47532 may not be reported with codes 47533, 47534, 47535, 47536, 47537, 47538, 47539, 47540, and 47541.

An external biliary drainage catheter is a catheter placed into a bile duct that does not terminate in bowel, and that drains bile externally only. An internal-external biliary drainage catheter is a single, externally accessible catheter that terminates in the small intestine, and may drain bile into the small intestine and/or externally. A "stent," as used in this code set, is a percutaneously placed device (eg, self-expanding metallic mesh stent, plastic tube) that is positioned within the biliary tree and is completely internal, with no portion extending outside the patient.

Codes 47533, 47534, 47535, 47536, 47537, 47538, 47539, and 47540 describe percutaneous therapeutic biliary procedures that include catheter or stent placement, catheter removal and replacement (exchange), and/or catheter removal. These codes include the elements of access, drainage catheter manipulations, diagnostic cholangiography, imaging guidance (eg, ultrasonography and/or fluoroscopy), and all associated radiological supervision and interpretation. Codes 47533, 47534, 47538, 47539, 47540 may be reported once for each catheter or stent placed (eg, bilobar placement, multi-segmental placement). Codes 47535, 47536, and 47537 may be reported once for each catheter conversion, exchange, or removal (eg, bilobar, bisegmental).

Codes 47538, 47539, 47540 may be reported only once per session to describe one or more overlapping or serial stent(s) placed within a single bile duct, or bridging more than one ductal segment (eg, left hepatic duct and common bile duct) through a single percutaneous access. Codes 47538, 47539, 47540 may be reported more than once in the same session using modifier 59 for the additional procedures in the following circumstances: (i) placement of side-by-side (double-barrel) stents within a single bile duct; (ii) placement of two or more stents into separate bile ducts through a single percutaneous access; or (iii) placement of stents through two or more percutaneous access sites (eg, placement of one stent through the interstices of another stent). Code 47538 describes biliary stent placement through an existing access. Therefore, 47538 should not be reported together with 47536 if a biliary drainage catheter (eg, external or internal-external) is replaced after the biliary stent is placed. Code 47540 describes biliary stent placement with the additional service of placing a biliary drainage catheter (eg, external or internal-external). Therefore, 47540 should not be reported with 47533, 47534 for the same ductal system.

Code 47541 describes a procedure to assist with endoscopic procedures performed in conjunction with other physician specialists. Access placed may include wire and/or catheter. Code 47541 may not be reported if a wire is placed through existing percutaneous access.

Codes 47542, 47543, and 47544 describe procedures that may be performed in conjunction with other codes in this family, are add-on codes and do not include access, catheter placement, or diagnostic imaging. Do not report 47542 with 47538, 47539, 47540 because balloon dilation is included in 47538, 47539, and 47540. Code 47544 should not be reported with 47531-47543 for incidental removal of debris. Code 47542 should not be reported with 47544, if a balloon is used for removal of calculi or debris rather than for dilation.

47490 Cholecystostomy, percutaneous, complete procedure, including imaging guidance, catheter placement, cholecystogram when performed, and radiological supervision and interpretation

48547 Duodenal exclusion with gastrojejunostomy for pancreatic injury

CPT Changes: An Insider's View 2002

48548 Pancreaticojejunostomy, side-to-side anastomosis (Puestow-type operation)

CPT Changes: An Insider's View 2007

Pancreas Transplantation

Pancreas allotransplantation involves three distinct components of physician work:

1. ***Cadaver donor pancreatectomy,*** which includes harvesting the pancreas graft, with or without duodenal segment, and cold preservation of the graft (perfusing with cold preservation solution and cold maintenance) (use 48550).
2. ***Backbench work:***

   Standard preparation of a cadaver donor pancreas allograft prior to transplantation includes dissection of the allograft from surrounding soft tissues, splenectomy, duodenotomy, ligation of bile duct, ligation of mesenteric vessels, and Y-graft arterial anastomoses from the iliac artery to the superior mesenteric artery and to the splenic artery (use 48551).

   Additional reconstruction of a cadaver donor pancreas allograft prior to transplantation may include venous anastomosis(es) (use 48552).

3. ***Recipient pancreas allotransplantation,*** which includes transplantation of allograft, and care of the recipient (use 48554).

48550 Donor pancreatectomy (including cold preservation), with or without duodenal segment for transplantation

CPT Changes: An Insider's View 2005

CPT Assistant Apr 05:10, 12

48551 Backbench standard preparation of cadaver donor pancreas allograft prior to transplantation, including dissection of allograft from surrounding soft tissues, splenectomy, duodenotomy, ligation of bile duct, ligation of mesenteric vessels, and Y-graft arterial anastomoses from iliac artery to superior mesenteric artery and to splenic artery

CPT Changes: An Insider's View 2005

48552 Backbench reconstruction of cadaver donor pancreas allograft prior to transplantation, venous anastomosis, each

CPT Changes: An Insider's View 2005

(Do not report 48551 and 48552 in conjunction with 35531, 35563, 35685, 38100-38102, 44010, 44820, 44850, 47460, 47550-47556, 48100-48120, 48545)

48554 Transplantation of pancreatic allograft

48556 Removal of transplanted pancreatic allograft

- *Clinical Examples in Radiology* Fall 11:11, Winter 12:9

(Do not report 49084 in conjunction with 76942, 77002, 77012, 77021)

(For percutaneous image-guided drainage of retroperitoneal abscess by catheter, use 49406)

Excision, Destruction

Code 49185 describes sclerotherapy of a fluid collection (eg, lymphocele, cyst, or seroma) through a percutaneous access. It includes contrast injection(s), sclerosant injection(s), sclerosant dwell time, diagnostic study, imaging guidance (eg, ultrasound, fluoroscopy), and radiological supervision and interpretation, when performed. Code 49185 may be reported once per day for each lesion treated through a separate catheter. Do not report 49185 more than once if treating multiple lesions through the same catheter. Codes for access to and drainage of the collection may be separately reportable according to location (eg, 10030, 10160, 49405, 49406, 49407, 50390).

Codes 49186, 49187, 49188, 49189, 49190 describe excision or destruction of intra-abdominal primary or secondary tumor(s) or cyst(s) via an open approach. Excision or destruction of intra-abdominal primary or secondary tumor(s) or cyst(s) via an open approach includes cytoreduction, debulking, or other methods of removal of the tumor(s) or cyst(s). Codes 49186, 49187, 49188, 49189, 49190 are reported based on the sum of the maximum length of each tumor or cyst excised or destroyed (eg, ultrasound desiccation). Only the tumor(s) and cyst(s) are measured, not the tissue (eg, mesentery) in which the tumor(s) and cyst(s) may be implanted. If only a portion of a tumor or cyst is excised or destroyed, then only the excised or destroyed portion is measured. The tumor(s) and cyst(s) should be measured in situ before excision or destruction and documented in the operative report. Measurement includes only the tumor(s) and cyst(s) and not the margins. Codes 49186, 49187, 49188, 49189, 49190 are reported when the resected or destroyed intra-abdominal tumor(s) and cyst(s) do not directly arise from a resected organ (eg, small bowel mass, renal mass, liver mass) or soft tissue that may be separately reportable. When the tumors arise directly from an organ or soft tissue, only the organ or soft tissue resection or destruction procedure code from which the tumors arise is reported. For example, if a partial ascending colon resection, including small tumor implants, is performed and a separate excision of multiple small tumor implants in the mesentery of the descending colon is also performed, the appropriate colectomy code (eg, 44140) would be reported for the partial ascending colon resection and the excision of the tumor implants in the mesentery of the descending colon would be separately reported with an appropriate tumor excision code (49186, 49187, 49188, 49189, 49190). The implants that were part of the ascending colon resection would not be included in the measurement for reporting the tumor excision code (49186, 49187, 49188, 49189, 49190).

Open resection of recurrent ovarian, endometrial, tubal, or primary peritoneal gynecological malignancies without lymphadenectomy should be reported with 49186, 49187, 49188, 49189, 49190. All other open resection of initial or recurrent ovarian, endometrial, tubal, or primary peritoneal gynecologic malignancies should be reported with 58943, 58950, 58951, 58952, 58953, 58954, 58956, 58958, 58960.

(For lysis of intestinal adhesions, use 44005)

49180 Biopsy, abdominal or retroperitoneal mass, percutaneous needle

CPT Assistant Fall 93:11

Clinical Examples in Radiology Fall 10:7, Winter 17:5, Summer 23:26, Fall 23:26

(If imaging guidance is performed, see 76942, 77002, 77012, 77021)

(For fine needle aspiration biopsy, see 10004, 10005, 10006, 10007, 10008, 10009, 10010, 10011, 10012, 10021)

(For evaluation of fine needle aspirate, see 88172, 88173)

49185 Sclerotherapy of a fluid collection (eg, lymphocele, cyst, or seroma), percutaneous, including contrast injection(s), sclerosant injection(s), diagnostic study, imaging guidance (eg, ultrasound, fluoroscopy) and radiological supervision and interpretation when performed

- *CPT Changes: An Insider's View* 2016
- *CPT Assistant* Mar 16:10

(Do not report 49185 in conjunction with 49424, 76080)

(For access/drainage with catheter, see 10030, 49405, 49406, 49407, 50390)

(For access/drainage with needle, see 10160, 50390)

(For pleurodesis, use 32560)

(For sclerosis of veins or endovenous ablation of incompetent extremity veins, see 36468, 36470, 36471, 36475, 36476, 36478, 36479)

(For sclerotherapy of a lymphatic/vascular malformation, use 37241)

(For treatment of multiple interconnected lesions treated through a single access, report 49185 once)

(For exchange of existing catheter, before or after injection of sclerosant, see 49423, 75984)

(For treatment of multiple lesions in a single day requiring separate access, use modifier 59 for each additional treated lesion)

49186 Excision or destruction, open, intra-abdominal (ie, peritoneal, mesenteric, retroperitoneal), primary or secondary tumor(s) or cyst(s), sum of the maximum length of tumor(s) or cyst(s); 5 cm or less

(Do not report 49405 in conjunction with 75989, 76942, 77002, 77003, 77012, 77021)

(For percutaneous cholecystostomy, use 47490)

(For pneumonostomy, use 32200)

(For thoracentesis, see 32554, 32555)

(For percutaneous pleural drainage, see 32556, 32557)

(For open visceral drainage, see 32200 [lung abscess or cyst], 47010 [liver abscess or cyst], 48510 [pseudocyst of pancreas], 50020 [perirenal or renal abscess])

49406 peritoneal or retroperitoneal, percutaneous

CPT Changes: An Insider's View 2014, 2017
CPT Assistant May 14:9, Feb 20:13, Mar 24:26
Clinical Examples in Radiology Fall 13:6, Spring 15:8, Winter 16:10, Fall 18:15

(Do not report 49406 in conjunction with 75989, 76942, 77002, 77003, 77012, 77021)

(For abdominal paracentesis [diagnostic or therapeutic], see 49082, 49083)

(For transrectal or transvaginal image-guided peritoneal or retroperitoneal fluid collection drainage by catheter, use 49407)

(For open transrectal drainage of pelvic abscess, use 45000)

(For open peritoneal or retroperitoneal drainage, see 44900 [appendiceal abscess], 49020 [peritoneal abscess or localized peritonitis], 49040 [subdiaphragmatic or subphrenic abscess], 49060 [retroperitoneal abscess], 49062 [extraperitoneal lymphocele], 49084 [peritoneal lavage], 50020 [perirenal or renal abscess], 58805 [ovarian cyst], 58822 [ovarian abscess])

(For percutaneous paracentesis, see 49082, 49083)

(For percutaneous insertion of a tunneled intraperitoneal catheter without subcutaneous port, use 49418)

49407 peritoneal or retroperitoneal, transvaginal or transrectal

CPT Changes: An Insider's View 2014, 2017
CPT Assistant May 14:9
Clinical Examples in Radiology Fall 13:6, Spring 15:8, Winter 16:10, Fall 18:15

(Do not report 49407 in conjunction with 75989, 76942, 77002, 77003, 77012, 77021)

(Report 49405, 49406, 49407 separately for each individual collection drained with a separate catheter)

(For open transrectal or transvaginal drainage, see 45000 [pelvic abscess], 58800 [ovarian cyst], 58820 [ovarian abscess])

(For percutaneous image-guided fluid collection drainage by catheter [eg, abscess, hematoma, seroma, lymphocele, cyst] for soft tissue [eg, extremity, abdominal wall, neck], use 10030)

49411 Placement of interstitial device(s) for radiation therapy guidance (eg, fiducial markers, dosimeter), percutaneous, intra-abdominal, intra-pelvic (except prostate), and/or retroperitoneum, single or multiple

- *CPT Changes: An Insider's View* 2010, 2017
- *CPT Assistant* Feb 10:7, Jun 16:3

(Report supply of device separately)

(For imaging guidance, see 76942, 77002, 77012, 77021)

(For percutaneous placement of interstitial device[s] for intra-thoracic radiation therapy guidance, use 32553)

+ 49412 Placement of interstitial device(s) for radiation therapy guidance (eg, fiducial markers, dosimeter), open, intra-abdominal, intrapelvic, and/or retroperitoneum, including image guidance, if performed, single or multiple (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2011

(Use 49412 in conjunction with open abdominal, pelvic, or retroperitoneal procedure[s] performed concurrently)

(For placement of interstitial device[s] for intra-abdominal, intrapelvic, and/or retroperitoneal radiation therapy guidance concurrent with laparoscopic procedure, use 49327)

(For percutaneous placement of interstitial device[s] for intra-abdominal, intrapelvic, and/or retroperitoneal radiation therapy guidance, use 49411)

49418 Insertion of tunneled intraperitoneal catheter (eg, dialysis, intraperitoneal chemotherapy instillation, management of ascites), complete procedure, including imaging guidance, catheter placement, contrast injection when performed, and radiological supervision and interpretation, percutaneous

- *CPT Changes: An Insider's View* 2011, 2017

49419 Insertion of tunneled intraperitoneal catheter, with subcutaneous port (ie, totally implantable)

- *CPT Changes: An Insider's View* 2003, 2011

(For removal, use 49422)

49421 Insertion of tunneled intraperitoneal catheter for dialysis, open

- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Fall 93:2, Jul 06:19

(For laparoscopic insertion of tunneled intraperitoneal catheter, use 49324)

(For subcutaneous extension of intraperitoneal catheter with remote chest exit site, use 49435 in conjunction with 49421)

49422 Removal of tunneled intraperitoneal catheter

- *CPT Changes: An Insider's View* 2011

(For removal of a non-tunneled catheter, use appropriate E/M code)

49423 Exchange of previously placed abscess or cyst drainage catheter under radiological guidance (separate procedure)

- *CPT Assistant* Nov 97:19, Mar 98:8
- *Clinical Examples in Radiology* Summer 13:6

(For radiological supervision and interpretation, use 75984)

49424 Contrast injection for assessment of abscess or cyst via previously placed drainage catheter or tube (separate procedure)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Nov 97:19, Mar 98:8, Nov 03:14
- *Clinical Examples in Radiology* Fall 09:9

(For radiological supervision and interpretation, use 76080)

49425 Insertion of peritoneal-venous shunt

49426 Revision of peritoneal-venous shunt

(For shunt patency test, use 78291)

49427 Injection procedure (eg, contrast media) for evaluation of previously placed peritoneal-venous shunt

(For radiological supervision and interpretation, see 75809, 78291)

49428 Ligation of peritoneal-venous shunt

49429 Removal of peritoneal-venous shunt

+ 49435 Insertion of subcutaneous extension to intraperitoneal cannula or catheter with remote chest exit site (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2007

(Use 49435 in conjunction with 49324, 49421)

49436 Delayed creation of exit site from embedded subcutaneous segment of intraperitoneal cannula or catheter

- *CPT Changes: An Insider's View* 2007

Initial Placement

Do not additionally report 43752 for placement of a nasogastric (NG) or orogastric (OG) tube to insufflate the stomach prior to percutaneous gastrointestinal tube placement. NG or OG tube placement is considered part of the procedure in this family of codes.

49440 Insertion of gastrostomy tube, percutaneous, under fluoroscopic guidance including contrast injection(s), image documentation and report

- *CPT Changes: An Insider's View* 2008, 2017
- *CPT Assistant* Jan 08:8, Jun 08:8, Aug 08:7, Sep 10:9, Sep 14:5, Dec 14:18, Oct 21:14, Oct 21:5
- *Clinical Examples in Radiology* Spring 20:6, Summer 22:15

(For conversion to a gastro-jejunostomy tube at the time of initial gastrostomy tube placement, use 49440 in conjunction with 49446)

49441 Insertion of duodenostomy or jejunostomy tube, percutaneous, under fluoroscopic guidance including contrast injection(s), image documentation and report

- *CPT Changes: An Insider's View* 2008, 2017
- *CPT Assistant* Jan 08:8, Jun 08:8, Aug 08:7, Dec 14:18

(For conversion of gastrostomy tube to gastro-jejunostomy tube, use 49446)

49442 Insertion of cecostomy or other colonic tube, percutaneous, under fluoroscopic guidance including contrast injection(s), image documentation and report

CPT Changes: An Insider's View 2008, 2017
CPT Assistant Jan 08:8, Jun 08:8, Aug 08:7, Dec 14:18

Conversion

49446 Conversion of gastrostomy tube to gastro-jejunostomy tube, percutaneous, under fluoroscopic guidance including contrast injection(s), image documentation and report

CPT Changes: An Insider's View 2008, 2017
CPT Assistant Oct 21:5

(For conversion to a gastro-jejunostomy tube at the time of initial gastrostomy tube placement, use 49446 in conjunction with 49440)

Replacement

If an existing gastrostomy, duodenostomy, jejunostomy, gastro-jejunostomy, or cecostomy (or other colonic) tube is removed and a new tube is placed via a separate percutaneous access site, the placement of the new tube is not considered a replacement and would be reported using the appropriate initial placement codes 49440-49442.

49450 Replacement of gastrostomy or cecostomy (or other colonic) tube, percutaneous, under fluoroscopic guidance including contrast injection(s), image documentation and report

CPT Changes: An Insider's View 2008
CPT Assistant Sep 10:9, Dec 13:17, Feb 19:5
Clinical Examples in Radiology Winter 19:12, Summer 22:15

(For percutaneous replacement of gastrostomy tube with removal when performed without imaging or endoscopy, see 43762, 43763)

49451 Replacement of duodenostomy or jejunostomy tube, percutaneous, under fluoroscopic guidance including contrast injection(s), image documentation and report

CPT Changes: An Insider's View 2008
CPT Assistant Jan 08:8, Jun 08:8, Aug 08:7, Jul 10:10, Dec 14:18

49452 Replacement of gastro-jejunostomy tube, percutaneous, under fluoroscopic guidance including contrast injection(s), image documentation and report

CPT Changes: An Insider's View 2008
CPT Assistant Mar 10:10, Oct 21:6

Mechanical Removal of Obstructive Material

49460 Mechanical removal of obstructive material from gastrostomy, duodenostomy, jejunostomy, gastro-jejunostomy, or cecostomy (or other colonic) tube, any method, under fluoroscopic guidance including contrast injection(s), if performed, image documentation and report

CPT Changes: An Insider's View 2008

(Do not report 49460 in conjunction with 49450-49452, 49465)

Other

49465 Contrast injection(s) for radiological evaluation of existing gastrostomy, duodenostomy, jejunostomy, gastro-jejunostomy, or cecostomy (or other colonic) tube, from a percutaneous approach including image documentation and report

CPT Changes: An Insider's View 2008
CPT Assistant Sep 14:5

(Do not report 49465 in conjunction with 49450-49460)

Repair

Hernioplasty, Herniorrhaphy, Herniotomy

The hernia repair codes in this section are categorized primarily by the type of hernia (inguinal, femoral, lumbar, omphalocele, anterior abdominal, parastomal).

Some types of hernias are further categorized as "initial" or "recurrent" based on whether or not the hernia has required previous repair(s).

Additional variables accounted for by some of the codes include patient age and clinical presentation (reducible vs. incarcerated or strangulated).

The excision/repair of strangulated organs or structures such as testicle(s), intestine, ovaries are reported by using the appropriate code for the excision/repair (eg, 44120, 54520, and 58940) in addition to the appropriate code for the repair of the strangulated hernia.

(For debridement of abdominal wall, see 11042, 11043)

(For reduction and repair of intra-abdominal hernia, use 44050)

(49491-49557, 49600, 49605, 49606, 49610, 49611, 49650, 49651 are unilateral procedures. For bilateral procedure, use modifier 50)

(Do not report modifier 50 in conjunction with 49591-49622)

49491 Repair, initial inguinal hernia, preterm infant (younger than 37 weeks gestation at birth), performed from birth up to 50 weeks postconception age, with or without hydrocelectomy; reducible

CPT Changes: An Insider's View 2002
CPT Assistant Mar 04:2, Jun 08:3, Sep 23:1

49492 incarcerated or strangulated

CPT Changes: An Insider's View 2002
CPT Assistant Mar 04:2, Jun 08:3, Sep 23:1

(Do not report modifier 63 in conjunction with 49491, 49492)

(Postconception age equals gestational age at birth plus age of infant in weeks at the time of the hernia repair. Initial inguinal hernia repairs that are performed on preterm infants who are older than 50 weeks postconception age and younger than age 6 months at the time of surgery, should be reported using codes 49495, 49496)

49495 Repair, initial inguinal hernia, full term infant younger than age 6 months, or preterm infant older than 50 weeks postconception age and younger than age 6 months at the time of surgery, with or without hydrocelectomy; reducible

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Winter 93:6, Winter 94:13, Jan 04:27, Mar 04:10, May 04:14, Nov 07:9, Jun 08:3, Sep 23:1
- *Clinical Examples in Radiology* Fall 18:15

49496 incarcerated or strangulated

- *CPT Assistant* Winter 93:6, Winter 94:13, Jan 04:27, Mar 04:10, May 04:14, Jun 08:3, Sep 23:1

(Do not report modifier 63 in conjunction with 49495, 49496)

(Postconception age equals gestational age at birth plus age in weeks at the time of the hernia repair. Initial inguinal hernia repairs that are performed on preterm infants who are younger than or up to 50 weeks postconception age but younger than 6 months of age since birth, should be reported using codes 49491, 49492. Inguinal hernia repairs on infants age 6 months to younger than 5 years should be reported using codes 49500-49501)

49500 Repair initial inguinal hernia, age 6 months to younger than 5 years, with or without hydrocelectomy; reducible

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Winter 94:13, Jan 04:27, Mar 04:10, Nov 07:9, Jun 08:3, Nov 14:14, Sep 23:1

49501 incarcerated or strangulated

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Winter 94:13, Jan 04:27, Mar 04:12, Jun 08:3, Sep 23:1

49505 Repair initial inguinal hernia, age 5 years or older; reducible

- *CPT Assistant* Winter 94:13, Sep 00:10, Jan 04:27, Mar 04:12, Jun 08:3, Sep 23:1

49507 incarcerated or strangulated

- *CPT Assistant* Winter 94:13, Jan 04:27, Mar 04:10, Jun 08:3, Sep 23:1

(For inguinal hernia repair, with simple orchiectomy, see 49505 or 49507 and 54520)

(For inguinal hernia repair, with excision of hydrocele or spermatocele, see 49505 or 49507 and 54840 or 55040)

49520 Repair recurrent inguinal hernia, any age; reducible

- *CPT Assistant* Winter 94:13, Sep 03:3, Jan 04:27, Mar 04:3, Jun 08:3, Sep 23:1

49521 incarcerated or strangulated

- *CPT Assistant* Winter 94:13, Jan 04:27, Mar 04:10, Jun 08:3, Sep 23:1

49525 Repair inguinal hernia, sliding, any age

- *CPT Assistant* Winter 94:14, Jan 04:27, Mar 04:10, Nov 07:9, Jun 08:3, Sep 23:1

(For incarcerated or strangulated inguinal hernia repair, see 49496, 49501, 49507, 49521)

49540 Repair lumbar hernia

- *CPT Assistant* Winter 94:14, Jun 08:3, Sep 23:1

49550 Repair initial femoral hernia, any age; reducible

- *CPT Assistant* Winter 94:14, Jun 08:3, Sep 23:1

49553 incarcerated or strangulated

- *CPT Assistant* Winter 94:14, Jun 08:3, Sep 23:1

49555 Repair recurrent femoral hernia; reducible

- *CPT Assistant* Winter 94:14, Jun 08:3, Sep 23:1

49557 incarcerated or strangulated

- *CPT Assistant* Winter 94:14, Jun 08:3, Sep 23:1

Codes 49591-49618 describe repair of an anterior abdominal hernia(s) (ie, epigastric, incisional, ventral, umbilical, spigelian) by any approach (ie, open, laparoscopic, robotic). Codes 49591-49618 are reported only once, based on the total defect size for one or more anterior abdominal hernia(s), measured as the maximal craniocaudal or transverse distance between the outer margins of all defects repaired. For example, "Swiss cheese" defects (ie, multiple separate defects) would be measured from the superior most aspect of the upper defect to the inferior most aspect of the lowest defect. In addition, the hernia defect size should be measured prior to opening the hernia defect(s) (ie, during repair the fascia will typically retract creating a falsely elevated measurement).

When both reducible and incarcerated or strangulated anterior abdominal hernias are repaired at the same operative session, all hernias are reported as incarcerated or strangulated. For example, one 2-cm reducible initial incisional hernia and one 4-cm incarcerated initial incisional hernia separated by 2 cm would be reported as an initial incarcerated hernia repair with a maximum craniocaudal distance of 8 cm (49594).

Inguinal, femoral, lumbar, omphalocele, and/or parastomal hernia repair may be separately reported when performed at the same operative session as anterior abdominal hernia repair by appending modifier 59, as appropriate.

Codes 49621, 49622 describe repair of a parastomal hernia (initial or recurrent) by any approach (ie, open, laparoscopic, robotic). Code 49621 is reported for repair of a reducible parastomal hernia, and code 49622 is reported for an incarcerated or strangulated parastomal hernia.

Implantation of mesh or other prosthesis, when performed, is included in 49591-49622 and may not be separately reported. For total or near total removal of non-infected mesh when performed, use 49623 in conjunction with 49591-49622. For removal of infected mesh, use 11008.

49591 Repair of anterior abdominal hernia(s) (ie, epigastric, incisional, ventral, umbilical, spigelian), any approach (ie, open, laparoscopic, robotic), initial, including implantation of mesh or other prosthesis when performed, total length of defect(s); less than 3 cm, reducible
- *CPT Changes: An Insider's View* 2023
- *CPT Assistant* Apr 23:26, Sep 23:1, Jun 24:16

49592 less than 3 cm, incarcerated or strangulated

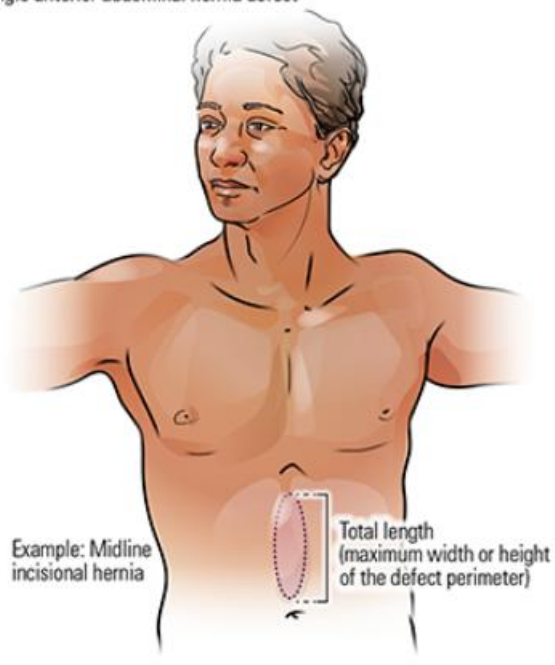
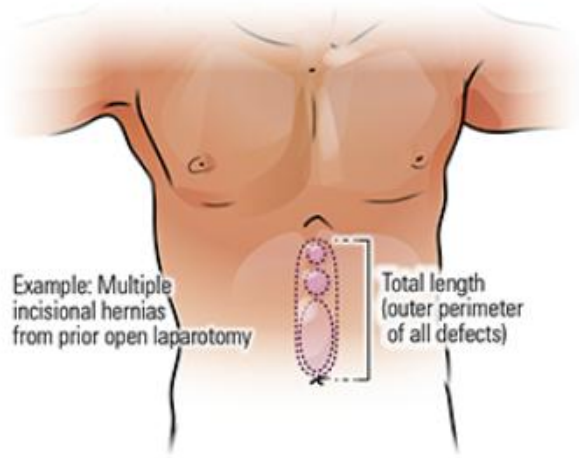
 # 49615 3 cm to 10 cm, reducible
- *CPT Changes: An Insider's View* 2023
- *CPT Assistant* Sep 23:1, Nov 24:20



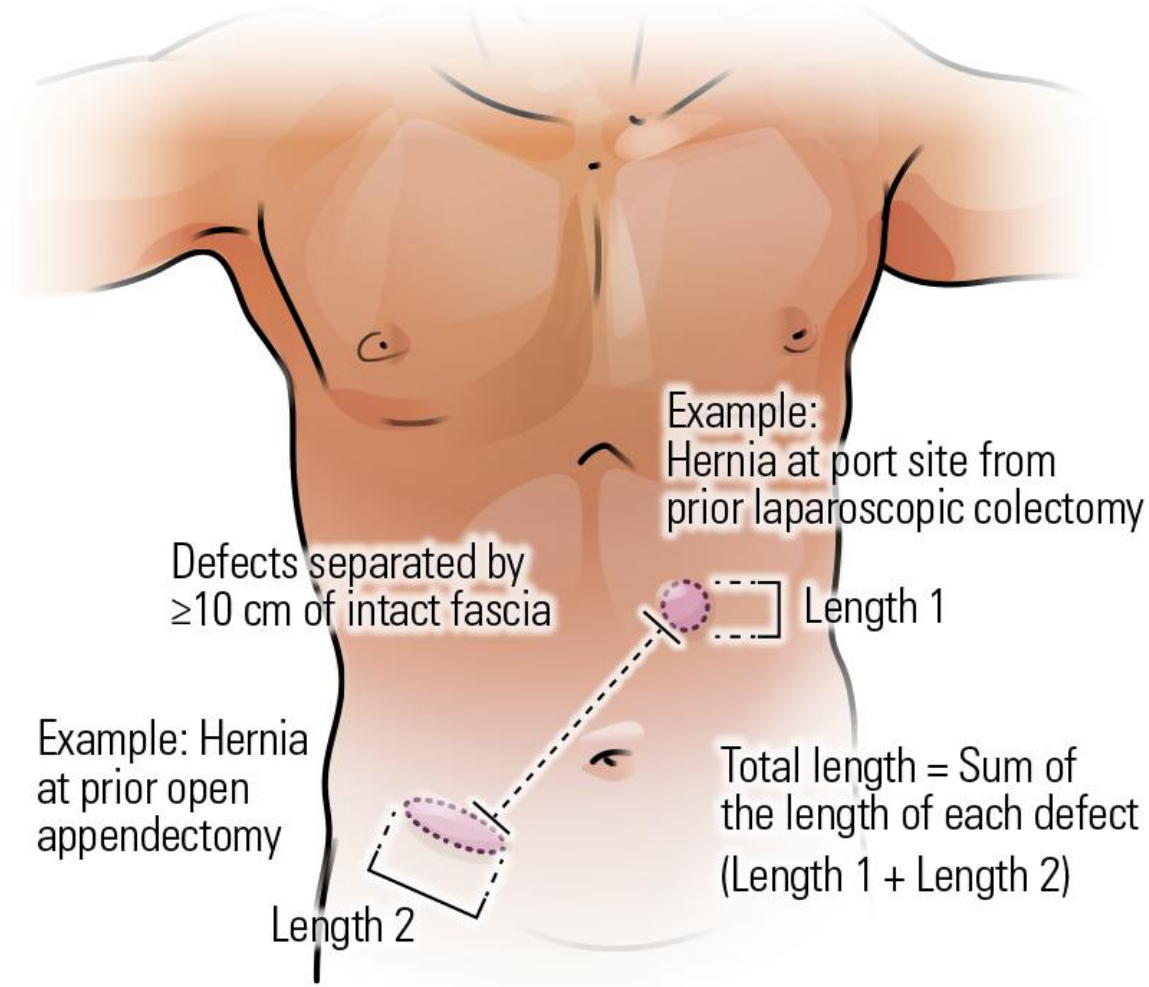
Measuring Total Length of Anterior Abdominal Hernia Defect(s)

49591-49618



Hernia measurements are performed either in the transverse or craniocaudal dimension. The total length of the defect(s) corresponds to the maximum width or height of an oval drawn to encircle the outer perimeter of all repaired defects. If the defects are not contiguous and are separated by greater than or equal to 10 cm of intact fascia, total defect size is the sum of each defect measured individually.

Codes 49591-49618 are reported only once, based on the total defect size for one or more anterior abdominal hernia(s), measured as the maximal craniocaudal or transverse distance between the outer margins of all defects repaired.



A. Single anterior abdominal hernia defect

B. Multiple anterior abdominal hernia defects

C. Remote anterior abdominal hernia defects

 # 49616 3 cm to 10 cm, incarcerated or strangulated

CPT Changes: An Insider's View 2023

CPT Assistant Sep 23:1

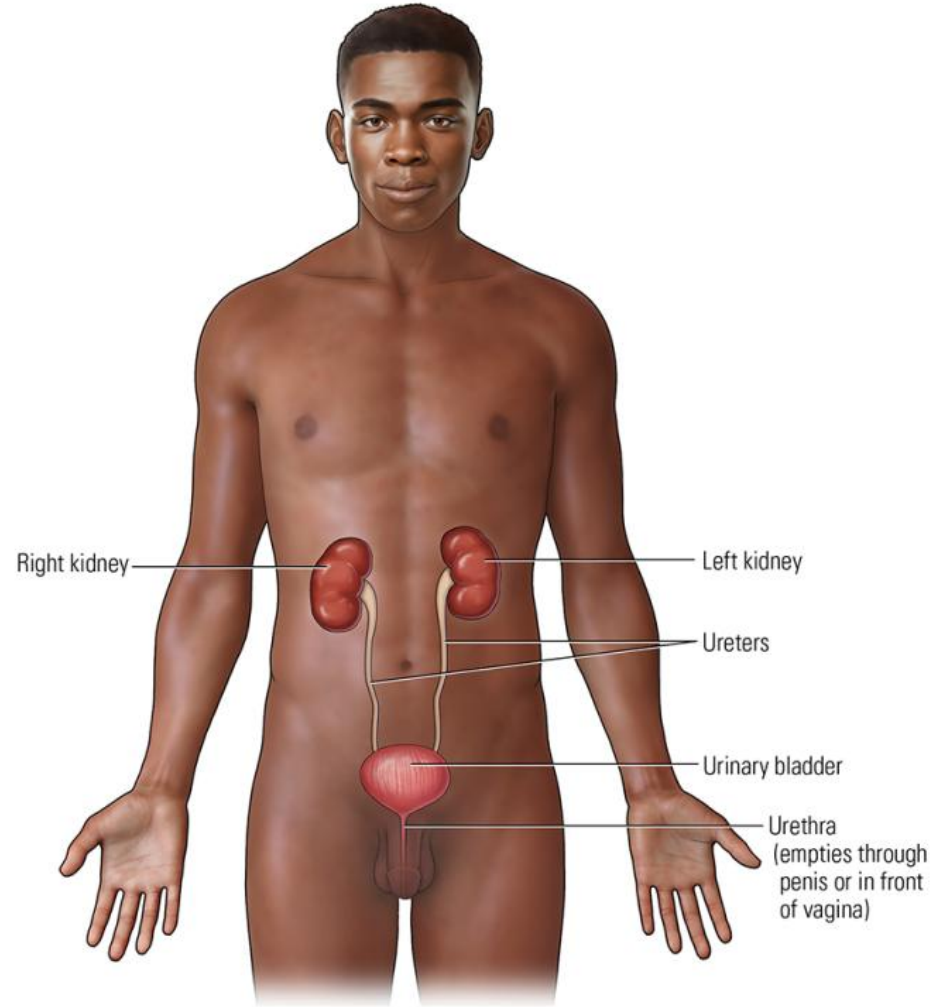
Surgery

Urinary System (50010-53899)

The following is a listing of headings and subheadings that appear within the Urinary System section of the CPT codebook. The subheadings or subsections denoted with asterisks (*) below have special instructions unique to that subsection. Where these are indicated, special notes or guidelines will be presented preceding those procedural terminology listings referring to that subsection specifically. Note that all code ranges in each subsection are listed as they appear in the subsection, even if the code numbers are out of numerical sequence and/or repeated in the next subsection.



Kidney (50010-50593)
- Incision* (50010-50130)
- Excision (50200-50290)
- Renal Transplantation* (50300-50380)
- Introduction (50382-50435)
  - **Renal Pelvis Catheter Procedures (50382-50389)**
    - *Internally Dwelling (50382-50386)*
    - *Externally Accessible (50387-50389)*
  - **Other Introduction (Injection/Change/Removal) Procedures* (50390-50435)**
- Repair (50400-50540)
- Laparoscopy* (50541-50549)
- Endoscopy (50551-50580)
- Other Procedures (50590-50593)

Ureter (50600-50980)
- Incision/Biopsy* (50600-50630)
- Excision (50650-50660)
- Introduction (50684-50695)
  - **Other Introduction (Injection/Change/Removal) Procedures* (50684-50695)**
- Repair* (50700-50940)
- Laparoscopy* (50945-50949)
- Endoscopy (50951-50980)

Bladder (51020-52700)
- Incision (51020-51080)
- Removal (51100-51102)
- Excision (51500-51597)
- Introduction (51600-51721)
- Urodynamics* (51725-51798)
- Repair (51800-51980)
- Laparoscopy* (51990-51999)
- Endoscopy—Cystoscopy, Urethroscopy, Cystourethroscopy* (52000-52010)
- Transurethral Surgery (52204-52355)
  - **Urethra and Bladder (52204-52318)**
  - **Ureter and Pelvis* (52320-52355)**
- Vesical Neck and Prostate (52400-52700)

Urethra (53000-53899)

- **Incision (53000-53085)**
- **Excision (53200-53275)**
- **Repair (53400-53520)**
- **Manipulation (53600-53665)**
- **Other Procedures (53850-53899)**

Urinary System

Urinary System

(For provision of chemotherapeutic agents, report both the specific service in addition to code(s) for the specific substance(s) or drug(s) provided)

Kidney

Incision

Nephrolithotomy is the surgical removal of stones from the kidney, and pyelolithotomy is the surgical removal of stones from the renal pelvis. This section of the guidelines refers to the removal of stones from the kidney or renal pelvis using a percutaneous antegrade approach. Breaking and removing stones is separate from accessing the kidney (ie, 50040, 50432, 50433, 52334), accessing the kidney with dilation of the tract to accommodate an endoscope used in an endourologic procedure (ie, 50437), or dilation of a previously established tract to accommodate an endoscope used in an endourologic procedure (ie, 50436). These procedures include the antegrade removal of stones in the calyces, renal pelvis, and/or ureter with the antegrade placement of catheters, stents, and tubes, but do not include retrograde placement of catheters, stents, and tubes.

Code 50080 describes nephrolithotomy or pyelolithotomy using a percutaneous antegrade approach with endoscopic instruments to break and remove kidney stones of 2 cm or smaller.

Code 50081 includes the elements of 50080, but it is reported for stones larger than 2 cm, branching, stones in multiple locations, ureteral stones, or in patients with complicated anatomy.

Creation of percutaneous access or dilation of the tract to accommodate large endoscopic instruments used in stone removals (50436, 50437) is not included in 50080, 50081, and may be reported separately, if performed. Codes 50080, 50081 include placement of any stents or drainage catheters that remain indwelling after the procedure.

Report one unit of 50080 or 50081 per side (ie, per kidney), regardless of the number of stones broken and/or removed or locations of the stones. For bilateral procedure, report 50080, 50081 with modifier 50. When 50080 is performed on one side and 50081 is performed on the contralateral side, modifier 50 is not applicable. Placement of additional accesses, if needed, into the kidney, and removal of stones through other approaches (eg, open or retrograde) may be reported separately, if performed.

(For open retroperitoneal exploration, use 49010)

(For open drainage of retroperitoneal abscess, use 49060)

(For open excision or destruction of intra-abdominal [ie, peritoneal, mesenteric, retroperitoneal] primary or secondary tumor[s] or cyst[s], see 49186, 49187, 49188, 49189, 49190)

50010 Renal exploration, not necessitating other specific procedures

(For laparoscopic ablation of renal mass lesion(s), use 50542)

50020 Drainage of perirenal or renal abscess, open

CPT Assistant Nov 97:19, Oct 01:8, May 14:9

(For percutaneous image-guided fluid collection drainage by catheter of perirenal/renal abscess, use 49405)

50040 Nephrostomy, nephrotomy with drainage

CPT Assistant Spring 93:35, Oct 01:8

50045 Nephrotomy, with exploration

CPT Assistant Oct 01:8

(For renal endoscopy performed in conjunction with this procedure, see 50570-50580)

50060 Nephrolithotomy; removal of calculus

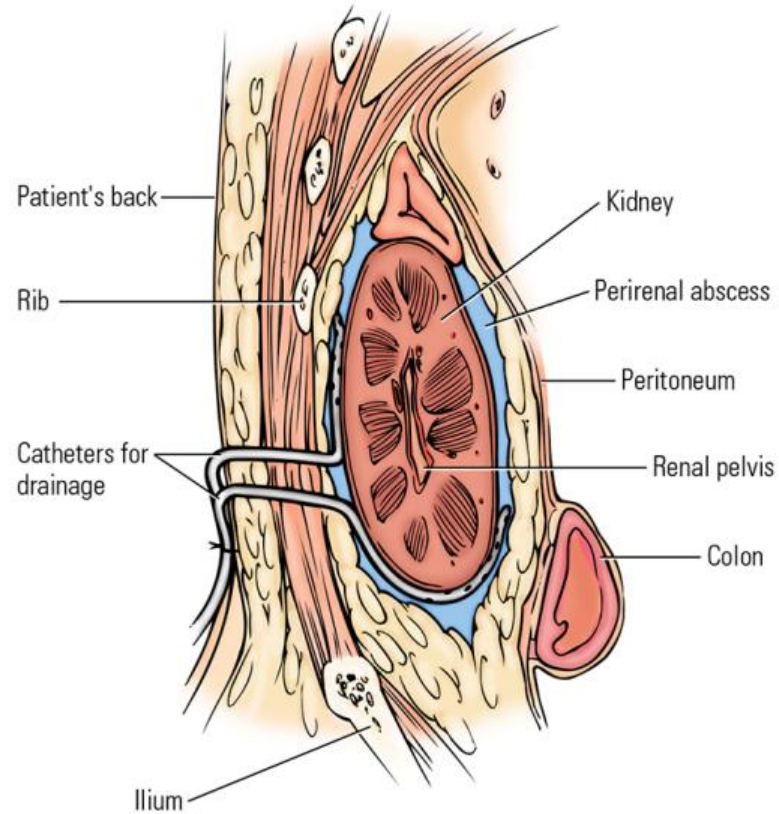
CPT Assistant Oct 01:8

50065 secondary surgical operation for calculus

CPT Assistant Oct 01:8

50070 complicated by congenital kidney abnormality

CPT Assistant Oct 01:8

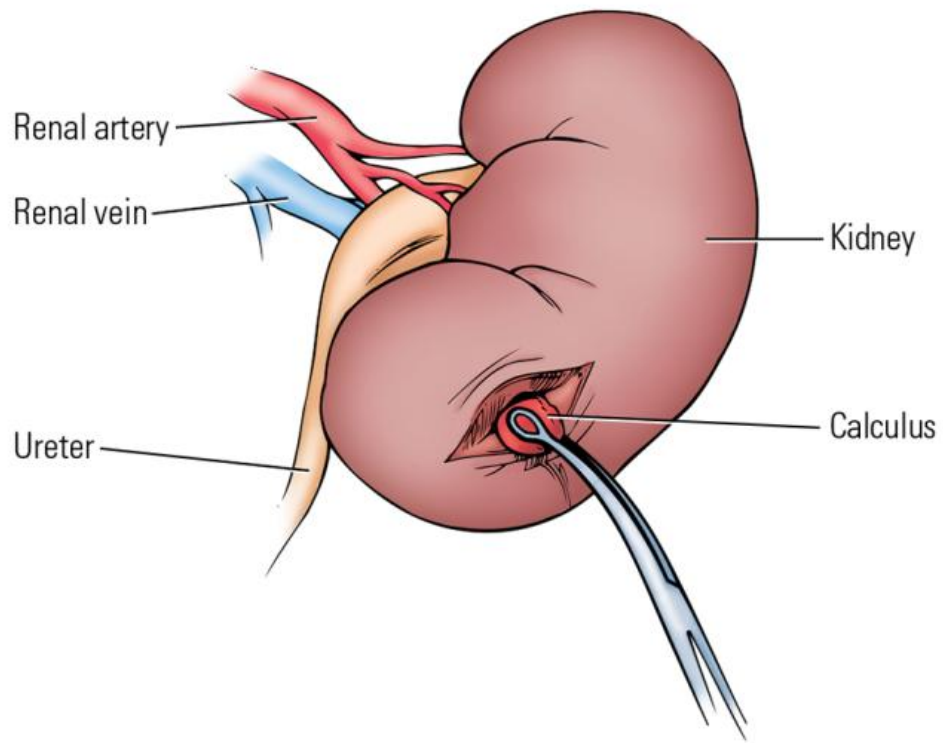


50075 removal of large staghorn calculus filling renal pelvis and calyces (including anatrophic pyelolithotomy)

CPT Assistant Oct 01:8

Drainage of Renal Abscess

50020



An incision is made to the abscess cavity and the site is irrigated and drained.

Nephrolithotomy With Calculus Removal

50060-50075

A kidney stone (calculus) is removed by an incision in the kidney. Use 50070 if complicated by a congenital kidney abnormality.

50080 Percutaneous nephrolithotomy or pyelolithotomy, lithotripsy, stone extraction, antegrade ureteroscopy, antegrade stent placement and nephrostomy tube placement, when performed, including imaging guidance; simple (eg, stone[s] up to 2 cm in single location of kidney or renal pelvis, nonbranching stones)

CPT Changes: An Insider's View 2023

CPT Assistant Oct 01:8, Dec 08:7, Jun 09:10, Sep 23:30

50081 complex (eg, stone[s] > 2 cm, branching stones, stones in multiple locations, ureter stones, complicated anatomy)

CPT Changes: An Insider's View 2023

CPT Assistant Oct 01:8, Dec 08:7, Jun 09:10, Sep 23:30

(50080, 50081 may only be reported once per side. For bilateral procedure, report 50080, 50081 with modifier 50)

(Do not report 50080, 50081 in conjunction with 50430, 50431, 50433, 50434, 50435, if performed on the same side)

(For establishment of nephrostomy without nephrolithotomy, see 50040, 50432, 50433, 52334)

(For dilation of an existing percutaneous access for an endourologic procedure, use 50436)

(For dilation of an existing percutaneous access for an endourologic procedure with new access into the collecting system, use 50437; for additional new access into the kidney, use 50437 for each new access that is dilated for an endourologic procedure)

(For removal of stone without lithotripsy, use 50561)

(For cystourethroscopy with insertion of ureteral guidewire through kidney to establish a percutaneous nephrostomy, retrograde, use 52334)

50100 Transection or repositioning of aberrant renal vessels (separate procedure)

CPT Assistant Oct 01:8

50120 Pyelotomy; with exploration

CPT Assistant Oct 01:8

(For renal endoscopy performed in conjunction with this procedure, see 50570-50580)

50125 with drainage, pyelostomy

CPT Assistant Oct 01:8

50130 with removal of calculus (pyelolithotomy, pelviolithotomy, including coagulum pyelolithotomy)

CPT Assistant Oct 01:8

(50135 has been deleted)

Excision

(For open excision or destruction of retroperitoneal tumor[s] or cyst[s] [other than endometriomas], see 49186, 49187, 49188, 49189, 49190)

(For laparoscopic ablation of renal mass lesion(s), use 50542)

(For excision or destruction of endometriomas, open method, use 58999)

50200 Renal biopsy; percutaneous, by trocar or needle

- *CPT Changes: An Insider's View* 2010, 2017
- *CPT Assistant* Fall 93:13, Oct 01:8, Feb 10:7
- *Clinical Examples in Radiology* Winter 17:5

(For radiological supervision and interpretation, see 76942, 77002, 77012, 77021)

(For fine needle aspiration biopsy, see 10005, 10006, 10007, 10008, 10009, 10010, 10011, 10012)

(For evaluation of fine needle aspirate, see 88172, 88173)

50205 by surgical exposure of kidney

- *CPT Assistant* Oct 01:8

50220 Nephrectomy, including partial ureterectomy, any open approach including rib resection;

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Oct 01:8, Nov 02:3, Aug 08:7

50225 complicated because of previous surgery on same kidney

- *CPT Assistant* Oct 01:8, Nov 02:3

50230 radical, with regional lymphadenectomy and/or vena caval thrombectomy

- *CPT Assistant* Oct 01:8, Nov 02:3

(When vena caval resection with reconstruction is necessary, use 37799)

50234 Nephrectomy with total ureterectomy and bladder cuff; through same incision

- *CPT Assistant* Oct 01:8, Nov 02:3

50236 through separate incision

- *CPT Assistant* Oct 01:8, Nov 02:3

50240 Nephrectomy, partial

- *CPT Assistant* Oct 01:8, Nov 02:3, Jan 03:20, Apr 05:10, 12, Aug 08:7

(For laparoscopic partial nephrectomy, use 50543)

50250 Ablation, open, 1 or more renal mass lesion(s), cryosurgical, including intraoperative ultrasound guidance and monitoring, if performed

- *CPT Changes: An Insider's View* 2006, 2011
- *CPT Assistant* May 06:17

(For laparoscopic ablation of renal mass lesions, use 50542)

(For percutaneous ablation of renal tumors, see 50592, 50593)

50280 Excision or unroofing of cyst(s) of kidney

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:25, Oct 01:8

(For laparoscopic ablation of renal cysts, use 50541)

50290 Excision of perinephric cyst

- *CPT Assistant* Oct 01:8

- *CPT Assistant* Oct 01:8

Renal Transplantation

Renal *auto*transplantation includes reimplantation of the autograft as the primary procedure, along with secondary extra-corporeal procedure(s) (eg, partial nephrectomy, nephrolithotomy) reported with modifier 51 (see 50380 and applicable secondary procedure(s)).

