# ICD-10-CM Table of Neoplasms

The list below gives the code numbers for neoplasms by anatomical site. For each site there are six possible code numbers according to whether the neoplasm in question is malignant, benign, in situ, of uncertain behavior, or of unspecified nature. The description of the neoplasm will often indicate which of the six columns is appropriate; e.g., malignant melanoma of skin, benign fibroadenoma of breast, carcinoma in situ of cervix uteri.

Where such descriptors are not present, the remainder of the Index should be consulted where guidance is given to the appropriate column for each morphological (histological) variety listed; e.g., Mesonephroma—*see* Neoplasm, malignant; Embryoma—*see also* Neoplasm, uncertain behavior; Disease, Bowen's—*see* Neoplasm, skin, in situ. However, the guidance in the Index can be overridden if one of the descriptors mentioned above is present; e.g., malignant adenoma of colon is coded to C18.9 and not to D12.6 as the adjective 'malignant' overrides the Index entry 'Adenoma—*see also* Neoplasm, benign.'

Codes listed with a dash (-) following the code have a required additional character for laterality. The Tabular List must be reviewed for the complete code.

| Neoplasm | Malignant Primary | Malignant Secondary | Ca in situ | Benign | Uncertain Behavior | Unspecified Behavior |
|---|---|---|---|---|---|---|
| **Neoplasm, neoplastic** | C80.1 | C79.9 | D09.9 | D36.9 | D48.9 | D49.9 |

# ICD-10-CM Index to External Causes of Injuries

## A

- **Abandonment** (causing exposure to weather conditions) (with intent to injure or kill) NEC X58 ☑
- **Abuse** (adult) (child) (mental) (physical) (sexual) X58 ☑
- **Accident** (to) X58 ☑
  - aircraft (in transit) (powered) (*see also* Accident, transport, aircraft)
    - due to, caused by cataclysm — *see* Forces of nature, by type
  - animal-drawn vehicle — *see* Accident, transport, animal-drawn vehicle occupant
  - animal-rider — *see* Accident, transport, animal-rider
  - automobile — *see* Accident, transport, car occupant
  - barefoot water skier V94.4 ☑
  - boat, boating (*see also* Accident, watercraft)
    - striking swimmer
      - powered V94.11 ☑
      - unpowered V94.12 ☑
  - bus — *see* Accident, transport, bus occupant
  - cable car, not on rails V98.0 ☑
    - on rails — *see* Accident, transport, streetcar occupant
  - car — *see* Accident, transport, car occupant
  - caused by, due to
    - animal NEC W64 ☑
    - chain hoist W24.0 ☑
    - cold (excessive) — *see* Exposure, cold
    - corrosive liquid, substance — *see* Table of Drugs and Chemicals
    - cutting or piercing instrument — *see* Contact, with, by type of instrument
    - drive belt W24.0 ☑
    - electric

current — *see* Exposure, electric current
motor (*see also* Contact, with, by type of machine) W31.3 ☑
current (of) W86.8 ☑
environmental factor NEC X58 ☑
explosive material — *see* Explosion
fire, flames — *see* Exposure, fire
firearm missile — *see* Discharge, firearm by type
heat (excessive) — *see* Heat
hot — *see* Contact, with, hot
ignition — *see* Ignition
lifting device W24.0 ☑
lightning — *see* subcategory T75.0 ☑
causing fire — *see* Exposure, fire
machine, machinery — *see* Contact, with, by type of machine
natural factor NEC X58 ☑
pulley (block) W24.0 ☑
radiation — *see* Radiation
steam X13.1 ☑
inhalation X13.0 ☑
pipe X16 ☑
thunderbolt — *see* subcategory T75.0 ☑
causing fire — *see* Exposure, fire
transmission device W24.1 ☑
coach — *see* Accident, transport, bus occupant
coal car — *see* Accident, transport, industrial vehicle occupant
diving (*see also* Fall, into, water)
with
drowning or submersion — *see* Drowning
forklift — *see* Accident, transport, industrial vehicle occupant
heavy transport vehicle NOS — *see* Accident, transport, truck occupant
ice yacht V98.2 ☑
in

- medical, surgical procedure
  - as, or due to misadventure — *see* Misadventure
  - causing an abnormal reaction or later complication without mention of misadventure (*see also* Complication of or following, by type of procedure) Y84.9
- land yacht V98.1 ☑
- late effect of — *see* W00-X58 with 7th character S
- logging car — *see* Accident, transport, industrial vehicle occupant
- machine, machinery (*see also* Contact, with, by type of machine)
  - on board watercraft V93.69 ☑
    - explosion — *see* Explosion, in, watercraft
    - fire — *see* Burn, on board watercraft
    - powered craft V93.63 ☑
      - ferry boat V93.61 ☑
      - fishing boat V93.62 ☑
      - jetskis V93.63 ☑
      - liner V93.61 ☑
      - merchant ship V93.60 ☑
      - passenger ship V93.61 ☑
      - sailboat V93.64 ☑
- mine tram — *see* Accident, transport, industrial vehicle occupant
- mobility scooter (motorized) — *see* Accident, transport, pedestrian, conveyance, specified type NEC
- motor scooter — *see* Accident, transport, motorcycle
- motor vehicle NOS (traffic) (*see also* Accident, transport) V89.2 ☑
  - nontraffic V89.0 ☑
  - three-wheeled NOS — *see* Accident, transport, three-wheeled motor vehicle occupant
- motorcycle NOS — *see* Accident, transport, motorcycle
- nonmotor vehicle NOS (nontraffic) (*see also* Accident, transport) V89.1 ☑
  - traffic NOS V89.3 ☑
- nontraffic (victim's mode of transport NOS) V88.9 ☑
  - collision (between) V88.7 ☑
    - bus and truck V88.5 ☑
    - car and

- bus V88.3 ☑
- pickup V88.2 ☑
- three-wheeled motor vehicle V88.0 ☑
- train V88.6 ☑
- truck V88.4 ☑
- two-wheeled motor vehicle V88.0 ☑
- van V88.2 ☑

specified vehicle NEC and

- three-wheeled motor vehicle V88.1 ☑
- two-wheeled motor vehicle V88.1 ☑

known mode of transport — *see* Accident, transport, by type of vehicle

noncollision V88.8 ☑

on board watercraft V93.89 ☑

powered craft V93.83 ☑

- ferry boat V93.81 ☑
- fishing boat V93.82 ☑
- jetskis V93.83 ☑
- liner V93.81 ☑
- merchant ship V93.80 ☑
- passenger ship V93.81 ☑

unpowered craft V93.88 ☑

- canoe V93.85 ☑
- inflatable V93.86 ☑
  - in tow
    - recreational V94.31 ☑
    - specified NEC V94.32 ☑
- kayak V93.85 ☑
- sailboat V93.84 ☑
- surf-board V93.88 ☑
- water skis V93.87 ☑
- windsurfer V93.88 ☑

parachutist V97.29 ☑

- entangled in object V97.21 ☑
- injured on landing V97.22 ☑

pedal cycle — *see* Accident, transport, pedal cyclist

pedestrian (on foot)
- with
  - another pedestrian W51 ☑
    - with fall W03 ☑
      - due to ice or snow W00.0 ☑
    - on pedestrian conveyance NEC V00.09 ☑
  - rider of
    - hoverboard V00.038 ☑
    - Segway V00.038 ☑
    - standing
      - electric scooter V00.031 ☑
      - micro-mobility pedestrian conveyance NEC V00.038 ☑
  - roller skater (in-line) V00.01 ☑
  - skate boarder V00.02 ☑
  - transport vehicle — *see* Accident, transport
- on pedestrian conveyance — *see* Accident, transport, pedestrian, conveyance

pick-up truck or van — *see* Accident, transport, pickup truck occupant

quarry truck — *see* Accident, transport, industrial vehicle occupant

railway vehicle (any) (in motion) — *see* Accident, transport, railway vehicle occupant
- due to cataclysm — *see* Forces of nature, by type

scooter (non-motorized) — *see* Accident, transport, pedestrian, conveyance, scooter

sequelae of — *see* W00-X58 with 7th character S

skateboard — *see* Accident, transport, pedestrian, conveyance, skateboard

# Chapter 1: Certain Infectious and Parasitic Diseases (A00-B99)

## Chapter-Specific Coding Guidelines

**I.C.1. Chapter 1: Certain Infectious and Parasitic Diseases (A00-B99), U07.1, U09.9**

**a. Human Immunodeficiency Virus (HIV) Infections**

**1) Code only confirmed cases**

Code only confirmed cases of HIV infection/illness. This is an exception to the hospital inpatient guideline Section II, H.

In this context, "confirmation" does not require documentation of positive serology or culture for HIV; the provider's diagnostic statement that the patient is HIV positive, or has an HIV-related illness is sufficient.

**2) Selection and sequencing of HIV codes**

**(a)** *HIV disease*

**If the term "AIDS" or "HIV disease" is documented or if the patient is treated for any HIV-related illness or is described as having any condition(s) resulting from the patient's HIV positive status; code B20, Human immunodeficiency virus [HIV], should be assigned.**

**(b) Patient admitted for HIV-related condition**

If a patient is admitted for an HIV-related condition, the principal diagnosis should be B20, Human immunodeficiency virus [HIV] disease followed by additional diagnosis codes for all reported HIV-related conditions.

An exception to this guideline is if the reason for admission is hemolytic-uremic syndrome associated with HIV disease. Assign code D59.31, Infection-associated hemolytic-uremic syndrome, followed by code B20, Human immunodeficiency virus [HIV] disease.

**(c) Patient with HIV disease admitted for unrelated condition**

If a patient with HIV disease is admitted for an unrelated condition (such as a traumatic injury), the code for the unrelated condition (e.g., the nature of injury code) should be the principal diagnosis. Other diagnoses would be B20 followed by additional diagnosis codes for all reported HIV-related conditions. **Code B20 would be reported as a secondary diagnosis. Codes for other documented conditions should also be reported as secondary diagnoses.**

**(d)** *Patient newly diagnosed with HIV disease*

Whether the patient is newly diagnosed or has had previous admissions/encounters for HIV conditions is irrelevant to the sequencing decision.

**(e) Asymptomatic human immunodeficiency virus**

**When "HIV positive," "HIV test positive," or similar terminology is documented, and there is no documentation of symptoms or HIV-related illness, code Z21, Asymptomatic human immunodeficiency virus [HIV] infection status, should be assigned.**

**(f)** *Inconclusive HIV serology*

**Patients with documentation of inconclusive HIV serology, may be assigned code R75,** Inconclusive laboratory evidence of human immunodeficiency virus [HIV].

**(g) Previously diagnosed HIV-related illness**

**Patients with documentation of a prior diagnosis of an HIV-related illness should be coded to B20. Once an HIV-related illness has developed, code B20 should always be assigned on every subsequent admission/encounter. Patients previously diagnosed with any HIV illness (B20) should never be assigned to R75, Inconclusive laboratory evidence of human immunodeficiency virus [HIV] or Z21, Asymptomatic human immunodeficiency virus [HIV] infection status.**

(h) **HIV Infection in Pregnancy, Childbirth and the Puerperium**

**When a patient presents during pregnancy, childbirth or the puerperium with documented symptomatic HIV disease or an HIV related illness, assign a code from subcategory O98.7, Human immunodeficiency [HIV] disease complicating pregnancy, childbirth and the puerperium, followed by code B20 and additional code(s) for any HIV-related illness(es). Codes from Chapter 15 always take sequencing priority.**

**When a patient presents during pregnancy, childbirth or the puerperium with documented asymptomatic HIV infection status or is HIV-positive, assign a code from subcategory O98.7 followed by code Z21.**

(i) *Encounters for HIV testing*

**If a patient without signs or symptoms is tested for HIV, assign code Z11.4, Encounter for screening for human immunodeficiency virus [HIV].** Use additional codes for any associated high-risk behavior, if applicable.

**If a patient with signs or symptoms of HIV presents for HIV testing, code the signs and symptoms. An additional counseling code Z71.7, Human immunodeficiency virus [HIV] counseling, may be assigned if counseling is provided during the encounter for the test. Code Z11.4, Encounter for screening for human immunodeficiency virus [HIV], should not be assigned if HIV signs or symptoms are present.**

**When a patient presents for follow up regarding their HIV test results and the test result is negative, assign code Z71.7, Human immunodeficiency virus [HIV] counseling.**

If the results are positive, see previous guidelines and assign codes as appropriate.

(j) *HIV disease or HIV positive status* **managed by antiretroviral medication**

If a patient with documented HIV disease, HIV-related illness or AIDS is currently managed on antiretroviral medications, assign code B20, Human immunodeficiency virus [HIV] disease.

**If a patient with documented HIV positive status is currently managed on antiretroviral medication, assign code Z21, Asymptomatic human immunodeficiency virus [HIV] infection status, in the absence of any additional documentation of HIV disease, HIV-related illness or AIDS.**

Code Z79.899, Other long term (current) drug therapy, may be assigned as an additional code to identify the long-term (current) use of antiretroviral medications.

(k) **Encounter for HIV Prophylaxis Measures**

When a patient **presents** for administration of pre-exposure prophylaxis medication for HIV, assign code Z29.81, Encounter for HIV pre-exposure prophylaxis. Pre-exposure prophylaxis (PrEP) is intended to prevent infection in people who are at risk for getting HIV through sex or injection drug use. Any risk factors for HIV should also be coded.

**b. Infectious agents as the cause of diseases classified to other chapters**

Certain infections are classified in chapters other than Chapter 1 and no organism is identified as part of the infection code. In these instances, it is necessary to use an additional code from Chapter 1 to identify the organism. A code from category B95, Streptococcus, Staphylococcus, and Enterococcus as the cause of diseases classified to other chapters, B96, Other bacterial agents as the cause of diseases classified to other chapters, or B97, Viral agents as the cause of diseases classified to other chapters, is to be used as an additional code to identify the organism. An instructional note will be found at the infection code advising that an additional organism code is required.

**c. Infections resistant to antibiotics**

Many bacterial infections are resistant to current antibiotics. It is necessary to identify all infections documented as antibiotic resistant. Assign a code from category Z16, Resistance to antimicrobial drugs, following the infection code only if the infection code does not identify drug resistance.

**d. Sepsis, Severe Sepsis, and Septic Shock Infections resistant to antibiotics**

**1) Coding of Sepsis and Severe Sepsis**

**(a) Sepsis**

For a diagnosis of sepsis, assign the appropriate code for the underlying systemic infection. If the type of infection or causal organism is not further specified, assign code A41.9, Sepsis, unspecified organism.

A code from subcategory R65.2, Severe sepsis, should not be assigned unless severe sepsis or an associated acute organ dysfunction is documented.

**(i)** Negative or inconclusive blood cultures and sepsis
Negative or inconclusive blood cultures do not preclude a diagnosis of sepsis in patients with clinical evidence of the condition; however, the provider should be queried.

**(ii)** Urosepsis
The term urosepsis is a nonspecific term. It is not to be considered synonymous with sepsis. It has no default code in the Alphabetic Index.
Should a provider use this term, he/she must be queried for clarification.

**(iii)** Sepsis with organ dysfunction
If a patient has sepsis and associated acute organ dysfunction or multiple organ dysfunction (MOD), follow the instructions for coding severe sepsis.

**(iv)** Acute organ dysfunction that is not clearly associated with the sepsis
If a patient has sepsis and an acute organ dysfunction, but the medical record documentation indicates that the acute organ dysfunction is related to a medical condition other than the sepsis, do not assign a code from subcategory R65.2, Severe sepsis. An acute organ dysfunction must be associated with the sepsis in order to assign the severe sepsis code. If the documentation is not clear as to whether an acute organ dysfunction is related to the sepsis or another medical condition, query the provider.