Renal *allo*transplantation involves three distinct components of physician work:

1. ***Cadaver donor nephrectomy, unilateral or bilateral,*** which includes harvesting the graft(s) and cold preservation of the graft(s) (perfusing with cold preservation solution and cold maintenance) (use 50300). ***Living donor nephrectomy,*** which includes harvesting the graft, cold preservation of the graft (perfusing with cold preservation solution and cold maintenance), and care of the donor (see 50320, 50547).
2. ***Backbench work:***

   Standard preparation of a cadaver donor renal allograft prior to transplantation including dissection and removal of perinephric fat, diaphragmatic and retroperitoneal attachments; excision of adrenal gland; and preparation of ureter(s), renal vein(s), and renal artery(s), ligating branches, as necessary (use 50323).

   Standard preparation of a living donor renal allograft (open or laparoscopic) prior to transplantation including dissection and removal of perinephric fat and preparation of ureter(s), renal vein(s), and renal artery(s), ligating branches, as necessary (use 50325).

   Additional reconstruction of a cadaver or living donor renal allograft prior to transplantation may include venous, arterial, and/or ureteral anastomosis(es) necessary for implantation (see 50327-50329).
3. ***Recipient renal allotransplantation,*** which includes transplantation of the allograft (with or without recipient nephrectomy) and care of the recipient (see 50360, 50365).

(For dialysis, see 90935-90999)

(For laparoscopic donor nephrectomy, use 50547)

(For laparoscopic drainage of lymphocele to peritoneal cavity, use 49323)

50300 Donor nephrectomy (including cold preservation); from cadaver donor, unilateral or bilateral

CPT Changes: An Insider's View 2000, 2005

CPT Assistant Nov 99:25, Apr 05:10, 12

50320 open, from living donor

CPT Changes: An Insider's View 2000, 2005

CPT Assistant Nov 99:25, May 00:4

50323 Backbench standard preparation of cadaver donor renal allograft prior to transplantation, including dissection and removal of perinephric fat, diaphragmatic and retroperitoneal attachments, excision of adrenal gland, and preparation of ureter(s), renal vein(s), and renal artery(s), ligating branches, as necessary

CPT Changes: An Insider's View 2005

CPT Assistant Apr 05:10-11

(Do not report 50323 in conjunction with 60540, 60545)

50325 Backbench standard preparation of living donor renal allograft (open or laparoscopic) prior to transplantation, including dissection and removal of perinephric fat and preparation of ureter(s), renal vein(s), and renal artery(s), ligating branches, as necessary

CPT Changes: An Insider's View 2005

50327 Backbench reconstruction of cadaver or living donor renal allograft prior to transplantation; venous anastomosis, each

CPT Changes: An Insider's View 2005

50328 arterial anastomosis, each

CPT Changes: An Insider's View 2005

50329 ureteral anastomosis, each

CPT Changes: An Insider's View 2005

50340 Recipient nephrectomy (separate procedure)

(For bilateral procedure, report 50340 with modifier 50)

50360 Renal allotransplantation, implantation of graft; without recipient nephrectomy

CPT Changes: An Insider's View 2005

50365 with recipient nephrectomy

CPT Assistant Apr 05:10-11

(For bilateral procedure, report 50365 with modifier 50)

50370 Removal of transplanted renal allograft

50380 Renal autotransplantation, reimplantation of kidney

CPT Assistant Apr 05:10, 12, Sep 19:11

(For renal autotransplantation extra-corporeal [bench] surgery, use autotransplantation as the primary procedure and report secondary procedure[s] [eg, partial nephrectomy, nephrolithotomy] with modifier 51)

Introduction

Renal Pelvis Catheter Procedures

Internally Dwelling

50382 Removal (via snare/capture) and replacement of internally dwelling ureteral stent via percutaneous approach, including radiological supervision and interpretation

CPT Changes: An Insider's View 2006, 2017
CPT Assistant Sep 06:1, 16, Oct 08:8, Dec 09:4, Jan 16:3
Clinical Examples in Radiology Winter 06:15, Spring 08:5

(For bilateral procedure, use modifier 50)

(For removal and replacement of an internally dwelling ureteral stent via a transurethral approach, use 50385)

50384 Removal (via snare/capture) of internally dwelling ureteral stent via percutaneous approach, including radiological supervision and interpretation

CPT Changes: An Insider's View 2006, 2017
CPT Assistant Sep 06:2, 16, Oct 08:8, Jan 16:3
Clinical Examples in Radiology Winter 06:16, Spring 08:5

(For bilateral procedure, use modifier 50)

(Do not report 50382, 50384 in conjunction with 50436, 50437)

(For removal of an internally dwelling ureteral stent via a transurethral approach, use 50386)

50385 Removal (via snare/capture) and replacement of internally dwelling ureteral stent via transurethral approach, without use of cystoscopy, including radiological supervision and interpretation

CPT Changes: An Insider's View 2008, 2017
CPT Assistant Oct 08:8, Dec 09:4, Jan 16:3, Jul 23:19
Clinical Examples in Radiology Spring 08:5

50386 Removal (via snare/capture) of internally dwelling ureteral stent via transurethral approach, without use of cystoscopy, including radiological supervision and interpretation

CPT Changes: An Insider's View 2008, 2017
CPT Assistant Oct 08:8, Jan 16:3
Clinical Examples in Radiology Spring 08:4

Externally Accessible

50387 Removal and replacement of externally accessible nephroureteral catheter (eg, external/internal stent) requiring fluoroscopic guidance, including radiological supervision and interpretation

CPT Changes: An Insider's View 2006, 2016, 2017
CPT Assistant Sep 06:2, 4, 16, Dec 09:4, Mar 12:3, Jan 16:3, Mar 16:10
Clinical Examples in Radiology Winter 06:16, Spring 08:5, Fall 15:4

(For bilateral procedure, use modifier 50)

(For removal and replacement of externally accessible ureteral stent via ureterostomy or ileal conduit, use 50688)

(For removal without replacement of an externally accessible ureteral stent not requiring fluoroscopic guidance, see Evaluation and Management services codes)

50389 Removal of nephrostomy tube, requiring fluoroscopic guidance (eg, with concurrent indwelling ureteral stent)

CPT Changes: An Insider's View 2006
CPT Assistant Sep 06:1-2, 4, Jan 16:3
Clinical Examples in Radiology Winter 06:16, Fall 21:8

(Removal of nephrostomy tube not requiring fluoroscopic guidance is considered inherent to E/M services. Report the appropriate level of E/M service provided)

Other Introduction (Injection/Change/Removal) Procedures

Percutaneous genitourinary procedures are performed with imaging guidance (eg, fluoroscopy and/or ultrasound). Diagnostic nephrostogram and/or ureterogram are typically performed with percutaneous genitourinary procedures and are included in 50432, 50433, 50434, 50435, 50436, 50437, 50693, 50694, 50695.

Code 50436 describes enlargement of an existing percutaneous tract to the renal collecting system to accommodate large instruments used in an endourologic procedure. Code 50436 includes predilation urinary tract imaging, postprocedure nephrostomy tube placement, when performed, and includes all radiological supervision and interpretation and imaging guidance (eg, ultrasound, fluoroscopy). Code 50436 may not be reported with 50432, 50433, 52334 for basic dilation of a percutaneous tract during initial placement of a catheter or device.

Code 50437 includes all elements of 50436, but also includes new access into the renal collecting system performed in the same session when a pre-existing tract is not present.

Codes 50430 and 50431 are diagnostic procedure codes that include injection(s) of contrast material, all associated radiological supervision and interpretation, and procedural imaging guidance (eg, ultrasound and/or fluoroscopy). Code 50430 also includes accessing the collecting system and/or associated ureter with a needle and/or catheter. Codes 50430 or 50431 may not be reported together with 50432, 50433, 50434, 50435, 50693, 50694, 50695.

Codes 50432, 50433, 50434, 50435 represent therapeutic procedures describing catheter placement or exchange, and include the elements of access, drainage catheter manipulations, and imaging guidance (eg, ultrasonography and/or fluoroscopy), as well as diagnostic imaging supervision and interpretation, when performed.

Code 50433 describes percutaneous nephrostomy with the additional accessing of the ureter/bladder to ultimately place a nephroureteral catheter (a single transnephric catheter with nephrostomy and ureteral components that allows drainage internally, externally, or both).

For codes 50430, 50431, 50432, 50433, 50434, 50435, 50606, 50693, 50694, 50695, 50705, and 50706, the renal pelvis and its associated ureter are considered a single entity for reporting purposes. Codes 50430, 50431, 50432, 50433, 50434, 50435, 50606, 50693, 50694, 50695, 50705, and 50706 may be reported once for each renal collecting system/ureter accessed (eg, two separate codes would be reported for bilateral nephrostomy tube placement or for unilateral duplicated collecting system/ureter requiring two separate procedures).

50390 Aspiration and/or injection of renal cyst or pelvis by needle, percutaneous

CPT Assistant Fall 93:14, Dec 97:7, Oct 01:8, Oct 05:18, Oct 08:8

(For radiological supervision and interpretation, see 74425, 74470, 76942, 77002, 77012, 77021)

(For antegrade nephrostogram and/or antegrade pyelogram, see 50430, 50431)

50391 Instillation(s) of therapeutic agent into renal pelvis and/or ureter through established nephrostomy, pyelostomy or ureterostomy tube (eg, anticarcinogenic or antifungal agent)
- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* Oct 05:18

 # 50436 Dilation of existing tract, percutaneous, for an endourologic procedure including imaging guidance (eg, ultrasound and/or fluoroscopy) and all associated radiological supervision and interpretation, with postprocedure tube placement, when performed;
- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Sep 23:30
- *Clinical Examples in Radiology* Winter 19:5

 # 50437 including new access into the renal collecting system
- *CPT Changes: An Insider's View* 2019
- *CPT Assistant* Sep 23:30
- *Clinical Examples in Radiology* Winter 19:4

(Do not report 50436, 50437 in conjunction with 50382, 50384, 50430, 50431, 50432, 50433, 52334, 74485)

(For nephrolithotomy, see 50080, 50081)

(For dilation of an existing percutaneous access for an endourologic procedure with a new access into the collecting system, use 50437; for additional new access into the kidney, use 50437 for each new access that is dilated for an endourologic procedure)

(For endoscopic surgery, see 50551-50561)

(For retrograde percutaneous nephrostomy, use 52334)

50396 Manometric studies through nephrostomy or pyelostomy tube, or indwelling ureteral catheter
- *CPT Assistant* Fall 93:16, Dec 97:7, Oct 01:8

(For radiological supervision and interpretation, use 74425)

 # 50430 Injection procedure for antegrade nephrostogram and/or ureterogram, complete diagnostic procedure including imaging guidance (eg, ultrasound and fluoroscopy) and all associated radiological supervision and interpretation; new access
- *CPT Changes: An Insider's View* 2016, 2017
- *CPT Assistant* Oct 15:5, Jan 16:3, Sep 23:30

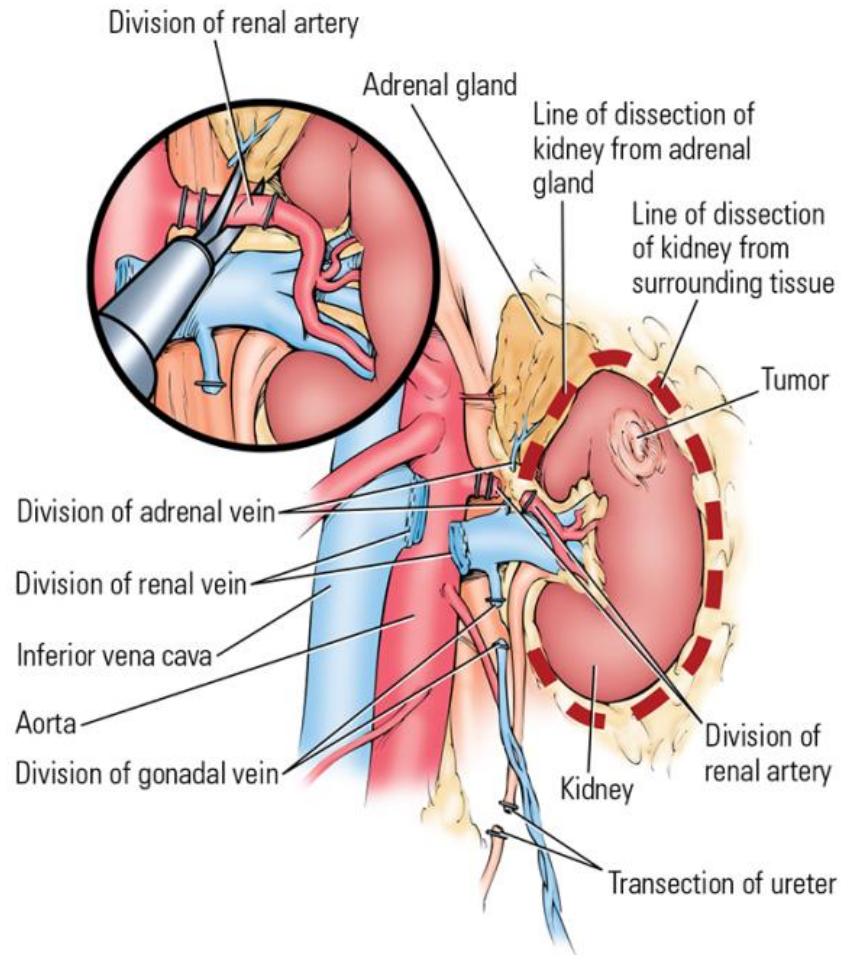
Laparoscopic Radical Nephrectomy

50545



Radical nephrectomy (includes removal of Gerota's fascia and surrounding fatty tissue, removal of regional lymph nodes, and adrenalectomy)

Laparoscopic Nephrectomy
50546

A kidney is dissected and removed under laparoscopic guidance.

A kidney is dissected and removed under laparoscopic guidance.

50549 Unlisted laparoscopy procedure, renal

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:25, Mar 00:9, May 00:4, Feb 06:16

(For laparoscopic drainage of lymphocele to peritoneal cavity, use 49323)

Endoscopy

(For supplies and materials, use 99070)

50551 Renal endoscopy through established nephrostomy or pyelostomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service;

CPT Assistant Oct 01:8, Jan 03:21

50553 with ureteral catheterization, with or without dilation of ureter

CPT Assistant Oct 01:8

(For image-guided dilation of ureter without endoscopic guidance, use 50706)

50555 with biopsy

CPT Assistant Oct 01:8

(For image-guided biopsy of ureter and/or renal pelvis without endoscopic guidance, use 50606)

50557 with fulguration and/or incision, with or without biopsy

CPT Assistant Oct 01:8

50561 with removal of foreign body or calculus

CPT Assistant Oct 01:8, Jan 03:21

50562 with resection of tumor

CPT Changes: An Insider's View 2003

CPT Assistant Jan 03:21

(When procedures 50570-50580 provide a significant identifiable service, they may be added to 50045 and 50120)

50570 Renal endoscopy through nephrotomy or pyelotomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service;

CPT Assistant Oct 01:8

(For nephrotomy, use 50045)

(For pyelotomy, use 50120)

50572 with ureteral catheterization, with or without dilation of ureter

CPT Assistant Oct 01:8

(For image-guided dilation of ureter without endoscopic guidance, use 50706)

50574 with biopsy

CPT Assistant Oct 01:8

(For image-guided biopsy of ureter and/or renal pelvis without endoscopic guidance, use 50606)

50575 with endopyelotomy (includes cystoscopy, ureteroscopy, dilation of ureter and ureteral pelvic junction, incision of ureteral pelvic junction and insertion of endopyelotomy stent)

CPT Assistant Oct 01:8, Aug 02:11

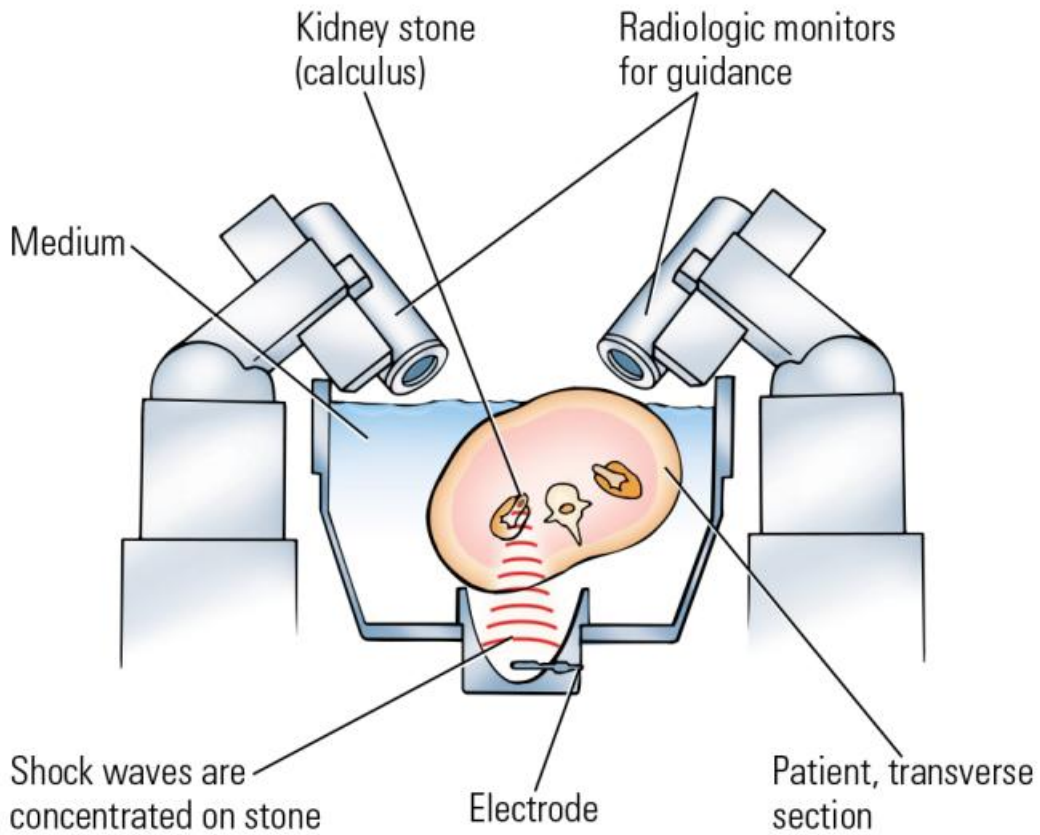
50576 with fulguration and/or incision, with or without biopsy

CPT Assistant Oct 01:8

50580 with removal of foreign body or calculus

CPT Assistant Oct 01:8

Other Procedures



50590 Lithotripsy, extracorporeal shock wave

CPT Assistant Jul 01:11, Aug 01:10, Oct 01:8, Jul 03:16, Aug 03:14, Feb 22:14

Lithotripsy

50590

The physician breaks up a kidney stone (calculus) by directing shock waves through a liquid surrounding the patient.

50592 Ablation, 1 or more renal tumor(s), percutaneous, unilateral, radiofrequency

CPT Changes: An Insider's View 2006, 2017

Clinical Examples in Radiology Winter 06:16, Summer 12:11

(50592 is a unilateral procedure. For bilateral procedure, report 50592 with modifier 50)

(For imaging guidance and monitoring, see 76940, 77013, 77022)

50593 Ablation, renal tumor(s), unilateral, percutaneous, cryotherapy

CPT Changes: An Insider's View 2008, 2017

CPT Assistant May 17:3

(50593 is a unilateral procedure. For bilateral procedure, report 50593 with modifier 50)

(For imaging guidance and monitoring, see codes 76940, 77013, 77022)

Ureter

Incision/Biopsy

Code 50606 is an add-on code describing endoluminal biopsy (eg, brush) using non-endoscopic imaging guidance, which may be reported once per ureter per day. This code includes the work of the biopsy and the imaging guidance and radiological supervision and interpretation required to accomplish the biopsy. The biopsy may be performed through *de novo* transrenal access, an existing renal/ureteral access, transurethral access, an ileal conduit, or ureterostomy. The service of gaining access may be reported separately. Diagnostic pyelography/ureterography is not included in the work of 50606 and may be reported separately. Other interventions or catheter placements performed at the same setting as the biopsy may be reported separately.

For codes 50430, 50431, 50432, 50433, 50434, 50435, 50606, 50693, 50694, 50695, 50705, and 50706, the renal pelvis and its associated ureter are considered a single entity for reporting purposes. Codes 50430, 50431, 50432, 50433, 50434, 50435, 50606, 50693, 50694, 50695, 50705, and 50706 may be reported once for each renal collecting system/ureter accessed (eg, two separate codes would be reported for bilateral nephrostomy tube placement or for unilateral duplicated collecting system/ureter requiring two separate procedures).

50600 Ureterotomy with exploration or drainage (separate procedure)

(For ureteral endoscopy performed in conjunction with this procedure, see 50970-50980)

50605 Ureterotomy for insertion of indwelling stent, all types

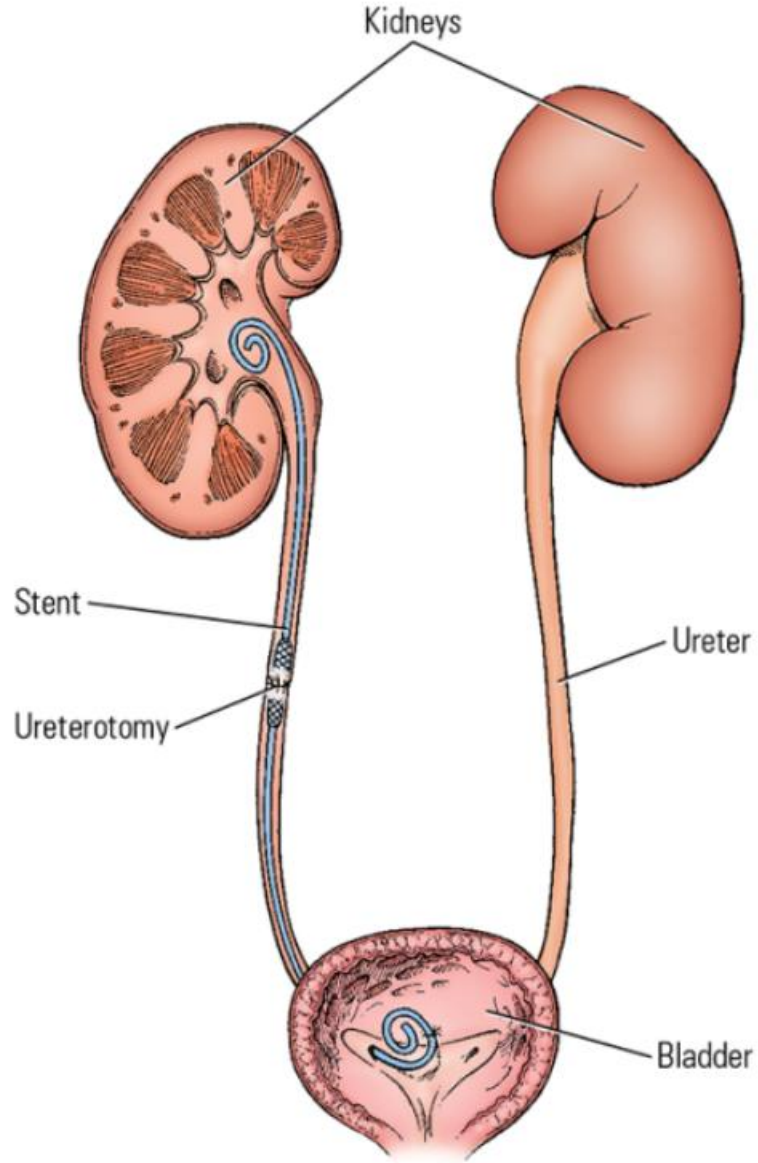
CPT Assistant Oct 01:8, Dec 09:4, Apr 12:18

+ 50606 Endoluminal biopsy of ureter and/or renal pelvis, non-endoscopic, including imaging guidance (eg, ultrasound and/or fluoroscopy) and all associated radiological supervision and interpretation (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2016, 2017

CPT Assistant Jan 16:3

Clinical Examples in Radiology Fall 15:3, Spring 16:12, Fall 21:7



(Use 50606 in conjunction with 50382, 50384, 50385, 50386, 50387, 50389, 50430, 50431, 50432, 50433, 50434, 50435, 50684, 50688, 50690, 50693, 50694, 50695, 51610)

(Do not report 50606 in conjunction with 50555, 50574, 50955, 50974, 52007, 74425 for the same renal collecting system and/or associated ureter)

Indwelling Ureteral Stent

50605

The physician makes an incision in the ureter (ureterotomy) and inserts a stent. For placement using cystourethroscopic technique, use 52332.

50610 Ureterolithotomy; upper one-third of ureter

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:26, Oct 01:8

50620 middle one-third of ureter

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:26, Oct 01:8

50630 lower one-third of ureter

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:26, Oct 01:8, May 14:3

(For laparoscopic approach, use 50945)

(For transvesical ureterolithotomy, use 51060)

(For cystotomy with stone basket extraction of ureteral calculus, use 51065)

(For endoscopic extraction or manipulation of ureteral calculus, see 50080, 50081, 50561, 50961, 50980, 52320-52330, 52352, 52353, 52356)

Excision

(For ureterocele, see 51535, 52300)

50650 Ureterectomy, with bladder cuff (separate procedure)

50660 Ureterectomy, total, ectopic ureter, combination abdominal, vaginal and/or perineal approach

Introduction

Other Introduction (Injection/Change/Removal) Procedures

Codes 50693, 50694, 50695 are therapeutic procedure codes describing percutaneous placement of ureteral stents. These codes include access, drainage, catheter manipulations, diagnostic nephrostogram and/or ureterogram, when performed, imaging guidance (eg, ultrasonography and/or fluoroscopy), and all associated radiological supervision and interpretation. When a separate ureteral stent and a nephrostomy catheter are placed into a ureter and its associated renal pelvis during the same session through a new percutaneous renal access, use 50695 to report the procedure.

50684 Injection procedure for ureterography or ureteropyelography through ureterostomy or indwelling ureteral catheter

- *CPT Assistant* Jan 16:3

(Do not report 50684 in conjunction with 50433, 50434, 50693, 50694, 50695)

(For radiological supervision and interpretation, use 74425)

50686 Manometric studies through ureterostomy or indwelling ureteral catheter

50688 Change of ureterostomy tube or externally accessible ureteral stent via ileal conduit

- *CPT Changes: An Insider's View* 2006
- *CPT Assistant* Jan 16:3, Jul 23:19
- *Clinical Examples in Radiology* Winter 06:20

(If imaging guidance is performed, use 75984)

50690 Injection procedure for visualization of ileal conduit and/or ureteropyelography, exclusive of radiologic service

- *CPT Assistant* Jan 16:3

(For radiological supervision and interpretation, see 74420 for retrograde or 74425 for antegrade injection)

50693 Placement of ureteral stent, percutaneous, including diagnostic nephrostogram and/or ureterogram when performed, imaging guidance (eg, ultrasound and/or fluoroscopy), and all associated radiological supervision and interpretation; pre-existing nephrostomy tract

- *CPT Changes: An Insider's View* 2016, 2017
- *CPT Assistant* Oct 15:5, Jan 16:3
- *Clinical Examples in Radiology* Fall 15:3, Spring 16:12, Fall 20:12, Fall 21:7

50694 new access, without separate nephrostomy catheter

- *CPT Changes: An Insider's View* 2016, 2017
- *CPT Assistant* Oct 15:5, Jan 16:3
- *Clinical Examples in Radiology* Fall 15:3, Spring 16:12, Fall 20:12, Fall 21:7

50695 new access, with separate nephrostomy catheter

- *CPT Changes: An Insider's View* 2016, 2017
- *CPT Assistant* Oct 15:5, Jan 16:3
- *Clinical Examples in Radiology* Fall 15:3, Spring 16:12, Fall 20:12, Fall 21:7

(Do not report 50693, 50694, 50695 in conjunction with 50430, 50431, 50432, 50433, 50434, 50435, 50684, 74425 for the same renal collecting system and/or associated ureter)

Repair

Codes 50705, 50706 are add-on codes describing embolization and balloon dilation of the ureter using non-endoscopic imaging guidance, and each may be reported once per ureter per day. These codes include embolization or dilation plus imaging guidance and radiological supervision and interpretation required to accomplish the embolization or dilation. These procedures may be performed through *de novo* transrenal access, an existing renal/ureteral access, transurethral access, an ileal conduit, or ureterostomy. The service of gaining access may be reported separately. Diagnostic pyelography/ureterography is not included in 50705 and 50706 and may be reported separately. Other interventions or catheter placements performed at the same setting as the embolization/dilation may be reported separately.

50700 Ureteroplasty, plastic operation on ureter (eg, stricture)

+ 50705 Ureteral embolization or occlusion, including imaging guidance (eg, ultrasound and/or fluoroscopy) and all associated radiological supervision and interpretation (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2016, 2017
- *CPT Assistant* Jan 16:3
- *Clinical Examples in Radiology* Fall 15:3, Spring 16:12, Fall 21:7

(Use 50705 in conjunction with 50382, 50384, 50385, 50386, 50387, 50389, 50430, 50431, 50432, 50433, 50434, 50435, 50684, 50688, 50690, 50693, 50694, 50695, 51610)

+ 50706 Balloon dilation, ureteral stricture, including imaging guidance (eg, ultrasound and/or fluoroscopy) and all associated radiological supervision and interpretation (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2016, 2017
- *CPT Assistant* Jan 16:3
- *Clinical Examples in Radiology* Fall 15:3, Spring 16:12, Fall 21:7

(Use 50706 in conjunction with 50382, 50384, 50385, 50386, 50387, 50389, 50430, 50431, 50432, 50433, 50434, 50435, 50684, 50688, 50690, 50693, 50694, 50695, 51610)

(Do not report 50706 in conjunction with 50553, 50572, 50953, 50972, 52341, 52344, 52345, 74485)

(For percutaneous nephrostomy, nephroureteral catheter, and/or ureteral catheter placement use 50385, 50387, 50432, 50433, 50434, 50435, 50693, 50694, 50695)

50715 Ureterolysis, with or without repositioning of ureter for retroperitoneal fibrosis

(For bilateral procedure, report 50715 with modifier 50)

50722 Ureterolysis for ovarian vein syndrome

50725 Ureterolysis for retrocaval ureter, with reanastomosis of upper urinary tract or vena cava

50727 Revision of urinary-cutaneous anastomosis (any type urostomy);

50728 with repair of fascial defect and hernia

50740 Ureteropyelostomy, anastomosis of ureter and renal pelvis

- *CPT Assistant* Oct 01:8

50750 Ureterocalycostomy, anastomosis of ureter to renal calyx

- *CPT Assistant* Oct 01:8

50760 Ureteroureterostomy

- *CPT Assistant* Oct 01:8

50770 Transureteroureterostomy, anastomosis of ureter to contralateral ureter

(Codes 50780-50785 include minor procedures to prevent vesicoureteral reflux)

50780 Ureteroneocystostomy; anastomosis of single ureter to bladder

CPT Assistant Oct 01:8, Feb 18:11

(For bilateral procedure, report 50780 with modifier 50)

(When combined with cystourethroplasty or vesical neck revision, use 51820)

50782 anastomosis of duplicated ureter to bladder

CPT Assistant Oct 01:8

50783 with extensive ureteral tailoring

CPT Assistant Oct 01:8

50785 with vesico-psoas hitch or bladder flap

CPT Assistant Oct 01:8

(For bilateral procedure, report 50785 with modifier 50)

50800 Ureteroenterostomy, direct anastomosis of ureter to intestine

CPT Assistant Oct 01:8

(For bilateral procedure, report 50800 with modifier 50)

50810 Ureterosigmoidostomy, with creation of sigmoid bladder and establishment of abdominal or perineal colostomy, including intestine anastomosis

CPT Changes: An Insider's View 2002

CPT Assistant Oct 01:8

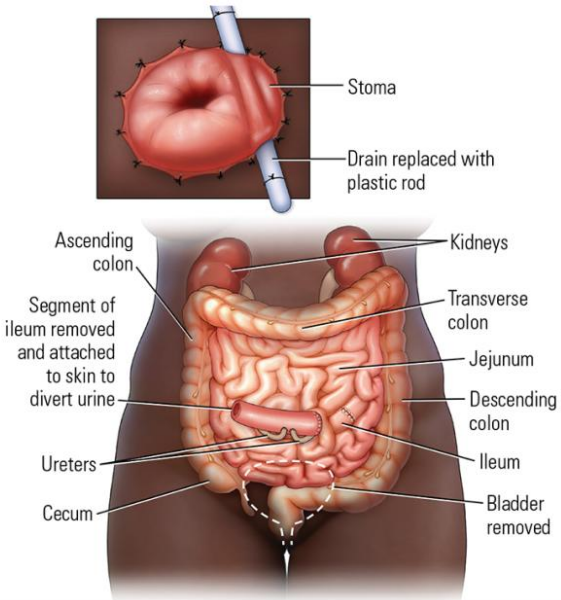
50815 Ureterocolon conduit, including intestine anastomosis

CPT Assistant Oct 01:8

(For bilateral procedure, report 50815 with modifier 50)

50820 Ureteroileal conduit (ileal bladder), including intestine anastomosis (Bricker operation)

CPT Changes: An Insider's View 2002



CPT Assistant Oct 01:8, May 23:27

(For bilateral procedure, report 50820 with modifier 50)

(For combination of 50800-50820 with cystectomy, see 51580-51595)

Ureteroileal Conduit
50820

The ureters are connected to a segment of intestine to divert urine flow through an opening in the skin.

50825 Continent diversion, including intestine anastomosis using any segment of small and/or large intestine (Kock pouch or Camey enterocystoplasty)
- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Oct 01:8

50830 Urinary undiversion (eg, taking down of ureteroileal conduit, ureterosigmoidostomy or ureteroenterostomy with ureteroureterostomy or ureteroneocystostomy)
- *CPT Assistant* Oct 01:8

50840 Replacement of all or part of ureter by intestine segment, including intestine anastomosis
- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Oct 01:8

(For bilateral procedure, report 50840 with modifier 50)

50845 Cutaneous appendico-vesicostomy

50860 Ureterostomy, transplantation of ureter to skin

(For bilateral procedure, report 50860 with modifier 50)

50900 Ureterorrhaphy, suture of ureter (separate procedure)

50920 Closure of ureterocutaneous fistula

50930 Closure of ureterovisceral fistula (including visceral repair)

50940 Deligation of ureter

(For ureteroplasty, ureterolysis, see 50700-50860)

Laparoscopy

►Surgical laparoscopy always includes diagnostic laparoscopy. To report a diagnostic laparoscopy (separate procedure), use 49320.◄

50945 Laparoscopy, surgical; ureterolithotomy

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:26, May 00:4, Oct 01:8, Sep 06:13

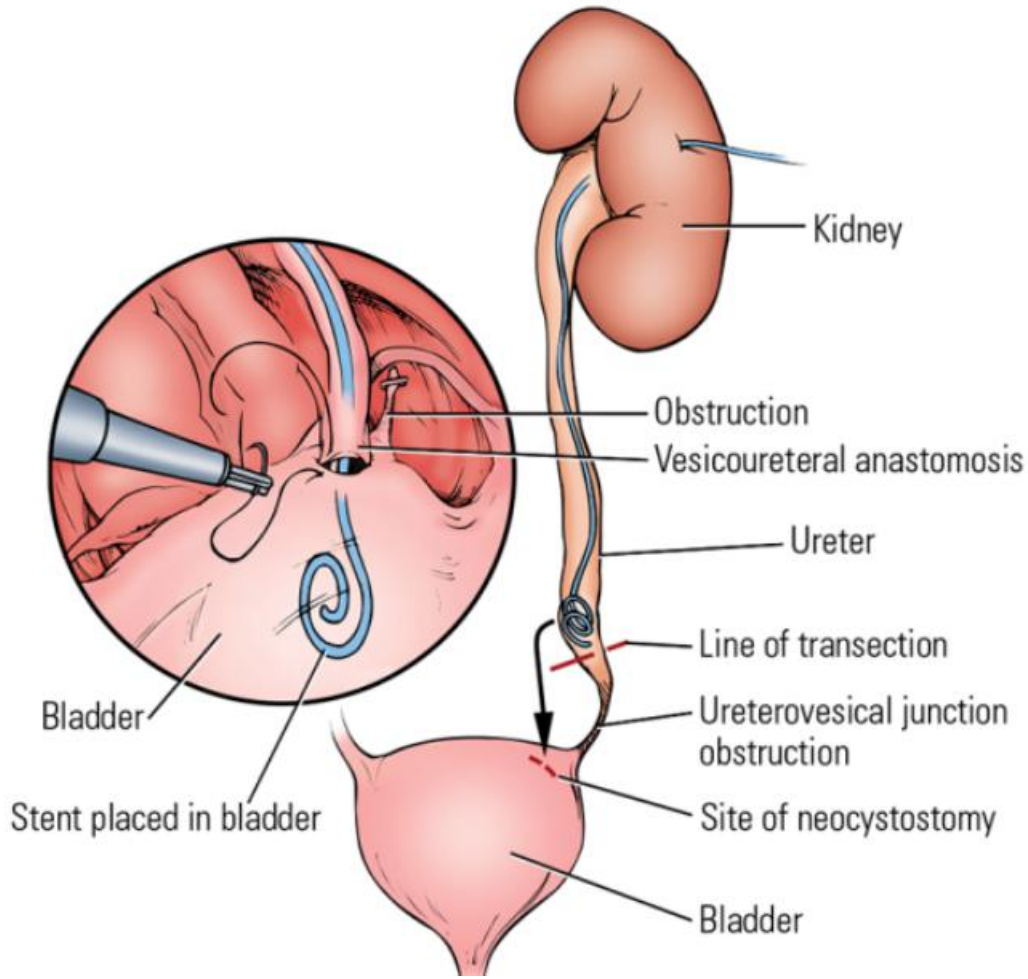
50947 ureteroneocystostomy with cystoscopy and ureteral stent placement

- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Oct 01:8

Laparoscopic Ureteroneocystostomy

50947

Ureteroneocystostomy with cystoscopy and ureteral stent placement



50948 ureteroneocystostomy without cystoscopy and ureteral stent placement

- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Oct 01:8

(For open ureteroneocystostomy, see 50780-50785)

50949 Unlisted laparoscopy procedure, ureter

- *CPT Changes: An Insider's View* 2001

(For imaging guidance, see 76942, 77002, 77012)

Excision

51500 Excision of urachal cyst or sinus, with or without umbilical hernia repair

51520 Cystotomy; for simple excision of vesical neck (separate procedure)

51525 for excision of bladder diverticulum, single or multiple (separate procedure)

51530 for excision of bladder tumor

(For transurethral resection, see 52234-52240, 52305)

51535 Cystotomy for excision, incision, or repair of ureterocele

(For bilateral procedure, report 51535 with modifier 50)

(For transurethral excision, use 52300)

51550 Cystectomy, partial; simple

51555 complicated (eg, postradiation, previous surgery, difficult location)

51565 Cystectomy, partial, with reimplantation of ureter(s) into bladder (ureteroneocystostomy)

51570 Cystectomy, complete; (separate procedure)

CPT Assistant Spring 93:35

51575 with bilateral pelvic lymphadenectomy, including external iliac, hypogastric, and obturator nodes

CPT Assistant Spring 93:35

51580 Cystectomy, complete, with ureterosigmoidostomy or ureterocutaneous transplantations;

51585 with bilateral pelvic lymphadenectomy, including external iliac, hypogastric, and obturator nodes

51590 Cystectomy, complete, with ureteroileal conduit or sigmoid bladder, including intestine anastomosis;

CPT Changes: An Insider's View 2002

CPT Assistant May 23:27

51595 with bilateral pelvic lymphadenectomy, including external iliac, hypogastric, and obturator nodes

51596 Cystectomy, complete, with continent diversion, any open technique, using any segment of small and/or large intestine to construct neobladder

CPT Changes: An Insider's View 2002

51597 Pelvic exenteration, complete, for vesical, prostatic or urethral malignancy, with removal of bladder and ureteral transplantations, with or without hysterectomy and/or abdominoperineal resection of rectum and colon and colostomy, or any combination thereof

(For pelvic exenteration for gynecologic malignancy, use 58240)

Introduction

51600 Injection procedure for cystography or voiding urethrocystography

CPT Assistant Oct 19:11
Clinical Examples in Radiology Summer 19:11, Winter 21:3

(For radiological supervision and interpretation, see 74430, 74455)

51605 Injection procedure and placement of chain for contrast and/or chain urethrocystography

(For radiological supervision and interpretation, use 74430)

51610 Injection procedure for retrograde urethrocystography

CPT Assistant Jan 16:3, Oct 19:11, Jan 21:11, Dec 23:41, Feb 24:21
Clinical Examples in Radiology Summer 24:6

(For radiological supervision and interpretation, use 74450)

51700 Bladder irrigation, simple, lavage and/or instillation

CPT Assistant Jan 21:11

(Codes 51701-51702 are reported only when performed independently. Do not report 51701-51702 when catheter insertion is an inclusive component of another procedure.)

51701 Insertion of non-indwelling bladder catheter (eg, straight catheterization for residual urine)

CPT Changes: An Insider's View 2003
CPT Assistant Jul 06:4, Jan 07:31, Jul 07:1, Jan 21:11, Mar 23:1

51702 Insertion of temporary indwelling bladder catheter; simple (eg, Foley)

CPT Changes: An Insider's View 2003
CPT Assistant Oct 03:10, Jul 06:4, Jan 07:31, Jul 07:1, May 14:3, Jan 21:11
Clinical Examples in Radiology Spring 12:1

►(Do not report 51702 in conjunction with 0071T, 0072T, 1000T)◄

51703 complicated (eg, altered anatomy, fractured catheter/balloon)

CPT Changes: An Insider's View 2003
CPT Assistant Jan 07:31, Jan 21:11

51705 Change of cystostomy tube; simple

CPT Assistant Dec 07:13, Jan 21:11

51710 complicated

CPT Assistant Dec 07:13

(If imaging guidance is performed, use 75984)

51715 Endoscopic injection of implant material into the submucosal tissues of the urethra and/or bladder neck

►(For anoscopy with directed submucosal injection of bulking agent into anal canal, use 0963T)◄

51720 Bladder instillation of anticarcinogenic agent (including retention time)

CPT Changes: An Insider's View 2007
CPT Assistant Nov 02:11

51721 Insertion of transurethral ablation transducer for delivery of thermal ultrasound for prostate tissue ablation, including suprapubic tube placement during the same session and placement of an endorectal cooling device, when performed

CPT Changes: An Insider's View 2025
CPT Assistant Apr 25:1

(Do not report 51721 in conjunction with 51701, 51702, 55881, 55882, 72195, 72196, 72197, 77022)

(For insertion of transurethral ultrasound transducer and ablation of prostate tissue using thermal ultrasound transducer performed by the same physician, use 55882)

Urodynamics

The following section (51725-51798) lists procedures that may be used separately or in many and varied combinations.

When multiple procedures are performed in the same investigative session, modifier 51 should be employed.

All procedures in this section imply that these services are performed by, or are under the direct supervision of, a physician or other qualified health care professional and that all instruments, equipment, fluids, gases, probes, catheters, technician's fees, medications, gloves, trays, tubing, and other sterile supplies be provided by that individual. When the individual only interprets the results and/or operates the equipment, a professional component, modifier 26, should be used to identify these services.