**(b) Severe sepsis**
The coding of severe sepsis requires a minimum of 2 codes: first a code for the underlying systemic infection, followed by a code from subcategory R65.2, Severe sepsis. If the causal organism is not documented, assign code A41.9, Sepsis, unspecified organism, for the infection. Additional code(s) for the associated acute organ dysfunction are also required.
Due to the complex nature of severe sepsis, some cases may require querying the provider prior to assignment of the codes.

**2) Septic shock**
Septic shock generally refers to circulatory failure associated with severe sepsis, and therefore, it represents a type of acute organ dysfunction.
For cases of septic shock, the code for the systemic infection should be sequenced first, followed by code R65.21, Severe sepsis with septic shock or code T81.12, Postprocedural septic shock. Any additional codes for the other acute organ dysfunctions should also be assigned. As noted in the sequencing instructions in the Tabular List, the code for septic shock cannot be assigned as a principal diagnosis.

**3) Sequencing of severe sepsis**
If severe sepsis is present on admission, and meets the definition of principal diagnosis, the underlying systemic infection should be assigned as principal diagnosis followed by the appropriate code from subcategory R65.2 as required by the sequencing rules in the Tabular List. A code from subcategory R65.2 can never be assigned as a principal diagnosis.
When severe sepsis develops during an encounter (it was not present on admission), the underlying systemic infection and the appropriate code from subcategory R65.2 should be assigned as secondary diagnoses.
Severe sepsis may be present on admission, but the diagnosis may not be confirmed until sometime after admission. If the documentation is not clear whether severe sepsis was present on admission, the provider should be queried.
*For infection-associated hemolytic-uremic syndrome with severe sepsis, see guideline I.C.1.d.9.*

**4) Sepsis or severe sepsis with a localized infection**
If the reason for admission is sepsis or severe sepsis and a localized infection, such as pneumonia or cellulitis, a code(s) for the underlying systemic infection should be assigned first and the code for the localized infection should be assigned as a secondary diagnosis. If the patient has severe sepsis, a code from subcategory R65.2 should also be assigned as a secondary diagnosis. If the patient is admitted with a localized infection, such as pneumonia, and sepsis/severe sepsis doesn't develop until after admission, the localized infection should be assigned first, followed by the appropriate sepsis/severe sepsis codes.
*For hemolytic-uremic syndrome associated with sepsis, see guideline I.C.1.d.9.*

**5) Sepsis due to a postprocedural infection**

**(a) Documentation of causal relationship**
As with all postprocedural complications, code assignment is based on the provider's documentation of the relationship between the infection and the procedure.

**(b) Sepsis due to a postprocedural infection**

For sepsis following a postprocedural wound (surgical site) infection, a code from T81.41 to T81.43, Infection following a procedure, **T81.49, Infection following a procedure, other surgical site,** or a code from O86.00 to O86.03, Infection of obstetric surgical wound, **or code O86.09, Infection of obstetric surgical wound, other surgical site,** that identifies the site of the infection should be sequenced first, if known. Assign an additional code for sepsis following a procedure (T81.44) or sepsis following an obstetrical procedure (O86.04). Use an additional code to identify the infectious agent. If the patient has severe sepsis, the appropriate code from subcategory R65.2 should also be assigned with the additional code(s) for any acute organ dysfunction.

For infections following infusion, transfusion, therapeutic injection, or immunization, a code from subcategory T80.2, Infections following infusion, transfusion, and therapeutic injection, or code T88.0-, Infection following immunization, should be coded first, followed by the code for the specific infection. If the patient has severe sepsis, the appropriate code from subcategory R65.2 should also be assigned, with the additional codes(s) for any acute organ dysfunction.

**(c) Postprocedural infection and postprocedural septic shock**

If a postprocedural infection has resulted in postprocedural septic shock, assign the codes indicated above for sepsis due to a postprocedural infection, followed by code T81.12-, Postprocedural septic shock. Do not assign code R65.21, Severe sepsis with septic shock. Additional code(s) should be assigned for any acute organ dysfunction.

**6) Sepsis and severe sepsis associated with a noninfectious process (condition)**

In some cases, a noninfectious process (condition) such as trauma, may lead to an infection which can result in sepsis or severe sepsis. If sepsis or severe sepsis is documented as associated with a noninfectious condition, such as a burn or serious injury, and this condition meets the definition for principal diagnosis, the code for the noninfectious condition should be sequenced first, followed by the code for the resulting infection. If severe sepsis is present, a code from subcategory R65.2 should also be assigned with any associated organ dysfunction(s) codes. It is not necessary to assign a code from subcategory R65.1, Systemic inflammatory response syndrome (SIRS) of non-infectious origin, for these cases.

If the infection meets the definition of principal diagnosis, it should be sequenced before the non-infectious condition. When both the associated non-infectious condition and the infection meet the definition of principal diagnosis, either may be assigned as principal diagnosis.

Only one code from category R65, Symptoms and signs specifically associated with systemic inflammation and infection, should be assigned. Therefore, when a non-infectious condition leads to an infection resulting in severe sepsis, assign the appropriate code from subcategory R65.2, Severe sepsis. Do not additionally assign a code from subcategory R65.1, Systemic inflammatory response syndrome (SIRS) of non- infectious origin.

*See Section I.C.18. SIRS due to non-infectious process.*

**7) Sepsis and septic shock complicating abortion, pregnancy, childbirth, and the puerperium**

*See Section I.C.15. Sepsis and septic shock complicating abortion, pregnancy, childbirth and the puerperium.*

**8) Newborn sepsis**

*See Section I.C.16. f. Bacterial sepsis of Newborn.*

**9) Hemolytic-uremic syndrome associated with sepsis**

If the reason for admission is hemolytic-uremic syndrome that is associated with sepsis, assign code D59.31, Infection-associated hemolytic-uremic syndrome, as the principal diagnosis. Codes for the underlying systemic infection and any other conditions (such as severe sepsis) should be assigned as secondary diagnoses.

**e. Methicillin Resistant Staphylococcus aureus (MRSA) Conditions**

**1) Selection and sequencing of MRSA codes**

**(a) Combination codes for MRSA infection**

When a patient is diagnosed with an infection that is due to methicillin resistant *Staphylococcus aureus* (MRSA), and that infection has a combination code that includes the causal organism (e.g., sepsis, pneumonia) assign the appropriate combination code for the condition (e.g., code A41.02, Sepsis due to Methicillin resistant Staphylococcus aureus or code J15.212, Pneumonia due to Methicillin resistant Staphylococcus aureus). Do not assign code B95.62, Methicillin resistant Staphylococcus aureus infection as the cause of diseases classified elsewhere, as an additional code, because the combination code includes the type of infection and the MRSA organism. Do not assign a code from subcategory Z16.11, Resistance to penicillins, as an additional diagnosis.

*See Section C.1. for instructions on coding and sequencing of sepsis and severe sepsis.*

**(b) Other codes for MRSA infection**

When there is documentation of a current infection (e.g., wound infection, stitch abscess, urinary tract infection) due to MRSA, and that infection does not have a combination code that includes the causal organism, assign the appropriate code to identify the condition along with code B95.62, Methicillin resistant Staphylococcus aureus infection as the cause of diseases classified elsewhere for the MRSA infection. Do not assign a code from subcategory Z16.11, Resistance to penicillins.

**(c) Methicillin susceptible Staphylococcus aureus (MSSA) and MRSA colonization**

The condition or state of being colonized or carrying MSSA or MRSA is called colonization or carriage, while an individual person is described as being colonized or being a carrier. Colonization means that MSSA or MSRA is present on or in the body without necessarily causing illness. A positive MRSA colonization test might be documented by the provider as "MRSA screen positive" or "MRSA nasal swab positive".

Assign code Z22.322, Carrier or suspected carrier of Methicillin resistant Staphylococcus aureus, for patients documented as having MRSA colonization. Assign code Z22.321, Carrier or suspected carrier of Methicillin susceptible Staphylococcus aureus, for patients documented as having MSSA colonization. Colonization is not necessarily indicative of a disease process or as the cause of a specific condition the patient may have unless documented as such by the provider.

**(d) MRSA colonization and infection**

If a patient is documented as having both MRSA colonization and infection during a hospital admission, code Z22.322, Carrier or suspected carrier of Methicillin resistant Staphylococcus aureus, and a code for the MRSA infection may both be assigned.

**f. Zika virus infections**

**1) Code only confirmed cases**

Code only a confirmed diagnosis of Zika virus (A92.5, Zika virus disease) as documented by the provider. This is an exception to the hospital inpatient guideline Section II, H. In this context, "confirmation" does not require documentation of the type of test performed; the provider's diagnostic statement that the condition is confirmed is sufficient. This code should be assigned regardless of the stated mode of transmission.

If the provider documents "suspected", "possible" or "probable" Zika, do not assign code A92.5. Assign a code(s) explaining the reason for encounter (such as fever, rash, or joint pain) or Z20.821, Contact with and (suspected) exposure to Zika virus.

**g. Coronavirus infections**

**1) COVID-19 infection (infection due to SARS-CoV-2)**

**(a) Code only confirmed cases**

Code only a confirmed diagnosis of the 2019 novel coronavirus disease (COVID-19) as documented by the provider or documentation of a positive COVID-19 test result. For a confirmed diagnosis, assign code U07.1, COVID-19. This is an exception to the hospital inpatient guideline Section II, H. In this context, "confirmation" does not require documentation of a positive test result for COVID-19; the provider's documentation that the individual has COVID-19 is sufficient.

If the provider documents "suspected," "possible," "probable," or "inconclusive" COVID-19, do not assign code U07.1. Instead, code the signs and symptoms reported. See guideline I.C.1.g.1.g.

**(b) Sequencing of codes**

When COVID-19 meets the definition of principal diagnosis, code U07.1, COVID-19, should be sequenced first, followed by the appropriate codes for associated manifestations, except when another guideline requires that certain codes be sequenced first, such as obstetrics, sepsis, or transplant complications.

*For a COVID-19 infection that progresses to sepsis, see Section I.C.1.d. Sepsis, Severe Sepsis, and Septic Shock*

*See Section I.C.15.s. for COVID-19 infection in pregnancy, childbirth, and the puerperium*

*See Section I.C.16.h. for COVID-19 infection in newborn*

*For a COVID-19 infection in a lung transplant patient, see Section I.C.19.g.3.a. Transplant complications other than kidney.*

**(c) Acute respiratory manifestations of COVID-19**

When the reason for the encounter/admission is a respiratory manifestation of COVID-19, assign code U07.1, COVID-19, as the principal/first-listed diagnosis and assign code(s) for the respiratory manifestation(s) as additional diagnoses.

The following conditions are examples of common respiratory manifestations of COVID-19.

**(i)** Pneumonia

For a patient with pneumonia confirmed as due to COVID-19, assign codes U07.1, COVID-19, and J12.82, Pneumonia due to coronavirus disease 2019.

**(ii)** Acute bronchitis

For a patient with acute bronchitis confirmed as due to COVID-19, assign codes U07.1, and J20.8, Acute bronchitis due to other specified organisms.

Bronchitis not otherwise specified (NOS) due to COVID-19 should be coded using code U07.1 and J40, Bronchitis, not specified as acute or chronic.

**(iii)** Lower respiratory infection

If the COVID-19 is documented as being associated with a lower respiratory infection, not otherwise specified (NOS), or an acute respiratory infection, NOS, codes U07.1 and J22, Unspecified acute lower respiratory infection, should be assigned.

If the COVID-19 is documented as being associated with a respiratory infection, NOS, codes U07.1 and J98.8, Other specified respiratory disorders, should be assigned.

**(iv)** Acute respiratory distress syndrome

For acute respiratory distress syndrome (ARDS) due to COVID-19, assign codes U07.1, and J80, Acute respiratory distress syndrome.

**(v)** Acute respiratory failure

For acute respiratory failure due to COVID-19, assign code U07.1, and code J96.0-, Acute respiratory failure.

**(d) Non-respiratory manifestations of COVID-19**

When the reason for the encounter/admission is a non-respiratory manifestation (e.g., viral enteritis) of COVID-19, assign code U07.1, COVID-19, as the principal/first-listed diagnosis and assign code(s) for the manifestation(s) as additional diagnoses.

**(e) Exposure to COVID-19**

For asymptomatic individuals with actual or suspected exposure to COVID-19, assign code Z20.822, Contact with and (suspected) exposure to COVID-19.

For symptomatic individuals with actual or suspected exposure to COVID-19 and the infection has been ruled out, or test results are inconclusive or unknown, assign code Z20.822, Contact with and (suspected) exposure to COVID-19. See guideline I.C.21.c.1, Contact/Exposure, for additional guidance regarding the use of category Z20 codes.

If COVID-19 is confirmed, see guideline I.C.1.g.1.a.

**(f) Screening for COVID-19**

For screening for COVID-19, including preoperative testing, assign code Z11.52, Encounter for screening for COVID-19.

**(g) Signs and symptoms without definitive diagnosis of COVID-19**

For patients presenting with any signs/symptoms associated with COVID-19 (such as fever, etc.) but a definitive diagnosis has not been established, assign the appropriate code(s) for each of the presenting signs and symptoms such as:

- ❑ R05.1, Acute cough, or R05.9, Cough, unspecified
- ❑ R06.02 Shortness of breath
- ❑ R50.9 Fever, unspecified

If a patient with signs/symptoms associated with COVID-19 also has an actual or suspected contact with or exposure to COVID-19, assign Z20.822, Contact with and (suspected) exposure to COVID-19, as an additional code.

**(h) Asymptomatic individuals who test positive for COVID-19**

For asymptomatic individuals who test positive for COVID-19 **and there is no provider documentation of a diagnosis of COVID-19, query the provider as to whether or not the individual has COVID-19. A false positive laboratory test is possible, and it is the provider's responsibility to confirm the diagnosis and document accordingly.**

**(i) Personal history of COVID-19**

For patients with a history of COVID-19, assign code Z86.16, Personal history of COVID-19.

**(j) Follow-up visits after COVID-19 infection has resolved**

For individuals who previously had COVID-19, without residual symptom(s) or condition(s), and are being seen for follow-up evaluation, and COVID-19 test results are negative, assign codes Z09, Encounter for follow-up examination after completed treatment for conditions other than malignant neoplasm, and Z86.16, Personal history of COVID-19.

For follow-up visits for individuals with symptom(s) or condition(s) related to a previous COVID-19 infection, see guideline I.C.1.g.1.m.

*See Section I.C.21.c.8, Factors influencing health states and contact with health services, Follow-up*

**(k) Encounter for antibody testing**

For an encounter for antibody testing that is not being performed to confirm a current COVID-19 infection, nor is a follow-up test after resolution of COVID-19, assign Z01.84, Encounter for antibody response examination.

Follow the applicable guidelines above if the individual is being tested to confirm a current COVID-19 infection.

For follow-up testing after a COVID-19 infection, see guideline I.C.1.g.1.j.

**(l) Multisystem Inflammatory Syndrome**

For individuals with multisystem inflammatory syndrome (MIS) and COVID-19, assign code U07.1, COVID-19, as the principal/first-listed diagnosis and assign code M35.81, Multisystem inflammatory syndrome, as an additional diagnosis.

If an individual with a history of COVID-19 develops MIS, assign codes M35.81, Multisystem inflammatory syndrome, and U09.9, Post COVID-19 condition, unspecified.

If an individual with a known or suspected exposure to COVID- 19, and no current COVID-19 infection or history of COVID-19, develops MIS, assign codes M35.81, Multisystem inflammatory syndrome, and Z20.822, Contact with and (suspected) exposure to COVID-19.

Additional codes should be assigned for any associated complications of MIS.