51725 Simple cystometrogram (CMG) (eg, spinal manometer)

CPT Assistant Sep 02:6, Feb 10:7

51726 Complex cystometrogram (ie, calibrated electronic equipment);

CPT Changes: An Insider's View 2010

CPT Assistant Sep 02:6, Feb 10:7, Aug 24:9

51727 with urethral pressure profile studies (ie, urethral closure pressure profile), any technique

CPT Changes: An Insider's View 2010

CPT Assistant Feb 10:7, Aug 24:9

51728 with voiding pressure studies (ie, bladder voiding pressure), any technique

CPT Changes: An Insider's View 2010

CPT Assistant Feb 10:7, Aug 24:9

51729 with voiding pressure studies (ie, bladder voiding pressure) and urethral pressure profile studies (ie, urethral closure pressure profile), any technique

CPT Changes: An Insider's View 2010

CPT Assistant Feb 10:7, Aug 24:9

#✚ 51797 Voiding pressure studies, intra-abdominal (ie, rectal, gastric, intraperitoneal) (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2008, 2010

CPT Assistant Dec 01:7, Sep 02:6, Oct 09:7, Feb 10:7

(Use 51797 in conjunction with 51728, 51729)

51736 Simple uroflowmetry (UFR) (eg, stop-watch flow rate, mechanical uroflowmeter)

CPT Assistant Sep 02:6, Feb 10:7, Nov 23:26, Feb 24:28

(Do not report 51736 in conjunction with 0811T, 0812T)

51741 Complex uroflowmetry (eg, calibrated electronic equipment)

CPT Assistant Sep 02:6, Feb 10:7, Sep 14:14, Nov 23:26, Feb 24:28, Aug 24:9

(Do not report 51741 in conjunction with 0811T, 0812T)

51784 Electromyography studies (EMG) of anal or urethral sphincter, other than needle, any technique

CPT Assistant Sep 02:6, Feb 10:7, Feb 14:11, Sep 14:14, Aug 24:9

(Do not report 51784 in conjunction with 51792)

51785 Needle electromyography studies (EMG) of anal or urethral sphincter, any technique

CPT Assistant Apr 02:6, Sep 02:6, Jul 04:13, Feb 10:7

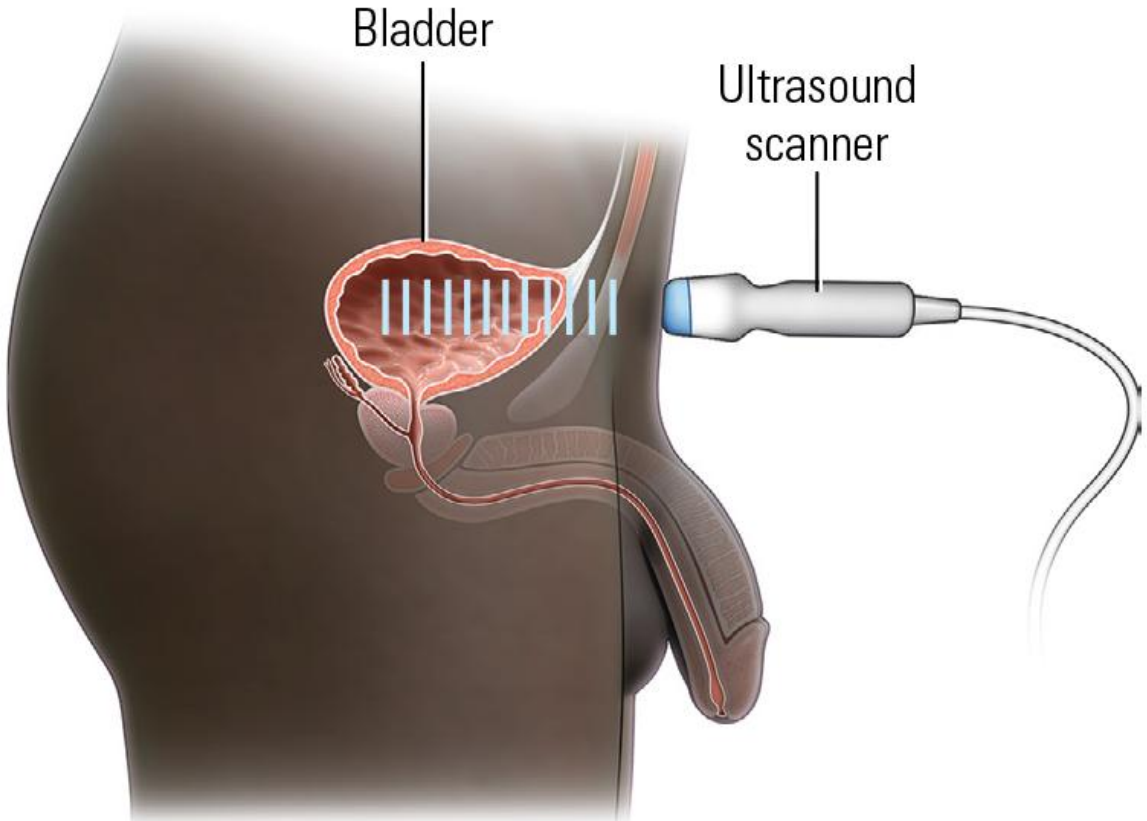
51792 Stimulus evoked response (eg, measurement of bulbocavernosus reflex latency time)

CPT Assistant Apr 02:6, Sep 02:6, Feb 10:7, Feb 14:11

(Do not report 51792 in conjunction with 51784)

51797 Code is out of numerical sequence. See 51728-51741

51798 Measurement of post-voiding residual urine and/or bladder capacity by ultrasound, non-imaging



CPT Changes: An Insider's View 2003

CPT Assistant Dec 05:3, Feb 10:7, Jun 18:11

►(Do not report 51798 in conjunction with 1000T)◄

Measurement of Postvoiding

51798

Repair

51800 Cystoplasty or cystourethroplasty, plastic operation on bladder and/or vesical neck (anterior Y-plasty, vesical fundus resection), any procedure, with or without wedge resection of posterior vesical neck

51820 Cystourethroplasty with unilateral or bilateral ureteroneocystostomy

51840 Anterior vesicourethropexy, or urethropexy (eg, Marshall-Marchetti-Krantz, Burch); simple

- *CPT Assistant* Jan 97:1, Nov 97:19, Apr 98:15, Jun 02:7, May 06:17, Jun 10:6, Aug 12:13

51841 complicated (eg, secondary repair)

- *CPT Assistant* Jan 97:1, Jun 02:7, Jun 10:6, Aug 12:13

(For urethropexy (Pereyra type), use 57289)

51845 Abdomino-vaginal vesical neck suspension, with or without endoscopic control (eg, Stamey, Raz, modified Pereyra)

- *CPT Assistant* Jan 97:3

51860 Cystorrhaphy, suture of bladder wound, injury or rupture; simple

51865 complicated

51880 Closure of cystostomy (separate procedure)

51900 Closure of vesicovaginal fistula, abdominal approach

(For vaginal approach, see 57320-57330)

51920 Closure of vesicouterine fistula;

51925 with hysterectomy

(For closure of vesicoenteric fistula, see 44660, 44661)

(For closure of rectovesical fistula, see 45800-45805)

51940 Closure, exstrophy of bladder

- *CPT Changes: An Insider's View* 2002

(See also 54390)

51960 Enterocystoplasty, including intestinal anastomosis

- *CPT Changes: An Insider's View* 2002

51980 Cutaneous vesicostomy

Laparoscopy

►Surgical laparoscopy always includes diagnostic laparoscopy. To report a diagnostic laparoscopy (separate procedure), use 49320.◄

51990 Laparoscopy, surgical; urethral suspension for stress incontinence

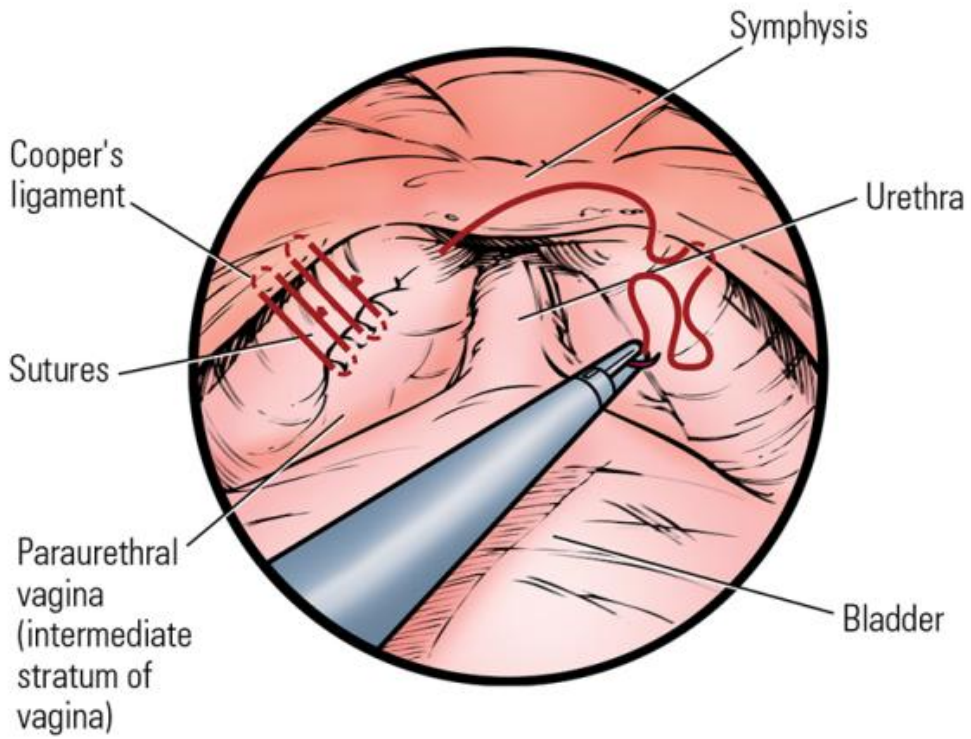
- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:26, May 00:4, Jun 10:6, Mar 12:10, Aug 12:13

51992 sling operation for stress incontinence (eg, fascia or synthetic)

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:26, May 00:4, Mar 12:10, Aug 12:13

(For open sling operation for stress incontinence, use 57288)

(For reversal or removal of sling operation for stress incontinence, use 57287)



51999 Unlisted laparoscopy procedure, bladder

- *CPT Changes: An Insider's View* 2006
- *CPT Assistant* Dec 17:14

Laparoscopic Sling Suspension Urinary Incontinence

51990

Nonabsorbable sutures are placed laparoscopically into the endopelvic fascia at the bladder neck region on each side and secured to the ipsilateral pectineal ligament. The sutures are tied using extra vaginal-urethral knots so as to create a hammock type suspension of the bladder neck, without urethral occlusion.

Endoscopy—Cystoscopy, Urethroscopy, Cystourethroscopy

Endoscopic descriptions are listed so that the main procedure can be identified without having to list all the minor related functions performed at the same time. For example: meatotomy, urethral calibration and/or dilation, urethroscopy, and cystoscopy prior to a transurethral resection of prostate; ureteral catheterization following extraction of ureteral calculus; internal urethrotomy and bladder neck fulguration when performing a cystourethroscopy for the female urethral syndrome. When the secondary procedure requires significant additional time and effort, it may be identified by the addition of modifier 22.

For example: urethrotomy performed for a documented pre-existing stricture or bladder neck contracture.

Because cutaneous urinary diversions utilizing ileum or colon serve as functional replacements of a native bladder, endoscopy of such bowel segments, as well as performance of secondary procedures can be captured by using the cystourethroscopy codes. For example, endoscopy of an ileal loop with removal of ureteral calculus would be coded as cystourethroscopy (including ureteral catheterization); with removal of ureteral calculus (52320).

52000 Cystourethroscopy (separate procedure)

CPT Assistant Oct 00:7, May 01:5, Sep 04:11, Oct 05:23, Nov 07:9, Mar 13:14, May 14:3, Oct 17:9, Nov 18:10, Dec 23:41, Feb 24:21

►(Do not report 52000 in conjunction with 52001, 52320, 52325, 52327, 52330, 52332, 52334, 52341, 52342, 52343, 52356, 52443, 57240, 57260, 57265, 0935T, 0991T, 1000T)◄

(Do not report 52000 in conjunction with 57240, 57260, 57265)

52001 Cystourethroscopy with irrigation and evacuation of multiple obstructing clots

CPT Changes: An Insider's View 2002, 2003

(Do not report 52001 in conjunction with 52000)

Coding Tip

Restrictions for Reporting Temporary Catheter Insertion and Removal with Cystourethroscopy

The insertion and removal of a temporary ureteral catheter (52005) during diagnostic or therapeutic cystourethroscopy with ureteroscopy and/or pyeloscopy is included in 52320-52356 and should not be reported separately.

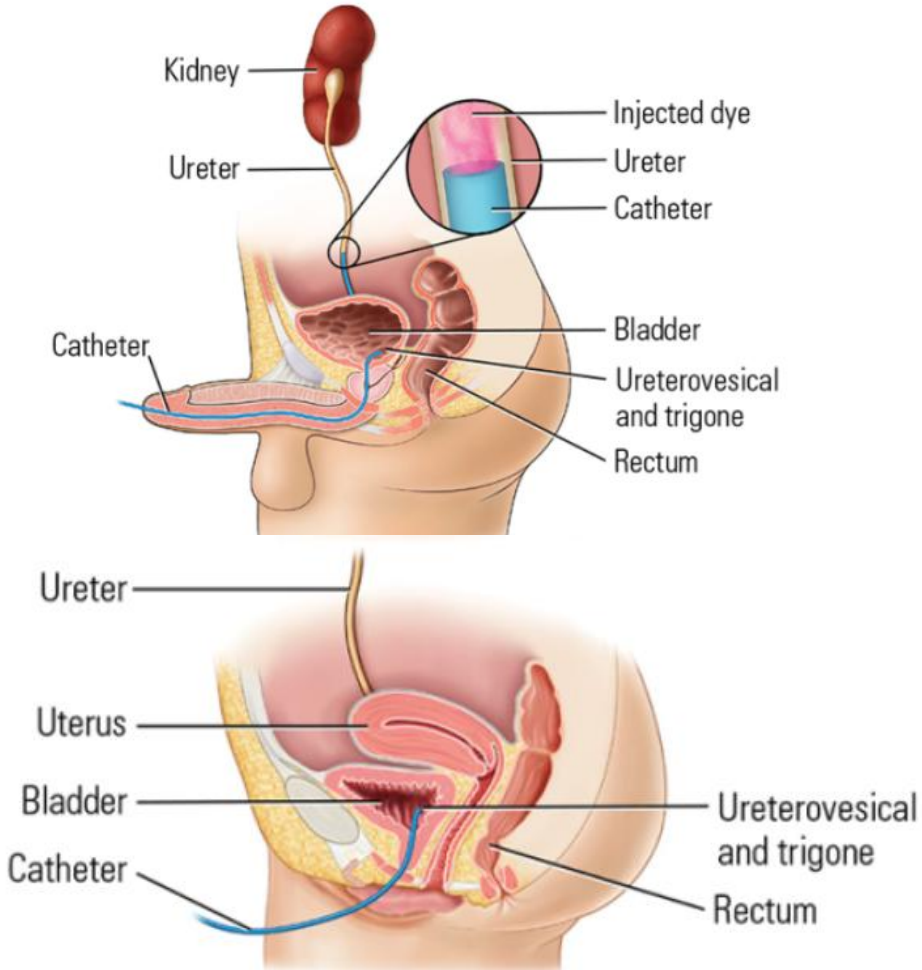
CPT Coding Guidelines, Urinary System, Bladder Transurethral Surgery, Ureter and Pelvis

52005 Cystourethroscopy, with ureteral catheterization, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service;

CPT Assistant Sep 00:11, Jan 01:13, May 01:5, Oct 01:8, Dec 10:15, Mar 19:11

►(Do not report 52005 in conjunction with 0935T, 0991T)◄

52007 with brush biopsy of ureter and/or renal pelvis



CPT Assistant May 01:5, Oct 01:8

(For image-guided biopsy of ureter and/or renal pelvis without endoscopic guidance, use 50606)

Cystourethroscopy With Ureteral Catheterization

52005

A cystourethroscope is passed through the urethra and bladder in order to view the urinary collecting system.

52010 Cystourethroscopy, with ejaculatory duct catheterization, with or without irrigation, instillation, or duct radiography, exclusive of radiologic service

CPT Assistant May 01:5

(For radiological supervision and interpretation, use 74440)

Transurethral Surgery

Urethra and Bladder

52204 Cystourethroscopy, with biopsy(s)

CPT Changes: An Insider's View 2007

CPT Assistant May 01:5, Sep 01:1, Sep 03:16, Aug 09:6, May 16:12

52214 Cystourethroscopy, with fulguration (including cryosurgery or laser surgery) of trigone, bladder neck, prostatic fossa, urethra, or periurethral glands

CPT Assistant May 01:5, Sep 01:1, Aug 09:6, May 16:12

(For transurethral fulguration of prostate tissue performed within the postoperative period of 52601 or 52630 performed by the same physician, append modifier 78)

(For transurethral fulguration of prostate tissue performed within the postoperative period of a related procedure performed by the same physician, append modifier 78)

(For transurethral fulguration of prostate for postoperative bleeding performed by the same physician, append modifier 78)

52224 Cystourethroscopy, with fulguration (including cryosurgery or laser surgery) or treatment of MINOR (less than 0.5 cm) lesion(s) with or without biopsy

CPT Assistant May 01:5, Sep 01:1, Dec 07:7, Jun 09:10, Aug 09:6, May 16:12

52234 Cystourethroscopy, with fulguration (including cryosurgery or laser surgery) and/or resection of; SMALL bladder tumor(s) (0.5 up to 2.0 cm)

CPT Changes: An Insider's View 2005

CPT Assistant May 01:5, Sep 01:1, Oct 02:12, Jan 03:21, Jun 09:10, Aug 09:6, May 16:12

52235 MEDIUM bladder tumor(s) (2.0 to 5.0 cm)

CPT Assistant May 01:5, Sep 01:1, Oct 02:12, Jan 03:21, Jun 09:10, Aug 09:6, May 16:12

52240 LARGE bladder tumor(s)

CPT Assistant May 01:5, Sep 01:1, Jun 09:10, Aug 09:6, May 16:12

52250 Cystourethroscopy with insertion of radioactive substance, with or without biopsy or fulguration

CPT Assistant May 01:5, Sep 01:1

52260 Cystourethroscopy, with dilation of bladder for interstitial cystitis; general or conduction (spinal) anesthesia

CPT Assistant May 01:5, Sep 01:1, Oct 05:23

52265 local anesthesia

CPT Assistant May 01:5, Sep 01:1

52270 Cystourethroscopy, with internal urethrotomy; female

CPT Assistant May 01:5, Sep 01:1

52275 male

CPT Assistant May 01:5, Sep 01:1

52276 Cystourethroscopy with direct vision internal urethrotomy

CPT Assistant May 01:5, Sep 01:1, May 09:8, Feb 10:7

52277 Cystourethroscopy, with resection of external sphincter (sphincterotomy)

CPT Assistant May 01:5, Sep 01:1

52281 Cystourethroscopy, with calibration and/or dilation of urethral stricture or stenosis, with or without meatotomy, with or without injection procedure for cystography, male or female

CPT Assistant Nov 97:20, May 01:5, Sep 01:1, Jun 07:10, Oct 17:9, Dec 23:41, Feb 24:21

(For cystourethroscopy with mechanical urethral dilation and urethral therapeutic drug delivery by drug-coated balloon catheter for urethral stricture or stenosis, including fluoroscopy, use 52284)

52282 Cystourethroscopy, with insertion of permanent urethral stent

CPT Changes: An Insider's View 2010

CPT Assistant Nov 97:20, May 01:5, Sep 01:1, Feb 10:7, Jun 15:5, Nov 24:11

(For placement of temporary prostatic urethral stent, use 53855)

(For insertion of prostatic urethral scaffold, use 0941T)

52283 Cystourethroscopy, with steroid injection into stricture

CPT Assistant May 01:5, Sep 01:1, Mar 15:9, Dec 23:41, Feb 24:21

52284 Cystourethroscopy, with mechanical urethral dilation and urethral therapeutic drug delivery by drug-coated balloon catheter for urethral stricture or stenosis, male, including fluoroscopy, when performed

CPT Changes: An Insider's View 2024

CPT Assistant Dec 23:41, Feb 24:21

►(Do not report 52284 in conjunction with 51610, 52000, 52281, 52283, 52443, 74450, 76000)◄

►(For cystourethroscopy with initial transurethral anterior prostate commissurotomy with a nondrug-coated balloon catheter followed by therapeutic drug delivery into the prostate by a drug-coated balloon catheter, use 52443)◄

52285 Cystourethroscopy for treatment of the female urethral syndrome with any or all of the following: urethral meatotomy, urethral dilation, internal urethrotomy, lysis of urethrovaginal septal fibrosis, lateral incisions of the bladder neck, and fulguration of polyp(s) of urethra, bladder neck, and/or trigone

CPT Assistant May 01:5, Sep 01:1

52287 Cystourethroscopy, with injection(s) for chemodenervation of the bladder

CPT Changes: An Insider's View 2013

(The supply of the chemodenervation agent is reported separately)

52290 Cystourethroscopy; with ureteral meatotomy, unilateral or bilateral

CPT Assistant May 01:5, Sep 01:1

52300 with resection or fulguration of orthotopic ureterocele(s), unilateral or bilateral

CPT Assistant May 01:5, Sep 01:1

52301 with resection or fulguration of ectopic ureterocele(s), unilateral or bilateral

CPT Assistant May 01:5, Sep 01:1

52305 with incision or resection of orifice of bladder diverticulum, single or multiple

CPT Assistant May 01:5, Sep 01:1

Coding Tip

Instructions for Reporting Stent Removal

To report cystourethroscopic removal of a self-retaining, indwelling ureteral stent, see 52310, 52315, and append modifier 58, if appropriate.

CPT Coding Guidelines, Urinary System, Bladder Transurethral Surgery, Ureter and Pelvis

52310 Cystourethroscopy, with removal of foreign body, calculus, or ureteral stent from urethra or bladder (separate procedure); simple

CPT Assistant May 01:5, Sep 01:1, Nov 24:11

52315 complicated

CPT Assistant May 01:5, Sep 01:1

(For removal and replacement of prostatic urethral scaffold, use 0942T)

(For removal of prostatic urethral scaffold, use 0943T)

52317 Litholapaxy: crushing or fragmentation of calculus by any means in bladder and removal of fragments; simple or small (less than 2.5 cm)

CPT Assistant May 01:5, Sep 01:1, Feb 12:11

52318 complicated or large (over 2.5 cm)

CPT Assistant May 01:5, Sep 01:1, Feb 12:11

Ureter and Pelvis

Therapeutic cystourethroscopy always includes diagnostic cystourethroscopy. To report a diagnostic cystourethroscopy, use 52000. Therapeutic cystourethroscopy with ureteroscopy and/or pyeloscopy always includes diagnostic cystourethroscopy with ureteroscopy and/or pyeloscopy. To report a diagnostic cystourethroscopy with ureteroscopy and/or pyeloscopy, use 52351.

Do not report 52000 in conjunction with 52320-52343, 52356.

Do not report 52351 in conjunction with 52344-52346, 52352-52356.

The insertion and removal of a temporary ureteral catheter (52005) during diagnostic or therapeutic cystourethroscopy with ureteroscopy and/or pyeloscopy is included in 52320-52356 and should not be reported separately.

To report insertion of a self-retaining, indwelling stent performed during diagnostic or therapeutic cystourethroscopy with ureteroscopy and/or pyeloscopy, report 52332, in addition to primary procedure(s) performed (52320-52330, 52334-52352, 52354, 52355), and append modifier 51. Code 52332 is used to report a unilateral procedure unless otherwise specified.

For bilateral insertion of self-retaining, indwelling ureteral stents, use code 52332, and append modifier 50.

To report cystourethroscopic removal of a self-retaining, indwelling ureteral stent, see 52310, 52315, and append modifier 58, if appropriate.

52320 Cystourethroscopy (including ureteral catheterization); with removal of ureteral calculus

CPT Assistant Mar 96:1, May 96:11, Jan 01:13, May 01:5, Sep 01:1, Oct 01:8, May 14:3

52325 with fragmentation of ureteral calculus (eg, ultrasonic or electro-hydraulic technique)

CPT Assistant Mar 96:1, May 96:11, May 01:5, Sep 01:1, Oct 01:8, Dec 07:13

►(For cystourethroscopy with low-energy lithotripsy and acoustically actuated microspheres, use 0991T)◄

52327 with subureteric injection of implant material

CPT Assistant Mar 96:1, May 96:11, May 01:5, Sep 01:1, Oct 01:8

52330 with manipulation, without removal of ureteral calculus

CPT Assistant Mar 96:1, May 96:11, Sep 00:11, May 01:5, Sep 01:1, Oct 01:8, May 14:3

(Do not report 52320, 52325, 52327, 52330 in conjunction with 52000)

►(Do not report 52320, 52325, 52330 in conjunction with 0991T, when performed on the same side)◄

52332 Cystourethroscopy, with insertion of indwelling ureteral stent (eg, Gibbons or double-J type)

CPT Assistant Mar 96:1, May 96:11, Nov 96:8, Jan 01:13, May 01:5, Sep 01:1, Oct 01:8, Oct 05:18, Dec 09:4, 12, May 14:3, Jul 23:19

(Do not report 52332 in conjunction with 52000, 52353, 52356 when performed together on the same side)

52334 Cystourethroscopy with insertion of ureteral guide wire through kidney to establish a percutaneous nephrostomy, retrograde

CPT Assistant Mar 96:11, May 96:11, May 01:5, Sep 01:1, Oct 01:8, May 14:3

(For percutaneous nephrolithotomy, see 50080, 50081; for establishment of percutaneous nephrostomy, see 50432, 50433)

(For cystourethroscopy, with ureteroscopy and/or pyeloscopy, see 52351-52356)

(For cystourethroscopy with incision, fulguration, or resection of congenital posterior urethral valves or obstructive hypertrophic mucosal folds, use 52400)

(Do not report 52334 in conjunction with 50437, 52000, 52351)

52341 Cystourethroscopy; with treatment of ureteral stricture (eg, balloon dilation, laser, electrocautery, and incision)

CPT Changes: An Insider's View 2001

CPT Assistant Nov 96:9, Apr 01:4, May 01:5, Sep 01:1, Oct 01:8

52342 with treatment of ureteropelvic junction stricture (eg, balloon dilation, laser, electrocautery, and incision)

CPT Changes: An Insider's View 2001

CPT Assistant Apr 01:4, May 01:5, Sep 01:1, Oct 01:8, Aug 02:11

52343 with treatment of intra-renal stricture (eg, balloon dilation, laser, electrocautery, and incision)

CPT Changes: An Insider's View 2001

CPT Assistant Apr 01:4, May 01:5, Sep 01:1, Oct 01:8, May 14:3

(Do not report 52341, 52342, 52343 in conjunction with 52000, 52351)

(For image-guided dilation of ureter, ureteropelvic junction stricture without endoscopic guidance, use 50706)

(For radiological supervision and interpretation, use 74485)

52344 Cystourethroscopy with ureteroscopy; with treatment of ureteral stricture (eg, balloon dilation, laser, electrocautery, and incision)

CPT Changes: An Insider's View 2001

CPT Assistant Apr 01:4, May 01:5, Sep 01:1, Oct 01:8

52345 with treatment of ureteropelvic junction stricture (eg, balloon dilation, laser, electrocautery, and incision)

CPT Changes: An Insider's View 2001

CPT Assistant Apr 01:4, May 01:5, Sep 01:1, Oct 01:8

52346 with treatment of intra-renal stricture (eg, balloon dilation, laser, electrocautery, and incision)

CPT Changes: An Insider's View 2001

CPT Assistant Apr 01:4, May 01:5, Sep 01:1, Oct 01:8, May 14:3

(For transurethral resection or incision of ejaculatory ducts, use 52402)

(Do not report 52344, 52345, 52346 in conjunction with 52351)

(For image-guided dilation of ureter, ureteropelvic junction stricture without endoscopic guidance, use 50706)

(For radiological supervision and interpretation, use 74485)

52351 Cystourethroscopy, with ureteroscopy and/or pyeloscopy; diagnostic

CPT Changes: An Insider's View 2001

CPT Assistant Apr 01:4, May 01:5, Sep 01:1, Oct 01:8, May 14:3

(Do not report 52351 in conjunction with 52341, 52342, 52343, 52344, 52345, 52346, 52352-52356)

52352 with removal or manipulation of calculus (ureteral catheterization is included)

CPT Changes: An Insider's View 2001

CPT Assistant Apr 01:4, May 01:5, Sep 01:1, Oct 01:8, Jun 07:10, Feb 10:13, May 14:3, Dec 19:12

52353 with lithotripsy (ureteral catheterization is included)

CPT Changes: An Insider's View 2001

CPT Assistant Apr 01:4, May 01:5, Sep 01:1, Oct 01:8, Dec 07:13, Apr 09:8, May 14:3, Dec 19:12, Feb 25:28

(Do not report 52353 in conjunction with 52332, 52356 when performed together on the same side)

 # 52356 with lithotripsy including insertion of indwelling ureteral stent (eg, Gibbons or double-J type)

CPT Changes: An Insider's View 2014

CPT Assistant May 14:3, Dec 19:12, Feb 22:14

(Do not report 52356 in conjunction with 52332, 52353 when performed together on the same side)

52354 with biopsy and/or fulguration of ureteral or renal pelvic lesion

CPT Changes: An Insider's View 2001, 2003

CPT Assistant Apr 01:4, May 01:5, Sep 01:1, Oct 01:8, May 14:3

(For image-guided biopsy of ureter and/or renal pelvis without endoscopic guidance, use 50606)

52355 with resection of ureteral or renal pelvic tumor

CPT Changes: An Insider's View 2001, 2003

CPT Assistant Apr 01:4, May 01:5, Sep 01:1, Oct 01:8, Jan 03:21, May 14:3

52356 Code is out of numerical sequence. See 52352-52355

Vesical Neck and Prostate

52400 Cystourethroscopy with incision, fulguration, or resection of congenital posterior urethral valves, or congenital obstructive hypertrophic mucosal folds

CPT Changes: An Insider's View 2001

CPT Assistant Apr 01:4

52402 Cystourethroscopy with transurethral resection or incision of ejaculatory ducts

CPT Changes: An Insider's View 2005

52441 Cystourethroscopy, with insertion of permanent adjustable transprostatic implant; single implant

CPT Changes: An Insider's View 2015

CPT Assistant Jun 15:5

+ 52442 each additional permanent adjustable transprostatic implant (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2015

CPT Assistant Jun 15:5

(Use 52442 in conjunction with 52441)

(To report removal of implant[s], use 52310)

(For insertion of a permanent urethral stent, use 52282. For insertion of a temporary prostatic urethral stent, use 53855. For insertion of prostatic urethral scaffold, use 0941T)

● **52443** Cystourethroscopy with initial transurethral anterior prostate commissurotomy with a nondrug-coated balloon catheter followed by therapeutic drug delivery into the prostate by a drug-coated balloon catheter, including transrectal ultrasound and fluoroscopy, when performed

CPT Changes: An Insider's View 2026

►(Do not report 52443 in conjunction with 52000, 52282, 52284, 52441, 52442, 52450, 52500, 52601, 52630, 52640, 52648, 52649, 53850, 53852, 53854, 53855, 76000, 76872)◄

►(For cystourethroscopy with mechanical urethral dilation and urethral therapeutic drug delivery by drug-coated balloon catheter for urethral stricture or stenosis, male, use 52284)◄

52450 Transurethral incision of prostate

CPT Assistant Apr 01:4, Jul 05:15, Jun 15:5

52500 Transurethral resection of bladder neck (separate procedure)

CPT Assistant Apr 01:4, Jan 04:27, Jul 05:15, May 09:8

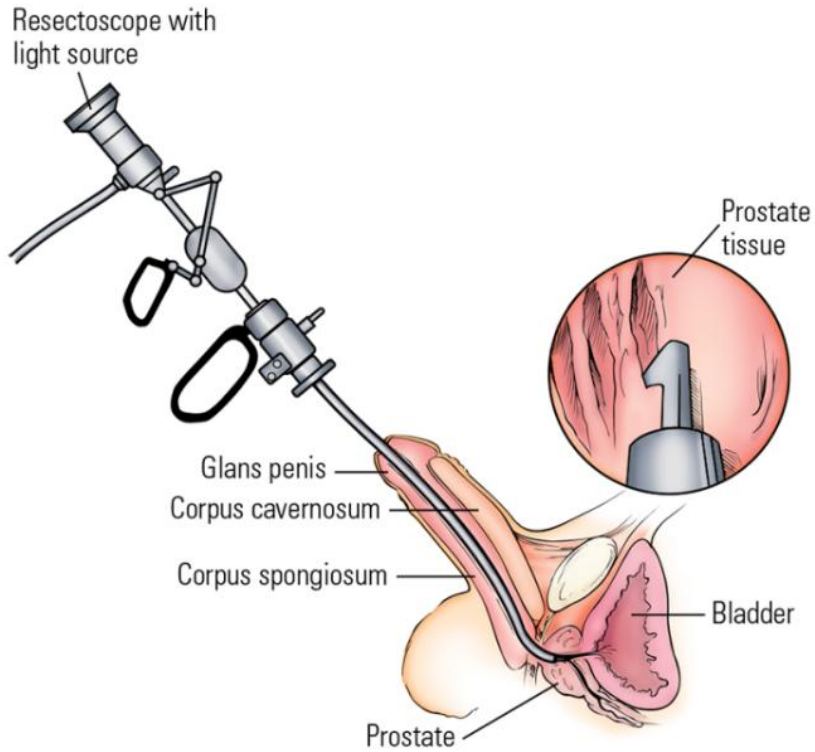
● **52597** Transurethral robotic-assisted waterjet resection of prostate, including intraoperative planning, ultrasound guidance, control of postoperative bleeding, complete, including vasectomy, meatotomy, cystourethroscopy, urethral calibration and/or dilation, and internal urethrotomy, when performed

CPT Changes: An Insider's View 2026

►(Do not report 52597 in conjunction with 52500, 52601, 52630, 76872)◄

52601 Transurethral electrosurgical resection of prostate, including control of postoperative bleeding, complete (vasectomy, meatotomy, cystourethroscopy, urethral calibration and/or dilation, and internal urethrotomy are included)

CPT Assistant Nov 97:20, Apr 01:4, Jun 03:6, Oct 11:10, Jun 15:5, Jul 21:10



►(For transurethral waterjet ablation of prostate, use 52597)◄

(For other approaches, see 55801-55845)

Transurethral Resection of Prostate, Complete

52601

The physician removes the prostate gland using an electrocautery knife.

52630 Transurethral resection; residual or regrowth of obstructive prostate tissue including control of postoperative bleeding, complete (vasectomy, meatotomy, cystourethroscopy, urethral calibration and/or dilation, and internal urethrotomy are included)

CPT Changes: An Insider's View 2009

CPT Assistant Apr 01:4

(For resection of residual prostate tissue performed within the postoperative period of a related procedure performed by the same physician, append modifier 78)

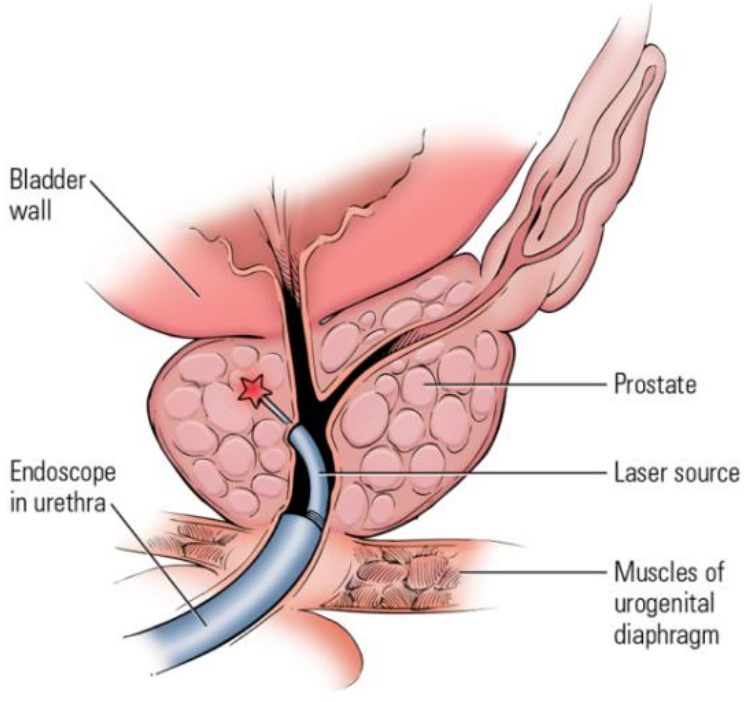
►(For transurethral waterjet ablation of prostate, use 52597)◄

52640 of postoperative bladder neck contracture

CPT Assistant Apr 01:4

►(52647 has been deleted)◄

52648 Laser vaporization of prostate, including control of postoperative bleeding, complete (vasectomy, meatotomy, cystourethroscopy, urethral calibration and/or dilation, internal urethrotomy and transurethral resection of prostate are included if performed)



CPT Changes: An Insider's View 2006

CPT Assistant Mar 98:11, Apr 01:5, Jul 05:15, Nov 06:21, Jun 15:5

Contact Laser Vaporization of Prostate

52648

A laser is used to vaporize the prostate.

52649 Laser enucleation of the prostate with morcellation, including control of postoperative bleeding, complete (vasectomy, meatotomy, cystourethroscopy, urethral calibration and/or dilation, internal urethrotomy and transurethral resection of prostate are included if performed)

CPT Changes: An Insider's View 2008

CPT Assistant Jun 15:5

►(Do not report 52649 in conjunction with 52000, 52276, 52281, 52601, 52648, 53020, 55250)◄

52700 Transurethral drainage of prostatic abscess

CPT Assistant Apr 01:4

(For litholapaxy, use 52317, 52318)

Urethra

(For endoscopy, see cystoscopy, urethroscopy, cystourethroscopy, 52000-52700)

(For injection procedure for urethrocystography, see 51600-51610)

Incision

53000 Urethrotomy or urethrostomy, external (separate procedure); pendulous urethra
53010 perineal urethra, external
53020 Meatotomy, cutting of meatus (separate procedure); except infant
53025 infant

(Do not report modifier 63 in conjunction with 53025)
53040 Drainage of deep periurethral abscess

(For subcutaneous abscess, see 10060, 10061)
53060 Drainage of Skene's gland abscess or cyst
53080 Drainage of perineal urinary extravasation; uncomplicated (separate procedure)
53085 complicated

Excision

53200 Biopsy of urethra
53210 Urethrectomy, total, including cystostomy; female
53215 male
53220 Excision or fulguration of carcinoma of urethra
53230 Excision of urethral diverticulum (separate procedure); female
53235 male
53240 Marsupialization of urethral diverticulum, male or female
53250 Excision of bulbourethral gland (Cowper's gland)
53260 Excision or fulguration; urethral polyp(s), distal urethra

(For endoscopic approach, see 52214, 52224)
53265 urethral caruncle
53270 Skene's glands
53275 urethral prolapse

Repair

(For hypospadias, see 54300-54352)
53400 Urethroplasty; first stage, for fistula, diverticulum, or stricture (eg, Johannsen type)
53405 second stage (formation of urethra), including urinary diversion
53410 Urethroplasty, 1-stage reconstruction of male anterior urethra
53415 Urethroplasty, transpubic or perineal, 1-stage, for reconstruction or repair of prostatic or membranous urethra
53420 Urethroplasty, 2-stage reconstruction or repair of prostatic or membranous urethra; first stage
53425 second stage
53430 Urethroplasty, reconstruction of female urethra
CPT Assistant Dec 24:51
53431 Urethroplasty with tubularization of posterior urethra and/or lower bladder for incontinence (eg, Tenago, Leadbetter procedure)
CPT Changes: An Insider's View 2002
53440 Sling operation for correction of male urinary incontinence (eg, fascia or synthetic)
CPT Changes: An Insider's View 2003
CPT Assistant Aug 20:6
53442 Removal or revision of sling for male urinary incontinence (eg, fascia or synthetic)
CPT Changes: An Insider's View 2003
CPT Assistant Aug 20:6
53444 Insertion of tandem cuff (dual cuff)
CPT Changes: An Insider's View 2002
53445 Insertion of inflatable urethral/bladder neck sphincter, including placement of pump, reservoir, and cuff
CPT Changes: An Insider's View 2002
CPT Assistant Aug 20:6

53446 Removal of inflatable urethral/bladder neck sphincter, including pump, reservoir, and cuff
- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Aug 20:6

53447 Removal and replacement of inflatable urethral/bladder neck sphincter including pump, reservoir, and cuff at the same operative session
- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Aug 20:6

53448 Removal and replacement of inflatable urethral/bladder neck sphincter including pump, reservoir, and cuff through an infected field at the same operative session including irrigation and debridement of infected tissue
- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Aug 20:6

(Do not report 11042, 11043 in addition to 53448)

53449 Repair of inflatable urethral/bladder neck sphincter, including pump, reservoir, and cuff
- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Aug 20:6

53450 Urethromeatoplasty, with mucosal advancement
- *CPT Assistant* Sep 12:16

(For meatotomy, see 53020, 53025)

53451 Periurethral transperineal adjustable balloon continence device; bilateral insertion, including cystourethroscopy and imaging guidance
- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Dec 21:11, 21, Mar 22:12

(Do not report 53451 in conjunction with 52000, 53452, 53453, 53454, 76000)

53452 unilateral insertion, including cystourethroscopy and imaging guidance
- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Dec 21:11, Mar 22:12

(Do not report 53452 in conjunction with 52000, 53451, 53453, 53454, 76000)

53453 removal, each balloon
- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Dec 21:11, Mar 22:12

(Do not report 53453 in conjunction with 53451, 53452, 53454)

53454 percutaneous adjustment of balloon(s) fluid volume
- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Dec 21:11, Mar 22:12

(Do not report 53454 in conjunction with 53451, 53452, 53453)

(Report 53454 only once per patient encounter)

53460 Urethromeatoplasty, with partial excision of distal urethral segment (Richardson type procedure)

53500 Urethrolysis, transvaginal, secondary, open, including cystourethroscopy (eg, postsurgical obstruction, scarring)
- *CPT Changes: An Insider's View* 2004
- *CPT Assistant* Sep 04:11

(For urethrolysis by retropubic approach, use 53899)

(Do not report 53500 in conjunction with 52000)

53502 Urethrorrhaphy, suture of urethral wound or injury, female

53505 Urethrorrhaphy, suture of urethral wound or injury; penile

53510 perineal

53515 prostatomembranous

53520 Closure of urethrostomy or urethrocutaneous fistula, male (separate procedure)

(For closure of urethrovaginal fistula, use 57310)

(For closure of urethrorectal fistula, see 45820, 45825)

Manipulation

(For radiological supervision and interpretation, use 74485)

53600 Dilation of urethral stricture by passage of sound or urethral dilator, male; initial

53601 subsequent

53605 Dilation of urethral stricture or vesical neck by passage of sound or urethral dilator, male, general or conduction (spinal) anesthesia

(For dilation of urethral stricture, male, performed under local anesthesia, see 53600, 53601, 53620, 53621)

53620 Dilation of urethral stricture by passage of filiform and follower, male; initial

53621 subsequent

53660 Dilation of female urethra including suppository and/or instillation; initial

53661 subsequent

53665 Dilation of female urethra, general or conduction (spinal) anesthesia

(For urethral catheterization, see 51701-51703)

(For dilation of urethra performed under local anesthesia, female, see 53660, 53661)

Other Procedures

(For 2 or 3 glass urinalysis, use 81020)

53850 Transurethral destruction of prostate tissue; by microwave thermotherapy

CPT Assistant Nov 97:20, Apr 01:6, Feb 10:7, Jun 15:5, Nov 18:10

53852 by radiofrequency thermotherapy

CPT Assistant Nov 97:20, Apr 01:6, Jun 15:5, Nov 18:10

53854 by radiofrequency generated water vapor thermotherapy

CPT Changes: An Insider's View 2019

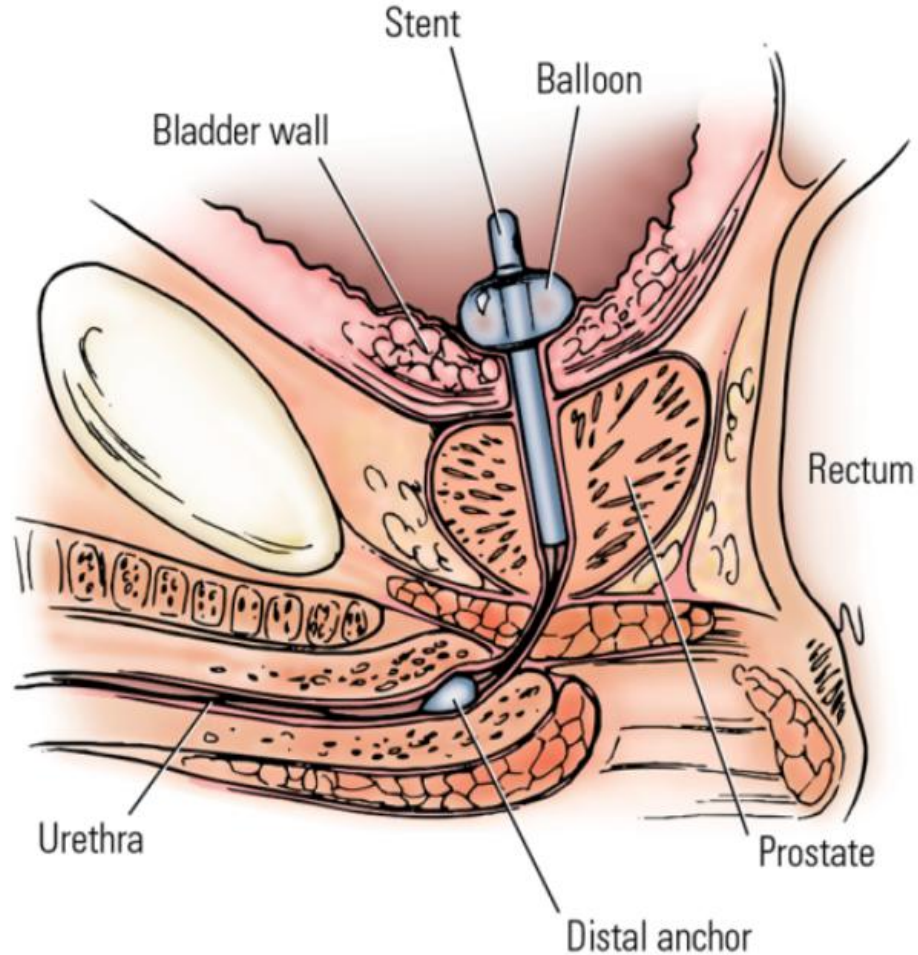
CPT Assistant Nov 18:10

(For transurethral ablation of malignant prostate tissue by high-energy water vapor thermotherapy, including intraoperative imaging and needle guidance, use 0582T)

53855 Insertion of a temporary prostatic urethral stent, including urethral measurement

CPT Changes: An Insider's View 2010

CPT Assistant Feb 10:7, Nov 18:10, Nov 24:11



(For insertion of permanent urethral stent, use 52282)

(For insertion of prostatic urethral scaffold, use 0941T)

Temporary Prostatic Urethral Stent Insertion

53855

A temporary prostatic urethral stent is inserted.

53860 Transurethral radiofrequency micro-remodeling of the female bladder neck and proximal urethra for stress urinary incontinence

- *CPT Changes: An Insider's View* 2011

53865 Cystourethroscopy with insertion of temporary device for ischemic remodeling (ie, pressure necrosis) of bladder neck and prostate

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Nov 24:11

(For insertion of a permanent urethral stent, use 52282)

(For insertion of a temporary prostatic urethral stent without cystourethroscopy, including urethral measurement, use 53855)

(For catheterization with removal of temporary device for ischemic remodeling of bladder neck and prostate, use 53866)

53866 Catheterization with removal of temporary device for ischemic remodeling (ie, pressure necrosis) of bladder neck and prostate

- *CPT Changes: An Insider's View* 2025
- *CPT Assistant* Nov 24:11

(For cystourethroscopy with removal of temporary device for ischemic remodeling of bladder neck and prostate, use 52310)

(For insertion of temporary device for ischemic remodeling of bladder neck and prostate, use 53865)

53899 Unlisted procedure, urinary system

- *CPT Assistant* Aug 04:12, Sep 04:11, Oct 05:18, 23-24, Feb 06:14, May 10:10, Mar 15:9, Jun 15:5, Aug 19:10, Dec 23:41, Nov 24:11
- *Clinical Examples in Radiology* Summer 06:1, 3

Surgery

Male Genital System (54000-55899)

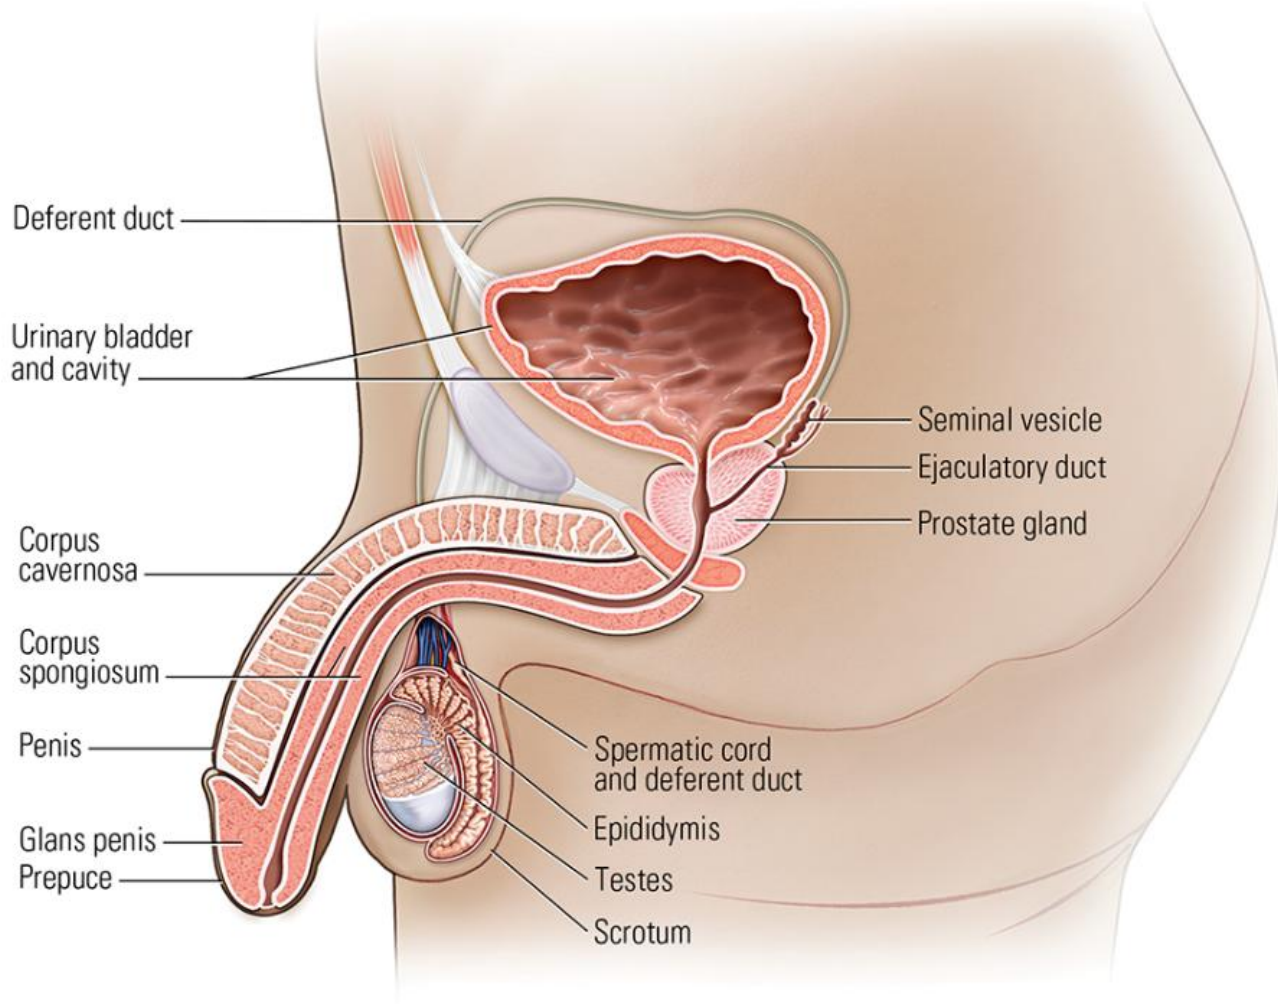
The following is a listing of headings and subheadings that appear within the Male Genital System section of the CPT codebook. The subheadings or subsections denoted with asterisks (*) below have special instructions unique to that subsection. Where these are indicated, special notes or guidelines will be presented preceding those procedural terminology listings, referring to that subsection specifically. Note that all code ranges in each subsection are listed as they appear in the subsection, even if the code numbers are out of numerical sequence and/or repeated in the next subsection.