**(m) Post COVID-19 Condition**

For sequela of COVID-19, or associated symptoms or conditions that develop following a previous COVID-19 infection, assign a code(s) for the specific symptom(s) or condition(s) related to the previous COVID-19 infection, if known, and code U09.9, Post COVID-19 condition, unspecified.

Code U09.9 should not be assigned for manifestations of an active (current) COVID-19 infection.

If a patient has a condition(s) associated with a previous COVID-19 infection and develops a new active (current) COVID-19 infection, code U09.9 may be assigned in conjunction with code U07.1, COVID-19, to identify that the patient also has a condition(s) associated with a previous COVID-19 infection. Code(s) for the specific condition(s) associated with the previous COVID-19 infection and code(s) for manifestation(s) of the new active (current) COVID-19 infection should also be assigned.

**(n) Underimmunization for COVID-19 Status**

Code Z28.310, Unvaccinated for COVID-19, may be assigned when the patient has not received a COVID-19 vaccine of any type. Code Z28.311, Partially vaccinated for COVID-19, may be assigned when the patient has been partially vaccinated for COVID-19 as per the recommendations of the Centers for Disease Control and Prevention (CDC) in place at the time of the encounter. For information, visit the CDC's website **https://www.cdc.gov/coronavirus/2019-ncov/vaccines/.**

*See Section I.B.14. for underimmunization documentation by clinicians other than patient's provider.*

# Certain infectious and parasitic diseases (A00-B99)

INCLUDES *diseases generally recognized as communicable or transmissible*

**Use additional** code to identify resistance to antimicrobial drugs (Z16.-)

EXCLUDES1 *certain localized infections - see body system-related chapters*

EXCLUDES2 *carrier or suspected carrier of infectious disease (Z22.-)*

*infectious and parasitic diseases complicating pregnancy, childbirth and the puerperium (O98.-)*

*infectious and parasitic diseases specific to the perinatal period (P35-P39)*

*influenza and other acute respiratory infections (J00-J22)*

**This chapter contains the following blocks:**

| | |
|---|---|
| **A00-A09** | Intestinal infectious diseases |
| **A15-A19** | Tuberculosis |
| **A20-A28** | Certain zoonotic bacterial diseases |
| **A30-A49** | Other bacterial diseases |
| **A50-A64** | Infections with a predominantly sexual mode of transmission |
| **A65-A69** | Other spirochetal diseases |
| **A70-A74** | Other diseases caused by chlamydiae |
| **A75-A79** | Rickettsioses |
| **A80-A89** | Viral and prion infections of the central nervous system |
| **A90-A99** | Arthropod-borne viral fevers and viral hemorrhagic fevers |
| **B00-B09** | Viral infections characterized by skin and mucous membrane lesions |
| **B10** | Other human herpesviruses |
| **B15-B19** | Viral hepatitis |
| **B20** | Human immunodeficiency virus [HIV] disease |
| **B25-B34** | Other viral diseases |
| **B35-B49** | Mycoses |
| **B50-B64** | Protozoal diseases |
| **B65-B83** | Helminthiases |
| **B85-B89** | Pediculosis, acariasis and other infestations |
| **B90-B94** | Sequelae of infectious and parasitic diseases |
| **B95-B97** | Bacterial and viral infectious agents |
| **B99** | Other infectious diseases |

## Intestinal infectious diseases (A00-A09)

4th A00 Cholera

- A00.0 Cholera due to Vibrio cholerae 01, biovar cholerae CC CC/MCC Exc
  - Classical cholera
- A00.1 Cholera due to Vibrio cholerae 01, biovar eltor CC CC/MCC Exc
  - Cholera eltor
- A00.9 Cholera, unspecified CC CC/MCC Exc

4th A01 Typhoid and paratyphoid fevers

- 5th A01.0 Typhoid fever
  - Infection due to Salmonella typhi
  - A01.00 Typhoid fever, unspecified CC CC/MCC Exc
  - A01.01 Typhoid meningitis CC CC/MCC Exc
  - A01.02 Typhoid fever with heart involvement CC CC/MCC Exc
    - Typhoid endocarditis
    - Typhoid myocarditis
  - A01.03 Typhoid pneumonia CC CC/MCC Exc
  - A01.04 Typhoid arthritis CC HCC CC/MCC Exc
  - A01.05 Typhoid osteomyelitis CC HCC CC/MCC Exc
  - A01.09 Typhoid fever with other complications CC CC/MCC Exc
- A01.1 Paratyphoid fever A CC CC/MCC Exc
- A01.2 Paratyphoid fever B CC CC/MCC Exc
- A01.3 Paratyphoid fever C CC CC/MCC Exc
- A01.4 Paratyphoid fever, unspecified CC CC/MCC Exc
  - Infection due to Salmonella paratyphi NOS

4th A02 Other salmonella infections

INCLUDES *infection or foodborne intoxication due to any Salmonella species other than S. typhi and S. paratyphi*

- A02.0 Salmonella enteritis CC CC/MCC Exc
  - Salmonellosis

A02.1 Salmonella sepsis HCC MCC CC/MCC Exc

5th A02.2 Localized salmonella infections

A02.20 Localized salmonella infection, unspecified CC/MCC Exc

A02.21 Salmonella meningitis MCC CC/MCC Exc

A02.22 Salmonella pneumonia MCC CC/MCC Exc

A02.23 Salmonella arthritis CC HCC CC/MCC Exc

A02.24 Salmonella osteomyelitis CC HCC CC/MCC Exc

A02.25 Salmonella pyelonephritis CC CC/MCC Exc

Salmonella tubulo-interstitial nephropathy

A02.29 Salmonella with other localized infection CC CC/MCC Exc

A02.8 Other specified salmonella infections CC CC/MCC Exc

A02.9 Salmonella infection, unspecified CC CC/MCC Exc

4th A03 Shigellosis

**DEFINITION:** Shigellosis is caused by a group of bacteria called Shigella, leading to diarrhea, fever, and stomach cramps.

A03.0 Shigellosis due to Shigella dysenteriae CC CC/MCC Exc

Group A shigellosis [Shiga-Kruse dysentery]

A03.1 Shigellosis due to Shigella flexneri CC/MCC Exc

Group B shigellosis

A03.2 Shigellosis due to Shigella boydii CC/MCC Exc

Group C shigellosis

A03.3 Shigellosis due to Shigella sonnei CC/MCC Exc

Group D shigellosis

A03.8 Other shigellosis CC/MCC Exc

A03.9 Shigellosis, unspecified CC/MCC Exc

Bacillary dysentery NOS

4th A04 Other bacterial intestinal infections

Excludes *bacterial foodborne intoxications, NEC (A05.-)*

*tuberculous enteritis (A18.32)*

A04.0 Enteropathogenic Escherichia coli infection CC CC/MCC Ex6

A04.1 Enterotoxigenic Escherichia coli infection CC CC/MCC Ex6

A04.2 Enteroinvasive Escherichia coli infection CC CC/MCC Ex6

A04.3 Enterohemorrhagic Escherichia coli infection CC CC/MCC Ex6

A04.4 Other intestinal Escherichia coli infections CC CC/MCC Ex6

Escherichia coli enteritis NOS

A04.5 Campylobacter enteritis CC CC/MCC Ex6

A04.6 Enteritis due to Yersinia enterocolitica CC CC/MCC Ex6

EXCLUDES1 *extraintestinal yersiniosis (A28.2)*

5th A04.7 Enterocolitis due to Clostridium difficile

Clostridioides difficile colitis

Foodborne intoxication by Clostridium difficile

Pseudomembranous colitis

A04.71 Enterocolitis due to Clostridium difficile, recurrent CC CC/MCC Ex6

AHA: Q1 2020, Q4 2017

A04.72 Enterocolitis due to Clostridium difficile, not specified as recurrent CC CC/MCC Ex6

AHA: Q4 2017

A04.8 Other specified bacterial intestinal infections CC CC/MCC Ex6

A04.9 Bacterial intestinal infection, unspecified CC CC/MCC Ex6

Bacterial enteritis NOS

4th A05 Other bacterial foodborne intoxications, not elsewhere classified

EXCLUDES1 *Clostridium difficile foodborne intoxication and infection (A04.7-)*

*Escherichia coli infection (A04.0-A04.4)*

*listeriosis (A32.-)*

*salmonella foodborne intoxication and infection (A02.-)*

*toxic effect of noxious foodstuffs (T61-T62)*

A05.0 Foodborne staphylococcal intoxication CC CC/MCC Ex6

A05.1 **Botulism food poisoning** CC CC/MCC Ex0

Botulism NOS

Classical foodborne intoxication due to Clostridium botulinum

EXCLUDES *infant botulism (A48.51)*

*wound botulism (A48.52)*

A05.2 **Foodborne Clostridium perfringens [Clostridium welchii] intoxication** CC CC/MCC Ex0

Enteritis necroticans

Pig-bel

A05.3 **Foodborne Vibrio parahaemolyticus intoxication** CC CC/MCC Ex0

A05.4 **Foodborne Bacillus cereus intoxication** CC CC/MCC Ex0

A05.5 **Foodborne Vibrio vulnificus intoxication** CC CC/MCC Ex0

A05.8 **Other specified bacterial foodborne intoxications** CC CC/MCC Ex0

A05.9 **Bacterial foodborne intoxication, unspecified** CC/MCC Ex0

4th A06 **Amebiasis**

INCLUDES *infection due to Entamoeba histolytica*

EXCLUDES1 *other protozoal intestinal diseases (A07.-)*

EXCLUDES2 *acanthamebiasis (B60.1-)*

*Naegleriasis (B60.2)*

A06.0 **Acute amebic dysentery** CC CC/MCC Ex0

Acute amebiasis

Intestinal amebiasis NOS

A06.1 **Chronic intestinal amebiasis** CC CC/MCC Ex0

A06.2 **Amebic nondysenteric colitis** CC CC/MCC Ex0

A06.3 **Ameboma of intestine** CC CC/MCC Ex0

Ameboma NOS

A06.4 **Amebic liver abscess** MCC CC/MCC Ex0

Hepatic amebiasis

A06.5 **Amebic lung abscess** HCC MCC CC/MCC Ex0

Amebic abscess of lung (and liver)

A06.6 **Amebic brain abscess** MCC CC/MCC Ex0

Amebic abscess of brain (and liver) (and lung)

A06.7 **Cutaneous amebiasis** CC/MCC Ex0

5th A06.8 **Amebic infection of other sites**

A06.81 **Amebic cystitis** CC CC/MCC Ex0

A06.82 **Other amebic genitourinary infections** CC CC/MCC Ex0

Amebic balanitis

Amebic vesiculitis

Amebic vulvovaginitis

A06.89 **Other amebic infections** CC CC/MCC Ex0

Amebic appendicitis

Amebic splenic abscess

A06.9 **Amebiasis, unspecified** CC/MCC Ex0

4th A07 **Other protozoal intestinal diseases**

A07.0 **Balantidiasis** CC/MCC Ex0

Balantidial dysentery

A07.1 **Giardiasis [lambliasis]** CC CC/MCC Ex0

A07.2 **Cryptosporidiosis** CC HCC RxHCC CC/MCC Ex0

A07.3 **Isosporiasis** CC CC/MCC Ex0

Infection due to Isospora belli and Isospora hominis

Intestinal coccidiosis

Isosporosis

A07.4 **Cyclosporiasis** CC CC/MCC Ex0

A07.8 **Other specified protozoal intestinal diseases** CC CC/MCC Ex0

Intestinal microsporidiosis

Intestinal trichomoniasis

Sarcocystosis

Sarcosporidiosis

A07.9 **Protozoal intestinal disease, unspecified** CC CC/MCC Ex0

Flagellate diarrhea
Protozoal colitis
Protozoal diarrhea
Protozoal dysentery

4th A08 **Viral and other specified intestinal infections**

excludes1 *influenza with involvement of gastrointestinal tract (J09.X3, J10.2, J11.2)*

A08.0 **Rotaviral enteritis** CC CC/MCC Ex0

5th A08.1 **Acute gastroenteropathy due to Norwalk agent and other small round viruses**

A08.11 **Acute gastroenteropathy due to Norwalk agent** CC CC/MCC Ex0

Acute gastroenteropathy due to Norovirus
Acute gastroenteropathy due to Norwalk-like agent

A08.19 **Acute gastroenteropathy due to other small round viruses** CC CC/MCC Ex0

Acute gastroenteropathy due to small round virus [SRV] NOS

A08.2 **Adenoviral enteritis** CC CC/MCC Ex0

5th A08.3 **Other viral enteritis**

A08.31 **Calicivirus enteritis** CC CC/MCC Ex0
A08.32 **Astrovirus enteritis** CC CC/MCC Ex0
A08.39 **Other viral enteritis** CC CC/MCC Ex0

Coxsackie virus enteritis
Echovirus enteritis
Enterovirus enteritis NEC
Torovirus enteritis

A08.4 **Viral intestinal infection, unspecified** CC/MCC Ex0

**AHA:** Q3 2016

Viral enteritis NOS
Viral gastroenteritis NOS
Viral gastroenteropathy NOS

A08.8 **Other specified intestinal infections** CC/MCC Ex0

A09 **Infectious gastroenteritis and colitis, unspecified** CC CC/MCC Ex0

Infectious colitis NOS

Infectious enteritis NOS

Infectious gastroenteritis NOS

EXCLUDES *colitis NOS (K52.9)*

*diarrhea NOS (R19.7)*

*enteritis NOS (K52.9)*

*gastroenteritis NOS (K52.9)*

*noninfective gastroenteritis and colitis, unspecified (K52.9)*

## Tuberculosis (A15-A19) (Figure 1.1)

INCLUDES *infections due to Mycobacterium tuberculosis and Mycobacterium bovis*

**Use additional** code, if applicable, for associated cachexia (E88.A)

EXCLUDES *congenital tuberculosis (P37.0)*

*nonspecific reaction to test for tuberculosis without active tuberculosis (R76.1-)*

*pneumoconiosis associated with tuberculosis, any type in A15 (J65)*

*positive PPD (R76.11)*

*positive tuberculin skin test without active tuberculosis (R76.11)*

*sequelae of tuberculosis (B90.-)*

*silicotuberculosis (J65)*

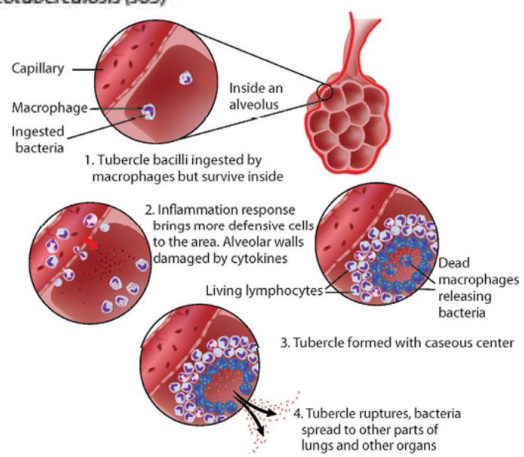

**Figure 1.1 Progression of Tuberculosis**

A15 **Respiratory tuberculosis**

A15.0 **Tuberculosis of lung** CC CC/MCC Ex0

Tuberculous bronchiectasis
Tuberculous fibrosis of lung
Tuberculous pneumonia
Tuberculous pneumothorax

A15.4 **Tuberculosis of intrathoracic lymph nodes** CC CC/MCC Ex0

Tuberculosis of hilar lymph nodes
Tuberculosis of mediastinal lymph nodes
Tuberculosis of tracheobronchial lymph nodes

EXCLUDES1 *tuberculosis specified as primary (A15.7)*

A15.5 **Tuberculosis of larynx, trachea and bronchus** CC CC/MCC Ex0

Tuberculosis of bronchus
Tuberculosis of glottis
Tuberculosis of larynx
Tuberculosis of trachea