Penis (54000-54450)
- Incision (54000-54015)
- Destruction (54050-54065)
- Excision (54100-54164)
- Introduction (54200-54250)
- Repair (54300-54440)
- Manipulation (54450)

Testis (54500-54699)
- Excision (54500-54535)
- Exploration (54550-54560)
- Repair (54600-54680)
- Laparoscopy* (54690-54699)

Epididymis (54700-54901)
- Incision (54700)
- Excision (54800-54861)
- Exploration (54865)
- Repair (54900-54901)

Tunica Vaginalis (55000-55060)
- Incision (55000)
- Excision (55040-55041)
- Repair (55060)



Scrotum (55100-55180)
- Incision (55100-55120)
- Excision (55150)
- Repair (55175-55180)

Vas Deferens (55200-55400)
- Incision (55200)
- Excision (55250)
- Introduction (55300)
- Repair (55400)

Spermatic Cord (55500-55559)
- Excision (55500-55540)
- Laparoscopy* (55550-55559)

Seminal Vesicles (55600-55680)
- Incision (55600-55605)
- Excision (55650-55680)

Prostate (55705-55899)
- Incision* (55705-55725)
- Excision (55801-55865)
- Laparoscopy* (55866-55867)
- Other Procedures (55870-55899)

Male Genital System

Male Genital System

Penis

Incision

(For abdominal perineal gangrene debridement, see 11004-11006)

54000 Slitting of prepuce, dorsal or lateral (separate procedure); newborn

(Do not report modifier 63 in conjunction with 54000)

54001 except newborn

54015 Incision and drainage of penis, deep

(For skin and subcutaneous abscess, see 10060-10160)

Destruction

54050 Destruction of lesion(s), penis (eg, condyloma, papilloma, molluscum contagiosum, herpetic vesicle), simple; chemical

54055 electrodesiccation

54056 cryosurgery

54057 laser surgery

54060 surgical excision

54065 Destruction of lesion(s), penis (eg, condyloma, papilloma, molluscum contagiosum, herpetic vesicle), extensive (eg, laser surgery, electrosurgery, cryosurgery, chemosurgery)

CPT Changes: An Insider's View 2002

(For destruction or excision of other lesions, see **Integumentary System**)

Excision

54100 Biopsy of penis; (separate procedure)

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:26

54105 deep structures

54110 Excision of penile plaque (Peyronie disease);

54111 with graft to 5 cm in length

CPT Assistant Aug 99:5

54112 with graft greater than 5 cm in length

54115 Removal foreign body from deep penile tissue (eg, plastic implant)

54120 Amputation of penis; partial

54125 complete

54130 Amputation of penis, radical; with bilateral inguinofemoral lymphadenectomy

54135 in continuity with bilateral pelvic lymphadenectomy, including external iliac, hypogastric and obturator nodes

(For lymphadenectomy [separate procedure], see 38760-38770)

54150 Circumcision, using clamp or other device with regional dorsal penile or ring block

CPT Changes: An Insider's View 2007

CPT Assistant Sep 96:11, May 98:11, Apr 03:27, Aug 03:6, May 07:10, Jul 07:5

(Do not report modifier 63 in conjunction with 54150)

(Report 54150 with modifier 52 when performed without dorsal penile or ring block)

54160 Circumcision, surgical excision other than clamp, device, or dorsal slit; neonate (28 days of age or less)

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Sep 96:11, May 98:11, May 07:10, Jul 07:5

(Do not report modifier 63 in conjunction with 54160)

54161 older than 28 days of age

- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Sep 96:11, Dec 96:10, May 98:11, Jul 07:5

54162 Lysis or excision of penile post-circumcision adhesions

- *CPT Changes: An Insider's View* 2002

54163 Repair incomplete circumcision

- *CPT Changes: An Insider's View* 2002

54164 Frenulotomy of penis

- *CPT Changes: An Insider's View* 2002

(Do not report 54164 with circumcision codes 54150-54161, 54162, 54163)

Introduction

54200 Injection procedure for Peyronie disease;
54205 with surgical exposure of plaque
54220 Irrigation of corpora cavernosa for priapism
54230 Injection procedure for corpora cavernosography

(For radiological supervision and interpretation, use 74445)

54231 Dynamic cavernosometry, including intracavernosal injection of vasoactive drugs (eg, papaverine, phentolamine)
54235 Injection of corpora cavernosa with pharmacologic agent(s) (eg, papaverine, phentolamine)
CPT Assistant Sep 96:10
54240 Penile plethysmography
54250 Nocturnal penile tumescence and/or rigidity test

Repair

(For other urethroplasties, see 53400-53430)

(For penile revascularization, use 37788)

54300 Plastic operation of penis for straightening of chordee (eg, hypospadias), with or without mobilization of urethra
CPT Assistant Dec 14:16
54304 Plastic operation on penis for correction of chordee or for first stage hypospadias repair with or without transplantation of prepuce and/or skin flaps
54308 Urethroplasty for second stage hypospadias repair (including urinary diversion); less than 3 cm
54312 greater than 3 cm
54316 Urethroplasty for second stage hypospadias repair (including urinary diversion) with free skin graft obtained from site other than genitalia
54318 Urethroplasty for third stage hypospadias repair to release penis from scrotum (eg, third stage Cecil repair)
54322 1-stage distal hypospadias repair (with or without chordee or circumcision); with simple meatal advancement (eg, Magpi, V-flap)
54324 with urethroplasty by local skin flaps (eg, flip-flap, prepucial flap)
54326 with urethroplasty by local skin flaps and mobilization of urethra
54328 with extensive dissection to correct chordee and urethroplasty with local skin flaps, skin graft patch, and/or island flap
CPT Assistant Oct 04:15

(For urethroplasty and straightening of chordee, use 54308)

54332 1-stage proximal penile or penoscrotal hypospadias repair requiring extensive dissection to correct chordee and urethroplasty by use of skin graft tube and/or island flap
CPT Assistant Mar 04:11, Sep 04:12
54336 1-stage perineal hypospadias repair requiring extensive dissection to correct chordee and urethroplasty by use of skin graft tube and/or island flap
CPT Assistant Oct 04:15
54340 Repair of hypospadias complication(s) (ie, fistula, stricture, diverticula); by closure, incision, or excision, simple
CPT Changes: An Insider's View 2022
54344 requiring mobilization of skin flaps and urethroplasty with flap or patch graft
CPT Changes: An Insider's View 2022

(For bilateral procedure, report 55650 with modifier 50)

55680 Excision of Mullerian duct cyst

(For injection procedure, see 52010, 55300)

Prostate

Incision

►Prostate biopsies may be performed without (55705) or with (55706, 55707, 55708, 55709, 55710, 55711, 55712, 55713, 55714) imaging guidance. Imaging guidance may include ultrasound (55707, 55709), ultrasound with MRI-ultrasound fusion (55708, 55710, 55711, 55712), and in-bore CT or MRI guidance (55713, 55714). MRI-ultrasound fusion is a guidance technique that utilizes an independent workstation to fuse a previously acquired (and previously reported) MRI dataset with real-time ultrasound imaging guidance to target lesion(s) previously identified by MRI.

Ultrasound-guided biopsies are typically performed in a systematic manner. This systematic biopsy divides the prostate into sextants (6 areas), which are right base, right mid, right apex, left base, left mid, left apex. Typically, multiple biopsy cores are taken from each sextant. If discrete lesions are noted during the performance of a diagnostic ultrasound at the time of the biopsy procedure, additional targeted biopsies may be taken from each discrete lesion, but are not separately reported.

MRI-ultrasound fusion biopsy includes the additional work of fusing the previously performed MRI with real-time ultrasound on an independent workstation and performing additional biopsies of the targeted lesions. CT- or MRI-guided targeted biopsies are typically performed "in-bore" (on the CT or MRI scanner itself), which includes needle-placement access. Image-guided targeted biopsies performed on discrete or targeted lesions are reported once per lesion, regardless of the number of biopsy cores taken from that lesion. Systematic and targeted biopsies should not be confused with prostate saturation biopsy (55706), which is a unique procedure utilizing a template grid to take biopsies at 5-mm intervals through the entire prostate gland, with each specimen labeled with the location of where the core was taken from.

Diagnostic ultrasonography performed at the same session as prostate biopsy is included in 55706, 55707, 55708, 55709, 55710, 55711.◄

►(55700 has been deleted. To report biopsy of prostate, see 55705, 55707, 55708, 55709, 55710, 55711, 55712, 55714)◄

▲ **55866** Laparoscopy, surgical prostatectomy, retropubic radical, including nerve sparing, includes robotic assistance, when performed;

CPT Changes: An Insider's View 2003, 2011, 2026

CPT Assistant Jun 03:8, Mar 12:10

►(Do not report 55866 in conjunction with 38571 when performed at the same session)◄

►(For open procedure, see 55840, 55842, 55845)◄

(For laparoscopy, surgical prostatectomy, simple subtotal, use 55867)

#● **55868** with lymph node biopsy(ies) (limited pelvic lymphadenectomy)

CPT Changes: An Insider's View 2026

#● **55869** with bilateral pelvic lymphadenectomy, including external iliac, hypogastric, and obturator nodes

CPT Changes: An Insider's View 2026

55867 Laparoscopy, surgical prostatectomy, simple subtotal (including control of postoperative bleeding, vasectomy, meatotomy, urethral calibration and/or dilation, and internal urethrotomy), includes robotic assistance, when performed

CPT Changes: An Insider's View 2023

CPT Assistant Dec 22:8

(For open subtotal prostatectomy, see 55821, 55831)

55868 Code is out of numerical sequence. See 55865-55870

55869 Code is out of numerical sequence. See 55865-55870

Other Procedures

(For artificial insemination, see 58321, 58322)

55870 Electroejaculation

55873 Cryosurgical ablation of the prostate (includes ultrasonic guidance and monitoring)

CPT Changes: An Insider's View 2001, 2010

CPT Assistant Apr 01:4, Sep 02:9, Jun 03:8, Feb 10:7, Sep 15:12, Sep 19:11

#● **55877** Ablation, irreversible electroporation, prostate, 1 or more tumors, including imaging guidance, percutaneous

CPT Changes: An Insider's View 2026

►(Do not report 55877 in conjunction with 76940, 77002, 77013, 77022)◄

►(For percutaneous irreversible electroporation of organ other than liver or prostate, use 0600T)◄

55874 Transperineal placement of biodegradable material, peri-prostatic, single or multiple injection(s), including image guidance, when performed

CPT Changes: An Insider's View 2018

(Do not report 55874 in conjunction with 76942)

55875 Transperineal placement of needles or catheters into prostate for interstitial radioelement application, with or without cystoscopy

CPT Changes: An Insider's View 2007

CPT Assistant May 07:1, Apr 09:3

(For placement of needles or catheters into pelvic organs and/or genitalia [except prostate] for interstitial radioelement application, use 55920)

(For interstitial radioelement application, see 77770, 77771, 77772, 77778)

(For ultrasonic guidance for interstitial radioelement application, use 76965)

55876 Placement of interstitial device(s) for radiation therapy guidance (eg, fiducial markers, dosimeter), prostate (via needle, any approach), single or multiple

CPT Changes: An Insider's View 2007, 2010, 2011

CPT Assistant May 07:1, Oct 07:1, Feb 10:7, 12, Jun 16:3

(Report supply of device separately)

(For imaging guidance, see 76942, 77002, 77012, 77021)

55877 Code is out of numerical sequence. See 55870-55875

55880 Ablation of malignant prostate tissue, transrectal, with high intensity–focused ultrasound (HIFU), including ultrasound guidance

CPT Changes: An Insider's View 2021

CPT Assistant Sep 21:11

►(For ablation of benign prostate tissue, transrectal, with high intensity–focused ultrasound [HIFU], including ultrasound guidance, use 0950T)◄

55881 Ablation of prostate tissue, transurethral, using thermal ultrasound, including magnetic resonance imaging guidance for, and monitoring of, tissue ablation;

CPT Changes: An Insider's View 2025

CPT Assistant Apr 25:1

(Do not report 55881 in conjunction with 55882)

(For insertion of transurethral ultrasound transducer and ablation of prostate tissue using thermal ultrasound transducer performed by the same physician, use 55882)

55882 with insertion of transurethral ultrasound transducer for delivery of thermal ultrasound, including suprapubic tube placement and placement of an endorectal cooling device, when performed

CPT Changes: An Insider's View 2025

CPT Assistant Apr 25:1

(Do not report 55882 in conjunction with 55881)

(Do not report 55881, 55882 in conjunction with 51701, 51702, 51721, 72195, 72196, 72197, 77022)

55899 Unlisted procedure, male genital system

CPT Assistant Jun 03:8, May 07:11, Jun 15:5, Jan 17:6, Jun 19:14, Dec 19:12, Aug 20:6, Nov 24:11

Clinical Examples in Radiology Spring 06:8-9

Reproductive System Procedures

55920 Placement of needles or catheters into pelvic organs and/or genitalia (except prostate) for subsequent interstitial radioelement application

CPT Changes: An Insider's View 2008

CPT Assistant Apr 09:10

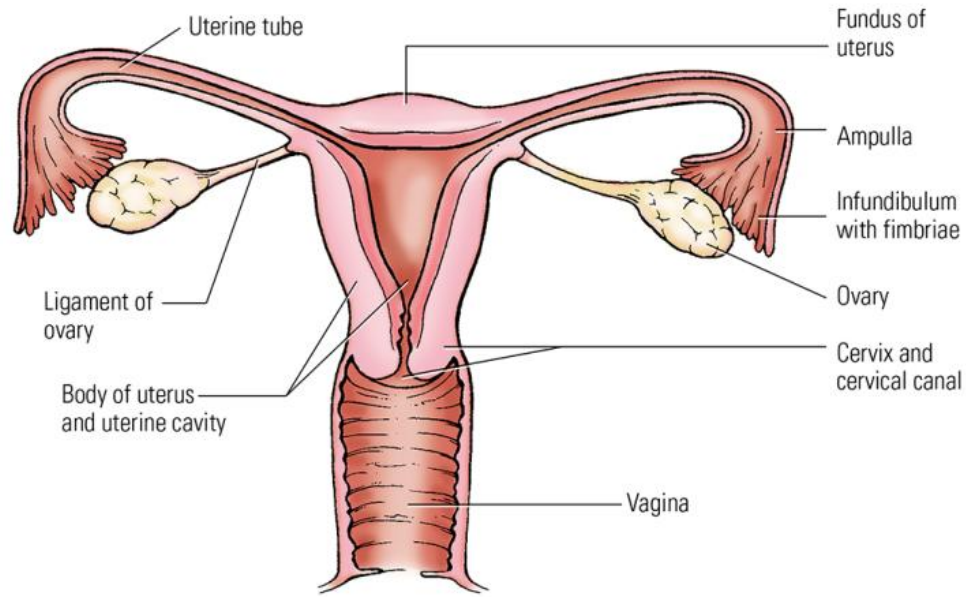
(For placement of needles or catheters into prostate, use 55875)

(For insertion of uterine tandems and/or vaginal ovoids for clinical brachytherapy, use 57155)

(For insertion of Heyman capsules for clinical brachytherapy, use 58346)

Intersex Surgery

55970 Intersex surgery; male to female



55980 female to male

Surgery

Female Genital System (56405-58999)

The following is a listing of headings and subheadings that appear within the Female Genital System section of the CPT codebook. The subheadings or subsections denoted with asterisks (*) below have special instructions unique to that subsection. Where these are indicated, special notes or guidelines will be presented preceding those procedural terminology listings, referring to that subsection specifically. Note that all code ranges in each subsection are listed as they appear in the subsection, even if the code numbers are out of numerical sequence and/or repeated in the next subsection.

Female Genital System

- **Vulva, Perineum, and Introitus* (56405-56821)**
  - Incision (56405-56442)
  - Destruction (56501-56515)
  - Excision (56605-56740)
  - Repair (56800-56810)
  - Endoscopy (56820-56821)
- **Vagina (57000-57426)**
  - Incision (57000-57023)
  - Destruction (57061-57065)
  - Excision (57100-57135)
  - Introduction (57150-57180)
  - Repair (57200-57335)
  - Manipulation (57400-57415)
  - Endoscopy/Laparoscopy (57420-57426)

- Cervix Uteri (57452-57800)
  - Endoscopy (57452-57465)
  - Excision (57500-57558)
  - Repair (57700-57720)
  - Manipulation (57800)
- Corpus Uteri (58100-58580)
  - Excision (58100-58294)
    - Hysterectomy Procedures (58150-58294)
  - Introduction (58300-58350)
  - Repair (58400-58540)
  - Laparoscopy/Hysteroscopy* (58674-58579)
  - Other Procedures (58353-58580)
- Oviduct/Ovary (58600-58770)
  - Incision (58600-58615)
  - Laparoscopy* (58660-58679)
  - Excision (58700-58720)
  - Repair (58740-58770)
- Ovary (58800-58960)
  - Incision (58800-58825)
  - Excision (58900-58960)
- In Vitro Fertilization (58970-58999)
  - Other Procedures (58999)

Maternity Care and Delivery* (59000-59899)

- Antepartum and Fetal Invasive Services (59000-59076)
- Excision (59100-59160)
- Introduction (59200)
- Repair (59300-59350)
- Vaginal Delivery, Antepartum and Postpartum Care (59400-59430)
- Cesarean Delivery (59510-59525)
- Delivery After Previous Cesarean Delivery* (59610-59622)
- Abortion (59812-59857)
- Other Procedures (59866-59899)

Endocrine System (60000-60699)

- Thyroid Gland (60000-60300)
  - Incision (60000)
  - Excision (60100-60281)
  - Removal (60300)

Parathyroid, Thymus, Adrenal Glands, Pancreas, and Carotid Body (60500-60699)

- Excision (60500-60605)
- Laparoscopy* (60650-60659)
- Other Procedures (60660-60699)

Female Genital System

(For pelvic laparotomy, use 49000)

(For paracentesis, see 49082, 49083, 49084)

(For secondary closure of abdominal wall evisceration or disruption, use 49900)

(For fulguration or excision of lesions, laparoscopic approach, use 58662)

(For excision or destruction of endometriomas, open method, use 58999)

(For chemotherapy, see 96401-96549)

Vulva, Perineum, and Introitus

Definitions

The following definitions apply to the vulvectomy codes (56620-56640):

A ***simple*** procedure is the removal of skin and superficial subcutaneous tissues.

A ***radical*** procedure is the removal of skin and deep subcutaneous tissue.

A ***partial*** procedure is the removal of less than 80% of the vulvar area.

A ***complete*** procedure is the removal of greater than 80% of the vulvar area.

Incision

(For incision and drainage of sebaceous cyst, furuncle, or abscess, see 10040, 10060, 10061)

56405 Incision and drainage of vulva or perineal abscess

CPT Assistant Jul 19:6

56420 Incision and drainage of Bartholin's gland abscess

(For incision and drainage of Skene's gland abscess or cyst, use 53060)

56440 Marsupialization of Bartholin's gland cyst

56441 Lysis of labial adhesions

CPT Assistant Winter 90:7

56442 Hymenotomy, simple incision

CPT Changes: An Insider's View 2007

Destruction

56501 Destruction of lesion(s), vulva; simple (eg, laser surgery, electrosurgery, cryosurgery, chemosurgery)

CPT Changes: An Insider's View 2002

CPT Assistant Aug 19:10

56515 extensive (eg, laser surgery, electrosurgery, cryosurgery, chemosurgery)

CPT Changes: An Insider's View 2002

CPT Assistant Aug 19:10

(For destruction of Skene's gland cyst or abscess, use 53270)

(For cautery destruction of urethral caruncle, use 53265)

Excision

56605 Biopsy of vulva or perineum (separate procedure); 1 lesion

CPT Assistant Sep 00:9, Jun 08:6

+ 56606 each separate additional lesion (List separately in addition to code for primary procedure)

(Use 56606 in conjunction with 56605)

(For excision of local lesion, see 11420-11426, 11620-11626)

56620 Vulvectomy simple; partial

CPT Assistant Dec 13:14

56625 complete

(For skin graft, see 15002 et seq)

56630 Vulvectomy, radical, partial;

(For skin graft, if used, see 15004-15005, 15120, 15121, 15240, 15241)

56631 with unilateral inguinofemoral lymphadenectomy

56632 with bilateral inguinofemoral lymphadenectomy

(For partial radical vulvectomy with inguinofemoral lymph node biopsy without complete inguinofemoral lymphadenectomy, use 56630 in conjunction with 38531)

56633 Vulvectomy, radical, complete;

56634 with unilateral inguinofemoral lymphadenectomy

56637 with bilateral inguinofemoral lymphadenectomy

(For complete radical vulvectomy with inguinofemoral lymph node biopsy without complete inguinofemoral lymphadenectomy, use 56633 in conjunction with 38531)

56640 Vulvectomy, radical, complete, with inguinofemoral, iliac, and pelvic lymphadenectomy

(For bilateral procedure, report 56640 with modifier 50)

(For lymphadenectomy, see 38760-38780)

56700 Partial hymenectomy or revision of hymenal ring

56740 Excision of Bartholin's gland or cyst

(For excision of Skene's gland, use 53270)

(For excision of urethral caruncle, use 53265)

(For excision or fulguration of urethral carcinoma, use 53220)

(For excision or marsupialization of urethral diverticulum, see 53230, 53240)

Repair

(For repair of urethra for mucosal prolapse, use 53275)

56800 Plastic repair of introitus

56805 Clitoroplasty for intersex state

56810 Perineoplasty, repair of perineum, nonobstetrical (separate procedure)

(See also 56800)

(For repair of wounds to genitalia, see 12001-12007, 12041-12047, 13131-13133)

(For repair of recent injury of vagina and perineum, nonobstetrical, use 57210)

(For anal sphincteroplasty, see 46750, 46751)

(For episiorrhaphy, episioperineorrhaphy for recent injury of vulva and/or perineum, nonobstetrical, use 57210)

Endoscopy

56820 Colposcopy of the vulva;

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Feb 03:5

56821 with biopsy(s)

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Feb 03:5, Jun 03:11

(For colposcopic examinations/procedures involving the vagina, see 57420, 57421; cervix, see 57452-57461)

Vagina

Incision

57000 Colpotomy; with exploration

- *CPT Assistant* Nov 07:1

57010 with drainage of pelvic abscess

57020 Colpocentesis (separate procedure)

57022 Incision and drainage of vaginal hematoma; obstetrical/postpartum

- *CPT Changes: An Insider's View* 2001, 2002

57023 non-obstetrical (eg, post-trauma, spontaneous bleeding)

- *CPT Changes: An Insider's View* 2001

Destruction

57061 Destruction of vaginal lesion(s); simple (eg, laser surgery, electrosurgery, cryosurgery, chemosurgery)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Apr 96:11

57065 extensive (eg, laser surgery, electrosurgery, cryosurgery, chemosurgery)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Apr 96:11

Excision

57100 Biopsy of vaginal mucosa; simple (separate procedure)

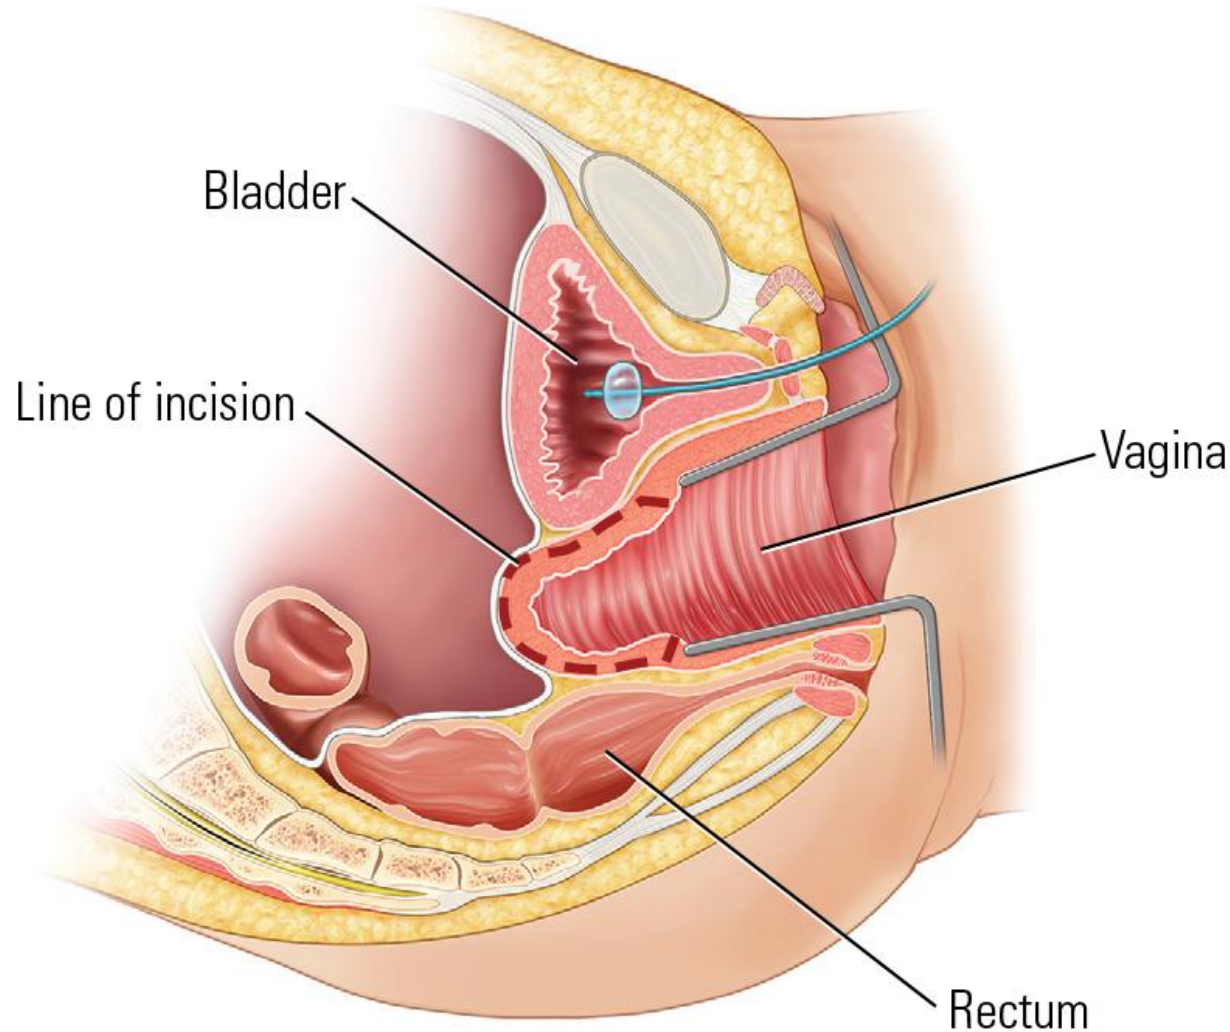
57105 extensive, requiring suture (including cysts)

57106 Vaginectomy, partial removal of vaginal wall;

- *CPT Assistant* Nov 98:17, Oct 99:5

57107 with removal of paravaginal tissue (radical vaginectomy)

- *CPT Assistant* Nov 98:17, Oct 99:5



57109 with removal of paravaginal tissue (radical vaginectomy) with bilateral total pelvic lymphadenectomy and para-aortic lymph node sampling (biopsy)

- *CPT Assistant* Nov 98:17, Oct 99:5

Vaginectomy, Partial Removal of Vaginal Wall

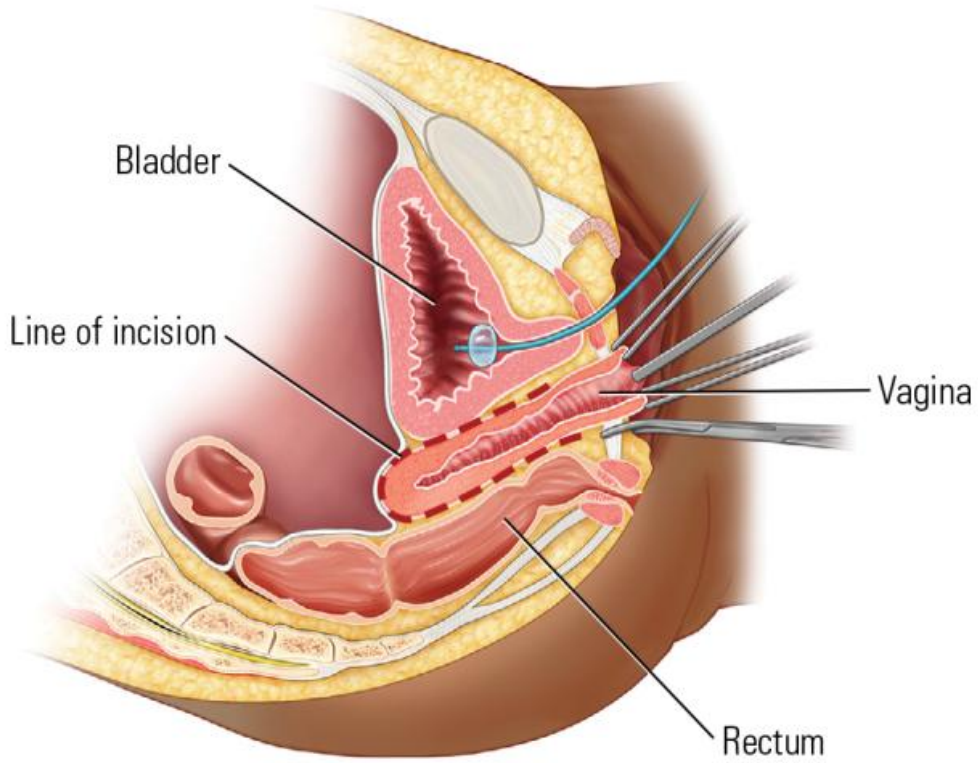
57106

A specific portion of the upper or lower vaginal wall is excised.

57110 Vaginectomy, complete removal of vaginal wall;
CPT Assistant Nov 98:17, Oct 99:5

57111 with removal of paravaginal tissue (radical vaginectomy)
CPT Assistant Nov 98:17, Oct 99:5

57120 Colpocleisis (Le Fort type)



57130 Excision of vaginal septum

57135 Excision of vaginal cyst or tumor

Vaginectomy, Complete Removal of Vaginal Wall (Radical Vaginectomy)

57111

Removal of all of the vaginal wall and removal of paravaginal tissue (the highly vascular supporting connective tissue next to the vagina)

Introduction

57150 Irrigation of vagina and/or application of medicament for treatment of bacterial, parasitic, or fungoid disease

57155 Insertion of uterine tandem and/or vaginal ovoids for clinical brachytherapy

CPT Changes: An Insider's View 2002, 2011, 2017

CPT Assistant Feb 02:8, Apr 09:3

(For placement of needles or catheters into pelvic organs and/or genitalia [except prostate] for interstitial radioelement application, use 55920)

(For insertion of radioelement sources or ribbons, see 77761-77763, 77770, 77771, 77772)

57156 Insertion of a vaginal radiation afterloading apparatus for clinical brachytherapy

CPT Changes: An Insider's View 2011

57160 Fitting and insertion of pessary or other intravaginal support device

CPT Assistant Nov 96:9, Oct 98:11, Jun 00:11, May 10:10

57170 Diaphragm or cervical cap fitting with instructions

57180 Introduction of any hemostatic agent or pack for spontaneous or traumatic nonobstetrical vaginal hemorrhage (separate procedure)

CPT Assistant Nov 07:1

Repair

(For urethral suspension, Marshall-Marchetti-Krantz type, abdominal approach, see 51840, 51841)

(For laparoscopic suspension, use 51990)

57200 Colporrhaphy, suture of injury of vagina (nonobstetrical)

57210 Colpoperineorrhaphy, suture of injury of vagina and/or perineum (nonobstetrical)

57220 Plastic operation on urethral sphincter, vaginal approach (eg, Kelly urethral plication)

CPT Assistant Winter 90:7

57230 Plastic repair of urethrocele

CPT Assistant Winter 90:7

57240 Anterior colporrhaphy, repair of cystocele with or without repair of urethrocele, including cystourethroscopy, when performed

CPT Changes: An Insider's View 2018

CPT Assistant Winter 90:7, Jan 97:3, Jun 02:5, Jun 10:6

(Do not report 57240 in conjunction with 52000)

57250 Posterior colporrhaphy, repair of rectocele with or without perineorrhaphy

CPT Assistant Winter 90:7, Jun 02:4, May 11:9

(For repair of rectocele [separate procedure] without posterior colporrhaphy, use 45560)

57260 Combined anteroposterior colporrhaphy, including cystourethroscopy, when performed;

CPT Changes: An Insider's View 2018

CPT Assistant Jun 02:5, Jun 10:6, Mar 25:18

(Do not report 57260 in conjunction with 52000)

57265 with enterocele repair

CPT Changes: An Insider's View 2018

CPT Assistant Jun 02:6, Jun 10:6, Mar 25:18

(Do not report 57265 in conjunction with 52000)

+ 57267 Insertion of mesh or other prosthesis for repair of pelvic floor defect, each site (anterior, posterior compartment), vaginal approach (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* Jul 05:16, May 11:9, Jan 12:10, Oct 13:15

(Use 57267 in conjunction with 45560, 57240-57265, 57285)

57268 Repair of enterocele, vaginal approach (separate procedure)

- *CPT Assistant* Jun 02:6

57270 Repair of enterocele, abdominal approach (separate procedure)

- *CPT Assistant* Jun 02:6

57280 Colpopexy, abdominal approach

- *CPT Assistant* Jan 97:3, Jun 02:6

57282 Colpopexy, vaginal; extra-peritoneal approach (sacrospinous, iliococcygeus)

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* Jan 97:3, Jun 02:6

57283 intra-peritoneal approach (uterosacral, levator myorrhaphy)

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* May 11:9

(Do not report 57283 in conjunction with 57556, 58263, 58270, 58280, 58292, 58294)

57284 Paravaginal defect repair (including repair of cystocele, if performed); open abdominal approach

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Jan 97:1, Jun 02:7, Jul 05:16, Jun 10:6

(Do not report 57284 in conjunction with 51840, 51841, 51990, 57240, 57260, 57265, 58152, 58267)

57285 vaginal approach

- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Jun 10:6

(Do not report 57285 in conjunction with 51990, 57240, 57260, 57265, 58267)

57287 Removal or revision of sling for stress incontinence (eg, fascia or synthetic)

- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Jun 02:7, Nov 07:9

57288 Sling operation for stress incontinence (eg, fascia or synthetic)

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:28, May 00:4, Oct 00:7, Apr 02:18, Jun 02:7

(For laparoscopic approach, use 51992)

57289 Pereyra procedure, including anterior colporrhaphy

- *CPT Assistant* Jan 97:3, Jun 02:7

57291 Construction of artificial vagina; without graft

57292 with graft

57295 Revision (including removal) of prosthetic vaginal graft; vaginal approach

- *CPT Changes: An Insider's View* 2006

(For laparoscopic approach, use 57426)

57300 Closure of rectovaginal fistula; vaginal or transanal approach

CPT Assistant Nov 97:21

57305 abdominal approach

CPT Assistant Nov 97:21

57307 abdominal approach, with concomitant colostomy

CPT Assistant Nov 97:21

57308 transperineal approach, with perineal body reconstruction, with or without levator plication

CPT Assistant Nov 97:21

57310 Closure of urethrovaginal fistula;

57311 with bulbocavernosus transplant

57320 Closure of vesicovaginal fistula; vaginal approach

(For concomitant cystostomy, see 51020-51040, 51101, 51102)

57330 transvesical and vaginal approach

(For abdominal approach, use 51900)

57335 Vaginoplasty for intersex state

Manipulation

57400 Dilation of vagina under anesthesia (other than local)

CPT Changes: An Insider's View 2009

57410 Pelvic examination under anesthesia (other than local)

CPT Changes: An Insider's View 2009

CPT Assistant Spring 93:34, Apr 06:1, Nov 07:1

57415 Removal of impacted vaginal foreign body (separate procedure) under anesthesia (other than local)

CPT Changes: An Insider's View 2009

(For removal without anesthesia of an impacted vaginal foreign body, use the appropriate E/M code)

Endoscopy/Laparoscopy

57420 Colposcopy of the entire vagina, with cervix if present;

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Feb 03:5, Dec 20:10

57421 with biopsy(s) of vagina/cervix

- *CPT Changes: An Insider's View* 2003, 2006
- *CPT Assistant* Feb 03:5, Jun 03:11, Jun 06:16, Dec 20:10

(For colposcopic visualization of cervix and adjacent upper vagina, use 57452)

(When reporting colposcopies of multiple sites, use modifier 51 as appropriate. For colposcopic examinations/procedures involving the vulva, see 56820, 56821; cervix, see 57452-57461)

(For computer-aided mapping of cervix uteri during colposcopy, use 57465)

(For endometrial sampling [biopsy] performed in conjunction with colposcopy, use 58110)

57423 Paravaginal defect repair (including repair of cystocele, if performed), laparoscopic approach

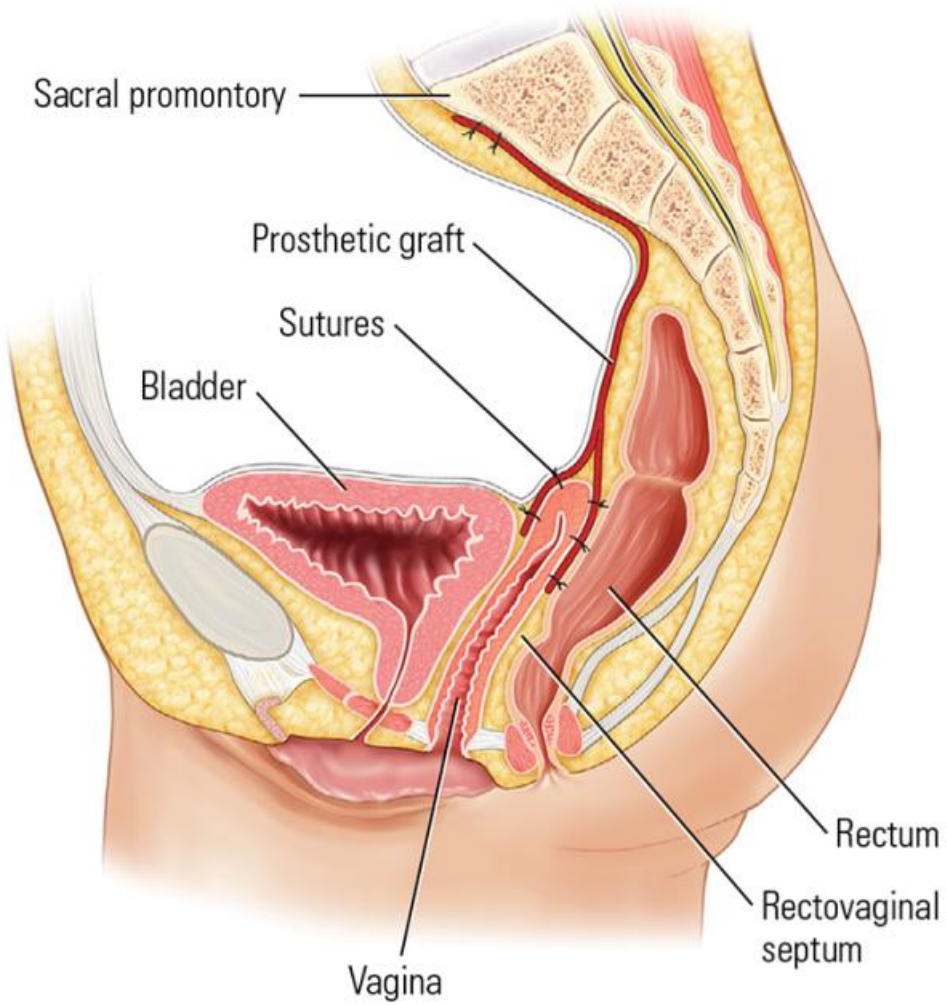
- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Jun 10:6

(Do not report 57423 in conjunction with 49320, 51840, 51841, 51990, 57240, 57260, 58152, 58267)

57425 Laparoscopy, surgical, colpopexy (suspension of vaginal apex)

- *CPT Changes: An Insider's View* 2004
- *CPT Assistant* Jul 19:6

57426 Revision (including removal) of prosthetic vaginal graft, laparoscopic approach



- *CPT Changes: An Insider's View* 2010

(For vaginal approach, see 57295. For open abdominal approach, see 57296)

Laparoscopic Revision of Prosthetic Vaginal Graft

57426

Location of prosthetic vaginal graft

Cervix Uteri

Endoscopy

(For colposcopic examinations/procedures involving the vulva, see 56820, 56821; vagina, see 57420, 57421)

57452 Colposcopy of the cervix including upper/adjacent vagina;

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Apr 00:5, Feb 03:5, Jun 03:10, Jul 19:6, Dec 20:10

(Do not report 57452 in addition to 57454-57461)

57454 with biopsy(s) of the cervix and endocervical curettage

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Apr 00:5, Feb 03:5, Jun 03:10, Aug 11:9, Jul 19:6, Dec 20:10

57455 with biopsy(s) of the cervix

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Apr 00:5, Feb 03:5, Jun 03:10, Jul 19:6, Dec 20:10

57456 with endocervical curettage

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Apr 00:5, Jan 03:23, Feb 03:5, Jun 03:10, Jul 19:6, Dec 20:10

57460 with loop electrode biopsy(s) of the cervix

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Apr 00:5, Jan 03:23, Feb 03:5, Jun 03:10, Jul 05:15, Jul 19:6, Dec 20:10

57461 with loop electrode conization of the cervix

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Jan 03:23, Feb 03:5, Jun 03:10, Dec 06:15, Jul 19:6, Dec 20:10

(Do not report 57461 in addition to 57456)

(For computer-aided mapping of cervix uteri during colposcopy, use 57465)

(For endometrial sampling [biopsy] performed in conjunction with colposcopy, use 58110)

+ 57465 Computer-aided mapping of cervix uteri during colposcopy, including optical dynamic spectral imaging and algorithmic quantification of the acetowhitening effect (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2021

(Use 57465 in conjunction with 57420, 57421, 57452, 57454, 57455, 57456, 57460, 57461)

Excision

(For radical surgical procedures, see 58200-58240)

57500 Biopsy of cervix, single or multiple, or local excision of lesion, with or without fulguration (separate procedure)

CPT Changes: An Insider's View 2008

57505 Endocervical curettage (not done as part of a dilation and curettage)

CPT Assistant Jul 05:15

57510 Cautery of cervix; electro or thermal

CPT Changes: An Insider's View 2002

57511 cryocautery, initial or repeat

57513 laser ablation

57520 Conization of cervix, with or without fulguration, with or without dilation and curettage, with or without repair; cold knife or laser

CPT Assistant Apr 00:5

(See also 58120)

57522 loop electrode excision

CPT Assistant Apr 00:5, Mar 03:22, Jul 03:15

57530 Trachelectomy (cervicectomy), amputation of cervix (separate procedure)

57531 Radical trachelectomy, with bilateral total pelvic lymphadenectomy and para-aortic lymph node sampling biopsy, with or without removal of tube(s), with or without removal of ovary(s)

CPT Assistant Nov 97:21

(For radical abdominal hysterectomy, use 58210)

57540 Excision of cervical stump, abdominal approach;

57545 with pelvic floor repair

57550 Excision of cervical stump, vaginal approach;

57555 with anterior and/or posterior repair

57556 with repair of enterocele

(For insertion of intrauterine device, use 58300)

(For insertion of any hemostatic agent or pack for control of spontaneous non-obstetrical hemorrhage, see 57180)

57558 Dilation and curettage of cervical stump

CPT Changes: An Insider's View 2007

Repair

57700 Cerclage of uterine cervix, nonobstetrical

57720 Trachelorrhaphy, plastic repair of uterine cervix, vaginal approach

Manipulation

57800 Dilation of cervical canal, instrumental (separate procedure)

Corpus Uteri

Excision

58100 Endometrial sampling (biopsy) with or without endocervical sampling (biopsy), without cervical dilation, any method (separate procedure)

CPT Assistant Oct 21:14

(For endocervical curettage only, use 57505)

(For endometrial sampling [biopsy] performed in conjunction with colposcopy [57420, 57421, 57452-57461], use 58110)

+58110 Endometrial sampling (biopsy) performed in conjunction with colposcopy (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2006

CPT Assistant Jun 06:17

(Use 58110 in conjunction with 57420, 57421, 57452-57461)

58120 Dilation and curettage, diagnostic and/or therapeutic (nonobstetrical)

CPT Assistant Fall 95:16, Nov 97:21, May 03:19, Oct 21:14, Dec 22:17

(For postpartum hemorrhage, use 59160)

58140 Myomectomy, excision of fibroid tumor(s) of uterus, 1 to 4 intramural myoma(s) with total weight of 250 g or less and/or removal of surface myomas; abdominal approach

CPT Changes: An Insider's View 2002, 2003

CPT Assistant Feb 03:15, Jun 03:5

58145 vaginal approach

58146 Myomectomy, excision of fibroid tumor(s) of uterus, 5 or more intramural myomas and/or intramural myomas with total weight greater than 250 g, abdominal approach

CPT Changes: An Insider's View 2003

CPT Assistant Feb 03:15, Jun 03:5

(Do not report 58146 in addition to 58140-58145, 58150-58240)

Hysterectomy Procedures

58150 Total abdominal hysterectomy (corpus and cervix), with or without removal of tube(s), with or without removal of ovary(s);

CPT Assistant Dec 96:10, Apr 97:3, Nov 97:21, Sep 00:9, Aug 01:11, Aug 24:18

58152 with colpo-urethrocystopexy (eg, Marshall-Marchetti-Krantz, Burch)

CPT Assistant Jan 97:1, Nov 97:22, Jun 10:6

(For urethrocystopexy without hysterectomy, see 51840, 51841)

58180 Supracervical abdominal hysterectomy (subtotal hysterectomy), with or without removal of tube(s), with or without removal of ovary(s)

58200 Total abdominal hysterectomy, including partial vaginectomy, with para-aortic and pelvic lymph node sampling, with or without removal of tube(s), with or without removal of ovary(s)

CPT Assistant Nov 21:8

58210 Radical abdominal hysterectomy, with bilateral total pelvic lymphadenectomy and para-aortic lymph node sampling (biopsy), with or without removal of tube(s), with or without removal of ovary(s)

CPT Assistant Fall 92:21, May 12:14, Nov 21:8

(For radical hysterectomy with ovarian transposition, use also 58825)

58240 Pelvic exenteration for gynecologic malignancy, with total abdominal hysterectomy or cervicectomy, with or without removal of tube(s), with or without removal of ovary(s), with removal of bladder and ureteral transplantations, and/or abdominoperineal resection of rectum and colon and colostomy, or any combination thereof

CPT Assistant Nov 21:8

(For pelvic exenteration for lower urinary tract or male genital malignancy, use 51597)

58260 Vaginal hysterectomy, for uterus 250 g or less;

CPT Changes: An Insider's View 2003

CPT Assistant May 11:9

58262 with removal of tube(s), and/or ovary(s)

58263 with removal of tube(s), and/or ovary(s), with repair of enterocele

CPT Assistant Mar 25:18

58267 with colpo-urethrocystopexy (Marshall-Marchetti-Krantz type, Pereyra type) with or without endoscopic control

CPT Assistant Jun 10:6

58270 with repair of enterocele

(For repair of enterocele with removal of tubes and/or ovaries, use 58263)

58275 Vaginal hysterectomy, with total or partial vaginectomy;

CPT Changes: An Insider's View 2002

58280 with repair of enterocele

58285 Vaginal hysterectomy, radical (Schauta type operation)

CPT Assistant Nov 07:1

58290 Vaginal hysterectomy, for uterus greater than 250 g;

CPT Changes: An Insider's View 2003

58291 with removal of tube(s) and/or ovary(s)

CPT Changes: An Insider's View 2003

58292 with removal of tube(s) and/or ovary(s), with repair of enterocele

CPT Changes: An Insider's View 2003

58294 with repair of enterocele

CPT Changes: An Insider's View 2003

Introduction

►(To report insertion of non-biodegradable drug-delivery implant for contraception, use 11981. To report intrauterine transcervical instillation of biodegradable hydrogel materials, use 0990T. To report removal of implantable contraceptive capsules with subsequent insertion of non-biodegradable drug-delivery implant, use 11976 and 11981)◄

58300 Insertion of intrauterine device (IUD)

CPT Assistant Apr 98:14, Jan 23:31

58301 Removal of intrauterine device (IUD)

CPT Assistant Apr 98:14

58321 Artificial insemination; intra-cervical

58322 intra-uterine

58323 Sperm washing for artificial insemination

CPT Assistant Jan 98:6

58340 Catheterization and introduction of saline or contrast material for saline infusion sonohysterography (SIS) or hysterosalpingography

CPT Changes: An Insider's View 2004

CPT Assistant Nov 97:22, Jul 99:8, Mar 09:11

Clinical Examples in Radiology Spring 23:32

(For radiological supervision and interpretation of saline infusion sonohysterography, use 76831)

(For radiological supervision and interpretation of hysterosalpingography, use 74740)

58345 Transcervical introduction of fallopian tube catheter for diagnosis and/or re-establishing patency (any method), with or without hysterosalpingography

CPT Assistant Nov 97:22, Mar 09:11

(For radiological supervision and interpretation, use 74742)

58346 Insertion of Heyman capsules for clinical brachytherapy

CPT Changes: An Insider's View 2002

CPT Assistant Feb 02:8, Apr 09:3

(For placement of needles or catheters into pelvic organs and/or genitalia [except prostate] for interstitial radioelement application, use 55920)

(For insertion of radioelement sources or ribbons, see 77761-77763, 77770, 77771, 77772)

58350 Chromotubation of oviduct, including materials

CPT Assistant May 02:19, Dec 08:7

(To report the supply of any materials, use 99070)

58353 Code is out of numerical sequence. See 58578-58600

58356 Code is out of numerical sequence. See 58578-58600

Repair

58400 Uterine suspension, with or without shortening of round ligaments, with or without shortening of sacrouterine ligaments; (separate procedure)

58410 with presacral sympathectomy

CPT Assistant Mar 07:9

(For anastomosis of tubes to uterus, use 58752)

58520 Hysterorrhaphy, repair of ruptured uterus (nonobstetrical)

58540 Hysteroplasty, repair of uterine anomaly (Strassman type)

(For closure of vesicouterine fistula, use 51920)

Laparoscopy/Hysteroscopy

►Surgical laparoscopy always includes diagnostic laparoscopy. To report a diagnostic laparoscopy (separate procedure), use 49320. To report a diagnostic hysteroscopy (separate procedure), use 58555.◄

 # 58674 Laparoscopy, surgical, ablation of uterine fibroid(s) including intraoperative ultrasound guidance and monitoring, radiofrequency

CPT Changes: An Insider's View 2017

CPT Assistant Feb 17:14, Apr 17:7, Dec 23:42, Feb 24:21

(Do not report 58674 in conjunction with 49320, 58541-58554, 58570, 58571, 58572, 58573, 58580, 76998)

(For transcervical radiofrequency ablation of uterine fibroid[s], including intraoperative ultrasound guidance and monitoring, use 58580)

58541 Laparoscopy, surgical, supracervical hysterectomy, for uterus 250 g or less;

CPT Changes: An Insider's View 2007

CPT Assistant Nov 07:1, Apr 17:7, Jul 19:6, Aug 21:8-9

58542 with removal of tube(s) and/or ovary(s)
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Nov 07:1, Apr 17:7, Jul 19:6, Aug 21:8-9

(Do not report 58541, 58542 in conjunction with 49320, 57000, 57180, 57410, 58140-58146, 58545, 58546, 58561, 58661, 58670, 58671)

58543 Laparoscopy, surgical, supracervical hysterectomy, for uterus greater than 250 g;
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Nov 07:1, Apr 17:7, Jul 19:6, Aug 21:8-9

58544 with removal of tube(s) and/or ovary(s)
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Nov 07:1, Jul 19:6, Aug 21:8-9

(Do not report 58543-58544 in conjunction with 49320, 57000, 57180, 57410, 58140-58146, 58545, 58546, 58561, 58661, 58670, 58671)

58545 Laparoscopy, surgical, myomectomy, excision; 1 to 4 intramural myomas with total weight of 250 g or less and/or removal of surface myomas
- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Jun 03:5, 12, Jul 19:6

58546 5 or more intramural myomas and/or intramural myomas with total weight greater than 250 g
- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Jun 03:12, Jan 04:26, Apr 17:7, Jul 19:6

58548 Laparoscopy, surgical, with radical hysterectomy, with bilateral total pelvic lymphadenectomy and para-aortic lymph node sampling (biopsy), with removal of tube(s) and ovary(s), if performed
- *CPT Changes: An Insider's View* 2007
- *CPT Assistant* Nov 07:1, Sep 15:12, Apr 17:7, Mar 19:5, Jul 19:6, Aug 21:8-9, Dec 21:21, Dec 22:20

(Do not report 58548 in conjunction with 38570-38572, 58210, 58285, 58550-58554)

58550 Laparoscopy, surgical, with vaginal hysterectomy, for uterus 250 g or less;
- *CPT Changes: An Insider's View* 2000, 2003
- *CPT Assistant* Nov 99:28, Mar 00:9, Apr 17:7, Jul 19:6, Aug 21:8-9

58552 with removal of tube(s) and/or ovary(s)
- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Nov 07:1, Apr 17:7, Jul 19:6, Aug 21:8-9

(Do not report 58550-58552 in conjunction with 49320, 57000, 57180, 57410, 58140-58146, 58545, 58546, 58561, 58661, 58670, 58671)

58553 Laparoscopy, surgical, with vaginal hysterectomy, for uterus greater than 250 g;
- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Apr 17:7, Jul 19:6, Aug 21:8-9

58554 with removal of tube(s) and/or ovary(s)
- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Apr 17:7, Jul 19:6, Aug 21:8-9, Aug 24:18

(Do not report 58553-58554 in conjunction with 49320, 57000, 57180, 57410, 58140-58146, 58545, 58546, 58561, 58661, 58670, 58671)

58555 Hysteroscopy, diagnostic (separate procedure)
- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:28, Mar 00:10

------ The dotted lines around the fallopian tube(s) and ovary(ies) indicate that both procedures may include the removal of tube(s) and ovary(ies), unilateral or bilateral.