A15.6 **Tuberculous pleurisy** CC CC/MCC Ex0

Tuberculosis of pleura Tuberculous empyema

EXCLUDES1 *primary respiratory tuberculosis (A15.7)*

A15.7 **Primary respiratory tuberculosis** CC CC/MCC Ex0

A15.8 **Other respiratory tuberculosis** CC CC/MCC Ex0

Mediastinal tuberculosis
Nasopharyngeal tuberculosis
Tuberculosis of nose
Tuberculosis of sinus [any nasal]

A15.9 **Respiratory tuberculosis unspecified** CC CC/MCC Ex0

4th A17 Tuberculosis of nervous system

A17.0 Tuberculous meningitis MCC CC/MCC Ex0

Tuberculosis of meninges (cerebral)(spinal)

Tuberculous leptomeningitis

EXCLUDES1 *tuberculous meningoencephalitis (A17.82)*

A17.1 Meningeal tuberculoma MCC CC/MCC Ex0

Tuberculoma of meninges (cerebral) (spinal)

EXCLUDES1 *tuberculoma of brain and spinal cord (A17.81)*

5th A17.8 Other tuberculosis of nervous system

A17.81 Tuberculoma of brain and spinal cord MCC CC/MCC Ex0

Tuberculous abscess of brain and spinal cord

A17.82 Tuberculous meningoencephalitis MCC CC/MCC Ex0

Tuberculous myelitis

A17.83 Tuberculous neuritis MCC CC/MCC Ex0

Tuberculous mononeuropathy

A17.89 Other tuberculosis of nervous system MCC CC/MCC Ex0

Tuberculous polyneuropathy

A17.9 Tuberculosis of nervous system, unspecified CC CC/MCC Ex0

4th A18 Tuberculosis of other organs

5th A18.0 Tuberculosis of bones and joints

**See Official Guidelines**, "And" I.A.14

A18.01 Tuberculosis of spine CC CC/MCC Ex0

Pott's disease or curvature of spine

Tuberculous arthritis

Tuberculous osteomyelitis of spine

Tuberculous spondylitis

A18.02 Tuberculous arthritis of other joints CC CC/MCC Ex0

Tuberculosis of hip (joint)

Tuberculosis of knee (joint)

A18.03 **Tuberculosis of other bones** CC CC/MCC Ex0

Tuberculous mastoiditis

Tuberculous osteomyelitis

A18.09 **Other musculoskeletal tuberculosis** CC CC/MCC Ex0

Tuberculous myositis

Tuberculous synovitis

Tuberculous tenosynovitis

5th A18.1 **Tuberculosis of genitourinary system**

A18.10 **Tuberculosis of genitourinary system, unspecified** CC CC/MCC Ex0

A18.11 **Tuberculosis of kidney and ureter** CC CC/MCC Ex0

A18.12 **Tuberculosis of bladder** CC CC/MCC Ex0

A18.13 **Tuberculosis of other urinary organs** CC CC/MCC Ex0

Tuberculous urethritis

A18.14 **Tuberculosis of prostate** A CC CC/MCC Ex0

A18.15 **Tuberculosis of other male genital organs** CC CC/MCC Ex0

A18.16 **Tuberculosis of cervix** CC CC/MCC Ex0

A18.17 **Tuberculous female pelvic inflammatory disease** CC CC/MCC Ex0

Tuberculous endometritis

Tuberculous oophoritis and salpingitis

A18.18 **Tuberculosis of other female genital organs** CC CC/MCC Ex0

Tuberculous ulceration of vulva

A18.2 **Tuberculous peripheral lymphadenopathy** CC CC/MCC Ex0

Tuberculous adenitis

EXCLUDES *tuberculosis of bronchial and mediastinal lymph nodes (A15.4)*

*tuberculosis of mesenteric and retroperitoneal lymph nodes (A18.39)*

*tuberculous tracheobronchial adenopathy (A15.4)*

5th A18.3 **Tuberculosis of intestines, peritoneum and mesenteric glands**

A18.31 **Tuberculous peritonitis** MCC CC/MCC Ex0

Tuberculous ascites

A18.32 **Tuberculous enteritis** CC CC/MCC Ex0

Tuberculosis of anus and rectum

Tuberculosis of intestine (large) (small)

A18.39 **Retroperitoneal tuberculosis** CC CC/MCC Ex0

Tuberculosis of mesenteric glands

Tuberculosis of retroperitoneal (lymph glands)

A18.4 **Tuberculosis of skin and subcutaneous tissue** CC CC/MCC Ex0

Erythema induratum, tuberculous

Lupus exedens

Lupus vulgaris NOS

Lupus vulgaris of eyelid

Scrofuloderma

Tuberculosis of external ear

Excludes *lupus erythematosus (L93.-)*

*systemic lupus erythematosus (M32.-)*

5th A18.5 **Tuberculosis of eye**

Excludes *lupus vulgaris of eyelid (A18.4)*

A18.50 **Tuberculosis of eye, unspecified** CC CC/MCC Ex0

A18.51 **Tuberculous episcleritis** CC CC/MCC Ex0

A18.52 **Tuberculous keratitis** CC CC/MCC Ex0

Tuberculous interstitial keratitis

Tuberculous keratoconjunctivitis (interstitial) (phlyctenular)

A18.53 **Tuberculous chorioretinitis** CC CC/MCC Ex0

A18.54 **Tuberculous iridocyclitis** CC CC/MCC Ex0

A18.59 **Other tuberculosis of eye** CC CC/MCC Ex0

Tuberculous conjunctivitis

A18.6 **Tuberculosis of (inner) (middle) ear** CC CC/MCC Ex0

Tuberculous otitis media

Excludes *tuberculosis of external ear (A18.4)*

*tuberculous mastoiditis (A18.03)*

A18.7 **Tuberculosis of adrenal glands** CC CC/MCC Ex0

Tuberculous Addison's disease

5th A18.8 **Tuberculosis of other specified organs**

A18.81 **Tuberculosis of thyroid gland** CC CC/MCC Ex0

A18.82 **Tuberculosis of other endocrine glands** CC CC/MCC Ex0

Tuberculosis of pituitary gland

Tuberculosis of thymus gland

A18.83 **Tuberculosis of digestive tract organs, not elsewhere classified** CC CC/MCC Ex0

EXCLUDES *tuberculosis of intestine (A18.32)*

A18.84 **Tuberculosis of heart** CC CC/MCC Ex0

Tuberculous cardiomyopathy

Tuberculous endocarditis

Tuberculous myocarditis

Tuberculous pericarditis

A18.85 **Tuberculosis of spleen** CC CC/MCC Ex0

A18.89 **Tuberculosis of other sites** CC CC/MCC Ex0

Tuberculosis of muscle

Tuberculous cerebral arteritis

4th A19 **Miliary tuberculosis**

INCLUDES *disseminated tuberculosis*

*generalized tuberculosis*

*tuberculous polyserositis*

A19.0 **Acute miliary tuberculosis of a single specified site** MCC CC/MCC Ex0

A19.1 **Acute miliary tuberculosis of multiple sites** MCC CC/MCC Ex0

A19.2 **Acute miliary tuberculosis, unspecified** MCC CC/MCC Ex0

A19.8 **Other miliary tuberculosis** MCC CC/MCC Ex0

A19.9 **Miliary tuberculosis, unspecified** MCC CC/MCC Ex0

## Certain zoonotic bacterial diseases (A20-A28)

4th A20 **Plague**

INCLUDES *infection due to Yersinia pestis*

A20.0 **Bubonic plague** MCC CC/MCC Ex0

A20.1 **Cellulocutaneous plague** MCC CC/MCC Ex0

A20.2 **Pneumonic plague** MCC CC/MCC Ex0

A20.3 **Plague meningitis** MCC CC/MCC Ex0

A20.7 **Septicemic plague** HCC MCC CC/MCC Ex0

A20.8 **Other forms of plague** MCC CC/MCC Ex0

Abortive plague

Asymptomatic plague

Pestis minor

A20.9 **Plague, unspecified** MCC CC/MCC Ex0

4th A21 **Tularemia**

INCLUDES *deer-fly fever*
*infection due to Francisella tularensis*
*rabbit fever*