━━━ The solid line indicates the organs or parts that are removed for the procedure.

58558 Hysteroscopy, surgical; with sampling (biopsy) of endometrium and/or polypectomy, with or without D & C

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:28, Mar 00:10, Sep 02:10, Jan 03:7, May 03:19

58559 with lysis of intrauterine adhesions (any method)

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:28, Mar 00:10

58560 with division or resection of intrauterine septum (any method)

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:28, Mar 00:10

58561 with removal of leiomyomata

CPT Changes: An Insider's View 2000

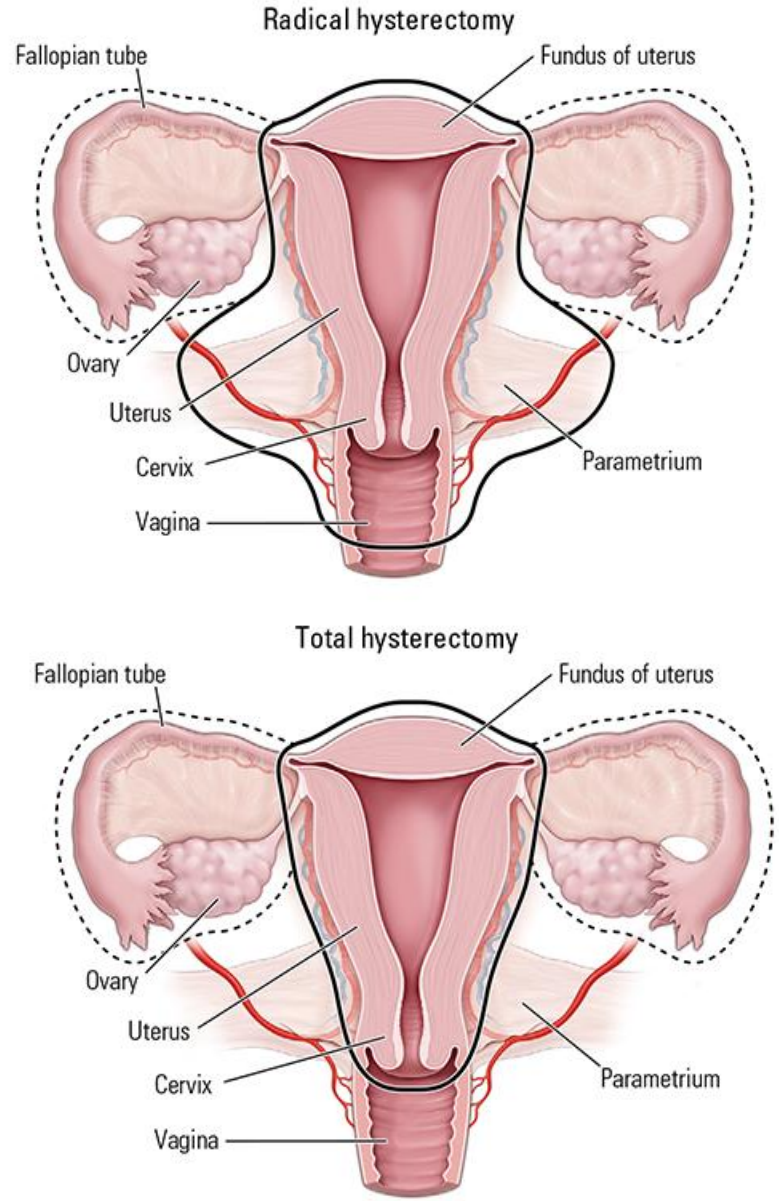
CPT Assistant Nov 99:28, Mar 00:10, Jan 03:7, Dec 23:42

►(Do not report 58561 in conjunction with 58580, when both services are performed for the same lesion)◄

58562 with removal of impacted foreign body

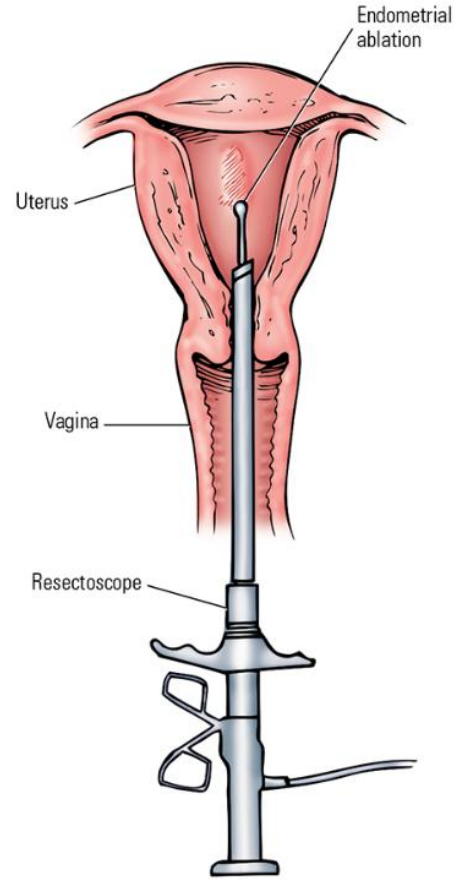
CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:28, Mar 00:10



58563 with endometrial ablation (eg, endometrial resection, electrosurgical ablation, thermoablation)

CPT Changes: An Insider's View 2000, 2002



CPT Assistant Nov 99:28, Mar 00:10, Mar 02:11, Apr 02:19, Jan 03:7, Feb 12:11, Jan 15:14

Radical and Total Hysterectomy

58548, 58575

Hysteroscopy
58563

58565 with bilateral fallopian tube cannulation to induce occlusion by placement of permanent implants
- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* Jan 11:9, Feb 12:11

(Do not report 58565 in conjunction with 58555 or 57800)

(For unilateral procedure, use modifier 52)

58570 Laparoscopy, surgical, with total hysterectomy, for uterus 250 g or less;
- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Apr 17:7, Jul 19:6, Aug 21:8-9

58571 with removal of tube(s) and/or ovary(s)
- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* May 12:14, Aug 12:13, Apr 17:7, Feb 18:11, Jul 19:6, Mar 21:10, Aug 21:8-9, Aug 24:18

58572 Laparoscopy, surgical, with total hysterectomy, for uterus greater than 250 g;
- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* Apr 17:7, Jul 19:6, Aug 21:8-9

58573 with removal of tube(s) and/or ovary(s)
- *CPT Changes: An Insider's View* 2008
- *CPT Assistant* May 12:14, Aug 12:13, Apr 17:7, Feb 18:11, Apr 18:11, Mar 19:5, Jul 19:6, Mar 21:10, Aug 21:8-9, Aug 24:18

(Do not report 58570-58573 in conjunction with 49320, 57000, 57180, 57410, 58140-58146, 58150, 58545, 58546, 58561, 58661, 58670, 58671)

58575 Laparoscopy, surgical, total hysterectomy for resection of malignancy (tumor debulking), with omentectomy including salpingo-oophorectomy, unilateral or bilateral, when performed
- *CPT Changes: An Insider's View* 2018
- *CPT Assistant* Mar 19:5, Jul 19:6, Mar 20:14, Mar 21:11, Aug 21:8-9, Dec 21:21

(Do not report 58575 in conjunction with 49255, 49320, 49321, 58570, 58571, 58572, 58573, 58661)

58578 Unlisted laparoscopy procedure, uterus
- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:28, Mar 00:10, Mar 07:9

58579 Unlisted hysteroscopy procedure, uterus
- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:28, Mar 00:10

Other Procedures

 # 58353 Endometrial ablation, thermal, without hysteroscopic guidance

CPT Changes: An Insider's View 2001
CPT Assistant Mar 02:11, Apr 02:19, Feb 24:21

(For hysteroscopic procedure, use 58563)

 # 58356 Endometrial cryoablation with ultrasonic guidance, including endometrial curettage, when performed

CPT Changes: An Insider's View 2005
CPT Assistant Feb 24:21

(Do not report 58356 in conjunction with 58100, 58120, 58340, 76700, 76856)

58580 Transcervical ablation of uterine fibroid(s), including intraoperative ultrasound guidance and monitoring, radiofrequency

CPT Changes: An Insider's View 2024
CPT Assistant Dec 23:42, Feb 24:21

►(Do not report 58580 in conjunction with 58674, 76830, 76940, 76998)◄

►(Do not report 58580 in conjunction with 58561, when both services are performed for the same lesion)◄

(For laparoscopic radiofrequency ablation of uterine fibroid[s], including intraoperative ultrasound guidance and monitoring, use 58674)

Oviduct/Ovary

Incision

58600 Ligation or transection of fallopian tube(s), abdominal or vaginal approach, unilateral or bilateral

CPT Changes: An Insider's View 2000
CPT Assistant Nov 99:28

58605 Ligation or transection of fallopian tube(s), abdominal or vaginal approach, postpartum, unilateral or bilateral, during same hospitalization (separate procedure)

CPT Changes: An Insider's View 2000
CPT Assistant Nov 99:28

(For laparoscopic procedures, use 58670, 58671)

✚ 58611 Ligation or transection of fallopian tube(s) when done at the time of cesarean delivery or intra-abdominal surgery (not a separate procedure) (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2002

58615 Occlusion of fallopian tube(s) by device (eg, band, clip, Falope ring) vaginal or suprapubic approach

CPT Changes: An Insider's View 2000
CPT Assistant Nov 99:28

(For laparoscopic approach, use 58671)

(For lysis of adnexal adhesions, use 58740)

Laparoscopy

►Surgical laparoscopy always includes diagnostic laparoscopy. To report a diagnostic laparoscopy (separate procedure), use 49320.◄

58660 Laparoscopy, surgical; with lysis of adhesions (salpingolysis, ovariolysis) (separate procedure)

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:28, Mar 00:10, Mar 03:22, Dec 11:16, Jul 19:6

58661 with removal of adnexal structures (partial or total oophorectomy and/or salpingectomy)

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:28, Mar 00:10, Jan 02:11, Nov 07:1, May 10:10, Jul 19:6, Jan 20:12, Mar 22:12, Feb 24:34, May 24:7

(For bilateral procedure, report 58661 with modifier 50)

58662 with fulguration or excision of lesions of the ovary, pelvic viscera, or peritoneal surface by any method

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:28, Mar 00:10, Dec 17:14, Jul 19:6, Jul 23:17

58670 with fulguration of oviducts (with or without transection)

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:29, Mar 00:10, Nov 07:2, Jul 19:6, Mar 22:12

58671 with occlusion of oviducts by device (eg, band, clip, or Falope ring)

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:29, Mar 00:10, Jul 19:6

58672 with fimbrioplasty

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:29, Mar 00:10, Jul 19:6

58673 with salpingostomy (salpingoneostomy)

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:29, Mar 00:10, May 02:19, Jul 19:6

(Codes 58672 and 58673 are used to report unilateral procedures. For bilateral procedure, use modifier 50)

58674 Code is out of numerical sequence. See 58520-58542

58679 Unlisted laparoscopy procedure, oviduct, ovary

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:29, Mar 00:10, Jul 23:17

(For laparoscopic aspiration of ovarian cyst, use 49322)

(For laparoscopic biopsy of the ovary or fallopian tube, use 49321)

Excision

58700 Salpingectomy, complete or partial, unilateral or bilateral (separate procedure)

CPT Assistant Sep 18:14

58720 Salpingo-oophorectomy, complete or partial, unilateral or bilateral (separate procedure)

CPT Assistant Sep 00:9, Jul 06:19

Repair

58740 Lysis of adhesions (salpingolysis, ovariolysis)

CPT Changes: An Insider's View 2000

CPT Assistant Sep 96:9, Nov 99:29

(For laparoscopic approach, use 58660)

(For fulguration or excision of lesions, laparoscopic approach, use 58662)

(For excision or destruction of endometriomas, open method, use 58999)

58750 Tubotubal anastomosis

58752 Tubouterine implantation

58760 Fimbrioplasty

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:29

(For laparoscopic approach, use 58672)

58770 Salpingostomy (salpingoneostomy)

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:29

(For laparoscopic approach, use 58673)

Ovary

Incision

58800 Drainage of ovarian cyst(s), unilateral or bilateral (separate procedure); vaginal approach

58805 abdominal approach

CPT Assistant Mar 24:26

58820 Drainage of ovarian abscess; vaginal approach, open

CPT Assistant Nov 97:22

58822 abdominal approach

CPT Assistant Nov 97:22

(For transrectal image-guided fluid collection drainage by catheter of pelvic abscess, use 49407)

58825 Transposition, ovary(s)

Excision

58900 Biopsy of ovary, unilateral or bilateral (separate procedure)

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:29

(For laparoscopic biopsy of the ovary or fallopian tube, use 49321)

58920 Wedge resection or bisection of ovary, unilateral or bilateral

58925 Ovarian cystectomy, unilateral or bilateral

58940 Oophorectomy, partial or total, unilateral or bilateral;

- *CPT Assistant* Mar 04:3, Aug 24:18

(For oophorectomy with concomitant debulking for ovarian malignancy, use 58952)

58943 for ovarian, tubal or primary peritoneal malignancy, with para-aortic and pelvic lymph node biopsies, peritoneal washings, peritoneal biopsies, diaphragmatic assessments, with or without salpingectomy(s), with or without omentectomy

- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Oct 10:16, Dec 10:16

(Do not report 58943 in conjunction with 49186, 49187, 49188, 49189, 49190)

58950 Resection (initial) of ovarian, tubal or primary peritoneal malignancy with bilateral salpingo-oophorectomy and omentectomy;

- *CPT Changes: An Insider's View* 2001, 2007
- *CPT Assistant* Oct 10:16, Dec 10:16, Nov 21:8

58951 with total abdominal hysterectomy, pelvic and limited para-aortic lymphadenectomy

- *CPT Assistant* Aug 01:11, Oct 10:16, Dec 10:16, Nov 21:8

58952 with radical dissection for debulking (ie, radical excision or destruction, intra-abdominal or retroperitoneal tumors)

- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Dec 96:10, Aug 01:11, Oct 10:16, Dec 10:16, Nov 21:8

(Do not report 58950, 58951, 58952 in conjunction with 49186, 49187, 49188, 49189, 49190)

(For resection of recurrent ovarian, tubal, primary peritoneal, or uterine malignancy, use 58958)

58953 Bilateral salpingo-oophorectomy with omentectomy, total abdominal hysterectomy and radical dissection for debulking;

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Feb 02:8, Oct 10:16, Dec 10:16, May 14:10, Nov 21:8, May 24:23

58954 with pelvic lymphadenectomy and limited para-aortic lymphadenectomy

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Feb 02:9, Oct 10:16, Dec 10:16, Nov 21:8

(Do not report 58953, 58954 in conjunction with 49186, 49187, 49188, 49189, 49190)

58956 Bilateral salpingo-oophorectomy with total omentectomy, total abdominal hysterectomy for malignancy

- *CPT Changes: An Insider's View* 2005
- *CPT Assistant* May 14:10

(Do not report 58956 in conjunction with 49186, 49187, 49188, 49189, 49190, 49255, 58150, 58180, 58262, 58263, 58550, 58661, 58700, 58720, 58900, 58925, 58940, 58958)

(58957 has been deleted. For resection [tumor debulking] of recurrent ovarian, endometrial, tubal, or primary peritoneal gynecological malignancies, with omentectomy, if performed, without lymphadenectomy, see 49186, 49187, 49188, 49189, 49190)

58958 Resection (tumor debulking) of recurrent ovarian, tubal, primary peritoneal, uterine malignancy (intra-abdominal, retroperitoneal tumors), with omentectomy, if performed, with pelvic lymphadenectomy and limited para-aortic lymphadenectomy

- *CPT Changes: An Insider's View* 2007, 2025
- *CPT Assistant* Feb 25:1

(Do not report 58958 in conjunction with 38770, 38780, 44005, 49000, 49186, 49187, 49188, 49189, 49190, 49215, 49255, 58900-58960)

58960 Laparotomy, for staging or restaging of ovarian, tubal, or primary peritoneal malignancy (second look), with or without omentectomy, peritoneal washing, biopsy of abdominal and pelvic peritoneum, diaphragmatic assessment with pelvic and limited para-aortic lymphadenectomy

- *CPT Changes: An Insider's View* 2001

(Do not report 58960 in conjunction with 49186, 49187, 49188, 49189, 49190, 58958)

In Vitro Fertilization

58970 Follicle puncture for oocyte retrieval, any method

(For radiological supervision and interpretation, use 76948)

58974 Embryo transfer, intrauterine

58976 Gamete, zygote, or embryo intrafallopian transfer, any method

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:29

(For laparoscopic adnexal procedures, see 58660-58673)

Maternity Care and Delivery

The services normally provided in uncomplicated maternity cases include antepartum care, delivery, and postpartum care. Pregnancy confirmation during a problem-oriented or preventive visit is not considered as part of antepartum care and should be reported using the appropriate E/M service codes 98000-98016, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99242, 99243, 99244, 99245, 99281, 99282, 99283, 99284, 99285, 99384, 99385, 99386, 99394, 99395, 99396 for that visit.

Antepartum care includes the initial prenatal history and physical examination; subsequent prenatal history and physical examinations; recording of weight, blood pressures, fetal heart tones, routine chemical urinalysis, and monthly visits up to 28 weeks gestation; biweekly visits to 36 weeks gestation; and weekly visits until delivery. Any other visits or services within this time period should be coded separately.

Delivery services include admission to the hospital, the admission history and physical examination, management of uncomplicated labor, vaginal delivery (with or without episiotomy, with or without forceps), or cesarean delivery. When reporting delivery only services (59409, 59514, 59612, 59620), report inpatient postdelivery management and discharge services using E/M service codes (99238, 99239). Delivery and postpartum services (59410, 59515, 59614, 59622) include delivery services and all inpatient and outpatient postpartum services. Medical complications of pregnancy (eg, cardiac problems, neurological problems, diabetes, hypertension, toxemia, hyperemesis, preterm labor, premature rupture of membranes, trauma) and medical problems complicating labor and delivery management may require additional resources and may be reported separately.

Postpartum care only services (59430) include synchronous audio-video visits, synchronous audio-only visits, brief communication technology-based services, or office or other outpatient visits following vaginal or cesarean section delivery.

For surgical complications of pregnancy (eg, appendectomy, hernia, ovarian cyst, Bartholin cyst), see services in the **Surgery** section.

If all or part of the antepartum and/or postpartum patient care is provided except delivery due to termination of pregnancy by abortion or referral to another physician or other qualified health care professional for delivery, see the antepartum and postpartum care codes 59425, 59426, and 59430.

(For circumcision of newborn, see 54150, 54160)

Antepartum and Fetal Invasive Services

(For fetal intrauterine transfusion, use 36460)

(For unlisted fetal invasive procedure, use 59897)

59000 Amniocentesis; diagnostic

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Apr 97:2, Feb 02:7, Aug 02:2, May 04:2, Jul 19:6

(For radiological supervision and interpretation, use 76946)

59001 therapeutic amniotic fluid reduction (includes ultrasound guidance)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Feb 02:7, Aug 02:2

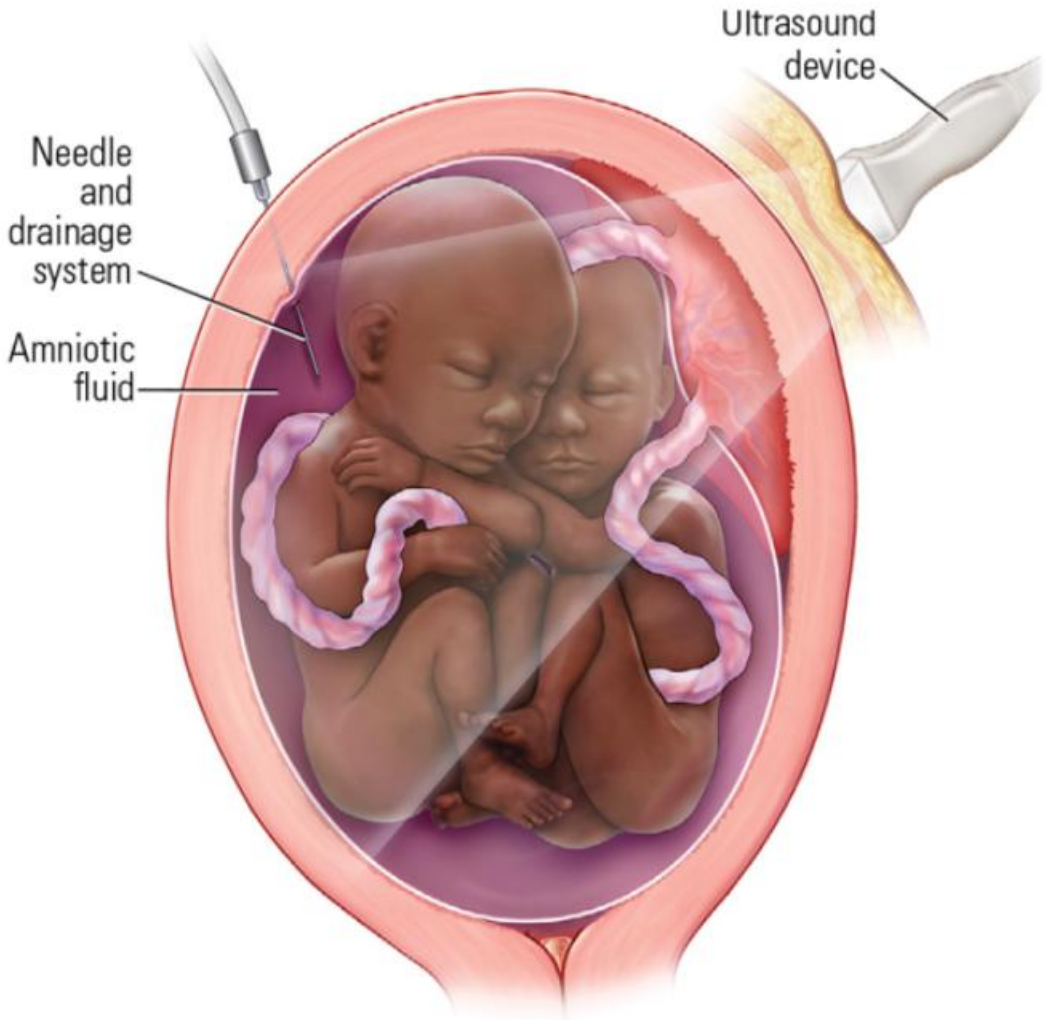
59012 Cordocentesis (intrauterine), any method

- *CPT Assistant* Aug 02:2

(For radiological supervision and interpretation, use 76941)

59015 Chorionic villus sampling, any method

- *CPT Assistant* Apr 97:2, Aug 02:2



(For radiological supervision and interpretation, use 76945)

59020 Fetal contraction stress test

- *CPT Assistant* Apr 97:2, Aug 02:2

Amniocentesis, Therapeutic Amniotic Fluid Reduction

59001

59025 Fetal non-stress test

CPT Assistant Apr 97:2, May 98:10, Oct 04:10, Dec 08:8, Mar 25:19

59030 Fetal scalp blood sampling

CPT Assistant Aug 02:3

(For repeat fetal scalp blood sampling, use 59030 and see modifiers 76 and 77)

59050 Fetal monitoring during labor by consulting physician (ie, non-attending physician) with written report; supervision and interpretation

CPT Assistant Nov 97:22

59051 interpretation only

CPT Assistant Nov 97:22

59070 Transabdominal amnioinfusion, including ultrasound guidance

CPT Changes: An Insider's View 2004

CPT Assistant May 04:2, Jun 04:11

59072 Fetal umbilical cord occlusion, including ultrasound guidance

CPT Changes: An Insider's View 2004

CPT Assistant May 04:2, Jun 04:11

59074 Fetal fluid drainage (eg, vesicocentesis, thoracocentesis, paracentesis), including ultrasound guidance

CPT Changes: An Insider's View 2004

CPT Assistant May 04:2, 4, Jun 04:11, Dec 04:19

59076 Fetal shunt placement, including ultrasound guidance

CPT Changes: An Insider's View 2004

CPT Assistant May 04:2, 4, Jun 04:11, Dec 04:19

Excision

59100 Hysterotomy, abdominal (eg, for hydatidiform mole, abortion)

(When tubal ligation is performed at the same time as hysterotomy, use 58611 in addition to 59100)

59120 Surgical treatment of ectopic pregnancy; tubal or ovarian, requiring salpingectomy and/or oophorectomy, abdominal or vaginal approach

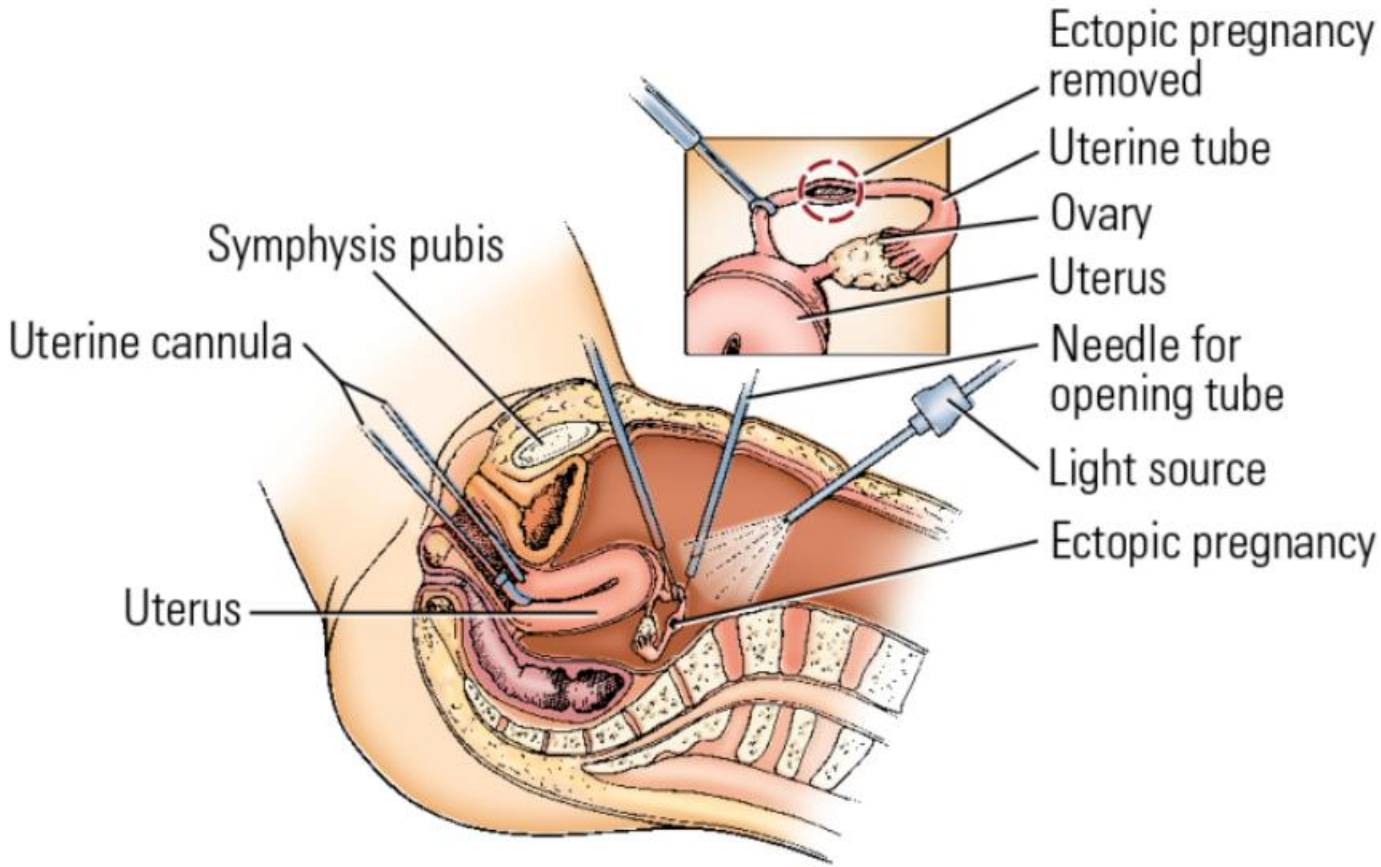
59121 tubal or ovarian, without salpingectomy and/or oophorectomy

59130 abdominal pregnancy

59136 interstitial, uterine pregnancy with partial resection of uterus

59140 cervical, with evacuation

59150 Laparoscopic treatment of ectopic pregnancy; without salpingectomy and/or oophorectomy



CPT Assistant Sep 96:9

59151 with salpingectomy and/or oophorectomy

Laparoscopic Treatment of Ectopic Pregnancy

59150

The site of gestation is located with a laparoscope, and a small incision is made above the site. The ectopic pregnancy is then removed.

59160 Curettage, postpartum

CPT Assistant Nov 97:22, Sep 02:11

Introduction

(For intrauterine fetal transfusion, use 36460)

(For introduction of hypertonic solution and/or prostaglandins to initiate labor, see 59850-59857)

59200 Insertion of cervical dilator (eg, laminaria, prostaglandin) (separate procedure)

CPT Assistant Fall 93:9, Apr 97:3, Jul 05:15, Dec 17:14

Repair

(For tracheloplasty, use 57700)

59300 Episiotomy or vaginal repair, by other than attending

CPT Changes: An Insider's View 2013

CPT Assistant Dec 23:45

59320 Cerclage of cervix, during pregnancy; vaginal

CPT Assistant Aug 02:2, Nov 06:21, Feb 07:10

59325 abdominal

CPT Assistant Aug 02:2, Nov 06:21, Feb 07:10

59350 Hysterorrhaphy of ruptured uterus

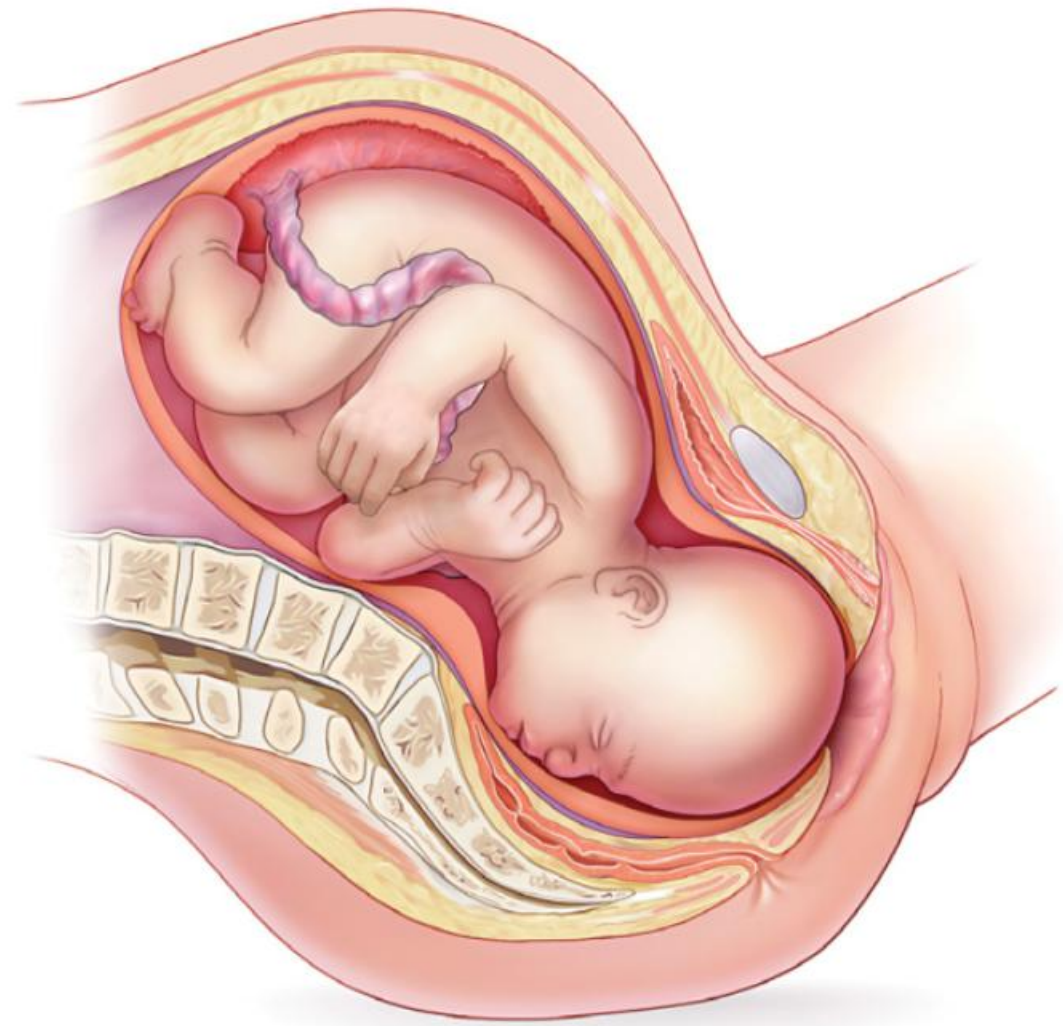
CPT Assistant Aug 02:2

Vaginal Delivery, Antepartum and Postpartum Care

Coding Tip

Instructions for Reporting Antepartum and Postpartum Care

The services normally provided in uncomplicated maternity cases include antepartum care, delivery, and postpartum care.



CPT Coding Guidelines, Maternity Care and Delivery

59400 Routine obstetric care including antepartum care, vaginal delivery (with or without episiotomy, and/or forceps) and postpartum care

CPT Assistant Feb 96:1, Mar 96:11, Feb 97:11, Apr 97:3, Apr 98:15, Jun 98:10, Aug 02:3, Feb 03:15, Feb 22:14

Vaginal Delivery

59400-59410

59409 Vaginal delivery only (with or without episiotomy and/or forceps);

CPT Assistant Feb 96:1, Mar 96:11, Jul 96:11, Sep 96:4, Feb 97:11, Apr 97:1, Aug 02:3, Dec 07:13, Jun 09:10, Feb 22:15, Dec 23:45

59410 including postpartum care

59412 External cephalic version, with or without tocolysis

CPT Assistant Fall 94:21, Feb 96:1, Aug 02:2-3, Aug 24:19

(Use 59412 in addition to code[s] for delivery)

59414 Delivery of placenta (separate procedure)

CPT Assistant Jun 96:10, Jun 98:10, Aug 02:3, Dec 23:45

(For antepartum care only, see 59425, 59426 or appropriate E/M code[s])

(For 1-3 antepartum care visits, see appropriate E/M code[s])

59425 Antepartum care only; 4-6 visits

CPT Assistant Fall 94:21, Apr 97:11, Aug 02:3

59426 7 or more visits

CPT Assistant Fall 94:21, Apr 97:11, Aug 02:3

59430 Postpartum care only (separate procedure)

CPT Assistant Jun 96:10, Aug 02:3

Cesarean Delivery

(For standby attendance for infant, use 99360)

(For low cervical cesarean section, see 59510, 59515, 59525)

Coding Tip

Instructions for Reporting Cesarean Delivery

Patients who have had a previous cesarean delivery and now present with the expectation of a vaginal delivery are coded using codes 59610-59622. If the patient has a successful vaginal delivery after a previous cesarean delivery (VBAC), use codes 59610-59614. If the attempt is unsuccessful and another cesarean delivery is carried out, use codes 59618-59622. To report elective cesarean deliveries, use code 59510, 59514 or 59515.

CPT Coding Guidelines, Maternity Care and Delivery, Delivery After Previous Cesarean Delivery

59510 Routine obstetric care including antepartum care, cesarean delivery, and postpartum care

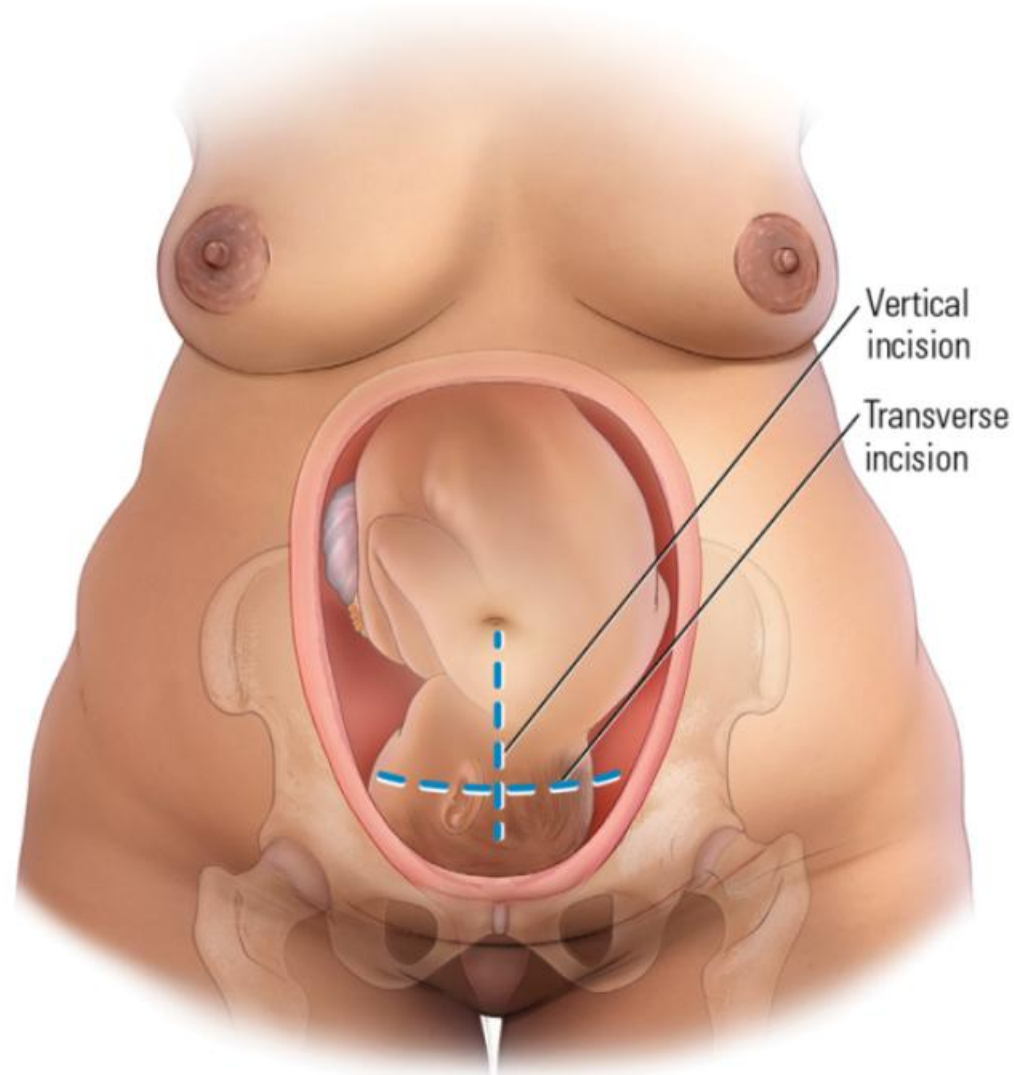
➔ *CPT Assistant* Jul 96:11, Sep 96:4, Oct 96:10, Feb 97:11, Apr 97:2, Aug 02:3, Mar 13:13, Feb 22:14

59514 Cesarean delivery only;

➔ *CPT Assistant* Oct 96:10, Feb 97:11, Mar 13:13, Feb 22:15

59515 including postpartum care

➔ *CPT Assistant* Mar 13:13



(For classic cesarean section, see 59510, 59515, 59525)

+ 59525 Subtotal or total hysterectomy after cesarean delivery (List separately in addition to code for primary procedure)

(Use 59525 in conjunction with 59510, 59514, 59515, 59618, 59620, 59622)

(For extraperitoneal cesarean section, or cesarean section with subtotal or total hysterectomy, see 59510, 59515, 59525)

Cesarean Delivery
59510-59515

Delivery After Previous Cesarean Delivery

Patients who have had a previous cesarean delivery and now present with the expectation of a vaginal delivery are coded using codes 59610-59622. If the patient has a successful vaginal delivery after a previous cesarean delivery (VBAC), use codes 59610-59614. If the attempt is unsuccessful and another cesarean delivery is carried out, use codes 59618-59622. To report elective cesarean deliveries use code 59510, 59514 or 59515.

59610 Routine obstetric care including antepartum care, vaginal delivery (with or without episiotomy, and/or forceps) and postpartum care, after previous cesarean delivery
- *CPT Assistant* Feb 96:2, Apr 97:3, Aug 02:3

59612 Vaginal delivery only, after previous cesarean delivery (with or without episiotomy and/or forceps);
- *CPT Assistant* Feb 96:2, Aug 02:3

59614 including postpartum care
- *CPT Assistant* Feb 96:2

59618 Routine obstetric care including antepartum care, cesarean delivery, and postpartum care, following attempted vaginal delivery after previous cesarean delivery
- *CPT Assistant* Feb 96:2, Aug 02:4

59620 Cesarean delivery only, following attempted vaginal delivery after previous cesarean delivery;
- *CPT Assistant* Feb 96:2

59622 including postpartum care
- *CPT Assistant* Feb 96:2

Abortion

(For medical treatment of spontaneous complete abortion, any trimester, see E/M codes 98000-98015, 99202-99233)

(For surgical treatment of spontaneous abortion, use 59812)

59812 Treatment of incomplete abortion, any trimester, completed surgically
- *CPT Assistant* Fall 93:9, Fall 95:16

59820 Treatment of missed abortion, completed surgically; first trimester
- *CPT Assistant* Fall 93:9, Fall 95:16, Feb 99:10

59821 second trimester
- *CPT Assistant* Fall 93:9, Fall 95:16

59830 Treatment of septic abortion, completed surgically
- *CPT Assistant* Fall 93:9

59840 Induced abortion, by dilation and curettage
- *CPT Assistant* Fall 93:9, Sep 03:16

59841 Induced abortion, by dilation and evacuation
- *CPT Assistant* Fall 93:9

59850 Induced abortion, by 1 or more intra-amniotic injections (amniocentesis-injections), including hospital admission and visits, delivery of fetus and secundines;
- *CPT Assistant* Fall 93:10

59851 with dilation and curettage and/or evacuation
- *CPT Assistant* Fall 93:10

59852 with hysterotomy (failed intra-amniotic injection)
- *CPT Assistant* Fall 93:10

(For insertion of cervical dilator, use 59200)

59855 Induced abortion, by 1 or more vaginal suppositories (eg, prostaglandin) with or without cervical dilation (eg, laminaria), including hospital admission and visits, delivery of fetus and secundines;

59856 with dilation and curettage and/or evacuation

59857 with hysterotomy (failed medical evacuation)

Other Procedures

59866 Multifetal pregnancy reduction(s) (MPR)

59870 Uterine evacuation and curettage for hydatidiform mole

- *CPT Assistant* Feb 99:10

59871 Removal of cerclage suture under anesthesia (other than local)

- *CPT Assistant* Nov 97:22, Nov 06:21, Feb 07:10

59897 Unlisted fetal invasive procedure, including ultrasound guidance, when performed

- *CPT Changes: An Insider's View* 2004, 2010
- *CPT Assistant* May 04:5

59898 Unlisted laparoscopy procedure, maternity care and delivery

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:29, Mar 00:10

59899 Unlisted procedure, maternity care and delivery

- *CPT Assistant* Jun 97:10, May 04:2, Oct 13:3, Jul 19:6

Endocrine System

(For pituitary and pineal surgery, see **Nervous System**)

Thyroid Gland

Incision

60000 Incision and drainage of thyroglossal duct cyst, infected

- *CPT Changes: An Insider's View* 2002

Excision

60100 Biopsy thyroid, percutaneous core needle

CPT Assistant Jun 97:5, Jun 07:10

Clinical Examples in Radiology Winter 17:5, Winter 19:3

(If imaging guidance is performed, see 76942, 77002, 77012, 77021)

(For fine needle aspiration biopsy, see 10004, 10005, 10006, 10007, 10008, 10009, 10010, 10011, 10012, 10021)

(For evaluation of fine needle aspirate, see 88172, 88173)

60200 Excision of cyst or adenoma of thyroid, or transection of isthmus

CPT Assistant Aug 11:10, Dec 12:3

60210 Partial thyroid lobectomy, unilateral; with or without isthmusectomy

CPT Assistant Winter 94:7, Aug 11:9, Dec 12:3

60212 with contralateral subtotal lobectomy, including isthmusectomy

CPT Assistant Dec 12:3

60220 Total thyroid lobectomy, unilateral; with or without isthmusectomy

CPT Assistant Oct 10:13, Dec 10:13, Aug 11:10, Dec 12:3, Aug 20:14

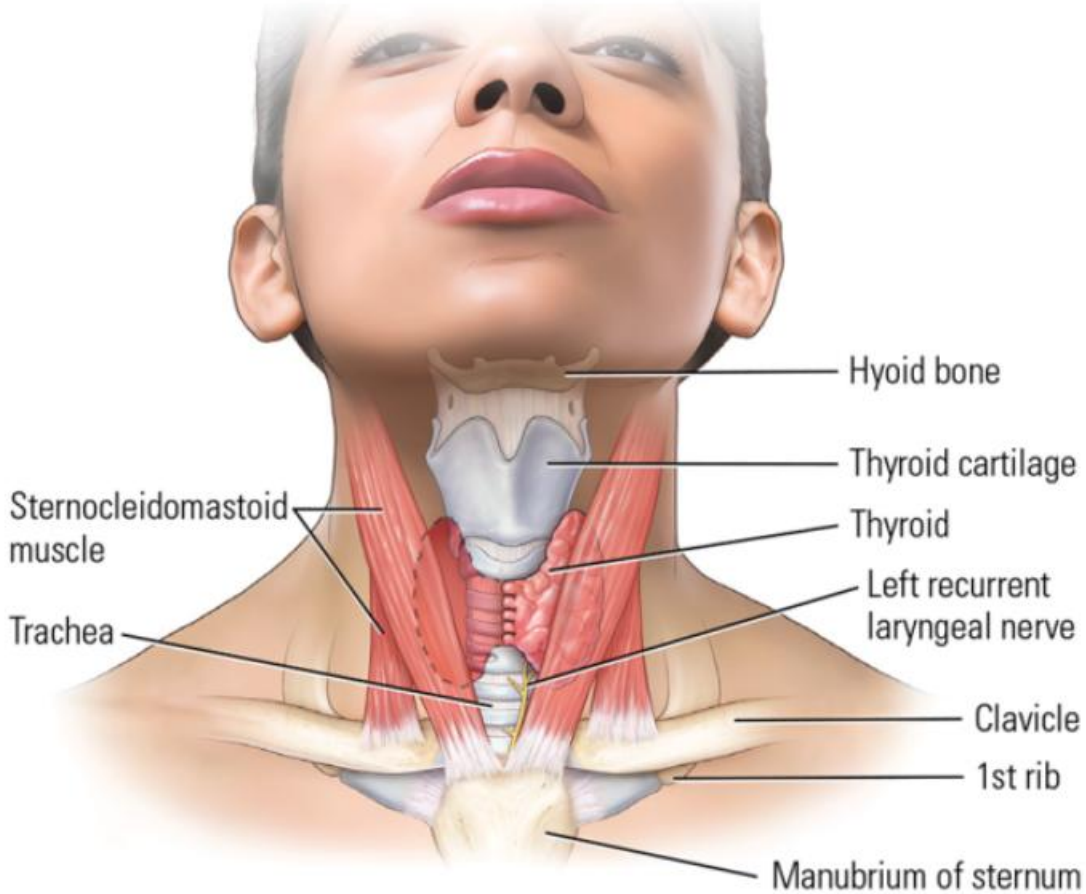
60225 with contralateral subtotal lobectomy, including isthmusectomy

CPT Assistant Dec 12:3

60240 Thyroidectomy, total or complete

CPT Assistant Dec 12:3

(For thyroidectomy, subtotal or partial, use 60271)



60252 Thyroidectomy, total or subtotal for malignancy; with limited neck dissection

CPT Assistant Nov 00:10, Dec 12:3, Aug 24:19

Thyroid Lobectomy

60220

The thyroid is exposed via a transverse cervical incision. The superior and inferior thyroid vessels serving the lobe are ligated, the isthmus is severed, and the entire thyroid lobe is resected.