A21.0 **Ulceroglandular tularemia** CC CC/MCC Ex0

A21.1 **Oculoglandular tularemia** CC CC/MCC Ex0

Ophthalmic tularemia

A21.2 **Pulmonary tularemia** CC CC/MCC Ex0

A21.3 **Gastrointestinal tularemia** CC CC/MCC Ex0

Abdominal tularemia

A21.7 **Generalized tularemia** CC CC/MCC Ex0

A21.8 **Other forms of tularemia** CC CC/MCC Ex0

A21.9 **Tularemia, unspecified** CC CC/MCC Ex0

4th A22 **Anthrax**

INCLUDES *infection due to Bacillus anthracis*

A22.0 **Cutaneous anthrax** CC CC/MCC Ex0

Malignant carbuncle

Malignant pustule

A22.1 **Pulmonary anthrax** MCC CC/MCC Ex0

Inhalation anthrax

Ragpicker's disease

Woolsorter's disease

A22.2 **Gastrointestinal anthrax** CC CC/MCC Ex0

A22.7 **Anthrax sepsis** HCC MCC CC/MCC Ex0

A22.8 **Other forms of anthrax** CC CC/MCC Ex0

Anthrax meningitis

A22.9 **Anthrax, unspecified** CC CC/MCC Ex0

4th A23 **Brucellosis**

INCLUDES *Malta fever*

*Mediterranean fever*

*undulant fever*

A23.0 **Brucellosis due to Brucella melitensis** CC/MCC Ex0

A23.1 **Brucellosis due to Brucella abortus** CC/MCC Ex0

A23.2 **Brucellosis due to Brucella suis** CC/MCC Ex0

A23.3 **Brucellosis due to Brucella canis** CC/MCC Ex0

A23.8 **Other brucellosis** CC CC/MCC Ex0

A23.9 **Brucellosis, unspecified** CC CC/MCC Ex0

4th A24 **Glanders and melioidosis**

A24.0 **Glanders** CC CC/MCC Ex0

Infection due to Pseudomonas mallei

Malleus

A24.1 Acute and fulminating melioidosis CC CC/MCC Ex0
Melioidosis pneumonia
Melioidosis sepsis
A24.2 Subacute and chronic melioidosis CC CC/MCC Ex0
A24.3 Other melioidosis CC CC/MCC Ex0
A24.9 Melioidosis, unspecified CC CC/MCC Ex0
Infection due to Pseudomonas pseudomallei NOS
Whitmore's disease
4th A25 Rat-bite fevers
A25.0 Spirillosis CC CC/MCC Ex0
Sodoku
A25.1 Streptobacillosis CC CC/MCC Ex0
Epidemic arthritic erythema
Haverhill fever
Streptobacillary rat-bite fever
A25.9 Rat-bite fever, unspecified CC CC/MCC Ex0
4th A26 Erysipeloid
A26.0 Cutaneous erysipeloid CC/MCC Ex0
Erythema migrans
A26.7 Erysipelothrix sepsis HCC MCC CC/MCC Ex0
A26.8 Other forms of erysipeloid CC/MCC Ex0
A26.9 Erysipeloid, unspecified CC/MCC Ex0
4th A27 Leptospirosis
A27.0 Leptospirosis icterohemorrhagica CC CC/MCC Ex0
Leptospiral or spirochetal jaundice (hemorrhagic)
Weil's disease

5th A27.8 Other forms of leptospirosis

A27.81 Aseptic meningitis in leptospirosis MCC CC/MCC Ex0

A27.89 Other forms of leptospirosis CC CC/MCC Ex0

A27.9 Leptospirosis, unspecified CC CC/MCC Ex0

4th A28 Other zoonotic bacterial diseases, not elsewhere classified

A28.0 Pasteurellosis CC CC/MCC Ex0

A28.1 Cat-scratch disease CC CC/MCC Ex0

Cat-scratch fever

A28.2 Extraintestinal yersiniosis CC CC/MCC Ex0

EXCLUDES1 *enteritis due to Yersinia enterocolitica (A04.6)*

*plague (A20.-)*

A28.8 Other specified zoonotic bacterial diseases, not elsewhere classified CC CC/MCC Ex0

A28.9 Zoonotic bacterial disease, unspecified CC CC/MCC Ex0

## Other bacterial diseases (A30-A49)

4th A30 **Leprosy [Hansen's disease]**

INCLUDES *infection due to Mycobacterium leprae*

EXCLUDES1 *sequelae of leprosy (B92)*

A30.0 **Indeterminate leprosy** CC CC/MCC Ex0

AHA: Q3 2016

I leprosy

A30.1 **Tuberculoid leprosy** CC CC/MCC Ex0

AHA: Q3 2016

TT leprosy

A30.2 **Borderline tuberculoid leprosy** CC CC/MCC Ex0

AHA: Q3 2016

BT leprosy

A30.3 **Borderline leprosy** CC CC/MCC Ex0

AHA: Q3 2016

BB leprosy

A30.4 **Borderline lepromatous leprosy** CC CC/MCC Ex0

AHA: Q3 2016

BL leprosy

A30.5 **Lepromatous leprosy** CC CC/MCC Ex0

AHA: Q3 2016

LL leprosy

A30.8 **Other forms of leprosy** CC CC/MCC Ex0

AHA: Q3 2016

A30.9 **Leprosy, unspecified** CC CC/MCC Ex0

AHA: Q3 2016

4th A31 **Infection due to other mycobacteria**

EXCLUDES *leprosy (A30.-)*

*tuberculosis (A15-A19)*

A31.0 **Pulmonary mycobacterial infection** CC HCC RxHCC CC/MCC Exc

**AHA:** Q3 2016

Infection due to Mycobacterium avium

Infection due to Mycobacterium intracellulare [Battey bacillus]

Infection due to Mycobacterium kansasii

A31.1 **Cutaneous mycobacterial infection** CC CC/MCC Exc

**AHA:** Q3 2016

Buruli ulcer

Infection due to Mycobacterium marinum

Infection due to Mycobacterium ulcerans

A31.2 **Disseminated mycobacterium avium-intracellulare complex (DMAC)** CC HCC RxHCC CC/MCC Exc

**AHA:** Q3 2016

MAC sepsis

A31.8 **Other mycobacterial infections** CC CC/MCC Exc

**AHA:** Q3 2016

A31.9 **Mycobacterial infection, unspecified** CC CC/MCC Exc

**AHA:** Q3 2016

Atypical mycobacterial infection NOS

Mycobacteriosis NOS

4th A32 **Listeriosis**

INCLUDES *listerial foodborne infection*

EXCLUDES1 *neonatal (disseminated) listeriosis (P37.2)*

A32.0 **Cutaneous listeriosis** CC CC/MCC Exc

**AHA:** Q3 2016

5th A32.1 Listerial meningitis and meningoencephalitis

A32.11 Listerial meningitis CC CC/MCC Ex0

AHA: Q3 2016

A32.12 Listerial meningoencephalitis CC CC/MCC Ex0

AHA: Q3 2016

A32.7 Listerial sepsis HCC MCC CC/MCC Ex0

AHA: Q3 2016

5th A32.8 Other forms of listeriosis

A32.81 Oculoglandular listeriosis CC CC/MCC Ex0

AHA: Q3 2016

A32.82 Listerial endocarditis CC CC/MCC Ex0

AHA: Q3 2016

A32.89 Other forms of listeriosis CC CC/MCC Ex0

AHA: Q3 2016

Listerial cerebral arteritis

A32.9 Listeriosis, unspecified CC CC/MCC Ex0

AHA: Q3 2016