60254 with radical neck dissection

CPT Assistant Nov 00:10, Dec 12:3

60260 Thyroidectomy, removal of all remaining thyroid tissue following previous removal of a portion of thyroid

CPT Assistant Oct 10:13, Dec 10:13, Dec 12:3

(For bilateral procedure, report 60260 with modifier 50)

60270 Thyroidectomy, including substernal thyroid; sternal split or transthoracic approach

CPT Changes: An Insider's View 2002

CPT Assistant Dec 12:3

60271 cervical approach

CPT Assistant Dec 12:3, Aug 20:14

60280 Excision of thyroglossal duct cyst or sinus;

60281 recurrent

(For thyroid ultrasonography, use 76536)

Removal

60300 Aspiration and/or injection, thyroid cyst

CPT Changes: An Insider's View 2008

CPT Assistant May 21:14

(For fine needle aspiration biopsy, see 10004, 10005, 10006, 10007, 10008, 10009, 10010, 10011, 10012, 10021)

(If imaging guidance is performed, see 76942, 77012)

Parathyroid, Thymus, Adrenal Glands, Pancreas, and Carotid Body

Excision

(For pituitary and pineal surgery, see **Nervous System**)

60500 Parathyroidectomy or exploration of parathyroid(s);

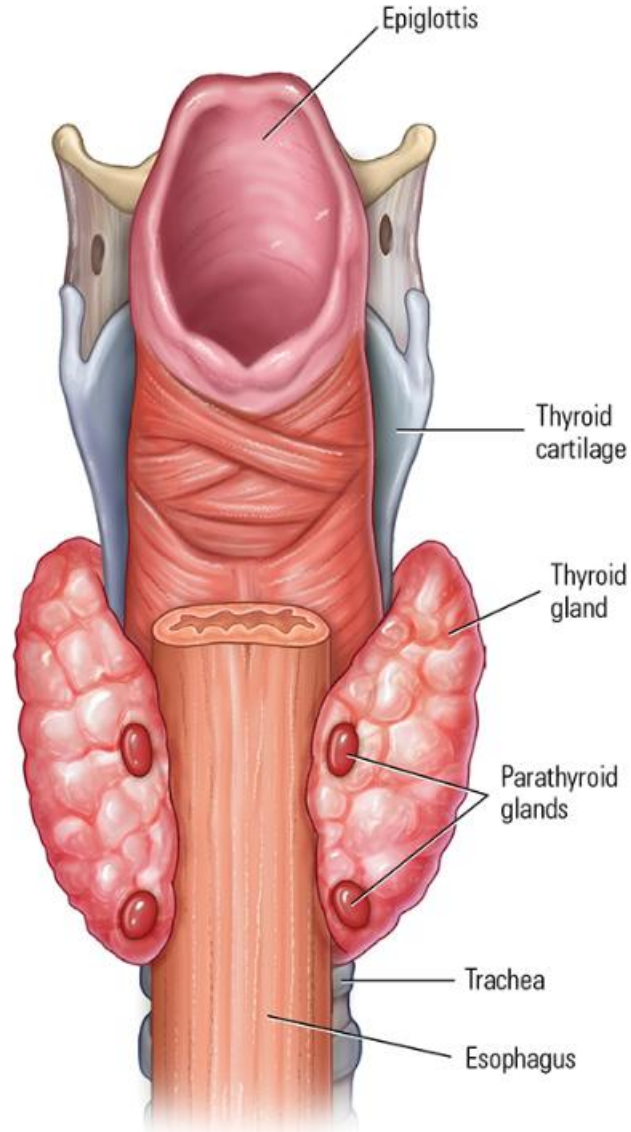
CPT Assistant Dec 12:3

60502 re-exploration

CPT Assistant Dec 12:3

60505 with mediastinal exploration, sternal split or transthoracic approach

CPT Assistant Dec 12:3



+ 60512 Parathyroid autotransplantation (List separately in addition to code for primary procedure)

CPT Assistant Aug 11:9, Dec 12:3, Jan 17:7

(Use 60512 in conjunction with 60500, 60502, 60505, 60212, 60225, 60240, 60252, 60254, 60260, 60270, 60271)

Posterior View of the Pharynx

60512

60520 Thymectomy, partial or total; transcervical approach (separate procedure)

CPT Assistant Mar 19:11

60521 sternal split or transthoracic approach, without radical mediastinal dissection (separate procedure)

CPT Assistant Dec 07:12

60522 sternal split or transthoracic approach, with radical mediastinal dissection (separate procedure)

(For thoracoscopic [VATS] thymectomy, see 32673)

60540 Adrenalectomy, partial or complete, or exploration of adrenal gland with or without biopsy, transabdominal, lumbar or dorsal (separate procedure);

CPT Assistant Nov 98:17

60545 with excision of adjacent retroperitoneal tumor

CPT Assistant Nov 98:17

(Do not report 60540, 60545 in conjunction with 50323)

(For open excision or destruction of remote or disseminated pheochromocytoma, see 49186, 49187, 49188, 49189, 49190)

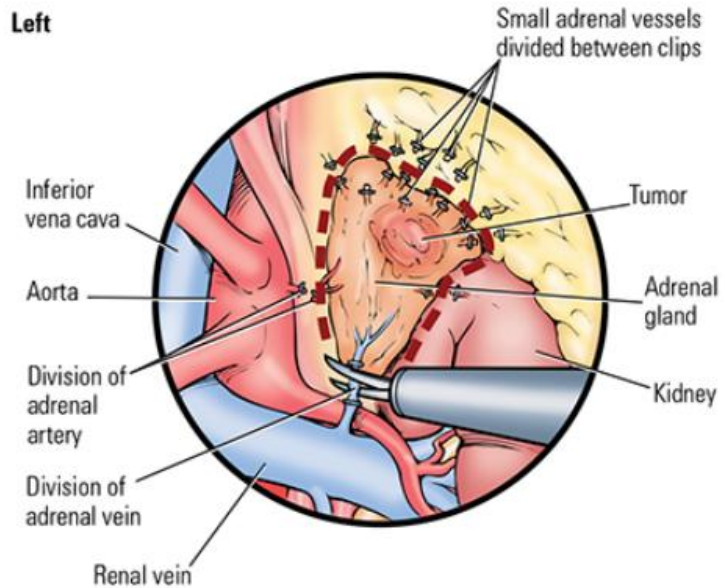
(For laparoscopic approach, use 60650)

(For bilateral procedure, report 60540 with modifier 50)

60600 Excision of carotid body tumor; without excision of carotid artery

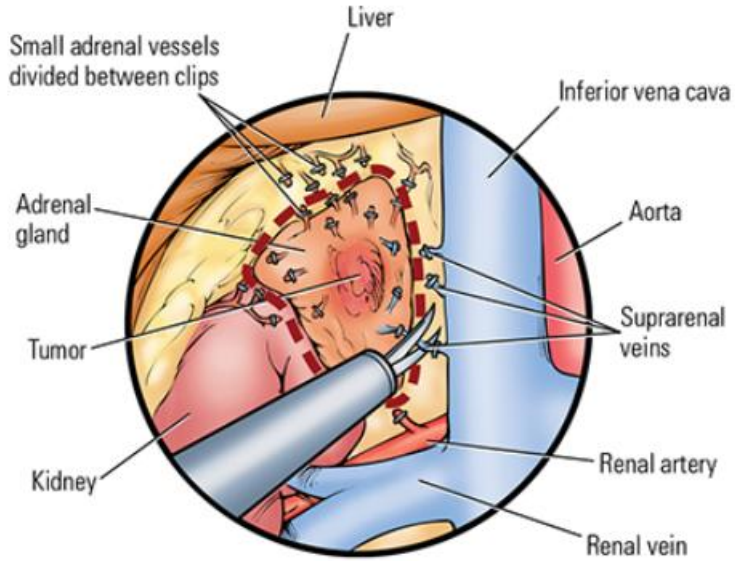
60605 with excision of carotid artery

Laparoscopy



►Surgical laparoscopy always includes diagnostic laparoscopy. To report a diagnostic laparoscopy (separate procedure), use 49320.◄

60650 Laparoscopy, surgical, with adrenalectomy, partial or complete, or exploration of adrenal gland with or without biopsy, transabdominal, lumbar or dorsal



- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:30, Mar 00:10, Nov 01:8

Laparoscopic Adrenalectomy
60650

An adrenal gland is dissected and removed under laparoscopic guidance. Multiple small blood vessels from the vena cava and the aorta do not follow standard anatomic pattern, requiring intricate dissection.

Right

60659 Unlisted laparoscopy procedure, endocrine system

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:30, Mar 00:10

Other Procedures

60660 Ablation of 1 or more thyroid nodule(s), one lobe or the isthmus, percutaneous, including imaging guidance, radiofrequency

- *CPT Changes: An Insider's View* 2025

(Do not report 60660 in conjunction with 76940, 76942, 77013, 77022)

(For laser ablation of benign thyroid nodule[s], use 0673T)

+ 60661 Ablation of 1 or more thyroid nodule(s), additional lobe, percutaneous, including imaging guidance, radiofrequency (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2025

(Use 60661 in conjunction with 60660)

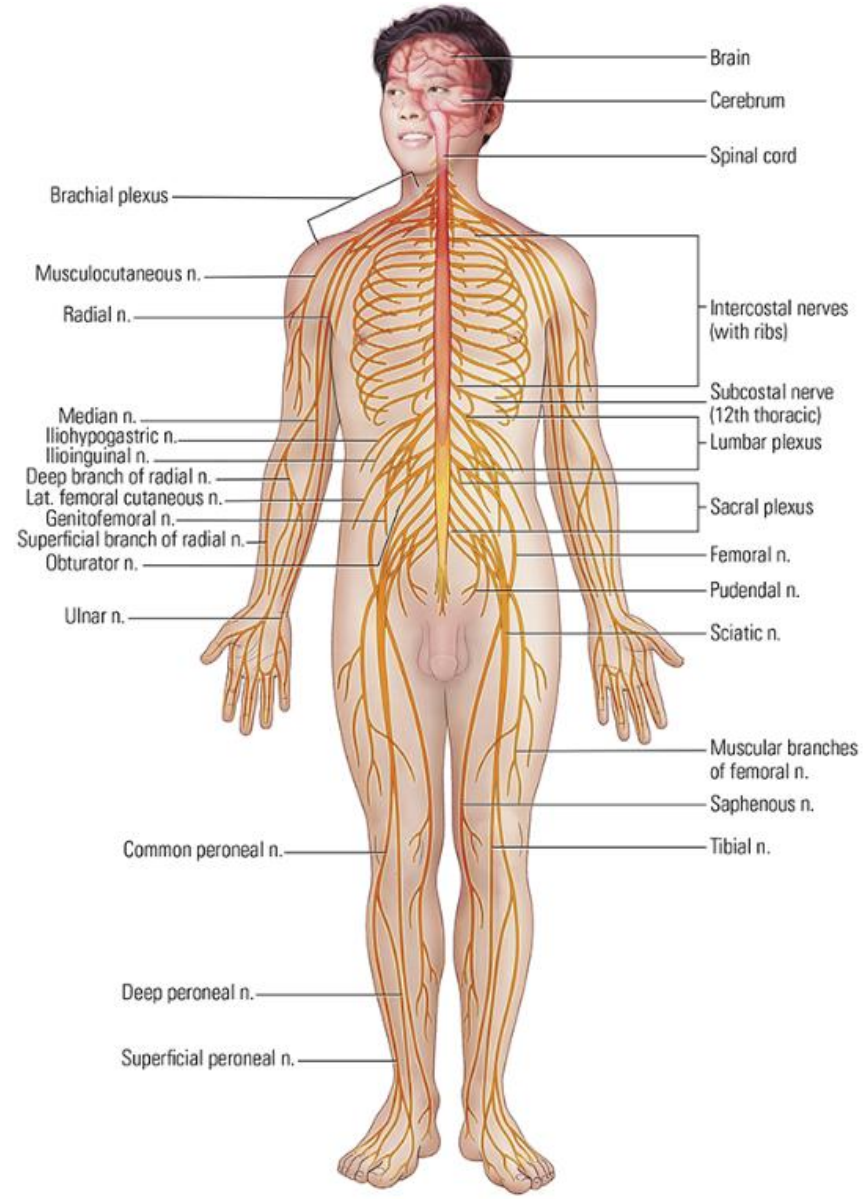
(Do not report 60661 in conjunction with 76940, 76942, 77013, 77022)

60699 Unlisted procedure, endocrine system

- *CPT Assistant* Feb 06:16, Dec 07:12, Oct 22:18

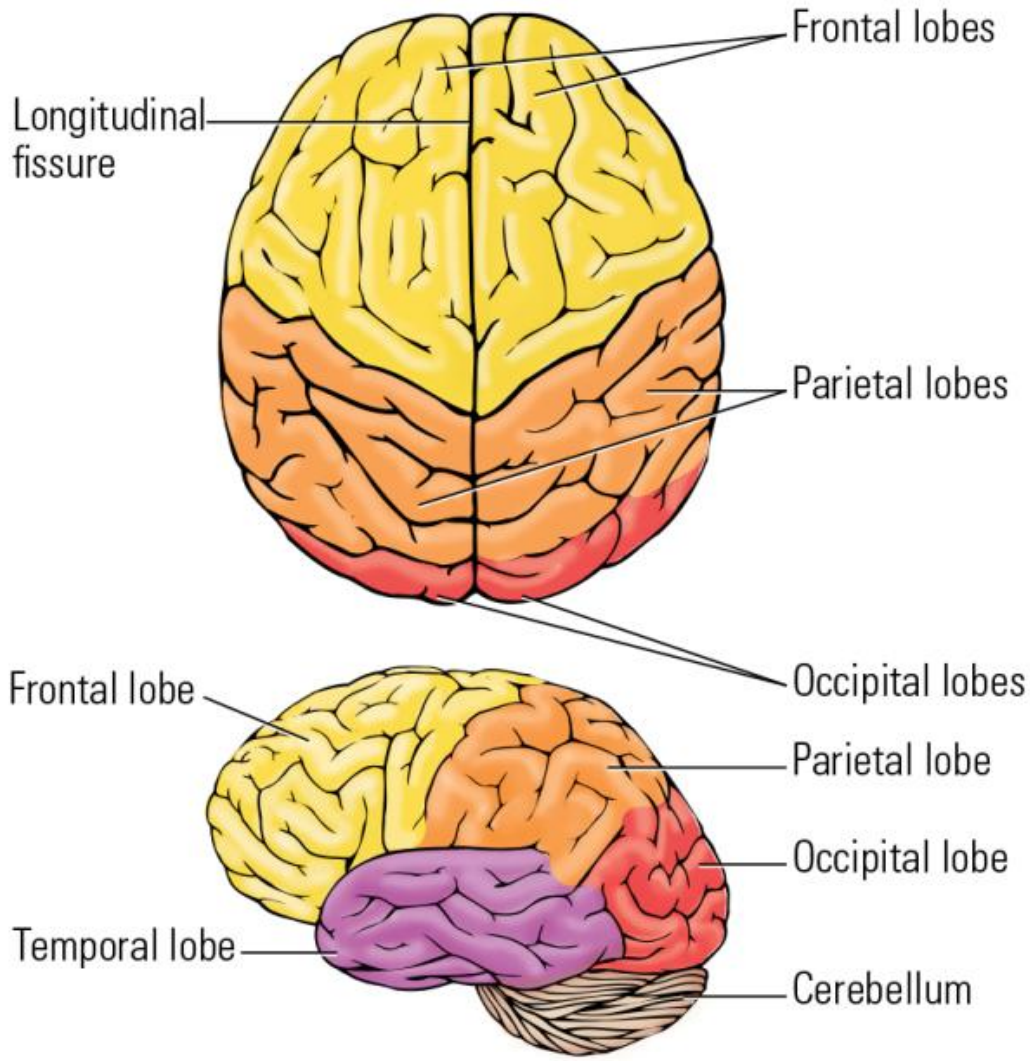
Surgery

Nervous System (61000-64999)



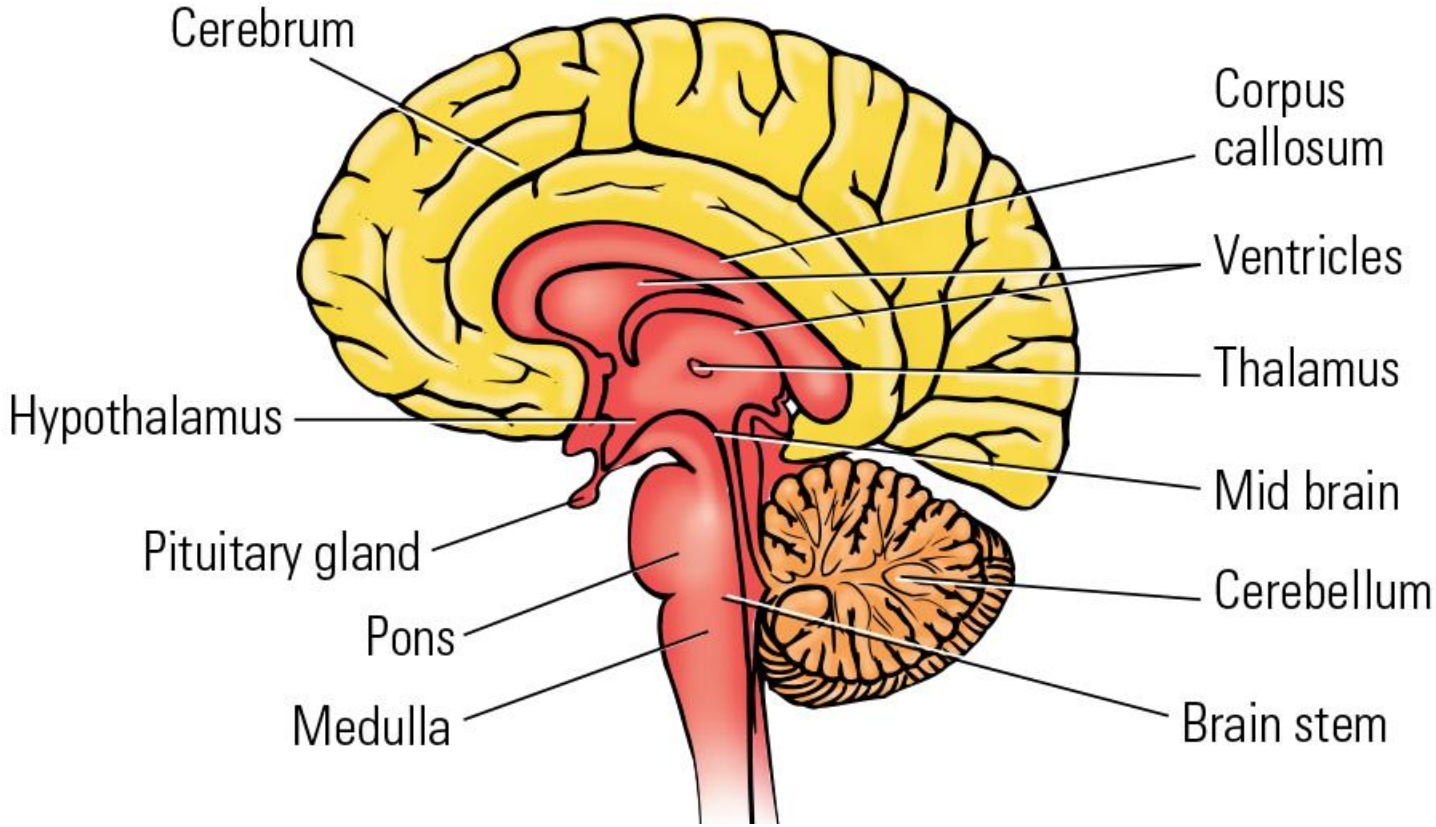
The following is a listing of headings and subheadings that appear within the Nervous System section of the CPT codebook. The subheadings or subsections denoted with asterisks (*) below have special instructions unique to that subsection. Where these are indicated, special notes or guidelines will be presented preceding those procedural terminology listings, referring to that subsection specifically. Note that all code ranges in each subsection are listed as they appear in the subsection, even if the code numbers are out of numerical sequence and/or repeated in the next subsection.

Skull, Meninges, and Brain (61000-62258)
- Injection, Drainage, or Aspiration (61000-61070)
- Twist Drill, Burr Hole(s), or Trephine (61105-61253)
- Craniectomy or Craniotomy (61304-61576)
- Surgery of Skull Base* (61580-61619)
  - **Approach Procedures (61580-61598)**
    - *Anterior Cranial Fossa (61580-61586)*
    - *Middle Cranial Fossa (61590-61592)*
    - *Posterior Cranial Fossa (61595-61598)*
  - **Definitive Procedures (61600-61616)**
    - *Base of Anterior Cranial Fossa (61600-61601)*
    - *Base of Middle Cranial Fossa (61605-61613)*
    - *Base of Posterior Cranial Fossa (61615-61616)*
  - **Repair and/or Reconstruction of Surgical Defects of Skull Base (61618-61619)**
- Endovascular Therapy (61623-61651)
- Surgery for Aneurysm, Arteriovenous Malformation, or Vascular Disease* (61680-61711)
- Stereotaxis (61715-61791)
- Stereotactic Radiosurgery (Cranial)* (61796-61800)
- Neurostimulators (Intracranial)* (61850-61892)
- Repair (62000-62148)
- Neuroendoscopy* (62160-62165)
- Cerebrospinal Fluid (CSF) Shunt (62180-62258)



Spine and Spinal Cord (62263-63746)
- Injection, Drainage, or Aspiration* (62263-62327)
- ▶Percutaneous Decompression of Neural Elements*◀ (62287-62331)
- Catheter Implantation (62350-62355)
- Reservoir/Pump Implantation (62360-62370)
- Endoscopic Decompression of Neural Elements and/or Excision of Herniated Intervertebral Discs* (62380)
- Posterior Extradural Laminotomy or Laminectomy for Exploration/Decompression of Neural Elements or Excision of Herniated Intervertebral Discs* (63001-63051)
- Transpedicular or Costovertebral Approach for Posterolateral Extradural Exploration/Decompression (63055-63066)
- Anterior or Anterolateral Approach for Extradural Exploration/Decompression* (63075-63091)
- Lateral Extracavitary Approach for Extradural Exploration/Decompression* (63101-63103)
- Incision (63170-63200)
- Excision by Laminectomy of Lesion Other Than Herniated Disc (63250-63295)
- Excision, Anterior or Anterolateral Approach, Intraspinal Lesion* (63300-63308)
- Stereotaxis (63600-63610)
- Stereotactic Radiosurgery (Spinal)* (63620-63621)
- Neurostimulators (Spinal)* (63650-63688)
- Repair (63700-63710)
- Shunt, Spinal CSF (63740-63746)

Extracranial Nerves, Peripheral Nerves, and Autonomic Nervous System (64400-64999)



- Introduction/Injection of Anesthetic Agent (Nerve Block), Diagnostic or Therapeutic (64400-64530)
  - Somatic Nerves* (64400-64489)
  - Paravertebral Spinal Nerves and Branches* (64490-64495)
  - Autonomic Nerves (64505-64530)
- Neurostimulators (Peripheral Nerve)* (64553-64659)
  - ►Autonomic Nervous System Modulation*◄ (64654-64659)
- Destruction by Neurolytic Agent (eg, Chemical, Thermal, Electrical or Radiofrequency), Chemodenervation* (64600-64681)
  - Somatic Nerves (64600-64647)
  - Sympathetic Nerves (64650-64681)
- Neuroplasty (Exploration, Neurolysis or Nerve Decompression)* (64702-64727)
- Transection or Avulsion (64732-64772)
- Excision (64774-64823)
  - Somatic Nerves (64774-64795)
  - Sympathetic Nerves (64802-64823)
- Neurorrhaphy (64831-64876)
- Neurorrhaphy With Nerve Graft, Vein Graft, or Conduit (64885-64913)
- Other Procedures (64999)

Nervous System

Brain Anatomy

Sagittal Section of Brain and Brain Stem

Nervous System

Skull, Meninges, and Brain

(For injection procedure for cerebral angiography, see 36100-36218)

(For injection procedure for ventriculography, see 61026, 61120)

(For injection procedure for pneumoencephalography, use 61055)

Injection, Drainage, or Aspiration

61000 Subdural tap through fontanelle, or suture, infant, unilateral or bilateral; initial
Clinical Examples in Radiology Fall 24:23
61001 subsequent taps
61020 Ventricular puncture through previous burr hole, fontanelle, suture, or implanted ventricular catheter/reservoir; without injection
61026 with injection of medication or other substance for diagnosis or treatment
CPT Changes: An Insider's View 2002
61050 Cisternal or lateral cervical (C1-C2) puncture; without injection (separate procedure)
61055 with injection of medication or other substance for diagnosis or treatment
CPT Changes: An Insider's View 2002, 2015
Clinical Examples in Radiology Fall 14:7, Fall 15:10

(Do not report 61055 in conjunction with 62302, 62303, 62304, 62305)

(For radiological supervision and interpretation by a different physician or qualified health care professional, see **Radiology**)

61070 Puncture of shunt tubing or reservoir for aspiration or injection procedure
Clinical Examples in Radiology Fall 24:23

(For radiological supervision and interpretation, use 75809)

Twist Drill, Burr Hole(s), or Trephine

61105 Twist drill hole for subdural or ventricular puncture
⦸ **61107** Twist drill hole(s) for subdural, intracerebral, or ventricular puncture; for implanting ventricular catheter, pressure recording device, or other intracerebral monitoring device
CPT Changes: An Insider's View 2007

(For intracranial neuroendoscopic ventricular catheter placement, use 62160)

61108 for evacuation and/or drainage of subdural hematoma
61120 Burr hole(s) for ventricular puncture (including injection of gas, contrast media, dye, or radioactive material)
61140 Burr hole(s) or trephine; with biopsy of brain or intracranial lesion
61150 with drainage of brain abscess or cyst
61151 with subsequent tapping (aspiration) of intracranial abscess or cyst
61154 Burr hole(s) with evacuation and/or drainage of hematoma, extradural or subdural

(For bilateral procedure, report 61154 with modifier 50)

61156 Burr hole(s); with aspiration of hematoma or cyst, intracerebral
61210 for implanting ventricular catheter, reservoir, EEG electrode(s), pressure recording device, or other cerebral monitoring device (separate procedure)
CPT Changes: An Insider's View 2007, 2008

(For intracranial neuroendoscopic ventricular catheter placement, use 62160)

61215 Insertion of subcutaneous reservoir, pump or continuous infusion system for connection to ventricular catheter
CPT Assistant Spring 93:13

(For refilling and maintenance of an implantable infusion pump for spinal or brain drug therapy, use 95990)

(For chemotherapy, use 96450)

61250 Burr hole(s) or trephine, supratentorial, exploratory, not followed by other surgery

(For bilateral procedure, report 61250 with modifier 50)

61253 Burr hole(s) or trephine, infratentorial, unilateral or bilateral
CPT Assistant Sep 02:10

(If burr hole[s] or trephine are followed by craniotomy at same operative session, use 61304-61321; do not use 61250 or 61253)

Craniectomy or Craniotomy

61304 Craniectomy or craniotomy, exploratory; supratentorial
61305 infratentorial (posterior fossa)
61312 Craniectomy or craniotomy for evacuation of hematoma, supratentorial; extradural or subdural
61313 intracerebral
61314 Craniectomy or craniotomy for evacuation of hematoma, infratentorial; extradural or subdural
61315 intracerebellar
+ 61316 Incision and subcutaneous placement of cranial bone graft (List separately in addition to code for primary procedure)
CPT Changes: An Insider's View 2003

(Use 61316 in conjunction with 61304, 61312, 61313, 61322, 61323, 61340, 61570, 61571, 61680-61705)
61320 Craniectomy or craniotomy, drainage of intracranial abscess; supratentorial
61321 infratentorial
61322 Craniectomy or craniotomy, decompressive, with or without duraplasty, for treatment of intracranial hypertension, without evacuation of associated intraparenchymal hematoma; without lobectomy
CPT Changes: An Insider's View 2003
CPT Assistant Aug 18:11, May 20:14

(Do not report 61313 in addition to 61322)

(For subtemporal decompression, use 61340)
61323 with lobectomy
CPT Changes: An Insider's View 2003

(Do not report 61313 in addition to 61323)

(For subtemporal decompression, use 61340)
61330 Decompression of orbit only, transcranial approach

(For bilateral procedure, report 61330 with modifier 50)
61333 Exploration of orbit (transcranial approach), with removal of lesion
61340 Subtemporal cranial decompression (pseudotumor cerebri, slit ventricle syndrome)
CPT Changes: An Insider's View 2003
CPT Assistant May 20:14

(For bilateral procedure, report 61340 with modifier 50)

(For decompressive craniotomy or craniectomy for intracranial hypertension, without hematoma evacuation, see 61322, 61323)
61343 Craniectomy, suboccipital with cervical laminectomy for decompression of medulla and spinal cord, with or without dural graft (eg, Arnold-Chiari malformation)
61345 Other cranial decompression, posterior fossa

(For orbital decompression by lateral wall approach, Kroenlein type, use 67445)
61450 Craniectomy, subtemporal, for section, compression, or decompression of sensory root of gasserian ganglion
61458 Craniectomy, suboccipital; for exploration or decompression of cranial nerves
61460 for section of 1 or more cranial nerves
61500 Craniectomy; with excision of tumor or other bone lesion of skull
CPT Assistant Jan 14:9
61501 for osteomyelitis
CPT Assistant Jan 14:9
61510 Craniectomy, trephination, bone flap craniotomy; for excision of brain tumor, supratentorial, except meningioma

61512 for excision of meningioma, supratentorial
61514 for excision of brain abscess, supratentorial
61516 for excision or fenestration of cyst, supratentorial

(For excision of pituitary tumor or craniopharyngioma, see 61545, 61546, 61548)

+ 61517 Implantation of brain intracavitary chemotherapy agent (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2003

(Use 61517 only in conjunction with 61510 or 61518)

(Do not report 61517 for brachytherapy insertion. For intracavitary insertion of radioelement sources or ribbons, see 77770, 77771, 77772)

61518 Craniectomy for excision of brain tumor, infratentorial or posterior fossa; except meningioma, cerebellopontine angle tumor, or midline tumor at base of skull
61519 meningioma
61520 cerebellopontine angle tumor
61521 midline tumor at base of skull
61522 Craniectomy, infratentorial or posterior fossa; for excision of brain abscess
61524 for excision or fenestration of cyst
61526 Craniectomy, bone flap craniotomy, transtemporal (mastoid) for excision of cerebellopontine angle tumor;

CPT Assistant Summer 91:8, Mar 18:11

61530 combined with middle/posterior fossa craniotomy/craniectomy
61531 Subdural implantation of strip electrodes through 1 or more burr or trephine hole(s) for long-term seizure monitoring

CPT Assistant Jul 19:11

(For stereotactic implantation of electrodes, use 61760)

(For craniotomy for excision of intracranial arteriovenous malformation, see 61680-61692)

61533 Craniotomy with elevation of bone flap; for subdural implantation of an electrode array, for long-term seizure monitoring

(For continuous EEG monitoring, see 95700-95726)

61534 for excision of epileptogenic focus without electrocorticography during surgery
61535 for removal of epidural or subdural electrode array, without excision of cerebral tissue (separate procedure)

CPT Assistant Jul 19:11

61536 for excision of cerebral epileptogenic focus, with electrocorticography during surgery (includes removal of electrode array)
61537 for lobectomy, temporal lobe, without electrocorticography during surgery

CPT Changes: An Insider's View 2004

61538 for lobectomy, temporal lobe, with electrocorticography during surgery

CPT Changes: An Insider's View 2004

61539 for lobectomy, other than temporal lobe, partial or total, with electrocorticography during surgery

CPT Changes: An Insider's View 2004

61540 for lobectomy, other than temporal lobe, partial or total, without electrocorticography during surgery

CPT Changes: An Insider's View 2004

61541 for transection of corpus callosum
61543 for partial or subtotal (functional) hemispherectomy

CPT Changes: An Insider's View 2004

61544 for excision or coagulation of choroid plexus
61545 for excision of craniopharyngioma

(For craniotomy for selective amygdalohippocampectomy, use 61566)

(For craniotomy for multiple subpial transections during surgery, use 61567)

61546 Craniotomy for hypophysectomy or excision of pituitary tumor, intracranial approach
61548 Hypophysectomy or excision of pituitary tumor, transnasal or transseptal approach, nonstereotactic

CPT Assistant Nov 98:17, Jul 11:13, Dec 19:12

(Do not report code 69990 in addition to code 61548)

61550 Craniectomy for craniosynostosis; single cranial suture

CPT Assistant Feb 12:11, Oct 22:18

61552 multiple cranial sutures

CPT Assistant Feb 12:11

(For cranial reconstruction for orbital hypertelorism, see 21260-21263)

(For reconstruction, see 21172-21180)

61556 Craniotomy for craniosynostosis; frontal or parietal bone flap
61557 bifrontal bone flap

CPT Assistant Feb 12:11

61558 Extensive craniectomy for multiple cranial suture craniosynostosis (eg, cloverleaf skull); not requiring bone grafts

CPT Assistant Feb 12:11

61559 recontouring with multiple osteotomies and bone autografts (eg, barrel-stave procedure) (includes obtaining grafts)

CPT Assistant Feb 12:11, Oct 22:18

(For reconstruction, see 21172-21180)

61563 Excision, intra and extracranial, benign tumor of cranial bone (eg, fibrous dysplasia); without optic nerve decompression
61564 with optic nerve decompression

(For reconstruction, see 21181-21183)

61566 Craniotomy with elevation of bone flap; for selective amygdalohippocampectomy

CPT Changes: An Insider's View 2004

61567 for multiple subpial transections, with electrocorticography during surgery

CPT Changes: An Insider's View 2004

61570 Craniectomy or craniotomy; with excision of foreign body from brain
61571 with treatment of penetrating wound of brain

(For sequestrectomy for osteomyelitis, use 61501)

61575 Transoral approach to skull base, brain stem or upper spinal cord for biopsy, decompression or excision of lesion;
61576 requiring splitting of tongue and/or mandible (including tracheostomy)

(For arthrodesis, use 22548)

Surgery of Skull Base

The surgical management of lesions involving the skull base (base of anterior, middle, and posterior cranial fossae) often requires the skills of several surgeons of different surgical specialties working together or in tandem during the operative session. These operations are usually not staged because of the need for definitive closure of dura, subcutaneous tissues, and skin to avoid serious infections such as osteomyelitis and/or meningitis.

The procedures are categorized according to:

(1) ***approach procedure*** necessary to obtain adequate exposure to the lesion (pathologic entity), (2) ***definitive procedure(s)*** necessary to biopsy, excise or otherwise treat the lesion, and (3) ***repair/reconstruction*** of the defect present following the definitive procedure(s).

The ***approach procedure*** is described according to anatomical area involved, ie, anterior cranial fossa, middle cranial fossa, posterior cranial fossa, and brain stem or upper spinal cord.

The ***definitive procedure(s)*** describes the repair, biopsy, resection, or excision of various lesions of the skull base and, when appropriate, primary closure of the dura, mucous membranes, and skin.

The ***repair/reconstruction procedure(s)*** is reported separately if extensive dural grafting, cranioplasty, local or regional myocutaneous pedicle flaps, or extensive skin grafts are required.

For primary closure, see the appropriate codes (ie, 15730, 15733, 15756, 15757, 15758).

When one surgeon performs the approach procedure, another surgeon performs the definitive procedure, and another surgeon performs the repair/reconstruction procedure, each surgeon reports only the code for the specific procedure performed.

If one surgeon performs more than one procedure (ie, approach procedure and definitive procedure), then both codes are reported, adding modifier 51 to the secondary, additional procedure(s).

Approach Procedures

Anterior Cranial Fossa

61580 Craniofacial approach to anterior cranial fossa; extradural, including lateral rhinotomy, ethmoidectomy, sphenoidectomy, without maxillectomy or orbital exenteration
- *CPT Assistant* Winter 93:17, Spring 94:11

61581 extradural, including lateral rhinotomy, orbital exenteration, ethmoidectomy, sphenoidectomy and/or maxillectomy
- *CPT Assistant* Winter 93:17, Spring 94:11

61582 extradural, including unilateral or bifrontal craniotomy, elevation of frontal lobe(s), osteotomy of base of anterior cranial fossa
- *CPT Assistant* Winter 93:17, Spring 94:11

61583 intradural, including unilateral or bifrontal craniotomy, elevation or resection of frontal lobe, osteotomy of base of anterior cranial fossa
- *CPT Assistant* Winter 93:17, Spring 94:11, Dec 17:13

61584 Orbitocranial approach to anterior cranial fossa, extradural, including supraorbital ridge osteotomy and elevation of frontal and/or temporal lobe(s); without orbital exenteration
- *CPT Assistant* Winter 93:18

61585 with orbital exenteration
- *CPT Assistant* Winter 93:18

61586 Bicoronal, transzygomatic and/or LeFort I osteotomy approach to anterior cranial fossa with or without internal fixation, without bone graft
- *CPT Assistant* Winter 93:18, Nov 96:12

Middle Cranial Fossa

61590 Infratemporal pre-auricular approach to middle cranial fossa (parapharyngeal space, infratemporal and midline skull base, nasopharynx), with or without disarticulation of the mandible, including parotidectomy, craniotomy, decompression and/or mobilization of the facial nerve and/or petrous carotid artery
- *CPT Assistant* Winter 93:18, Apr 20:10

61591 Infratemporal post-auricular approach to middle cranial fossa (internal auditory meatus, petrous apex, tentorium, cavernous sinus, parasellar area, infratemporal fossa) including mastoidectomy, resection of sigmoid sinus, with or without decompression and/or mobilization of contents of auditory canal or petrous carotid artery

CPT Assistant Winter 93:18

61592 Orbitocranial zygomatic approach to middle cranial fossa (cavernous sinus and carotid artery, clivus, basilar artery or petrous apex) including osteotomy of zygoma, craniotomy, extra- or intradural elevation of temporal lobe

CPT Assistant Winter 93:18

Posterior Cranial Fossa

61595 Transtemporal approach to posterior cranial fossa, jugular foramen or midline skull base, including mastoidectomy, decompression of sigmoid sinus and/or facial nerve, with or without mobilization

CPT Assistant Winter 93:18, Mar 18:11

61596 Transcochlear approach to posterior cranial fossa, jugular foramen or midline skull base, including labyrinthectomy, decompression, with or without mobilization of facial nerve and/or petrous carotid artery

CPT Assistant Winter 93:18

61597 Transcondylar (far lateral) approach to posterior cranial fossa, jugular foramen or midline skull base, including occipital condylectomy, mastoidectomy, resection of C1-C3 vertebral body(s), decompression of vertebral artery, with or without mobilization

CPT Assistant Winter 93:18

61598 Transpetrosal approach to posterior cranial fossa, clivus or foramen magnum, including ligation of superior petrosal sinus and/or sigmoid sinus

CPT Assistant Winter 93:18

Definitive Procedures

Base of Anterior Cranial Fossa

61600 Resection or excision of neoplastic, vascular or infectious lesion of base of anterior cranial fossa; extradural

CPT Assistant Winter 93:19, Spring 94:12, Nov 96:12

61601 intradural, including dural repair, with or without graft

CPT Assistant Winter 93:19, Spring 94:12

Base of Middle Cranial Fossa

61605 Resection or excision of neoplastic, vascular or infectious lesion of infratemporal fossa, parapharyngeal space, petrous apex; extradural

CPT Assistant Winter 93:19, Apr 20:10, Aug 21:15

61606 intradural, including dural repair, with or without graft

CPT Assistant Winter 93:20

61607 Resection or excision of neoplastic, vascular or infectious lesion of parasellar area, cavernous sinus, clivus or midline skull base; extradural

CPT Assistant Winter 93:20

61608 intradural, including dural repair, with or without graft

CPT Assistant Winter 93:20

Code 61611 is reported in addition to code(s) for primary procedure(s) 61605-61608. Report only one transection or ligation of carotid artery code per operative session.

+ 61611 Transection or ligation, carotid artery in petrous canal; without repair (List separately in addition to code for primary procedure)

CPT Assistant Winter 93:20

61613 Obliteration of carotid aneurysm, arteriovenous malformation, or carotid-cavernous fistula by dissection within cavernous sinus

CPT Assistant Winter 93:20

Base of Posterior Cranial Fossa

61615 Resection or excision of neoplastic, vascular or infectious lesion of base of posterior cranial fossa, jugular foramen, foramen magnum, or C1-C3 vertebral bodies; extradural

CPT Assistant Winter 93:20, Aug 21:15

61616 intradural, including dural repair, with or without graft

CPT Assistant Mar 18:11

Repair and/or Reconstruction of Surgical Defects of Skull Base

61618 Secondary repair of dura for cerebrospinal fluid leak, anterior, middle or posterior cranial fossa following surgery of the skull base; by free tissue graft (eg, pericranium, fascia, tensor fascia lata, adipose tissue, homologous or synthetic grafts)

CPT Assistant Winter 93:20, Spring 94:19, Mar 00:11

61619 by local or regionalized vascularized pedicle flap or myocutaneous flap (including galea, temporalis, frontalis or occipitalis muscle)

CPT Assistant Winter 93:20, Spring 94:19, Mar 00:11

Endovascular Therapy

61623 Endovascular temporary balloon arterial occlusion, head or neck (extracranial/intracranial) including selective catheterization of vessel to be occluded, positioning and inflation of occlusion balloon, concomitant neurological monitoring, and radiologic supervision and interpretation of all angiography required for balloon occlusion and to exclude vascular injury post occlusion

CPT Changes: An Insider's View 2003

(If selective catheterization and angiography of arteries other than artery to be occluded is performed, use appropriate catheterization and radiologic supervision and interpretation codes)

(If complete diagnostic angiography of the artery to be occluded is performed immediately prior to temporary occlusion, use appropriate radiologic supervision and interpretation codes only)

►Codes 61624, 61626 describe permanent transcatheter vascular occlusion or embolization procedures, excluding non-central nervous system and non-head or neck embolization, which is reported using 37241, 37242, 37243, 37244. Codes 61624, 61626 include all associated radiological supervision and interpretation, intra-procedural guidance and roadmapping, and imaging necessary to document completion of the procedure. These codes do not always include diagnostic angiography and all necessary catheter placement(s). Code(s) for catheter placement(s) may be separately reported using selective catheter placement code(s), if used consistent with guidelines. Code(s) for diagnostic angiography may also be separately reported, when performed according to guidelines for diagnostic angiography during endovascular procedures, using the appropriate diagnostic angiography codes. Report these services with an appropriate modifier (eg, modifier 59). See the guidelines on the reporting of diagnostic angiography preceding 75600 in the Vascular Procedures, Aorta and Arteries subsection.

Code 61624 is used to report endovascular embolization or occlusion procedures performed in the intracranial or spinal cord central nervous system. Examples include embolization for tumor destruction, to achieve hemostasis, and to occlude an intracranial aneurysm or vascular malformation. Code 61626 is used to report vascular embolization or occlusion performed in the extracranial non-central nervous system branches of the head or neck. Examples include embolization for epistaxis and arterial trauma to the neck.

Code 61624 is used to report embolization of an aneurysm, pseudoaneurysm, or vascular extravasation and includes all intra-aneurysmal or endoluminal devices (eg, balloons, stents, guide catheters, etc). Therefore, when embolization is the primary surgical goal, 61624 is reported and not the intracranial stent code. However, if a stent is deployed as the sole management of an aneurysm, pseudoaneurysm, or vascular extravasation, the stent deployment code (61635) should be reported and not the embolization code.

Only one embolization code should be reported for each surgical field (ie, the area immediately surrounding and directly involved in a treatment/procedure). Embolization procedures performed at a single setting and including multiple surgical fields (eg, a patient with multiple trauma and both intracranial and extracranial bleeding) may be reported with multiple embolization codes with the appropriate modifier (eg, modifier 59).◄

▲ **61624** Transcatheter permanent occlusion or embolization (eg, for tumor destruction, to achieve hemostasis, to occlude a vascular malformation), including all radiological supervision and interpretation, intraprocedural roadmapping, and imaging guidance necessary to complete the intervention, percutaneous, any method; central nervous system (intracranial, spinal cord)

✚ **61642** each additional vessel in different vascular territory (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2006, 2019
CPT Assistant May 14:10
Clinical Examples in Radiology Winter 06:16

(Use 61641 and 61642 in conjunction with 61640)

(61640, 61641, 61642 include all selective vascular catheterization of the target vessel, contrast injection[s], vessel measurement, roadmapping, postdilatation angiography, and fluoroscopic guidance for the balloon dilatation)

(Do not report 61640, 61642 in conjunction with 61650 or 61651 for the same vascular territory)

(For definition of vascular territory, see the Nervous System Endovascular Therapy guidelines)

Codes 61645, 61650, 61651 describe cerebral endovascular therapeutic interventions in any intracranial artery. They include selective catheterization, diagnostic angiography, and all subsequent angiography including associated radiological supervision and interpretation within the treated vascular territory, fluoroscopic guidance, neurologic and hemodynamic monitoring of the patient, and closure of the arteriotomy by manual pressure, an arterial closure device, or suture.

For purposes of reporting services described by 61645, 61650, 61651, the intracranial arteries are divided into three vascular territories: 1) right carotid circulation; 2) left carotid circulation; 3) vertebro-basilar circulation. Code 61645 may be reported once for each intracranial vascular territory treated. Code 61650 is reported once for the first intracranial vascular territory treated with intra-arterial prolonged administration of pharmacologic agent(s). If additional intracranial vascular territory(ies) is also treated with intra-arterial prolonged administration of pharmacologic agent(s) during the same session, the treatment of each additional vascular territory(ies) is reported using 61651 (may be reported maximally two times per day).

Code 61645 describes endovascular revascularization of thrombotic/embolic occlusion of intracranial arterial vessel(s) via any method, including mechanical thrombectomy (eg, mechanical retrieval device, aspiration catheter) and/or the administration of any agent(s) for the purpose of revascularization, such as thrombolytics or IIB/IIIA inhibitors.

Codes 61650, 61651 describe the cerebral endovascular continuous or intermittent therapeutic prolonged administration of any non-thrombolytic agent(s) (eg, spasmolytics or chemotherapy) into an artery to treat non-iatrogenic central nervous system diseases or sequelae thereof. These codes should not be used to report administration of agents (eg, heparin, nitroglycerin, saline) usually administered during endovascular interventions. These codes are used for prolonged administrations, ie, of at least 10 minutes continuous or intermittent duration.

Do not report 61645, 61650, or 61651 in conjunction with 36221, 36226, 36228, 37184, or 37186 for the treated vascular territory. Do not report 61645 in conjunction with 61650 or 61651 for the same vascular distribution. Diagnostic angiography of a non-treated vascular territory may be reported separately. For example, angiography of the left carotid and/or the vertebral circulations may be reported if the intervention is performed in the right carotid circulation.

61645 Percutaneous arterial transluminal mechanical thrombectomy and/or infusion for thrombolysis, intracranial, any method, including diagnostic angiography, fluoroscopic guidance, catheter placement, and intraprocedural pharmacological thrombolytic injection(s)

- *Clinical Examples in Radiology* Spring 16:3

(Use 61651 in conjunction with 61650)

(Do not report 61650 or 61651 in conjunction with 36221, 36222, 36223, 36224, 36225, 36226, 61640, 61641, 61642, 61645 for the same vascular territory)

(Do not report 61650 or 61651 in conjunction with 96420, 96422, 96423, 96425 for the same vascular territory)

Surgery for Aneurysm, Arteriovenous Malformation, or Vascular Disease

Includes craniotomy when appropriate for procedure.

61680 Surgery of intracranial arteriovenous malformation; supratentorial, simple

61682 supratentorial, complex

CPT Assistant Jun 13:14

61684 infratentorial, simple

61686 infratentorial, complex

CPT Assistant Jun 13:14

61690 dural, simple

61692 dural, complex

CPT Assistant Jun 13:14

61697 Surgery of complex intracranial aneurysm, intracranial approach; carotid circulation

CPT Changes: An Insider's View 2001

CPT Assistant Dec 17:13

61698 vertebrobasilar circulation

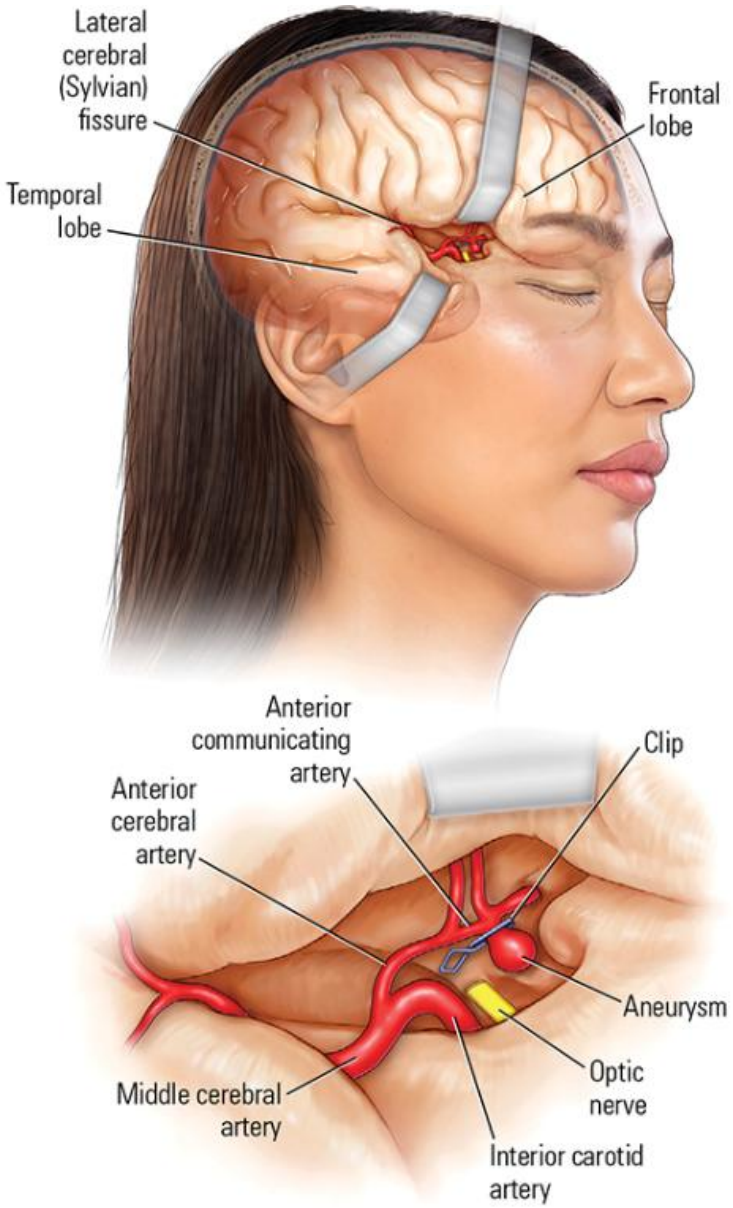
CPT Changes: An Insider's View 2001

(61697, 61698 involve aneurysms that are larger than 15 mm or with calcification of the aneurysm neck, or with incorporation of normal vessels into the aneurysm neck, or a procedure requiring temporary vessel occlusion, trapping, or cardiopulmonary bypass to successfully treat the aneurysm)

61700 Surgery of simple intracranial aneurysm, intracranial approach; carotid circulation

CPT Changes: An Insider's View 2001

CPT Assistant Jun 99:11, Jul 99:10, Dec 17:13



61702 vertebrobasilar circulation

CPT Changes: An Insider's View 2001

Intracranial Aneurysm, Intracranial Approach

61700

Placement of ligating clip across the neck of an intracranial aneurysm

61703 Surgery of intracranial aneurysm, cervical approach by application of occluding clamp to cervical carotid artery (Selverstone-Crutchfield type)

(For cervical approach for direct ligation of carotid artery, see 37600-37606)

61705 Surgery of aneurysm, vascular malformation or carotid-cavernous fistula; by intracranial and cervical occlusion of carotid artery

►(For percutaneous transcatheter approach, see 61624, 61626)◄

61708 by intracranial electrothrombosis

(For ligation or gradual occlusion of internal/common carotid artery, see 37605, 37606)

►(For percutaneous transcatheter approach, use 61624)◄

61710 by intra-arterial embolization, injection procedure, or balloon catheter

CPT Assistant Nov 13:6

►(For percutaneous transcatheter approach, see 61624, 61626)◄

61711 Anastomosis, arterial, extracranial-intracranial (eg, middle cerebral/cortical) arteries

(For carotid or vertebral thromboendarterectomy, use 35301)

(Use 69990 when the surgical microscope is employed for the microsurgical procedure. Do not use 69990 for visualization with magnifying loupes or corrected vision)

Stereotaxis

61715 Magnetic resonance image guided high intensity focused ultrasound (MRgFUS), stereotactic ablation of target, intracranial, including stereotactic navigation and frame placement, when performed
- *CPT Changes: An Insider's View* 2025

(Do not report 61715 in conjunction with 61781, 61800)

(Do not report 61715 in conjunction with 70540, 70542, 70543, 70544, 70545, 70546, 70551, 70552, 70553, when performed in the same session)

61720 Creation of lesion by stereotactic method, including burr hole(s) and localizing and recording techniques, single or multiple stages; globus pallidus or thalamus
- *CPT Assistant* Jul 11:12, Jul 14:9

61735 subcortical structure(s) other than globus pallidus or thalamus
- *CPT Assistant* Jul 11:12

61736 Laser interstitial thermal therapy (LITT) of lesion, intracranial, including burr hole(s), with magnetic resonance imaging guidance, when performed; single trajectory for 1 simple lesion
- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Dec 21:22

(Do not report 61736 in conjunction with 20660, 61737, 61781, 70551, 70552, 70553, 70557, 70558, 70559, 77021, 77022)

61737 multiple trajectories for multiple or complex lesion(s)
- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Dec 21:22

(Do not report 61737 in conjunction with 20660, 61736, 61781, 70551, 70552, 70553, 70557, 70558, 70559, 77021, 77022)

61750 Stereotactic biopsy, aspiration, or excision, including burr hole(s), for intracranial lesion;
- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:30

61751 with computed tomography and/or magnetic resonance guidance
- *CPT Changes: An Insider's View* 2000, 2003
- *CPT Assistant* Jun 96:10, Nov 99:30, Dec 04:20, Jul 11:12

(For radiological supervision and interpretation of computerized tomography, see 70450, 70460, or 70470 as appropriate)

(For radiological supervision and interpretation of magnetic resonance imaging, see 70551, 70552, or 70553 as appropriate)

61760 Stereotactic implantation of depth electrodes into the cerebrum for long-term seizure monitoring
- *CPT Assistant* Jul 11:12

61770 Stereotactic localization, including burr hole(s), with insertion of catheter(s) or probe(s) for placement of radiation source
- *CPT Changes: An Insider's View* 2001
- *CPT Assistant* Jul 11:12

+61781 Stereotactic computer-assisted (navigational) procedure; cranial, intradural (List separately in addition to code for primary procedure)
- *CPT Changes: An Insider's View* 2011

(Do not report 61781 in conjunction with 61720-61791, 61796-61799, 61863-61868, 62201, 77371-77373, 77432)

+61782 cranial, extradural (List separately in addition to code for primary procedure)
- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Jul 11:12

(Do not report 61781, 61782 by the same individual during the same surgical session)

+61783 spinal (List separately in addition to code for primary procedure)
- *CPT Changes: An Insider's View* 2011
- *CPT Assistant* Jul 11:12

(Do not report 61783 in conjunction with 63620, 63621)

61790 Creation of lesion by stereotactic method, percutaneous, by neurolytic agent (eg, alcohol, thermal, electrical, radiofrequency); gasserian ganglion
- *CPT Assistant* Jul 11:12

61791 trigeminal medullary tract
- *CPT Assistant* Jul 11:12, Jul 14:9

Stereotactic Radiosurgery (Cranial)

Cranial stereotactic radiosurgery is a distinct procedure that utilizes externally generated ionizing radiation to inactivate or eradicate defined target(s) in the head without the need to make an incision. The target is defined by and the treatment is delivered using high-resolution stereotactic imaging. Stereotactic radiosurgery codes and headframe application procedures are reported by the neurosurgeon. The radiation oncologist reports the appropriate code(s) for clinical treatment planning, physics and dosimetry, treatment delivery, and management from the **Radiation Oncology** section (77261-77790). Any necessary planning, dosimetry, targeting, positioning, or blocking by the neurosurgeon is included in the stereotactic radiation surgery services. The same individual should not report stereotactic radiosurgery services with radiation treatment management codes (77427-77435).

Cranial stereotactic radiosurgery is typically performed in a single planning and treatment session, using a rigidly attached stereotactic guiding device, other immobilization technology and/or a stereotactic image-guidance system, but can be performed with more than one planning session and in a limited number of treatment sessions, up to a maximum of five sessions. Do not report stereotactic radiosurgery more than once per lesion per course of treatment when the treatment requires more than one session.

Codes 61796 and 61797 involve stereotactic radiosurgery for simple cranial lesions. Simple cranial lesions are lesions less than 3.5 cm in maximum dimension that do not meet the definition of a complex lesion provided below. Report code 61796 when all lesions are simple.

Codes 61798 and 61799 involve stereotactic radiosurgery for complex cranial lesions and procedures that create therapeutic lesions (eg, thalamotomy or pallidotomy). All lesions 3.5 cm in maximum dimension or greater are complex. When performing therapeutic lesion creation procedures, report code 61798 only once regardless of the number of lesions created. Schwannomas, arterio-venous malformations, pituitary tumors, glomus tumors, pineal region tumors and cavernous sinus/parasellar/petroclival tumors are complex. Any lesion that is adjacent (5 mm or less) to the optic nerve/optic chasm/optic tract or within the brainstem is complex. If treating multiple lesions, and any single lesion treated is complex, use 61798.

Do not report codes 61796-61800 in conjunction with code 20660.

Codes 61796-61799 include computer-assisted planning. Do not report codes 61796-61799 in conjunction with 61781-61783.

►(For intensity modulated beam delivery plan, use 77301. For stereotactic body radiation therapy, see 77373, 77435)◄

61796 Stereotactic radiosurgery (particle beam, gamma ray, or linear accelerator); 1 simple cranial lesion

CPT Changes: An Insider's View 2009

CPT Assistant Jul 11:12, Apr 12:11, Jul 14:9, Jun 15:6

(Do not report 61796 more than once per course of treatment)

(Do not report 61796 in conjunction with 61798)

+ 61797 each additional cranial lesion, simple (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2009

CPT Assistant Jul 11:12, Apr 12:11, Jun 15:6

(Use 61797 in conjunction with 61796, 61798)

(For each course of treatment, 61797 and 61799 may be reported no more than once per lesion. Do not report any combination of 61797 and 61799 more than 4 times for entire course of treatment regardless of number of lesions treated)

61798 1 complex cranial lesion

CPT Changes: An Insider's View 2009
CPT Assistant Jul 11:12, Apr 12:11, Jun 15:6

(Do not report 61798 more than once per course of treatment)

(Do not report 61798 in conjunction with 61796)

+ 61799 each additional cranial lesion, complex (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2009
CPT Assistant Jul 11:12, Apr 12:11, Jul 14:9, Jun 15:6

(Use 61799 in conjunction with 61798)

(For each course of treatment, 61797 and 61799 may be reported no more than once per lesion. Do not report any combination of 61797 and 61799 more than 4 times for entire course of treatment regardless of number of lesions treated)

+ 61800 Application of stereotactic headframe for stereotactic radiosurgery (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2009
CPT Assistant Apr 12:11, Jun 15:6

(Use 61800 in conjunction with 61796, 61798)

Neurostimulators (Intracranial)

For electronic analysis with programming, when performed, of cranial nerve and brain neurostimulator pulse generator/transmitters, see codes 95970, 95976, 95977, 95983, 95984. Test stimulation to confirm correct target site placement of the electrode array(s) and/or to confirm the functional status of the system is inherent to placement and is not separately reported as electronic analysis or programming of the neurostimulator system. Electronic analysis (95970) at the time of implantation is not separately reported.

Microelectrode recording, when performed by the operating surgeon in association with implantation of neurostimulator electrode arrays, is an inclusive service and should not be reported separately. If another individual participates in neurophysiological mapping during a deep brain stimulator implantation procedure, this service may be reported by the second individual with codes 95961-95962.

61850 Twist drill or burr hole(s) for implantation of neurostimulator electrodes, cortical

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Sep 99:5, Nov 99:30

61860 Craniectomy or craniotomy for implantation of neurostimulator electrodes, cerebral, cortical

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Sep 99:5, Nov 99:30

61863 Twist drill, burr hole, craniotomy, or craniectomy with stereotactic implantation of neurostimulator electrode array in subcortical site (eg, thalamus, globus pallidus, subthalamic nucleus, periventricular, periaqueductal gray), without use of intraoperative microelectrode recording; first array

- *CPT Changes: An Insider's View* 2004
- *CPT Assistant* Sep 99:5, Oct 10:10, Jul 11:12, Jul 14:9, Oct 23:24

+ 61864 each additional array (List separately in addition to primary procedure)

- *CPT Changes: An Insider's View* 2004
- *CPT Assistant* Sep 99:5, Jul 11:12

(Use 61864 in conjunction with 61863)

61867 Twist drill, burr hole, craniotomy, or craniectomy with stereotactic implantation of neurostimulator electrode array in subcortical site (eg, thalamus, globus pallidus, subthalamic nucleus, periventricular, periaqueductal gray), with use of intraoperative microelectrode recording; first array

- *CPT Changes: An Insider's View* 2004
- *CPT Assistant* Jul 11:12

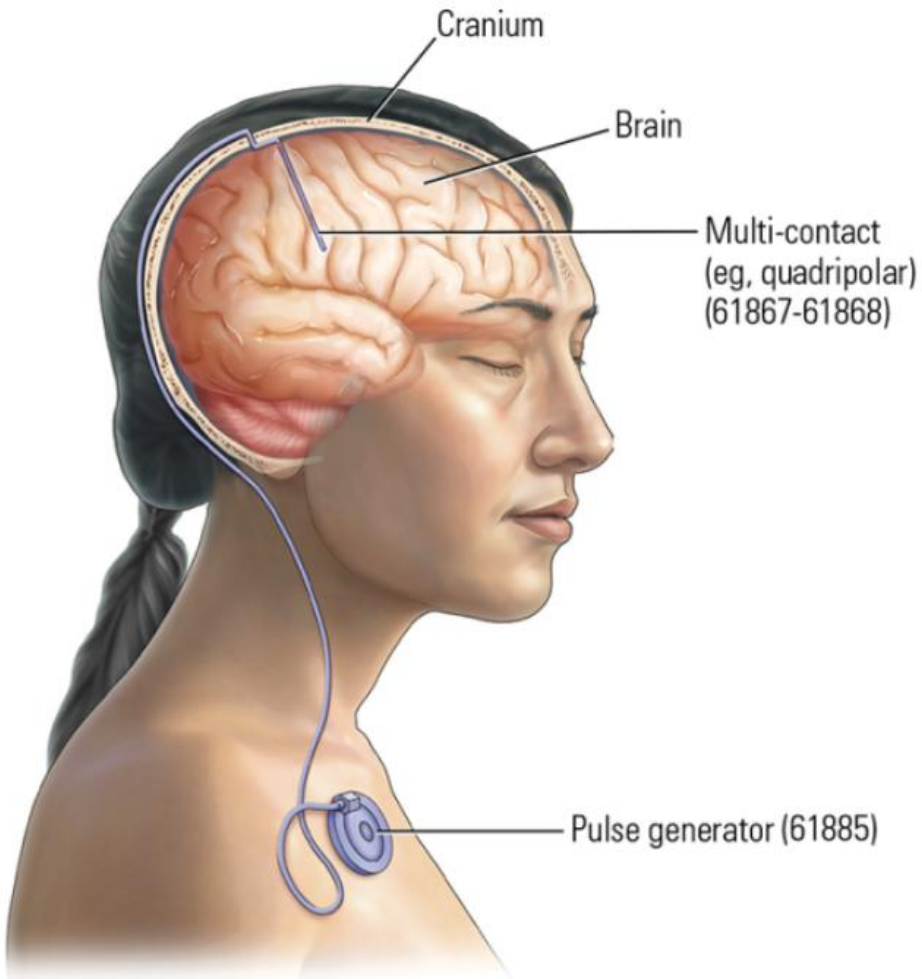
- *CPT Assistant* Jul 11:12, Jul 14:9

(Use 61868 in conjunction with 61867)

61880 Revision or removal of intracranial neurostimulator electrodes



61885 Insertion or replacement of cranial neurostimulator pulse generator or receiver, direct or inductive coupling; with connection to a single electrode array

- *CPT Changes: An Insider's View* 2000, 2005
- *CPT Assistant* Sep 99:5, Nov 99:30, Jun 00:3, Apr 01:8, Sep 03:3, Dec 10:14, Feb 11:5, Sep 11:8, Jul 21:10, Oct 24:1

Placement of Cranial Neurostimulator

61867-61868, 61885

Placement of subcortical (eg, thalamic) neurostimulator electrode via burr hole (61867-61868) with connection of the electrode to an implanted programmable pulse generator (61885) in the infraclavicular area

61886 with connection to 2 or more electrode arrays

CPT Changes: An Insider's View 2000

CPT Assistant Nov 99:30, Jun 00:3, Apr 01:8, Feb 11:5, Sep 11:8, Jul 21:10, Oct 24:1

(For percutaneous placement of cranial nerve (eg, vagus, trigeminal) neurostimulator electrode(s), use 64553)

(For revision or removal of cranial nerve (eg, vagus, trigeminal) neurostimulator electrode array, use 64569)

61888 Revision or removal of cranial neurostimulator pulse generator or receiver

CPT Assistant Sep 11:8, Mar 22:7, Oct 24:1

(Do not report 61888 in conjunction with 61885 or 61886 for the same pulse generator)

61889 Insertion of skull-mounted cranial neurostimulator pulse generator or receiver, including craniectomy or craniotomy, when performed, with direct or inductive coupling, with connection to depth and/or cortical strip electrode array(s)

CPT Changes: An Insider's View 2024

CPT Assistant Dec 23:1, Oct 24:1

(For insertion of cranial neurostimulator pulse generator or receiver other than skull mounted, see 61885, 61886)

61891 Revision or replacement of skull-mounted cranial neurostimulator pulse generator or receiver with connection to depth and/or cortical strip electrode array(s)

CPT Changes: An Insider's View 2024

CPT Assistant Dec 23:1, Oct 24:1

(For replacement of cranial neurostimulator pulse generator or receiver other than skull mounted, see 61885, 61886)

(For revision of cranial neurostimulator pulse generator or receiver other than skull mounted, use 61888)

61892 Removal of skull-mounted cranial neurostimulator pulse generator or receiver with cranioplasty, when performed

CPT Changes: An Insider's View 2024

CPT Assistant Dec 23:1, Oct 24:1

(Do not report 61892 in conjunction with 61891 for the same pulse generator)

(For removal of cranial neurostimulator pulse generator or receiver other than skull mounted, use 61888)

Repair

62000 Elevation of depressed skull fracture; simple, extradural

62005 compound or comminuted, extradural

62010 with repair of dura and/or debridement of brain

62100 Craniotomy for repair of dural/cerebrospinal fluid leak, including surgery for rhinorrhea/otorrhea

CPT Changes: An Insider's View 2002

(For repair of spinal dural/CSF leak, see 63707, 63709)

62115 Reduction of craniomegalic skull (eg, treated hydrocephalus); not requiring bone grafts or cranioplasty

62117 requiring craniotomy and reconstruction with or without bone graft (includes obtaining grafts)

62120 Repair of encephalocele, skull vault, including cranioplasty

62121 Craniotomy for repair of encephalocele, skull base

62140 Cranioplasty for skull defect; up to 5 cm diameter

CPT Assistant Jan 14:9

62141 larger than 5 cm diameter

CPT Assistant Jan 14:9

62142 Removal of bone flap or prosthetic plate of skull

CPT Assistant Jan 14:9

62143 Replacement of bone flap or prosthetic plate of skull

CPT Assistant Jan 14:9

62145 Cranioplasty for skull defect with reparative brain surgery

CPT Assistant Jan 14:9

62146 Cranioplasty with autograft (includes obtaining bone grafts); up to 5 cm diameter

CPT Assistant Jan 14:9

62147 larger than 5 cm diameter

CPT Assistant Jan 14:9

+ 62148 Incision and retrieval of subcutaneous cranial bone graft for cranioplasty (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2003

(Use 62148 in conjunction with 62140-62147)

Neuroendoscopy

Surgical endoscopy always includes diagnostic endoscopy.

+ 62160 Neuroendoscopy, intracranial, for placement or replacement of ventricular catheter and attachment to shunt system or external drainage (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Jun 07:11, Dec 12:14

(Use 62160 only in conjunction with 61107, 61210, 62220-62230, 62258)

62161 Neuroendoscopy, intracranial; with dissection of adhesions, fenestration of septum pellucidum or intraventricular cysts (including placement, replacement, or removal of ventricular catheter)

- *CPT Changes: An Insider's View* 2003

62162 with fenestration or excision of colloid cyst, including placement of external ventricular catheter for drainage

- *CPT Changes: An Insider's View* 2003

62164 with excision of brain tumor, including placement of external ventricular catheter for drainage

- *CPT Changes: An Insider's View* 2003

62165 with excision of pituitary tumor, transnasal or trans-sphenoidal approach

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Dec 17:14, Dec 19:12, Jul 22:18

Cerebrospinal Fluid (CSF) Shunt

62180 Ventriculocisternostomy (Torkildsen type operation)

62190 Creation of shunt; subarachnoid/subdural-atrial, -jugular, -auricular

62192 subarachnoid/subdural-peritoneal, -pleural, other terminus

62194 Replacement or irrigation, subarachnoid/subdural catheter

- *CPT Assistant* Dec 11:6

62200 Ventriculocisternostomy, third ventricle;

- *CPT Changes: An Insider's View* 2003

62201 stereotactic, neuroendoscopic method

- *CPT Changes: An Insider's View* 2003
- *CPT Assistant* Aug 07:15, Jul 11:12, Jul 14:9

(For intracranial neuroendoscopic procedures, see 62161-62165)

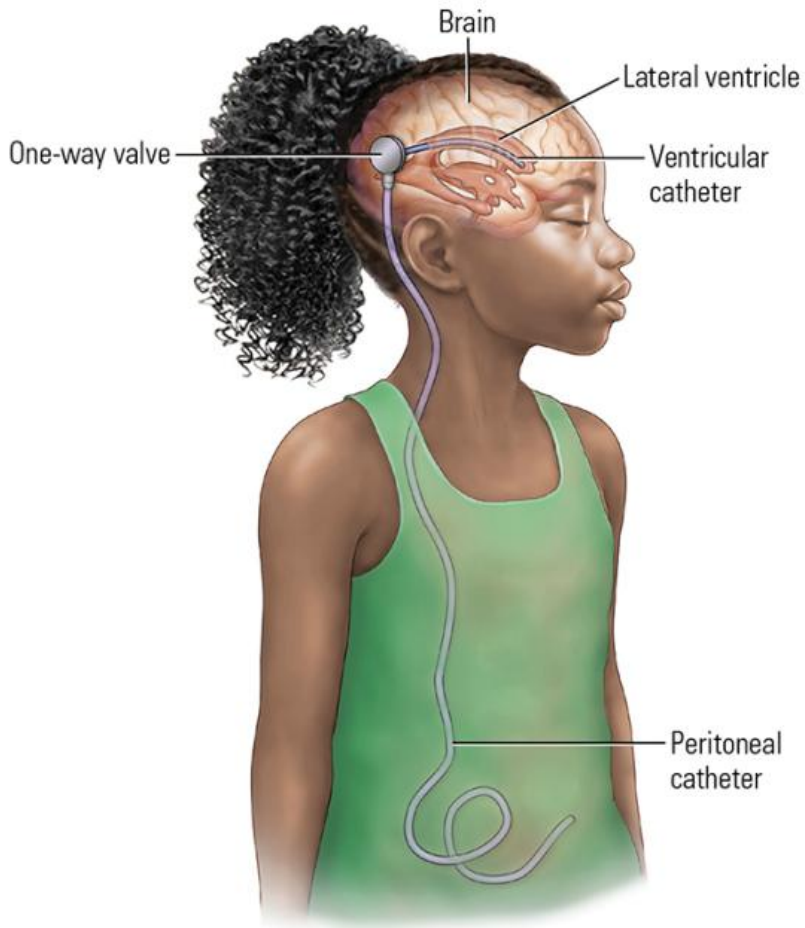
62220 Creation of shunt; ventriculo-atrial, -jugular, -auricular

- *CPT Changes: An Insider's View* 2003

(For intracranial neuroendoscopic ventricular catheter placement, use 62160)

62223 ventriculo-peritoneal, -pleural, other terminus

- *CPT Changes: An Insider's View* 2003



(For intracranial neuroendoscopic ventricular catheter placement, use 62160)

Cerebrospinal Fluid (CSF) Shunt (Ventricular Peritoneal)

62223

A ventriculostomy is performed to drain CSF into the peritoneal cavity.

A ventriculostomy is performed to drain CSF into the peritoneal cavity.

62225 Replacement or irrigation, ventricular catheter

CPT Changes: An Insider's View 2003

CPT Assistant Dec 11:6

(For intracranial neuroendoscopic ventricular catheter placement, use 62160)

62230 Replacement or revision of cerebrospinal fluid shunt, obstructed valve, or distal catheter in shunt system

CPT Changes: An Insider's View 2002, 2003

CPT Assistant Dec 11:6, Dec 12:14

(For intracranial neuroendoscopic ventricular catheter placement, use 62160)

(For replacement of **only** the valve and proximal catheter, use 62230 in conjunction with 62225)

62252 Reprogramming of programmable cerebrospinal shunt

CPT Changes: An Insider's View 2001, 2002

62256 Removal of complete cerebrospinal fluid shunt system; without replacement

CPT Changes: An Insider's View 2002

62258 with replacement by similar or other shunt at same operation

CPT Assistant Dec 11:6

(For percutaneous irrigation or aspiration of shunt reservoir, use 61070)

(For reprogramming of programmable CSF shunt, use 62252)

(For intracranial neuroendoscopic ventricular catheter placement, use 62160)

Spine and Spinal Cord

(For application of caliper or tongs, use 20660)

(For treatment of fracture or dislocation of spine, see 22310-22327)

Injection, Drainage, or Aspiration

Injection of contrast during fluoroscopic guidance and localization is an inclusive component of 62263, 62264, 62267, 62273, 62280, 62281, 62282, 62302, 62303, 62304, 62305, 62321, 62323, 62325, 62327, 62328, 62329. Fluoroscopic guidance and localization is reported with 77003, unless a formal contrast study (myelography or arthrography) is performed, in which case the use of fluoroscopy is included in the supervision and interpretation codes or the myelography via lumbar injection code. Image guidance and the injection of contrast are inclusive components and are required for the performance of myelography, as described by codes 62302, 62303, 62304, 62305.

Code 62263 describes a catheter-based treatment involving targeted injection of various substances (eg, hypertonic saline, steroid, anesthetic) via an indwelling epidural catheter. Code 62263 includes percutaneous insertion and removal of an epidural catheter (remaining in place over a several-day period), for the administration of multiple injections of a neurolytic agent(s) performed during serial treatment sessions (ie, spanning two or more treatment days). If required, adhesions or scarring may also be lysed by mechanical means. Code 62263 is **not** reported for each adhesiolysis treatment, but should be reported **once** to describe the entire series of injections/infusions spanning two or more treatment days.

Code 62264 describes multiple adhesiolysis treatment sessions performed on the same day. Adhesions or scarring may be lysed by injections of neurolytic agent(s). If required, adhesions or scarring may also be lysed mechanically using a percutaneously deployed catheter.

Codes 62263 and 62264 include fluoroscopic guidance and localization (77003) during initial or subsequent sessions.

Fluoroscopy or CT and any injection of contrast are inclusive components of 62321, 62323, 62325, 62327.

The placement and use of a catheter to administer one or more epidural or subarachnoid injections on a single calendar day should be reported in the same manner as if a needle had been used, ie, as a single injection using either 62320, 62321, 62322, or 62323. Such injections should not be reported with 62324, 62325, 62326, or 62327.

Threading a catheter into the epidural space, injecting substances at one or more levels and then removing the catheter should be treated as a single injection (62320, 62321, 62322, 62323). If the catheter is left in place to deliver substance(s) over a prolonged period (ie, more than a single calendar day) either continuously or via intermittent bolus, use 62324, 62325, 62326, 62327 as appropriate.

When reporting 62320, 62321, 62322, 62323, 62324, 62325, 62326, 62327 code choice is based on the region at which the needle or catheter entered the body (eg, lumbar). Codes 62320, 62321, 62322, 62323, 62324, 62325, 62326, 62327 should be reported only once, when the substance injected spreads or catheter tip insertion moves into another spinal region (eg, 62322 is reported only once for injection or catheter insertion at L3-4 with spread of the substance or placement of the catheter tip to the thoracic region).

(For the techniques of microsurgery and/or use of microscope, use 69990)

62263 Percutaneous lysis of epidural adhesions using solution injection (eg, hypertonic saline, enzyme) or mechanical means (eg, catheter) including radiologic localization (includes contrast when administered), multiple adhesiolysis sessions; 2 or more days

62329 Code is out of numerical sequence. See 62269-62280

▶Percutaneous Decompression of Neural Elements◀

▶Percutaneous spinal procedures are done with indirect visualization (eg, image guidance) (eg, 62287, 62330, 62331, 0274T). Endoscopic assistance during an open procedure with continuous and direct visualization (light-based) is reported using excision codes (eg, 63020-63035).◀

(For transforaminal epidural injection, see 64479-64484)

(Report 01996 for daily hospital management of continuous epidural or subarachnoid drug administration performed in conjunction with 62324, 62325, 62326, 62327)

Definitions

For purposes of CPT coding, the following definitions of approach and visualization apply. The primary approach and visualization define the service, whether another method is incidentally applied. Surgical services are presumed open, unless otherwise specified.

Percutaneous: Image-guided procedures (eg, computer tomography [CT] or fluoroscopy) performed with indirect visualization of the spine without the use of any device that allows visualization through a surgical incision.

Endoscopic: Spinal procedures performed with continuous direct visualization of the spine through an endoscope.

Open: Spinal procedures performed with continuous direct visualization of the spine through a surgical opening.

Indirect visualization: Image-guided (eg, CT or fluoroscopy), not light-based visualization.

Direct visualization: Light-based visualization; can be performed by eye, or with surgical loupes, microscope, or endoscope.

#▲62287 Decompression, percutaneous, of nucleus pulposus of intervertebral disc, any method utilizing needle-based technique to remove disc material under fluoroscopic imaging or other form of indirect visualization, with discography and/or epidural injection(s) at the treated level(s), when performed, single or multiple levels, lumbar

CPT Changes: An Insider's View 2000, 2009, 2012, 2017, 2026

CPT Assistant Nov 99:34, Mar 02:11, Oct 10:9, Jul 12:3, Oct 12:14, Apr 14:11, Mar 15:10, Feb 17:12, Dec 19:12, Feb 21:13, Mar 25:19

(Do not report 62287 in conjunction with 62267, 62290, 62322, 77003, 77012, 72295, when performed at same level)

▶(For percutaneous lumbar decompression using non-needle-based technique, see 62330, 62331)◀

▶(For non-needle-based technique for percutaneous decompression of nucleus pulposus of intervertebral disc, use 0274T)◀

●62330 Decompression, percutaneous, with partial removal of the ligamentum flavum, including laminotomy for access, epidurography, and imaging guidance (ie, CT or fluoroscopy), bilateral; one interspace, lumbar

CPT Changes: An Insider's View 2026

+●62331 additional interspace(s), lumbar (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2012, 2013
- *CPT Assistant* Jul 12:5-6, Aug 12:10-12, 15, Jun 21:14, May 22:18, Jul 22:18

(Do not report 62367-62370 in conjunction with 95990, 95991. For refilling and maintenance of a reservoir or an implantable infusion pump for spinal or brain drug delivery without reprogramming, see 95990, 95991)

Intrathecal or Epidural Drug Infusion Pump Implantation

62362

The reservoir is placed in the subcutaneous tissues and attached to a previously placed catheter for intrathecal or epidural drug infusion.

Coding Tip

Instructions for Use of the CPT Codebook

When advanced practice nurses and physician assistants are working with physicians they are considered as working in the exact same specialty and exact same subspecialties as the physician. A "physician or other qualified health care professional" is an individual who is qualified by education, training, licensure/regulation (when applicable), and facility privileging (when applicable) who performs a professional service within his or her scope of practice and independently reports that professional service. These professionals are distinct from "clinical staff." A clinical staff member is a person who works under the supervision of a physician or other qualified health care professional, and who is allowed by law, regulation, and facility policy to perform or assist in the performance of a specific professional service, but does not individually report that professional service. Other policies may also affect who may report specific services.

CPT Coding Guidelines, Introduction, Instructions for Use of the CPT Codebook

Endoscopic Decompression of Neural Elements and/or Excision of Herniated Intervertebral Discs

Definitions

For purposes of CPT coding, the following definitions of approach and visualization apply. The primary approach and visualization define the service, whether another method is incidentally applied. Surgical services are presumed open, unless otherwise specified.

Percutaneous: Image-guided procedures (eg, computer tomography [CT] or fluoroscopy) performed with indirect visualization of the spine without the use of any device that allows visualization through a surgical incision.

Endoscopic: Spinal procedures performed with continuous direct visualization of the spine through an endoscope.

Open: Spinal procedures performed with continuous direct visualization of the spine through a surgical opening.

Indirect visualization: Image-guided (eg, CT or fluoroscopy), not light-based visualization.

Direct visualization: Light-based visualization; can be performed by eye, or with surgical loupes, microscope, or endoscope.

(For the techniques of microsurgery and/or use of microscope, use 69990)

►(For percutaneous decompression, see 62287, 62330, 62331, 0274T◄

62380 Endoscopic decompression of spinal cord, nerve root(s), including laminotomy, partial facetectomy, foraminotomy, discectomy and/or excision of herniated intervertebral disc, 1 interspace, lumbar

CPT Changes: An Insider's View 2017

CPT Assistant Feb 17:12

(For open procedures, see 63030, 63056)

(For bilateral procedure, report 62380 with modifier 50)

Posterior Extradural Laminotomy or Laminectomy for Exploration/Decompression of Neural Elements or Excision of Herniated Intervertebral Discs

Definitions

For purposes of CPT coding, the following definitions of approach and visualization apply. The primary approach and visualization define the service, whether another method is incidentally applied. Surgical services are presumed open, unless otherwise specified.

Percutaneous: Image-guided procedures (eg, computer tomography [CT] or fluoroscopy) performed with indirect visualization of the spine without the use of any device that allows visualization through a surgical incision.

Endoscopic: Spinal procedures performed with continuous direct visualization of the spine through an endoscope.

Open: Spinal procedures performed with continuous direct visualization of the spine through a surgical opening.

Indirect visualization: Image-guided (eg, CT or fluoroscopy), not light-based visualization.

Direct visualization: Light-based visualization; can be performed by eye, or with surgical loupes, microscope, or endoscope.

(When 63001-63048 are followed by arthrodesis, see 22590-22614)

(For the techniques of microsurgery and/or use of microscope, use 69990)

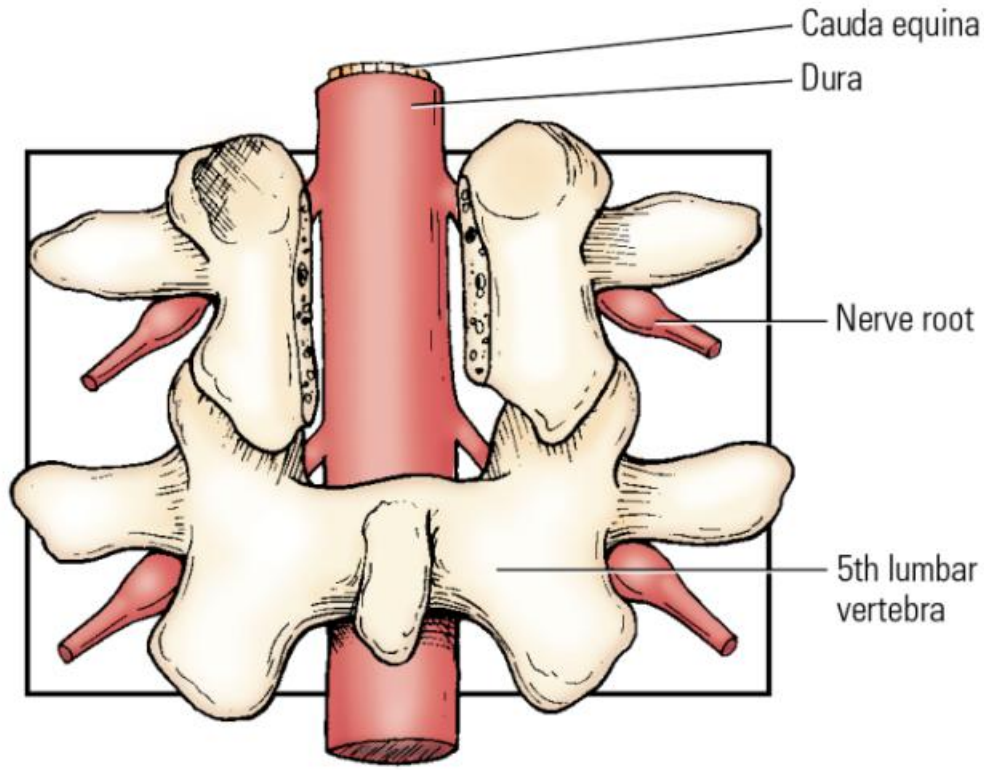
►(For percutaneous decompression, see 62287, 62330, 62331, 0274T)◄

63001 Laminectomy with exploration and/or decompression of spinal cord and/or cauda equina, without facetectomy, foraminotomy or discectomy (eg, spinal stenosis), 1 or 2 vertebral segments; cervical

CPT Assistant Jan 01:12, Jun 07:1, Jul 11:13, Jul 12:3, Jul 13:3

63003 thoracic

CPT Assistant Jan 01:12, Jul 12:3, Jul 13:3



63005 lumbar, except for spondylolisthesis

CPT Assistant Jan 01:12, Jul 12:3, Jul 13:3, Dec 13:17

Lumbar Laminectomy

63005

With the patient prone and under general anesthesia, the laminae and underlying ligamentum flavum are removed.

63011 sacral

CPT Assistant Jan 01:12, Jul 13:3

63012 Laminectomy with removal of abnormal facets and/or pars inter-articularis with decompression of cauda equina and nerve roots for spondylolisthesis, lumbar (Gill type procedure)

CPT Assistant Jan 01:12, Jul 13:3, Dec 19:12

63015 Laminectomy with exploration and/or decompression of spinal cord and/or cauda equina, without facetectomy, foraminotomy or discectomy (eg, spinal stenosis), more than 2 vertebral segments; cervical

CPT Assistant Jan 01:12, Jul 13:3

63016 thoracic

CPT Assistant Jan 01:12, Jul 13:3

63017 lumbar

CPT Assistant Jan 01:12, Jul 13:3

63020 Laminotomy (hemilaminectomy), with decompression of nerve root(s), including partial facetectomy, foraminotomy and/or excision of herniated intervertebral disc; 1 interspace, cervical

CPT Changes: An Insider's View 2000, 2009, 2012

CPT Assistant Nov 99:36, Jan 01:12, Jul 12:4, Dec 12:13, Jul 13:3

(For bilateral procedure, report 63020 with modifier 50)

63030 1 interspace, lumbar

CPT Changes: An Insider's View 2000, 2009, 2012

CPT Assistant Mar 96:7, Nov 99:36, Jan 01:12, Feb 01:10, Sep 02:10, Oct 04:12, Oct 08:10, Oct 09:9, Nov 10:4, Mar 11:7, Jul 11:13, Jul 12:3-4, Dec 12:13, Jul 13:3, Dec 13:17, May 16:13, Feb 17:13, Nov 19:15, May 20:14

(For bilateral procedure, report 63030 with modifier 50)

+● 63032 with repair of annular defect by implantation of bone-anchored annular closure device, including all imaging guidance, 1 interspace, lumbar (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2026

►(Use 63032 in conjunction with 63030)◄

►(Report 63032 only once per operative session)◄

►(Do not report 63032 in conjunction with 63042)◄

+ 63035 each additional interspace, cervical or lumbar (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2000, 2009, 2012

CPT Assistant Fall 91:8, Mar 96:7, Nov 99:36, Jan 01:12, Feb 01:10, Jul 12:4, Mar 22:5

(Use 63035 in conjunction with 63020-63030)

(Do not report 63030, 63035 in conjunction with 22630, 22632, 22633, 22634, for laminotomy performed to prepare the interspace for fusion on the same interspace[s] and vertebral segment[s])

(For decompression performed on the same interspace[s] and vertebral segment[s] as posterior interbody fusion that includes laminectomy, removal of facets, and/or opening/widening of the foramen for decompression of nerves or spinal components, such as spinal cord, cauda equina, or nerve roots, see 63052, 63053)

(For bilateral procedure, report 63035 twice. Do not report modifier 50 in conjunction with 63035)

►(For percutaneous approach, see 62330, 62331, 0274T)◄

63040 Laminotomy (hemilaminectomy), with decompression of nerve root(s), including partial facetectomy, foraminotomy and/or excision of herniated intervertebral disc, reexploration, single interspace; cervical

CPT Changes: An Insider's View 2001

CPT Assistant Jan 99:11, Jan 01:12, Jul 13:3, May 20:14, Jul 21:7

(For bilateral procedure, report 63040 with modifier 50)

63042 lumbar

CPT Assistant Jan 99:11, Jan 01:12, Oct 08:10, Oct 09:9, Jul 11:13, Jul 13:3, May 20:14, Jul 21:7

►(Do not report 63042 in conjunction with 63032)◄

(For bilateral procedure, report 63042 with modifier 50)

+ 63043 each additional cervical interspace (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2001

CPT Assistant May 20:14, Jul 21:7

(Use 63043 in conjunction with 63040)

(For bilateral procedure, report 63043 twice. Do not report modifier 50 in conjunction with 63043)

+ 63044 each additional lumbar interspace (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2001

CPT Assistant May 20:14, Jul 21:7, Mar 22:5

(Use 63044 in conjunction with 63042)

(Do not report 63040, 63042, 63043, 63044 in conjunction with 22630, 22632, 22633, 22634, for laminotomy to prepare the interspace for fusion on the same interspace[s] and vertebral segment[s])

(For decompression performed on the same interspace[s] and vertebral segment[s] as posterior interbody fusion that includes laminectomy, removal of facets, and/or opening/widening of the foramen for decompression of nerves or spinal components, such as spinal cord, cauda equina, or nerve roots, see 63052, 63053)

(For bilateral procedure, report 63044 twice. Do not report modifier 50 in conjunction with 63044)

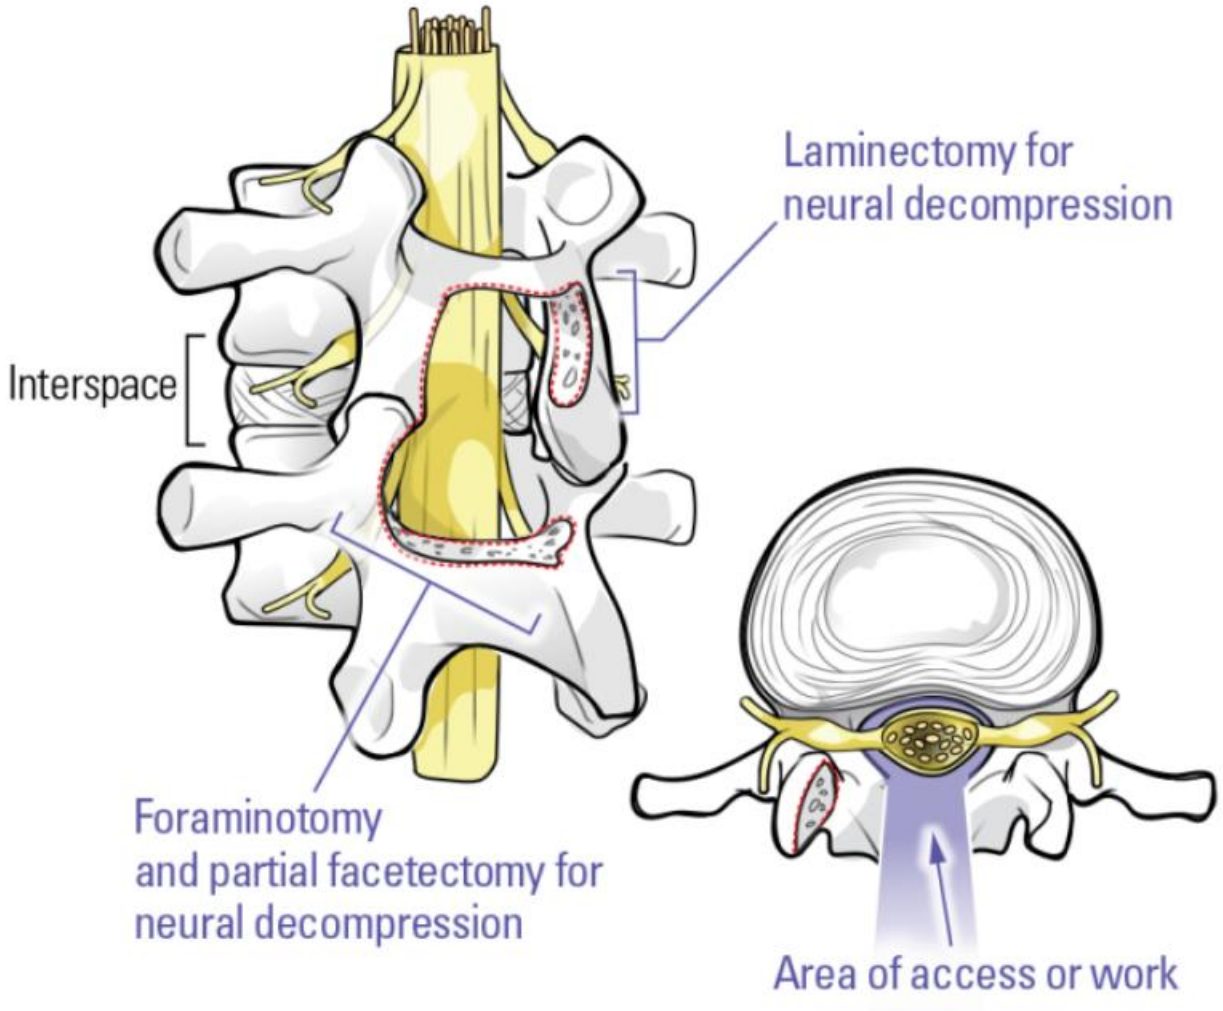
Decompression performed on the same interspace[s] and vertebral segment(s) as posterior interbody fusion that includes laminectomy, facetectomy, or foraminotomy may be separately reported using 63052.

Codes 63052, 63053 may only be reported for decompression at the same anatomic site(s) when posterior interbody fusion (eg, 22630) requires decompression beyond preparation of the interspace(s) for fusion.

63045 Laminectomy, facetectomy and foraminotomy (unilateral or bilateral with decompression of spinal cord, cauda equina and/or nerve root[s], [eg, spinal or lateral recess stenosis]), single vertebral segment; cervical

CPT Assistant Jan 01:12, Dec 12:13, Jul 13:3, Jul 21:7, Mar 22:4-5, Mar 24:27

63046 thoracic



CPT Assistant Jan 99:11, Jan 01:12, Dec 12:13, Jul 13:3, Mar 22:4-5

63047 lumbar

CPT Assistant Jan 99:11, Jan 01:12, Feb 01:10, Nov 02:11, Apr 08:11, Jul 08:7, Oct 08:10, Oct 09:9, Nov 10:4, Jul 11:13, Dec 12:13, Jul 13:3, Dec 13:17, Dec 14:16, Oct 16:11, Feb 17:13, May 18:9, Dec 19:12, May 20:14, Jul 21:7, Dec 21:6, 22, Mar 22:4-5, Mar 24:27

Example of Laminectomy at Single Interspace

63047

+ 63048 each additional vertebral segment, cervical, thoracic, or lumbar (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Fall 91:8, Jan 99:11, Jan 01:12, Dec 12:13, Jul 21:7, Dec 21:22, Mar 22:4-5, Mar 24:27

(Use 63048 in conjunction with 63045-63047)

(Do not report 63047, 63048 in conjunction with 22630, 22632, 22633, 22634, for laminectomy performed to prepare the interspace for fusion on the same interspace[s] and vertebral segment[s])

(For decompression performed on the same interspace[s] and vertebral segment[s] as posterior interbody fusion that includes laminectomy, removal of facets, and/or opening/widening of the foramen for decompression of nerves or spinal components, such as spinal cord, cauda equina, or nerve roots, see 63052, 63053)

#+ 63052 Laminectomy, facetectomy, or foraminotomy (unilateral or bilateral with decompression of spinal cord, cauda equina and/or nerve root[s] [eg, spinal or lateral recess stenosis]), during posterior interbody arthrodesis, lumbar; single vertebral segment (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Mar 22:3-5

#+ 63053 each additional vertebral segment (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Mar 22:3-5

(Use 63053 in conjunction with 63052)

(Use 63052, 63053 in conjunction with 22630, 22632, 22633, 22634)

63050 Laminoplasty, cervical, with decompression of the spinal cord, 2 or more vertebral segments;

- *CPT Changes: An Insider's View* 2005, 2022
- *CPT Assistant* Jul 13:3

63051 with reconstruction of the posterior bony elements (including the application of bridging bone graft and non-segmental fixation devices [eg, wire, suture, mini-plates], when performed)

- *CPT Changes: An Insider's View* 2005, 2022
- *CPT Assistant* Jul 11:13, Jul 13:3, Feb 23:14, Mar 24:27

(Do not report 63050 or 63051 in conjunction with 22600, 22614, 22840-22842, 63001, 63015, 63045, 63048, 63295 for the same vertebral segment(s))

63052 Code is out of numerical sequence. See 63047-63051

63053 Code is out of numerical sequence. See 63047-63051

Transpedicular or Costovertebral Approach for Posterolateral Extradural Exploration/Decompression

63055 Transpedicular approach with decompression of spinal cord, equina and/or nerve root(s) (eg, herniated intervertebral disc), single segment; thoracic

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:36, Jul 13:3

63056 lumbar (including transfacet, or lateral extraforaminal approach) (eg, far lateral herniated intervertebral disc)

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:36, Oct 09:9, Nov 11:10, Jul 12:3, Jul 13:3, Jan 14:9, Nov 19:15, May 21:14

+ 63057 each additional segment, thoracic or lumbar (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:36, Mar 22:5

(Use 63057 in conjunction with 63055, 63056)

(Do not report 63056, 63057 for a herniated disc in conjunction with 22630, 22632, 22633, 22634 for decompression to prepare the interspace on the same interspace[s] and vertebral segment[s])

(For decompression performed on the same interspace[s] and vertebral segment[s] as posterior interbody fusion that includes laminectomy, removal of facets, and/or opening/widening of the foramen for decompression of nerves or spinal components, such as spinal cord, cauda equina, or nerve roots, see 63052, 63053)

63064 Costovertebral approach with decompression of spinal cord or nerve root(s) (eg, herniated intervertebral disc), thoracic; single segment

- *CPT Assistant* Fall 92:19, Jul 13:3

+ 63066 each additional segment (List separately in addition to code for primary procedure)

(Use 63066 in conjunction with 63064)

(For excision of thoracic intraspinal lesions by laminectomy, see 63266, 63271, 63276, 63281, 63286)

Anterior or Anterolateral Approach for Extradural Exploration/Decompression

For the following codes, when two surgeons work together as primary surgeons performing distinct part(s) of spinal cord exploration/decompression operation, each surgeon should report his/her distinct operative work by appending modifier 62 to the procedure code (and any associated add-on codes for that procedure code as long as both surgeons continue to work together as primary surgeons). In this situation, modifier 62 may be appended to the definitive procedure code(s) 63075, 63077, 63081, 63085, 63087, 63090 and, as appropriate, to associated additional interspace add-on code(s) 63076, 63078 or additional segment add-on code(s) 63082, 63086, 63088, 63091 as long as both surgeons continue to work together as primary surgeons.

For vertebral corpectomy, the term **partial** is used to describe removal of a substantial portion of the body of the vertebra. In the cervical spine, the amount of bone removed is defined as at least one-half of the vertebral body. In the thoracic and lumbar spine, the amount of bone removed is defined as at least one-third of the vertebral body.

63075 Discectomy, anterior, with decompression of spinal cord and/or nerve root(s), including osteophytectomy; cervical, single interspace

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Nov 98:18, Jan 01:12, Feb 02:4, Jul 13:3, Apr 15:7, Aug 23:11

(Do not report 63075 in conjunction with 22554, even if performed by separate individuals. To report anterior cervical discectomy and interbody fusion at the same level during the same session, use 22551)

+ 63076 cervical, each additional interspace (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Nov 98:18, Jan 01:12, Feb 02:4

(Do not report 63076 in conjunction with 22554, even if performed by separate individuals. To report anterior cervical discectomy and interbody fusion at the same level during the same session, use 22552)

(Use 63076 in conjunction with 63075)

63077 thoracic, single interspace

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Nov 98:18, Jan 01:12, Feb 02:4, Jul 13:3

+ 63078 thoracic, each additional interspace (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Nov 98:18, Jan 01:12, Feb 02:4

(Use 63078 in conjunction with 63077)

(Do not report code 69990 in addition to codes 63075-63078)

63081 Vertebral corpectomy (vertebral body resection), partial or complete, anterior approach with decompression of spinal cord and/or nerve root(s); cervical, single segment

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Spring 93:37, Feb 02:4, Jul 13:3, Jun 15:10, Apr 16:8, Aug 23:11

+ 63082 cervical, each additional segment (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Spring 93:37, Feb 02:4, Apr 16:8, Aug 23:11

(Use 63082 in conjunction with 63081)

(For transoral approach, see 61575, 61576)

63085 Vertebral corpectomy (vertebral body resection), partial or complete, transthoracic approach with decompression of spinal cord and/or nerve root(s); thoracic, single segment

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Spring 93:37, Feb 02:4, Jul 13:3, Apr 16:8

+ 63086 thoracic, each additional segment (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Spring 93:37, Feb 02:4, Apr 16:8

(Use 63086 in conjunction with 63085)

63087 Vertebral corpectomy (vertebral body resection), partial or complete, combined thoracolumbar approach with decompression of spinal cord, cauda equina or nerve root(s), lower thoracic or lumbar; single segment

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Spring 93:37, Feb 02:4, Jul 13:3, Apr 16:8

+ 63088 each additional segment (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Spring 93:37, Feb 02:4, Apr 16:8

(Use 63088 in conjunction with 63087)

63090 Vertebral corpectomy (vertebral body resection), partial or complete, transperitoneal or retroperitoneal approach with decompression of spinal cord, cauda equina or nerve root(s), lower thoracic, lumbar, or sacral; single segment

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Spring 93:37, Mar 96:6, Feb 02:4, Jul 13:3, Apr 16:8

+ 63091 each additional segment (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2002
- *CPT Assistant* Spring 93:37, Mar 96:6, Feb 02:4, Apr 16:8

(Use 63091 in conjunction with 63090)

(Procedures 63081-63091 include discectomy above and/or below vertebral segment)

(If followed by arthrodesis, see 22548-22812)

(For reconstruction of spine, use appropriate vertebral corpectomy codes 63081-63091, bone graft codes 20930-20938, arthrodesis codes 22548-22812, and spinal instrumentation codes 22840-22855, 22859)

Lateral Extracavitary Approach for Extradural Exploration/Decompression

For vertebral corpectomy, the term **partial** is used to describe removal of a substantial portion of the body of the vertebra. In the cervical spine, the amount of bone removed is defined as at least one-half of the vertebral body. In the thoracic and lumbar spine, the amount of bone removed is defined as at least one-third of the vertebral body.

63101 Vertebral corpectomy (vertebral body resection), partial or complete, lateral extracavitary approach with decompression of spinal cord and/or nerve root(s) (eg, for tumor or retropulsed bone fragments); thoracic, single segment

- *CPT Changes: An Insider's View* 2004
- *CPT Assistant* Jul 13:3

63102 lumbar, single segment

- *CPT Changes: An Insider's View* 2004
- *CPT Assistant* Jul 13:3

+ 63103 thoracic or lumbar, each additional segment (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2004

(Use 63103 in conjunction with 63101 and 63102)

Incision

63170 Laminectomy with myelotomy (eg, Bischof or DREZ type), cervical, thoracic, or thoracolumbar

- *CPT Assistant* Jul 13:3

63172 Laminectomy with drainage of intramedullary cyst/syrinx; to subarachnoid space

- *CPT Assistant* Jul 13:3

63173 to peritoneal or pleural space

- *CPT Changes: An Insider's View* 2004
- *CPT Assistant* Jul 13:3

63185 Laminectomy with rhizotomy; 1 or 2 segments

- *CPT Assistant* Jul 13:3, Mar 24:27

63190 more than 2 segments

- *CPT Assistant* Jul 13:3

63191 Laminectomy with section of spinal accessory nerve

- *CPT Assistant* Jul 13:3

(For bilateral procedure, report 63191 with modifier 50)

(For resection of sternocleidomastoid muscle, use 21720)

63197 Laminectomy with cordotomy, with section of both spinothalamic tracts, 1 stage, thoracic

- *CPT Changes: An Insider's View* 2022
- *CPT Assistant* Jul 13:3

63200 Laminectomy, with release of tethered spinal cord, lumbar

- *CPT Assistant* Jul 13:3

Excision by Laminectomy of Lesion Other Than Herniated Disc

63250 Laminectomy for excision or occlusion of arteriovenous malformation of spinal cord; cervical

CPT Assistant Jul 13:3

63251 thoracic

CPT Assistant Jul 13:3

63252 thoracolumbar

CPT Assistant Jul 13:3

63265 Laminectomy for excision or evacuation of intraspinal lesion other than neoplasm, extradural; cervical

CPT Assistant Jul 13:3

63266 thoracic

63267 lumbar

CPT Assistant Jul 13:3

63268 sacral

CPT Assistant Jul 13:3

63270 Laminectomy for excision of intraspinal lesion other than neoplasm, intradural; cervical

CPT Assistant Jul 13:3

63271 thoracic

CPT Assistant Jul 13:3

63272 lumbar

CPT Assistant Jul 13:3

63273 sacral

CPT Assistant Jul 13:3

63275 Laminectomy for biopsy/excision of intraspinal neoplasm; extradural, cervical

CPT Assistant Jul 13:3

63276 extradural, thoracic

CPT Assistant Jul 13:3

63277 extradural, lumbar

CPT Assistant Jul 13:3

63278 extradural, sacral

CPT Assistant Jul 13:3

63280 intradural, extramedullary, cervical

CPT Assistant Jul 13:3

63281 intradural, extramedullary, thoracic

CPT Assistant Jul 13:3

63282 intradural, extramedullary, lumbar
CPT Assistant Jul 13:3

63283 intradural, sacral
CPT Assistant Jul 13:3

63285 intradural, intramedullary, cervical
CPT Assistant Jul 13:3

63286 intradural, intramedullary, thoracic
CPT Assistant Jul 13:3

63287 intradural, intramedullary, thoracolumbar
CPT Assistant Jul 13:3

63290 combined extradural-intradural lesion, any level
CPT Assistant Jul 13:3

(For drainage of intramedullary cyst/syrinx, use 63172, 63173)

+ 63295 Osteoplastic reconstruction of dorsal spinal elements, following primary intraspinal procedure (List separately in addition to code for primary procedure)
CPT Changes: An Insider's View 2005

(Use 63295 in conjunction with 63172, 63173, 63185, 63190, 63200-63290)

(Do not report 63295 in conjunction with 22590-22614, 22840-22844, 63050, 63051 for the same vertebral segment(s))

Excision, Anterior or Anterolateral Approach, Intraspinal Lesion

For the following codes, when two surgeons work together as primary surgeons performing distinct part(s) of an anterior approach for an intraspinal excision, each surgeon should report his/her distinct operative work by appending modifier 62 to the single definitive procedure code. In this situation, modifier 62 may be appended to the definitive procedure code(s) 63300-63307 and, as appropriate, to the associated additional segment add-on code 63308 as long as both surgeons continue to work together as primary surgeons.

For vertebral corpectomy, the term **partial** is used to describe removal of a substantial portion of the body of the vertebra. In the cervical spine, the amount of bone removed is defined as at least one-half of the vertebral body. In the thoracic and lumbar spine, the amount of bone removed is defined as at least one-third of the vertebral body.

(For arthrodesis, see 22548-22585)

(For reconstruction of spine, see 20930-20938)

63300 Vertebral corpectomy (vertebral body resection), partial or complete, for excision of intraspinal lesion, single segment; extradural, cervical
CPT Assistant Feb 02:4, Jul 13:3

63301 extradural, thoracic by transthoracic approach
CPT Assistant Feb 02:4, Jul 13:3

63302 extradural, thoracic by thoracolumbar approach
CPT Assistant Feb 02:4, Jul 13:3

63303 extradural, lumbar or sacral by transperitoneal or retroperitoneal approach
CPT Assistant Feb 02:4, Jul 13:3

63304 intradural, cervical
CPT Assistant Feb 02:4, Jul 13:3

63305 intradural, thoracic by transthoracic approach
CPT Assistant Feb 02:4, Jul 13:3

63306 intradural, thoracic by thoracolumbar approach
CPT Assistant Feb 02:4, Jul 13:3

63307 intradural, lumbar or sacral by transperitoneal or retroperitoneal approach
CPT Assistant Feb 02:4, Jul 13:3

+ 63308 each additional segment (List separately in addition to codes for single segment)
CPT Assistant Feb 02:4

(Use 63308 in conjunction with 63300-63307)

Stereotaxis

63600 Creation of lesion of spinal cord by stereotactic method, percutaneous, any modality (including stimulation and/or recording)

63610 Stereotactic stimulation of spinal cord, percutaneous, separate procedure not followed by other surgery

Stereotactic Radiosurgery (Spinal)

Spinal stereotactic radiosurgery is a distinct procedure that utilizes externally generated ionizing radiation to inactivate or eradicate defined target(s) in the spine without the need to make an incision. The target is defined by and the treatment is delivered using high-resolution stereotactic imaging. These codes are reported by the surgeon. The radiation oncologist reports the appropriate code(s) for clinical treatment planning, physics and dosimetry, treatment delivery and management from the **Radiation Oncology** section (77261-77790). Any necessary planning, dosimetry, targeting, positioning, or blocking by the neurosurgeon is included in the stereotactic radiation surgery services. The same individual should not report stereotactic radiosurgery services with radiation treatment management codes (77427-77432).

Spinal stereotactic radiosurgery is typically performed in a single planning and treatment session using a stereotactic image-guidance system, but can be performed with a planning session and in a limited number of treatment sessions, up to a maximum of five sessions. Do not report stereotactic radiosurgery more than once per lesion per course of treatment when the treatment requires greater than one session.

Stereotactic spinal surgery is only used when the tumor being treated affects spinal neural tissue or abuts the dura mater. Arteriovenous malformations must be subdural. For other radiation services of the spine, see **Radiation Oncology** services.

Codes 63620, 63621 include computer-assisted planning. Do not report 63620, 63621 in conjunction with 61781-61783.

►(For intensity modulated beam delivery plan, use 77301. For stereotactic body radiation therapy, see 77373, 77435)◄

63620 Stereotactic radiosurgery (particle beam, gamma ray, or linear accelerator); 1 spinal lesion

CPT Changes: An Insider's View 2009

CPT Assistant Oct 10:3, Jul 11:12, Jun 15:6

(Do not report 63620 more than once per course of treatment)

+ 63621 each additional spinal lesion (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2009

CPT Assistant Oct 10:3, Jul 11:12, Jun 15:6

(Report 63621 in conjunction with 63620)

(For each course of treatment, 63621 may be reported no more than once per lesion. Do not report 63621 more than 2 times for entire course of treatment regardless of number of lesions treated)

Neurostimulators (Spinal)

For electronic analysis with programming, when performed, of spinal cord neurostimulator pulse generator or transmitters, see codes 95970, 95971, 95972. Test stimulation to confirm correct target site placement of the electrode array(s) and/or to confirm the functional status of the system is inherent to placement, and is not separately reported as electronic analysis or programming of the neurostimulator pulse generator or receiver system. Electronic analysis (95970) at the time of implantation is not separately reported.

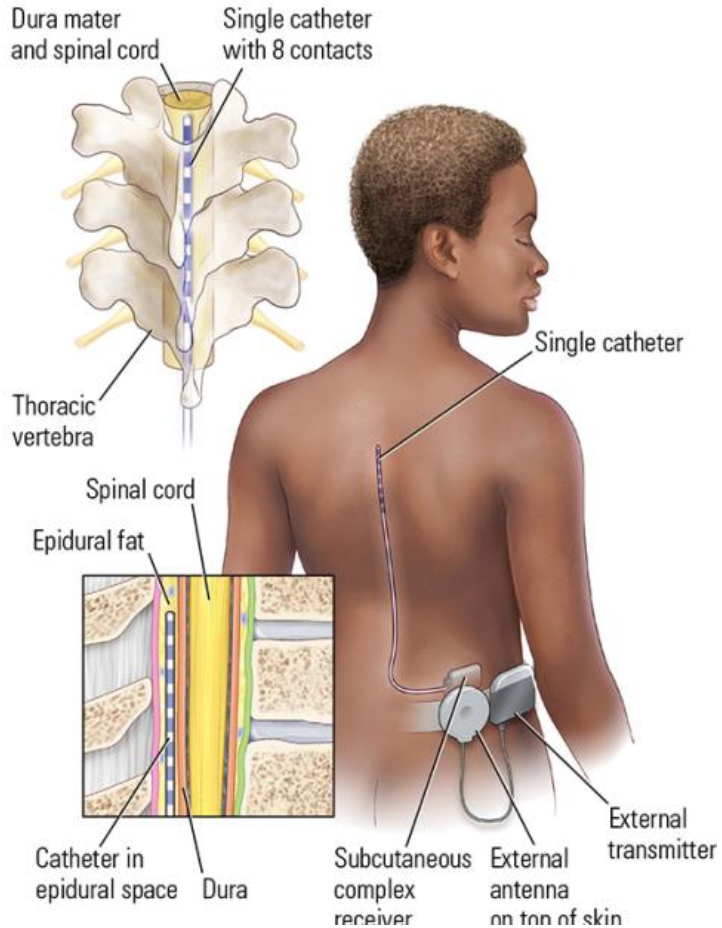
Codes 63650, 63655, 63661, 63662, 63663, 63664 describe the operative placement, revision, replacement, or removal of the spinal neurostimulator system components to provide spinal electrical stimulation. A neurostimulator system includes an implanted pulse generator or implanted receiver with an external transmitter, a collection of contacts, electrodes (electrode array), an extension if applicable, an external controller, and an external charger, if applicable. The neurostimulator may be integrated with the electrode array (single-component implant, see 0784T, 0785T) or have a detachable connection to the electrode array (two or more component implant). Multiple contacts or electrodes (4 or more) provide the actual electrical stimulation in the epidural space.

For percutaneously placed neurostimulator systems (63650, 63661, 63663), the contacts are on a catheter-like lead. An array defines the collection of contacts that are on one catheter.

For systems placed via an open surgical exposure (63655, 63662, 63664), the contacts are on a plate or paddle-shaped surface.

Do not report 63661 or 63663 when removing or replacing a temporary percutaneously placed array for an external generator.

Codes 63650, 63661, 63663, 63685, 63688 describe insertion, replacement, revision, or removal of a percutaneous electrode array and neurostimulator requiring pocket creation and connection between electrode array and pulse generator or receiver. For insertion, replacement, revision, or removal of a percutaneous spinal cord or sacral electrode array and integrated neurostimulator, see 0784T, 0785T, 0786T, 0787T.



63650 Percutaneous implantation of neurostimulator electrode array, epidural

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Jun 98:3-4, Nov 98:18, Mar 99:11, Apr 99:10, Sep 99:3, Dec 08:8, Feb 10:9, Aug 10:8, Dec 10:14, Apr 11:10, Oct 13:19, Dec 15:17, Jan 16:12, Dec 17:16, Oct 18:11

Percutaneous Implantation of Neurostimulator Electrodes

63650

Single catheter electrode array is inserted percutaneously into the epidural space. A simple or complex receiver is subcutaneously implanted.

63655 Laminectomy for implantation of neurostimulator electrodes, plate/paddle, epidural

- *CPT Assistant* Jun 98:3-4, Nov 98:18, Sep 99:3-4, Dec 08:8, Aug 10:8, Dec 10:14, Apr 11:10, Dec 20:13

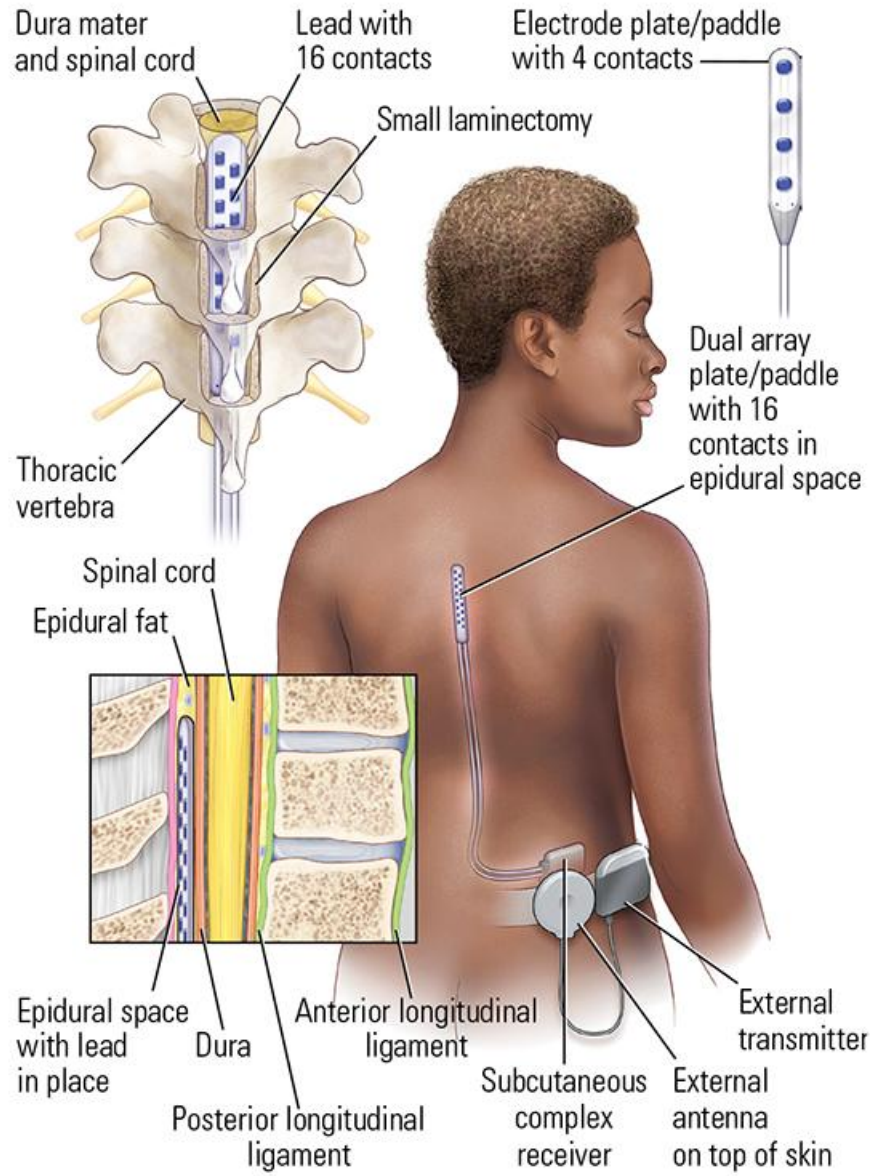
63661 Removal of spinal neurostimulator electrode percutaneous array(s), including fluoroscopy, when performed

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Feb 10:9, Aug 10:8, Jan 11:8, Apr 11:10
- *Clinical Examples in Radiology* Spring 11:10

63662 Removal of spinal neurostimulator electrode plate/paddle(s) placed via laminotomy or laminectomy, including fluoroscopy, when performed

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Feb 10:9, Aug 10:8, Apr 11:10, Dec 20:13
- *Clinical Examples in Radiology* Spring 11:10

63663 Revision including replacement, when performed, of spinal neurostimulator electrode percutaneous array(s), including fluoroscopy, when performed



- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Feb 10:9, Aug 10:8, Apr 11:10
- *Clinical Examples in Radiology* Spring 11:10

(Do not report 63663 in conjunction with 63661, 63662 for the same spinal level)

Placement of Neurostimulator Electrodes Through Laminectomy

63655

The electrode plate or paddle is placed in the epidural space via open exposure through large laminotomy or small laminectomy. The simple or complex receiver is subcutaneously implanted.

63664 Revision including replacement, when performed, of spinal neurostimulator electrode plate/paddle(s) placed via laminotomy or laminectomy, including fluoroscopy, when performed

- *CPT Changes: An Insider's View* 2010
- *CPT Assistant* Feb 10:9, Aug 10:8, Apr 11:10
- *Clinical Examples in Radiology* Spring 11:10

(Do not report 63664 in conjunction with 63661, 63662 for the same spinal level)

63685 Insertion or replacement of spinal neurostimulator pulse generator or receiver, requiring pocket creation and connection between electrode array and pulse generator or receiver

- *CPT Changes: An Insider's View* 2005, 2024
- *CPT Assistant* Jun 98:3-4, Sep 99:5, Feb 10:9, Oct 10:14, Dec 10:14, Apr 11:10, Dec 17:16, Dec 23:1

(Do not report 63685 in conjunction with 63688 for the same neurostimulator pulse generator or receiver)

(For insertion or replacement of spinal percutaneous electrode array with integrated neurostimulator, use 0784T)

63688 Revision or removal of implanted spinal neurostimulator pulse generator or receiver, with detachable connection to electrode array

- *CPT Changes: An Insider's View* 2024
- *CPT Assistant* Jun 98:3-4, Sep 99:5, Feb 10:9, Apr 11:11, Dec 23:1

(For electronic analysis with programming, when performed, of implanted spinal cord neurostimulator, see 95970, 95971, 95972)

(For revision or removal of spinal percutaneous electrode array and integrated neurostimulator, use 0785T)

(For revision or removal of sacral percutaneous electrode array and integrated neurostimulator, use 0787T)

Repair

63700 Repair of meningocele; less than 5 cm diameter
63702 larger than 5 cm diameter

(Do not use modifier 63 in conjunction with 63700, 63702)
63704 Repair of myelomeningocele; less than 5 cm diameter
63706 larger than 5 cm diameter

(Do not use modifier 63 in conjunction with 63704, 63706)

(For complex skin closure, see **Integumentary System**)
63707 Repair of dural/cerebrospinal fluid leak, not requiring laminectomy

➔ *CPT Changes: An Insider's View* 2002
63709 Repair of dural/cerebrospinal fluid leak or pseudomeningocele, with laminectomy

➔ *CPT Changes: An Insider's View* 2002

Shunt, Spinal CSF

63740 Creation of shunt, lumbar, subarachnoid-peritoneal, -pleural, or other; including laminectomy

➔ *CPT Assistant* Winter 90:8
63741 percutaneous, not requiring laminectomy

➔ *CPT Assistant* Winter 90:8
63744 Replacement, irrigation or revision of lumbosubarachnoid shunt
63746 Removal of entire lumbosubarachnoid shunt system without replacement

(For insertion of subarachnoid catheter with reservoir and/or pump for intermittent or continuous infusion of drug including laminectomy, see 62351 and 62360, 62361 or 62362)

(For insertion or replacement of subarachnoid or epidural catheter, with reservoir and/or pump for drug infusion without laminectomy, see 62350 and 62360, 62361 or 62362)

Extracranial Nerves, Peripheral Nerves, and Autonomic Nervous System

(For intracranial surgery on cranial nerves, see 61450, 61460, 61790)

Introduction/Injection of Anesthetic Agent (Nerve Block), Diagnostic or Therapeutic

(For destruction by neurolytic agent or chemodenervation, see 62280-62282, 64600-64681)

(For epidural or subarachnoid injection, see 62320, 62321, 62322, 62323, 62324, 62325, 62326, 62327)

(64400-64455, 64461, 64462, 64463, 64479, 64480, 64483, 64484, 64490-64495 are unilateral procedures. For bilateral procedures, report 64400, 64405, 64408, 64415, 64416, 64417, 64418, 64420, 64425-64455, 64461, 64463, 64479, 64483, 64490, 64493 with modifier 50. Report add-on codes 64421, 64462, 64480, 64484, 64491, 64492, 64494, 64495 twice, when performed bilaterally. Do not report modifier 50 in conjunction with 64421, 64462, 64480, 64484, 64491, 64492, 64494, 64495)

Somatic Nerves

Codes 64400-64489 describe the introduction/injection of an anesthetic agent and/or steroid into the somatic nervous system for diagnostic or therapeutic purposes. For injection or destruction of genicular nerve branches, see 64454, 64624, respectively.

Codes 64400-64450, 64454 describe the injection of an anesthetic agent(s) and/or steroid into a nerve plexus, nerve, or branch. These codes are reported once per nerve plexus, nerve, or branch as described in the descriptor regardless of the number of injections performed along the nerve plexus, nerve, or branch described by the code.

Imaging guidance and localization may be reported separately for 64400, 64405, 64408, 64420, 64421, 64425, 64430, 64435, 64449, 64450. Imaging guidance and any injection of contrast are inclusive components of 64415, 64416, 64417, 64445, 64446, 64447, 64448, 64451, 64454.

Codes 64455, 64479, 64480, 64483, 64484 are reported for single or multiple injections on the same site. For 64479, 64480, 64483, 64484, imaging guidance (fluoroscopy or CT) and any injection of contrast are inclusive components and are not reported separately. For 64455, imaging guidance (ultrasound, fluoroscopy, CT) and localization may be reported separately.

Codes 64461, 64462, 64463 describe injection of a paravertebral block (PVB). Codes 64486, 64487, 64488, 64489 describe injection of an abdominal fascial plane block. Imaging guidance and any injection of contrast are inclusive components of 64461, 64462, 64463, 64486, 64487, 64488, 64489 and are not reported separately.

64400 Injection(s), anesthetic agent(s) and/or steroid; trigeminal nerve, each branch (ie, ophthalmic, maxillary, mandibular)

Paravertebral Spinal Nerves and Branches

Codes 64490, 64491, 64492, 64493, 64494, 64495 describe the introduction/injection of a diagnostic or therapeutic agent into the paravertebral facet joint or into the nerves that innervate that joint by level. Facet joints are paired joints with one pair at each vertebral level. Imaging guidance and localization are required for the performance of paravertebral facet joint injections described by 64490, 64491, 64492, 64493, 64494, 64495. If imaging is not used, report 20552, 20553. If ultrasound guidance is used, report 0213T, 0214T, 0215T, 0216T, 0217T, 0218T.

When determining a level, count the number of facet joints injected, not the number of nerves injected. Therefore, if multiple nerves of the same facet joint are injected, it would be considered as a single level. The add-on codes are reported when second, third, or additional levels are injected during the same session.

When the procedure is performed bilaterally at the same level, report one unit of the primary code with modifier 50.

When the procedure is performed on the left side at one level and the right side at a different level in the same region, report one unit of the primary procedure and one unit of the add-on code.

When the procedure is performed bilaterally at one level and unilaterally at a different level(s), report one unit of the primary procedure for each level and append modifier 50 for the bilateral procedure. If the procedure is performed unilaterally at different levels, report one unit of the primary procedure and the appropriate add-on code(s).

Procedure	**Cervical/Thoracic**	**Lumbar/Sacral**
Multiple nerves injected at the same level	64490 X 1	64493 X 1
1 level injected unilaterally	64490 X 1	64493 X 1
1 level injected bilaterally	64490 50 X 1	64493 50 X 1
1 level injected bilaterally and 1 level injected unilaterally	64490 50 X 1 64491 X 1	64493 50 X 1 64494 X 1
2 levels injected unilaterally	64490 X 1 64491 X 1	64493 X 1 64494 X 1
2 levels injected bilaterally	64490 50 X 1 64491 X 2	64493 50 X 1 64494 X 2
3 or more levels injected unilaterally	64490 X 1 64491 X 1 64492 X 1	64493 X 1 64494 X 1 64495 X 1
3 or more levels injected bilaterally	64490 50 X 1 64491 X 2 64492 X 2	64493 50 X 1 64494 X 2 64495 X 2

(For bilateral paravertebral facet injection procedures, report 64490, 64493 with modifier 50. Report add-on codes 64491, 64492, 64494, 64495 twice, when performed bilaterally. Do not report modifier 50 in conjunction with 64491, 64492, 64494, 64495)

(For paravertebral facet injection of the T12-L1 joint, or nerves innervating that joint, use 64490)

(For unilateral paravertebral facet injection of the T12-L1 and L1-L2 levels or nerves innervating that joint, use 64490 and 64494 once)

(For bilateral paravertebral facet injection of the T12-L1 and L1-L2 levels or nerves innervating that joint, use 64490 with modifier 50 once and 64494 twice)

64490 Injection(s), diagnostic or therapeutic agent, paravertebral facet (zygapophyseal) joint (or nerves innervating that joint) with image guidance (fluoroscopy or CT), cervical or thoracic; single level

- *Clinical Examples in Radiology* Summer 14:5-6, Fall 20:14

(For transendoscopic ultrasound-guided transmural injection, anesthetic, celiac plexus, use 43253)

Neurostimulators (Peripheral Nerve)

For electronic analysis with programming, when performed, of peripheral nerve neurostimulator pulse generator or transmitters, see codes 95970, 95971, 95972. An electrode array is a catheter or other device with more than one contact. The function of each contact may be capable of being adjusted during programming services. Test stimulation to confirm correct target site placement of the electrode array(s) and/or to confirm the functional status of the system is inherent to placement, and is not separately reported as electronic analysis or programming of the neurostimulator pulse generator or receiver system. Electronic analysis (95970) at the time of implantation is not separately reported.

A neurostimulator system includes an implanted pulse generator or implanted receiver with an external transmitter, a collection of contacts, electrodes (electrode array), an extension if applicable, an external controller, and an external charger, if applicable. The electrode array provides the actual electrical stimulation. The pulse generator or receiver may be integrated with the electrode array (single-component implant) or have a detachable connection to the electrode array (two or more component implant).

Codes 64553, 64555, and 64561 may be used to report both temporary and permanent placement of percutaneous electrode arrays.

Codes 64590, 64596 describe two different approaches to placing a neurostimulator pulse generator or receiver. Code 64590 is used in conjunction with 64555, 64561 for permanent placement. Codes 64555, 64561 are used to report electrode array placement for a trial and for the permanent placement of the electrode array. Code 64590 is used to report the insertion of a neurostimulator pulse generator or receiver that requires creation of a pocket and connection between the electrode array and the neurostimulator pulse generator or receiver. Code 64596 is used to report the permanent placement of an integrated system, including the electrode array and receiver.

·In contrast to other stimulator services, such as 64553, that target a specific cranial nerve through invasive stimulator placement, code 64567 is used to :port stimulation of cranial nerve field branches through the percutaneous periauricular placement of a non-implanted electrical nerve field stimulator PENFS).◄

(For transcutaneous nerve stimulation [TENS], use 97014 for electrical stimulation requiring supervision only or use 97032 for electrical stimulation requiring constant attendance)

64553 Percutaneous implantation of neurostimulator electrode array; cranial nerve

CPT Changes: An Insider's View 2000, 2012

CPT Assistant Nov 99:38, Apr 01:9, Oct 18:8, Oct 21:7

►(For percutaneous electrical nerve field stimulation utilizing noninvasive, non-implanted stimulation of a cranial nerve field [ie, PENFS], use 64567)◄

(For percutaneous electrical stimulation of a cranial nerve using needle[s] or needle electrode[s] [eg, PENS, PNT], use 64999)

(For open placement of cranial nerve (eg, vagus, trigeminal) neurostimulator pulse generator or receiver, see 61885, 61886, as appropriate)

(For open implantation of vagus nerve integrated neurostimulation system, see 0908T, 0909T)

64555 peripheral nerve (excludes sacral nerve)

(For neurostimulators without a named target nerve [eg, field stimulation], use 64999)

(For percutaneous implantation or replacement of integrated neurostimulation system for bladder dysfunction, posterior tibial nerve, use 0587T)

(For open implantation or replacement of integrated neurostimulator system, posterior tibial nerve, see 0816T, 0817T)

64598 Revision or removal of neurostimulator electrode array, peripheral nerve, with integrated neurostimulator

CPT Changes: An Insider's View 2024

CPT Assistant Dec 23:1

(For revision or removal of electrode array only, use 64585)

(For revision or removal of integrated neurostimulation system, posterior tibial nerve, see 0588T, 0818T, 0819T)

►Autonomic Nervous System Modulation◄

►Codes 64654, 64655, 64656, 64657, 64658, 64659 describe treatment of resistant hypertension or heart failure using a baroreflex activation therapy (BAT) modulation system comprised of a lead implanted onto the carotid sinus, which is then tunneled and connected to a pulse generator placed in a subcutaneous pocket created in the pectoral region.

Code 64654 describes implantation of the BAT modulation system, including the pulse generator and lead.

Codes 64655, 64656 describe revision or replacement of one of the components of a BAT modulation system. Code 64655 describes revision or replacement of only the lead, and 64656 describes the revision or replacement of only the pulse generator.

Codes 64657, 64658, 64659 describe removal of one or both components of a BAT modulation system. Code 64657 describes removal of the total BAT system (ie, both the lead and pulse generator). Code 64658 describes the removal of only the lead. Code 64659 describes removal of only the pulse generator.

Interrogation and programming of the BAT system, when performed during the same session as system component implantation, replacement, or revision, is considered inherent to the procedure and not separately reported. Interrogation including programming, when performed, of the BAT system on a separate date is reported with 93145, 93146.◄

#● **64654** Initial open implantation of baroreflex activation therapy (BAT) modulation system, including lead placement onto the carotid sinus, lead tunnelling, connection to a pulse generator placed in a distant subcutaneous pocket (ie, total system), and intraoperative interrogation and programming

CPT Changes: An Insider's View 2026

►(Do not report 64654 in conjunction with 35701, 64655, 64656, 64657, 64658, 64659)◄

►(Do not report 64654 in conjunction with 93145, 93146, during the same operative session)◄

#● **64655** Revision or replacement of baroreflex activation therapy (BAT) modulation system, with intraoperative interrogation and programming; lead only

CPT Changes: An Insider's View 2026

►(Do not report 64655 in conjunction with 35701, 64654, 64656, 64657, 64658, 64659)◄

#● **64656** pulse generator only

CPT Changes: An Insider's View 2026

►(Do not report 64656 in conjunction with 35701, 64654, 64655, 64657, 64658, 64659)◄

►(Do not report 64655, 64656 in conjunction with 93145, 93146, during the same operative session)◄

#● **64657** Removal of baroreflex activation therapy (BAT) modulation system; total system, including lead and pulse generator

CPT Changes: An Insider's View 2026

►(Do not report 64657 in conjunction with 35701, 64654, 64655, 64656, 64658, 64659)◄

#● **64658** lead only

CPT Changes: An Insider's View 2026

►(Do not report 64658 in conjunction with 35701, 64654, 64655, 64656, 64657, 64659)◄

#● **64659** pulse generator only

CPT Changes: An Insider's View 2026

►(Do not report 64659 in conjunction with 35701, 64654, 64655, 64656, 64657, 64658)◄

►(For interrogation and/or programming of the BAT modulation system at a session separate from implantation, replacement, or revision, see 93145, 93146)◄

Destruction by Neurolytic Agent (eg, Chemical, Thermal, Electrical or Radiofrequency), Chemodenervation

Codes 64600-64681 include the injection of other therapeutic agents (eg, corticosteroids). Do not report diagnostic/therapeutic injections separately. Do not report a code labeled as destruction when using therapies that are not destructive of the target nerve (eg, pulsed radiofrequency), use 64999. For codes labeled as chemodenervation, the supply of the chemodenervation agent is reported separately.

(For chemodenervation of internal anal sphincter, use 46505)

(For chemodenervation of the bladder, use 52287)

(For chemodenervation for strabismus involving the extraocular muscles, use 67345)

(For chemodenervation guided by needle electromyography or muscle electrical stimulation, see 95873, 95874)

Somatic Nerves

64600 Destruction by neurolytic agent, trigeminal nerve; supraorbital, infraorbital, mental, or inferior alveolar branch

CPT Assistant Aug 05:13, Feb 10:9, Sep 12:14, Apr 19:9

Clinical Examples in Radiology Winter 18:19

64605 second and third division branches at foramen ovale

CPT Assistant Aug 05:13, Feb 10:9, Sep 12:14, Apr 19:9

64610 second and third division branches at foramen ovale under radiologic monitoring

CPT Assistant Aug 05:13, Feb 10:9, Sep 12:14, Apr 17:10, Apr 19:9

 # 64624 Destruction by neurolytic agent, genicular nerve branches including imaging guidance, when performed

CPT Changes: An Insider's View 2020

CPT Assistant Dec 19:8

(Do not report 64624 in conjunction with 64454)

(64624 requires the destruction of each of the following genicular nerve branches: superolateral, superomedial, and inferomedial. If a neurolytic agent for the purposes of destruction is not applied to all of these nerve branches, report 64624 with modifier 52)

 # 64625 Radiofrequency ablation, nerves innervating the sacroiliac joint, with image guidance (ie, fluoroscopy or computed tomography)

CPT Changes: An Insider's View 2020

CPT Assistant Dec 19:8

(Do not report 64625 in conjunction with 64635, 77002, 77003, 77012, 95873, 95874)

(For radiofrequency ablation, nerves innervating the sacroiliac joint, with ultrasound, use 76999)

(For bilateral procedure, report 64625 with modifier 50)

 # 64628 Thermal destruction of intraosseous basivertebral nerve, including all imaging guidance; first 2 vertebral bodies, lumbar or sacral

CPT Changes: An Insider's View 2022

CPT Assistant Mar 22:10

#+ 64629 each additional vertebral body, lumbar or sacral (List separately in addition to code for primary procedure)

CPT Changes: An Insider's View 2022

CPT Assistant Mar 22:10

(Use 64629 in conjunction with 64628)

(Do not report 64628, 64629 in conjunction with 77003, 77012)

64611 Chemodenervation of parotid and submandibular salivary glands, bilateral

CPT Changes: An Insider's View 2011

CPT Assistant Feb 11:10, Sep 12:14, Apr 19:9, Dec 20:14, Aug 22:18

(Report 64611 with modifier 52 if fewer than four salivary glands are injected)

64612 Chemodenervation of muscle(s); muscle(s) innervated by facial nerve, unilateral (eg, for blepharospasm, hemifacial spasm)

- *CPT Changes: An Insider's View* 2000, 2001, 2013
- *CPT Assistant* Oct 98:10, Apr 01:2, Aug 05:13, Sep 06:5, Dec 08:9, Jan 09:8, Feb 10:9, 13, Dec 11:19, Sep 12:14, Apr 13:5, Dec 13:10, Jan 14:6, May 14:5, Apr 19:9, Aug 22:18, Dec 24:58

(For bilateral procedure, report 64612 with modifier 50)

64615 muscle(s) innervated by facial, trigeminal, cervical spinal and accessory nerves, bilateral (eg, for chronic migraine)

- *CPT Changes: An Insider's View* 2013
- *CPT Assistant* Apr 13:5, Jan 14:6, Apr 19:9, Aug 22:18, Dec 24:58

(Report 64615 only once per session)

(Do not report 64615 in conjunction with 64612, 64616, 64617, 64642, 64643, 64644, 64645, 64646, 64647)

(For guidance see 95873, 95874. Do not report more than one guidance code for 64615)

64616 neck muscle(s), excluding muscles of the larynx, unilateral (eg, for cervical dystonia, spasmodic torticollis)

- *CPT Changes: An Insider's View* 2014
- *CPT Assistant* Jan 14:6, May 14:5, Apr 19:9, Aug 22:18

(For bilateral procedure, report 64616 with modifier 50)

(For chemodenervation guided by needle electromyography or muscle electrical stimulation, see 95873, 95874. Do not report more than one guidance code for any unit of 64616)

64617 larynx, unilateral, percutaneous (eg, for spasmodic dysphonia), includes guidance by needle electromyography, when performed

- *CPT Changes: An Insider's View* 2014
- *CPT Assistant* Jan 14:6, Apr 19:9

(For bilateral procedure, report 64617 with modifier 50)

(Do not report 64617 in conjunction with 95873, 95874)

(For diagnostic needle electromyography of the larynx, use 95865)

(For chemodenervation of the larynx performed with direct laryngoscopy, see 31570, 31571)

64620 Destruction by neurolytic agent, intercostal nerve

- *CPT Changes: An Insider's View* 2000
- *CPT Assistant* Nov 99:38, Aug 05:13, Sep 12:14, Jan 14:6, Apr 19:9, Nov 19:15
- *Clinical Examples in Radiology* Winter 25:17

(Imaging guidance [fluoroscopy or CT] are inclusive components of 64633-64636)

(Image guidance [fluoroscopy or CT] and any injection of contrast are inclusive components of 64633-64636. Image guidance and localization are required for the performance of paravertebral facet joint nerve destruction by neurolytic agent described by 64633-64636. If CT or fluoroscopic imaging is not used, report 64999)

Report 64633, 64634, 64635, 64636 per joint, not per nerve. Although two nerves innervate each facet joint, only one code may be reported for each joint denervated, regardless of the number of nerves treated. Use 64634 or 64636 to report each additional facet joint at a different vertebral level in the same spinal region.

For neurolytic destruction of the nerves innervating the T12-L1 paravertebral facet joint, use 64633.

Do not report 64633, 64634, 64635, 64636 for non-thermal facet joint denervation including chemical, low-grade thermal energy (<80 degrees Celsius), or any form of pulsed radiofrequency. To appropriately report any of these modalities, use 64999.

64624 Code is out of numerical sequence. See 64605-64612

64625 Code is out of numerical sequence. See 64605-64612

64628 Code is out of numerical sequence. See 64610-64612

64629 Code is out of numerical sequence. See 64610-64612

 # 64633 Destruction by neurolytic agent, paravertebral facet joint nerve(s), with imaging guidance (fluoroscopy or CT); cervical or thoracic, single facet joint

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Jun 12:10, Jul 12:6, Sep 12:14, Apr 13:10, Feb 15:9, Apr 19:9, Dec 20:13
- *Clinical Examples in Radiology* Winter 25:17

(For bilateral procedure, report 64633 with modifier 50)

#+ 64634 cervical or thoracic, each additional facet joint (List separately in addition to code for primary procedure)

- *CPT Changes: An Insider's View* 2012
- *CPT Assistant* Jun 12:10, Jul 12:6, Sep 12:14, Apr 13:10, Feb 15:9, Apr 19:9, Dec 20:13
- *Clinical Examples in Radiology* Winter 25:17

(Use 64634 in conjunction with 64633)

(For bilateral procedure, report 64634 twice. Do not report modifier 50 in conjunction with 64634)
